

RECORD OF PROCEEDINGS
OF THE
BOARD OF TRUSTEES
OF THE
OHIO STATE UNIVERSITY

COLUMBUS

July 1, 1988 to June 30, 1989

VOLUME 1

1988-1989

THE OHIO STATE UNIVERSITY

Edward H. Jennings, President

BOARD OF TRUSTEES

	<u>Term Beginning</u>	<u>Term Expiring</u>
Leonard J. Immke, Columbus	May 14, 1980	May 13, 1989
John W. Berry, Dayton	May 14, 1981	May 13, 1990
Shirley D. Bowser, Williamsport	May 14, 1982	May 13, 1991
Hamilton J. Teaford, Columbus	May 14, 1983	May 13, 1992
John J. Barone, Toledo	May 14, 1984	May 13, 1993
Deborah E. Casto, Columbus	May 14, 1985	May 13, 1994
John W. Kessler, Columbus	May 14, 1986	May 13, 1995
Milton A. Wolf, Cleveland	May 14, 1987	May 13, 1996
Leslie H. Wexner, Columbus	May 14, 1988	May 13, 1997
Laurel A. Davis,* Tipp City	February 6, 1989	May 13, 1990
Sophia L. Paige,* Columbus	February 6, 1989 May 14, 1989	May 13, 1989 May 13, 1991

* Student Trustee -- non voting.

OFFICERS

Leonard J. Immke, Chairman
John W. Berry, Vice Chairman
Madison H. Scott, Secretary
James L. Nichols, Treasurer

THE OHIO STATE UNIVERSITY
OFFICIAL PROCEEDINGS OF THE
ONE THOUSAND TWO HUNDRED AND FORTY-THIRD MEETING
OF THE BOARD OF TRUSTEES

Columbus, Ohio, July 8, 1988

The Board of Trustees met at its regular monthly meeting on Friday, July 8, 1988, at The Ohio State University Fawcett Center for Tomorrow, Columbus, Ohio, pursuant to adjournment.

* * *
Minutes of the last meeting were approved.
* * *

July 8, 1988 meeting, Board of Trustees

The Chairman, Mr. Immke, called the meeting of the Board of Trustees to order on July 8, 1988, at 9:45 a.m.

Present: Leonard J. Immke, Chairman, John W. Berry, Shirley D. Bowser, John J. Barone, John W. Kessler, and Milton A. Wolf.

--0--

Mr. Immke:

I would like to call on Mr. Covert to make the committee report for the Hospitals Board.

Mr. Covert:

Mr. Chairman and Members of the Board, the Hospitals Board met on June 23, and we had a very full agenda at that session. We began our meeting with a presentation by Mrs. Bette Dare, who is our retiring President of the Hospitals' Service Board. She summarized a number of organizational activities during the last year and the Board wished her well and thanked her for her efforts. Mrs. Kay Bradford is going to assume that position and I am sure that we will be receiving reports from her in the future.

The Board at that session unanimously elected Dr. John Kramer as our new Chairman, and requested that the Trustees waive the Hospitals Board Bylaws limitation on two consecutive terms of office so that Mr. Jack Havens could serve a third term as our Vice Chairman. We further requested at that session a Bylaws revision that would allow us to create an Emeritus Hospitals Board membership, which would be awarded by the Trustees as they saw fit to members of the Board in recognition of unique contributions to the Hospitals.

We heard several presentations -- one of those related to what we refer to as our Employee Suggestion Award Program, which is a plan which rewards and recognizes employees for new ideas which result in real dollar savings to the organization. We heard a report from Mrs. Barbara Buker, Administrator for Nursing Services, who talked to us about the nurse shortage and concerns we might have, not only in the local community, but also how they might effect OSU Hospitals and how we could try and respond to those issues as they arise in the future. I think it is a national problem. We have talked about this in the past and you have heard some things about that. I think we need to be prepared, all institutions in the community, to be able to deal with those changes in the future.

We had a Cancer Committee meeting of our Board in which they proposed changes for our consideration in the organizational structure. The intent behind some of those changes would be to allow us to apply for an exemption from the Health Care Financing Administration and their present reimbursement program. If we were to achieve the exemption, the Hospitals could gain an additional \$3 to \$4 million in reimbursements from Medicare beyond that which we would have today. It would put us in a better position financially as the Cancer Hospital gets off

July 8, 1988 meeting, Board of Trustees

Mr. Covert: (contd)

the ground. After some extensive discussion, the plan was agreed to be forwarded to Dr. Jennings and given the opportunity to review that, the Board would follow any of his particular recommendations on the structure of the Cancer Hospital in the future. We would hope to apply for that exemption in the next 30-60 sixty days and I would anticipate we would hear something, hopefully, by the first of the next calendar year.

After review and approval by the Hospitals' Credentials Committee and the Medical Staff Administrative Committee, nominations for medical staff appointments and reappointments were endorsed by the Hospitals Board. I believe you have a number of those in your packet today and you have had the opportunity to review them.

The Professional Affairs Committee heard reports concerning our Human Subjects Review Committee. As you know, we are guided by federal guidelines that whenever individuals are involved in clinical research we follow very strict guidelines. So we shared with the Board what exactly those guidelines were and how we monitor ourselves in that regard. We heard about our outreach program for our first-year medical students. You might not be familiar with the fact that they do a number of clinical clerkships out in various settings: nursing homes, MedOhio's, and in other settings.

There were a number of other issues that we talked about in the quality assurance area, the ambulatory surgery program, and the integration of Hospitals and Clinic medical records -- I know this has been a concern to not only Board Members, but the Hospitals Board as well. We are trying to make that a more efficient operation in the future.

We had the opportunity to report on our MedOhio urgent care network and we feel good about the progress we have made. At this point in time, and I think that I reported to this Board previously, we think it is on an even keel and has a solid referral base to it. The facilities are providing very specific educational opportunities and locations for our students and residents and so we feel very good about that.

We heard reports on our information systems, on our traffic and parking issues, and outpatient billing. As you know, Mr. Redman had asked me at his last meeting here where we stood with reference to the centralization of any of our activities to minimize some of the billing problems. At that time I indicated to him that in the month of June and the beginning of July we would be specifically studying that issue with some outside help and be making some changes with regard to that system. That is in progress at this point and I am sure that the Hospitals Board will hear more reports on that in the future.

Finally, we expressed our gratitude for Mr. Immke's participation on the Hospitals Board and Mr. Vorys' leadership as our

July 8, 1988 meeting, Board of Trustees

Mr. Covert: (contd)

Chairman for the last two years. And if I might, Mr. Chairman, take this opportunity -- Shirley was going to do this but since she is not here -- this was a resolution that was passed by the Hospitals Board at the last meeting: "In recognition of outstanding service as a Trustee Member of The Ohio State University Hospitals Board, May 1986 through May 1988, The Ohio State University Hospitals Board conveys to Leonard J. Immke, a loyal friend of the University and faithful custodian of the University Hospitals its sincere appreciation and accommodation," and signed by the appropriate people. On behalf of the Board, I would like to present this to you.

Mr. Chairman, that concludes my report.

Mr. Immke:

Thank you. Mike, before you leave -- on behalf of the Board of Trustees and all of Ohio State University, I would like to sincerely thank you for your tireless efforts over the last three years that you have been in charge of University Hospitals. We are going to miss you. We wish you the best with your new endeavors.

Mr. Covert:

Thank you, very much. I have very much appreciated the support that I have had in the three years that I have been here from Dr. Tzagournis, members of the Hospitals Board, the President, and the central administration staff. We have not always been known to agree upon issues, but we agree upon the principles and what the University stands for and what we are trying to achieve at the University Hospitals. I very much appreciate the time that the Trustees have given us, because without that involvement and support, I don't think we would have progressed as much as we have in the last three years. We have come a long way. I think we are a strong organization and we are a stable organization. I think we have every reason to feel very good about The Ohio State University Hospitals. We have a tendency on occasion in our own organization to get down upon ourselves and our problems. And when you step back and you take a look at it, we have every reason to feel that we are one of the finest university hospitals in the United States. We have no reason to take a back seat to anyone. Ohio State has reason to be proud of its Hospitals and the people that are there for the research that is being conducted. I know I shouldn't normally have to say that, but once in a while maybe you need to hear that, too. I am very pleased to have been a part of it. I will always be a "Buckeye" and I will always look with fondness upon the growth of the Hospitals. I think we are going in the right direction. I appreciate the time that you have given me and the patience that you have had with me over the last three years. Thank you.

Mr. Immke:

Thank you, Mike. I would like to call on Mr. Barone, Research Foundation Report --

July 8, 1988 meeting, Board of Trustees

Mr. Barone:

Thank you, Mr. Chairman. At this time I would like to read a report on the Research Foundation Grants and Contracts for the month of May 1988, which are in the Board Agenda Book.

There were 98 awards listed which provide a gross income of \$8.5 million. For the first eleven months of the fiscal year July 1, 1987, to May 31, 1988, we received 1,110 awards for a gross income of \$91.9 million. This represents an eight-tenths of a percent decrease in funding for the eleven-month period. Funding from the federal government, the State of Ohio, and the industry is running ahead of last year's pace. The decrease in funding and the other non-federal sector is accounted for primarily by the impact of an \$11 million multi-year award received in May 1987, from the Midwest University Consortium for the International Activities for the Indonesia Second University Development Project.

Some highlights of awards for May are:

- * \$1,500,000 award from the National Science Foundation to Taylan Altan of the Engineering Experiment Station for the continuation of the Engineering Research Center for Net Shape Manufacturing.
- * \$1,000,000 award from the Midwest Universities Consortium for International Activities to David O. Hansen of the Office of International Programs in Agriculture, for the continuation of the Burma Agricultural Production Project.
- * \$962,543 award from the U.S. Department of Education to Thomas M. Stephens of the College of Education - Administration for the Regional Resource Center.

In my report through the end of May there was an eight-tenths percent decrease in the awards; however, since this report, our vice president for Research and Graduate Studies has obtained the results for the month of June. I would like to call on Jack Hollander to elaborate on this matter.

Dr. Jack Hollander:

Thank you, very much, Mr. Barone. As Mr. Barone mentioned, one of the factors that gave us such a good year last year was the \$11 million award for research and development in the southeast Asian countries. It was a tremendously good month in May, last year. Just five minutes ago I received some fast breaking news that the fiscal year has now been closed. I can report that this year the month of June has been very good and the total for the fiscal year, including the month of June, is \$106.6 million, which does not represent a decrease, but in fact a 5 percent increase over last year. So we continue to grow in our research income as well as quality. Although I have reported to the Board several times, as you look at these data on a month by month, quarter by quarter basis they go up and down. But each year we have increased the total from the previous year and it

July 8, 1988 meeting, Board of Trustees

Dr. Hollander: (contd)

looks like we will be up 5 percent this year for another very, very good year for the University. Thank you.

Mr. Barone:

Any questions? Thank you, Jack. Mr. Chairman, that ends my Research Report.

Mr. Immke:

Thank you, John.

President Jennings:

Jack, on that 5 percent increase -- that, of course, understates the growth because of the loss of the National Center for Research and Vocational Education award which was \$6 million. So without that loss, it would have been up 11 percent or 12 percent which is even more substantial.

Mr. Barone:

Without that loss, it would have been the best year ever -- way beyond our imagination.

Mr. Immke:

Thank you.

--0--

NEW DEGREE PROGRAM

Resolution No. 89-1

Synopsis: The establishment of a Ph.D. degree program in Neuroscience is proposed.

WHEREAS the Council on Research and Graduate Studies and the Council on Academic Affairs approved the establishment of a Ph.D. program in Neuroscience; and

WHEREAS the establishment of such a Ph.D. degree program will help meet a major state and national need for high quality broadly based research devoted to the nervous systems; and

WHEREAS the proposed interdisciplinary Ph.D. program is an extension of the strong interdisciplinary research efforts of the Departments of Anatomy, Internal Medicine, Medical Microbiology and Immunology, Molecular Genetics, Neurology, Oral Biology, Otolaryngology, Pathology, Pharmacology, Physiology, Physiological Chemistry, Psychiatry, Psychology, Radiology, Surgery, and Zoology; and

WHEREAS sufficient resources and student demand exist to support the proposed Ph.D. program in Neuroscience; and

July 8, 1988 meeting, Board of Trustees

NEW DEGREE PROGRAM (contd)

WHEREAS the University Senate approved the establishment of a Ph.D. degree program in Neuroscience on June 4, 1988:

NOW THEREFORE

BE IT RESOLVED, That the proposal to establish a Ph.D. degree program in Neuroscience is hereby approved.

Upon motion of Mr. Berry, seconded by Ambassador Wolf, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

MERGER OF TWO DEPARTMENTS

Resolution No. 89-2

Synopsis: The merger of the Department of Ceramic Engineering and the Department of Metallurgical Engineering into the Department of Materials Science and Engineering is proposed.

WHEREAS the merger of the Department of Ceramic Engineering and the Department of Metallurgical Engineering into the Department of Materials Science and Engineering has been approved by the Council on Academic Affairs, the College of Engineering, the Department of Ceramic Engineering, and the Department of Metallurgical Engineering; and

WHEREAS the proposed merger of the two Departments will provide Ohio State with the faculty and resources necessary to become a leader nationwide among such departments; and

WHEREAS the merger will enhance the proposed Department's ability to recruit high quality faculty and graduate students, and to compete for external funds; and

WHEREAS the proposed new Department, Materials Science and Engineering, reflects the nationwide trend and research thrust encompassing a broader spectrum of materials; and

WHEREAS current undergraduate and graduate academic programs will not be altered; and

WHEREAS the University Senate approved the merger of the Department of Ceramic Engineering and the Department of Metallurgical Engineering into the Department of Materials Science and Engineering on June 4, 1988:

NOW THEREFORE

BE IT RESOLVED, That the merger of the Department of Ceramic Engineering and the Department of Metallurgical Engineering into the Department of Materials Science and Engineering, effective Autumn Quarter 1988, is hereby approved.

Upon motion of Mr. Kessler, seconded by Mr. Berry, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

July 8, 1988 meeting, Board of Trustees

AMENDMENTS TO THE RULES OF THE UNIVERSITY FACULTY

Resolution No. 89-3

Synopsis: Amendments to rule 3335-5-486 and the rescission of rule 3335-5-4814 are being proposed.

WHEREAS the University Senate pursuant to rule 3335-1-09 of the Administrative Code is authorized to recommend through the President to the Board of Trustees the adoption of amendments to the Rules of the University Faculty as approved by the University Senate; and

WHEREAS the proposed changes in the Rules of the University Faculty were approved by the University Senate on June 4, 1988, as follows:

AMENDED RULES

3335-5-486 Council on admission and registration.

(A) Unchanged.

(B) Duties and responsibilities.

- (1) Review current practices and policies, initiate recommendations for change, and review proposed changes in practices and policies concerning admission to the university, registration and scheduling, quarter-end validation procedures, and student academic records. These would include, but not be limited to:
 - (a) Selection criteria, conditions, requirements, restrictions, fees, deadlines, and procedures for evaluation of transfer credit as these pertain to admission to the university.
 - (b) Procedures and policies for registration and scheduling including scheduling priorities for students, restrictions on scheduling, and student schedule adjustments, as well as deadlines and fees associated with registration and scheduling.
 - (c) Content of student academic records, as well as their compilation, maintenance, dissemination, and use.
- (2) Monitor the University calendar and make adjustments as needed following consultation with the council on academic affairs, the council of deans, and other appropriate bodies, or recommend major changes in the university calendar.

Recommendations on these matters should be made to the university administrators dealing with admission, registration and scheduling, and to the university senate as appropriate. The vice president for academic affairs and provost, the vice provost for student affairs, the office of the university senate, and the vice president for finance shall be notified of all actions of the council. Recommendations which in the opinion of the vice president for academic affairs and provost would affect academic policies shall be reviewed by the council on academic affairs.

July 8, 1988 meeting, Board of Trustees

AMENDMENTS TO THE RULES OF THE UNIVERSITY FACULTY (contd)

Balance unchanged.

3335-5-4814 University calendar committee.

To be rescinded.

NOW THEREFORE

BE IT RESOLVED, That the foregoing amendments to the Rules of the University Faculty be adopted as recommended by the University Senate.

Upon motion of Ambassador Wolf, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0---

AMENDMENTS TO THE UNIVERSITY HOSPITALS BOARD BYLAWS

Resolution No. 89-4

Synopsis: Amendments to the University Hospitals Board Bylaws are proposed.

WHEREAS pursuant to 3335-103-01 of the University Hospitals Board Bylaws, the University Hospitals Board Bylaws may be amended by The Ohio State University Board of Trustees; and

WHEREAS the proposed amendments to Bylaw 3335-93-01 has been endorsed and ratified by the University Hospitals Board on June 23, 1988, as follows:

AMENDED BYLAW

3335-93-01 University hospitals board.

- (A) The body responsible to the Ohio state university board of trustees for oversight of patient care services, the university hospitals' support of the Ohio state university health sciences academic programs, shall be known as the university hospitals board (herein called board).
- (1) The hospitals board will be composed of two members of the Ohio state university board of trustees (trustee members) and twelve citizens from the general public (citizen members), all appointed by the Ohio state university board of trustees in consultation with the president of the university. No employee of the university shall be eligible for board membership.
 - (2) The president of the Ohio state university shall be an ex-officio member of the hospitals board.
 - (3) Insofar as feasible, the selection criteria will ensure that the hospitals board membership will include persons with business expertise, persons with legal expertise, persons with knowledge of health care issues, persons knowledgeable about the academic mission of university hospitals, and persons who can assist the hospitals in its relations with the public and

July 8, 1988 meeting, Board of Trustees

AMENDMENTS TO THE UNIVERSITY HOSPITALS BOARD BYLAWS (contd)

governmental entities. Selection processes will incorporate the affirmative action policies of the university.

- (4) The term of office for the twelve citizen members will be three years. At the discretion of the Ohio state university board of trustees, any citizen member may serve three consecutive full terms.
- (5) In addition to the hospitals board members, the following, at the board's request, will participate in deliberations, will receive agenda and minutes, and from time to time will be invited to attend board meetings and other activities, and to submit agenda items:

Persons designated by the university's board of trustees as emeritus hospitals board members
Executive director of university hospitals
Deans of health sciences colleges
Medical director of university hospitals
Chief, hospitals medical staff, or
equivalent position

- (6) The president of the Ohio state university will serve as the university's primary administrative contact with the hospitals board and shall interpret proposals and recommend actions of the hospitals board to the university's board of trustees.
 - (7) The executive director of university hospitals will serve as the non-voting secretary to the board and provide such staff services for the board as may be requested.
- (B) In carrying out its responsibilities as defined in rule 3335-93-02 of the Administrative Code, the board shall seek continuing guidance from health professionals, management specialists, and others with professional expertise. The hospitals board may choose to have a periodic review of university hospitals activities by a board of visitors. The visitors, consisting of persons of national eminence in health care fields, would be selected in consultation with the president of the university.
- (C) In recognition of unique contributions to university hospitals, former members of the hospitals board may be designated by the University's board of trustees as emeritus hospitals board members. Emeritus hospitals board members will be non-voting members, and will serve for a three-year term of office.

NOW THEREFORE

BE IT RESOLVED, That the foregoing amendments to the University Hospitals Board Bylaws be adopted as recommended by the University Hospitals Board.

Upon motion of Ambassador Wolf, seconded by Mr. Berry, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

July 8, 1988 meeting, Board of Trustees

DEGREES AND CERTIFICATES - SUMMER QUARTER COMMENCEMENT

Resolution No. 89-5

Synopsis: Approval is being requested for awarding degrees and certificates for Summer Quarter Commencement.

WHEREAS pursuant to paragraph (E) of rule 3335-1-06 of the Administrative Code, the Board has authority for the issuance of degrees and certificates; and

WHEREAS the faculties of the colleges and schools shall transmit, in accordance with rule 3335-9-29 of the Administrative Code, for approval by the Board of Trustees the names of persons who have completed degree and certificate requirements:

NOW THEREFORE

BE IT RESOLVED, That the degrees and certificates be conferred on September 1, 1988, to those persons who have completed the requirements for their respective degrees and certificates and are recommended by the colleges and schools, and that the names of those persons awarded degrees and certificates be included in the minutes of this meeting.

Upon motion of Mr. Berry, seconded by Mr. Barone, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

PERSONNEL ACTIONS

Resolution No. 89-6

RESOLVED, That the personnel actions as recorded in the Personnel Budget Records of the University since the June 3, 1988 meeting of the Board, including the following Appointments, Change in Title, Appointment of Chairpersons of Academic Faculty and Departments, Reappointments of Chairpersons of Departments and Directors of Centers, Leaves of Absence Without Salary, Leave of Absence Without Salary--Change of Dates, Professional Improvement Leaves, Professional Improvement Leaves--Change of Dates, Professional Improvement Leave--Cancellation, Promotions/Tenure, and Emeritus Titles as detailed in the University Budget be approved, and the Medical Staff Appointments/Reappointments approved May 26, and June 23, 1988, by the Hospitals Board be ratified.

Appointments

Name:	JAMES J. COUNTRYMAN
Title:	Dean and Director/Adjunct Professor
Regional Campus:	Lima
Department:	Mathematics
Effective:	August 15, 1988
Salary:	\$79,200.00
Present Position:	Vice President for Academic and Student Affairs, State University of New York, College of Technology at Utica/Rome, Utica, New York

July 8, 1988 meeting, Board of Trustees

PERSONNEL ACTIONS (contd)

Appointments (contd)

Name: DONALD HARRIS
Title: Dean/Professor
College/School: Arts/Music
Effective: September 1, 1988
Salary: \$96,000.00
Present Position: Dean, Hartt School of Music, University of Hartford,
West Hartford, CT

Name: RICHARD M. HILL
Title: Dean/Professor
College: Optometry
Effective: July 1, 1988
Salary: \$92,640.00
Present Position: Associate Dean and Professor, College of Optometry

Name: BOBBY D. MOSER
Title: Director/Associate Dean/Professor
Office/College/ Department: Cooperative Extension Service/Agriculture/Animal
Science
Effective: July 1, 1988
Salary: \$92,040.00
Present Position: Associate Dean of Agriculture and Director of
Agriculture Extension Programs, University of
Missouri, Columbia, MO

Name: ROBERT STEARNS
Title: Director/Associate Dean/Adjunct Professor
Center/College/ Department: Wexner Center for the Visual Arts/The Arts -
Administration/Art
Effective: October 1, 1988
Salary: \$92,040.00
Present Position: Director, Performing Arts, Walker Art Center,
Minneapolis, Minnesota

Name: JOSEPH R. DRAGO
Title: Professor (The Louis Levy Professorship for
Cancer)
College/Department: Medicine - Administration/Surgery
Effective: June 1, 1988
Salary: \$59,880.00
Present Position: Director/Professor, Department of Surgery -
Division of Urology

Change in Title

Name: ROBERT L. ARNOLD
Title: Associate Dean
College: The Arts - Administration
Effective: September 1, 1988
Salary: N/A
Present Position: Acting Dean, College of The Arts

July 8, 1988 meeting, Board of Trustees

PERSONNEL ACTIONS (contd)

Appointment of Chairpersons of Academic Faculty and Departments

July 1, 1988 through June 30, 1989

Family Medicine	Patrick J. Fahey*
Preventive Medicine	Douglas A. Rund*

July 1, 1988 through June 30, 1992

Ophthalmology	Paul A. Weber
---------------	---------------

October 1, 1988 through September 30, 1992

Academic Faculty of Marketing	James L. Ginter
Classics	Jane M. Snyder

*Acting Chair

Reappointments of Chairpersons of Departments and Directors of Centers

October 1, 1987 through September 30, 1991

Center for Comparative Studies	Marilyn R. Waldman
--------------------------------	--------------------

July 1, 1988 through June 30, 1989

Physical Medicine	Ernest W. Johnson
-------------------	-------------------

July 1, 1988 through June 30, 1992

Internal Medicine	Ernest L. Mazzaferri
Otolaryngology	David E. Schuller
Pathology	Donald A. Senhauser

October 1, 1988 through September 30, 1992

Anthropology	Chung-Min Chen
Center for Medieval and Renaissance Studies	Christian K. Zacher
Economics	Edward J. Ray
Family and Community	Grayce M. Sills
Philosophy	Marshall W. Swain

Leaves of Absence Without Salary

CAROL D. AUSTIN, Associate Professor, College of Social Work, effective Autumn Quarter 1988, Winter Quarter and Spring Quarter 1989, to accept the position as Director of the Ohio Department of Aging.

DAVID G. PAULOWICH, Assistant Professor, Department of Mathematics (Lima Campus), effective Autumn Quarter 1988, Winter Quarter and Spring Quarter 1989, for personal reasons.

July 8, 1988 meeting, Board of Trustees

PERSONNEL ACTIONS (contd)

Leave of Absence Without Salary--Change of Dates

REBECCA D. JACKSON, Assistant Professor, Department of Internal Medicine, change dates from October 19, 1987, through June 30, 1988, to October 19, 1987, through May 16, 1988.

Professional Improvement Leaves

LOREN V. GEISTFELD, Associate Dean, College of Home Economics, effective September 1, 1988, through June 10, 1989.

JOHN L. HEYWOOD, Associate Professor, School of Natural Resources, effective January 3, 1989, through June 15, 1989.

Professional Improvement Leaves--Change of Dates

JERRY M. BIGHAM, Associate Professor, Department of Agronomy, change leave from August 1, 1988, through July 31, 1989, to September 1, 1988, through July 31, 1989.

ROBERT J. STANTON, Associate Professor, Department of Mathematics, change leave from Autumn Quarter 1988, Winter Quarter and Spring Quarter 1989, to Winter Quarter, Spring Quarter and Autumn Quarter 1989.

Professional Improvement Leave--Cancellation

DONALD A. SYLVAN, Associate Professor, Department of Political Science, effective Autumn Quarter 1988, Winter Quarter and Spring Quarter 1989.

Promotions and Tenure

College of Agriculture

SANTI R. BHOWMIK, Department of Food Science and Nutrition, tenure, effective September 1, 1989.

College of Education

DAVID E. FERNIE, Department of Theory and Practice, promotion to Associate Professor with tenure, effective October 1, 1988.

College of Humanities

WALTER A. DAVIS, Department of English, promotion to Professor, effective October 1, 1988.

KAREN SUE JEWELL, Department of Black Studies, tenure, effective October 1, 1988.

University Libraries

JAMES L. MURPHY, University Libraries, promotion to Associate Professor with tenure, effective July 1, 1988.

July 8, 1988 meeting, Board of Trustees

PERSONNEL ACTIONS (contd)

Promotions and Tenure (contd)

College of Medicine

JOHN FREDERICK CORNHILL, Department of Surgery, promotion to Professor, effective October 1, 1988.

GOPI A. TEJWANI, Department of Pharmacology, promotion to Associate Professor, effective July 1, 1988.

College of Social and Behavioral Sciences

BRIAN M. POLLINS, Department of Political Science, promotion to Associate Professor with tenure, effective October 1, 1988.

ANTHONY R. WALKER, Department of Anthropology, tenure, effective October 1, 1989.

College of Veterinary Medicine

KENT H. HOBLET, Department of Veterinary Preventive Medicine, promotion to Associate Professor with tenure, effective July 1, 1988.

Emeritus Titles

JAMES H. WILLIAMS, College of Medicine - Administration and Department of Obstetrics and Gynecology, with the title Associate Dean and Professor Emeritus, effective July 1, 1988.

JAMES S. BIDDLE, Lima Campus and Department of Mathematics, with the title Dean and Director and Assistant Professor Emeritus, effective July 1, 1988.

DAVID L. BICKELHAUPT, Academic Faculty of Finance, with the title Professor Emeritus, effective July 1, 1988.

D. LYLE GOLEMAN, Cooperative Extension Service, with the title Professor Emeritus, change effective date from July 1, 1988, to January 1, 1989.

ROBERT D. LARUE, Department of Engineering Graphics, with the title Professor Emeritus, effective July 1, 1988.

CHARLES V. MECKSTROTH, Department of Surgery - Thoracic and Cardiovascular Surgery, with the title Professor Emeritus, effective July 1, 1988.

RAYMOND H. MUESSIG, Department of Educational Studies: Humanities, Science, Technological and Vocational, with the title Professor Emeritus, effective July 1, 1988.

THOMAS H. ROCKWELL, Department of Industrial and Systems Engineering, with the title Professor Emeritus, effective July 1, 1988.

July 8, 1988 meeting, Board of Trustees

PERSONNEL ACTIONS (contd)

Emeritus Titles (contd)

CHARLES W. SMITH, Department of Physiology, with the title Professor Emeritus, effective July 1, 1988.

ROBERT D. TOUSE, School of Natural Resources, with the title Professor Emeritus, effective July 1, 1988.

ELDRIDGE A. WHITEHURST, Department of Civil Engineering, with the title Professor Emeritus, effective July 1, 1988.

M. JEAN DAUBENMIRE, Department of Family and Community, with the title Associate Professor Emeritus, effective July 1, 1988.

CLAIR A. JOHNSON, School of Allied Medical Professions, with the title Associate Professor Emeritus, effective August 1, 1988.

RICHARD C. KELSEY, Department of Educational Services and Research, with the title Associate Professor Emeritus, effective July 1, 1988.

JOSEPH C. MCCLANAHAN, Cooperative Extension Service, with the title Associate Professor Emeritus, effective July 1, 1988.

MARY SEATON BREESE, School of Allied Medical Professions, with the title Assistant Professor Emeritus, effective July 1, 1988.

ALAN W. ENGLE, Department of English (Marion Campus), with the title Assistant Professor Emeritus, effective July 1, 1988.

MARY F. HULL, School of Health, Physical Education and Recreation, with the title Assistant Professor Emeritus, effective July 1, 1988.

HELEN L. WALLACE, Department of Life Span Process, with the title Assistant Professor Emeritus, effective July 1, 1988.

Upon motion of Mr. Kessler, seconded by Mr. Barone, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

RESOLUTIONS IN MEMORIAM

Resolution No. 89-7

Synopsis: Resolutions honoring the service of six of the University's faculty members who have recently died are being proposed.

RESOLVED, That the Board adopt the following Resolutions in Memoriam and that the President be requested to convey a copy to the families of the deceased.

July 8, 1988 meeting, Board of Trustees

RESOLUTIONS IN MEMORIAM (contd)

Donald J. Borror

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on April 28, 1988, of Donald J. Borror, Professor Emeritus in the Department of Entomology.

Professor Donald J. Borror was born on August 24, 1907, in Shepard (Franklin County), Ohio. He graduated from Columbus North High School in 1924 and from Otterbein College (magna cum laude) in 1928, with a B.S. degree, majoring in biology and education. He then entered The Ohio State University as a graduate assistant in Zoology. He received his M.S. degree in 1930 and his Ph.D. in 1935 (both in Entomology).

Dr. Borror spent his entire professional career teaching and conducting research at The Ohio State University. He was a Graduate Assistant (1928-1930), Instructor (1930-1946), Assistant Professor (1946-1948), Associate Professor (1948-1959), and Professor (1959 until his retirement in 1977). Upon his retirement he was named Professor Emeritus. This service was interrupted from 1944 to 1946 by World War II, when he served as a U.S. Naval officer in the Pacific Theater.

Throughout his career, Dr. Borror was interested in research on insects, especially dragonflies and damselflies and, from the early 1950's until his death, on animal sounds, especially bird songs. Besides serving as major professor to numerous graduate students both in Entomology and Bioacoustics, he leaves an indelible mark for research in both disciplines.

In Entomology he was senior author of the classic, "Introduction to the Study of Insects," of which a sixth edition is in final preparation. He also was senior author of "A Field Guide to the Insects of America North of Mexico" (with Richard E. White), and "Dictionary of Word Roots and Combining Forms," in addition to 24 scientific papers on insects.

In the fields of Ornithology and Bioacoustics, he produced 11 phonograph records (10 on birds, 1 on insects) and published over 50 scientific papers on birds and animal sounds. The Bioacoustics Laboratory at The Ohio State University was officially designated the Borror Laboratory of Bioacoustics in 1977.

Dr. Borror's ability to concentrate completely on a given project and seemingly never wasting a moment nor a motion is legendary among students and faculty at Ohio State. When asked by a colleague how he managed to accomplish so much his reply was: "I do all my coffee drinking at mealtime."

On behalf of the University community, the Board of Trustees expresses to the family of Dr. Borror its deepest sympathy. It was directed that this resolution be inscribed in the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's realization of the loss that the family, the University, and his many friends and associates have sustained.

July 8, 1988 meeting, Board of Trustees

RESOLUTIONS IN MEMORIAM (contd)

James K. Duncan

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on May 1, 1988, of James K. Duncan, Professor Emeritus in the Department of Educational Policy and Leadership.

Professor Duncan was born in Barre, Vermont, on August 1, 1917, and began his affiliation with The Ohio State University as an Associate Professor in the College of Education in 1965, where he was promoted to full Professor in 1968. He received his B.S. in Engineering, M.A. in Secondary Education from the University of Vermont, and earned his Ed.D. from the University of Florida in 1954. Prior to coming to Ohio State, Professor Duncan taught at both Temple University and Keene State College. Dr. Duncan made numerous contributions to the fields of curriculum and instruction in his classroom teaching and in his research while at The Ohio State University. He was especially noted for his work in evaluation and classroom interaction studies. His related interests included research with the Vocational Rehabilitation Center in New Hampshire, consulting on the federal project, "Comprehensive Evaluation and Vocational Rehabilitation Services to Disabled Assistance Clients in a Residential Rehabilitation Center." Upon his retirement in 1982, he was named Professor Emeritus.

Professor Duncan was held in the highest esteem by students, colleagues, and staff members. During his tenure, Dr. Duncan served as major advisor and Ph.D. committee member for numerous graduate students. He was viewed by many colleagues and students as the professor who had the highest capability for advising and guiding dissertation work. Dr. Duncan's students have made considerable contributions to the field of education at prestigious universities throughout the United States.

We have great appreciation and admiration for this man who was a gentle person, a scholar, and a respected educator.

On behalf of the university community, the Board of Trustees expresses to the family its deep sympathy. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Ting Y. Li

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on April 26, 1988, of Ting Y. Li, Professor Emeritus in the Department of Aeronautical and Astronautical Engineering.

Dr. Li was born on December 19, 1918, in Peiping, China. He received his B.S. degree from the National Central University, China, in 1940, and his Ph.D. from the California Institute of Technology in 1950.

Dr. Li joined the faculty at The Ohio State University in 1964. Previously, Dr. Li held faculty positions at the Rensselaer Polytechnic Institute and at the University of Cincinnati. Upon his retirement in 1980, he was named Professor Emeritus. During his employment at The Ohio State University his research interests included hypersonics, geophysical fluid mechanics, and environmental sciences.

July 8, 1988 meeting, Board of Trustees

RESOLUTIONS IN MEMORIAM (contd)

Ting Y. Li (contd)

Dr. Li was a member of the American Rocket Society, the Institute of Aeronautical Sciences, American Institute of Aeronautics and Astronautics, and the New York Academy of Sciences. His accomplishments included thirty-seven publications and consulting services to Aercon Incorporated, General Electric Company, Convair Scientific Research Laboratory, and Rand Corporation.

On behalf of the University community, the Board of Trustees expresses its sympathy and understanding to the family of Dr. Li. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Harvey C. Mansfield

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on May 4, 1988, of Harvey C. Mansfield, Professor Emeritus in the Department of Political Science.

Professor Mansfield was born in Cambridge, Massachusetts, on March 3, 1905. He graduated from Cornell University in 1927 with a B.A. degree and in 1928 with a M.A. degree. In 1932, he received the Ph.D. degree from Columbia University. Professor Mansfield taught at Yale University from 1929 to 1942 and was later visiting professor at Stanford and Harvard Universities. During World War II, Dr. Mansfield was an executive in the Federal Office of Price Administration. Later he served as staff member and consultant to the United States military government in Germany; the Mayor's Commission on Management in New York (1951); the Connecticut Commission on State Government Organization (1950); the United States Commission in Intergovernmental Relations (1954 to 1955); and to the House of Representatives Banking and Currency Committee (1963).

Dr. Mansfield was author of three books and numerous scholarly articles. From 1956 to 1965, he served as Editor of his discipline's leading journal, The American Political Science Review.

Dr. Mansfield was appointed Professor at The Ohio State University in 1947. From 1947 until 1959, Dr. Mansfield served as Chairperson of the Department of Political Science. Following retirement from The Ohio State University in 1965, Professor Mansfield accepted an appointment at Columbia University, teaching there as Ruggles Professor of Public Law and Government until his retirement in 1973.

The Department of Political Science of The Ohio State University pays tribute to Professor Harvey Mansfield's effective leadership as its Chairperson, to the memory of his unflinching civility, and to his many distinguished contributions to the discipline of Political Science.

On behalf of the University community, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

July 8, 1988 meeting, Board of Trustees

RESOLUTIONS IN MEMORIAM (contd)

Leo G. Staley

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on May 4, 1988, of Leo G. Staley, Professor Emeritus in the School of Health, Physical Education and Recreation.

A native of Johnstown, New York, Professor Staley was a graduate of The Ohio State University where he received his B.S. degree in 1928, and his M.S. in 1931. Joining the Ohio State faculty in 1924, he served both as an Instructor and a Coach of Gymnastics. In 1931, he was made an Assistant Professor; Associate Professor and Director of Intramural Sports in 1937; and Professor in 1950. Upon his retirement in 1964, he was named Professor Emeritus.

During his 40 years as a member of The Ohio State University faculty and throughout his long service as Director of Intramural Sports, Leo G. Staley maintained close ties with the students he served. As Director, Professor Staley brought a dedication and vitality to his post. His keen sense of the needs of the students enabled him to expand Ohio State's program and laid groundwork for what is recognized today as one of the leading programs in the nation. In addition to his teaching and intramural duties, he was active in many aspects of campus life. He was a charter member of Ohio Staters, Inc., and an officer in the Faculty Club. For almost 30 years he was the "Voice of the Buckeyes" at all home football and basketball games. For 20 years he was the Manager of the Ohio High School Athletic Association Baseball Tournaments.

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Emmerich von Haam, Sr.

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on April 14, 1988, of Emmerich von Haam, Sr., Professor Emeritus in the Department of Pathology.

Born in Vienna, Austria, Dr. von Haam received his medical degree from the University of Vienna and came to the United States on a Rockefeller Foundation Scholarship. He remained in the United States to accept positions at the Universities of Arkansas and Louisiana State. He was appointed Chairman of Pathology at The Ohio State University in 1937, a position he held until 1967. Upon his retirement in 1973, he became Professor Emeritus.

Dr. von Haam served in the U.S. Army during World War II, attaining the rank of Colonel. After the war, he served for many years as Consultant to the Surgeon General of the Army, the U.S. Air Force, the Veterans Administration, the U.S. Public Health Service, and the Armed Forces Institute of Pathology.

Dr. von Haam was a researcher, teacher, and diagnostician of world distinction. He published 390 monographs and professional articles

July 8, 1988 meeting, Board of Trustees

RESOLUTIONS IN MEMORIAM (contd)

Emmerich von Haam, Sr. (contd)

mostly in the field of cancer detection, cytopathology, and histopathology of cancer and he lectured and taught worldwide. Aside from all his important professional accomplishments and his outstanding leadership qualities, Dr. von Haam was one of the most beloved individuals in our group. He always found a good word about every one of us, he was a devoted husband to his wife Ruth, a charming and gracious host, and above all a real friend whom we will miss and cherish.

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Upon motion of Mr. Barone, seconded by Mr. Berry, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS

Resolution No. 89-8

Synopsis: The reports on contracts, grants, and gifts and the summary for May 1988 are presented for Board acceptance.

WHEREAS monies are solicited and received on behalf of the University from governmental, industrial, other agencies, alumni, and various individuals in support of research, instructional activities, and service; and

WHEREAS such gifts and grants are received through The Ohio State University Research Foundation, the Engineering Experiment Station of The Ohio State University, and The Ohio State University Development Fund:

NOW THEREFORE

BE IT RESOLVED, That the research agreement between The Ohio State University and The Ohio State University Research Foundation for the contracts and grants reported herein, and the acceptance of the reports from the Engineering Experiment Station and The Ohio State University Development Fund during the month of May 1988 be approved.

Upon motion of Ambassador Wolf, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

July 8, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

SUMMARY FOR MAY 1988

Source	No. of Projects	Support Level
The Ohio State University Research Foundation	98	\$8,460,088.69
Engineering Experiment Station	37	\$ 329,774.00
Total	135	\$8,789,862.69

The Ohio State University Development Fund

Establishment of Named Funds

Columbia Gas - University Honors Scholarship Endowment Fund (Scholarships)		\$ 25,000.00
Shih-Yuan Michael Chen Scholarship Fund (Scholarships to students enrolled in the College of Engineering who are from the Nanjing Institute of Technology, China)		\$ 15,000.00
Senior Medical Student Achievement Award (Award for academic achievement, service leadership, clinical skills and humanitarian activities to a senior medical student or resident)		\$ 11,071.62

July 8, 1988 meeting, Board of Trustees

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION

Report - May 1988

Federal Research Contracts/Grants

\$1,500,000.00 - National Science Foundation, Washington, D.C., Engineering Research Center for Net Shape Manufacturing, Engineering Experiment Station (T. Altan), 1 May 1988 through 30 April 1989. (Project 765393 - Continuation)

\$962,543.00 - Department of Education, Office of Special Education and Rehabilitation Services, Washington, D.C., Regional Resource Center, College of Education - Administration (T. M. Stephens), 1 June 1988 through 31 May 1989. (Project 766183 - Continuation)

\$231,297.87 - Department of Agriculture, Science and Education, Peoria, Illinois, Cooperative Agricultural Research, Office of the Director - OARDC (H. R. Conrad), 1 October 1986 through 30 September 1987. (Project 766472 - New)

\$195,000.00 - National Science Foundation, Washington, D.C., Spectroscopic Studies of Clusters and Their Chemistry, Department of Chemistry (V. E. Bondybey), 1 May 1988 through 31 October 1989. (Project 766722 - New)

\$177,026.00 - Department of Education, Office of Postsecondary Education, Washington, D.C., Upward Bound Program, Office of Minority Affairs (L. G. Morrow), 1 September 1988 through 31 August 1989. (Project 765655 - Continuation)

\$167,848.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Polycondensed Alicyclics and Their Antiviral Role, Department of Chemistry (L. A. Paquette), 1 May 1988 through 30 April 1989. (Project 763920 - Continuation)

\$151,934.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Genotoxicity in Human Fetal Brain, Dermis and Kidney Cells, Department of Radiology (S. M. D'Ambrosio and A. A. Wani), 1 June 1988 through 31 May 1989. (Project 763673 - Continuation)

\$151,686.00 - Department of Energy, Argonne, Illinois, The Hydrogen Induced Stress Corrosion Cracking of Nickel Base Alloys in High Temperature Water, Department of Metallurgical Engineering (P. G. Shewmon and S. S. Smialowska), 1 June 1988 through 31 May 1989. (Project 766068 - Continuation)

\$143,477.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Metabolism of (N-3) Fatty Acids, Department of Physiological Chemistry (H. W. Sprecher), 1 April 1988 through 31 March 1989. (Project 760745 - Continuation)

July 8, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$135,000.00 - Department of the Navy, Office of Naval Research, Arlington, Virginia, Molecular Biology of the Extremely Thermophilic Archaeobacterium, Methanothermus fervidus, Department of Microbiology (J. N. Reeve), 1 April 1988 through 30 September 1989. (Project 765291 - Continuation)

\$135,000.00 - National Science Foundation, Washington, D.C., Research in Astrophysics, Medium Energy Physics, and Fundamental Particles, Department of Physics (R. N. Boyd), 1 May 1988 through 31 October 1989. (Project 765332 - Continuation)

\$135,000.00 - National Science Foundation, Washington, D.C., The Spectroscopy of Chemical Intermediates and Other Transient Species, Department of Chemistry (T. A. Miller), 1 June 1988 through 30 November 1989. (Project 764814 - Continuation)

\$132,733.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Acute Phase Reactants: Induction and Host Resistance, Department of Microbiology (R. F. Mortensen), 1 July 1988 through 30 June 1989. (Project 762354 - Continuation)

\$130,592.00 - Department of Education, Washington, D.C., "Seeing-Is-Believing," Department of Pharmacology (P. B. Hollander), 1 May 1988 through 30 June 1989. (Project 766745 - New)

\$129,615.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Biochemical Probes of the Active Site of Aromatase, College of Pharmacy (R. W. Brueggemeier and S. Black), 1 May 1988 through 30 April 1989. (Project 766718 - New)

\$125,000.00 - Department of the Air Force, Air Force Systems Command, Wright-Patterson Air Force Base, Ohio, Optical Scattering Studies, ElectroScience Laboratory, Department of Electrical Engineering (S. A. Collins, Jr.), 1 July 1987 through 30 September 1988. (Project 764394 - Continuation)

\$117,117.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Dietary Fat: Physiological Function, Department of Physiological Chemistry (H. W. Sprecher), 1 May 1988 through 30 April 1989. (Project 764415 - Continuation)

\$101,963.00 - National Science Foundation, Washington, D.C., An Integrated Petrographic, Chemical, and Isotopic Study of the Diagenesis of Carbonate Sediments in the Deep Sea, Department of Geology and Mineralogy (E. Barrera), 15 April 1988 through 30 September 1990. (Project 766715 - New)

\$98,665.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Gastric

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND

Establishment of Named Funds

Columbia Gas - University Honors Scholarship Endowment Fund

The Columbia Gas - University Honors Scholarship Fund was established July 8, 1988, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University Development Fund from Columbia Gas Distribution Companies.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support an academic undergraduate scholarship or scholarships. The scholarship(s) will be awarded annually and can be renewed for the recipient each year for a maximum of four years, pending a yearly review by the University Honors Center. Preference will be given to any entering freshman whose permanent residence is within the areas served by Columbia Gas Distribution. This merit award will be in recognition of a student's outstanding high school academic achievement and promise. Selection will be made by the staff of the University Honors Center.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in order to carry out the desire of the donors.

Shih-Yuan Michael Chen Scholarship Fund

The Shih-Yuan Michael Chen Scholarship Fund was established July 8, 1988, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from the Chen family, in memory of Dr. Shih-Yuan Michael Chen, Ph.D. '55.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of

July 8, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Named Funds (contd)

Shih-Yuan Michael Chen Scholarship Fund (contd)

The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide one or more scholarships to students enrolled in the College of Engineering who are from Nanjing Institute of Technology, China. If there are no applicants from Nanjing Institute of Technology, then the scholarship(s) shall be awarded to engineering students from Mainland China, or, if none apply, to Chinese-American students enrolled in the College of Engineering. Scholarship recipients will be chosen by the Dean of the College of Engineering in consultation with the University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

Senior Medical Student Achievement Award

The Senior Medical Student Achievement Award was established July 8, 1988, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University Development Fund from the Medical Society of The Ohio State University Hospitals.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be offered to a senior medical student or resident as an award for academic achievement, service leadership, clinical skills and humanitarian activities. The recipient shall be selected by the officers of the medical staff of The Ohio State University Hospitals in consultation with the Dean or Associate Dean for Academic Affairs in the College of Medicine. All requisitions for funds are to be approved by the Dean of the College of Medicine.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees with preference being given to recommendations from the Dean of the College of Medicine, and the officers of the medical staff of University Hospitals in order to carry out the desire of the donors.

July 8, 1988 meeting, Board of Trustees

**EMPLOYMENT OF ARCHITECT/ENGINEER AND
REQUEST FOR CONSTRUCTION BIDS
UNIVERSITY AIRPORT RENOVATIONS - 1988/1989**

Resolution No. 89-9

Synopsis: Authorization to employ an architectural/engineering firm and request construction bids is proposed.

WHEREAS The Ohio State University has obtained a grant from the Federal Aviation Administration to provide 90% funding (\$352,000.00) for airport renovation work consisting of updating taxiway guidance and hold signs to bring them into conformance with current FAA standards; repairing Runway 9L - 27R and overlaying it with asphalt; and constructing an asphalt apron between Hangars 4 and 9 for aircraft parking and taxiing; and

WHEREAS the remaining 10% (\$39,111.00) of this project will be funded from University funds, for a total project cost of \$391,111.00:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized, in accordance with established University procedures, to select a qualified architectural/engineering firm for this project, to request construction bids on this project, and if satisfactory bids are received, to award the necessary contracts, with all actions to be reported to this Board at the appropriate time.

Upon motion of Ambassador Wolf, seconded by Mr. Berry, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

**REPORT OF AWARD OF CONTRACTS AND
ESTABLISHMENT OF CONTINGENCY FUNDS**

Resolution No. 89-10

Synopsis: Contracts have been awarded for the projects listed below to the lowest and best bidders in accordance with University procedures.

WHEREAS resolutions adopted by the Board of Trustees at previous meetings authorized the President and/or Vice President for Business and Administration to sign the plans and specifications and, in accordance with established University procedures, to request bids and, if satisfactory bids were received, to award contracts for Central Service Building Renovation, Doan Hall - Elevator Modernization, Pressey Hall Remodeling Phase II (University Press), and Put-In-Bay Campus Facilities Phase I - Sewage Treatment Improvements projects; and

WHEREAS resolutions adopted by the Board of Trustees at previous meetings authorized the President and/or Vice President for Business and Administration to sign the plans and specifications and, in accordance with established University procedures, to request bids and, if satisfactory bids were received, to recommend to the Department of Administration, Division of Public Works, the award of contracts for the University Hospitals - Renovation and Addition to Chilled Water, and the

Grape Research Facility, Ohio Agricultural Research and Development Center projects as follows:

CENTRAL SERVICE BUILDING RENOVATION

Description: This project provides for the renovation of Central Service Building. The remodeling of the second and third floors will provide general classroom space; the renovation of the fourth floor will provide space for the University Architect's Office; and the renovation of the basement and ground floor will provide utility services to support the University Bookstores operations. Construction is scheduled to begin June 1988. The classroom portion is to be completed by December 1988, with the balance of the renovation scheduled to be completed in March 1989.

ADDITION TO CHILLED WATER (contd)**

Electric Contract (contd)

High Bid:	\$ 435,600.00
Estimate of Cost:	\$ 415,930.00
Awarded to:	Advantage Electric Inc., Toledo, OH
Total All Contracts:	\$1,957,484.00*
Total Contingency Allowance:	\$ 293,606.15 (which is 15% of construction costs)
Total Project Cost:	\$2,513,087.00*
Funding:	University Hospitals Funds

*Recommended alternates reflected in these figures.

DOAN HALL ELEVATOR MODERNIZATION

Description: This project provides for the replacement of the controlling system of Elevators 1, 2 and 3 in Doan Hall with collective microprocessors which will modernize and improve the operation of these service elevators. Construction is scheduled to begin June 1988 and be completed by October 1989.

General Contract

Date Received:	April 20, 1988
No. of Bids:	5
Low Bid:	\$ 249,773.00*
High Bid:	\$ 363,550.00*
Estimate of Cost:	\$ 275,000.00 (Base only)
Awarded to:	Montgomery Elevator Co., Cincinnati, OH
Total All Contracts:	\$ 249,773.00*
Total Contingency Allowance:	\$ 19,982.16 (which is 8% of construction costs)
Total Project Cost:	\$ 281,183.00*
Funding:	University Hospitals Funds

*Recommended alternates reflected in these figures.

**TRANSFER OF JURISDICTION
OHIO DEPARTMENT OF TRANSPORTATION**

Resolution No. 89-11

Synopsis: Authorization to grant a transfer of jurisdiction to the Ohio Department of Transportation for replacement of a bridge is requested.

WHEREAS the Ohio Department of Transportation has requested a transfer of jurisdiction for a strip of land consisting of 0.32 acres for the replacement of a bridge over Little Salt Creek on State Route 93 in Jackson County, which land is owned by the University and operated by The Ohio Agricultural Research and Development Center; and

WHEREAS the bridge will serve many residents and travelers in the Jackson County area; and

WHEREAS the Ohio Department of Transportation agrees to compensate the University with a lump sum fee of \$1,180 based on the fair market value of the land; and

WHEREAS the appropriate University offices have recommended that this transfer of jurisdiction be granted:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration, be authorized to request the Deputy Director of Public Works of the Department of Administrative Services, pursuant to his statutory duties, to act on behalf of the University in developing the necessary legal instrument to provide for this transfer of jurisdiction.

July 8, 1988 meeting, Board of Trustees

**TRANSFER OF JURISDICTION
OHIO DEPARTMENT OF TRANSPORTATION (contd)**

Upon motion of Ambassador Wolf, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

**LEASE OF SPACE IN THE OHIO UNION
TO GREENTREE ENTERPRISES, INC.**

Resolution No. 89-12

Synopsis: Authorization to lease 1,568 square feet of space in the Ohio Union for a food service operation is requested.

WHEREAS Greentree Enterprises, Inc., currently occupies space in the Ohio Union in which it operates "Scarlata & Gray" and "The Juice Factory" restaurants; and

WHEREAS Greentree Enterprises' Ohio Union lease expires on June 30, 1988; and

WHEREAS there is currently no need for this space for the academic programs of the University, but there is a need for continuing a food service operation; and

WHEREAS Greentree Enterprises has proven over the last eight years to be a viable tenant for the space in the Ohio Union and would like to continue to operate:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business Administration be authorized, on behalf of the Board, to negotiate, and enter into, a lease of approximately 1,568 square feet in the Ohio Union, with Greentree Enterprises, Inc., for the purpose of continuing a food service operation, at an appropriate market rental rate, and upon such other terms and conditions as are deemed to be in the best interest of the University and to develop and execute the necessary legal instruments for this lease.

Upon motion of Ambassador Wolf, seconded by Mr. Berry, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

**ACCEPTANCE OF THE GIFT OF REAL PROPERTY
760 BEAUTYVIEW COURT, COLUMBUS, OHIO**

Resolution No. 89-13

Synopsis: Acceptance of a gift of real property at 760 Beautyview Court in Columbus, Ohio, is proposed.

July 8, 1988 meeting, Board of Trustees

**ACCEPTANCE OF THE GIFT OF REAL PROPERTY
760 BEAUTYVIEW COURT, COLUMBUS, OHIO (contd)**

WHEREAS the late Dr. Francis B. McCormick was the owner of approximately 0.23 acres of improved real property at 760 Beautyview Court in Columbus, Ohio, and by his Last Will and Testament devised this property, and other real and personal property, to The Ohio State University, through The Ohio State University Development Fund, subject to a life estate for his widow, Marie Orton McCormick; and

WHEREAS Dr. McCormick's Will provides that the net proceeds from the sale of this property are to be used to establish the Francis B. McCormick Professorship in Agricultural Economics or to support the existing McCormick Undergraduate Scholarship in Agricultural Economics; and

WHEREAS Dr. McCormick's widow, Marie Orton McCormick, and the University have negotiated and settled their respective interests in the estate such that the University will receive a one-half interest in the Ohio real property from the estate and will receive the other one-half interest in the property as a gift from Marie McCormick, as well as receiving other personal property, namely the net proceeds from a life insurance policy; and

WHEREAS this settlement of the respective interests in the estate is to the mutual benefit of both parties and the acceptance of this gift and the establishment of this Professorship are in the best interest of the University:

NOW THEREFORE

BE IT RESOLVED, That the property at 760 Beautyview Court in Columbus, Ohio, be accepted as a gift from the estate of Francis B. McCormick and from Marie Orton McCormick to The Ohio State University, through The Ohio State University Development Fund and that the net proceeds from the gifts be used to establish the Francis B. McCormick Professorship in Agricultural Economics or to support the existing Francis B. McCormick Undergraduate Scholarship in Agricultural Economics and that the President and/or Vice President for Business and Administration be authorized to acquire title to this property in the name of the Board of Trustees of The Ohio State University.

Upon motion of Mr. Berry, seconded by Ambassador Wolf, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

**EASEMENT
OHIO BELL TELEPHONE COMPANY**

Resolution No. 89-14

Synopsis: Authorization to grant a telephone line easement to Ohio Bell Telephone Company is proposed.

WHEREAS the Ohio Bell Telephone Company has requested an easement consisting of a strip of land 10 feet wide and approximately 6,387 feet in length for the installation of underground fiber optics cable across

July 8, 1988 meeting, Board of Trustees

**EASEMENT
OHIO BELL TELEPHONE COMPANY (contd)**

the frontage of farm property operated by the Ohio Agricultural Research and Development Center located in Clark County, Ohio; and

WHEREAS the easement will serve both University property and private properties; and

WHEREAS the University will receive a fee of \$4,300.00 for this easement; and

WHEREAS the appropriate University offices have recommended the approval of this easement:

NOW THEREFORE

BE IT RESOLVED, That the Vice President for Business and Administration be authorized to request the Deputy Director of Public Works of the Department of Administrative Services, pursuant to his statutory duties, to act for and on behalf of the University in developing the necessary legal instruments to provide for this easement.

Upon motion of Ambassador Wolf, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

**EASEMENT
OHIO BELL TELEPHONE COMPANY**

Resolution No. 89-15

Synopsis: Authorization to grant an underground communication system easement to Ohio Bell Telephone Company is proposed.

WHEREAS the Ohio Bell Telephone Company has requested an easement consisting of a strip of land 5 feet wide and approximately 280 feet in length for the installation of an underground communication system across and under property owned by the University and located on Argyll Street near the Fawcett Center for Tomorrow; and

WHEREAS the Ohio Bell Telephone Company will install a communication cable for service to Chemical Abstracts; and

WHEREAS the Ohio Bell Telephone Company will install a communication cable for service to the University at no charge; and

WHEREAS the easement will serve both University property and private properties; and

WHEREAS the University will receive a fee of \$500.00 for this easement; and

WHEREAS the appropriate University offices have recommended the approval of this easement:

July 8, 1988 meeting, Board of Trustees

**EASEMENT
OHIO BELL TELEPHONE COMPANY (contd)**

NOW THEREFORE

BE IT RESOLVED, That the Vice President for Business and Administration be authorized to request the Deputy Director of Public Works of the Department of Administrative Services, pursuant to his statutory duties, to act for and on behalf of the University in developing the necessary legal instruments to provide for this easement.

Upon motion of Ambassador Wolf, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

**MODIFICATION OF THE STRS EARLY RETIREMENT INCENTIVE PROGRAM
Resolution No. 89-16**

Synopsis: Modification of the STRS Early Retirement Incentive Program is proposed.

WHEREAS in October of 1985 this Board approved Resolution No. 86-39, an Early Retirement Incentive Program for qualified employees who participate in the State Teachers Retirement System (STRS); and

WHEREAS the number of persons eligible for University purchased service credit was limited to five percent (5%) of the total number of the University's current STRS membership; and

WHEREAS the University has now determined that the interest in this program has exceeded the 5% limit:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Personnel Services is hereby authorized and directed to modify the University's STRS Early Retirement Incentive Program to reflect a limit on the number of persons eligible for University purchased service credit of 6.5% of the total number of the University's current STRS membership; and

BE IT FURTHER RESOLVED, That all other aspects of the Early Retirement Incentive Program remain unchanged.

Upon motion of Mr. Kessler, seconded by Mr. Berry, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

**MODIFICATION OF THE PERS EARLY RETIREMENT INCENTIVE PROGRAM
Resolution No. 89-17**

Synopsis: Modification of the PERS Early Retirement Incentive Program is proposed.

July 8, 1988 meeting, Board of Trustees

MODIFICATION OF THE PERS EARLY RETIREMENT INCENTIVE PROGRAM (contd)

WHEREAS in December of 1986 this Board approved Resolution No. 87-68, an Early Retirement Incentive Program for qualified employees who participate in the Public Employees Retirement System (PERS); and

WHEREAS the number of persons eligible for University purchased service credit was limited to five percent (5%) of the total number of the University's current PERS membership; and

WHEREAS the University has now determined that the interest in this program has exceeded the 5% limit:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Personnel Services is hereby authorized and directed to modify the University's PERS Early Retirement Incentive Program to reflect a limit on the number of persons eligible for University purchased service credit of 6.5% of the total number of the University's current PERS membership; and

BE IT FURTHER RESOLVED, That all other aspects of the Early Retirement Incentive Program remain unchanged.

Upon motion of Mr. Kessler, seconded by Mr. Berry, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

Mr. Immke:

I would like to now call on Dr. Hollander to introduce Dr. Eugene R. Capriotti, Professor in the Department of Astronomy, who will make a presentation, "The Columbus Project -- the World's Largest Telescope."

Dr. Hollander:

Thank you, Mr. Chairman and Members of the Board. Some of the Members of the Board may recall that several years ago I made a report to the Board about a major program which is intended to propel Ohio State University into the front ranks of science in the field of astronomy. The centerpiece of this effort is the construction of a very large optical telescope, perhaps the world's largest optical telescope. We are doing that in a consortia effort, together with several other major research universities and laboratories in this field. The project, as you may know, has been called the "Columbus Project," in honor of the leading role played by The Ohio State University in Columbus, and also that the time schedule involved has a major milestone on the project to be in the year 1992, which is the year of celebration of the voyage of Columbus.

There has been much progress in this program. I think it is fair to say that today Ohio State University is involved in every major astronomy activity in this country, every policy body, along with the other leading universities in this field.

July 8, 1988 meeting, Board of Trustees

Dr. Hollander: (contd)

Of course, excellence that we strive for is brought about by people and it is clear that the reason that we go into major projects of this kind is to be able to attract the very best faculty and very best students to the University. That has already happened even though we aren't even half-way into the project yet. I think we can even report that some very fine additions to the faculty in the field of astronomy have been made, people who are leading scholars in this field in the country and the world.

Now, at the University two of the main spark plugs of this effort have been Professor Eugene Capriotti and Professor William Protheroe, both of whom are here today with us. Professor Capriotti is also the Chair of the Department of Astronomy and I am very pleased that Gene Capriotti will give us an update on the progress of the Columbus Project. Gene --

Dr. Eugene R. Capriotti:

Thanks very much. I want to tell you that we have added some fine faculty to the Department in the last couple of years as a result of our entering into the Columbus Project. I can't boast about myself in that context since I've been here 24 years. So I am not one of the new positions. I have been told that I have about twenty-five minutes to talk which is difficult because after being here for 24 years, I am more or less ingrained with this "48 minutes" idea, so I have practiced at great length. What I wanted to do besides talk to you about where we are with the project, more or less, is give you the background for our entry into this project. If somebody is operating the slide projector (Slide presentation) --

I want to show you a picture of where it all began. That is a photograph of Galileo's first telescope. It is a telescope that has a 1" diameter primary optic -- a lens, in fact, and it was built in 1609. Even though it is very, very small, it featured a 16-25 times increase in light gathering power over the human eye. With this telescope Galileo made not only the discoveries of the Moons of Jupiter and other objects that convinced people -- some people, not everybody -- that the earth in fact moved about the sun. What he did was turn this telescope towards the Milky Way. The smaller one, the one on the left, is the very first one. And with the small telescope he saw that the Milky Way was not a smear of clouds in the sky, but consisted of a myriad of individual stars opening up the human imagination to the idea that there are many, many more objects in the universe than the human mind could possibly imagine.

Just for the record this is the way a telescope like this works -- to the right is the primary optic, it is a lens that bends the light as a result of the curvature. This of course is the lens in the eye piece that straightens the light out and makes it parallel for entering into the eye. This represented one technology in telescopes, what we call refracting telescopes because the focusing of the light results from the phenomenon

July 8, 1988 meeting, Board of Trustees

Dr. Capriotti: (contd)

called refraction when light passes from the medium of one density into the medium of another.

That wasn't the only technology that was developed. This is the second technology that was developed, in fact, by people like Isaac Newton about 100-150 years after Galileo. Here the light is coming from the left and it strikes the surface of a mirror rather than passing through a lens. It gets reflected and either comes to a focus or another mirror reflects the light where it can pass through a hole in the primary mirror and be again made parallel for examination by the eye or photographic plates or other kinds of instruments. Newton, himself, placed a 45° mirror in his telescope at this location and threw the light out to the side. The telescope that he built is this particular telescope. This is not unlike the common reflecting telescopes that you buy off the shelf in camera shops and optical stores. Notice, the fundamental difference between this telescope and the refracting telescope, that is because you can get a higher curvature with a mirror and still not alter the light significantly than you can with a lens. That is, the ratio of the cross-section of the telescope to its length is increased. That means a shorter telescope for a given light gathering power.

The epitome of refracting telescopes is this telescope. It was built in 1896 by the University of Chicago at the Yerkes Observatory on Williams Bay, Wisconsin. The cross-section, the diameter of the 40" aperture, as we say, the 40" lens, the primary lens is up at this end of the telescope. A very long telescope for this cross-section needing a huge dome. This is the Yerkes Observatory and that is the dome containing the 40" telescope. Considerably larger than we are used to seeing.

The epitome of reflecting telescopes is this telescope -- it is the Palomar 200" telescope. It is the one that most people if you asked them if they have ever heard of a telescope, they will say "yes there is one on Mount Palomar." And this shows, again, the considerable difference between the cross-section and the length for a huge telescope. So you get some idea of the size of the telescope. That is the dome of the 200" telescope on Palomar Mountain. And again you can see that compared to the size of the telescope the dome is quite small. Very significant when it comes to cost. Also, technically to make a refracting telescope of this size is really not technologically feasible because the lenses would have to be so thick that the transmission through them would be very poor.

This telescope was built in 1949 -- saw its first light, as they say, in 1949. Since then -- with the exception of a telescope built by the Soviet Union in the 1970's that has a 235" aperture as opposed to this 200" aperture -- there has never been another large telescope built. And the question is why? When technology has advanced in most every other sector, why do we go forty years without a major advance in telescopes. In fact, the telescope built by the Soviets did not work very well at all.

July 8, 1988 meeting, Board of Trustees

Dr. Capriotti: (contd)

Some people say "it just plain doesn't work." And the reason for it is that the piece of glass in the primary mirror is so heavy that it causes thermal inertia (that is a technical term meaning it can't cool and heat rapidly enough to come into equilibrium with itself or the surroundings). So you have temperature differences within the glass that causes distortion of the mirror, distortion of images, and also the temperature imbalance between the glass and air right over the glass causes convection currents that distort the images again. So this essentially was the last piece of glass that worked. Even if you were to take this technology and extend it and try and build the kinds of things that we are talking about now -- we are talking about telescopes with 400" apertures, etc.

This is a 5-meter aperture telescope, and what we are talking about in the Columbus Project is an 11.3-meter. If you square it, you find that you have over 4 times the light gathering power. It represents an increase in factor of 4 in the sensitivity that one can measure. Let's suppose that we were to take a 200" and scale it up -- what you would have when you were finished is a total moving mass. This is something that you would have to point with the precision of 1/3600 of a degree or better to a point in space. You would have to move 6,000 tons of steel and glass in order to use efficiently a telescope of this size. The estimated cost for such an instrument is half a billion dollars, well over \$400 million. That is not really feasible, I don't think there is anybody that would want to get into a project right now for astronomy for 1/4 of half a billion dollars -- it is very hard to convince people to do that. You divide that by a factor of 10 and then you are getting to the point where you can realize this sort of situation.

How do you do it though? Well, we already found that with shorter tubes, smaller domes, etc., you can cut costs. How about this moving mass then? Well, let's use light weight mirrors. Here is where technology comes into the picture. Until the last few years we just simply didn't have the technology that allowed us to consider the various types of thermal mirrors that enabled the kind of curvature necessary to make the short tubes that could make the small domes and cut the costs.

Here are the three technologies that have been developed: the first one is the so-called rubber mirrors, thin rubber mirrors. They are not rubber they are glass, but they are so thin that, in fact, they can't be held rigidly in the traditional way. What you have to do is provide computer controlled support in many, many points under the mirror. And actually in real time as the telescope moves to and fro getting different gravitational forces from the earth, the computers come into play to keep the mirror supported so that it is true. It has a true figure. That is one way. There is a telescope project that will use this technology. This is the one at the European Southern Observatory which features four independent 8-meter telescopes in a tandem scheduled for completion sometime early in the next century.

July 8, 1988 meeting, Board of Trustees

Dr. Capriotti: (contd)

The second technology is the so-called segmented mirror. Right now CalTech and the University of California are actively engaged in building a 10-meter telescope that consists of 36 1.8-meter diameter segments in hexagonal shapes. And when you look at these hexagonal mirrors in projection you see the smooth surface of what looks like a single mirror. Again, each one of those segments has to be actively controlled by computer in order to make it work.

The third technique features a different type of rigid mirror than the Palomar. Rather than having a very thick piece of glass with small pieces cut out, what you have, in fact, is something like this thin mirror but with a continuous glass system of hexagonal supports, through which air can flow and keep the mirror cool so you don't run into the same problem that the Soviets have. And at the same time, you don't have to move 6,000 tons or more of glass. So this is the particular technology that we're involved in with the University of Arizona, which has developed a technique to spin mirrors of this sort in ovens. The rotation of the oven as the glass melts has the glass flow into just the right shape.

If you were to do this in the traditional way, what you want is a small focal ratio. When we talk about focal ratio, all that means is the degree of curvature. Focal ratio -- the smaller the number the higher degree of curvature. If you were to cast, for example, an 8-meter mirror, which the oven at the University of Arizona is capable of casting, in a traditional way you would get a cylindrical section. Then you would have to remove through grinding processes up to 15 tons of glass. The cost of the removal for that glass equals what it costs to build a spinning furnace. So, in fact, the spinning furnace pays for itself with the first mirror it casts. So what you do then is you use that spinning furnace to cast these mirrors. Since you aren't casting as much glass, you have a much shorter annealing time, six weeks is the estimated time.

Now I would like to say a few words about where we are in this horse race. Because it is a horse race and it will become more and more obvious as time progresses. These are the institutions presently planning telescopes with over 10-meter effective aperture. I still call the European venture something different than this since each of these telescopes more or less has everything on the same mount -- whether it be segmented or a twin 8-meter mirror telescope as we are planning in the Columbus Project.

What we have at the University of California and the California Institute of Technology, CalTech, is a consortium to build a 10-meter segmented mirror -- the Keck telescope. It is named for Keck because he contributed \$70 million for its construction. The telescope will be built on Hawaii, on 14,000 foot Mauna Kea. The other group: the University of Arizona, the University of Chicago, The Ohio State University, and Italy. What we are involved in is the 11.3-meter telescope, it's a twin 8-meter mirror -- I will show you a photograph of it -- which

July 8, 1988 meeting, Board of Trustees

Dr. Capriotti: (contd)

will be built in Arizona on 10,000 foot Mount Graham.

This is the history of the institutions planning large telescopes. In red are those that are still alive in the project. Starting out in 1610 we have Italy with a 1" telescope. We move to the era between 1880 and 1900, Lowell Observatory in Flagstaff, Arizona, built the 24" refracting telescope. The University of California, Lick Observatory on Mount Hamilton -- as a matter of fact, this was the first one that was built, it was the first mountain-top telescope. This was built before the other two here as a matter of fact. The 36" refractor by the University of California. Then the 40" refractor that I showed you a picture of, Yerkes Observatory was built in 1896. Then in 1900 and 1920, the scene shifted to California almost permanently, as far as large glass of any significance goes, when Mount Wilson Observatory built two reflecting telescopes in the San Gabriel range -- a 60" and 100". The era of refractors was practically over.

In 1929, with a gift from Hiram Perkins, Ohio Wesleyan built a 69" telescope. When it was built it was the third largest telescope in the entire world. The telescope was the biggest telescope east of the Rocky Mountains. In 1935, Ohio State University assumed operation of the Perkins 69" telescope when Ohio Wesleyan ran into financial problems during the Depression. In 1949, CalTech and Mount Wilson collaborated with the construction of the 200", the Palomar telescope that I was telling you about. From 1960 to 1970, the National Optical Astronomical Observatory built an 84" and the University of Arizona a 90". Ohio State and Ohio Wesleyan moved the 69" telescope to Flag Staff, Arizona, where the 69" was upgraded to a 72" telescope. This began our link with Arizona astronomy. California in the same era built the 120" telescope. This was one of the test blanks that was built for the 200" telescope.

And finally, from 1970 to 1980, the National Optical Observatory built the 150" and Arizona and Harvard-Smithsonian built the 176". I will show you a picture of that because it is significant. This is the 176" telescope built by the University of Arizona and Harvard-Smithsonian. It doesn't consist of a single mirror, but rather 6 individual 1.8-meter mirrors tied together on a single mount. This is the start of understanding how thin mirrors could be put together, held rigidly, and kept in temperature equilibrium with its surroundings. So this was a hallmark telescope in the new era, because it was after that that the astronomical community became very serious about building large telescopes. What you have then was between 1980 and 1983, this telescope was completed in the 1970's, was more or less an all out effort to try to get the groups together that would build the large glass, so to speak.

From 1980 - 1983, the National Observatory planned a 15-meter telescope that was to consist of 4 8-meter mirrors, 7 1/2-meter mirrors actually cast by the Arizona group. Arizona and CalTech got together independently to build an 8-meter telescope. These were all to use Arizona mirror technology, financed by NSF

July 8, 1988 meeting, Board of Trustees

Dr. Capriotti: (contd)

through the National Observatory. In 1984, California and CalTech got together when CalTech heard that California was inheriting \$35 million of Hoffman money to build a telescope. They dropped Arizona and went with California. The technology was to be developed at Berkeley. When CalTech found out that this telescope was to be dominated by California, Keck donated \$70 million and the Hoffman Telescope now became the Keck Telescope. In the meantime, Arizona had a void, there was nobody on the horizon who would pair up with them to build an 8-meter telescope. We entered the picture at that juncture, that was 1985, to collaborate with Arizona to build an 8-meter telescope.

By 1986, Italy and Chicago had agreed to a plan to upgrade the 8-meter telescope to an 11.3-meter telescope which resulted in the Columbus Project. The Columbus Project has been described. The people who started it all in 1987 scrubbed their plans for a 15-meter telescope. And Jack Hollander can corroborate that incredibly poor leadership at the National Observatory led to this, what I think is a very wrong move. But it is better for us as independent people.

All right, just what kind of telescope are we going to have then? This is what it is going to look like. What you have is a single mount with 2 twin 8-meter telescopes designed to point in the same direction. The Italians have done all the stress analysis, vibrational analysis, on the mount. What Ohio State is doing is the secondary mirror alignment, which is a non-trivial part of the project because the secondary mirrors have to be held so that they, in fact, bring images together to within 1/3600 of a degree. The Arizona people, of course, are developing the mirrors through the oven technology.

I have two more pictures of it. That shows it from the side. I want to show you this picture because it shows very clearly just what we mean by a short telescope. This telescope -- compare that to the epitome of refracting telescopes, the Yerkes 40". In fact, the dome size, the enclosure size, for this telescope will not be significantly bigger than the Yerkes 40" telescope. You are talking about a telescope over 10 times the effective aperture. This again is another picture, a little close up showing the model in a little bit more detail.

Now what I want to do is take the last part of this tape and show you a couple of videos. Where are we right now with the telescope? The Italians have a very good design, they are responsible for the building of the telescope. The mirror technology was to be done in steps. The first casting with the oven is a 3 1/2-meter diameter mirror. This is the lifting of the oven showing the spinning oven. You can see very clearly the hexagonal molds, the shape of the hexagonal molds underneath, the honeycomb structure of the oven. This mirror is about 12' in diameter and it was cast on April 26 over about a 24-hour period; this was about 24 hours after the oven was turned on.

July 8, 1988 meeting, Board of Trustees

Mrs. Bowser:

They did this in Arizona?

Dr. Capriotti:

Yes. This was built under the stadium. They took a page out of the Manhattan Project, where they built the Atom bomb under Stag Field. What they did was build a laboratory underneath the Wildcat Stadium and this oven is capable of spin casting mirrors up to 8-meters in diameter. This is the first of two 3.5-meter diameter mirrors that are to be cast, followed by a 6 1/2-meter mirror which will be put into that tube that holds the six 1.8-meter mirrors, the multi-mirror telescope that I showed you. At any rate, this was rather a monumental event. The mirror has been removed from the oven and put upright and it is almost without a flaw. The most perfect mirror that they have ever cast of all the experiments they have done at Arizona. It was very much appreciated by the crowd that was there.

Well, that completes my presentation. What we have is a situation now where we have the next step to go and that is: to up-grade the oven to build the big mirrors; the construction of the telescope; the dome, itself, is yet to come; and also the telescope mount construction that is the responsibility of the Italians. I would be glad to answer any questions or if there are comments that you might have.

Mrs. Bowser:

What is the time frame?

Dr. Capriotti:

The time frame for the construction of the telescope with the insertion of a single 8-meter mirror is 1992. The hope is that within the next year and a half to have the second mirror installed so that the telescope will have both components by 1994. To say when the telescope will be actually completed is really something that no astronomer likes to talk about, because sometimes it takes 10 years before you get all the parts worked out. When we talk about seeing first light, that is the first time a beam comes through the telescope, we are shooting for 1992.

Ambassador Wolf:

When you talk about an 11.3 or 4-meter telescope it is perceived by you to be two 8's -- is that because the area of two 8's is the same around the --

Dr. Capriotti:

That is absolutely correct. The area of two 8's is equivalent to the area of one 11.2.

President Jennings:

Gene, could you elaborate a little bit on why this is important

July 8, 1988 meeting, Board of Trustees

President Jennings: (contd)

given the space technology and the telescope being put into space?

Dr. Capriotti:

I could elaborate on that subject with two responses. First of all what we are going to put into space, at a cost of \$1 - \$2 billion, is a 90" telescope. That is a telescope with a 90" aperture. So even though you are outside the atmosphere and you can see the complete spectral range -- because the atmosphere does block certain parts of the spectral range -- you can't put anything nearly the size (of the Columbus Project Telescope) that has its kind of light gathering power.

Secondly, there are new techniques being developed and the military is doing it with SDI. What it can do is take optical systems and actually, in real time, adjust them so that you can remove the distortion of the atmosphere and technologically place the telescope in space. That is technology that is at the cutting edge. As a matter of fact, at the University of Illinois a couple of scientists developed a technique where they could take a laser and 60 miles above the atmosphere excite sodium and cause it to radiate sufficiently stronger so that you can see it with about the same brightness as a faint star. So you can make a star. This is very much a part of this whole technology whereby you make a star-like image that you know is a point of light and you are monitoring that laser so that you can tell with the return beam what sort of distortion the atmosphere is causing. And then you use your computer to activate optics to correct it. That is "Buck Rogers" stuff. It is the next step.

President Jennings:

I think it is also important to elaborate on your earlier point that even if you are able to make a piece of glass this size without the new technology, you are talking a half a billion dollar cost. This project has a cost of around \$50 million. So you reduce the big costs by literally ten times -- still a very large project, but it is reachable in the contexts of some sort of reasonable costs. There is also a lot of astrophysics going on now. Gene, you can also elaborate on one more thing -- another contribution that Ohio State is making is that by and large one will operate this telescope from Columbus, Ohio. We won't have a large number of astronomers out there, but with electronic communications you will operate this from here in Columbus. Ohio State is developing this technology to operate by remote.

Dr. Capriotti:

This is what we plan for the future as a matter of fact to tie in with Mount Graham in Arizona, either with fiber optic ground communications or satellite microwave communications. Jack Hollander and I were at a meeting at the National Science Foundation called by Eric Block, the head of the National

July 8, 1988 meeting, Board of Trustees

Dr. Capriotti: (contd)

Science Foundation. The President of CalTech announced that they will not be operating the telescope in Hawaii by sending astronomers to the mountain-top, but there will be remote observing -- not the whole way back to California, but to a base camp at the foot of Mauna Kea. When Eric Block asked the President from CalTech, "Well, why don't you just keep going the whole way," he said, "Well, in time -- it is a question of money." And my feeling is -- this is one of the feelings that I've felt from day one -- that one of the most important parts of this project is by entering into one of the large telescope projects -- what is going to happen is that there will be networks like this amongst all of these installations. And then, not only will Ohio State astronomers have access to our own telescopes, but by virtue of relays and switches, pertinent scientific projects will be tied into a network that, in fact, involves the outstanding astronomy programs in the country and the world for that matter. So that is something, again, that is down the road. It is the kind of thing that we have to look at now if it is going to be a reality 10 to 20 years from now.

One last thing here -- let me show you a picture to give you some idea of what we are going to try to do. This is not a very good picture -- all those white things are bright stars and those purple things are galaxies. They are near what we call the confusion limit. With present telescopes that is what we see, as far as we can go. We can just make out that they are galaxies as opposed to just being sky background. With the 11.3-meter telescope we are talking about seeing those little purple smudges like that or whatever they happen to look like, because we are not sure, we can't tell.

President Jennings:

How many light-years away, Gene?

Dr. Capriotti:

We are talking out around 10 billion light-years.

President Jennings:

Thank you, Gene. The question is where is Mount Graham? Mount Graham is about 150 miles east of Tucson, Arizona.

--0--

President Jennings:

Mr. Chairman, I would like to do one other thing and that is we have a small event happening in a few weeks. Dave Thompson, who you know has been watching out for us for many years, through good times and bad, retires August 31. I, and I know the whole Board, want to congratulate you and thank you for all you have done for this Board. It has been mostly good, but there have been a few rough spots once in a while. We greatly appreciate your help and wish you good luck in retirement.

July 8, 1988 meeting, Board of Trustees

Mr. David D. Thompson:

Thank you, very much. It has been a great pleasure.

--0--

REPORT - UNIVERSITY'S INVESTMENT PORTFOLIO

Resolution No. 89-18

RESOLVED, That the report on the University's Investment Portfolio, dated June 17, 1988, as submitted to the Fiscal Affairs Committee of the Board of Trustees, be received and filed with the official records of the Board.

--0--

Thereupon the Board adjourned to meet Thursday, September 1, 1988, at The Ohio State University Fawcett Center for Tomorrow, Columbus, Ohio, at 6:30 p.m.

Attest:

Madison H. Scott
Secretary

Leonard J. Immke
Chairman

THE OHIO STATE UNIVERSITY
COMMENCEMENT CONVOCATION
September 1, 1988

Page 62 is blank

Commencement Speaker

Frank W. Hale, Jr.

Frank W. Hale, Jr. is special assistant to the president, vice provost for Minority Affairs, and professor of communication at The Ohio State University.

He is a graduate of the University of Nebraska, where he received both the A.B. and M.A. degrees in communication, political science, and English in 1950 and 1951 respectively. Hale earned a Ph.D. in communication and political science from Ohio State in 1955. He did post-graduate work in England and in 1960 was awarded an honorary Doctor of Humanities degree from Wilberforce University.

Hale was president of Oakwood College in Huntsville, Alabama before coming to Ohio State. From 1971-78, he was associate dean and chairperson of the Fellowship Committee of the Ohio State Graduate School, where he initiated the Graduate and Professional Schools Visitation Days Program. This program has awarded fellowships to over 1,200 minority students and led over 80 percent of them to earn advanced degrees. Hale also founded the Minority Scholars Program in 1982.

Hale has written four books: *A Manual of Public Speaking*, *Sunlight and Shadows*, *The Cry for Freedom*, and *They Came and They Conquered*. He has also written nearly 50 professional articles.

Hale has served as vice provost since 1978 and has sponsored a variety of development and support programs for minority students and staff including Martin Luther King Week activities, art exhibits, staff development seminars, and student financial support projects. His office has assisted approximately 4,000 minority students through its Freshman Foundation Program. During Hale's tenure, two government-funded programs have been established in Minority Affairs: Upward Bound and the Research Apprenticeship Program.

Frank Hale has a strong commitment to the education of minority students and has turned his beliefs into actions. He has been instrumental in programs at Ohio State to give minority students the opportunities to achieve their goals. Ohio State is proud to have such a distinguished educator as speaker for this 305th Commencement.

Recipients of Honors

Richard M. Morrow Doctor of Engineering

Richard Morrow, an Ohio State alumnus, has made extraordinary contributions to improve the United States and world energy supply while making Amoco Corporation one of the leading energy companies in the world. Over a span of 30 years, he has been instrumental in bringing into production off-shore oil and gas fields found under the most severe environmental conditions—from the ice flows of Alaska to the heat and sands of the Persian Gulf. The success of these projects will influence oil production for years to come. Morrow has played a key role in making Amoco an international petroleum company with an outstanding record in off-shore and international oil and gas production.

His technical versatility and outstanding management skills were recognized by his promotion to executive vice president of Amoco Chemical Corporation. In 1978, he was named president of the parent company, Amoco Corporation, and five years later was named chairman of the board and chief executive officer.

For his technical and managerial expertise in oil field production and reservoir engineering and his managerial leadership in the chemical and energy industries, Morrow was elected to the National Academy of Engineering, one of the highest honors conferred upon an engineer.

Beyond his notable achievements as an engineer and corporate leader, Morrow has devoted considerable time and talent to public service, as shown by his active involvement as a trustee of the University of Chicago and Rush-Presbyterian-St. Luke's Medical Center, as well as the United Way of Chicago and the United Way of America. Morrow is more than just a nominal member of several service agencies—he personally gets involved and sets an example for others.

Richard M. Morrow is a person who has broad interests, a compassion for people, and a sense of commitment to human progress which brings distinction to himself and his alma mater. It is with great pride that Ohio State confers upon him this honorary degree.

Raymond S. Bugno Distinguished Service Award

Raymond Bugno has devoted his entire career to The Ohio State University. Within a span of over 40 years, he has served under five University presidents and four executive directors of the Research Foundation. For nearly 20 years (the last four serving as deputy director of the Office of Sponsored Programs Administration), Bugno has been responsible for the Administration and Services Division. His responsibilities include the management of administrative staff who ensure that research projects are accomplished within the sponsors and the University's policies, as well as maintaining good working relationships with faculty researchers.

One of Bugno's former supervisors describes him as "a rare individual with a complete mastery of bureaucratic details"—details that kept getting more complex as years went by. He has been an exceptional source of information on all aspects of extramural funding and has always been willing to gather additional information about procedures and federal policy. His mastery of details, though, was always in the service of procuring, not obstructing research. Bugno's sincere concern was for faculty members and students affected by the Research Foundation's operations.

Bugno has been both a continuing student and teacher in the complex and rapidly changing world of the Research Foundation. He has served his profession at the national level by his memberships in the National Contract Management Association, the Committee on Governmental Relations, and the Society of Research Administrators while sustaining Ohio State's reputation as a leader in research.

Ray Bugno's loyalty, integrity, and dedication to Ohio State have made an exceptional model for others to follow. Ohio State is proud to present him with the Distinguished Service Award as an expression of the University's sincere appreciation.

Recipients of Honors

Eugene C. D'Angelo, Jr. Distinguished Service Award

Gene D'Angelo began his broadcasting career with the Taft Broadcasting Company as a member of the local sales team for WTVN-AM. After only five years at the station, D'Angelo had earned the title of general manager. In the five years that followed, his positions at Taft included vice president of Taft Broadcasting Company, vice president of the Buffalo division, and general manager of WGR-TV in Buffalo.

By 1972, D'Angelo had joined the WBNS stations as executive vice president of broadcast operations, chief operating officer, and general manager for television and radio. The owners of the WBNS stations named him president of broadcast operations in 1978. Under D'Angelo's leadership, WBNS-TV continues to lead in state-of-the-art broadcasting.

D'Angelo is a community leader who has represented Columbus internationally. In 1985, he was appointed by President Reagan to the Christopher Columbus Quincentenary Jubilee Commission. He has been instrumental in "sister city" agreements between Columbus and Genoa; the state of Ohio and the region of Liguria, Italy; and The Ohio State University and the University of Genoa and has recently been honored with the Italian government's top civilian award.

D'Angelo serves as a master representative of the arts in central Ohio. He is a former music major and marching band member at Ohio State and was most active in the early stages of the TBDBITL Alumni Association, serving on its first board of directors. He continues to assist the marching band, as well as serving on the Advisory Committee of the School of Music and School of Journalism. Currently, D'Angelo is chairman of the board of the Columbus Association for the Performing Arts (CAPA).

The local 1992 Christopher Columbus Commission, EXPO 92, and AmeriFlora '92 are underway thanks to his encouragement, fostering, and urging.

Ohio State is grateful for his tireless efforts and many years of dedication to the University and is proud to present him the Distinguished Service Award.

Robert L. Evans Distinguished Service Award

When a friend offered Bob Evans an opportunity to enter the restaurant business in 1944, Evans took it. Although soon afterward Evans was drafted into the Army, and as soon as he returned from the service in 1946, he continued to operate this restaurant, which seated 12.

Evans was dissatisfied with the choice of sausage available, so he kept experimenting with spices in his own homemade sausage until he liked it himself. A lot of other people liked it, too. By 1964, Evans had opened three sausage-making plants and the demand for his sausage continued to grow. Today, Bob Evans' Farms, Inc., is considered the leader in the sausage industry throughout Ohio, and in most of Michigan, northern Indiana, and the Chicago area, and his restaurants continue to expand.

The success of Bob Evans goes far beyond that of agriculturalist and restaurant owner. He has generously given of his time, talents, and financial support to 4-H and the College of Agriculture at Ohio State. Evans promotes 4-H conservation and natural resources education by sponsoring conservation education books to 4-H members and leaders. He is noted in Cooperative Extension Service for his quote, "The only thing better than sausage is 4-H."

Evans is a strong supporter of youth and education. He sponsors a scholarship each year to a deserving 4-H member entering Ohio State to study natural resources. He is also a supporter of the Food Industry Center at Ohio State, the College of Agriculture, OARDC, the Ohio Cooperative Extension Service, as well as serving on the Ohio Board of Regents. He has promoted educational research in swine production, beef production, and horse production and management. The volunteer time Evans has spent with young people and the influence he has had on their future is truly immeasurable.

In recognition of Bob Evans' commitment to The Ohio State University and to the education of students, the University is proud to present him with the Distinguished Service Award.

Recipients of Honors

Robert W. Wagner Distinguished Service Award

A dedicated artist-teacher-scholar, Robert W. Wagner is internationally known as an authority in the field of cinematography and has served Ohio State for over 38 years.

Wagner came to Ohio State in 1946 as a professor of photography. In 1958-59, he left to become head of the Department of Cinema at the University of Southern California. By 1960, Wagner returned to Ohio State to become director of the Motion Picture Division, Department of Photography, then chairperson of the department, and later director of graduate studies. From 1976-84, he held simultaneous professorships in the Department of Photography and Cinema, the Department of Communication, and the Division of Educational Foundations and Research. Since his retirement in 1984, he continues to contribute to Ohio State as a professor emeritus.

Wagner is one of the most distinguished individuals in the field of cinema, illustrated by his being a major American resource person for other nations' film makers and scholars. He has written several books and edited others, including articles for the *Encyclopaedia Britannica* and the *International Encyclopaedia of Education*. He has written numerous articles on the uses, techniques, and history of cinema and television and has written and produced a number of film, radio, and TV works. As an internationally recognized scholar, Wagner is universally acclaimed as a leader of the professional organizations in his field. He has brought great honor and distinction to the Department of Photography and Cinema and the reputation of The Ohio State University.

During his tenure at Ohio State, Professor Wagner has won many awards and honors. He continues to serve Ohio State by appearances as a lecturer, as well as advising students and serving on graduate dissertation committees. Wagner also remains active in the American Film Institute and the University Film and Video Association. Ohio State welcomes the opportunity to honor him for his distinguished and productive career.

Eva Donelson Wilson Distinguished Service Award

Eva Wilson is one of the faculty members whose contributions to Ohio State have brought considerable acclaim to the University.

As a well-known nutritionist, Wilson taught at Ohio State from 1946-48 and from 1960-72. After serving five years as associate chairperson for the Department of Home Economics at the OARDC, she accepted an invitation to join the College of Agriculture and Home Economics team (USAID) on the campus of the Escola Superior de Agricultura at the University of Sao Paulo in Piracicaba, Brazil.

For more than 10 years, Wilson lived and worked in Brazil assisting the USAID program to establish and strengthen a department of home economics program at the University in Sao Paulo. Prior to Wilson's arrival in Piracicaba, no academically based home economics programs existed in Brazil. She recruited several Brazilian women to complete graduate degrees in selected areas of home economics at Ohio State. Some of these women now have leadership roles at other universities in Brazil. All of the courses, curricula, and administrative framework for the program in home economics were developed and put in place under the supervision and dedicated persuasiveness of Eva Wilson. At present, she is regarded as chief among the individuals who have had a major impact on the content and direction of the progress of home economics education throughout Brazil.

Wilson has been an inspiration to students and faculty members. Her patience, persistence, and dedication have had a major influence on home economics across the globe, as well as at Ohio State. The University is pleased to present her with the Distinguished Service Award in recognition of her many years of unselfish devotion to Ohio State and the advancement of the international scope in the field of home economics.

Master of Business Administration

Jamie Belle Beard, Reynoldsburg; B.S.Bus.Adm.; *Business Administration*

Susan Jeanette Brown, Columbus; B.S. (Miami University); *Business Administration*

Jan Hiun Lie, Indonesia; B.S.Bus.Adm.; *Business Administration*

Yingling Lin, Taipei, Taiwan, R.O.C.; B.A. (Chung Yuan Christian University); *Business Administration*

Yichen Tsai, Taipei, Taiwan, R.O.C.; B.A. (National Taiwan University); *Business Administration*

Master of City and Regional Planning

Seyed Javad Ashrafi, Tehran, Iran; B.Arch., M.Arch. (National University of Iran); *City and Regional Planning*

Raghu Ram Bhat, Bombay, India; B.Arch.(Hons) (Indian Institute of Technology); *City and Regional Planning*

Sook-Hi Kang, Seoul, South Korea; B.A. (Ewha Woman's University); *City and Regional Planning*

Loretta Lee Peckol, Ashtabula; B.A.; *City and Regional Planning*

Ismail Bin Sulong, Malaysia; B.A.(Hons) (University of Malaya); *City and Regional Planning*

Chall-Kyoung Sung, Seoul, South Korea; B.S., M.Eng. (Hong Ik University); *City and Regional Planning*

Master of Fine Arts

Jacqueline M. Boyle, Columbus; B.F.A. (Bowling Green State University); *Art*

John Campbell Finnegan, Worthington; B.A. (University of Massachusetts); *Theatre*

Mark Franklin Gordon, Rochester, NY; B.A., B.A. (Oberlin College); *Art*

Hyosun Kim, Seoul, South Korea; B.F.A. (ChungAng University); M.A. (University of Denver); *Theatre*

Dana Lynn Louis, Madison, WI; B.S. (University of Wisconsin at Madison); *Art*

Iris Evelyn Sandkühler, Columbus; B.F.A.; *Art*

Madeleine Marie Sobota, Upper Arlington; B.A. (Saint Joseph's College); M.A. (Northwestern University); *Theatre*

Master of Labor and Human Resources

Kecia Renee Chasteen, Covington; B.S.Soc.Wel.; *Labor and Human Resources*

Melanie L. Diggs, Columbus; B.A. (Capital University); *Labor and Human Resources*

John Francis Haumesser, Newark; B.A. (Ohio University); *Labor and Human Resources*

Linda Jean Hendrickson, Janesville, WI; B.S. (University of Wisconsin at Madison); *Labor and Human Resources*

Lisa Ann Hughes, Ada, MI; B.S. (Michigan State University); *Labor and Human Resources*

Thomas Edward Markley, Chillicothe; B.A. (Wright State University); *Labor and Human Resources*

Virginia Young Midkiff, Columbus; B.A.; *Labor and Human Resources*

Tim Lewis Reynolds, Marietta; B.Bus.Adm. (Ohio University); *Labor and Human Resources*

Richard Warren Shaw, Westerville; B.S. (Taylor University); *Labor and Human Resources*

James Ray Walker, Columbus; B.S.Bus.Adm.; *Labor and Human Resources*

Master of Landscape Architecture

Diana Hope Rowe, Columbus; B.S. (Denison University); *Landscape Architecture*

Master of Liberal Studies

Jennifer Lynn Dowling, Gahanna; B.A.; *Liberal Studies*

Master of Public Administration

Kerry Jay Adkins, Columbus; B.A. (Ohio Northern University); *Public Administration*

Kecia Renee Chasteen, Covington; B.S.Soc.Wel.; *Public Administration*

Moon-Sung Hwang, Seoul, South Korea; B.A., M.P.A. (Seoul National University); *Public Administration*

Michael Alan O'Reilly, Sidney; B.A. (Ohio University); *Public Administration*

Prusanee Silapaphan, Thailand; B.A. (Chulalongkorn University); *Public Administration*

Deborah Jo Snead, Columbus; B.A.; *Public Administration*

Master of Science

Robert Bradford Abel, Rocky River; B.A. (Miami University); *Statistics*

Maria Beatriz Martinez Ancheta, Quezon City, Philippines; B.S. (University of the Philippines); *Statistics*

Arman Andalib, Tehran, Iran; B.S.E.E.; *Welding Engineering*

Nathan Martin Asplund, Pullman, WA; B.S. (Washington State University); *Agricultural Economics and Rural Sociology*

Margaret Mary Bauer, Cincinnati; B.A. (Ohio Northern University); *Agricultural Economics and Rural Sociology*

Warren Lamar Beard, Houston, TX; B.S., D.V.M. (Texas A & M University); *Veterinary Clinical Sciences*

Lotfi Ben-Said, Teboulba, Monastir, Tunisia; B.S. (Iowa State University); *Chemical Engineering*

Catherine Anne Bissonette, Dublin; B.S.Al.Hth.Prof.; *Allied Medical Professions*

Rebecca S. Blume, Minford; B.S.H.E.; *Home Economics*

Carol Ann Bohumolski, Columbus; B.S. (Kent State University); *Preventive Medicine*

Richard Paul Bokanyi, Jr., North Olmsted; B.S.Agr.; *Poultry Science*

James Louis Bolinger, Gahanna; B.S.E.E.; *Electrical Engineering*

Mark Edward Boos, Norwalk; B.S.; *Mechanical Engineering*

Dasse Bouare, Falo, Mali, Mali; B.S. (Rural Polytechnic Institute); *Agricultural Education*

Douglas Edward Boyd, Huber Heights; B.S.M.E.; *Mechanical Engineering*

Mark Farrell Briggs, Columbus; B.A.; *Preventive Medicine*

Marianne Rose Brown, Pittsburgh, PA; B.S. (University of Pittsburgh); *Chemical Engineering*

- Dirk Marin Feyants**, Brussels, Belgium; M.Eng. (Catholic University of Leuven); *Computer and Information Science*
- Cherie Fisher**, Zanesville; B.S.N. (Ohio University); *Nursing*
- Patrick E. Fleming**, Redondo Beach, CA; B.S. (University of Notre Dame); *Chemistry*
- David Paul Forrai**, Milwaukee, WI; B.S. (University of Wisconsin); *Electrical Engineering*
- Richard Fosdick**, Garfield Heights; B.S.M.E.; *Mechanical Engineering*
- Ahmed M. Gheith**, Egypt; B.Sc. (Alexandria University); *Computer and Information Science*
- Ileese Yvette Glatter**, Columbus; B.S.Cer.E.; *Metallurgical Engineering*
- Navin Goel**, India; B.Tech (Indian Institute of Technology); *Computer and Information Science*
- Siew Ging Gong**, Perak, Malaysia; B.A. (University of Malaya); *Dentistry*
- Rajeev Lochan Gorowara**, Fairborn; B.S.Ch.E.; *Chemical Engineering*
- James Henry Grant**, Columbus; B.S. (Northern Illinois University); *Welding Engineering*
- Mary Louise Griffin**, Columbus; B.S.N. (University of Pittsburgh); *Home Economics*
- Elizabeth Ann Guertal**, Whitehall; B.S.Agr.; *Agronomy*
- William Steven Gulker**, Columbus; B.S.A.A.E.; *Aeronautical and Astronautical Engineering*
- Mei-Ning Guo**, Hsin Ying, Taiwan, R.O.C.; B.S. (National Cheng-Kung University); *Chemical Engineering*
- Peter Michael Haas**, Columbus; B.S.; *Physics*
- Ahmed Hajji**, Soliman, Tunisia; B.S. (Oklahoma State University); *Electrical Engineering*
- Tony R. Hall**, Caledonia; B.S. (Ashland College); *Environmental Biology*
- Gregory Axel Hamilton**, Pickerington; B.S.Pharm.; *Pharmacy*
- Penny Jo Hamilton**, Fairmont, WV; B.S. (West Virginia University); *Chemistry*
- Alan Wayne Hartzler**, Pandora; B.S. (Tri-State University); *Bio-Medical Engineering*
- Robert Paul Harwig**, Chalfont, PA; B.S. (United States Military Academy); *Geodetic Science and Surveying*
- Peter William Hellyer**, Columbus; B.S.Agr., D.V.M.; *Veterinary Clinical Sciences*
- Greggory Bernard Herbert**, Cincinnati; B.S. (Xavier University); *Zoology*
- Ronald Raymond Hill, Jr.**, Bloomington, MN; B.S.Ch.E.; *Chemical Engineering*
- Deborah Jayne Hilscher**, North Canton; B.S.H.E.; *Home Economics*
- William Elvis Hines**, St. Louis, MO; B.A. (Northwestern University); M.D. (University of Missouri); *Allied Medical Professions*
- Kimberly Ann Holle**, Warren, MI; *Home Economics*
- James Ernest Hood**, Irondale; B.S.A.A.E.; *Aeronautical and Astronautical Engineering*
- Tamara Sue Hower**, Worthington; B.A.; *Preventive Medicine*
- Chris Hsu**, Shanghai, P.R.C.; B.S. (Shanghai Jiao Tong University); *Welding Engineering*
- Shyue Fang Hsu**, Taipei, Taiwan, R.O.C.; B.S. (Kaohsiung Medical College); *Pharmacy*

- Kwanghak Huh**, Seoul, South Korea; B.S. (California Institute of Technology); *Aeronautical and Astronautical Engineering*
- Robert Scott Huston**, Columbus; B.S.E.E.; *Electrical Engineering*
- Muzaffer Mete Imer**, Ankara, Turkey; B.S. (Middle East Technological University); *Mechanical Engineering*
- Louay M.A. Jalloul**, Beirut, Lebanon; B.S.E.E. (The University of Oklahoma); *Electrical Engineering*
- Shen-Shane Jen**, Hsin-Chu, Taiwan, R.O.C.; B.S. (National Taiwan University); *Botany*
- Brian Farrell Johnson**, Columbus; B.S.A.A.E.; *Aeronautical and Astronautical Engineering*
- Eric Paul Johnston**, Yellow Springs; B.A. (Wittenberg University); *Zoology*
- Paul Lawrence Juneau**, Grosse Ile, MI; B.A. (Wayne State University); *Statistics*
- Mohammad Halmi Kamaruddin**, Kuala Lumpur, W.P., Malaysia; B.Sc. (University of Technology of Malaysia); *Geodetic Science and Surveying*
- Angelos Kazaklis**, Greece; B.S. (Aristotelian University); *Zoology*
- Srinivasan Kesavan**, Madras, Tamil Nadu, India; B.Tech (Indian Institute of Technology); *Metallurgical Engineering*
- Kyung Sun Kim**, Seoul, South Korea; B.S., M.S. (Yonsei University); *Chemistry*
- Jeffrey S. Kirk**, Columbus; B.S.E.E.; *Electrical Engineering*
- Milan Kofron**, Columbus; *Geodetic Science and Surveying*
- Shari Diane Koslowsky**, Oconto Falls, WI; B.S. (University of Wisconsin); *Botany*
- Mark Kragalott**, Columbus; B.A. (Kenyon College); *Electrical Engineering*
- Monica Ann Krepfl**, Wickliffe; B.S.; *Civil Engineering*
- Mark Andrew Kroggel**, Madison; B.S.Agr.; *Horticulture*
- Ajay Digambar Kshemkalyani**, Bombay, India; B.Tech. (Indian Institute of Technology); *Computer and Information Science*
- Hsin-Lin Kuo Wu**, Taipei, Taiwan, R.O.C.; B.S. (Chinese Culture University); *Home Economics*
- Rosalie Ann Kuriakose**, Cincinnati; B.S. (Xavier University); *Physiology*
- Benjamin Julianto Lawu**, Bandung, Indonesia; C.E. (Parahyangan Catholic University); *Civil Engineering*
- Charles Frederick Layton**, Ames, IA; B.S. (Iowa State University); *Industrial and Systems Engineering*
- Sue H. Leidtke**, Delaware; B.S.Nurs.; *Nursing*
- Joel David Lema**, Kenner, LA; B.S.E.E. (University of New Orleans); *Electrical Engineering*
- Esther Chippis Levenson**, Columbus; B.S.N. (Columbia University); M.S.; *Nursing*
- Guang-Yeu Lin**, Yuan-Lin, Taiwan, R.O.C.; B.Sc. (National Taiwan University); *Mechanical Engineering*
- Weihung Lin**, Taipei, Taiwan, R.O.C.; B.S. (National Taiwan University); *Electrical Engineering*
- Elizabeth Marie Little**, Napoleon; B.S.Agr.; *Agricultural Education*
- Daniel Jay Littlefield**, Marietta; B.S.Ch.E.; *Chemical Engineering*
- Deborah Ann Logsdon**, Columbus; B.S.Nurs.; *Nursing*
- David Joseph Long**, Columbus; B.S.Agr.; *Bio-Medical Engineering*
- Ronald Wayne Lowes**, Perth, Australia; Associateship (Western Australian Institute Technology); *Civil Engineering*
- David Lucatz**, Washington, DC; B.S. (Hebrew University); *Industrial and Systems Engineering*
- Howard Walter Ludewig**, Mingo Junction; B.S.W.E.; *Welding Engineering*
- Patricia Ann Luetkemeier**, Columbus; B.Nurs. (Ball State University); *Nursing*
- Bryan Alan Luther**, Columbus; B.S. (Ohio University); *Physics*
- Neal Robert Manning**, Columbus; B.S. (The Pennsylvania State University); *Pathology*
- Murali Manohar**, Madras, Tamilnadu, India; B.Tech., M.S. (Indian Institute of Technology); *Interdisciplinary Programs*
- Carol Ann May**, Zanesville; B.S.N. (Ohio University); *Nursing*
- Deborah Ann McCarthy**, Lynnwood, WA; B.S. (Seattle University); *Chemistry*
- Andrew Lee McCart**, Monroe; B.S. (University of Tennessee); *Natural Resources*
- Marjorie Lynn McClish**, Washington Court House; B.S. (Bob Jones University); *Home Economics*
- Stewart Fenton McDonald, Jr.**, Martinsburg, WV; B.S.E.E. (West Virginia University); *Electrical Engineering*
- Paul Thomas McGowan**, Columbus; B.A. (Case Western Reserve University); *Welding Engineering*
- Rita O. Mena Peguero**, Santo Domingo, Dominican Republic; B.E. (National University of Pedro H. Urena); *Agricultural Economics and Rural Sociology*
- Beth Ann Miller**, Columbus; B.A. (University of Toledo); *Pathology*
- Bozena M. Misiewicz-Haug**, Warsaw, Poland; B.S.N. (Capital University); *Nursing*
- John Albert Molnar, Jr.**, Youngstown; B.E. (Youngstown State University); *Chemical Engineering*
- Lucio Reinaldo Munoz Toledo**, San Salvador, El Salvador; Ingeniero Agronomo (Universidad Nacional del Salvador); *Agricultural Economics and Rural Sociology*
- Paul Murray**, Hyderabad, India; B.Tech. (Indian Institute of Technology, Madras); *Chemical Engineering*
- Ananda Srinivasa Murthy**, Mysore, India; B.Tech. (Institute of Technology); *Welding Engineering*
- Rajagopal Narasimhan**, Madras, India; B.A. (Indian Institute of Technology); *Civil Engineering*
- John Eric Navarro**, Worthington; B.S.Nat.Res.; *Natural Resources*
- Mnqobi Edwin Ngidi**, Umzinto, Natal, Union of South Africa; B.S. (Berea College); *Dairy Science*
- James R. Norton**, Columbus; B.A. (Calvin College); *Pharmacy*
- Sharon Lynn Boudin Oreilly**, Sylvania; B.S. (Miami University); *Home Economics*
- Narongsak Ootthanakorn**, Bangkok, Thailand; B.Eng. (Kasetsart University); *Geodetic Science and Surveying*
- John Sedat Ozcomert**, Columbus; B.S. (Southern Connecticut State University); *Chemistry*
- Fernando Enrique Pacheco**, Concepcion, Chile; B.S. (Universidad De Concepcion); *Electrical Engineering*
- Ping Pan**, Sickuan, P.R.C.; B.S., M.S. (Beijing Institute of Technology); *Mechanical Engineering*
- No Hyoung Park**, Seoul, South Korea; B.S. (Yeung Nam University); *Animal Science*
- Vijay Madhav Parthasarathy**, Madras, India; B.Tech. (Indian Institute of Technology); *Ceramic Engineering*
- Ching-Gang Peng**, Taipei, Taiwan, R.O.C.; B.S. (National Cheng-Kung University); *Civil Engineering*

- Kathryn Mary Perlman**, Toledo; B.S.Nurs.; *Nursing*
- Richard Olin Pfau**, Columbus; B.S. (Youngstown University); *Allied Medical Professions*
- Linh Ngoc Pham**, Columbus; B.S.E.E.; *Electrical Engineering*
- Anita Maria Przemieniecki**, Beavercreek; B.S.M.E. (Cornell University); *Mechanical Engineering*
- Yasin Hassan Rahim**, Tanzania; B.S. (Drake University); *Pharmacy*
- Maria Lourdes A. Ramos**, Quezon City, Philippines; B.S. (University of the Philippines); *Statistics*
- John Leonard Readey**, Columbus; B.S. (University of Missouri); *Mathematics*
- Robert Reginald Rice, Jr.**, Columbus; B.S. (Kent State University); Ph.D. (Medical College of Georgia); *Preventive Medicine*
- Gordon Lyman Roberts**, Montreal, Canada; B.Sc. (Carleton University); D.D.S. (McGill University); *Dentistry*
- Ronald Frederick Rohde**, Brook Park; D.V.M.; *Veterinary Preventive Medicine*
- Kathryn Amanda Rose**, Cincinnati; B.S. (University of Cincinnati); *Home Economics*
- Marcia Lorraine Rose**, Orangeburg, SC; B.S. (South Carolina State College); *Home Economics*
- Nancy Anne Rose**, Columbus; B.S. (University of Missouri); *Horticulture*
- John Anthony Schnurrenberger**, West Mansfield; B.S.E.E.; *Electrical Engineering*
- Timothy Craig Schutt**, Novelty; B.S.M.E.; *Mechanical Engineering*
- Lawrence Edward Scipioni**, Columbus; B.S. (State University of New York at Buffalo); *Physics*
- Halim Bin Setan**, Malaysia; B.S. (North East London Polytechnic); *Geodetic Science and Surveying*
- Kambiz Shahnaizi**, Columbus; B.S.E.E., M.S.; *Welding Engineering*
- Yu-Lin Shen**, Kaohsiung, Taiwan, R.O.C.; Bachelor's, M.A. (Cheng-Kung University); *Metallurgical Engineering*
- Chin-Hang Shu**, Taipei, Taiwan, R.O.C.; B.S. (Tunghai University); *Chemical Engineering*
- Deepak Sirdeshmukh**, Warangal, India; B.Pharmacy (Kakatiya University); *Pharmacy*
- Ann Marie Smith**, Columbus; B.S.Nurs.; *Nursing*
- Bryan C. Smith**, Penfield, NY; B.S. (Clarkson University); *Chemical Engineering*
- Stephen Noel Spencer**, Columbus; B.S. (The University of Florida); *Computer and Information Science*
- John Edward Stasenko**, Pittsburgh, PA; B.S. (University of Pittsburgh); *Nuclear Engineering*
- Rodger Allen Stinson**, Pickerington; B.S. (Ball State University); *Preventive Medicine*
- Denis Robert St. Laurent**, Newington, CT; B.S. (University of Connecticut); *Chemistry*
- Patricia Carmen Stuht-McKinney**, Mansfield; B.S.N. (Ohio University); *Nursing*
- Dongchu Sun**, P.R.C.; B.S., M.S. (East China Normal University); *Statistics*
- Shelli Ann Talaganis**, New Middletown; B.S.N. (Youngstown State University); *Nursing*
- Subrata Krishna Talukdar**, Calcutta, India; B.A., B.A., B.A. (Calcutta University); *Pathology*
- Anna Tarr**, Monrovia, Liberia; B.S.Nurs.; *Nursing*
- Dale Gilbert Thompson**, Columbus; B.S.Nat.Res.; *Metallurgical Engineering*
- Donna Thomson**, Columbus; B.S.H.E.; *Home Economics*
- James Joseph Thorsden**, San Francisco, CA; B.A. (San Francisco State University); *Geology and Mineralogy*
- Shi-Huan Tien**, Beijing, P.R.C.; B.S. (Northrop University); *Electrical Engineering*
- Bettye K. Todd**, LaFayette, AL; B.S., M.Ed., M.S. (Tuskegee University); *Home Economics*
- Thomas John Trick**, Columbus; B.S., M.S. (University of Illinois); M.B.A. (Indiana University); *Ceramic Engineering*
- Atsushi Ueda**, Tokyo, Japan; B.S. (Waseda University); *Engineering Mechanics*
- Ann Vail**, Pueblo, CO; B.S. (Colorado State University); *Home Economics*
- Barbara Jane Vance**, Mt. Sterling; B.A. (Ohio Dominican College); *Home Economics*
- Wesley L. Vargas**, San Jose, Costa Rica; M.D. (University of Costa Rica); *Allied Medical Professions*
- Balraj Varma**, Cochin, India; B.E.(Hons.) (Birla Institute of Technology and Science); *Civil Engineering*
- Rosa Isabelina Vazquez**, Quito, Ecuador; B.S. (Universidad Central); *Zoology*
- James R. Wallace**, Litchfield; B.S.Agr.; *Agricultural Education*
- Mary Anne Welch**, Tiffin; B.S.A.Hth.Prof.; *Allied Medical Professions*
- Hung-Chen Wen**, Taiwan, R.O.C.; B.S. (Tunghai University); *Chemical Engineering*
- Janice S. Wildermuth**, Wapakoneta; B.S.Nurs.; *Nursing*
- Peter Blaine Wiley**, Perrysburg; B.S. (University of Notre Dame); *Computer and Information Science*
- Melisa Kay Williams**, Columbus; B.S. (Northwestern State University of Louisiana); *Natural Resources*
- Leslie Lee Wilson**, Columbus; B.S.Agr.; *Plant Pathology*
- Peter James Wilson**, Columbus; B.S. (Cornell University); *Physics*
- John Frederick Windeknecht**, Detroit, MI; B.S. (Oakland University); *Electrical Engineering*
- Timothy Duane Woodward**, Fletcher; B.S.Agr., D.V.M.; *Animal Science*
- Yiing Mei Wu**, Kaohsiung, Taiwan, R.O.C.; B.S. (National Taiwan University); M.S. (National Sun Yat-Sen University); *Metallurgical Engineering*
- Hichem Yaiche**, Sfax, Tunisia; B.S. (Michigan State University); *Electrical Engineering*
- Yuping Yang**, P.R.C.; B.S. (Fudan University); *Mathematics*
- Janene Ann Yeater**, Mansfield; B.S.N. (Capital University); *Nursing*
- Hong-Jun Yeh**, Taichung, Taiwan, R.O.C.; B.S.M.E.; *Welding Engineering*
- Niann-I Yu**, Taipei, Taiwan, R.O.C.; B.S. (National Taiwan University); *Engineering Mechanics*
- Cheng Zhang**, Xian, P.R.C.; B.S. (Shaanxi Teacher's University); *Welding Engineering*
- Fengkun Zhao**, Shandong, P.R.C.; B.Sc. (Agricultural University of Shandong); *Agricultural Economics and Rural Sociology*
- Michael Anthony Zoglio**, Dayton; B.Sc. (Case Western Reserve University); *Pharmacy*

Master of Social Work

- Harold Alonzo Esterwood III**, Cleveland; B.S.; *Social Work*
- Mary Therese Farrell**, Elyria; B.S.Soc.Wel.; *Social Work*
- Mercedes Marie Michael**, Columbus; B.S.Ed.; *Social Work*
- Rhonda Ann Myers**, Logan; B.A. (Ohio University); *Social Work*

Tony Perez, El Paso, TX; Diploma of
Theology (Latin American Bible Institute);
B.S.W. (Our Lady of the Lake University);
Social Work

Richard James Petruska, Cleveland, B.A.,
M.A. (Cleveland State University); M.A.;
Social Work

Colleges of the Arts and Sciences

Chairman, Coordinating Council of
Deans: Joan Huber

Acting Dean for Undergraduate Studies:
Donald W. Good

The Colleges of the Arts and Sciences, a
federation of five colleges, includes:

College of the Arts
College of Biological Sciences
College of Humanities
College of Mathematical and Physical
Sciences
College of Social and Behavioral Sciences

College of the Arts

Dean: Donald Harris

Bachelor of Arts

Donald J. Glenn, Pittsburgh, PA
Jill Griffith, Mt. Gilead
Karen Jane Horn, Columbus
Robert David Schmittgen, Lorain
William Scott Walton, Columbus
Mark Edward Weaver, Canton
Greg L. Welker, Bolivar

Bachelor of Fine Arts

Dwight Earl Alsbach, Columbus
Pamela Jane Beaverson, Elkhart, IN
Suni Lee Boswell, Columbus
Jennifer Margaret Cannon, Dayton
Deborah Lynn Dayton, Mayfield Heights
Fouad Ahmed Ghazzaoui, Sidon, Lebanon
Jean Estelle Gidich, Lorain
Stacey Beth Gilbert, Columbus
Osvaldo Pagan-Pagan, Rio Piedras, PR
Christine Sciarra, Steubenville
Kenneth Todd Weaver, Columbus
Donna Jean Weigle, Beaver, PA
Amy Marie Williams, Mansfield
Matthew Joseph Zelnik, Lorain

Bachelor of Music

Margaret Virginia Millit, Shadyside

Bachelor of Art Education¹

Joan Marie Utz, Powell

¹Offered by the College of the Arts

Bachelor of Art Education²

Barbara Suzanne Selanik, Warren

Bachelor of Music Education²

David Christopher Monseur, Dayton

Bachelor of Science in Industrial Design

Maria José Krause, Columbus

College of Biological Sciences

Dean: William A. Jensen

Bachelor of Arts

Paul T. DeVore, Westerville

Bachelor of Science

Robert Eric Almquist II, North Olmsted
Linda Francis Christner, Crestline
Deanna Asad Dalia, Columbus
Michael John Diederer, Columbus
Christopher Vincent DiSalvo, Fairview
Park
Erin Elizabeth Garvey, Reynoldsburg
Aaron Scott Goldfein, Columbus
Dawn Elizabeth Gruver, Orangeville
Roshan Sara Koozekanani, Upper
Arlington
Michael Edward Madison, Salem
Kurt Douglas Miller, Columbus
Elizabeth E. Minton, Upper Arlington
Penny Lynn Mullins, Hurricane, WV
Peter Niciforos, Campbell
Bethany Sue Reese, Beavercreek
Randal Scott Regoli, Bellaire
Brenda Alice Salmon, Tonawanda, NY
Jaime Darren Tickle, Grove City
Richard Tomm, Cleveland
Kim Allyn Traversa, Bellaire
Sandra Michelle Yawetz, Massillon
James Arthur Young, Columbus

Sandra Kay Barnhouse, Lima
Cathy Lynn Barthelmas, Columbus
Kristen Elise Blum, Columbus
Lawrence James Bovard, Columbus
Ronald Ronae Browder, Calhoun, AL
Kurt Roland Christman, Columbus
Cynthia Leigh Clem, Columbus
Kimberley Conley Comar, Jeffersonville
Barbara Jeanne Combs, Marysville
Concetta Di Stefano, Steubenville
Deborah Dolores Doehr, Lima
Jeffrey Paul Draime, Warren
Barbara Carol Draughon, Toledo
Selika Marianne Ducksworth, Columbus
Gwendolyn Lee Eastlake, Salem
Timothy Edward Easton, Akron
Sheryl Ethel Edwards, Gahanna
Jason Keith Ellis, Zanerville
Pamela Anne Faure, Upper Arlington
Lisa Renee Fields, Lewisburg
Paula Lynn Frank, Delaware
Kimberly Dianne Fuller, Smithville
Susan Kay Harshe, Westerville
Ben Alan Harshman, Findlay
Richard Barton Hill, Akron
Dwayne Allan Hupp, Heath
Sybil Hyacinth Joseph, Columbus
Douglas Alan Kelly, Archbold
Kristine Suzanne Kendziorski, Brilliant
Lidia Iwona Kolomyjec-Gamez, Castalia
Arienne Adorée McCracken, Bellefontaine
Kevin Patrick McGovern, Columbus
Patrick John McSweeney, Jr., Columbus
Adam Clay Miller, Wauwatosa, WI
Cheryl Ann Morris, Westerville
Penny Lynn Mullins, Hurricane, WV
Caroline Ostrow, Elyria
Paul Wesley Placeway, Worthington
Terri Lynn Rader, Bedford Heights
Jeffrey Powell Rowe, Zanerville
Teresa M. Schirtzinger, Columbus
Dorian Clarke Shanks, Hudson
Laura Letitia Sharp, Columbus
Diana Kathryn Smetters, Westerville
Julie Howe Stalnaker, Canal Winchester
John Henry Stampe, Columbus
Rebecca Lynn Taylor, Wooster
Jennifer Lynn Toft, Upper Arlington
Ann Elizabeth Tomlinson,
Glastonbury, CT
Nancy Susanne Weissman, Cleveland
Connie Leigh White, Columbus
Brian Edward Wilford, Columbus
Rebecca J. Winters, Columbus

College of Humanities

Dean: G. Micheal Riley

Bachelor of Arts

Kirk Neil Allton, Columbus
Susan Marie Aman, North Canton
Lisa Louise Arman, Waterville
Brian Keith Baker, Columbiana

²Offered jointly by the College of the Arts and the
College of Education

College of Mathematical and Physical Sciences

Dean: C. William Kern

Bachelor of Arts

Renée Marie Carr, Hamilton
Carl Vaughn Mason, Columbus
Margaret Rose Meyers, Dayton
Guy Richard Scarozza, Columbus
James Michael Schirmer, Ashland

Bachelor of Science

Bradley Beau Branham, Columbus
Elaine Nancy Farstad, Sunbury
David Ralph Fetterman, Swanton
James William Fournier, Grove City
Alan Frederick Garcia, Shadyside
Scott Steven Gray, Barnesville
Joette Elise Greenstein, Newark
Joel Alan Greff, Bexley
Yau Yam Hui, Hong Kong
Kelly Sue Mattingly, Cincinnati
James Julius Neidhart, Columbus
Eric John Olson, Columbus
Elizabeth Anne Paliwoda, Parma Heights
Jason Thomas Poulton, Newark
Floyd Eric Romesberg, Granville
Thomas Nicholas Salapa, Jr., Munhall, PA
David James Shell, New Washington
Dana Scott Toops, Mechanicsburg
Yvonne E. Walters, Pataskala
Brian Paul Wisvari, Powhatan Point

College of Social and Behavioral Sciences

Dean: Joan Huber

Bachelor of Arts

Frank Anastasia III, Cincinnati
Scott Applegate, Solon
Dianna Gail Armstrong, Napoleon
Angela Denise Arnold, Vanlue
Grant Whitney Arthur, Marion
Sheldon Andre Ayers, San Fernando, Trinidad
Michael Dean Ball, Waynesfield
Brett Leroy Bonnell, Columbus
Alyson Adele Breehl, New Philadelphia
Kimberly Patrice Bryant, Reynoldsburg
Mark Anthony Buccilla, Columbus
Kristine Rae Callaghan, Westerville
Mark Martin Calvary, Columbus
Dean Anthony Carnevale, Columbus
Michael Thomas Colson, Worthington
Andrew Brian Coogle, Fredericktown
Colleen Marie Cook, Columbus
Michele Marie Danne, Elyria
Dana Michelle Day, Germantown
Joseph Charles Dayspring, Huber Heights
Shirley Irene DeJean, Bucyrus
Glenn Edward DeMar, Cincinnati
Anthony Jay DiDomenico, Parma
John Francis Doherty, Westlake
Daniel Edward Duvall, Rayland
John Michael Fairand, Upper Arlington
Francene Lee Felcher, Akron
Susan Ann Ferens, Toledo
Pamela Jean Fightmaster, Reynoldsburg
Jennifer Ann Flint, Columbus
Linda Marie Flowers, Brooklyn Heights
Steven Scott Gahman, Lima
Krista Louise Gallatin, Painesville
Donald Boyd Gibson, Columbus
Lynette Louise Gonzalez, Lakewood

James Roy Goodlett, Middletown
Kenneth Louis Goodwin, Columbus
Thomas Lee Graves, Columbus
Marla Dawn Graziano, Lorain
Sandra Spence Hartman, Worthington
William George Heil, Northfield
Jorge Francisco Hernandez, Cleveland
Susan Joanne Himes, Columbus
Marcia Davel Holcomb, Columbus
April Clarice Howard, Cincinnati
Richard James Hughes, Girard
Vicki Lynn Indermill, Celina
Melanie Jane Isaly, Shadyside
Noel Arnold Jackman, Bluffton
Christina Marie Jankus, South Euclid
Matthew Charles Kehlmeier, Columbus
Jeffrey L. Kight, Columbus
Eric Matthew Kill, Celina
Kathleen Jeannette Knaack, Granville
Laura Lynn Kodish, Akron
Steven Alan Koesterman, Cincinnati
Christopher Thomas Kremer, Columbus
Shauna June Lambert, New Albany
Yong Lao, Kummung, P.R.C.
Stacey Lynn Lashley, South Euclid
Darci Jo Lauener, Fredericktown
Sang Loke Lee, Seoul, South Korea
Jean Elizabeth Less, Canfield
Beth Anne Lister, Worthington
Gregory John Lowe, Poland
Christopher Andrew Luckscheiter, Colts Neck, NJ
Jacqueline Renée Luskic, Dayton
David Earl MacCartney, Sidney
Robert Graham MacQueen, Columbus
John William Maiden, Delaware
David Patrick Manion, Columbus
Jennifer Lynn Marinello, Columbus
Susan Marie Markowski, Akron
Candace Clay Martin, Houston, TX
Craig Anthony Martin, Cleveland Heights
Patrick Justin McCarthy, Youngstown
Mark Alex McConaghy, Columbus
Donna Marie McCray, Cleveland
Lisa Marie Miko, Centerville
Paul Michael Miller, Wellsville
Stephanie Sue Morgan, Zanesville
Ellen Butler Moseley, Jr., Columbus
Heather Ann Myers, Richfield
A. Kathryn Nehr, Columbus
James Edward Nobile, Worthington
James Saul O'Dell, Columbus
Paul Richard Ohl, Mansfield
Lorella Kay O'Neil, Reynoldsburg
Lisa Diane Paquette, Columbus
Tamarra Lynn Payne, Worthington
Katherine A. Pence, Broadview Heights
George H. Price, Calgary, Alberta, Canada
Karen Leslie Prude, Marion
Gary Allen Purdy, Brooklyn, NY
Terrence John Reagan, Rocky River
Usha Lakshmi Reddi, Columbus
Peter Sherwood Renshaw, Georgetown
Kenneth Jay Rhinehart, Canfield
Rita Ann Roll, Milford
Mary B. Roller, Newark
Vicki Lynn Rollins, Mansfield
Kathleen Elizabeth Romer, Fort Recovery
Lisa Ann Ross, Dublin

Michelle Lynne Rothert, Toledo
Barbara Joanna Russell, Marion
Kevin David Russell, Powell
Amy Lynn Scott, Columbus
Shellie Marie Selove, Fairfax, VA
Marilyn Christine Senter, Columbus
Cynthia Mary Shumate, Cleveland
Yvonne Montrese Smith, Columbus
Paul Steven Stark, Chesterland
Peg M. Steigerwald, Hilliard
Apyri Renee Stewart, Lima
Bo Robert Tarpoff, Springfield
Ann Jarvis Thomas, New Philadelphia
Theresa Ann Thompson, Reynoldsburg
Karen Ann Tolbert, Cuyahoga Falls
David Allan Trcka, Hinckley
Carrie Lynn Tuxhorn, Beaver Creek
Judith E. Tyler, Blaine
Richard Louis Vogel
Shari Lynn Weichel, Warren
Debra Sue Weltman, Cleveland
Kecia Renee Wilcox, Mansfield
Glenna Lee Willman, Attica
Mista Kay Will, Columbus
Kelly Ann Winder, Solon
Lori Ellen Wright, Englewood

Bachelor of Science

David Christopher Agle, Pepper Pike
Rashid Yahya Al-Maskary, Sultanate of Oman
Deborah Ann Barnette, Elyria
Cathy Lynn Barthelmas, Columbus
Peter Daniel Bastien, Dayton
Richard Paul DeShon, Oberlin
Daniel Joseph Frederick, Milan
Cathryn Ann Gillen, Metamora
Elizabeth Marie Heider, Columbus
Bruce Phillip Keller, Hudson
Michael K. Laudisio, Geneva
Stephen Edward Milonovich, Bridgeport
Oswaldo Francisco Morera, Gahanna
Fredrick J. Nicely, Akron
Lucinda Anne Pfeifer, Marion
Maureen Andrews Renner, Biloxi, MS
Mary Elizabeth Rooney, Wooster
Scott Craig Stallkamp, Lima
Stephen Michael Wood, Beaver Creek

School of Journalism

Bachelor of Arts in Journalism

Betsy Ann Adelmann, McArthur
Thomas Lee Batchelder, Chagrin Falls
Cathy LuAnne Bauer, Ashland
Mark Edward Bords, Worthington
Jeffrey Scott Bostic, Grove City
Todd Marshall Boyer, Columbus
Pamela D. Cavanagh, Dublin
Paula Mary Cherivassi, Reynoldsburg
Anne Elizabeth Christian, Marion
Margaret Leigh Curran, Columbus
Deborah Susan Detwiler, Sylvania
Theresa Marie Diggs, Columbus

David Bryan Fleming, Marysville
 Gia Marie Gambatese, Cleveland
 Jill Ann Glock, Kenton
 John Michael Gonzalez, Natrona Heights, PA
 Peggy Marie Greenland, Lima
 Kelley Anne Griffith, Van Buren
 Ann Marie Harcsa, Gahanna
 Robyn Deann Henning, North Canton
 Joni Lynn Herrmann, Lebanon
 Christine Marie Hibler, Brecksville
 Christopher Allen Howell, Columbus
 Melinda Ann Hungler, Columbus
 Kay Lynne Kilanowicz, Columbus
 Martha Jane Koloski, Columbus
 Lisa E. Lambert, Mt. Vernon
 Stuart Jay Lederer, Belimore, NY
 Sheila Kay Lillegren, Springfield, OR
 Vivica Lynn Lundblad, Wadsworth
 David G. Lutz, Reynoldsburg
 Beth Ellen Lynch, Murrysville, PA
 Karen Leah Maginnis, Pickerington
 Eileen Malone, Avon Lake
 Laura Ann Martin, Mansfield
 DeAnn Marie McDermott, Akron
 Vaneta J. Meredith, Columbus
 Timothy James Morbitzer, Columbus
 Robert Brady Mosbacher, Columbus
 Peggy Ann O'Keefe, Lorain
 Jodi Lynn Oman, Celina
 Jennifer Lyn Onesto, Columbus
 Tina Marie Picone, Solon
 Michelle Lynn Raines, Willoughby Hills
 Sarah Ann Reinbolt, Akron
 Lisa Beth Rosen, Columbus
 Aaron Alvin Sampson, Jr., Fairborn
 Robert Martin Sevel, Cleveland
 Teresa Sue Shall, Toledo
 Curtis Eugene Shepherd, Lima
 Stephanie Sue Snider, Newark
 Gloria Elizabeth Spencer, Columbus
 Carol Jean Susi, Columbus
 Gregory Robert Trauthwein, Fairfield
 Julia Ellen Vinson, Minerva
 Matthew Joseph Wagner, Lima
 Brian Lee Wallace, Columbus
 John Mark Whitson, Findlay
 Todd Daniel Wilkerson, Dayton
 Elizabeth Lynn Yumang, Warren

College of Agriculture

Dean: Frederick E. Hutchinson

Bachelor of Science in Agriculture

Glady's Marie Beaschler, Columbus
 James Richard Bluck, Linton, IN
 Paul H. Detwiler, Seville
 Frank Joseph Foster, East Palestine
 Timothy Rowe Garmon, Kenton
 William Austin Gault, Ashland
 William Scott Grimm, Bergholz
 Eric Wayne Johnson, Galena
 Bryan Keith Kelley, Hamilton
 Thomas Alan Kelm, Leetonia
 Timothy Edward Lagucki, Columbus

Marla Sue Mines, Beavercreek
 Joan Elizabeth Riepenhoff, Ottawa
 David Lee Robinson, Bloomingdale
 Karl Daniel Roell, Cleves
 Robert Doyle Scott, Bloomingdale
 Susan Marie Specht, Dalton
 Curtis Edward Stearns, Columbus
 Jonathan Joel Stoutenburg, Westerville
 Jeffrey Alan Trautwein, Upper Sandusky
 Chris Duane Turner, Harrod
 Peggy Sue Vaughn, Newark
 Madonna Jo Woebkenberg, Lebanon
 Nanette Louise Wolcott, Perrysville
 Lance Paul Yost, Columbus

Bachelor of Science in Food Science

Yoshiro Lozano, Brooklyn
 Lisa Marie Sabol, Rochester Hills, MI

Bachelor of Science in Nutrition

Donna Marie Dougher, Mentor

School of Natural Resources

Bachelor of Science in Natural Resources

Kenneth Stanley Duvall, Kettering
 Gerald Lee Fetter, Jr., Copley, PA
 Todd Allen Hunt, Mansfield
 Douglas Alan Jeanneret, Wapakoneta
 Douglas Duane Jenkins, Newark
 David H. McKay, Westerville
 Timothy Michael Metzger, Delphos
 John Patrick Tholen, Northport, NY

Agricultural Technical Institute – Wooster

Associate in Applied Science

Randall Keith Agler, Ohio City
 Renee Denise Balderson, Columbus
 Susan Marie Casceday, Akron
 Darla Maureen Cornell, Toledo
 Georgia Theresa Enright, Englishtown, NJ
 Janelle Ann Firestone, Lima
 Leslie Ann Guess, Toledo
 Barbara Jo Haddad, Toledo
 Linda Rose Jensen, Wooster
 Bryan Scott Miller, Greensburg
 Diane Marie Rossmann, Euclid
 Lesley Anne Taylor, Ipswich, MA

College of Business

Dean: H. Justin Davidson

Bachelor of Science in Business Administration

Sherry Lynn Alter, Centerville
 Gretchen Lynn Amerman, Peoria, IL
 Robert Boyd Anderson, Warren
 Arslan Anwar, Lahore, Pakistan
 Robert Harry Back, Noblesville, IN
 James Robert Balk, Columbus
 Karen Elizabeth Balser, Newbury
 Stacey Barr, Troy
 Paul Gerard Bartels, Cincinnati
 Saleh M. Basamh, Taif, Saudi Arabia
 Darrin Todd Bean, Westerville
 Patti Sue Beckett, Ottawa
 Cynthia A. Berelsman, Delphos
 Mark Andrew Berens, Columbus

Graduates with Honors

Criteria for graduating with honors are as follows:

Summa Cum Laude designates those graduating in the top 3% of the class.

Cum Laude designates those graduating in the top 10% of the class.

With Distinction requires successful completion of a Senior Honors Thesis, oral examination, and graduation in the top 25% of the class.

With Honors in the Liberal Arts requires successful completion of the Arts and Sciences Honors Contract and graduation in the top 25% of the class.

With University Honors designates those graduating with curricular distinction and dedication to high educational goals.

Summa Cum Laude with Distinction in Elementary Education

Diana Lynn Sanders

Summa Cum Laude with Honors in the Liberal Arts

Diana Kathryn Smetters

Summa Cum Laude

David Alan Cromleigh
 Marjorie Phillis Duncan
 Toni Gallow
 Diana Dawn Clawe
 Jennifer Muskoff Ishida

THE OHIO STATE UNIVERSITY
OFFICIAL PROCEEDINGS OF THE
ONE THOUSAND TWO HUNDRED AND FORTY-FOURTH MEETING
OF THE BOARD OF TRUSTEES

Columbus, Ohio, September 2, 1988

The Board of Trustees met at its regular monthly meeting on Friday, September 2, 1988, at The Ohio State University Fawcett Center for Tomorrow, Columbus, Ohio, pursuant to adjournment.

* * *
Minutes of the last meeting were approved.
* * *

September 1 and 2, 1988 meeting, Board of Trustees

The Chairman, Mr. Immke, called the meeting of the Board of Trustees to order on September 1, 1988, at 6:35 p.m. He requested the Secretary to call the roll.

Present: Leonard J. Immke, Chairman, John W. Berry, Shirley D. Bowser, Hamilton J. Teaford, Deborah E. Casto, John W. Kessler, and Milton A. Wolf.

The meeting recessed into Executive Session for the purpose of considering legal issues and personnel actions as follows: faculty/staff appointments and reappointments, resignations and terminations, leaves of absence without salary, professional improvement leaves, promotions/tenure, emeritus titles, and medical staff appointments/reappointments.

Upon motion of Mr. Kessler, seconded by Mrs. Bowser.

--0--

Mr. Immke reconvened the meeting on September 2, 1988, at 10:10 a.m.

Present: Leonard J. Immke, Chairman, John W. Berry, Shirley D. Bowser, Hamilton J. Teaford, Deborah E. Casto, John W. Kessler, and Milton A. Wolf.

--0--

Mr. Immke:

Mr. Harry E. Smail will address the Board regarding the use of the University's land and related zoning matters on North Star Road.

Mr. Harry E. Smail:

Thank you, Dr. Jennings and Members of the Board of Trustees. I come here this morning to bring to your immediate attention an issue of immense concern to the residents bordering the University on the north side along North Star Road and to the north along Sunny Hill Drive and along the west side of central campus. That is the OSU zoning application that has been refiled with the City of Columbus for the rezoning of the entire Central Campus into a University Research Park designation. I have previously provided an open letter on this subject which was dated July 11, 1988, and Mr. Scott informed me that he provided an earlier copy to all of you.

I come here, myself, as an alumni. I graduated from this University with a degree in City and Regional Planning. I am a professional planner and an area resident for the past 21 years, as well as being an adjacent homeowner. I come here representing only myself today. There is a group that has been formed in opposition to it; however, I am not a spokesman for them. I am only speaking for myself as a professional planner and as an adjacent landowner.

Specifically, I am not opposed to the future development of OSU lands, if that development is based on specific plans. What I am really concerned about are the circumstances and details

September 1 and 2, 1988 meeting, Board of Trustees

Mr. Smail (contd)

surrounding the zoning application. Specifically, there are two items of concern -- a seeming unwillingness to provide full public disclosure of the development plans for the 600-700 acres of open space land located west of the Olentangy River. Moreover, I come with an additional concern today and that is the public reaction to date to the OSU actions that have been taken to date. I think the stage is being set for a long, costly, and perhaps even a legal battle before this is all over. One which will essentially challenge the integrity of the University before the City and perhaps into the courts. I think, as a professional, that the timely application of some sound land use planning principles can help alleviate this matter. And that is why I am addressing the Board today. The Board, as I understand it, has the ultimate decision regarding the real estate developments concerning that land.

Just as a brief history, and again, I have had my remarks prepared and placed in front of you today for your review later. On March 21, 1988, OSU filed a rezoning application. On May 12, at a hearing before the Development Commission the rezoning request was tabled to provide an opportunity for the University to meet with concerned citizens. Such a meeting was held on May 31 by Mr. Jean Hansford, the OSU Campus Planner. On August 12, 1988, the University subsequently filed a planning overlay as a means of trying to preserve compatibility with adjacent land uses outside that zoning District. Subsequently, at an August 11, 1988, meeting of the Development Commission, after a 3 1/2 hour discussion the Development Commission essentially said that the University should use its vast resources to come up with a more 'creative' rezoning proposal more agreeable to area residents and they tabled it. Also, there is a second application that has been filed on behalf of the Fair Citizens to rezone the same land with different standards.

I feel the real issue at hand is the lack of specific standards detailing what, when, where, and how such University research park development will occur. We know there has been much discussion about this over the last 4 or 5 years. The University has essentially stated in a letter dated May 31 from Vice President Jackson, that "The Ohio State University will not adopt specific plans (my emphasis) for the redevelopment of the Central Campus of the University in order to retain the desired flexibility which is required to insure that new potential development is of the highest standards." The specific concern that I have is that we are dealing with plans, not standards. Some of you have a real estate background and as you know from the development prospective, you have to file several plans, overlays and things like that -- specific details. What we are trying to do here, I feel -- without success, because we have nothing on which to base it -- what we are trying to say is -- "well, we will develop it to these standards" -- the standards have only been used to take into account site specific conditions, not as a means to initiate development.

Out of curiosity, in June, I obtained, from the OSU Office of

September 1 and 2, 1988 meeting, Board of Trustees

Mr. Smail (contd)

Campus Planning and Space Utilization, a copy of the "Master" plan of OSU. I discovered that the "current" Master Plan was prepared in 1961 and was last amended by the OSU Board of Trustees on April 8, 1965, which is about 23 years ago. And, the latest map was prepared on July 9, 1976, about 12 years ago. I have a copy here if someone would care to take a look at it after the presentation.

Although I posed some questions in my July 11 letter, I feel that these questions have not been answered and I will just briefly repeat them here for you this morning. There are five, specifically:

- 1) What are the University's specific intentions for the use of the open space land located west of the Olentangy River and; what is the basis for these plans?
- 2) What will be the traffic, noise and other environmental impacts to adjacent neighborhoods associated with the development and use of these lands?
- 3) What are the public infrastructure (water, sewer, streets, etc.) requirements necessary to support such development and if these lands are to be leased to private companies, will the lands be put on the tax roles as industrial parcels? Is the University willing to pay Developer Impact Fees to pay for any infrastructures needed?
- 4) Will the University place deed restrictions on its land to prohibit any activities involving radioactive, infectious, chemical, biological, or hazardous materials and this is a major concern to landowners?
- 5) Lastly, and more importantly, under the zoning code the University -- if granted this rezoning -- can determine what reasonable standards will be used for future development. And I question what administrative mechanism does or will the University have in place to impose and enforce any discretionary restrictions on lands which it proposes to lease to the various tenants? Specifically, that is under Chapter 3374 of the City Code.

Therefore, given that as a background, I appeal to you this morning to:

- 1) Direct the University officials involved in this effort to provide full disclosure to both the City of Columbus and to the landowners all existing materials pertaining to the proposed University Research Park and its specific plans for the use of the University lands located west of the Olentangy River. If no such plans really exist, as we have been told, then the University at a minimum should provide us some basis of the rationale for the standards that they are proposing. For example, what is the rationale for a 150 foot setback along North Star Road, but only a 50 foot

September 1 and 2, 1988 meeting, Board of Trustees

Mr. Small (contd)

setback along the Sunny Hill Drive back yards. What is the difference? What is the basis for it?

- 2) That the OSU Board of Trustees act to require the University Office of Campus Planning and Space Utilization, with assistance from the Department of City & Regional Planning, to timely complete a comprehensive campus plan and establish an ongoing planning process. It is the nature of good planning to have a plan on which to base future decisions.
- 3) Establish a meaningful public input/involvement program to continue interactions with the adjacent landowners.
- 4) Lastly, that the University does not enter into any long-term lease of these undeveloped lands until a comprehensive plan has been prepared and rezoning, if necessary, has been obtained.

In closing, these questions are going to require specific answers so that an informed, well-thought-out, documentable decision can be reached regarding this highly controversial rezoning application. There are many other issues that are associated with this which I do not have time to explore today, such as the constitutionality of this particular zoning application. I am sure that you are going to find that the surrounding residents are going to go to the extreme necessary to protect neighborhood characteristics and property values. And these issues will not go away. I encourage you, if you can, to attend the next hearing before the Development Commission scheduled for September 22.

Thank you for your time this morning. I will be happy to answer any questions today or later, in the evenings or on Saturdays, at my convenience, and your response is anxiously awaited by me and several other people, a couple of which have come this morning to be with me. Thank you.

Mr. Immke:

Any questions of Mr. Small?

President Jennings:

Thank you, Harry. Certainly we are concerned with the environment that we live in. I think it is interesting that your presentation comes only moments after a development plan was presented to this Board for a piece of land just east of Route 315, where the water tower is now. I think that the community would find this compatible. This University has had a long history of developing land in a means that is compatible with the surrounding neighborhoods, whether it is on High Street or North Star. I think you would find that the plans presented by our Vice President of Agriculture were very compatible with neighborhood activities.

September 1 and 2, 1988 meeting, Board of Trustees

President Jennings (contd)

There is no public disclosure because there is no plan. I think the reason there is the 1961 plan sitting there, is we found long ago, that the institutional changes that take place are extraordinary difficult to predict. That institutional plan that is now 25-30 years old has not been updated because, of course, that calls for a massive number of buildings on what we now call the West Campus to accommodate an institution of about 100,000 students. If that plan would have been put in to effect, there would be literally hundreds of buildings sitting on that West Campus by now. We found that planning for that type of activity was a useless exercise and did not accommodate the institutional needs.

I would also take exception to your comment of the "vast resources of Ohio State." We are a large institution, but we do not have money to spend in a wasteful manner that is implied by the statement of "vast resources."

Also, particularly with our agriculture vice president here, I would also take exception to the communities comment that this is at this stage undeveloped land and useless land. Our faculty in the College of Agriculture finds that land is extraordinarily valuable for their research purposes. Anything we do with that land over there, the first thing we always ask for is the faculty's input as to how they will accommodate their research activities if that land is used for something else.

The institution, I think, has the expertise and the commitment to be a good neighbor, but we also need to recognize the institutional needs. I can assure you that there are not going to be any 100 story high rises over there.

Mr. Small:

In response to a couple of the issues you brought up -- first, the words that the University uses "vast resources," that is the Development Commission, those aren't my words. Secondly, I called it "open spaced land" -- generally for agricultural uses, it is open spaced land. I did not want to infer in any way that it is wasted land or not being used productively for agricultural purposes. Third, the basic concern is that here we have two opposing forces essentially saying that this is what the standard should be, that is what the standards should be. Both are right! Because unless you try to apply those standards to a specific plan, they don't make sense. We are dealing with the abstract versus reality here. Standards can make a lot of sense for certain developments, but until you apply them to a specific parcel, detailing how, when and where that development will occur -- we have a plan first and then the standards are used as a way to mediate adverse impacts. So, that is the essence of what I want to bring to your attention today.

President Jennings:

I appreciate your interest not only in the community, but in Ohio State. I don't think there is any question that you come

September 1 and 2, 1988 meeting, Board of Trustees

President Jennings (contd)

to us with good will, that your interests are concurrent with ours in this activity. All I am suggesting is that plans set forth haven't worked very well in times gone by.

Mr. Smail:

Thank you, very much.

Mr. Immke:

Thank you. Mr. President, will you present your agenda?

--0--

NAMING OF BUILDING

Resolution No. 89-19

Synopsis: A new name is proposed for the building on the Columbus campus at 376 West 10th Avenue, currently known as the "Health Sciences Library."

WHEREAS the Board of Trustees has authority in naming of all buildings and structures at The Ohio State University, as set forth in paragraph (G) of rule 3335-1-08 of the Administrative Code; and

WHEREAS the building on the Columbus campus at 376 West 10th Avenue is currently described as the Health Sciences Library; and

WHEREAS Dr. John A. Prior began his career as a faculty member in the College of Medicine in 1946, served as Assistant Dean of the College from 1961 to 1963, Associate Dean from 1963 to 1970, and Dean from 1970 to 1972 when he returned to the faculty of the Department of Medicine until his retirement in 1981 and has since been Professor Emeritus; and

WHEREAS during Dr. Prior's tenure at Ohio State, his leadership, dedication and energies helped make the Health Sciences Library possible; and

WHEREAS he has devoted significant time and energy in many innovative ways to the University and the College of Medicine; and

WHEREAS the President recommended, with the concurrence of the President's staff, that the aforementioned building at 376 West 10th Avenue be named in honor of John A. Prior:

NOW THEREFORE

BE IT RESOLVED, That hereafter the building at 376 West 10th Avenue shall bear the name "John A. Prior Health Sciences Library."

Upon motion of Mrs. Bowser, seconded by Mr. Teaford, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

September 1 and 2, 1988 meeting, Board of Trustees

NAMING OF BUILDING

Resolution No. 89-20

Synopsis: A new name is proposed for the building on the Lima campus at 4285 Campus Drive, currently known as the "Student Activities Building."

WHEREAS the Board of Trustees has authority in naming of all buildings and structures at The Ohio State University, as set forth in paragraph (G) of rule 3335-1-08 of the Administrative Code; and

WHEREAS the building on the Lima campus at 4285 Campus Drive is currently described as the Student Activities Building; and

WHEREAS Dr. J. McLean Reed joined The Ohio State University at Lima in 1962 and served as director of that campus until 1970; and

WHEREAS Dr. Reed spends two days a week on the Lima campus where he continues to be active and supportive of their programs; and

WHEREAS Dr. Reed has been an educator for 70 years and continues to be held in high esteem by his colleagues, students, alumni and members of the community; and

WHEREAS the President recommended, with the concurrence of the President's staff, that the aforementioned building at 4285 Campus Drive be named in honor of J. McLean Reed:

NOW THEREFORE

BE IT RESOLVED, That hereafter the building at 4285 Campus Drive on the Lima Campus shall bear the name "J. McLean Reed Student Activities Building."

Upon motion of Ms. Casto, seconded by Mr. Berry, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

UNIVERSITY HOSPITALS BOARD APPOINTMENTS

Resolution No. 89-21

Synopsis: Confirmation and approval of nominees to the University Hospitals Board is proposed.

WHEREAS the Board of Trustees on November 30, 1979, approved the establishment of a University Hospitals Board; and

WHEREAS the membership of the Hospitals Board was approved on April 4, 1980, and has been subsequently amended; and

WHEREAS the terms of two of the members selected from the general public expired on April 30, 1987:

NOW THEREFORE

September 1 and 2, 1988 meeting, Board of Trustees

UNIVERSITY HOSPITALS BOARD APPOINTMENTS (contd)

BE IT RESOLVED, That the following nominees be approved as general public members of the University Hospitals Board effective September 1, 1988, for a term ending June 30, 1991:

Judy Barker
William M. Bennett

Upon motion of Mr. Berry, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

PERSONNEL ACTIONS

Resolution No. 89-22

RESOLVED, That the personnel actions as recorded in the Personnel Budget Records of the University since the July 8, 1988 meeting of the Board, including the following Concurrent Appointment, Appointments, Appointment of Chairpersons of Academic Faculty, Departments, and Divisions and Directors of Center and School, Reappointment of Chairpersons of Departments, Leaves of Absence Without Salary, Leave of Absence Without Salary--Continuation, Professional Improvement Leaves, Promotions/Tenure, and Emeritus Titles as detailed in the University Budget be approved, and the Medical Staff Appointments/Reappointments approved July 28, 1988, by the Hospitals Board be ratified.

Concurrent Appointment

Name: JOHN O. RIEDL
Title: Coordinating Dean for Regional Campuses
Office: Academic Affairs
Effective Period: July 1, 1988 - June 30, 1990
Salary: \$83,560.00
Present Position: Dean/Director, Mansfield Campus (no change)

Appointments

Name: ROBERT J. CODY
Title: Professor (James Hay and Ruth Jansson Wilson Professorship in Cardiology)
Department/Division: Internal Medicine/Cardiology
Effective: July 1, 1988
Salary: \$80,280.00
Present Position: Associate Professor, The New York Hospital - Cornell University Medical Center, New York, NY

Name: DUANE D. MILLER
Title: Professor (Charles H. Kimberly Professorship in Pharmacy)
College: Pharmacy
Effective: July 1, 1988
Salary: \$83,160.00
Present Position: Chairperson, Division of Medicinal Chemistry and Pharmacognosy and Professor

September 1 and 2, 1988 meeting, Board of Trustees

PERSONNEL ACTIONS (contd)

Appointments (contd)

Name: DEV S. PATHAK
Title: Professor (Merrell Dow Professorship in Pharmaceutical Administration)
College: Pharmacy
Effective: September 1, 1988
Salary: \$89,400.00
Present Position: Chairperson, Division of Pharmaceutical Administration and Professor

Appointment of Chairpersons of Academic Faculty, Departments, and Divisions and Directors of Center and School

July 1, 1988 through December 31, 1988

Melton Center for Jewish Studies Jeremy Cohen*

July 1, 1988 through June 30, 1989

Botany Tod F. Stuessy*
Horticulture Steven M. Still*
School of Natural Resources John F. Disinger*

July 1, 1988 through June 30, 1991

Division of Pharmaceutical Administration Dev S. Pathak

July 1, 1988 through June 30, 1992

Statistics Prem K. Goel

October 1, 1988 through September 30, 1989

Romance Languages and Literatures Josaphat Kubayanda*

October 1, 1988 through June 30, 1992

Materials Science and Engineering George R. St. Pierre

October 1, 1988 through September 30, 1992

Academic Faculty of Accounting and Management Information Systems William F. Bentz
Division of Speech and Hearing Science Lida G. Wall

Reappointment of Chairpersons of Departments

July 1, 1988 through June 30, 1989

Veterinary Preventive Medicine Erwin M. Kohler*

*Acting Chair/Director

September 1 and 2, 1988 meeting, Board of Trustees

PERSONNEL ACTIONS (contd)

Reappointment of Chairpersons of Departments (contd)

July 1, 1988 through June 30, 1992

Engineering Graphics

John T. Demel

Leaves of Absence Without Salary

LOIS ANN ROSOW, Assistant Professor, School of Music, effective Autumn Quarter 1988, Winter Quarter and Spring Quarter 1989, to complete a portion of the research for her edition of Lully's Armide.

PATRICIA C. AKINYEYE, Instructor, University Libraries, effective August 29, 1988, through September 11, 1988, for medical reasons.

PETER M. LEPOER, Instructor, University Libraries, effective July 1, 1988, through August 28, 1988, to attend the 1988 Vajradhatu Seminary (Buddhist study and practice program.)

Leave of Absence Without Salary--Continuation

RICHARD W. BURROWS, Associate Professor, Department of Dance, effective Autumn Quarter 1988, Winter Quarter and Spring Quarter 1989, to "build on the activities" that developed through his Spring Quarter 1988 leave to fulfill personal and professional development plans.

Professional Improvement Leaves

LAWRENCE HERMAN, Professor, College of Law, effective Spring Semester 1989.

TIMOTHY S. JOST, Professor, College of Law, effective Spring Semester 1989.

THOMAS W. MILBURN, Professor, Mershon Center, effective Winter Quarter, Spring Quarter, and Autumn Quarter 1989.

ABRAMO C. OTTOLENGHI, Professor, Department of Medical Microbiology and Immunology, effective January 3, 1989, through June 9, 1989.

L. MARK BERLINER, Associate Professor, Department of Statistics, effective Winter Quarter and Spring Quarter 1989.

RALPH R. HUNT, Associate Professor, Department of English (Mansfield Campus), effective Winter Quarter and Spring Quarter 1989.

WANSOO T. RHEE, Associate Professor, Academic Faculty of Management Sciences, effective Winter Quarter and Spring Quarter 1989.

Promotions and Tenure

College of Humanities

MICHAEL L. GEIS, Department of Linguistics, promotion to Professor, effective October 1, 1988.

September 1 and 2, 1988 meeting, Board of Trustees

PERSONNEL ACTIONS (contd)

Promotions and Tenure (contd)

College of Humanities (contd)

KAREN SUE JEWELL, Department of Black Studies, tenure, change date from October 1, 1988, to October 1, 1989.

Emeritus Titles

HAROLD D. BAUMAN, College of Agriculture - Administration, with the title Assistant Dean Emeritus, effective September 1, 1988.

TIMOTHY R. DONOGHUE, Department of Physics, with the title Professor Emeritus, effective August 1, 1988.

FRANCILLE M. FIREBAUGH, Department of Family Resource Management, with the title Professor Emeritus, effective August 1, 1988.

JOHN P. HIRTH, Department of Materials Science and Engineering, with the title Professor Emeritus, effective September 1, 1988.

DON M. HOSIER, Department of Pediatrics, with the title Professor Emeritus, effective July 1, 1988.

JOHN B. HOUGH, Department of Educational Policy and Leadership, with the title Professor Emeritus, effective September 1, 1988.

FERN E. HUNT, Department of Family Resource Management, with the title Professor Emeritus, effective September 1, 1988.

JAMES E. KERBER, Department of Educational Theory and Practice, with the title Professor Emeritus, effective September 1, 1988.

DEAN C. MERCHANT, Department of Geodetic Science and Surveying, with the title Professor Emeritus, effective September 1, 1988.

ROBERT E. NOTARI, College of Pharmacy, with the title Professor Emeritus, effective October 1, 1988.

ROBERT J. STULL, Department of Art, with the title Professor Emeritus, effective July 1, 1988.

VIRGINIA M. VIVIAN, Department of Human Nutrition and Food Management, with the title Professor Emeritus, effective July 1, 1988.

MILES K. MCELRATH, Department of East Asian Languages and Literatures, change from Professor Emeritus to Associate Professor Emeritus, effective July 1, 1987.

RICHARD L. TAYLOR, Department of Aviation, with the title Associate Professor Emeritus, effective July 1, 1988.

JOHN W. FERENGE, Cooperative Extension Service, with the title Assistant Professor Emeritus, change effective date from July 1, 1988, to January 1, 1989.

September 1 and 2, 1988 meeting, Board of Trustees

PERSONNEL ACTIONS (contd)

Upon motion of Mr. Teaford, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

RESOLUTIONS IN MEMORIAM

Resolution No. 89-23

Synopsis: Resolutions honoring the service of five of the University's faculty members who have recently died are being proposed.

RESOLVED, That the Board adopt the following Resolutions in Memoriam and that the President be requested to convey a copy to the families of the deceased.

Kenneth M. Abbott

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on July 21, 1988, of Kenneth M. Abbott, Professor Emeritus in the Department of Classics.

Kenneth M. Abbott was born May 3, 1906, in Lincoln, Nebraska. He received a bachelor's degree from Harvard College in 1928; a master's degree from the University of Nebraska in 1931; and a doctorate from the University of Illinois in 1934. After beginning his career as an Instructor at The Ohio State University in 1934, he became an Assistant Professor in 1938, an Associate Professor in 1944, and a full Professor in 1946. Upon his retirement in 1976, he was given the title Professor Emeritus.

Professor Abbott specialized in textual criticism, Cicero, and Latin lexicography. He published, in collaboration with Professors W. A. Oldfather and H. V. Canter, the Index Apuleianus (1934), Index Verborum Ciceronis Epistularum (1938), Index Verborum in Ciceronis Rhetorica necnon Incerti Auctoris Libros ad Herennium (1964). His major articles included studies in the Latin accent and later Latin verse. His scholarship gained him an international reputation in the field of Latin lexicography.

Professor Abbott served as Director of Graduate Studies and as the principal adviser to many candidates for master and doctorate degrees in the Department of Classics. He initiated courses in classical mythology in the Classics Department and in comparative literature in the College of Humanities.

Many honors came to Kenneth M. Abbott. The Ohio Classical Conference, which he served as president, granted him a Latin ovatio (award of merit) in 1975. In that year, Ohio State's Center for Medieval and Renaissance Studies held its annual conference in his honor on the theme -- "The Classical Tradition in the Middle Ages." He held visiting professorships at the University of Illinois, the State University of Iowa, and the University of Waterloo, Canada. He held memberships in learned societies in the field of linguistics and classical philology. He was a member of

September 1 and 2, 1988 meeting, Board of Trustees

RESOLUTIONS IN MEMORIAM (contd)

Kenneth M. Abbott (contd)

Phi Beta Kappa, was a Howald Fellow, a Fulbright Fellow (1959-60 in Rome) and a Fellow of the American Council of Learned Societies (1962 in London). Kenneth Morgan Abbott will be remembered as an outstanding teacher and scholar who was fully dedicated to excellence in both.

On behalf of the University, the Board of Trustees expresses its deep sympathy. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family of Kenneth M. Abbott as an expression of the Board's heartfelt sympathy.

Jack Hine

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on July 6, 1988, of Jack Hine, Professor Emeritus in the Department of Chemistry.

Dr. Hine was born on July 2, 1923, in Coronado, California. He received his B.S. degree in Chemistry from the University of Arkansas in 1943 and his Ph.D. degree in organic chemistry from the University of Illinois-Urbana in 1947. He then studied two years as a postdoctoral fellow at the Massachusetts Institute of Technology (1947-48) and Harvard University (1948-49).

Dr. Hine then started his academic career at Georgia Institute of Technology as Assistant Professor; he was promoted rapidly through the ranks to Professor in 1954 and Regent's Professor in 1958. He joined The Ohio State University as Professor of Chemistry in 1965.

Professor Hine was named an Alfred P. Sloan Research Fellow (1956-60), and was awarded the Hertz Medal of the American Chemical Society (1963). He received the LL.D. (Honorary) degree from Lewis College in 1964. He was a member of several professional organizations and honorary societies, including the American Chemical Society (member of executive committee, division of organic chemistry 1963-65), Chemical Society of London, American Physical Society, Socie'te' Chemique de France, A.A.A.S., Faraday Society, Phi Beta Kappa, Sigma Xi, Phi Kappa Phi, Alpha Chi Sigma, Phi Lambda Upsilon, Omicon Delta Kappa, and Pi Mu Epsilon.

Professor Hine was a true educator in every sense of the word. He was widely recognized on Campus by both undergraduate and graduate students and faculty colleagues as one who could best convey crystal clear and logical thought patterns. His three textbooks, the first published in 1956, in three different areas of physical organic chemistry all became the textbook par excellence on the respective topic. Two features that characterized Dr. Hine's teaching and research were thoroughness and a critical care for detail. Upon his retirement in 1986, Dr. Hine was named Professor Emeritus. He continued active research projects with postdoctoral research associates until his death; via National Science Foundation and National Institutes of Health grant funding.

On behalf of the University community, the Board of Trustees expresses to the family of Professor Hine its deepest sympathy. It was directed that

September 1 and 2, 1988 meeting, Board of Trustees

RESOLUTIONS IN MEMORIAM (contd)

Jack Hine (contd)

this resolution be inscribed in the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Jack E. Hufford

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on May 2, 1988, of Jack E. Hufford, Professor Emeritus in the Cooperative Extension Service.

Mr. Hufford was born January 24, 1909, in Greenville, Ohio. He was awarded a Bachelor of Science degree in Agriculture in 1932 and a Master's degree in Extension in 1960, both from The Ohio State University.

Mr. Hufford taught vocational agriculture for nine years before beginning his Extension experience in Logan County as a County Agricultural Agent in 1945. He remained in this position until his retirement in 1971. Mr. Hufford was highly respected by his associates throughout the State and country.

On behalf of the University community, the Board of Trustees expresses to the family its deepest sympathy. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family of Mr. Hufford as an expression of the Board's heartfelt sympathy.

Michael J. Jucius

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on September 21, 1986, of Michael J. Jucius, Professor Emeritus in the College of Business - Administration.

Dr. Jucius was born September 29, 1907. He received a Ph.B. degree in 1931 (cum laude); an A.M. degree in 1932; and a Ph.D. degree in 1942, all from the University of Chicago. Dr. Jucius was an Instructor at the University of Kansas from 1934-36. He joined The Ohio State University faculty as an Instructor in 1936 and upon his retirement in 1966, was named Professor Emeritus. He then began a second career at the University of Arizona.

As a faculty member in the then Department of Business Organization, College of Commerce and Administration, Dr. Jucius contributed greatly to the strength of the management area of the Department. His book on personnel management was the leading seller for several years. He was also co-author of an introduction to business text and a 1960 book on management principles.

Professor Jucius was one of the most popular continuing education lectures in the United States and taught in management schools in Italy. His teaching forte was encouraging students to think for themselves.

Dr. Jucius served as a management consultant to a number of Ohio

September 1 and 2, 1988 meeting, Board of Trustees

RESOLUTIONS IN MEMORIAM (contd)

Michael J. Jucius (contd)

industries, was an arbitrator of labor-management disputes, and was a part-time consultant for the War Manpower Commission. His research dealt with wage incentives, plant location and cost accounting for industrial plants.

On behalf of the University community, the Board of Trustees expresses to the family of Michael J. Jucius its deepest sympathy. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Emmanuel P. Varandyan

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on June 25, 1988, of Emmanuel P. Varandyan, Associate Professor Emeritus in the Department of English.

Professor Varandyan was born November 25, 1902. He received his B.A. from the University of Michigan in 1932; his M.A. from the same institution in 1934; and his Ph.D. from the State University of Iowa in 1948. Dr. Varandyan began his affiliation with The Ohio State University as an Instructor in the Department of English in 1948. He was promoted to Assistant Professor in 1949 and to Associate Professor in 1964. Upon his retirement in 1973, he was named Associate Professor Emeritus.

Before coming to Ohio State, Professor Varandyan was an Instructor of French at the University of Michigan and a Researcher in Turkish and Persian at the Clemens Library of the University of Michigan. During World War II, he was a cultural adviser and liaison officer for the American forces in the Middle East. Professor Varandyan made many contributions to the field of Armenian and other Middle Eastern studies in language and literature. His first novel, The Well of Ararat, a cultural anthropological study, received first prize in the Avery Hopwood literary contest. He was the author of a second novel, The Moon Sails, as well as many poems, short stories, articles, and translations. In addition, he served as editor of the journal, Ararat, and was a member of the Board of Directors of Middle East Studies at Harvard University.

Professor Varandyan was held in the highest esteem by his students and colleagues. A creative writer as well as a literary scholar, he conveyed his passion for Middle Eastern studies to all who knew him. He offered a course in Middle Eastern literature on a regular basis. He was known among English Department students as an especially effective teacher of writing. Since his interests transcended national boundaries he brought an important international component to the Department of English.

We have great appreciation and admiration for this writer-teacher-scholar who was a gentle person and a respected educator.

On behalf of the University community, the Board of Trustees expresses to the family its deep sympathy. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

September 1 and 2, 1988 meeting, Board of Trustees

RESOLUTIONS IN MEMORIAM (contd)

Upon motion of Mr. Kessler, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS

Resolution No. 89-24

Synopsis: The reports on contracts, grants, and gifts and the summary for June and July 1988 are presented for Board acceptance.

WHEREAS monies are solicited and received on behalf of the University from governmental, industrial, other agencies, alumni, and various individuals in support of research, instructional activities, and service; and

WHEREAS such gifts and grants are received through The Ohio State University Research Foundation, the Engineering Experiment Station of The Ohio State University, and The Ohio State University Development Fund:

NOW THEREFORE

BE IT RESOLVED, That the research agreement between The Ohio State University and The Ohio State University Research Foundation for the contracts and grants reported herein, and the acceptance of the reports from the Engineering Experiment Station and The Ohio State University Development Fund during the month of June and July 1988 be approved.

Upon motion of Ms. Casto, seconded by Mr. Berry, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION

Report - June 1988

Federal Research Contracts/Grants

\$2,000,000.00 - Department of Education, Washington, D.C., Grant Application for The National Center for Research in Vocational Education, The National Center for Research in Vocational Education (R. D. Ryan), 10 April 1988 through 31 December 1988. (Project 766764 - New)

\$593,747.00 - National Aeronautics and Space Administration, Langley Research Center, Hampton, Virginia, Radar Cross Section Studies, Department of Electrical Engineering, ElectroScience Laboratory (L. Peters, Jr., W. D. Burnside and A. K. Dominek), 1 May 1988 through 31 January 1989. (Project 761608 - Continuation)

\$582,500.00 - National Aeronautics and Space Administration, Washington, D.C., A Center for Commercial Development of Space: Real-Time Satellite Mapping, Center for Mapping (J. D. Bossler), 1 March 1988 through 31 August 1988. (Project 765707 - Continuation)

\$308,915.00 - Department of Labor, Bureau of Labor Statistics, Washington, D.C., National Longitudinal Surveys of Labor Market Experience, Round X, Center for Human Resource Research (R. J. Olsen), 1 October 1987 through 30 September 1989. (Project 766448 - Continuation)

\$285,622.00 - Department of Health and Human Services, Public Health Service, Alcohol, Drug Abuse and Mental Health Administration, Rockville, Maryland, The Development, Implementation, and Evaluation of an Integrated Model Program and Curriculum in Alcohol and Drug Abuse for Nursing Education, Life Span Process (E. M. Burns), 1 September 1988 through 31 October 1990. (Project 766864 - New)

\$224,604.00 - National Aeronautics and Space Administration, Lewis Research Center, Cleveland, Ohio, Electromagnetic Properties of Ice Coated Surfaces, Department of Electrical Engineering, ElectroScience Laboratory (L. Peters, Jr. and W. D. Burnside), 15 June 1988 through 14 June 1989. (Project 766822 - New)

\$199,800.00 - Department of Education, Washington, D.C., A Microcomputer-Based Approach to Improving the Basic Math Skills of Disadvantaged and Mainstreamed Handicapped Students, The National Center for Research in Vocational Education (R. D. Ryan), 1 July 1988 through 30 June 1990. (Project 766787 - New)

\$187,050.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Cytotoxic Cocarcinogenic and Antileukemic Agents, Department of Chemistry (L. A. Paquette), 1 June 1988 through 31 May 1989. (Project 763284 - Continuation)

\$176,920.00 - Department of Education, Washington, D.C., The Development of a Prototype Training Model for U.S. Immersion Teachers, Department of Educational Studies: Humanities, Science, Technological and Vocational

September 1 and 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

(E. B. Bernhardt), 1 September 1988 through 31 August 1990. (Project 766853 - New)

\$173,787.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Synthesis of Polyquinane and Related Natural Products, Department of Chemistry (L. A. Paquette), 1 July 1988 through 30 June 1989. (Project 762298 - Continuation)

\$164,277.00 - National Science Foundation, Washington, D.C., Motion Coordination for Mobile Robots in Unstructured Environments, Department of Electrical Engineering (C. A. Klein and S. Koozekanani) and Department of Mechanical Engineering (N. Berme), 1 June 1988 through 31 May 1989. (Project 765122 - Continuation)

\$156,000.00 - Department of Education, Office of Postsecondary Education, Washington, D.C., Patricia Roberts Harris Program (Graduate and Professional Study Fellowships), Graduate School Administration (J. D. Dickerscheid), 1 September 1988 through 31 August 1989. (Project 766855 - Continuation)

\$147,765.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Molecular and Functional Analysis of Human Class 1 Heparin-Binding Growth Factor, Department of Internal Medicine (I. M. Chiu), 1 July 1988 through 30 June 1989. (Project 766083 - Continuation)

\$138,000.00 - Department of the Interior, Bureau of Mines, Washington, D.C., Mining and Mineral Resources Research Institute -- Annual Allotment, Department of Metallurgical Engineering (G. R. St. Pierre), 1 July 1988 through 30 June 1989. (Project 766866 - Continuation)

\$137,419.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Intramolecular Electron Migration in Proteins and Polypeptides, Department of Chemistry (M. H. Klapper), 1 July 1988 through 30 June 1989. (Project 765529 - Continuation)

\$135,092.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Functional Analysis of DNA Topoisomerase I in Herpes Simplex Virus, Department of Molecular Genetics (M. T. Muller) and Department of Microbiology and Immunology (D. S. Parris), 1 July 1988 through 30 June 1989. (Project 765482 - Continuation)

\$134,451.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, The Immune Complex-Mediated Glomerulopathies, Department of Internal Medicine (L. A. Hebert), 1 July 1988 through 30 June 1989. (Project 761786 - Continuation)

September 1 and 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$133,100.00 - National Science Foundation, Washington, D.C., Syntheses and Studies of Selected Metal Carbonyl and Boron-Metal Carbonyl Clusters, Department of Chemistry (S. G. Shore), 15 March 1988 through 31 August 1989. (Project 766824 - New)

\$130,610.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Genetics of Myogenesis: Structure and Function, Department of Molecular Genetics (S. Falkenthal), 1 June 1988 through 31 May 1989. (Project 763993 - Continuation)

\$130,000.00 - National Science Foundation, Washington, D.C., Structure, Biosynthesis, and Degradation of the Biopolymers Cutin and Suberia, Biotechnology Programs (P. E. Kolattukudy), 1 June 1988 through 31 May 1989. (Project 766545 - Continuation)

\$126,000.00 - National Science Foundation, Washington, D.C., Nuclear Physics and Low and Intermediate Energies, Including the Hadron Charge Exchange and Radiative Capture Programs, Department of Physics (E. R. Sugarbaker and H. J. Hausman), 15 June 1988 through 30 November 1989. (Project 766752 - New)

\$120,000.00 - Department of Agriculture, Science and Education, Washington, D.C., Evolution of the Overwintering Biology of the Corn Leafhopper and Its Congeners, Department of Entomology - OARDC (L. R. Nault and R. A. J. Taylor) and Department of Plant Pathology - OARDC (L. V. Madden), 1 July 1988 through 30 June 1990. (Project 764270 - Continuation)

\$116,917.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Cardiac Dysfunction and Sudden Death Modified by Exercise, Department of Physiology (G. E. Billman), 1 July 1988 through 30 June 1989. (Project 765510 - Continuation)

\$111,704.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Developmental Plasticity of Descending Spinal Pathways, Department of Anatomy (G. F. Martin, Jr.), 1 July 1988 through 30 June 1989. (Project 766115 - Continuation)

\$111,001.00 - Department of Education, Office of Special Education and Rehabilitation Services, Washington, D.C., Facilitating the Transition from School to Work of Severely Learning Disabled Secondary Students, Department of Education Services and Research (B. Growick), 1 October 1988 through 30 September 1989. (Project 765731 - Continuation)

\$105,130.00 - Department of the Interior, Geological Survey, Reston, Virginia, FY 1988 Ohio Water Research Institute Program, Department of Civil Engineering and Engineering Experiment Station (R. C. Stiefel), Department of Chemical Engineering (L. S. Fan), Department of City and

September 1 and 2, 1988 meeting, Board of Trustees

Federal Research Contracts/Grants (contd)

Regional Planning (S. I. Gordon), and Department of Agronomy (S. J. Traina and T. J. Logan), 1 July 1988 through 30 June 1989. (Project 766766 - Continuation)

\$104,726.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Somatostatin in Spinal Sensory Circuits, Department of Anatomy (R. H. Ho), 1 July 1988 through 30 June 1989. (Project 766184 - Continuation)

\$100,709.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Effects of Father's Absence: Sociodemographic Analysis, Center for Human Resource Research (F. L. Mott), 1 July 1988 through 30 June 1989. (Project 766858 - New)

\$98,500.00 - Department of the Army, Army Corps of Engineers, Vicksburg, Mississippi, ARMS -- An Acoustics-Based Resuspension Measurement System for in Place Estimates of Entrainment and Erosion from Dredged Material Disposal Sites, Department of Civil Engineering (K. W. Bedford), 1 April 1988 through 30 September 1988. (Project 766710 - New)

\$98,433.00 - Department of Education, Washington, D.C., Young Scholars Program Summer Workshop in Mathematics and Biological Sciences for 7th Graders, Academic Affairs Administration (J. Bishop), 1 July 1988 through 30 June 1989. (Project 766814 - New)

\$96,076.00 - National Science Foundation, Washington, D.C., Fundamental Studies in Elastohydrodynamic Lubrication, Department of Mechanical Engineering (B. J. Hamrock), 1 July 1988 through 30 June 1989. (Project 765242 - Continuation)

\$85,306.00 - Department of Health and Human Services, Public Health Service, Alcohol, Drug Abuse and Mental Health Administration, Rockville, Maryland, Research Training Program in Psychoneuroimmunology, Department of Microbiology and Immunology (M. R. Glaser), 1 July 1988 through 30 June 1989. (Project 766200 - Continuation)

\$84,614.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, A "Dynamic" Tension-time Index Hypothesis, Department of Internal Medicine (T. L. Clanton), 1 July 1988 through 30 April 1989. (Project 766821 - New)

\$83,143.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Aberrant Papovavirus Replication After Genotoxic Damage, Department of Radiology (R. M. Snapka), 1 June 1988 through 31 May 1989. (Project 766206 - Continuation)

\$81,000.00 - Department of Energy, Argonne, Illinois, Structure and Regulation of Methanogen Genes, Department of Microbiology (J. N. Reeve), 1 July 1988 through 30 June 1989. (Project 766060 - Continuation)

September 1 and 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$80,739.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Molecular Organization of a Membrane Protein Complex, Department of Botany and Department of Biochemistry (R. T. Sayre), 1 July 1988 through 30 June 1989. (Project 766849 - New)

\$78,346.00 - Department of Education, Office of Special Education and Rehabilitation Services, Washington, D.C., Inservice Training of Teachers on Communications Skills Training and Functionally Referenced Curriculum to Benefit Severely Handicapped Students Including Deaf-Blind, College of Education - Administration (T. M. Stephens), 1 September 1988 through 31 August 1989. (Project 765650 - Continuation)

\$77,188.00 - Department of Education, Office of Special Education and Rehabilitation Services, Washington, D.C., Training School Speech/Language Pathologists in an Educationally-Based Model, College of Education - Administration (T. M. Stephens) and Department of Education Services and Research (W. Secord), 1 September 1988 through 31 August 1989. (Project 766389 - Continuation)

\$76,887.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Cell-Mediated Immunity Regulation and Reinfection: Role of Conrallymphokine, Oral Biology (J. F. Sheridan), 1 July 1988 through 30 June 1989. (Project 766852 - New)

\$76,330.00 - National Science Foundation, Washington, D.C., Limit and Averaging Theorems in Ergodic Theory, Department of Mathematics (L. Sucheston, J. M. Rosenblatt and V. Bergelson), 1 June 1988 through 30 November 1989. (Project 766791 - New)

\$76,299.00 - Department of Health and Human Services, Public Health Service, Alcohol, Drug Abuse and Mental Health Administration, Rockville, Maryland, Tourette Syndrome: Behavioral, Biochemical, and EEG Deficit, Department of Psychiatry (R. A. Bornstein), 1 July 1988 through 30 June 1989. (Project 766121 - Continuation)

\$75,993.00 - National Science Foundation, Washington, D.C., Effective Material Flow Management in the Small-Lot Assembly of Electronic Products, Department of Industrial and Systems Engineering (W. E. Wilhelm), 1 July 1988 through 31 December 1989. (Project 766792 - New)

\$75,000.00 - Department of Energy, Argonne, Illinois, Strongly Interacting Fermion Systems, Department of Physics (J. W. Wilkins), 1 June 1988 through 14 November 1988. (Project 766783 - New)

\$75,000.00 - National Science Foundation, Washington, D.C., Productive Versus Non-Productive Binding Kinases, Department of Chemistry (M. D. Tsai), 1 September 1988 through 28 February 1990. (Project 765630 - Continuation)

September 1 and 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$72,883.00 - Department of Health and Human Services, Public Health Service, Health Resources and Services Administration, Rockville, Maryland, Catalog of Federal Domestic Assistance No. 13.984, Department of Family Medicine (T. Williams and J. S. Monk), 1 September 1988 through 31 August 1989. (Project 765671 - Continuation)

\$71,900.00 - National Science Foundation, Washington, D.C., Presidential Young Investigator Award, Department of Computer and Information Science (K. J. Supowit), 1 June 1988 through 28 February 1989. (Project 766850 - New)

\$70,000.00 - National Security Council, Central Intelligence Agency, Washington, D.C., Generalized Moment-Method Antenna Model Development, Department of Electrical Engineering, ElectroScience Laboratory (E. H. Newman), 15 May 1988 through 15 May 1989. (Project 766796 - New)

\$69,838.00 - National Aeronautics and Space Administration, Langley Research Center, Hampton, Virginia, Analysis of Airborne Antenna Patterns, Department of Electrical Engineering, ElectroScience Laboratory (E. H. Newman and W. D. Burnside), 1 June 1988 through 31 May 1989. (Project 761012 - Continuation)

\$67,074.00 - Department of Education, Office of Special Education and Rehabilitation Services, Washington, D.C., Special Projects -- Project LRE/PE, School of Health, Physical Education and Recreation (P. Jansma), 1 July 1988 through 30 June 1989. (Project 765970 - Continuation)

\$65,974.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, The Application of Low Temperature Chemistry and Kinetics to Photoaffinity Labeling, Department of Chemistry (M. S. Platz), 1 July 1988 through 30 June 1989. (Project 765496 - Continuation)

\$65,000.00 - Department of Energy, Argonne, Illinois, The Physics of Cellular Automata and Coherence and Chaos in Classical, Many-Body Dynamical Systems, Department of Physics (C. Jayaprakash and F. A. Hayot), 1 May 1988 through 30 April 1989. (Project 766728 - New)

\$65,000.00 - National Science Foundation, Washington, D.C., Inelastic Light Scattering Studies of Quantum-Layered Semiconductors and Metallic Microstructures, Department of Physics (R. Sooryakumar), 1 November 1988 through 31 October 1989. (Project 766205 - Continuation)

\$62,000.00 - National Science Foundation, Washington, D.C., DNA Synthesis in Rice Endosperm, Department of Botany (V. Raghavan), 15 September 1988 through 14 September 1989. (Project 766364 - Continuation)

\$60,000.00 - National Science Foundation, Washington, D.C., Software and Hardware Techniques in Knowledge-Base Machines, Department of Computer and Information Science (D. L. Lee), 1 July 1988 through 31 December 1990. (Project 766851 - New)

September 1 and 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$59,875.00 - National Science Foundation, Washington, D.C., ALPS: An Object Oriented Parallel Programming System, Department of Computer and Information Science (P. R. Vishnubhotla), 1 July 1988 through 31 December 1990. (Project 766847 - New)

\$57,098.00 - National Science Foundation, Washington, D.C., Purification of Multicomponent Liquid Mixtures by the Dual Recycle Thermal Swing Adsorption Process, Department of Chemical Engineering (K. S. Knaebel), 1 August 1988 through 30 November 1989. (Project 765859 - Continuation)

\$56,652.00 - Department of Energy, Washington, D.C., Reduction of Pumping Energy Losses in District Heating and Cooling Systems, Department of Chemical Engineering (J. L. Zakin) and Department of Mechanical Engineering (R. N. Christensen), 1 June 1988 through 30 June 1989. (Project 765571 - Continuation)

\$55,000.00 - National Science Foundation, Washington, D.C., Structural Requirements for Protein Membrane Assembly, Department of Chemistry (R. E. Dalbey and D. W. Meek), 1 June 1988 through 30 November 1989. (Project 766800 - New)

\$54,984.00 - Department of the Air Force, Air Force Systems Command, Bolling Air Force Base, D.C., Flow Cytometric Analysis of Hepatocytes from Normal, PFDA, and PH/DEN/PB-Treated Rats, Department of Veterinary Pathobiology (M. J. Tarr and R. G. Olsen), 1 May 1988 through 30 April 1989. (Project 766801 - New)

\$54,942.00 - National Aeronautics and Space Administration, Washington, D.C., Interaction of Calcium, Calmodulin, and Auxin in Root Gravitropism, Department of Botany (M. L. Evans), 1 March 1988 through 29 February 1989. (Project 763005 - Continuation)

\$54,693.00 - Department of Health and Human Services, Public Health Service, Health Resources and Services Administration, Rockville, Maryland, Graduate Program in Hospital and Health Services Administration, Division of Hospital and Health Services Administration (S. F. Loebs), 1 October 1988 through 30 September 1989. (Project 761329 - Continuation)

\$52,574.00 - National Aeronautics and Space Administration, Goddard Space Flight Center, Greenbelt, Maryland, Robust Estimation of Regional Deformations and Relative Plate Motions from Robust Estimation, Department of Geodetic Science and Surveying (I. I. Mueller), 1 July 1988 through 30 June 1989. (Project 761054 - Continuation)

\$52,542.00 - Department of the Air Force, Air Force Systems Command, Bolling Air Force Base, D.C., Stability of Boundary Layers at High Supersonic and Hypersonic Speeds, Department of Mechanical Engineering (T. Herbert), 1 May 1988 through 30 September 1988. (Project 766854 - New)

September 1 and 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$51,853.00 - Department of Energy, Argonne, Illinois, Investigations of Ultrasonic Surface Wave Interaction with Porous Saturated Rocks, Department of Welding Engineering (L. Adler), 1 July 1988 through 30 June 1989. (Project 766168 - Continuation)

\$50,867.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Molecular Analysis of Exotoxin A from Pseudomonas aeruginosa, Department of Microbiology (D. R. Galloway), 1 June 1988 through 31 May 1989. (Project 766775 - New)

\$50,584.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Calcium and Calmodulin in Smooth Muscle Contraction, Department of Physiological Chemistry (J. D. Johnson), 1 July 1988 through 30 June 1989. (Project 764653 - Continuation)

\$50,000.00 - Department of the Air Force, Air Force Systems Command, Bolling Air Force Base, D.C., Modeling of Free Surface Viscoelastic Jets and Instability Mechanisms, Department of Mathematics (M. G. Forest) and Department of Engineering Mechanics (S. E. Bechtel), 1 April 1988 through 31 March 1989. (Project 766707 - New)

\$49,866.00 - National Science Foundation, Washington, D.C., Satellite Studies of West Antarctic Surface Winds, Byrd Polar Research Center (D. H. Bromwich), 1 July 1988 through 31 December 1989. (Project 766840 - New)

\$49,674.00 - Department of Energy, Argonne, Illinois, Molecular Orbital Studies of the Bonding in Heavy Element Organometallics, Department of Chemistry (B. E. Bursten), 1 July 1988 through 30 June 1989. (Project 765484 - Continuation)

\$48,350.00 - National Science Foundation, Washington, D.C., Single-Atom Peri-Bridged Arenes and Hetarenes: Carbenic and Silicaniionic Processes, Department of Chemistry (H. Shechter), 1 July 1988 through 31 October 1989. (Project 766810 - New)

\$44,828.00 - Department of the Army, Army Corps of Engineers, Huntsville, Alabama, Remote Sensing -- Fundamentals Training Course, Department of Civil Engineering (J. G. Lyon), 1 June 1988 through 31 May 1989. (Project 766770 - New)

\$43,678.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Small Instrumentation Program, Research and Graduate Studies Administration (T. L. Sweeney), 1 June 1988 through 31 May 1989. (Project 766809 - Continuation)

\$43,000.00 - National Science Foundation, Washington, D.C., Research in Algebraic and Differential Topology, Department of Mathematics (R. M.

September 1 and 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

Charney and M. W. Davis), 1 July 1988 through 31 December 1989. (Project 765576 - Continuation)

\$39,987.00 - National Aeronautics and Space Administration, Ames Research Center, Moffett Field, California, Radar Cross Section Computation of Arbitrarily Shaped Cavities, Department of Electrical Engineering, ElectroScience Laboratory (R. C. Chou), 21 June 1988 through 20 June 1990. (Project 766823 - New)

\$38,500.00 - National Science Foundation, Washington, D.C., Non-Commutative Harmonic Analysis, Department of Mathematics (H. Moscovici and R. J. Stanton), 15 June 1988 through 30 November 1989. (Project 766790 - New)

\$37,768.00 - National Academy of Science, Washington, D.C., Teaching Abroad, Department of Economics (B. M. Fleisher), 1 February 1989 through 1 June 1989. (Project 766803 - New)

\$37,096.00 - Department of the Navy, Office of Naval Research, Arlington, Virginia, Mixing in Supersonic Shear Layers, Department of Mechanical Engineering (M. Samimy), 19 May 1988 through 31 January 1990. (Project 765931 - Continuation)

\$34,600.00 - National Science Foundation, Washington, D.C., Two Routes to Persuasion, Department of Psychology (R. E. Petty), 1 January 1988 through 30 June 1988. (Project 766756 - New)

\$33,789.00 - Department of Health and Human Services, Public Health Service, Health Resources and Services Administration, Rockville, Maryland, Health Careers Opportunity Program (HCOP), College of Medicine - Administration (M. Tzagournis, J. H. Williams and S. M. Kantor), 1 September 1988 through 31 August 1989. (Project 765421 - Continuation)

\$30,000.00 - National Aeronautics and Space Administration, Ames Research Center, Moffett Field, California, Enroute Flight Path Planning: Cooperative Performance of Flight Crews and Knowledge-Based Systems, Department of Industrial and Systems Engineering (P. J. Smith) and Department of Aviation (C. E. McCoy), 1 June 1988 through 31 January 1989. (Project 766649 - Continuation)

\$27,745.00 - National Science Foundation, Washington, D.C., Simulation and Field Measurement of Aspects of the Urban Canopy Layer Climate and Energy Budget, Department of Geography (A. J. Arnfield), 16 March 1988 through 31 May 1989. (Project 766530 - New)

\$26,033.00 - National Science Foundation, Washington, D.C., Study of Recent Ice-Volume Changes Along the Margin of the East Antarctic Ice Sheet, Byrd Polar Research Center and Department of Geology and Mineralogy (G. Faure), 15 June 1988 through 31 May 1989. (Project 766841 - New)

September 1 and 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$25,000.00 - Department of the Navy, Naval Material Command, Bethesda, Maryland, Vortex Motion Past a Cavity with Elastic Obstructions, Department of Mechanical Engineering (A. T. Conlisk), 7 April 1987 through 30 April 1988. (Project 765323 - Continuation)

\$24,840.00 - National Science Foundation, Washington, D.C., Supplemental Support Under the Research Experience for Undergraduate Program, Engineering Experiment Station (T. Altan), 1 May 1988 through 31 August 1988. (Project 765393 - Continuation)

\$22,700.00 - National Science Foundation, Washington, D.C., L-Functions with Applications to the Oscillator Representation, Department of Mathematics (S. Rallis), 1 June 1988 through 30 November 1989. (Project 766771 - New)

\$22,628.00 - National Science Foundation, Washington, D.C., Development and Applications of Periodic Soliton Theory for Nearly Integrable Partial Differential Equations, Department of Mathematics (M. G. Forest), 1 June 1988 through 30 November 1989. (Project 766786 - New)

\$21,450.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Psycho-sedation and Monitoring of Pediatric Dentistry, Pediatric Dentistry (S. Wilson), 1 July 1988 through 30 June 1989. (Project 766818 - New)

\$18,996.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Binding Properties of Rhodium (II) Carboxylate Complexes, Department of Chemistry (B. E. Bursten and K. I. Goldberg), 12 May 1988 through 11 May 1989. (Project 766735 - New)

\$17,726.00 - Department of Health and Human Services, Public Health Service, Health Resources and Services Administration, Rockville, Maryland, Nurse Anesthesia Traineeship, School of Allied Medical Professions (S. L. Wilson), 1 July 1988 through 30 June 1989. (Project 764173 - Continuation)

\$16,503.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, General Clinical Research Center, College of Medicine - Administration (M. Tzagournis) and Department of Internal Medicine (W. Malarkey), 1 July 1988 through 30 November 1988. (Project 761196 - Continuation)

\$15,000.00 - National Aeronautics and Space Administration, Washington, D.C., SETI Research, Department of Electrical Engineering (J. D. Kraus and R. S. Dixon), 1 February 1988 through 31 January 1989. (Project 764694 - Continuation)

\$12,391.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Small Instrumentation Program, College of Pharmacy (D. S. Pathak), 1 June 1988 through 31 May 1989. (Project 766773 - New)

September 1 and 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$11,990.00 - National Science Foundation, Washington, D.C., Women's Political Mobilization and Social-Psychological Adaptations to Farm Crisis, Department of Agricultural Economics and Rural Sociology - OARDC and Department of Agricultural Economics and Rural Sociology (L. L. Reif) and Department of Sociology (M. K. Meyer), 1 October 1988 through 31 March 1990. (Project 766811 - New)

\$9,526.00 - Department of Health and Human Services, Public Health Service, Health Resources and Services Administration, Rockville, Maryland, Traineeships for Students in Graduate Health Administration, Division of Hospital and Health Services Administration (S. F. Loebs), 1 July 1988 through 30 June 1989. (Project 766805 - Continuation)

\$9,000.00 - Department of Agriculture, Science and Education, Washington, D.C., Workshop to Establish a National Network of Living Nematode Culture Collections, Department of Plant Pathology - OARDC and Department of Plant Pathology (R. M. Riedel), 21 March 1988 through 20 March 1989. (Project 766859 - New)

\$8,654.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Small Instrumentation Program, Department of Veterinary Pathobiology (C. L. Brooks), 1 July 1988 through 30 June 1989. (Project 766865 - New)

\$6,000.00 - National Science Foundation, Washington, D.C., Almost Everywhere Convergence in Probability and Ergodic Theory, Department of Mathematics (L. Sucheston), 1 May 1988 through 30 April 1989. (Project 766777 - New)

\$5,000.00 - Department of Agriculture, Science and Education, Washington, D.C., International Conference on Sustainable Agricultural Systems, Department of Entomology - OARDC and Department of Entomology (C. A. Edwards), 16 April 1988 through 15 April 1989. (Project 766795 - New)

\$4,000.00 - National Science Foundation, Washington, D.C., The Organization of Informational Structure in Articulator Movement and Acoustic Duration Patterns, Department of Linguistics (M. E. Beckman), 1 June 1988 through 30 November 1989. (Project 766069 - Continuation)

\$4,000.00 - National Science Foundation, Washington, D.C., Relativistic Optical Model at Intermediate Energies, Department of Physics (B. C. Clark), 1 July 1988 through 31 December 1989. (Project 765350 - Continuation)

\$3,000.00 - National Science Foundation, Washington, D.C., Productive Versus Non-Productive Binding Kinases, Department of Chemistry (M. D. Tsai), 1 July 1988 through 28 February 1990. (Project 765630 - Continuation)

\$2,000.00 - National Aeronautics and Space Administration, Goddard Space Flight Center, Greenbelt, Maryland, Improvement of the Earth's Gravity Field from Terrestrial and Satellite Data, Department of Geodetic Science

September 1 and 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

and Surveying (R. H. Rapp), 1 July 1988 through 31 July 1988. (Project 760056 - Continuation)

Equipment - Department of Energy, Idaho Falls, Idaho, Energy-Related Laboratory Equipment, Engineering Experiment Station (J. W. Talnagi), 1 May 1988 through 31 July 1988. (Project 766759 - New) (Approximate Dollar Value - \$5,000.00)

TOTAL - FEDERAL AWARDS \$10,571,351.00

State of Ohio Research Contracts/Grants

\$365,454.00 - State of Ohio, Department of Natural Resources, Columbus, Ohio, Ecology and Population Dynamics of Lake Erie Fishes, Department of Zoology (B. Vondracek), 1 July 1988 through 30 June 1989. (Project 766201 - Continuation)

\$208,250.00 - State of Ohio, Department of Natural Resources, Columbus, Ohio, Evaluation of Fish Management Techniques, Department of Zoology (B. Vondracek, R. A. Stein and D. A. Culver) and School of Natural Resources (D. L. Johnson), 1 July 1988 through 30 June 1989. (Project 766202 - Continuation)

\$145,000.00 - State of Ohio, Department of Aging, Columbus, Ohio, OSU Alzheimer's Disease Research Center, College of Medicine - Administration (G. L. Trzebiatowski), 1 March 1988 through 30 June 1988. (Project 766254 - Continuation)

\$139,969.00 - State of Ohio, Department of Education, Columbus, Ohio, Ohio Middle and Junior High School Counselor Career/Vocational Guidance Development Professional Renewal Workshop Plan -- Workshop #2, The National Center for Research in Vocational Education (R. D. Ryan), 23 May 1988 through 30 September 1988. (Project 766785 - New)

\$80,000.00 - State of Ohio, Department of Education, Columbus, Ohio, State Superintendent's Task Force for Preparing Special Education Personnel, College of Education - Administration (T. M. Stephens), 1 July 1988 through 30 June 1989. (Project 766857 - Continuation)

\$47,152.00 - State of Ohio, Department of Education, Columbus, Ohio, Ohio's Martin W. Essex School for the Gifted -- 1988, College of Education - Administration (T. M. Stephens) and Education Services and Research (R. H. Swassing), 1 April 1988 through 31 March 1989. (Project 766788 - Continuation)

\$32,713.00 - State of Ohio, Department of Commerce, Columbus, Ohio, Agency Disclosure Program, Academic Faculty of Finance (R. L. Racster), 1 May 1988 through 31 December 1988. (Project 766767 - New)

\$20,822.00 - State of Ohio, Department of Education, Columbus, Ohio, State Superintendent's Task Force for Preparing Special Education

September 1 and 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

State of Ohio Research Contracts/Grants (contd)

Personnel, College of Education - Administration (T. M. Stephens), 1 July 1987 through 30 June 1988. (Project 766265 - Continuation)

\$20,256.00 - State of Ohio, Department of Mental Health, Columbus, Ohio, The Relationship Between Congruence with and Degree of Preference for Post-Discharge Living Situation and Social Functioning and Community Tenure in Long-Term Mentally Ill Individuals, Department of Life Span Process (C. J. Bininger), 1 June 1988 through 30 June 1989. (Project 766848 - New)

\$20,000.00 - State of Ohio, Department of Health, Columbus, Ohio, Citizen Communication Needs and Perceptions of Risk Relating to the Union Town Toxic Waste Site, Department of Communication (B. Dervin), 1 April 1988 through 30 September 1988. (Project 766802 - New)

\$10,626.00 - State of Ohio, Department of Education, Columbus, Ohio, Upward Bound Summer Food Service Program, Office of Minority Affairs (L. G. Morrow), 20 June 1988 through 31 July 1988. (Project 766789 - New)

\$9,653.00 - State of Ohio, Department of Natural Resources, Columbus, Ohio, Evaluation of Ground-Water Quality Changes Caused by Brine Spreading for Dust and Ice Control, Department of Geology and Mineralogy (E. S. Bair), 1 July 1988 through 30 June 1989. (Project 766776 - New)

\$4,173.00 - State of Ohio, Department of Education, Columbus, Ohio, State Superintendent's Task Force, College of Education - Administration (T. M. Stephens), 1 July 1987 through 30 June 1988. (Project 766175 - Continuation)

TOTAL - STATE OF OHIO AWARDS \$ 1,104,068.00

Industrial Research Contracts/Grants

\$75,000.00 - TRW, San Diego, California, Multifunction Antenna Study, Department of Electrical Engineering, ElectroScience Laboratory (B. A. Munk), 1 November 1987 through 1 July 1988. (Project 765410 - Continuation)

\$41,000.00 - International Business Machines Corporation, Yorktown Heights, New York, Development of Phenomenological Relativistic Approach to Nuclear Physics, Department of Physics (B. C. Clark), 1 October 1988 through 30 September 1989. (Project 765137 - Continuation)

\$35,525.00 - Sandoz, Inc., East Hanover, New Jersey, Sandoz Open Label Study, Department of Internal Medicine (K. Osei), 1 May 1988 through 31 October 1989. (Project 765742 - Continuation)

\$32,500.00 - Norwich-Eaton Pharmaceuticals, Inc., Norwich, New York, A Double-Blind, Multicenter Study to Compare the Safety and Efficacy of Nitrofurantoin Controlled Release Capsules, 100 mg, Twice a Day for Seven Days to Macrochantin Capsules, 50 mg, Four Times a Day for Seven Days in

September 1 and 2, 1988 meeting, Board of Trustees

Industrial Research Contracts/Grants (contd)

the Treatment of Urinary Tract Infections, Department of Internal Medicine (C. M. Kunin), 21 April 1988 through 20 April 1989. (Project 766768 - New)

\$28,552.50 - Owens-Illinois, Columbus, Ohio, Job/Task Analysis and Video Job Training Development -- Nine Jobs, College of Education - Administration (J. J. Buffer), 1 January 1988 through 30 June 1989. (Project 765905 - Continuation)

\$24,000.00 - Procter and Gamble Company, Cincinnati, Ohio, The Neonatal, Gnotobiotic Pig as a Host for Model Campylobacter pylori Infection of the Upper GI Tract, Department of Veterinary Pathobiology (G. S. Krakowka), 10 June 1988 through 9 June 1989. (Project 766797 - New)

\$21,100.00 - CeramPhysics, Inc., Westerville, Ohio, Extrusion of Ceramic Superconductors, Department of Ceramic Engineering (E. R. Kreidler), 16 May 1988 through 15 May 1989. (Project 766798 - New)

\$10,000.00 - Ethicon, Inc., Somerville, New Jersey, Surgical Correction of Myopia and Astigmatism in Cats, Department of Ophthalmology (A. W. Fryczkowski), 8 June 1988 through 7 June 1989. (Project 766799 - New)

\$7,615.00 - Boeing Computer Services, Seattle, Washington, RAMCAD Software Development, Department of Computer and Information Science (B. Chandrasekaran), 1 April 1988 through 31 December 1988. (Project 766470 - Continuation)

\$6,727.00 - E. R. Squibb and Sons, Princeton, New Jersey, Placebo-Controlled Trial of Fosenopril Sodium Added to Chlorthalidone 25 mg Daily for the Treatment of Mild to Moderate Essential Hypertension, Department of Family Medicine (R. M. Guthrie) and Department of Pharmacology (N. Gerber), 1 September 1987 through 31 December 1988. (Project 765696 - Continuation)

\$4,862.00 - FMC Corporation, Philadelphia, Pennsylvania, Microcrystalline Cellulose Stabilized Emulsions, College of Pharmacy (S. G. Frank), 15 May 1988 through 20 September 1988. (Project 764077 - Continuation)

\$4,679.08 - Wyeth Laboratories, Philadelphia, Pennsylvania, Phase II Evaluation of the Hemodynamic Effects of Intravenous Recainam in Patients Undergoing Elective Cardiac Catheterization, Department of Internal Medicine (D. B. Van Fossen and C. A. Bush), 1 August 1987 through 31 December 1988. (Project 766289 - Continuation)

TOTAL - INDUSTRIAL AWARDS \$ 291,560.58

Other Non-Federal Research Contracts/Grants

\$337,464.00 - Midwest Universities Consortium for International Activities, Inc., Columbus, Ohio, Subcontract for the General Participant Training II Project in Indonesia, Office of International Affairs (D. G. McCloud), 1 April 1988 through 21 June 1989. (Project 766807 - New)

September 1 and 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Other Non-Federal Research Contracts/Grants (contd)

\$288,353.00 - Franklin County Mental Retardation and Developmental Disabilities Board, Columbus, Ohio, Early Childhood Classes, Nisonger Center (S. R. Schroeder and V. L. Reynolds), 1 October 1988 through 30 September 1989. (Project 766813 - Continuation)

\$200,000.00 - Ohio University, Athens, Ohio, Molecular Farming: Recombinant Gene Expression in Bovine Mammary Gland and Hen Oviduct, Department of Dairy Science - OARDC (F. L. Schanbacher and C. P. Hodgson), 1 July 1988 through 30 June 1989. (Project 766005 - Continuation)

\$165,504.00 - Children's Hospital Research Foundation, Columbus, Ohio, Evaluation of Flunarizine as a Treatment for Patients with Partial Seizures, Department of Neurology (M. E. Drake, Jr.), 7 December 1987 through 6 April 1990. (Project 766579 - New)

\$132,000.00 - Lilly Endowment, Inc., Indianapolis, Indiana, Development of a Teaching Fellows Program at The Ohio State University, Academic Affairs Administration (J. Leitzel and M. Brand), 1 August 1988 through 31 August 1991. (Project 766517 - New)

\$114,080.00 - National Dairy Promotion and Research Board, Logan, Utah, Optimization of Whey Protein Functionality Through Process Induced Changes in Composition and/or Structure, Department of Food Science and Nutrition - OARDC and Department of Food Science and Nutrition (M. E. Mangino), 1 July 1988 through 30 June 1991. (Project 766779 - New)

\$109,580.00 - Franklin County Mental Retardation and Developmental Disabilities Board, Columbus, Ohio, Exemplary Dental Services for the Handicapped, Nisonger Center (E. S. Sterling), 1 July 1988 through 30 June 1989. (Project 766812 - Continuation)

\$86,286.00 - Smokeless Tobacco Research Council, Inc., New York, New York, In Vivo and In Vitro Effects of Smokeless Tobacco on Oral Bacteria and Periodontal Disease, Oral Biology (K. Schroeder and S. Rosen), 1 July 1988 through 30 June 1989. (Project 766816 - New)

\$80,287.00 - Boston University, Boston, Massachusetts, Principles for Machine/Human Compatibility in Manufacturing Systems, Department of Industrial and Systems Engineering (A. B. Bishop), 1 July 1988 through 30 June 1989. (Project 766000 - Continuation)

\$70,000.00 - American Cancer Society, New York, New York, Patterns of Macromolecular Synthesis During Acquisition and Loss of Amplified Genes, Department of Radiology (R. M. Snapka), 1 July 1988 through 30 June 1989. (Project 765521 - Continuation)

\$60,000.00 - American Cancer Society, New York, New York, American Cancer Society Institutional Research Grant, Comprehensive Cancer Center (D. S. Yohn), 1 July 1988 through 30 June 1989. (Project 764472 - Continuation)

September 1 and 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Other Non-Federal Research Contracts/Grants (contd)

\$49,011.00 - Applied Information Technologies Research Center, Columbus, Ohio, SGML, Hypermedia Document Facility and Presentation Toolkit: Software Architecture Design Feasibility Study, Academic Faculty of Accounting and Management Information Systems and Department of Economics (J. S. Cunnyngham), 1 July 1988 through 31 December 1988. (Project 766842 - New)

\$47,153.00 - Robert Wood Johnson Foundation, Princeton, New Jersey, Robert Wood Johnson Dental Services Research Scholar, Community Dentistry (R. A. Kuthy), 1 July 1988 through 30 June 1989. (Project 766819 - New)

\$36,733.00 - Muscular Dystrophy Association, New York, New York, Complement Membrane Attack Complex in Dermatomyositis, Department of Neurology (J. T. Kissel), 1 July 1988 through 30 June 1989. (Project 766043 - Continuation)

\$34,000.00 - American Cancer Society, New York, New York, Biochemical Pharmacology of New Aromatase Inhibitors for Treatment of Estrogen-Dependent Cancers, College of Pharmacy (R. W. Brueggemeier), 1 July 1988 through 30 June 1989. (Project 764529 - Continuation)

\$33,000.00 - American Heart Association, Dallas, Texas, Kinetic Studies of Xanthine Oxidase, Department of Physiological Chemistry (C. R. Hille), 1 July 1988 through 30 June 1989. (Project 765543 - Continuation)

\$30,000.00 - Iowa State University, Ames, Iowa, Spectroscopic Evaluation of Structural Adhesive Bonding: Linear and Nonlinear Methods, Department of Welding Engineering (L. Adler), 1 May 1988 through 30 September 1988. (Project 766636 - Continuation)

\$28,100.00 - United Auto Workers-General Motors Human Resource Center, Madison Heights, Michigan, AIDS in the Workplace, Department of Family Medicine (L. L. Gabel), 1 April 1988 through 31 March 1989. (Project 766769 - New)

\$27,646.00 - Muscular Dystrophy Association, New York, New York, Probing Z-line Composition and Structure: Novel Approaches, Department of Veterinary Anatomy (M. Yamaguchi), 1 July 1988 through 30 June 1989. (Project 766182 - Continuation)

\$26,910.00 - Hannah Neil Center for Children, Columbus, Ohio, Implementing Behavioral Treatment Activities: A Joint Human Services/Physical Education Internship, School of Health, Physical Education and Recreation (C. L. Mand) and Department of Education Services and Research (J. O. Cooper), 1 September 1987 through 31 August 1988. (Project 766781 - Continuation)

\$25,000.00 - American Heart Association, Ohio Affiliate, Inc., Columbus, Ohio, Metabolic and Hormonal Control of Myocardial Adenylate Deaminase, Department of Internal Medicine (R. A. Altschuld), 1 July 1988 through 30 June 1989. (Project 766835 - New)

September 1 and 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Other Non-Federal Research Contracts/Grants (contd)

\$25,000.00 - American Heart Association, Ohio Affiliate, Inc., Columbus, Ohio, Does Lack of Oxygen Limit Maximum Force in Fatigued Diaphragm?, Department of Internal Medicine (T. L. Clanton), 1 July 1988 through 30 June 1989. (Project 766834 - New)

\$25,000.00 - American Heart Association, Ohio Affiliate, Inc., Columbus, Ohio, Sequential, Concentration-Targeted, Exponentially-Declining Procainamide Infusions for Electrophysiology Studies, College of Pharmacy (J. D. Coyle), 1 July 1988 through 30 June 1989. (Project 766780 - New)

\$25,000.00 - American Heart Association, Ohio Affiliate, Inc., Columbus, Ohio, Model of Adrenergic Hypersensitivity After Beta-Blockade, College of Pharmacy (J. J. Lima), 1 July 1988 through 30 June 1989. (Project 766142 - Continuation)

\$25,000.00 - American Heart Association, Ohio Affiliate, Inc., Columbus, Ohio, Alterations in the Horse During the First Week of Exercise, Department of Veterinary Clinical Sciences (K. H. McKeever), 1 July 1988 through 30 June 1989. (Project 766826 - New)

\$25,000.00 - American Heart Association, Ohio Affiliate, Inc., Columbus, Ohio, Immunopathology of Systemic Necrotizing Vasculitis, Department of Neurology (J. R. Mendell), 1 July 1988 through 30 June 1989. (Project 766837 - New)

\$25,000.00 - American Heart Association, Ohio Affiliate, Inc., Columbus, Ohio, Total Artificial Heart: Central and Peripheral Vascular Effects, Department of Surgery (K. D. Murray) and Department of Internal Medicine (P. F. Binkley), 1 July 1988 through 30 June 1989. (Project 766227 - Continuation)

\$25,000.00 - American Heart Association, Ohio Affiliate, Inc., Columbus, Ohio, Reperfusion Strategies and Post Infarction Arrhythmias, Department of Internal Medicine (S. D. Nelson), 1 July 1988 through 30 June 1989. (Project 766827 - New)

\$25,000.00 - Easter Seal Research Foundation, Chicago, Illinois, Gait Analysis of the Effects of Inhibitive Casts and Orthotics in Cerebral Palsy, Department of Physical Medicine (W. S. Pease and R. J. Bobulski), 1 July 1988 through 30 June 1989. (Project 766073 - Continuation)

\$25,000.00 - American Heart Association, Ohio Affiliate, Inc., Columbus, Ohio, Smokeless Tobacco and Blood Pressure in Males Ages 13-25, Oral Biology (K. Schroeder) and Department of Health, Physical Education and Recreation (M. S. C. Chen), 1 July 1988 through 30 June 1989. (Project 766817 - Continuation)

\$24,952.00 - American Heart Association, Ohio Affiliate, Inc., Columbus, Ohio, Cell Surface Control of Smooth Muscle Differentiation, Department of Anatomy (A. R. Strauch), 1 July 1988 through 30 June 1989. (Project 766123 - Continuation)

September 1 and 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Other Non-Federal Research Contracts/Grants (contd)

\$22,265.00 - American Heart Association, Ohio Affiliate, Inc., Columbus, Ohio, Catecholaminergic Control of Cardiovascular Development, Department of Psychology (J. P. Bruno and G. T. Berntson), 1 July 1988 through 30 June 1989. (Project 766833 - New)

\$20,000.00 - Ingram-White Castle Foundation, Columbus, Ohio, Education for Improved Medical Management of Child Physical and Sexual Abuse, College of Medicine - Administration (G. L. Trzebiatowski), 1 August 1988 through 31 July 1989. (Project 766820 - New)

\$20,000.00 - Iowa State University, Ames, Iowa, Nondestructive Evaluation of the Structural Adhesive Bonding for Aircraft Applications, Department of Welding Engineering (S. Rokhlin), 1 May 1988 through 30 September 1988. (Project 766636 - Continuation)

\$19,976.00 - National Parkinson Foundation, Miami, Florida, Neurochemical Compensations and the Sparing from Parkinsonian Deficits, Department of Psychology (J. P. Bruno) and Department of Pharmacology (M. H. Neff), 1 June 1988 through 31 May 1989. (Project 766804 - New)

\$19,639.00 - American Heart Association, Ohio Affiliate, Inc., Columbus, Ohio, Cardiac Autonomic Control in Patients Susceptible to Sudden Cardiac Death, Department of Physiology (J. P. L. Dujardin), 1 July 1988 through 30 June 1989. (Project 766844 - New)

\$18,330.00 - American Heart Association, Ohio Affiliate, Inc., Columbus, Ohio, Mechanism of Cyclic Guanine Monophosphate (G-GMP) Relaxation of Vascular Smooth Muscle, Department of Physiological Chemistry (J. D. Johnson), 1 July 1988 through 30 June 1989. (Project 766836 - New)

\$18,250.00 - Arthritis Foundation - Central Ohio Chapter, Columbus, Ohio, Immunoregulation and Autoimmunity, Department of Medicine (R. L. Whisler), 1 April 1988 through 31 March 1989. (Project 760620 - Continuation)

\$18,000.00 - American Heart Association, Ohio Affiliate, Inc., Columbus, Ohio, Isolated Myocytes from Failing Human Ventricle, Department of Internal Medicine (R. A. Altschuld and Q. Li), 1 July 1988 through 30 June 1989. (Project 766828 - New)

\$18,000.00 - American Heart Association, Ohio Affiliate, Inc., Columbus, Ohio, Calcium Dynamics and Contractile Activity in Ventricular Myocytes of Normal and Cardiomyopathic Rats, Department of Physiology (B. THE OHIO STATE UNIVERSITY DEVELOPMENT FUND

Establishment of Named Funds

The Roland Kennedy Scholarship Fund in Dairy Science

The Roland Kennedy Scholarship Fund in Dairy Science was established September 2, 1988, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from the estate of Lucile W. Kennedy (B.S.H.E. '21), Marysville, Ohio, in memory of Roland N. Kennedy.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide undergraduate and/or graduate scholarships, fellowships, or associateships for students enrolled in the Department of Dairy Science. The selection of the recipient(s) is to be made upon the recommendation of the Chairperson of the Department of Dairy Science in the College of Agriculture, in consultation with the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees, with preference being given to the recommendations from the appropriate administrative officials of the University who are then directly responsible for Dairy Science Education or the Vice President for Agricultural Administration, in order to carry out the desire of the donor.

The Roland Kennedy Scholarship Fund in Home Economics

The Roland Kennedy Scholarship Fund in Home Economics was established September 2, 1988, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from the estate of Lucile W. Kennedy (B.S.H.E. '21), Marysville, Ohio, in memory of Roland N. Kennedy.

September 1 and 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Named Funds (contd)

The Roland Kennedy Scholarship Fund in Home Economics (contd)

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide undergraduate and/or graduate scholarships, fellowships, or associateships for students enrolled in the College of Home Economics. The selection of the recipient(s) is to be made upon the recommendation of the Dean of the College of Home Economics, in consultation with the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees, with preference being given to the recommendations from the appropriate administrative officials of the University who are then directly responsible for Home Economics, or the Dean of the College of Home Economics, in order to carry out the desire of the donor.

The Joseph G. Svehla Engineering Scholarship Fund

The Joseph G. Svehla Engineering Scholarship Fund was established September 2, 1988, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University Development Fund from the estate of Joseph G. Svehla (B.M.E. '31, B.E.E. '31, M.S. '34) of New Buffalo, Michigan.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be awarded to students who are majoring in either electrical and/or mechanical engineering, with preference given to students who have proven financial need. Recipients will be selected by the Dean of the College of Engineering or his designee in consultation with the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in order to carry out the desire of the donor.

September 1 and 2, 1988 meeting, Board of Trustees

Establishment of Named Funds (contd)

The Ohio State University Family Scholarship Fund

The Ohio State University Family Scholarship Fund was established September 2, 1988, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from faculty and staff members of The Ohio State University.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide scholarships to spouses and children of regular full-time staff and faculty at The Ohio State University. These scholarships may be used for educational expenses at any accredited post-secondary institution. The spouses and children of regular full-time staff and faculty with five years continuous full-time employment are eligible to apply. Preference will be given to spouses and children who have demonstrated academic ability and financial need. The maximum accrued award per student will be \$1,000. Selection of the recipients will be made by The Ohio State University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in order to carry out the desire of the donors.

**The Miriam Ruggles Adkins Pickaway County
Scholarship Fund**

The Miriam Ruggles Adkins Pickaway County Scholarship Fund was established September 2, 1988, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University Development Fund from the Miriam Ruggles Adkins (Circleville, Ohio) Trust.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support one or more scholarships to students from Pickaway County who are interested in majoring in agriculture. Criteria for selection shall include outstanding scholastic achievement and demonstrated leadership potential through extracurricular activities. Preference will be given to those students with financial need. Selection will be made by the University Committee on Student Financial Aid in consultation with the Dean of the College of Agriculture.

**The Miriam Ruggles Adkins Pickaway County
Scholarship Fund (contd)**

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees with preference being given to the recommendations from the appropriate administrative official of the University who is then directly responsible for the College of Agriculture in order to carry out the desire of the donor.

The Ian Gregory Psychiatric Lectureship Fund

The Ian Gregory Psychiatric Lectureship Fund was established September 2, 1988, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from friends of Dr. Ian Gregory of Columbus, Ohio.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support a psychiatric lectureship. All expenditures shall be approved by the Department Chairperson in consultation with the Dean of the College of Medicine.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

The Charles W. Plum Endowment Fund

The Charles W. Plum Endowment Fund was established September 2, 1988, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from Charles W. Plum (B.S.Bus. Adm. '36) of College Station, Texas.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used for the support of the Accounting Department within the College of Business. Expenditures from the fund shall be authorized at the discretion of the Department Chairperson.

September 1 and 2, 1988 meeting, Board of Trustees

The Charles W. Plum Endowment Fund (contd)

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in order to carry out the desire of the donor.

Florence M. Rimoldi Scholarship Fund

The Florence M. Rimoldi Scholarship Fund was established September 2, 1988, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from Florence M. Rimoldi (B.S.H.E. '22).

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide one or more scholarships for students in the College of Home Economics majoring in Home Economics Education. The recipients shall be selected on the basis of scholarship, service and commitment to the Home Economics Education profession.

Selections shall be made each year by the appointees of the Dean of the College of Home Economics, in consultation with the University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees, with preference being given to the recommendations from the appropriate administrative official of the University who is then directly responsible for Home Economics Education and the Dean of the College of Home Economics, in order to carry out the desire of the donors.

Change in Name and Description of Named Fund

The Dee Dee Glimcher Lecture Fund

The Landscape Architecture Lecture Fund was established October 2, 1987, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from Herbert and Diane R. Glimcher of Columbus, Ohio, alumni, friends, and faculty of the Department of Landscape Architecture. The name and description were changed September 2, 1988.

September 1 and 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Change in Name and Description of Named Fund (contd)

The Dee Dee Glimcher Lecture Fund (contd)

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to fund lectures on landscape architecture and to disseminate information about the lectures and publications thereof. Expenditures will be made under the direction of the Chairperson of the Department of Landscape Architecture or an assigned committee.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees, in consultation with the appropriate department chairperson or program administrative officer responsible for landscape architecture education, in order to carry out the desire of the donors.

Change in Description of Named Fund

The Wilbur Waite Canaga Memorial Fund

The Wilbur Waite Canaga Memorial Fund was established July 12, 1974, by the Board of Trustees of The Ohio State University with a bequest from the late Ruth Regina Hale Canaga to The Ohio State University through The Ohio State University Development Fund in memory of her husband, Wilbur Waite Canaga (B.S.Agr. '15) formerly of Lansing, Illinois. The description was changed September 2, 1988.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

Annual income is to be divided equally between the College of Biological Sciences and the College of Agriculture and is to be used to provide one or more scholarships for students enrolled in each of these Colleges. The number and value of scholarships is to be determined independently by each of the Colleges. Consideration is to be given to high scholarship plus indicated interest in biochemistry, per se, and/or its application to agriculture. Selection of recipients shall be made by the respective Deans in cooperation with the University Committee on Student Financial Aid.

Should the need for these scholarships cease to exist or so diminish as to provide unused income, the income may be used for any purpose whatsoever as determined by the Board of Trustees, with preference being

D. Miller, P. N. Patil and D. R. Feller), 1 August 1988 through 31 July 1989. (Project 763483 - Continuation)

\$137,367.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Amphibian Limb Regeneration Blastema Antigens, Department of Molecular Genetics (R. A. Tassava), 1 July 1988 through 30 June 1989. (Project 766132 - Continuation)

\$130,442.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Cholinergic Systems and 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine (MPTP) Neurotoxicity, Department of Pharmacology (N. H. Neff and M. H. Neff), 1 July 1988 through 30 June 1989. (Project 766209 - Continuation)

\$127,000.00 - National Science Foundation, Washington, D.C., Formation of Hybrid Natural Products by Interspecies Cloning of Streptomyces, Department of Microbiology (W. R. Strohl), 1 September 1988 through 31 August 1989. (Project 765635 - Continuation)

\$126,066.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Arterial Morphology and Fluid Mechanics in Elastic Casts, Engineering Experiment Station (M. H. Friedman), 1 July 1988 through 30 June 1989. (Project 766886 - New)

\$122,232.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Structural Functional Studies of Neutrophil Activation, Department of Anatomy (J. M. Robinson), 1 August 1988 through 31 July 1989. (Project 766929 - New)

\$120,142.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Biochemical Studies of Arsenite Oxidase and Sulfite Oxidase, Department of Physiological Chemistry (C. R. Hille), 15 July 1988 through 30 June 1989. (Project 766908 - New)

\$116,827.00 - Department of Health and Human Services, Public Health Service, Alcohol, Drug Abuse and Mental Health Administration, Rockville, Maryland, Training in Community Management of EDNR Children, Nisonger Center (D. Hammer) and Department of Pediatrics (J. A. Mulick), 1 July 1988 through 30 June 1989. (Project 765745 - Continuation)

\$112,655.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Anterior Cruciate Ligament Reconstruction, Department of Mechanical Engineering (N. Berme) and Department of Surgery (S. R. Simon), 1 August 1988 through 31 July 1989. (Project 766933 - New)

September 1 and 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$94,945.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Colorant Formulation of Polymeric Prosthetic Materials, Restorative and Prosthetic Dentistry (W. M. Johnston), 1 July 1988 through 30 June 1989. (Project 766900 - New)

\$91,061.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Uteroferrin Gene Expression During Fetal and Placental Development, Department of Animal Science - OARDC (R. C. M. Simmen), 1 July 1988 through 30 June 1989. (Project 765565 - Continuation)

\$84,902.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Deoxyuridine Metabolism in Herpes Labialis, Department of Microbiology and Immunology (M. V. Williams), 1 July 1988 through 30 June 1989. (Project 764006 - Continuation)

\$80,546.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Feline Retrovirus Associated Intestinal Dysfunction, Department of Veterinary Pathobiology (L. E. Mathes), 15 July 1988 through 30 June 1989. (Project 766909 - New)

\$80,300.00 - National Science Foundation, Washington, D.C., Gaseous and Aqueous Corrosion of Ceramics, Department of Ceramic Engineering (D. W. Readey), 1 July 1988 through 31 December 1989. (Project 765380 - Continuation)

\$79,857.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Calcium and Calmodulin in Smooth Muscle Contraction, Department of Physiological Chemistry (J. D. Johnson), 1 July 1988 through 30 June 1989. (Project 764737 - Continuation)

\$76,294.00 - Department of Health and Human Services, Public Health Service, Alcohol, Drug Abuse and Mental Health Administration, Rockville, Maryland, Muscarinic Receptor Abnormalities in Affective Illness, Department of Psychiatry (S. C. Dilsaver), 1 August 1988 through 31 July 1989. (Project 766385 - Continuation)

\$75,208.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Corneal Endothelial Pleomorphism From Contact Lenses, College of Optometry (J. P. Schoessler), 1 August 1988 through 31 July 1989. (Project 764852 - Continuation)

\$69,776.00 - National Science Foundation, Washington, D.C., Fluid Flow and Cleanliness of Steel in Continuous Casting Tundishes, Department of Metallurgical Engineering (Y. Sahai), 1 July 1988 through 30 June 1989. (Project 765636 - Continuation)

September 1 and 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$68,560.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Role of Polyamines in Calmodulin and G-Kinase Regulation, Periodontology (J. D. Walters), 1 July 1988 through 30 June 1989. (Project 765508 - Continuation)

\$61,371.00 - National Science Foundation, Washington, D.C., A Study of the Windfield Near Terra Nova Bay, Byrd Polar Research Center (D. H. Bromwich), 15 July 1988 through 30 June 1989. (Project 766896 - Continuation)

\$60,000.00 - National Science Foundation, Washington, D.C., Photon- and Electron-Molecule Collisions and Molecular Resonance Phenomena, Department of Chemistry (C. W. McCurdy), 1 July 1988 through 31 January 1990. (Project 765573 - Continuation)

\$59,551.00 - Department of the Navy, Naval Material Command, China Lake, California, Ram and Inlet Modeling: Compact Range Scattering, Department of Electrical Engineering, ElectroScience Laboratory, (P. Pathak and W. D. Burnside), 1 July 1988 through 30 June 1989. (Project 764991 - Continuation)

\$56,981.00 - National Aeronautics and Space Administration, Goddard Space Flight Center, Greenbelt, Maryland, Terrestrial Gravity Data Analysis for Interim Gravity Model Improvement, Department of Geodetic Science and Surveying (R. H. Rapp), 1 September 1988 through 31 August 1989. (Project 765353 - Continuation)

\$55,000.00 - Department of Education, Office of Educational Research and Improvements, Washington, D.C., Reading Recovery Project 1987-1991, Department of Educational Theory and Practice (G. S. Pinnell and D. Deford), 1 October 1988 through 30 September 1989. (Project 766402 - Continuation)

\$51,499.00 - Department of Education, Office of Postsecondary Education, Washington, D.C., Proficiency-Oriented Materials for Arabic, Department of Judaic and Near Eastern Languages and Literatures (F. J. Cadora), 1 July 1988 through 30 June 1989. (Project 766882 - New)

\$50,000.00 - United States Information Agency, Washington, D.C., Cultural Change in Its Historical Context, Office of International Affairs (C. Zacher) and Department of Romance Languages and Literatures (L. Farina), 1 August 1988 through 30 September 1991. (Project 766927 - New)

\$49,960.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Maternal Growth Factors in Neonatal Growth, Department of Animal Science - OARDC (F. A. Simmen), 1 July 1988 through 30 June 1989. (Project 765566 - Continuation)

September 1 and 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$49,040.00 - National Science Foundation, Washington, D.C., Behavioral and Neural Plasticity in the Developing Brain, Department of Psychology (J. P. Bruno), 1 September 1988 through 31 August 1989. (Project 766304 - Continuation)

\$43,500.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Small Instrumentation Program, College of Medicine - Administration (D. G. Cornwell), 15 July 1988 through 30 June 1989. (Project 766936 - New)

\$40,000.00 - National Science Foundation, Washington, D.C., Highly-Excited States of Atoms and Molecules, Department of Physics (R. D. Knight), 15 July 1988 through 30 June 1989. (Project 766887 - New)

\$35,000.00 - National Science Foundation, Washington, D.C., Mathematical Sciences Research Equipment, Department of Mathematics (J. C. Ferrar), 1 July 1988 through 31 December 1989. (Project 766898 - New)

\$34,065.00 - Department of Agriculture, Forest Service, Princeton, West Virginia, Technology Diffusion in the Secondary Hardwood Manufacturing Sectors, Department of Natural Resources - OARDC and School of Natural Resources (J. A. Maxwell) and Department of Agricultural Economics and Rural Sociology - OARDC and Department of Agricultural Economics and Rural Sociology (J. Havlicek), 1 July 1988 through 30 June 1990. (Project 766916 - New)

\$25,000.00 - Department of Labor, Employment and Training Administration, Washington, D.C., Exploring Vocational Education, Counseling, and Information Processes, The National Center for Research in Vocational Education (R. D. Ryan), 1 July 1988 through 30 September 1988. (Project 766906 - New)

\$25,000.00 - National Science Foundation, Washington, D.C., Presidential Young Investigator Award, Department of Physics (D. L. Cox), 1 July 1988 through 31 December 1989. (Project 766937 - New)

\$25,000.00 - National Science Foundation, Washington, D.C., Presidential Young Investigator Award, Department of Mathematics (K. Rubin), 1 August 1988 through 31 January 1990. (Project 766905 - New)

\$24,077.00 - Department of the Air Force, Air Force Systems Command, Bolling Air Force Base, D.C., Coherence and Chaos in Integrable Partial Differential Equations, Department of Mathematics (E. A. Overman), 1 August 1988 through 31 December 1989. (Project 766917 - New)

\$19,750.00 - Department of Agriculture, Economic Research Service, Washington, D.C., Japanese Auto Plants in the United States and Rural Jobs, Department of Agricultural Economics and Rural Sociology - OARDC and Department of Agricultural Economics and Rural Sociology (M. F. Kenney), 1 July 1988 through 30 September 1989. (Project 766889 - New)

September 1 and 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$18,463.00 - National Science Foundation, Washington, D.C., Velocity Distributions of Suspensions of Large Food Particles During Continuous Sterilization in Holding Tubes, Department of Agricultural Engineering - OARDC and Department of Agricultural Engineering (S. K. Sastry), 1 July 1988 through 31 December 1989. (Project 766458 - Continuation)

\$18,000.00 - National Aeronautics and Space Administration, Washington, D.C., Nonlinear Analysis of Boundary Layers with Streamwise Varying Properties, Department of Mechanical Engineering and Department of Aeronautical and Astronautical Engineering (T. Herbert), 1 August 1988 through 31 July 1989. (Project 766897 - New)

\$14,494.00 - National Science Foundation, Washington, D.C., Multilinear Analysis of Spectroscopic Data, Department of Statistics (S. E. Leurgans) and Department of Biochemistry (R. T. Ross), 15 July 1988 through 31 December 1989. (Project 766885 - New)

\$13,022.00 - Department of Transportation, National Highway Traffic Safety Administration, East Liberty, Ohio, Composite Thorax Rib Development, Department of Mechanical Engineering (J. A. Collins), 1 June 1988 through 31 December 1988. (Project 766928 - New)

\$11,300.00 - National Science Foundation, Washington, D.C., Group Travel to the DIMETA-88 Conference, Department of Metallurgical Engineering (P. G. Shewmon), 15 July 1988 through 30 June 1989. (Project 766940 - New)

\$10,000.00 - Department of the Navy, Naval Material Command, China Lake, California, Ram and Inlet Modeling: Compact Range Scattering, Department of Electrical Engineering, ElectroScience Laboratory (P. Pathak and W. D. Burnside), 1 July 1988 through 30 June 1989. (Project 764991 - Continuation)

\$9,980.00 - Department of the Army, Army Corps of Engineers, Fort Belvoir, Virginia, Kinematic Surveying with Global Positioning System (GPS), Department of Geodetic Science and Surveying (C. G. Goad), 11 July 1988 through 11 November 1988. (Project 766888 - New)

\$6,944.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Small Instrumentation Program, College of Dentistry - Administration (M. C. Whitehead), 1 July 1988 through 30 June 1989. (Project 766899 - New)

\$6,065.00 - Department of the Navy, Naval Postgraduate School, Monterey, California, Compressive Strength Advanced Composite Cylinders, Department of Aeronautical and Astronautical Engineering (N. Sarigul), 8 July 1988 through 7 August 1988. (Project 766883 - New)

\$6,000.00 - National Science Foundation, Washington, D.C., Design and Management of Flexible Electronic Assembly Systems, Department of Industrial and Systems Engineering (W. E. Wilhelm), 30 June 1988 through 30 November 1988. (Project 764982 - Continuation)

September 1 and 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$3,183.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Syntactic and Interpretive Processes in Coreference, Department of Linguistics (R. W. Cowart), 1 March 1988 through 28 February 1989. (Project 765967 - Continuation)

Personnel Services - Department of Commerce, National Oceanic and Atmospheric Administration, Rockville, Maryland, Geodetic Advisor for the State of Ohio, Center for Mapping (J. D. Bossler), 1 July 1988 through 30 June 1989. (Project 766340 - Continuation) (Approximate Dollar Value - \$37,500)

TOTAL - FEDERAL AWARDS

\$6,067,057.00

State of Ohio Research Contracts/Grants

\$150,000.00 - State of Ohio, Department of Development, Columbus, Ohio, Center for Labor-Management Cooperation (Labor-Management Partnership Program), Academic Faculty of Management and Human Resources (D. B. Patton, W. D. Todor and H. R. Bobbitt, Jr.), 1 July 1988 through 30 June 1989. (Project 766870 - Continuation)

\$146,884.87 - State of Ohio, Department of Education, Columbus, Ohio, Labor Market Information Development, Center for Human Resource Research (H. R. Blaine) and Academic Faculty of Management and Human Resources (S. L. Mangum), 1 July 1988 through 30 June 1989. (Project 766869 - Continuation)

\$24,000.00 - State of Ohio, Public Utilities Commission, Columbus, Ohio, Alternative Institutional Arrangements for Water Utility Regulation, National Regulatory Research Institute (D. N. Jones), 20 July 1988 through 15 November 1988. (Project 766922 - New)

\$7,500.00 - State of Ohio, Ohio Humanities Council, Columbus, Ohio, The Educated Citizen and the University of the Future, Department of History and Center for Comparative Studies in the Humanities (M. R. Waldman), 6 December 1986 through 29 October 1987. (Project 765982 - Continuation)

\$4,000.00 - State of Ohio, Ohio Humanities Council, Columbus, Ohio, The Right to Literacy, Department of English (A. A. Lunsford), 1 June 1988 through 28 November 1988. (Project 766938 - New)

TOTAL - STATE OF OHIO AWARDS

\$ 332,384.87

Industrial Research Contracts/Grants

\$137,500.00 - Alcoa Defense Systems, Inc., San Diego, California, Advanced Antennas for Future Air Vehicles, Department of Electrical Engineering, ElectroScience Laboratory (B. A. Munk), 16 February 1988 through 30 September 1988. (Project 766329 - Continuation)

September 1 and 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Industrial Research Contracts/Grants (contd)

\$49,873.00 - General Electric Company, Cincinnati, Ohio, Electromagnetic Characterization of Detailed Design Features of Aircraft/Engine Exhaust Systems, Department of Electrical Engineering, ElectroScience Laboratory (L. Peters, Jr.), 15 July 1988 through 14 July 1989. (Project 766939 - New)

\$46,332.00 - Bausch and Lomb, Rochester, New York, Vision Research Fellowship, Department of Ophthalmology (C. G. Kelley), 1 July 1988 through 30 June 1989. (Project 766918 - New)

\$24,000.00 - Brunswick Corporation, Marion, Virginia, Hybrid Radome Research Studies, Department of Electrical Engineering, ElectroScience Laboratory (B. A. Munk), 1 October 1987 through 30 September 1988. (Project 765697 - Continuation)

\$20,000.00 - Mobil Research and Development Corporation, Paulsboro, New Jersey, In-situ Zeolite Crystallization and Spectroscopic Characterization, Department of Chemistry (P. K. Dutta), 1 June 1988 through 31 May 1989. (Project 766931 - New)

\$13,000.00 - Burroughs Wellcome, Research Triangle Park, North Carolina, Purine Analogue-Induced Cell Differentiation and Queuine Hypomodification of tRNA, Comprehensive Cancer Center and Department of Physiological Chemistry (R. W. Trewyn), 1 April 1988 through 31 March 1989. (Project 766913 - New)

\$13,000.00 - Church and Dwight, Inc., Princeton, New Jersey, Digestibility of Typical Dairy Diets Supplemented with Various Feed Fats, Department of Dairy Science - OARDC and Department of Dairy Science (D. L. Palmquist), 1 June 1988 through 31 December 1988. (Project 766904 - New)

\$9,600.00 - Polymer Technology Corporation, Wilmington, Massachusetts, The Evaluation of High Oxygen Flux Gas Permeable Contact Lens Design, College of Optometry (G. J. Andrasko), 1 July 1988 through 30 November 1988. (Project 766895 - New)

\$2,500.00 - Stuart Pharmaceuticals, Wilmington, Delaware, A Multicenter Comparison of Zoladex Depot and Surgical Castration in Metastatic Prostate Carcinoma, Department of Surgery (J. R. Drago), 1 September 1985 through 31 October 1988. (Project 765067 - Continuation)

\$1,000.00 - Chartwell Technologies, Inc., Columbus, Ohio, Bioequivalence Studies on Sustained Release Formulations, Department of Preventive Medicine (M. L. Moeschberger), 1 May 1988 through 31 July 1988. (Project 766893 - New)

\$600.00 - Boeing Aerospace Company, Seattle, Washington, Compact Range Performance Analyses, Department of Electrical Engineering, ElectroScience Laboratory (J. D. Young), 1 July 1988 through 31 July 1988. (Project 766894 - New)

September 1 and 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Industrial Research Contracts/Grants (contd)

\$451.21 - The Feed Store, Columbus, Ohio, Comparison of Milk Replacer Versus Whole Milk in Dairy Calves, Department of Dairy Science - OARDC, Department of Dairy Science, and Cooperative Extension State Operations (D. Zartman), 1 July 1988 through 31 December 1988. (Project 766907 - New)

TOTAL - INDUSTRIAL AWARDS \$ 317,856.21

Other Non-Federal Research Contracts/Grants

\$350,180.00 - United Nations, Geneva, Switzerland, Evaluation of Active Immunization with Synthetic Peptides of hCG as a Fertility Control Method, Department of Obstetrics and Gynecology (V. C. Stevens), 1 July 1988 through 30 June 1989. (Project 760113 - Continuation)

\$247,797.00 - University of Pennsylvania, Philadelphia, Pennsylvania, Conducting Electronic Polymers by Non-Redox Processes Synthesis, Physical Studies, and Application, Department of Physics (A. J. Epstein), 1 June 1988 through 31 March 1989. (Project 765670 - Continuation)

\$146,000.00 - Healthcare Financial Management Association, Westchester, Illinois, The Development of a Financial Service for the Hospital Industry, Hospital and Health Services Administration (W. O. Cleverley), 1 July 1988 through 30 June 1989. (Project 761794 - Continuation)

\$125,000.00 - Getty Center for Education in the Arts, Los Angeles, California, The Ohio Partnership for Visual Arts: Regional Institute for Educators, Department of Art Education (N. MacGregor) and Department of Educational Policy and Leadership (A. D'Costa), 1 April 1988 through 31 March 1993. (Project 766784 - New)

\$82,957.00 - Council for Tobacco Research - U.S.A., Inc., New York, New York, Neutrophil Stimulation: Biochemical and Cell Biological Studies, Department of Anatomy (J. M. Robinson), 1 July 1988 through 30 June 1989. (Project 766941 - New)

\$55,000.00 - Columbus Metropolitan Housing Authority, Columbus, Ohio, Community Enablement Program, Department of Communication (J. J. Pilotta), 1 July 1988 through 30 June 1989. (Project 766878 - New)

\$46,322.00 - National Foundation for Ileitis and Colitis, New York, New York, Inflammatory Bowel Disease (IBD) and Diarrhea: Role of Oxy-radicals in Intestinal Secretion, Department of Internal Medicine (T. S. Gaginella), 1 October 1988 through 30 September 1989. (Project 766881 - New)

\$35,000.00 - American Lung Association, New York, New York, Oxidant Injury in the Adult Respiratory Distress Syndrome (ARDS), Department of Internal Medicine (W. B. Davis), 1 July 1988 through 30 June 1989. (Project 765375 - Continuation)

September 1 and 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Other Non-Federal Research Contracts/Grants (contd)

\$35,000.00 - Gleason Memorial Fund, Rochester, New York, Personal Computer Based Array Processing System for Finite Element Analysis, Department of Mechanical Engineering (H. R. Busby), 1 July 1988 through 30 June 1989. (Project 766934 - New)

\$34,433.00 - Midwest Universities Consortium for International Activities, Inc., Columbus, Ohio, The Indonesia Second University Development Project -- JMO Support Office, Office of International Affairs (D. G. McCloud), 27 January 1987 through 31 December 1991. (Project 766028 - Continuation)

\$30,700.00 - American Diabetes Association, Inc., Alexandria, Virginia, Effect of Streptozotocin Diabetes of Hepatic UDP-Glucuronyltransferase Activities, Department of Internal Medicine (R. B. Kirkpatrick), 1 July 1988 through 30 June 1989. (Project 766055 - Continuation)

\$25,000.00 - American Lung Association, New York, New York, Edward Livingston Trudeau Scholar Award, Department of Internal Medicine (J. E. Gadek and G. C. Kindt), 1 July 1988 through 30 June 1989. (Project 766912 - New)

\$22,000.00 - Eleven Members of the National Entrepreneurship Education Consortium, National Entrepreneurship Education Consortium, The National Center for Research in Vocational Education (R. D. Ryan), 1 July 1987 through 30 June 1988. (Project 766207 - Continuation)

\$21,234.00 - American Association of Retired Persons, Washington, D.C., Case Management -- State of the Art, College of Social Work (R. E. Boettcher), 1 March 1988 through 31 October 1988. (Project 766919 - New)

\$20,000.00 - Texas A&M University, College Station, Texas, Cretaceous-Paleogene Foraminiferal Biostratigraphy, Biogeography, and Stable Isotope Geochemistry, Department of Geology and Mineralogy (P. N. Webb), 1 July 1988 through 30 June 1989. (Project 766914 - New)

\$19,000.00 - Ohio Cancer Research Associates, Columbus, Ohio, Molecular Lesion of 5q-Chromosome in Acute Non-Lymphocytic Leukemia (ANLL) Patients, Department of Internal Medicine (I. M. Chiu), 1 July 1988 through 30 June 1989. (Project 766910 - New)

\$18,000.00 - American Heart Association, Ohio Affiliate, Inc., Columbus, Ohio, The Vascular Response to Inotropes in Animals with an Artificial Heart, Department of Surgery (K. D. Murray and L. K. Kalanges), 1 July 1988 through 30 June 1989. (Project 766879 - New)

\$17,100.00 - Ohio Cancer Research Associates, Columbus, Ohio, Importance of the HMPS Pathway in the Metabolism of Tumor Tissue, Department of Internal Medicine (A. L. Sagone), 1 July 1988 through 30 June 1989. (Project 766923 - New)

September 1 and 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Other Non-Federal Research Contracts/Grants (contd)

\$16,780.00 - American Lung Association of Ohio, Columbus, Ohio, The Role of Work Related Factors and Coping Responses in Tobacco Abstinence, Department of Life Span Process (M. E. Wewers), 1 July 1988 through 30 June 1989. (Project 766237 - Continuation)

\$15,000.00 - American Heart Association, Ohio Affiliate, Inc., Columbus, Ohio, Diastolic Function in Cardiac Transplant Recipients and Its Relation to Allograft Rejection, Department of Internal Medicine (P. F. Binkley and A. Z. Farhat), 1 July 1988 through 30 June 1989. (Project 766924 - New)

\$15,000.00 - American Heart Association, Ohio Affiliate, Inc., Columbus, Ohio, Calcium Dynamics and Contractile Activity in Ventricular Myocytes of Normal and Cardiomyopathic Rats, Department of Physiology (B. T. Stokes) and Department of Internal Medicine (D. L. Groden), 1 July 1988 through 30 June 1989. (Project 766872 - New)

\$14,350.00 - American Heart Association, Ohio Affiliate, Inc., Columbus, Ohio, Characteristics of Voltage-Gated Calcium Channels in Human Ventricular Myocytes, Department of Pharmacology (J. J. Enyeart), 1 July 1988 through 30 June 1989. (Project 766891 - New)

\$10,000.00 - American Agricultural Economics Association, Ames, Iowa, Priority Data on Agricultural and Rural Areas: A Survey of Agricultural and Rural Social Scientists, Department of Agricultural Economics and Rural Sociology - OARDC and Department of Agricultural Economics and Rural Sociology (L. J. Hushak) and Department of Agricultural Economics and Rural Sociology (W. S. Chern and L. Tweeten), 1 April 1988 through 31 December 1989. (Project 766867 - New)

\$9,000.00 - Fight for Sight, Inc., Baltimore, Maryland, Excitatory Amino Acids and Diabetic Retinopathy, Department of Pharmacology (M. H. Neff), 1 July 1988 through 30 June 1989. (Project 766890 - New)

\$7,475.00 - North Atlantic Treaty Organization, Brussels, Belgium, Centrifugal Instabilities in Flow Between Partially Filled Horizontal Rotating Cylinders, Department of Physics (C. D. Andereck), 1 July 1988 through 30 June 1989. (Project 766932 - New)

\$7,000.00 - United Way Fund of Union County, Inc., Marysville, Ohio, Needs Survey in Union County, Department of Agricultural Economics and Rural Sociology - OARDC, Department of Agricultural Economics and Rural Sociology, and Cooperative Extension State Operations (J. F. Donnermeyer), 1 June 1988 through 31 May 1989. (Project 766903 - New)

\$6,830.00 - The Fred C. Gloeckner Foundation, Inc., New York, New York, Factors Influencing Optimization of Cold-Programming Responses of Case-Cooled Easter Lily Bulbs, Department of Horticulture - OARDC and Department of Horticulture (T. A. Prince), 1 September 1988 through 31 August 1989. (Project 765875 - Continuation)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Named Funds

A. B., Dolly and Ralph Cohen Scholarship Fund

The A. B., Dolly and Ralph Cohen Scholarship Fund was established September 2, 1988, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from the A.B., Dolly and Ralph Cohen Foundation, transferred from The Ohio State University Scholarship Fund.

September 1 and 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Named Funds (contd)

A. B., Dolly and Ralph Cohen Scholarship Fund (contd)

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide scholarship support for one or more qualified students enrolled at The Ohio State University. Selection of the scholarship will be made by the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in order to carry out the desire of the donor.

The Freeman S. Howlett Memorial Fellowship Fund

The Freeman S. Howlett Memorial Fellowship Fund was established September 2, 1988, by the Board of Trustees of The Ohio State University with a bequest to The Ohio State University Development Fund from Jean W. Howlett, Wooster, Ohio, widow of Freeman S. Howlett, distinguished faculty member and chairperson of the Department of Horticulture.

All gifts are to be invested in the University's permanent endowment fund under the rules and regulations adopted by the Board of Trustees at The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide one or more graduate fellowships in the Department of Horticulture at The Ohio State University. Preference shall be given to well-qualified foreign students who intend to pursue careers of teaching or research in horticulture. The selection is to be made after consultation with the Chairperson of the Department of Horticulture at The Ohio State University and a member of the Department of Horticulture at the Ohio Agricultural Research and Development Center, in cooperation with the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees with preference being given to the recommendations from the appropriate administrative official of the University who is then directly responsible for the College of Agriculture, in order to carry out the desire of the donor.

September 1 and 2, 1988 meeting, Board of Trustees

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Named Funds (contd)

The Helen Simpson Lambacher Fund

The Helen Simpson Lambacher Fund was established September 2, 1988, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund, transferred from the Cramblett Education and Research Fund as requested by the Dean of the College of Medicine, to support the work of the chairholder of The Henry G. Cramblett Chair in Medicine and to honor the late Mrs. Helen Simpson Lambacher (B.S.Ed. '33) of Venice, Florida.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be distributed to the Department of Pediatrics in the College of Medicine to support the scholarly efforts of the holder of The Henry G. Cramblett Chair in Medicine in achieving excellence in patient care, teaching, and research through the joint efforts of Children's Hospital and The Ohio State University.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate dean, department chair, or program administrative office in order to carry out the program's objective.

**The Ralph L. Boyer Award for Excellence
in Engineering Instruction Fund**

The Ralph L. Boyer Award for Excellence in Engineering Instruction Fund was established September 2, 1988, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University from the estate of Ralph L. Boyer (B.M.E. '24) of Mount Vernon, Ohio.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income and, if appropriate, the principal shall be used to provide one or more awards to members of the faculty of the College of Engineering of The Ohio State University deserving of commendation for their work in their field of instruction. The Dean of the College of Engineering, in consultation with the Dean's Council, shall determine whether awards are to be made, the number of awards to be made, and the amount to be awarded to recipients.

It is the desire of the donor that this fund should benefit the University in perpetuity and that no part of the corpus or income of this

fund be used for any of the other colleges of The Ohio State University or any other purpose except as herein specified. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in order to carry out the desire of the donor.

The William J. Marks Pharmacy Memorial Scholarship Fund

The William J. Marks Pharmacy Memorial Scholarship Fund was established September 2, 1988, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University Development Fund from Mrs. Libby Marks in memory of William J. Marks (B.S.Pharm. '36) of Columbus, Ohio.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to assist students in the College of Pharmacy who have demonstrated a high level of academic achievement. The selection of the award recipients shall be made by the appropriate College of Pharmacy faculty committee in consultation with the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in order to carry out the desire of the donor.

The Valerie Helsel Scholarship Fund

The Valerie Helsel Scholarship Fund was established September 2, 1988, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from friends and co-workers in memory of Valerie Helsel (B.A. '85) of Worthington, Ohio.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide a scholarship award for an Ohio State University Hospitals employee who wishes to further his/her education. The funds may be used for whatever purpose the employee requires, i.e., books, babysitting fees, etc. Selection of the recipient shall be made by the University Committee on Student Financial Aid.

Establishment of Named Funds (contd)

The Valerie Helsel Scholarship Fund (contd)

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate administrative officer in order to carry out the desire of the donors.

The James F. Fullington Memorial Fund

The James F. Fullington Memorial Fund was established September 2, 1988, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from the estate of Emma Courtright Fullington (B.A. '18, M.A. '19) in memory of her husband, James F. Fullington, Professor Emeritus (B.A. '16, M.A. '23, Ph.D. '30).

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used for the benefit of the College of Humanities, as determined by the Board of Trustees, with preference afforded to the recommendations of the Dean of said College.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in order to carry out the desire of the donor.

Change in Description of Named Fund

The William J. Skou Scholarship Fund

The William J. Skou Scholarship Fund was established May 7, 1982, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from the estate of William J. Skou (B.S.Agr. '50, M.S. '51) of Akron, Ohio. The description was changed September 2, 1988.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income (over and above what must be added to the principal to offset the annual inflation rate) is to be used to provide one or more scholarships for students entering or continuing in the field of

Change in Description of Named Fund (contd)

The William J. Skou Scholarship Fund (contd)

Floriculture and/or Greenhouse Production of flowers or ornamentals. Selection of recipient(s) is to be made upon the recommendation of a committee comprised of the Chairperson, Department of Horticulture (Columbus Campus), the Director of the Agricultural Technical Institute, and Dean of the College of Agriculture, with the latter serving as Chairperson. (Designees of these officers may serve as the recommending committee.) Further, of the annual income available for distribution, 50% will be used for scholarship recipients at The Ohio State University Columbus Campus and the remaining 50% of the income for scholarship recipients at The Ohio State University Agricultural Technical Institute Campus. Only students in the upper third of their graduating high school class, and without regard to their parents' income level, can be selected to receive the primary scholarships. Income designated for use by The Ohio State University Columbus Campus which is unused for undergraduate scholarships may be converted for use as a graduate associateship in the field of Floriculture and/or Greenhouse Production of flowers or ornamentals with the approval of the selection committee (or designated representatives) and upon recommendation of the Floriculture Faculty (Department of Horticulture, Columbus Campus).

Should the need for these scholarships cease to exist or so diminish as to provide unused income, then the income may be used for any purpose whatsoever as determined by the Board of Trustees of the University with preference given to the recommendations from the appropriate administrative officials of the University who are then directly responsible for floriculture education at either the Columbus Campus or at the Agricultural Technical Institute.

**EMPLOYMENT OF AN ARCHITECT
NEUROPSYCHIATRIC FACILITY**

Resolution No. 89-25

Synopsis: Authorization to employ an architectural firm for the Neuropsychiatric Facility project is proposed.

WHEREAS a new neuropsychiatric facility is being planned to provide for the highest quality of psychiatric inpatient care in accordance with current precepts of treatment and for teaching and research; and

WHEREAS this project will provide for the demolition of a portion of Upham Hall and the replacement of beds currently located in Upham Hall; and

WHEREAS \$1,050,000.00 will be made available from University Hospitals for this project;

September 1 and 2, 1988 meeting, Board of Trustees

**EMPLOYMENT OF AN ARCHITECT
NEUROPSYCHIATRIC FACILITY (contd)**

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized, within established University procedures, to select a qualified architectural firm to prepare the plans and specifications for this project, and that the fees for this service be negotiated between the firm selected and the University with such action to be reported to this Board at the appropriate time.

Upon motion of Mr. Wolf, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

**EMPLOYMENT OF ARCHITECT/ENGINEER AND
REQUEST FOR CONSTRUCTION BIDS
AMERIFLORA '92 BIOCONTAINMENT FACILITY**

Resolution No. 89-26

Synopsis: Authorization to employ an architectural/engineering firm and request construction bids for the AmeriFlora '92 Biocontainment Facility project is proposed.

WHEREAS the City of Columbus will be hosting AmeriFlora '92 and is in need of a specialized support facility for receiving, inspecting, monitoring, maintaining and growing plant material for this international exposition; and

WHEREAS this project will provide for a greenhouse/outdoor nursery complex, an inspection quarantine complex, and a service dock area to provide for delivery and handling of plant material, equipment, and supplies; and

WHEREAS the entire facility will be a high security area with perimeter fencing and an electronic security system to assure protection and containment of all plants maintained within the facility complex; and

WHEREAS at the conclusion of the AmeriFlora '92 exposition, this facility will belong to The Ohio State University and be used to support research and teaching programs of the College of Agriculture; and

WHEREAS funds in the amount of \$2,225,000.00 have been appropriated to the University for this project by Amended House Bill 810 (the 1988-90 Capital Appropriations Bill) enacted by the 117th Ohio General Assembly:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to select a qualified architectural/engineering firm for this project, in conjunction with the Department of Administrative Services, and that the fees for this service be negotiated between the firm selected and the Department of Administrative Services, Division of Public Works; and

September 1 and 2, 1988 meeting, Board of Trustees

**EMPLOYMENT OF ARCHITECT/ENGINEER AND
REQUEST FOR CONSTRUCTION BIDS
AMERIFLORA '92 BIOCONTAINMENT FACILITY (contd)**

BE IT FURTHER RESOLVED, That the President and/or Vice President for Business and Administration be authorized to request construction bids on this project in accordance with established University procedures, and if satisfactory bids are received, to recommend to the Department of Administrative Services, Division of Public Works, the award of contracts, with all actions to be reported to this Board at the appropriate time.

Upon motion of Mr. Teaford, seconded by Mr. Wolf, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

**REQUEST FOR CONSTRUCTION BIDS
HAMILTON HALL RENOVATION**

Resolution No. 89-26

Synopsis: Authorization to request construction bids for the Hamilton Hall Renovation project is proposed.

WHEREAS planning funds in the amount of \$400,000.00 were appropriated by Amended Substitute House Bill 552, (the 1981-82 Capital Improvements Bill) for the employment of an architectural firm for the Hamilton Hall Renovation project, and this action was approved by this Board on July 10, 1981, with the architectural firm of Richard Trott & Partners subsequently being selected to design this project; and

WHEREAS Substitute House Bill 870 (the 1986-88 Capital Appropriations Bill) appropriated \$10,100,000.00 for the renovation of the south and east portions of Hamilton Hall, and this project was approved by this Board on July 11, 1986; and

WHEREAS Amended House Bill 810 (the 1988-1990 Capital Appropriations Bill) has appropriated an additional \$7,381,000.00 for the renovation of the north wing of Hamilton Hall; and

WHEREAS this project will provide a complete renovation of Hamilton Hall to house the Department of Physiology, a merged Department of Biochemistry and Physiological Chemistry, and six anatomy faculty, morgue, and dissection laboratories; and

WHEREAS funds in the total amount of \$17,481,000.00 have been allocated for the construction of this project:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to request construction bids on this project in accordance with established University procedures, and if satisfactory bids are received, to recommend to the Department of Administrative Services, Division of Public Works, the award of contracts, with all actions to be reported to this Board at the appropriate time.

September 1 and 2, 1988 meeting, Board of Trustees

**REQUEST FOR CONSTRUCTION BIDS
HAMILTON HALL RENOVATION (contd)**

Upon motion of Mr. Teaford, seconded by Mr. Wolf, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

**REQUEST FOR CONSTRUCTION BIDS AND
ESTIMATE OF COST - FUNDING**

Resolution No. 89-27

Synopsis: Authorization to request construction bids is proposed.

WHEREAS the plans and specifications for the following project have been completed and, at the request of the Vice President for Business and Administration, the President recommended that the Board of Trustees authorize the request for construction bids:

DOAN HALL - CHILLER STATION RENOVATION

Project: Due to the Medical Logistical (Infill) project currently under construction adding additional floors of Doan Hall, the present air cooled chiller plant located in Room N302 of Doan Hall must be relocated, once temporarily and then permanently. This project will avoid the two relocations by eliminating the reciprocating air cooled chiller plant and providing chilled water for the critical Computer Room air conditioning from the Doan Hall penthouse by installing two chilled water pipes from the 12th floor to the 3rd floor.

Funding: University Hospitals Funds

Estimated Construction Cost: \$165,000.00

Estimated Project Cost: \$210,000.00

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized, in accordance with established University procedures, to request construction bids on these projects, and if satisfactory bids are received, to award the necessary contracts, with all actions to be reported to this Board at the appropriate time.

Upon motion of Mr. Wolf, seconded by Mr. Berry, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

September 1 and 2, 1988 meeting, Board of Trustees

**REPORT OF AWARD OF CONTRACTS AND
ESTABLISHMENT OF CONTINGENCY FUNDS**

Resolution No. 89-28

Synopsis: Contracts have been awarded for the projects listed below to the lowest and best bidders in accordance with University procedures.

WHEREAS resolutions adopted by the Board of Trustees at previous meetings authorized the President and/or Vice President for Business and Administration to sign the plans and specifications and, in accordance with established University procedures, to request bids and, if satisfactory bids were received, to recommend the award of contracts for the following projects: Ohio Stadium - Refinish Exposed Structural Steel; Roof Replacements (Supplemental) - McCracken Power Plant and Parks Hall, Masonry Repairs - McCracken Power Plant; Dairy Barn Improvements - Ohio Agricultural Research and Development Center; Pavement Repairs and Asphalt Overlay - Lima Regional Campus:

OHIO STADIUM - REFINISH EXPOSED STRUCTURAL STEEL

Description: This project provides for the complete removal of all rust and loose paint, and the repriming and repainting of all exposed structural steel. Construction began June 27, 1988, and is scheduled to be completed by August 31, 1988.

**SALE OF REAL PROPERTY
20.988 ACRES ON SHIER-RINGS ROAD
DUBLIN, OHIO**

Resolution No. 89-29

Synopsis: Sale of 20.988 acres located on Shier-Rings Road at the intersection of Wilcox Road in Dublin, Ohio, is proposed.

WHEREAS in 1977 the Board of Trustees of The Ohio State University acquired 20.988 acres on Shier-Rings Road, located at the intersection of Wilcox Road, in Dublin, Ohio, by gift from the Carol S. Kennedy Trust; and

September 1 and 2, 1988 meeting, Board of Trustees

**SALE OF REAL PROPERTY
20.988 ACRES ON SHIER-RINGS ROAD
DUBLIN, OHIO (contd)**

WHEREAS under the terms of this gift, the property was to be held for long-term gain and proceeds from the sale of the property are to be used for the general support of the University; and

WHEREAS Continental Acquisitions, Inc., has offered to purchase this property for \$1,259,280.00 (a price of \$60,000.00 per acre); and

WHEREAS the appropriate University officials have determined that this sale of the property is in the best interest of the University and it is the desire of this Board to accept the offer of Continental Acquisitions and to sell all of the Board's right, title, and interest in and to this property:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized, in the name of the Board of Trustees of The Ohio State University, to sell all of the University's right, title, and interest in and to the Shier-Rings Road property to Continental Acquisitions, Inc., at a price of not less than \$60,000.00 per acre and upon such terms and conditions as are deemed to be in the best interest of the University, with the net proceeds from the sale being deposited in the University Endowment to be used for the general support of the University.

Upon motion of Mr. Berry, seconded by Mr. Teaford, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

EMPLOYEE EDUCATION/SELF-IMPROVEMENT PROGRAM

Resolution No. 89-30

Synopsis: Modifications to Employee Fee Authorization Programs are being proposed.

WHEREAS the University encourages regular non-teaching staff members to further their education and self-improvement; and

WHEREAS "regular" employment is defined as employment which is continuous in nature with the University and carries with it the term "regular appointment" and customarily requires the services of an individual on a regularly scheduled and continuing basis; and

WHEREAS since Autumn Quarter 1973 opportunities have been provided to eligible regular non-teaching staff to enroll in course work at the University and receive fee authorization for up to seven credit hours of course work per academic quarter as set forth in Section 2.40 of the University Operating Manual; and

WHEREAS the privilege extended to regular non-teaching staff to enroll as students of the University has been limited and subject to a definitive policy statement; and

September 1 and 2, 1988 meeting, Board of Trustees

EMPLOYEE EDUCATION/SELF-IMPROVEMENT PROGRAM (contd)

WHEREAS upon review of the current policy statement it is recognized that modifications are needed to update the policy:

NOW THEREFORE

BE IT RESOLVED, That effective Autumn Quarter 1988 that regular non-teaching staff eligible for participation in the University's Employee Fee Authorization Program be changed from a \$29,000 annual salary cap to an annual salary cap of \$42,000; and

BE IT FURTHER RESOLVED, That regular non-teaching staff be eligible for an employee fee authorization for non-degree credit course work not to exceed 42 hours; and

BE IT FURTHER RESOLVED, That this policy amends Board of Trustees' Resolution No. 81-75, dated February 6, 1981.

Upon motion of Ms. Casto, seconded by Mr. Teaford, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

DEPENDENT FEE AUTHORIZATION PROGRAM

Resolution No. 89-31

Synopsis: Modification of the Faculty/Staff Dependent Fee Authorization Program is proposed to include the spouse and dependent children of a deceased or retired faculty/staff member and also to include a spouse or dependent child of a regular faculty/staff member who is employed in a part-time capacity.

WHEREAS it is the recommendation of the University's Faculty Compensation and Benefits Committee, the President's Staff Advisory Committee, and the Ad Hoc Committee on Tuition Remission Policies that the Faculty/Staff Dependent Fee Authorization Program be modified to include coverage for the spouse and dependent children of a deceased or retired faculty/staff member and also to include a spouse or dependent child of a regular faculty/staff member who is employed in a part-time capacity; and

WHEREAS the appropriate University's offices and the President's Staff have reviewed the current policy statement:

NOW THEREFORE

BE IT RESOLVED, That effective Autumn Quarter 1988 the spouse and dependent children of a retired or deceased faculty/staff member be eligible to participate in the Faculty/Staff Dependent Fee Authorization Program provided that:

- 1) The faculty/staff member dies or retires while in the active full-time employment of the University; and
- 2) The faculty/staff member has completed five or more years of full-time employment with the University; and

September 1 and 2, 1988 meeting, Board of Trustees

DEPENDENT FEE AUTHORIZATION PROGRAM (contd)

- 3) The initial matriculation of the spouse and/or dependent children commences at The Ohio State University within five years following the death or retirement of the faculty/staff member; and
- 4) Tuition remission for the spouse ceases upon remarriage; and
- 5) Tuition remission ceases for any individual upon completion of twelve (12) quarters of study or 200 hours, whichever is greater; and

BE IT FURTHER RESOLVED, That effective Autumn Quarter 1988 the Faculty/Staff Dependent Fee Authorization Program be modified to include the spouse or dependent children of a regular faculty/staff member who is also employed in a part-time capacity.

Upon motion of Mr. Wolf, seconded by Mr. Berry, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

**COMPLIANCE WITH REGULATIONS OF THE
OHIO PUBLIC FACILITIES COMMISSION**

Resolution No. 89-32

Synopsis: Authorization for designated officials to submit required documentation to the Ohio Public Facilities Commission and to certify compliance with the Commission's regulations is requested.

WHEREAS pursuant to Chapter 154 of the Revised Code and the regulations of the Ohio Public Facilities Commission, each State institution of higher education, to which funds are appropriated in Amended House Bill 810 enacted by the 117th General Assembly, is required to authorize a designated official to sign and submit to the Ohio Public Facilities Commission documentation required with respect to the individual projects for which funds are appropriated; and

WHEREAS in submitting this documentation each institution is required to permit the Commission to use designated institutional sites for the purpose of these projects and to agree to undertake the performance of the functions and responsibilities of a using governmental agency as provided in the Commission's regulations with respect to such projects:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to complete, sign and submit to the Ohio Public Facilities Commission documentation required by the Commission for any or all of the projects for The Ohio State University provided for or pursuant to the appropriations made under Section 10 of Amended House Bill 810 enacted by the 117th General Assembly; and

BE IT FURTHER RESOLVED, That this Board agrees to permit the Ohio Public Facilities Commission to use designated University sites for the purpose of such projects, the boundaries of which will be shown in the plans for

September 1 and 2, 1988 meeting, Board of Trustees

**COMPLIANCE WITH REGULATIONS OF THE
OHIO PUBLIC FACILITIES COMMISSION (contd)**

such projects, for so long as the respective notes, if any, and bonds issued to finance the projects shall be outstanding; and

BE IT FURTHER RESOLVED, That this Board agrees to undertake performance of the functions and responsibilities of a using governmental agency and of a designated governmental agency to the extent it is such as provided in the regulations of the Ohio Public Facilities Commission and any applicable leases, agreements or rules of the Commission with respect to such projects.

Upon motion of Mr. Berry, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

**AUTHORIZATION FOR DESIGNATED OFFICIALS TO
BUY, SELL, ASSIGN AND TRANSFER SECURITIES,
TO DEPOSIT OR WITHDRAW FUNDS FROM BANK ACCOUNTS,
AND TO DESIGNATE DEPOSITORIES**

Resolution No. 89-33

Synopsis: The reaffirmation of Board of Trustees Resolution No. 87-102 (March 6, 1987), which authorized designated officials to buy, sell, assign and transfer securities, to deposit or withdraw funds from bank accounts held in the name of The Ohio State University, and to designate depositories is requested.

WHEREAS designated officials of the University buy, sell, assign and transfer stocks, bonds and other financial instruments owned by The Ohio State University; and

WHEREAS various financial institutions are designated as depositories for The Ohio State University; and

WHEREAS accounts at various financial institutions are opened and maintained in the name of The Ohio State University:

NOW THEREFORE

BE IT RESOLVED, That the Vice President for Business and Administration and/or Treasurer be authorized and empowered to buy, sell, assign and transfer any and all stocks, bonds, evidences of interest and/or indebtedness, rights and options to acquire or to sell the same, and all other securities corporate or otherwise, standing in the name of or belonging to The Ohio State University in any capacity; and

BE IT FURTHER RESOLVED, That the Vice President for Business and Administration and/or Treasurer be authorized and empowered to designate various financial institutions as depositories for The Ohio State University and open and maintain accounts at various financial institutions in the name of The Ohio State University; and

September 1 and 2, 1988 meeting, Board of Trustees

**AUTHORIZATION FOR DESIGNATED OFFICIALS TO
BUY, SELL, ASSIGN AND TRANSFER SECURITIES,
TO DEPOSIT OR WITHDRAW FUNDS FROM BANK ACCOUNTS,
AND TO DESIGNATE DEPOSITORIES (contd)**

BE IT FURTHER RESOLVED, That the Vice President for Business and Administration and/or Treasurer be authorized, on behalf of The Ohio State University and in its name, to sign checks, drafts, notes, bills of exchange, acceptances or other orders for the payment of money from said accounts; to endorse in writing or by stamp checks, notes, bills, certificates of deposit or other instruments owned or held by this University for deposit in said accounts or for collection or discount by said banks; to accept drafts, acceptances, and other instruments payable to said banks; to waive, demand, protest, file notice of protest, or dishonor any check, note, bill, draft or other instrument made, drawn or endorsed by the University.

Upon motion of Ms. Casto, seconded by Mr. Berry, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

REPORT - EXPENSES FOR DESIGNATED ADMINISTRATIVE OFFICIALS

Resolution No. 89-34

Synopsis: Approval for reimbursement of expenses for designated administrative officials is requested.

WHEREAS the Fiscal Affairs Committee has authorized the payment of expenses for designated administrative officials; and

WHEREAS it is deemed in the best interest of the University for the Fiscal Affairs Committee to provide from the unrestricted gifts to the University Endowment Fund on an appropriate basis, to the President and designated University officials, reimbursement for expenditures which are directly and necessarily related to the performance of their assigned responsibilities and in the best interest of the University:

NOW THEREFORE

BE IT RESOLVED, That the Fiscal Affairs Committee be authorized to provide reimbursement to designated University officials from unrestricted gifts to the University Endowment Fund.

Upon motion of Mr. Kessler, seconded by Mr. Teaford, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

**AUTHORIZATION FOR THE TREASURER OF THE UNIVERSITY TO SERVE
AS TRUSTEE FOR UNITRUSTS AND ANNUITY TRUSTS**

Resolution No. 89-35

Synopsis: The reaffirmation of Board of Trustees Resolution No. 77-22 (September 10, 1976) which authorized the Treasurer of The Ohio State

September 1 and 2, 1988 meeting, Board of Trustees

**AUTHORIZATION FOR THE TREASURER OF THE UNIVERSITY TO SERVE
AS TRUSTEE FOR UNITRUSTS AND ANNUITY TRUSTS (contd)**

University to serve as Trustee for Unitrusts and Annuity Trusts is requested.

WHEREAS The Ohio State University Development Fund has requests from potential donors for the University or its designee to serve as Trustee of charitable remainder unitrusts or charitable remainder annuity trusts, in order to minimize the expense of the trust by not having a bank serve as Trustee:

NOW THEREFORE

BE IT RESOLVED, That the Treasurer of The Ohio State University be and he is hereby authorized to serve as Trustee for any charitable remainder unitrust and charitable remainder annuity trust in which The Ohio State University is the charitable remainder beneficiary; and to execute as Trustee and on behalf of the University, any and all documents approved by University legal counsel, which are required to complete such gifts.

Upon motion of Mr. Berry, seconded by Mrs. Bowser, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

**APPOINTMENT OF TRUSTEES FOR POOLED
INCOME TRUST FUNDS I, II, III AND IV**

Resolution No. 89-36

Synopsis: Appointment and reconfirmation of Trustees for Pooled Income Funds I, II, III and IV are recommended.

WHEREAS the Board of Trustees by actions of December 4, 1970, September 10, 1976, September 7, 1979, and November 4, 1983, established Pooled Income Funds I, II, III and IV as convenient means for University benefactors to contribute financial support to the University and at the same time retain income during their lifetime; and

WHEREAS since that time the Board has appointed individuals to serve as Trustees for Pooled Income Funds I, II, III and IV:

NOW THEREFORE

BE IT RESOLVED, That Michael D. Fellows, Weldon E. Ihrig and James L. Nichols are hereby nominated and appointed to serve as Trustees for donors transferring property to the University's Pooled Income Funds I, II, III and IV; each to serve at the pleasure of the Board of Trustees of the University in accordance with the terms of the instruments establishing Pooled Income Funds I, II, III and IV.

Upon motion of Mr. Wolf, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

September 1 and 2, 1988 meeting, Board of Trustees

PROCEDURE FOR SELECTION OF STUDENT TRUSTEES

Resolution No. 89-37

Synopsis: Approval of the procedure for the selection of student trustees is proposed.

WHEREAS the Ohio Legislature has amended Ohio Revised Code Section 3335.02 (A) and enacted Section 3335.02 (B) for the inclusion of students on the Board of The Ohio State University; and

WHEREAS The Ohio State University, through this Board, the administration and student leaders has developed appropriate procedures for the implementation of the State's student trustee plan; and

WHEREAS these procedures will provide the foundation for the orderly installation of Student Trustees on this Board:

NOW THEREFORE

BE IT RESOLVED, The annexed procedures for nominating students to serve on The Ohio State University Board of Trustees be approved.

Upon motion of Mr. Teaford, seconded by Mr. Wolf, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

THE OHIO STATE UNIVERSITY
OFFICIAL PROCEEDINGS OF THE
ONE THOUSAND TWO HUNDRED AND FORTY-FIFTH MEETING
OF THE BOARD OF TRUSTEES

Columbus, Ohio, October 6 and 7, 1988

The Board of Trustees met at its regular monthly meeting on Thursday, October 6, and Friday, October 7, 1988, at The Ohio State University Fawcett Center for Tomorrow, Columbus, Ohio, pursuant to adjournment.

* * *
Minutes of the last meeting were approved.
* * *

October 6 and 7, 1988 meeting, Board of Trustees

The Chairman, Mr. Immke, called the meeting of the Board of Trustees to order on October 6, 1988, at 6:30 p.m. He requested the Secretary to call the roll.

Present: Leonard J. Immke, Chairman, Shirley D. Bowser, Hamilton J. Teaford, John J. Barone, Deborah E. Casto, and John W. Kessler.

The meeting recessed into Executive Session for the purpose of considering legal issues and personnel actions as follows: faculty/staff appointments and reappointments, resignations and terminations, leaves of absence without salary, professional improvement leaves, promotions/tenure, emeritus titles, and medical staff appointments/reappointments.

Upon motion of Mrs. Bowser, seconded by Ms. Casto.

--0--

Mr. Immke reconvened the meeting on October 7, 1988, at 9:30 a.m.

Present: Leonard J. Immke, Chairman, Shirley D. Bowser, Hamilton J. Teaford, John J. Barone, Deborah E. Casto, John W. Kessler, and Leslie H. Wexner.

--0--

Mr. Immke: Dr. Brand, would you please introduce Dr. Huber.

Dr. Brand:

Thank you, Mr. Chairman. Using, as a point of departure, a discussion I had with Mr. Teaford and Mrs. Bowser, the idea occurred that it would be good to have the deans of our colleges come forward to describe programmatically what is being accomplished in the colleges now. And also, to talk about the future planning for the colleges. This is an eminently good idea, and I have taken the liberty to begin that process.

I have invited Dean Joan Huber here today. She is the Dean of the College of Social and Behavioral Sciences, as well as the Coordinating Dean for our five Arts and Sciences Colleges. Let me tell you a little bit about Joan. She has Ohio roots. She was born in Bluffton, Ohio, and her father was a Ph.D. Entomologist with the Agricultural Experiment Station at Wooster. While Joan was in high school, she was captain of the debate team and editor of the school paper, and as a sophomore, placed first in the state world history exam. She is quoted as saying about that accomplishment that it was... "Owing to having a brilliant teacher supply me with the right books and to having acquired a bad case of flu three weeks before the exam so that I had plenty of time to study."

Joan completed her undergraduate education in two years. With evident academic talent, she was admitted to do graduate work at Radcliffe; however, she decided to marry and raise a family. At this point, she also taught at Penn State University in the German department. She said of her experience in teaching German that she learned in the process that, "I did not want to spend the rest of my life teaching the German subjunctive -- it

October 6 and 7, 1988 meeting, Board of Trustees

Dr. Brand: (contd)

changes, but not so fast that you'd notice in your own lifetime." Joan then returned to school and received a Ph.D. from Michigan State in Sociology in 1967. Since that time, she has truly an amazing record of accomplishments in the field of sociology. She is -- and I won't give you the names -- on more editorial boards than I have ever seen. I don't know how she does it all. She is presently President of the American Sociological Association, a three year term starting in 1987. That is the professional organization for sociologists in America. She is the author of numerous books and articles -- the most recent book being, Sex Stratification, Children, Housework, and Jobs.

If I might, let me give a few descriptions of Joan as reported by her colleagues in Sociology. This is from a forthcoming article on Joan. She is described as bright, trenchant, a model of professionalism, coin of the realm, and a pioneer of our discipline. Joan Huber is doing a magnificent job with the College of Social and Behavioral Sciences and I would like to give her this opportunity to talk a bit about the College. Joan, please --

Dr. Joan Huber:

Thank you, Myles. I always have a little difficulty believing all that stuff is about me. In any case, I'm very glad to be invited to be here to tell you something about the College of Social and Behavioral Sciences. And in order to enable you to understand this as clearly as I would like you to, I'm going to have to put it in the context of what kinds of things have to happen at a University to enable any dean to be able to brag in anyway about a college. Because a lot of things have happened at Ohio State that have gone the right way in the last few years, and it's made all the difference in the world.

I did not know when I planned to talk about this that you would already know that I was an Ohio native and grew up in a very Ohio State family. I can remember my father saying one time, "They have 10,000 students down there now, that's too big." In any case, my inoculation with Ohio State fever took and I always grew up understanding the importance of beating Michigan. However, after a while I began to ask myself why was it that it was only on the football field that we ever beat Michigan. Now it's true that Michigan is publicly supported and we're land grant, and I have heard people say "Oh, when you're land-grant you have these other obligations and you can't etc., etc., etc." Well, I came here from Illinois at Urbana, which was also land grant, and I'll tell you it didn't get in their way. Well, right now they have some other problems, but it's not because they're land grant. The University of Wisconsin is land grant and it manages to have top departments. Well, I was the Chair of the Sociology Department at Urbana and like most women chairs -- and there aren't very many, and this is why the event occurs -- I had plenty of opportunities to apply for this, that, and the other, because somebody always says, "Oh, we have to have a woman on the list." I always turned those opportunities down. I was not interested in leaving Illinois. It was really a great

October 6 and 7, 1988 meeting, Board of Trustees

Dr. Huber: (contd)

university with a great library, etc., and I was very happy being a department chair. One of my friends from Ohio State called up and said "Oh, Joan, please send in your vita, we need a woman's vita." I said I didn't want to be a dean and I said if I did, why would I want to come to Ohio State? Well, she persisted. So I came for a first interview, and I went back and I said to my friends, "Don't worry, I'm not going to go there." And then I came for the second interview, and something funny happened. I interviewed with Ed Jennings and I had long talks with the Provost, Dieter Haenicke, and I asked them why Ohio State hadn't lived up to the potential that it really had. And I got some good answers. I went home and in the first twenty-four hours after I left here, after that second visit, something funny happened. I heard the drums beating and I knew it was time to march. So I came here.

Well, what was here. The departments of Anthropology, Communication, Economics, Geography, Journalism, Political Science, Psychology, Sociology, and now the Division of Speech and Hearing, and the Lantern. You know, I feel sorry for the people in Journalism. You know the rest of us, when we have students that aren't quite as bright as we would like and they do some dumb things, only the professor knows about it. But if you're in Journalism, everybody knows about it. And they come up and tell Walter Bundy and they make jokes about it. Poor Walter Bundy, who is Director of the School, comes to the executive committee meeting of the College -- well, it's very painful. We all have mixed vibes about journalists, I'm sure. But anyway, the Center for Human Relations Research, a great big research organization that in its salad days brought in \$4,000,000 a year, now it's down to \$2,000,000, but it's still a lot of money. Why was it this particular set of colleges? Well, the answer goes back to William Oxley Thompson, who in 1909 was afraid that a very populous legislature was going to harm his "theoretical disciplines." So, he stuck his theoretical disciplines in applied colleges. Psychology was in the School of Education, Sociology, Anthropology, Economics, and Geography were all in the School of Commerce and so on, and so on. In 1969 there was a big reorganization and they chopped-up what normally at a smaller university would be Arts and Sciences into five hunks that really make a lot of sense. And in my view it was a very good thing doing the chopping-up. At Illinois for example, we had a College of Arts and Sciences with 96 units reporting to the Dean and that's too much. So that's why we're chopped-up the way we are.

How good were the units in my College when I came here? Well, I'll have to tell you a little bit about the ranking system of the National Academy of Science. It has some good points, it has some bad points, but on the whole its good points outweigh its bad points. The National Academy of Science conducts a survey every so many years. They don't tell you when. I mean the next one is supposed to be in 1992, but the last one was published in 1983. They rank university departments as well as entire universities on the basis of a whole lot of different criteria. The most important single criteria I think is the

October 6 and 7, 1988 meeting, Board of Trustees

Dr. Huber: (contd)

ranking of faculty quality. O.k., there's a time lag in these things. For example, if I hired Einstein, Newton and Aristotle tomorrow, it would take about five years for my colleagues across the country to learn that I'd managed to bring this off. On the other hand, if I had already hired them twenty years ago and Berkeley or Chicago got them, it would take about five years for everybody to learn that they'd actually gone. So you can benefit and disbenefit from these lag effects. In any case, Ohio State did not do as well on these National Academy ratings as I would like. The two highest ranking departments in the University were Chemistry and Geography. Geography is, of course, in my College. Psychology was another of the very high ranking departments. But on the whole, we had too many departments that ranked around the medium. Now you can say you don't believe the rankings. Well, you can say you don't believe anything, but I mean this is what passes for university rankings nation-wide. You may not like it, but other people are going to believe them, especially the people at Harvard, Columbia, Berkeley, Indiana, Illinois, and Wisconsin that benefit from these rankings. In short, they did better than we did. As you can tell, I'm nothing if not competitive.

How do you improve a college? Well one way is to have lots of dollars from the top. I mean everybody knows this and faculty, especially weak faculty, can think of nothing else. "The department of so and so would be marvelous, if only we didn't have such a dumb dean, such a dumb provost, and such a dumb president. They will not shower money upon us, and that's why we're so bad." Well pooh on that! I mean money does help, but there are things you can do without money and one of them is to be careful who you hire and terminate your mistakes. Terminating your mistakes is very, very painful. I mean most of these people are the salt of the earth and you live with them as colleagues every day. You grow fond of them and then to say at the end of six years, or whatever, sorry chum you don't measure up. If you think that doesn't hurt -- well, it does hurt a whole lot and it takes guts to do it. In the 1960's and early 70's, when the academic labor market turned around, this is what departments at Illinois and Wisconsin and Indiana were doing and we didn't do enough of that here in enough of our departments.

Another thing you need to do to make a college great is to get more research dollars. This is true of any college any where, any time, because great national universities are dependent on producing knowledge not just transmitting it to students. Now in order to turn a university around, you need a whole bunch of different people in place at the president's level, the provost's level, at every level, so that they are all pushing in the same direction. And Ohio State had that when I came here. It had Ed Jennings. It had Dieter Haenicke, and now it has Myles Brand. So the deans have support going right to the very top to make this a world class university.

Some of the things that we have been able to do in our College in the last couple of years -- for example, we now have the American Political Science Review in the Political Science Department. This is the flagship journal in political science

October 6 and 7, 1988 meeting, Board of Trustees

Dr. Huber: (contd)

published by the American Political Science Association. We have the same thing going with the American Sociological Review in the Department of Sociology. These are things that are coin of the realm in telling other people in one line how a department has changed and how good it is.

But I want to tell you specifically about two opportunities that we've been able to make use of in our College that have enabled the College to make some real strides recently. Both of these opportunities have their background in the computer revolution. This is quite natural and it's probably going to go on. You know the social sciences had their origin in the industrial revolution. The social sciences emerged, unlike the humanities which have been with us for thousands of years, when the pace of social change became so fast -- owing to changing technology -- so fast that the old explanations of how did it come to be so -- who is rich, who is poor, who is the king, who is this, who is that -- those answers simply wouldn't do. And Economics, Sociology, Political Science sprang into being as intellectual attempts to answer those kinds of questions. Now it's therefore not surprising that the computer revolution is changing the face of social science; because other things being equal, if you're going to be good at social science, you've got to be able to count. And what computers enable you do is to count better. Well, the first thrust is in geographical information systems and it occurs in the Department of Geography. The background in Geography had been established twenty-five years ago when Geography very fortunately got a chair, imported from Northwestern, who was of a very quantitative turn of mind, and made our Geography department the most quantitative Geography department in the country. That was one reason that Geography, like Chemistry, was one of the two top ranking departments at Ohio State. This is what enabled them really to do quality work and become visible.

Now what the computer revolution did was to enable the very rapid processing of information, combining data with geographic locations. You can go and look at one of these computers and watch one of these wizards punch buttons and right before your eyes you see this map and then they superimpose vegetation on it, then they superimpose something else on it, and on and on. It has terrific practical applications. For example, one guy in the Geography department -- well, he's now an Associate Provost. The Provost does tend to pick the best people out of these places because he wants good people, too. Anyway this guy's still an active scholar and of course that really helps him in his job in the Provost's office, too. He's studying Brazil because Brazil's agriculture has the potential of destabilizing world agricultural. They are, of all things -- I didn't know this until two days ago -- in soy bean production. Imagine Brazil -- you know, the home of the Mumba, the Rumba or whatever, Carmen Miranda -- producing soy beans. I mean it makes them sound like Ohio or something. You can develop this information so rapidly that you can get answers to questions that heretofore were unanswerable.

October 6 and 7, 1988 meeting, Board of Trustees

Dr. Huber: (contd)

And in passing, let me give you one other example of the kind of thing a computer makes possible in the social sciences. The National Longitudinal Survey of Labor Force Experience now has data on children at time one and time two -- that is, children born to mothers who were interviewed in 1967. For the first time we will have an enormous data set permitting answers to questions on child outcomes. What kind of a home background produces this kind of child. We haven't been able to answer that question before because we had small samples -- you know geographically based, that sort of thing. In any event, this geographic information system thrust started in our Department of Geography in the 1960's. A guy named Hal Mollering was developing it. He was the first one to teach courses in it, but the real effort to get into this area came with an impetuous from the Office of the Provost. And it was because, not surprisingly, a great deal of federal money is available for this kind of thing in Washington.

It was the stimulus of the Provost that got the Department of Geography unanimously to go ahead and hire the number two man in geographic information systems in the United States. I regret to say we made an offer to number one -- I'll be quite honest with you, we lost number one. Those things do happen, but we got number two and that's given us a great push ahead in this particular area. What geographical information systems is doing is forcing universities into consortiums. We're in one with Penn State and Maryland because of the cost of this kind of thing. No one university can bear it alone. It's forcing disciplines to cross lines and merge also because of the cost. You know you can piously say we need more inter-disciplinary this and we need more inter-university cooperation, but there's nothing like the bottom line of dollars to bring this about. When people have to do it, they finally will cooperate. It's very encouraging.

A similar thrust has been going on in the Department of Psychology. And this again goes back to the computer. The computer has permitted a line of inquiry called artificial intelligence -- trying to get the machines to do what we're capable of doing up here. The trick is to get a computer to do these kinds of things and then test it to see whether or not these kinds of events really occur with human beings. Because there's a possibility that the human brain doesn't work like a computer at all. We simply don't know the answer. And yet, using the computer for this sort of thing has enabled a great step forward. Well, a couple of years ago we hired a new chair in Psychology. He came with a reputation for being able to build excellent departments. Our Psychology department had long been one of our greatest departments. But it had gone through some bad days in the 1960's and 70's when money was especially short in Ohio. It lost some real luminaries and it never replaced them. So, it was sort of living on the glories of its past and needed to be pushed ahead. Anyway, the guy who came here to be chair had it in his head that he wanted to move ahead in cognitive psychology, which is psychology's contribution to this whole cognizant science thrust. Well, it so happened that at the time he came here we got a new Provost, and guess what

October 6 and 7, 1988 meeting, Board of Trustees

Dr. Huber: (contd)

should be in his head but an idea of cognizant science thrust for the entire University. It worked like electricity. It's been a marvelous boost for the Department of Psychology.

What I have to emphasize here, though, is the willingness of people in upper administration to let people at the department level take advantage of these developments and move ahead at the right place at the right time and with the right amount of money. We don't always get all the money we want. But whenever our College has somebody who is really great that we want to hire, we have never been turned down by Bricker Hall -- even through good times and bad.

I'll close and give you just a one liner to show you how far we've come. This last year the Department of Psychology hired two people. They were faculty members at Iowa which has been raided -- oh boy, have we ever raided Iowa -- and they both had offers from Berkeley. The Psychology Department at Berkeley has never had a turndown from anybody to whom it made an offer and these people turned down Berkeley and they came here. I understand that the Department Chair at Berkeley was devastated. When I heard this news, I hauled out my Kleenex box and I delicately wiped my eye. So in one line I will tell you we've got to be doing -- I do think by the way that housing costs in Columbus were helpful -- nevertheless, this was the first time that Berkeley ever lost anybody in psychology to whom it made an offer. And it says something for us and our College when we're able to make that kind of offer. Thank you, very much for your time. I hope I haven't exceeded it. I will now shut up, but I would be open for questions if you have any and if there's time.

Mrs. Bowser:

I wouldn't want to compete against you. It's wonderful, your enthusiasm, your command, your intelligence, and your ability.

Dr. Huber:

Well, this is a great university.

Mrs. Bowser:

It is a great university.

Mr. Wexner:

I'm very curious if you have any insights for us, in terms of views on how do we beat the Michigans of the world? One of my concerns as a Trustee is that we begin to think in longer range terms, supporting the Colleges such as yours. We can play a more direct role in supporting your good work. I think getting an insight into your will to win and seeing that you have a vision of success is encouraging. I think we could learn by getting counsel from you on how we can be specifically more supportive.

October 6 and 7, 1988 meeting, Board of Trustees

Dr. Huber:

I don't know enough about the constraints on what you can do, and I know there are plenty. Well, for one thing, were I God, I would provide a better tax base for the University through the legislature. But I'm not God, so I leave that to President Jennings. However, the most important thing to do is back the hiring of top people, and simultaneously we have to keep communicating to faculty that they have an ongoing obligation to get outside research funds and to be willing to terminate those members of their department who didn't do very well. Now, of course, you can't interfere in that kind of thing. You'd make the Lantern, or something like that, with unfavorable publicity.

Mr. Wexner:

Let me respond. I was listening attentively to what you said specifically the last two statements. The Board of Trustees is an effective lobbying force. If we decide collectively or individually we're going to devote our time and resources to lobbying the legislature in support of what the President is doing, I don't think that would be a negative for the University.

Dr. Huber:

That would be very helpful.

Mr. Wexner:

So we can do or attempt to do almost anything. In the area of faculty and how we look at faculty, I would not be bashful to want to review compensation on a College basis and look at turnovers and ratings. I think there are interesting statistics that we could see. I agree with you that the national ratings aren't perfect, but as you were speaking I made a note. I'd be piqued to see a college that rated poorly and then to see what its turnover is like. We have no turnover and we're rated at the bottom. I think that's a good question for me to ask the President and Trustees at a meeting such as this where Deans of the Colleges are coming -- to find out how you are rated, how you think about rotating your staff, and how many positions are you recruiting for, because these aren't Star Wars kinds of questions.

Dr. Huber:

No.

Mr. Wexner:

But it's insightful. Because you know a lot more about how to do your job than I know about how to do my job in relationship to the University.

Dr. Huber:

I think the Board of Trustees could be most helpful if it could persuade the legislature that for Ohio State to be a world class

October 6 and 7, 1988 meeting, Board of Trustees

Dr. Huber: (contd)

University, it is going to take a somewhat higher level of support than we have had in the past. And I think it would be helpful if the Board of Trustees truly communicated that we should be a world class University. You know, when I was recruited here the recruitment literature I got said Ohio State is the preeminent university in the State of Ohio. Well, ho, ho, ho. Of course it is! I mean with our size we could squash anybody else. Just with sheer numbers if nothing else. And that's not the right aspiration and I think the legislature should be persuaded that that's the wrong aspiration. I mean Illinois and Wisconsin didn't get great because they wanted to be the greatest thing in Wisconsin, or on the plains of Illinois, or something like that. We have to aspire to be world class and I'm not saying that money can do everything. Nevertheless, there are things that you can't do without money, particularly now that the cost of hiring new people has gone up terrifically because of the cost of supporting them with equipment. The equipment when you hire Nobel Prize -- I forget what it cost to hire our Nobel Prize winner and equipment, but you know you just sort of shutter. Well -- or the Provost shutters for us. Someone has to shutter. But the legislature has to be convinced that this is the kind of hire we should be making. I was just elated when we got a Nobel Prize winner, because that's the kind of one liner you don't have to explain to anybody why it's an important hire. But those kinds of hires cost a lot of money. And I really think that the State of Ohio is not as convinced as I would like to see it convinced that a world class university will help Ohio -- will help the entire state. And I don't want to sell the University -- you know you can't have economic recovery, if you don't have Ohio State being a world class university. How would I know, maybe you can. But you will certainly make it a better place to live by having a great State university. Well, as you can see, I'm very biased.

Mr. Barone:

Your enthusiasm is wonderful. I think it has affected us.

President Jennings:

I think it's important also to emphasize that it does work both ways. One of the things we will be active with is persuading the General Assembly this year on support. But it does work both ways. What we need also to do, if you remember what Joan said, is that we are as good as the faculty we bring in and keep. Those young faculty will be our reputation twenty-five years from now. The critical thing that all of us can do is to support these deans and department heads in insisting that we hire the very best, as defined external to the University, so that somebody at Berkeley is saying, "Yes, they're making good hires" or somebody at Michigan saying, "Yes, they're making hires." We must be certain we have an efficient and active tenure and promotion process so that when we do make mistakes, we can correct those mistakes and get on from there and provide the support to these young people.

It's true we'll hire a Nobel Prize winner once in a while. The

October 6 and 7, 1988 meeting, Board of Trustees

President Jennings: (contd)

key thing thirty years from now is if Cornell is hiring our Nobel Prize winner. That's why I keep insisting the most significant activity of last year, in terms of faculty, was the five Presidential Young Investigator Awards. And in terms of long term effect, if we get the reputation that we're supporting those young faculty and they're able to compete at that level, then it will catch up. There will be a lag. I have no doubt that today Ohio State is far better in terms of quality than its reputation. I also have no doubt that there are other institutions who are far worse than their reputations. These things do take time, but the key is to get the support and then support these deans and department heads in the hiring and promotion decisions -- that is so critical -- and support the ones that are providing evidence that they are doing their job. One of the reasons Social and Behavior Science does get so much relative support is because we know that those hiring decisions are being done well, and the promotion and tenure decisions are being done well from outside evidence. Not them coming and saying, "we're great." Let me hear what the department says about our folks. There's no question in our industry that the Berkeley example reverberated through the entire psychological community across this nation. There is no doubt everybody in psychology said ah, ha, something is going on at Ohio State. It wasn't just Berkeley that was wringing their hands. It was everybody in the country. And that's where we've got to support our people.

Mr. Teaford:

I think too, Mr. President, that the significant hires are not just because of the President and Provost, good as they are, but because of outstanding Deans, as well. I think you share in that credit.

President Jennings:

That's right. Thank you, Joan. We appreciate your help.

Mr. Immke:

Mr. Teaford, would you present the Foundation Board report.

Mr. Teaford:

At long last I make a report on the Foundation Board Meeting which was held on Friday, October 7, 1988. I think you're pretty much up-to-date on the Campaign, but at the end of September 1988, the Campaign stands at \$316.2 million, which is 90% of the \$350 million goal. And as you know, we've only completed three of the five years of that. In fact, you may know Douglas Olson, President and Chief Executive Officer of Battelle, was elected for a three year term to the Foundation Board. The Board also reelected Charles Carlson, John Drinko, Richard Leets, John Kessler, John B. McCoy and R. David Thomas to seats on the Board. President Jennings announced that Frederick Ruffner has stepped down as Chair of The Ohio State University Campaign. Mr. Ruffner will continue as a member of

October 6 and 7, 1988 meeting, Board of Trustees

Mr. Teaford: (contd)

the National Campaign Steering Committee. Richard H. Leet, Executive Vice President of Amoco Corporation in Chicago, has assumed the Campaign Chair. I personally think it is very significant that the Campaign Chair is now someone in Chicago and outside of Ohio, because I think that the next phase of the Campaign is the emphasis outside of Ohio. I think that's very important for us.

Major points of discussion during the Board meeting included Dr. Richard Keates recommendation on behalf of the Laser Subcommittee that the Foundation Board to encourage and support the creation of a Laser Institute at Ohio State, similar in concept to that of the Beckman Laser Institute at the University of California in Irvine. This suggestion is for another inter-disciplinary institute and what the doctor has done is ask that the University decide if that's something they want, and then the Laser Committee of the Foundation Board will go out and find us the money.

Mr. Leet reported that with the Campaign dollar goal so nearly achieved, the National Campaign Steering Committee discussed the need to focus on other goals of the campaign: expanding the University's regional efforts, increasing the role of volunteers, particularly outside of central Ohio, and increasing corporate and foundation involvement in support of the University. The Chair of the Foundation Board will appoint a Corporate Foundation Subcommittee to develop, with the Development Office of Corporate Foundation Relations, a proposal to focus on identification and appropriate solicitation of major corporations and foundations. Mr. Chairman, that completes my report.

Mr. Immke:

Any questions? Thank you, very much. Mr. Barone, you have the report on the Research Foundation.

Mr. Barone:

Mr. Chairman and Board Members, The Research Foundation grants and contracts for the month of August 1988 are shown in the Board Agenda book. We have them there and I think it would be nice if the Board Members once in awhile would go through the entire agenda. There are 135 awards listed which provide a gross income of \$14.18 million. Funding for the first two months of the fiscal year (July 1, 1988 to August 31, 1988) is 4% lower than the first two months of the last fiscal year. Given displacements of major awards and the end of the U.S. Government's fiscal year on September 30 funding levels should now be stabilizing and clearer patterns of growth should be emerging. Some highlights of the awards are:

\$125,000 - Award from the Ohio Department of Development to Robert E. Bailey, Department of Mechanical Engineering, to support the technical assistance network of the Ohio Technology Transfer Organization (OTTO).

October 6 and 7, 1988 meeting, Board of Trustees

Mr. Barone: (contd)

\$107,000 - Award from the Office of Naval Research to Laszlo Adler, Welding Engineering, to support research on the investigation of ultrasonic wave interactions.

\$103,000 - Award from the National Institute of Child Health and Human Development to Donald O. Parsons, Department of Economics, to study teenage decision-making on schooling and fertility.

\$95,000 - Award from the Ohio Board of Regents to Janet Tarino, Chemistry, Mansfield Campus, to train high school teachers in laboratory-based science.

\$25,000 - Award from the National Science Foundation to Paul A. Colinvaux, Department of Zoology, to reconstruct the environmental history of the Isthmus of Panama.

That completes my report on the Research Foundation. Thank you.

Mr. Immke:

Mr. Teaford, I guess we're back to you on the Hospitals Board report.

Mr. Teaford:

The Hospital Board also met last week on September 29 and we were pleased to welcome Mrs. Judy Barker from the Borden Corporation, and Mr. William Bennett from Bank One as new members of that Board. During the course of our meeting we covered a wide range of issues including quality assurance, risk management, and medical staff credentialing. Having reviewed protocols for human subject research at a previous meeting, we asked for and received a report on standards for medical research using animal subjects. We received a report from Dr. Mekhjian, the Hospitals' medical director, on actions being taken to ensure that ambulatory surgery is carried out as efficiently as possible. Ambulatory surgery means outpatient surgery. That's one of the things I've learned. We know the quality of medical and nursing care remains very high, and actions being taken are intended to avoid any delays or inconvenience to our ambulatory surgery patients.

Although trends are difficult to identify early in the fiscal year, the financial report through the month of August provided positive indications in the numbers of admissions, patient days, Clinic and Emergency Room visits. The average daily census of 658 was the highest in more than a year. The Medicare case mix index, which is tied to reimbursement rates, was the highest ever experienced. That means we're getting more out of Medicare than we have in the past. In this current system of DRG's that's a very significant fact.

We learned that progress is being made in our efforts to develop a centralized billing system. This is a very complex process, but we are confident we can produce a single collated bill to patients without disrupting revenues to the clinical departments. As an aside, I am meeting next week with Dr.

October 6 and 7, 1988 meeting, Board of Trustees

Mr. Teaford: (contd)

Senhauser who is head of that committee and I am keeping my trust with our former Chairman that I will help get that moved ahead and I think it is moving.

Vice President Jackson and Dr. David Schuller reported recent developments with regard to construction and operation of the Cancer Hospital and Research Institute. Mr. Buchanan gave a report on the status of the Medical Center's development program. Dr. Kevin Murray gave a most interesting presentation on the use of the Jarvik artificial heart to maintain patients awaiting a human heart transplant. I might say in that regard that one of the most exciting things about being on that Board is that there is almost always a presentation of things that are going on at the Hospital. They are always about things that are on the leading edge of developments in health care and they are very exciting things to hear. Mr. Chairman, that completes my report.

Mr. Immke:

Thank you, Mr. Teaford. That concludes our committee reports.

--0--

DISTINGUISHED SERVICE AWARD

Resolution No. 89-40

Synopsis: Recommendation for an individual to receive a Distinguished Service Award is proposed.

WHEREAS the President's Staff, serving as a Committee on Distinguished Service Awards, has nominated and recommended an individual for approval by the Board of Trustees to receive the Distinguished Service Award at a time convenient to the University and the recipient:

Ilseadore M. Edse

and

WHEREAS this award is given in recognition of distinguished service to The Ohio State University and the award is in accordance with action taken by the Board of Trustees in 1952:

NOW THEREFORE

BE IT RESOLVED, That the Distinguished Service Award be approved for awarding as designated above.

Upon motion of Mrs. Bowser, seconded by Mr. Teaford, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

October 6 and 7, 1988 meeting, Board of Trustees

PERSONNEL ACTIONS

Resolution No. 89-41

RESOLVED, That the personnel actions as recorded in the Personnel Budget Records of the University since the September 2, 1988 meeting of the Board, including the following Appointments, Appointment of Chairperson of Department, Leaves of Absence Without Salary, Leave of Absence Without Salary--Continuation, Professional Improvement Leave, Professional Improvement Leaves--Change of Dates, and Emeritus Titles as detailed in the University Budget be approved.

Appointments

Name: CHARLES F. HERMANN
Title: Acting Vice Provost
Office: International Affairs
Effective: August 1, 1988
Salary: \$94,080.00
Present Position: Director, Mershon Center and Professor, Department of Political Science

Name: JOSEPH J. KRUZEL
Title: Acting Director, Mershon Center for Education in National Security
Effective: August 1, 1988
Salary: \$47,380.00
Present Position: Associate Professor, Department of Political Science

Appointments

Name: RENE M. STULZ
Title: Professor (Meshulam Riklis Chair in Business and Its Environment)
College: Business
Effective: October 1, 1988
Salary: \$91,920.00
Present Position: Professor, Academic Faculty of Finance

Appointment of Chairperson of Department

October 1, 1988 through September 30, 1992

Communication

Joseph M. Foley

Leaves of Absence Without Salary

CHARLES L. BABCOCK, Professor, Department of Classics, effective January 1, 1989 through March 31, 1989, to accept an appointment as Acting Andrew W. Mellon Professor-in-Charge of the School of Classical Studies of the American Academy in Rome.

DAVID N. MILLER, Associate Professor, Department of Judaic and Near Eastern Languages and Literatures, effective Winter Quarter 1989, to be a Visiting Professor at Shanghai Teacher's University in the People's Republic of China.

October 6 and 7, 1988 meeting, Board of Trustees

PERSONNEL ACTIONS (contd)

Leaves of Absence Without Salary (contd)

JUNKO SHIGEMITSU, Associate Professor, Department of Physics, effective Autumn Quarter 1988, to do work at the Fermi National Accelerator Laboratory in Batavia, IL.

BRADLEY F. ARMENDT, Assistant Professor, Department of Philosophy, effective Autumn Quarter 1988, to teach at the University of Rochester, Rochester, NY.

CAROL A. BLACKSHIRE-BELAY, Assistant Professor, Department of German, effective Autumn Quarter 1988, Winter Quarter and Spring Quarter 1989, to do post-doctoral research work at the University of Pennsylvania.

XIAOMEI CHEN, Assistant Professor, Department of East Asian Languages and Literatures, effective Autumn Quarter 1988, for personal reasons.

JOYCE F. KIRK, Assistant Professor, Department of Black Studies, effective Autumn Quarter 1988, Winter Quarter and Spring Quarter 1989, to accept a DuBois-Mandela-Rodney Postdoctoral Fellowship at the University of Michigan.

YOSHIKO MATSUMOTO, Assistant Professor, Department of East Asian Languages and Literatures, effective Autumn Quarter 1988, for personal reasons.

JAMES M. PEARCE, JR., Assistant Professor, Department of English, effective Winter Quarter and Spring Quarter 1989, for personal reasons.

P. SADAYAPPAN, Assistant Professor, Department of Computer and Information Science, effective Autumn Quarter 1988, and Winter Quarter 1989, to complete research at AT&T Bell.

ALLAN J. SILVERMAN, Assistant Professor, Department of Philosophy, effective Autumn Quarter 1988, Winter Quarter and Spring Quarter 1989, to accept a Junior Fellowship at the Center for Hellenic Studies in Washington, DC.

SABRA J. WEBBER, Assistant Professor, Department of Judaic and Near Eastern Languages and Literatures, effective Autumn Quarter 1988, Winter Quarter and Spring Quarter 1989, to accept a Rockefeller Residency Fellowship at Washington University, St. Louis, MO.

Leave of Absence Without Salary--Continuation

CLAIRE C. ROBERTSON, Associate Professor, Department of History and Center for Women's Studies, effective Autumn Quarter 1988, to continue research in Kenya, East Africa, on a Fulbright Grant.

Professional Improvement Leave

JOHN D. BONAGURA, Associate Professor, Department of Veterinary Clinical Sciences, effective January 1, 1989 to October 1, 1989.

October 6 and 7, 1988 meeting, Board of Trustees

PERSONNEL ACTIONS (contd)

Professional Improvement Leaves--Change of Dates

LOREN V. GEISTFELD, Associate Dean, College of Home Economics, change leave from September 1, 1988, through June 15, 1989, to September 1, 1988, through May 31, 1989.

PATRICK C. MCKENRY, Professor, Department of Family Relations and Human Development, change leave from September 1, 1988, through June 8, 1989, to September 1, 1988, through May 31, 1989.

Emeritus Titles

FRANCILLE M. FIREBAUGH, (amendment to emeritus title), Office of International Affairs and Department of Family Resource Management, with the title Vice Provost and Professor Emeritus, effective August 1, 1988.

C. GREY AUSTIN, Office of the President, with the title Ombudsman Emeritus, effective September 1, 1988.

DARYLE H. BUSCH, Department of Chemistry, with the title Presidential Professor Emeritus, effective August 1, 1988.

ROBERT CANZONERI, Department of English, with the title Professor Emeritus, effective January 1, 1989.

DAVID A. GRIFFIN, Department of Romance Languages and Literatures, with the title Professor Emeritus, effective July 1, 1988.

DARYL S. SHOEMAKER, Cooperative Extension Service, with the title Associate Professor Emeritus, effective September 1, 1988.

DALE T. BONNETT, Cooperative Extension Service, with the title Assistant Professor Emeritus, effective October 1, 1988.

Upon motion of Ms. Casto, seconded by Mr. Teaford, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

RESOLUTIONS IN MEMORIAM

Resolution No. 89-42

Synopsis: Resolutions honoring the service of three of the University's faculty members who have recently died are being proposed.

RESOLVED, That the Board adopt the following Resolutions in Memoriam and that the President be requested to convey a copy to the families of the deceased.

James M. Andrew, M.D.

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on July 12, 1988, of James M. Andrew, Associate Professor in the Department of Ophthalmology.

October 6 and 7, 1988 meeting, Board of Trustees

RESOLUTIONS IN MEMORIAM (contd)

James M. Andrew, M.D. (contd)

Dr. Andrew was born in Columbus, Ohio, on July 5, 1922. He graduated from Upper Arlington High School in 1940 and attended Dartmouth College, Hanover, New Hampshire, graduating with a B.A. degree in 1945. He then obtained his M.D. degree in 1947 from Long Island College of Medicine. His postgraduate studies were done at the Harper Hospital in Detroit, Michigan, and the Kresge Eye Institute at Wayne State University from 1948 to 1951.

In 1951 Dr. Andrew returned to Columbus, Ohio, where he entered into private practice and joined the faculty of the Department of Ophthalmology at The Ohio State University. Except for a two year stint in the Air Force where he was Chief of the Department of Ophthalmology at Wright-Patterson Air Force Base, Dr. Andrew's professional life was spent in Columbus, Ohio.

He was a member of the American Medical Association, the Ohio State Medical Association, Columbus Academy of Medicine, American College of Surgeons, American Academy of Ophthalmology, and the American Intraocular Implant Society.

Dr. Andrew has a particular interest in glaucoma and implant surgery. He was very active in teaching residents and medical students in the Department. His publications include chapters in Pediatric Ophthalmology by L. Byerly Holt as well as a number of articles in the ophthalmic literature.

On behalf of the University community, the Board of Trustees expresses its sympathy and understanding to the family of Dr. Andrew. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Sue Louise Smiley

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on August 14, 1988, of Sue Louise Smiley, Assistant Professor of the Ohio Cooperative Extension Service.

Sue Louise Smiley was born on December 26, 1949, in Magnolia (Carroll County), Ohio. She received her B.S. in Home Economics from Bowling Green State University in 1972 and her M.S. degree in Guidance Counseling, Pupil Personnel from Youngstown State University in 1978.

Mrs. Smiley began her Extension experience when she joined the faculty at The Ohio State University in 1972 as a County Extension Agent, Home Economics in Trumbull County. Mrs. Smiley continued in this position until her untimely death.

Mrs. Smiley's contributions in providing excellent Extension educational programs during her career earned her the respect and admiration of her co-workers and many thousands of Ohio citizens throughout the length and breadth of Trumbull County.

October 6 and 7, 1988 meeting, Board of Trustees

RESOLUTIONS IN MEMORIAM (contd)

Sue Louise Smiley (contd)

On behalf of the University community, the Board of Trustees expresses to the family of Sue Louise Smiley its deepest sympathy. It was directed that this resolution be inscribed in the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's realization of the loss that the family, the University, and her many friends and associates have sustained.

Cloea C. Thomas

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on August 12, 1988, of Cloea C. Thomas, Associate Professor Emeritus in the School of Music.

Cloea Thomas was born in Marietta, Ohio, on April 23, 1897. She received her diploma from Montana State Normal College, Dillon, Montana, in 1916, graduated from Teachers College, Columbia University with a B.S. in Ed. in 1926, and in 1938 with a M.A. degree. Miss Thomas was an elementary teacher in Montana, 1916-18, demonstration critic teacher in Cortland, NY, 1926-29, demonstration teacher in the Experimental School of Teachers College Music Department, summers of 1928-29.

Miss Thomas joined the music faculty at Ohio State University in 1929 to teach music courses for elementary education majors and music education majors, serve as demonstration teacher and music student teacher supervisor. For ten years, Miss Thomas directed the course, Broadcasting a Weekly Music Lesson to Children of Primary Grades. The lessons were broadcast over WOSU to many schools in Ohio. Miss Thomas was well-known for her extensive knowledge of music literature for children. Her keen interest in folk dance was enhanced by her participation in The Folk Dance Society in the New School for Social Research. During her travel abroad and in North America she explored the folk music and dance of various nationalities.

Scenes and Songs of the Ohio-Erie Canal, published by the Ohio State Historical Society in 1952 and 1971, includes several of the vast collection of folk and popular songs Miss Thomas transcribed and edited. In her programs based on canal songs she related highly amusing experiences with the singer, Captain Nye.

Miss Thomas was a major contributor to the development of the State Course of Study for Music in Ohio and Oregon. Her professional memberships included Music Educators National Conference, Ohio Music Education Association, Pi Kappa Lambda. She frequently was a speaker or clinician for the national and state conventions. She served on MENC committees dealing with Creative Work of Children in Music and Integration of Music with Other Fields.

Although Miss Thomas retired in 1965, the Ohio Music Education Association honored her with the Distinguished Service Award in 1972. This award reflected the continuing admiration, respect and appreciation of colleagues and former students for this dedicated teacher.

October 6 and 7, 1988 meeting, Board of Trustees

RESOLUTIONS IN MEMORIAM (contd)

Cloea Thomas (contd)

The School of Music pays tribute to the memory of Cloea Thomas, her effective teaching, her attention to detail, her integrity, her gentle, disciplined manner, and her positive influence on the field of music education.

On behalf of the University community, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Upon motion of Ms. Casto, seconded by Mr. Wexner, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS

Resolution No. 89-43

Synopsis: The reports on contracts, grants, and gifts and the summary for August 1988 are presented for Board acceptance.

WHEREAS monies are solicited and received on behalf of the University from governmental, industrial, other agencies, alumni, and various individuals in support of research, instructional activities, and service; and

WHEREAS such gifts and grants are received through The Ohio State University Research Foundation, the Engineering Experiment Station of The Ohio State University, and The Ohio State University Development Fund:

NOW THEREFORE

BE IT RESOLVED, That the research agreement between The Ohio State University and The Ohio State University Research Foundation for the contracts and grants reported herein, and the acceptance of the reports from the Engineering Experiment Station and The Ohio State University Development Fund during the month of August 1988 be approved.

Upon motion of Mr. Teaford, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

SUMMARY FOR AUGUST 1988

Source	No. of Projects	Support Level
The Ohio State University Research Foundation	135	\$14,186,148.46
Engineering Experiment Station	70	\$ 710,046.00
Total	205	\$14,896,194.46

October 6 and 7, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

SUMMARY FOR AUGUST 1988 (contd)

The Ohio State University Development Fund

Establishment of Named Funds

John D. and Ernestine Spencer Scholarship Fund (Scholarships for students from Licking County)	\$ 38,000.00
MerryMakers Club of Columbus, Inc., Endowment Fund (Support for the National Achievement Program at OSU)	\$ 20,000.00
The Harry Binkovitz and Lachie Kline Award Fund (Newark Campus - award for best written essay on the Holocaust)	\$ 19,000.00
The Jack N. Taylor, M.D., Urology Lectureship Fund (Lecture(s))	\$ 15,185.00
The Richard E. Bridwell Fund (Financial assistance to second or third year law students from Muskingum County)	\$ 5,000.00

Change in Description of Named Fund

The Michael Swink Memorial Scholarships in Theatre

October 6 and 7, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION

Report - August 1988

Federal Research Contracts/Grants

\$2,130,000.00 - Department of Labor, Bureau of Labor Statistics, Washington, D.C., National Longitudinal Surveys of Labor Market Experience, Round X, Center for Human Resource Research (R. J. Olsen), 29 September 1987 through 30 September 1989. (Project 766448 - Continuation)

\$838,164.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Spinal Cord Injury Research Center, Department of Surgery (W. E. Hunt) and Department of Physiology (B. T. Stokes), 1 September 1988 through 31 August 1989. (Project 763358 - Continuation)

\$591,765.00 - Department of Health and Human Services, Public Health Service, Health Resources and Services Administration, Rockville, Maryland, Mental Retardation Training, Nisonger Center (V. L. Reynolds), 1 July 1988 through 30 June 1989. (Project 761169 - Continuation)

\$301,823.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Transmural Transport in Blood Vessels, Department of Pathology and Department of Internal Medicine (D. L. Fry), 1 September 1988 through 31 August 1989. (Project 763184 - Continuation)

\$263,786.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Biogenesis of Mitochondria in *Neurospora*, Department of Molecular Genetics and Department of Biochemistry (A. M. Lambowitz), 1 September 1988 through 31 August 1989. (Project 765538 - Continuation)

\$220,121.00 - Department of Health and Human Services, Public Health Service, Alcohol, Drug Abuse and Mental Health Administration, Rockville, Maryland, Personality, Psychological Stress, and Immunocompetence, Department of Microbiology and Immunology (M. R. Glaser and W. Lafuse), Department of Psychiatry (J. Kiecolt-Glaser) and Oral Biology (J. Sheridan), 1 September 1988 through 31 August 1989. (Project 764961 - Continuation)

\$207,345.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Human Leucocyte Fragment Crystallizable Receptor Structure and Function, Department of Internal Medicine (C. L. Anderson), 1 September 1988 through 30 June 1989. (Project 765701 - Continuation)

\$195,000.00 - National Science Foundation, Washington, D.C., Transfer of Reducing Equivalents from Host Cytoplasm to Bacteroids in Legume Nodules, Department of Agronomy - OARDC (J. G. Streeter), 1 September 1988 through 29 February 1992. (Project 766959 - New)

October 6 and 7, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$174,636.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Mouse Thymidylate Synthase Gene Expression, Department of Biochemistry and Department of Molecular Genetics (L. F. Johnson), 1 September 1988 through 31 August 1989. (Project 762903 - Continuation)

\$171,518.00 - Department of Education, Office of Postsecondary Education, Washington, D.C., National Resource Center -- East Asia, Office of International Affairs (C. M. Chen), 15 August 1988 through 14 August 1989. (Project 766979 - Continuation)

\$152,689.00 - Department of the Interior, Geological Survey, Reston, Virginia, Water and Chemical Movement Through the Biologically Active Surface Layer of No-Till Soil, Department of Agronomy - OARDC (W. A. Dick and E. L. McCoy), 1 September 1988 through 31 August 1991. (Project 766993 - New)

\$148,852.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Tumor-Localizing Boron Compounds for Chemoradiotherapy, College of Pharmacy (A. H. Soloway) and Department of Pathology (R. F. Barth), 1 September 1988 through 31 August 1989. (Project 765629 - Continuation)

\$139,569.00 - National Science Foundation, Washington, D.C., Holocene Paleoclimatic Reconstruction from Greenland Ice Cores, Byrd Polar Research Center (E. Mosley-Thompson and L. G. Thompson), 1 August 1988 through 31 July 1989. (Project 765661 - Continuation)

\$137,406.00 - Environmental Protection Agency, Washington, D.C., Role of Xenobiotics in Modifying Gene Expression, Department of Physiological Chemistry and Comprehensive Cancer Center (G. E. Milo), 1 August 1988 through 31 July 1989. (Project 765679 - Continuation)

\$137,057.00 - International Development Cooperation Agency, Agency for International Development, Washington, D.C., U.S. AID Program Support Grant for Fiscal Years 1986-91, Office of International Programs in Agriculture (D. O. Hansen), 29 August 1988 through 28 August 1989. (Project 765750 - Continuation)

\$131,829.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Gastrointestinal Kallikrein and Renin Systems, Department of Physiology (P. E. Ward), 1 July 1988 through 30 June 1989. (Project 766971 - New)

\$128,340.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Development of Cerebellar Circuits, Department of Anatomy (J. S. King), 1 September 1988 through 31 August 1989. (Project 760045 - Continuation)

October 6 and 7, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$126,828.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Stochastic Fourier Transform Ion Cyclotron Resonance Mass Spectrometry, Department of Chemistry and Department of Biochemistry (A. G. Marshall), 1 September 1988 through 31 August 1989. (Project 763504 - Continuation)

\$118,348.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Glycoconjugates and Glioma Resistance to Cytolysis, Department of Pathology (A. J. Yates), 1 August 1988 through 31 July 1989. (Project 762989 - Continuation)

\$117,118.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Cardiac Myocytes and the Cellular Response to Ischemia, Department of Physiological Chemistry (G. P. Brierley), 30 September 1988 through 29 September 1989. (Project 765733 - Continuation)

\$115,590.00 - Department of Agriculture, Farmers Home Administration, Washington, D.C., Educational Program in Wastewater Management for Rural Communities, Cooperative Extension State Operations (K. M. Mancl), 1 October 1988 through 30 September 1989. (Project 766981 - New)

\$115,000.00 - National Foundation of Arts and Humanities, National Endowment for the Humanities, Washington, D.C., American Fiction, 1901-1925: A Contribution Toward a Bibliography, University Libraries (G. D. Smith), 1 September 1988 through 31 August 1990. (Project 766977 - New)

\$107,000.00 - Department of the Navy, Office of Naval Research, Arlington, Virginia, Novel Ultrasonic Techniques for Interface Studies, Department of Welding Engineering (L. Adler), 1 July 1988 through 31 March 1989. (Project 766985 - New)

\$104,150.00 - Department of Education, Office of Postsecondary Education, Washington, D.C., Establishment of an Undergraduate Middle East Center, University Center for International Studies (A. Payind), Office of International Affairs (F. Firebaugh) and Graduate School Administration (R. Koenigskecht), 15 August 1988 through 14 August 1989. (Project 766980 - New)

\$103,309.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Teenage Decision-Making, Schooling, and Fertility, Department of Economics (D. O. Parsons), 1 August 1988 through 31 July 1989. (Project 767000 - New)

\$100,000.00 - Department of Agriculture, Science and Education, Washington, D.C., Control of Insect Populations by Regulation of Dormancy, Department of Entomology (D. L. Denlinger), 1 September 1988 through 31 August 1990. (Project 766944 - New)

October 6 and 7, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$99,059.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Mechanisms of Hexose Epimerases and Oxidoreductases, Department of Chemistry (R. M. Mayer), 1 September 1988 through 31 August 1989. (Project 765015 - Continuation)

\$95,412.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Gustatory Afferent Organization in the Solitary Nucleus, Oral Biology (S. P. Travers), 1 September 1988 through 31 August 1989. (Project 765694 - Continuation)

\$90,000.00 - Department of Agriculture, Science and Education, Washington, D.C., Vector Specificity and Transmission Mechanism of Maize Chlorotic Dwarf Virus, Department of Plant Pathology - OARDC (E. D. A. Ammar) and Department of Entomology - OARDC (L. R. Nault), 1 July 1988 through 30 June 1990. (Project 766949 - New)

\$86,400.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Geriatric Leadership Academic Award, Department of Internal Medicine (R. Whisler), 1 September 1988 through 31 August 1989. (Project 766318 - Continuation)

\$84,808.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Transfusion Medicine Academic Award, Department of Pathology (M. S. Kennedy), 1 August 1988 through 31 July 1989. (Project 764898 - Continuation)

\$75,621.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, The Chemistry of Biologically Relevant Quinone Imines, Department of Chemistry (J. S. Swenton), 1 August 1988 through 31 July 1989. (Project 765570 - Continuation)

\$74,926.00 - National Science Foundation, Washington, D.C., Design, Specification, and Implementation of Reusable Software Components, Department of Computer and Information Science (B. Weide, W. F. Ogden and S. H. Zweben), 15 August 1988 through 31 January 1990. (Project 766994 - New)

\$74,903.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Correlation of 3-D Coronary Axial Geometry and Pathology, Engineering Experiment Station (M. H. Friedman), 1 July 1988 through 30 June 1989. (Project 766943 - New)

\$72,700.00 - National Science Foundation, Washington, D.C., Investigation of Comagnetic Complexes Using Isotope Systematics, Department of Geology and Mineralogy (K. A. Foland), 1 August 1988 through 31 January 1990. (Project 766348 - Continuation)

October 6 and 7, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$69,301.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Carcinogenesis, Molecular and Cellular Biology, Comprehensive Cancer Center and Department of Physiological Chemistry (G. E. Milo), 1 September 1988 through 31 August 1989. (Project 764351 - Continuation)

\$68,897.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Physiological Analysis of Optic Nerve Disease, College of Optometry (P. E. King-Smith), 1 August 1988 through 31 July 1989. (Project 763996 - Continuation)

\$68,841.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Adaptive Mechanisms of Accommodation and Convergence, College of Optometry (R. Jones), 1 September 1988 through 31 August 1989. (Project 765633 - Continuation)

\$66,658.00 - National Aeronautics and Space Administration, Goddard Space Flight Center, Greenbelt, Maryland, Improvement of the Earth's Gravity Field from Terrestrial and Satellite Data, Department of Geodetic Science and Surveying (R. H. Rapp), 1 September 1988 through 31 August 1989. (Project 760056 - Continuation)

\$62,720.00 - National Science Foundation, Washington, D.C., Orthogonal Polynomials and Their Applications, Department of Mathematics (P. Neval), 15 July 1988 through 31 December 1989. (Project 766825 - New)

\$61,272.00 - National Science Foundation, Washington, D.C., An Integrated Symbolic and Signal Processing Workstation for Research in Signal Analysis, Machine Perception, and Computer Architecture, Department of Electrical Engineering (K. L. Boyer), 1 August 1988 through 31 January 1990. (Project 766992 - New)

\$61,171.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Nicotine, Neuroregulators, and Dysphoric States Among Smokers, Department of Life Span Process (M. E. Wewers), 1 August 1988 through 31 July 1989. (Project 766969 - New)

\$60,356.00 - Department of the Navy, Office of Naval Research, Arlington, Virginia, An In Vitro Assessment of the Morphological and Physiological Correlates of Acetylcholine (ACh) and Vasoactive Intestinal Polypeptide (VIP) in the Mammalian Cerebral Cortex, Oral Biology (W. E. Thomas), 1 August 1988 through 30 July 1989. (Project 766962 - New)

\$60,100.00 - National Science Foundation, Washington, D.C., Presidential Young Investigator Award: Very Large Scale Integration Design of Electronic Circuits, Department of Electrical Engineering (M. I. El-Naggar), 1 July 1988 through 31 December 1988. (Project 766995 - New)

October 6 and 7, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$55,745.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Collaborative Ocular Melanoma Study -- Clinical Center, Department of Ophthalmology (F. H. Davidorf), 1 August 1988 through 31 July 1989. (Project 765050 - Continuation)

\$55,000.00 - National Science Foundation, Washington, D.C., An Integrated Task Approach to Expert Systems for Fault Diagnosis, Department of Chemical Engineering (J. F. Davis) and Department of Computer and Information Science (B. Chandrasekaran), 1 August 1988 through 31 January 1990. (Project 766282 - Continuation)

\$53,495.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, The Ohio State University Advanced Glaucoma Intervention Study, Department of Ophthalmology (P. A. Weber), 1 September 1988 through 31 August 1989. (Project 766355 - Continuation)

\$52,471.00 - Department of Energy, Argonne, Illinois, Theoretical Studies of Dynamics and Correlations in Heavy Electron Materials, Department of Physics (D. L. Cox), 15 August 1988 through 14 August 1989. (Project 766287 - Continuation)

\$50,877.00 - National Science Foundation, Washington, D.C., Tools for Stochastic Analysis of NP-Complete Problems II, Academic Faculty of Management Sciences (W. T. Rhee), 15 July 1988 through 30 June 1990. (Project 766972 - New)

\$50,620.00 - National Science Foundation, Washington, D.C., An Indo-U.S. Workshop on Bayesian Analysis in Statistics and Econometrics, Department of Statistics (P. K. Goel), 1 August 1988 through 31 July 1989. (Project 766999 - New)

\$50,000.00 - Department of the Air Force, Air Force Systems Command, Wright-Patterson Air Force Base, Ohio, Scatterer Modeling/Calibration Study, Department of Electrical Engineering, ElectroScience Laboratory (R. J. Marhefka), 20 July 1988 through 30 September 1988. (Project 766957 - New)

\$50,000.00 - Department of the Army, Army Research Office, Research Triangle Park, North Carolina, Derivatives of Boranes, Possible Metal Boride and Boron Nitride Precursors, Department of Chemistry (S. G. Shore), 1 August 1988 through 31 January 1989. (Project 766948 - New)

\$50,000.00 - National Science Foundation, Washington, D.C., Presidential Young Investigator Award, Department of Physics (R. J. Perry), 15 August 1988 through 31 January 1990. (Project 766901 - New)

October 6 and 7, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$45,394.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Ethology of Blood/Sugar Antagonism in Mosquitoes, Department of Entomology (W. A. Foster), 1 September 1988 through 31 August 1989. (Project 766238 - Continuation)

\$45,114.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Dietary Induced Aluminum Encephalopathy -- Animal Models, Department of Veterinary Pathobiology (J. F. Long), 1 September 1988 through 31 August 1989. (Project 765717 - Continuation)

\$37,500.00 - National Science Foundation, Washington, D.C., Presidential Young Investigator Award: Very Large Scale Integration Design of Electronic Circuits, Department of Electrical Engineering (M. I. El-Naggar), 1 July 1988 through 31 December 1989. (Project 766995 - Continuation)

\$35,448.00 - Department of Defense, National Security Agency, Fort George G. Meade, Maryland, Some Problems of Design Theory and Difference Sets, Department of Mathematics (D. K. Ray-Chaudhuri), 1 July 1988 through 30 June 1989. (Project 766961 - New)

\$34,288.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Immunoprevention of Human T-Cell Leukemia Virus-I Infection, Department of Veterinary Pathobiology (R. G. Olsen and L. E. Mathes), 1 August 1987 through 30 November 1988. (Project 765057 - Continuation)

\$33,093.00 - National Science Foundation, Washington, D.C., Studies of Internal Layering and Basal Conditions in Ice Sheets Using Low Frequency Ice Radar, Byrd Polar Research Center and Department of Geology and Mineralogy (I. M. Whillans), 1 June 1988 through 30 November 1989. (Project 765261 - Continuation)

\$29,671.00 - National Science Foundation, Washington, D.C., Knowledge-Based Simultaneous Engineering for Mechanical Design Using Design Compatibility Analysis, Department of Mechanical Engineering (K. Ishii), 15 August 1988 through 31 January 1990. (Project 766975 - New)

\$25,000.00 - National Science Foundation, Washington, D.C., The Environmental History of the Panama Land Bridge, Department of Zoology (P. A. Colinvaux and M. Bush), 1 September 1988 through 31 August 1989. (Project 766984 - New)

\$25,000.00 - National Science Foundation, Washington, D.C., Presidential Young Investigator Award, Department of Physics (G. P. Lafyatis), 1 September 1988 through 28 February 1990. (Project 766988 - New)

\$25,000.00 - National Science Foundation, Washington, D.C., Presidential Young Investigator Award, Department of Computer and Information Science (K. J. Supowit), 1 September 1988 through 31 August 1989. (Project 766850 - Continuation)

October 6 and 7, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$24,000.00 - National Science Foundation, Washington, D.C., Coherence and Chaos in Integrable Partial Differential Equations, Department of Mathematics (E. A. Overman), 15 July 1988 through 30 June 1990. (Project 766998 - New)

\$22,789.00 - National Science Foundation, Washington, D.C., Image Analysis Methods for Control of Arc Welding, Department of Welding Engineering (R. W. Richardson), 1 August 1988 through 31 July 1989. (Project 766974 - New)

\$20,347.00 - Department of the Air Force, Air Force Systems Command, Wright-Patterson Air Force Base, Ohio, Robust Stability and Performance for Linear Systems with Combined Structured and Unstructured Uncertainty, Department of Aeronautical and Astronautical Engineering (R. K. Yedavalli), 1 June 1988 through 31 December 1988. (Project 766964 - New)

\$20,167.00 - Department of Labor, Bureau of International Labor Affairs, Washington, D.C., Study Tour for Mr. Fahad S. Al Mazyed, The National Center for Research in Vocational Education (R. D. Ryan), 11 August 1988 through 30 September 1988. (Project 766986 - New)

\$20,000.00 - National Science Foundation, Washington, D.C., Probes of the Broad Line Region, Department of Astronomy (J. A. Baldwin), 1 September 1988 through 31 August 1989. (Project 767001 - New)

\$10,000.00 - National Aeronautics and Space Administration, Langley Research Center, Hampton, Virginia, Research on Analysis of Large Aperture Reflector Antennas, Department of Electrical Engineering, ElectroScience Laboratory (R. Rudduck), 1 September 1988 through 31 October 1988. (Project 763724 - Continuation)

\$7,800.00 - National Science Foundation, Washington, D.C., Highly-Excited States of Atoms and Molecules, Department of Physics (R. D. Knight), 15 July 1988 through 30 June 1989. (Project 766887 - Continuation)

\$7,150.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Mechanical Control and Energetics of Muscle Contraction, Department of Physiology (E. Bozler), 1 September 1988 through 31 August 1989. (Project 760924 - Continuation)

\$6,448.00 - Department of Agriculture, Science and Education, Peoria, Illinois, Cooperative Agricultural Research, Office of the Director - OARDC (H. R. Conrad and R. F. Edwards), 1 October 1987 through 30 September 1988. (Project 766472 - Continuation)

\$5,000.00 - Department of Agriculture, Science and Education, Washington, D.C., International Conference on Sustainable Agricultural Systems, Department of Entomology - OARDC and Department of Entomology (C. A. Edwards), 1 June 1988 through 31 May 1989. (Project 766945 - New)

October 6 and 7, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$5,000.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Small Instrumentation Program, College of Optometry (F. W. Hebbard), 1 September 1988 through 31 August 1989. (Project 766983 - New)

\$4,000.00 - National Science Foundation, Washington, D.C., Paleobotany in Antarctica: Paleozoic and Mesozoic, Byrd Polar Research Center and Department of Botany (T. N. Taylor) and Byrd Polar Research Center (E. L. Taylor), 1 August 1988 through 31 October 1989. (Project 765819 - Continuation)

\$2,993.00 - Department of Transportation, National Highway Traffic Safety Administration, East Liberty, Ohio, Comparison of Materials for Hybrid III Ribs, Department of Mechanical Engineering (J. A. Collins), 1 June 1988 through 31 December 1988. (Project 766989 - New)

Total - Federal Awards \$ 9,369,798.00

State of Ohio Research Contracts/Grants

\$897,518.80 - State of Ohio, Department of Education, Columbus, Ohio, Vocational Education Contracts - C - Trade and Industrial Education Services, Education Administration (J. J. Buffer), 1 July 1988 through 30 June 1989. (Project 766875 - Continuation)

\$599,796.19 - State of Ohio, Department of Education, Columbus, Ohio, Vocational Education Contracts - D - Vocational Educational Services, Education Administration (J. J. Buffer), 1 July 1988 through 30 June 1989. (Project 766877 - Continuation)

\$521,699.80 - State of Ohio, Department of Education, Columbus, Ohio, Vocational Education Contracts - B - Vocational Research, Survey, Evaluation, and Exemplary Programs, Education Administration (J. J. Buffer), 1 July 1988 through 30 June 1989. (Project 766874 - Continuation)

\$403,299.52 - State of Ohio, Department of Education, Columbus, Ohio, Vocational Education Contracts - E - Instructional Materials Laboratory, Education Administration (J. J. Buffer), 1 July 1988 through 30 June 1989. (Project 766876 - Continuation)

\$284,750.00 - State of Ohio, Department of Education, Columbus, Ohio, Southwest Vocational Education Personnel Development Regional Center, Department of Agricultural Education (R. K. Barrick and L. H. Newcomb), Department of Educational Studies: Humanities, Science, Technological and Vocational (A. J. Miller) and Department of Home Economics Education (S. V. Redick), 1 July 1988 through 30 June 1989. (Project 766226 - Continuation)

October 6 and 7, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

State of Ohio Research Contracts/Grants (contd)

\$239,750.00 - State of Ohio, Department of Education, Columbus, Ohio, Central Vocational Education Personnel Development Regional Center, Department of Agricultural Education (R. K. Barrick and L. H. Newcomb), Department of Educational Studies: Humanities, Science, Technological and Vocational (A. J. Miller) and Department of Home Economics Education (S. V. Redick), 1 July 1988 through 30 June 1989. (Project 766218 - Continuation)

\$125,000.00 - State of Ohio, Department of Development, Columbus, Ohio, Support for the Ohio Technology Transfer Organization (OTTO), Department of Mechanical Engineering and Academic Affairs Administration (R. E. Bailey), 1 July 1988 through 30 June 1989. (Project 766925 - Continuation)

\$110,000.00 - State of Ohio, Board of Regents, Columbus, Ohio, Workshops for Science Teachers on Humane Care and Use of Vertebrates, Laboratory Animal Center (J. F. Cornhill), 15 July 1988 through 31 December 1989. (Project 766935 - New)

\$102,655.15 - State of Ohio, Department of Education, Columbus, Ohio, Vocational Education Contracts - A - Vocational Teacher Education, Department of Educational Studies: Humanities, Science, Technological and Vocational (G. Jarvis), 1 July 1988 through 30 June 1989. (Project 766871 - Continuation)

\$95,000.00 - State of Ohio, Board of Regents, Columbus, Ohio, Science is Fun: A Hands-On Middle School Science Program, Mansfield Campus, Department of Chemistry (J. Z. Tarino), 15 July 1988 through 31 December 1989. (Project 766947 - New)

\$55,000.00 - State of Ohio, Department of Mental Health, Columbus, Ohio, Trainees in Community Mental Health Treatment for the Severely Mentally Disabled, College of Social Work (M. Coleman), 1 July 1988 through 30 June 1989. (Project 766958 - New)

\$50,132.00 - State of Ohio, Department of Natural Resources, Columbus, Ohio, Shredded Newspaper for Animal Bedding -- Phase I and Phase II, Cooperative Extension State Operations (J. D. Rohrer), 28 July 1988 through 30 September 1989. (Project 766970 - New)

\$38,758.00 - State of Ohio, Department of Education, Columbus, Ohio, Ohio Entrepreneurs Research Project -- Year II, The National Center for Research in Vocational Education (R. D. Ryan), 1 July 1988 through 30 June 1989. (Project 766953 - Continuation)

\$21,002.00 - State of Ohio, Department of Education, Columbus, Ohio, Ohio Ventures in Business Ownership -- Year II, The National Center for Research in Vocational Education (R. D. Ryan), 1 July 1988 through 30 June 1989. (Project 766952 - Continuation)

October 6 and 7, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

State of Ohio Research Contracts/Grants (contd)

\$18,389.00 - State of Ohio, Department of Mental Health, Columbus, Ohio, Preliminary Study of Community Treatment Teams: Franklin County RWJ Project, College of Social Work (R. J. First), 1 August 1988 through 30 June 1989. (Project 766968 - New)

\$11,424.00 - State of Ohio, Department of Development, Columbus, Ohio, Support for the Ohio Technology Transfer Organization (OTTO), Department of Mechanical Engineering and Academic Affairs Administration (R. E. Bailey), 1 July 1987 through 30 June 1989. (Project 766212 - Continuation)

Equipment - State of Ohio, Department of Natural Resources, Columbus, Ohio, Center for Commercialization of Space Membership Agreement, Center for Mapping (J. D. Bossler), 11 June 1988 through 10 June 1989. (Project 766219 - Continuation) (Approximate Dollar Value - \$25,000)

Total - State of Ohio Awards \$ 3,574,174.46

Industrial Research Contracts/Grants

\$207,500.00 - General Motors Corporation, Columbus, Ohio, Synchronous Work Group Research and Development Project, Department of Educational Studies: Humanities, Science, Technological and Vocational (R. L. Jacobs), 1 July 1988 through 29 September 1989. (Project 766978 - New)

\$77,815.00 - NeoRx Corporation, Seattle, Washington, Pseudomonas aeruginosa Exotoxin A: Genetic Reconstruction, Analysis, and Production, Department of Microbiology (D. R. Galloway), 1 August 1988 through 31 July 1989. (Project 767003 - New)

\$56,957.00 - E. I. Dupont de Nemours and Company, Wilmington, Delaware, Development of Lymphokine Activated Killer Cell Adoptive Transfer Therapy in Man, Department of Internal Medicine (J. J. Rinehart), 1 July 1986 through 14 July 1989. (Project 764609 - Continuation)

\$51,842.00 - Neoprobe Corporation, Columbus, Ohio, Phase I-II Clinical Study: The Intraoperative Detection of Colorectal Cancer by Radiolabeled B72.3 Monoclonal Antibody, Department of Surgery (E. W. Martin), 1 August 1988 through 31 July 1989. (Project 766930 - New)

\$51,000.00 - Boeing Advanced Systems Company, Seattle, Washington, Construction of Three BAS Designed Airfoil Models and Services for Tunnel Test of These Airfoil Models, Department of Aeronautical and Astronautical Engineering (G. M. Gregorek), 15 May 1988 through 30 September 1988. (Project 766942 - New)

\$50,825.00 - Land-O-Lakes Research Farm, Webster City, Iowa, Immune Responses to Rotavirus in Cows and Passive Protection in Calves, Food Animal Health Research Program - OARDC (L. J. Saif), 1 July 1988 through 30 June 1989. (Project 766223 - Continuation)

October 6 and 7, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Industrial Research Contracts/Grants (contd)

\$49,920.00 - Textron Defense Systems, Wilmington, Massachusetts, Hybrid Body RCS Code Development, Department of Electrical Engineering, ElectroScience Laboratory (L. Peters, Jr.), 19 May 1988 through 18 November 1988. (Project 766774 - New)

\$45,000.00 - Sears Manufacturing Company, Davenport, Iowa, Research and Development of Heavy-Duty Truck Seating System and Interior Paneling Concept, Department of Industrial Design (R. F. Butter and H. Goeller), 1 July 1988 through 30 June 1989. (Project 766920 - New)

\$36,751.00 - SYMEDIX, Inc., Wayne, Pennsylvania, Fluorocarbon Emulsions, College of Pharmacy (S. G. Frank), 1 August 1988 through 31 December 1988. (Project 766429 - Continuation)

\$24,338.00 - E. R. Squibb and Sons, Princeton, New Jersey, The Assessment of Aortic Insufficiency Using Digital Imaging Techniques, Department of Internal Medicine (A. J. Kolibash, C. A. Bush and S. C. Hirsch), 1 July 1988 through 30 June 1989. (Project 766965 - New)

\$21,450.00 - Fidia, Abano Terme (PD), Italy, Consequences of Administering Ganglioside (GM1) or Synthetic Ganglioside (AGF2) After 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine (MPTP) Induced Neurotoxicity, Department of Pharmacology (N. H. Neff), 1 April 1986 through 31 March 1989. (Project 765423 - Continuation)

\$17,000.00 - Mission Research Corporation, Santa Barbara, California, Advanced Radar Cross Section Measurement Range, Department of Electrical Engineering, ElectroScience Laboratory (W. D. Burnside and J. D. Young), 1 July 1988 through 30 August 1988. (Project 766973 - New)

\$15,545.00 - Septech, Wakefield, Rhode Island, A System for Realtime Automated Control of Preparative and Process HPLC Equipment, College of Pharmacy and Comprehensive Cancer Center (J. M. Jagadeesh), 20 June 1988 through 20 October 1988. (Project 766951 - New)

\$15,000.00 - Pfizer, Inc., New York, New York, Modern Approach to the Treatment of Hypertension Multicenter Study, Department of Family Medicine (G. A. Iben), 1 April 1988 through 30 September 1988. (Project 766966 - New)

\$11,520.00 - CIBA-GEIGY Corporation, Summit, New Jersey, Phase III Clinical Trial of Voltaren in Patients with Osteoarthritis, Department of Family Medicine (R. M. Guthrie, N. Gerber and R. T. Sickles), 1 April 1988 through 31 March 1989. (Project 765696 - New)

\$9,702.00 - Energy and Environmental Research Corporation, Irvine, California, Technical Assistance for Atmospheric Fluidized Bed Combustion Development and Demonstration, Department of Agricultural Engineering - OARDC, (H. M. Keener), 16 September 1987 through 15 June 1991. (Project 766654 - New)

October 6 and 7, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Industrial Research Contracts/Grants (contd)

\$7,000.00 - Ameritech Corporation, Arlington Heights, Illinois, Knowledge-Based Test Development Support, The National Center for Research in Vocational Education (R. D. Ryan), 1 July 1988 through 30 September 1988. (Project 766652 - Continuation)

\$2,974.00 - GAC International, Central Islip, New York, Evaluation of New Orthodontic Bracket Base, Orthodontics (Z. Davidovitch), 1 July 1988 through 31 October 1988. (Project 766991 - New)

Pharmaceuticals - Pfizer, Inc., Groton, Connecticut, Non-Comparative Study of Fluconazole in Patients with Serious Mycoses and Who Cannot be Treated with Conventional Antifungal Therapy, Department of Internal Medicine (R. J. Fass), 4 May 1988 through 3 May 1989. (Project 766955 - New) (Approximate Dollar Value - \$1,600)

Total - Industrial Awards \$ 752,139.00

Other Non-Federal Research Contracts/Grants

\$63,441.00 - The Pennsylvania State University, University Park, Pennsylvania, Measurement of Forest Condition and Response Along an Atmospheric Deposition Gradient, Laboratory for Environmental Science - OARDC (J. R. McClenahan), 1 January 1988 through 30 September 1988. (Project 766713 - Continuation)

\$60,000.00 - Fernbank, Inc., Atlanta, Georgia, Computer Graphics Design and Communications Services, Relative to the Proposed Fernbank Museum of Natural History, Atlanta, Department of Art Education (C. A. Csuri), 1 May 1988 through 30 April 1989. (Project 765922 - Continuation)

\$40,000.00 - Coherin Research Foundation, Dresden, Maine, Studies on Coherin, Department of Internal Medicine (T. S. Gagarella), 15 June 1988 through 14 June 1989. (Project 766946 - New)

\$36,000.00 - Eighteen Members of the National Alliance of Community and Technical Colleges, National Alliance of Community and Technical Colleges, The National Center for Research in Vocational Education (R. D. Ryan), 1 July 1988 through 30 June 1989. (Project 766839 - Continuation)

\$32,200.00 - People's Republic of China, Beijing, China, Training in American Enterprise, Trade, and Technology Transfer in the 21st Century for Representatives of the People's Republic of China, Department of Mechanical Engineering (R. E. Bailey), 1 June 1988 through 31 December 1988. (Project 766956 - New)

\$27,750.00 - U.S.-Spain Joint Committee for Cultural and Educational Cooperation, Madrid, Spain, The Development of Partisanship and Spanish Democracy, Department of Political Science (R. P. Gunther and B. M. Richardson), 1 September 1988 through 31 August 1989. (Project 765417 - Continuation)

October 6 and 7, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Other Non-Federal Research Contracts/Grants (contd)

\$27,124.00 - American Diabetes Association, Alexandria, Virginia, Effect of Acute Exercise on Skeletal Muscle Insulin, School of Health, Physical Education and Recreation (W. M. Sherman), 1 July 1988 through 30 June 1989. (Project 766133 - Continuation)

\$25,000.00 - Alfred P. Sloan Foundation, New York, New York, Alfred P. Sloan Research Fellowship, Department of Physics (D. L. Cox), 16 September 1988 through 15 September 1990. (Project 766982 - New)

\$23,858.00 - Florida International University, Miami, Florida, Consortium for the Development of Professional Materials for Vocational Education, The National Center for Research in Vocational Education (R. D. Ryan), 1 July 1988 through 30 June 1989. (Project 767004 - Continuation)

\$20,636.00 - The Nature Conservancy, Arlington, Virginia, Integration of Conservation Data Center Databases into National and Regional Geographic Information Systems (A Costa Rica Case Study), Department of Geography (D. F. Marble), 15 September 1988 through 14 July 1989. (Project 766997 - New)

\$18,427.00 - The University of Kansas, Lawrence, Kansas, Demodulation Processes in Auditory Perception, Division of Speech and Hearing (L. Feth), 1 August 1988 through 30 November 1988. (Project 766921 - New)

\$18,060.00 - Morris Animal Foundation, Englewood, Colorado, Use of Rocaltrol (Calcitriol) and Aluminum Free Phosphate Binders in Prevention and Control of Renal Secondary Hyperparathyroidism, Department of Veterinary Pathobiology (L. A. Nagode), 1 September 1987 through 31 August 1989. (Project 766338 - Continuation)

\$16,000.00 - Battelle Memorial Institute, Columbus, Ohio, Interdisciplinary Research on Wear of Materials, Department of Metallurgical Engineering (D. A. Rigney), 10 October 1987 through 31 August 1988. (Project 764981 - Continuation)

\$15,000.00 - American Cancer Society, Ohio Division, Inc., Dublin, Ohio, Genetic Characterization of Novel Elements in Protein Membrane Assembly, Department of Chemistry (R. E. Dalbey), 1 July 1988 through 30 June 1989. (Project 766960 - New)

\$15,000.00 - American Cancer Society, Ohio Division, Inc., Dublin, Ohio, The Biochemistry of Chorion Gene Amplification, Department of Molecular Genetics (M. T. Muller), 1 July 1988 through 30 June 1989. (Project 766950 - New)

\$14,297.00 - The Pennsylvania State University, Hershey, Pennsylvania, Mitotic Modifiers of Hormone Dependent Cancers, Department of Surgery (J. R. Drago), 1 July 1988 through 30 June 1989. (Project 766967 - New)

October 6 and 7, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND

Establishment of Named Funds

John D. and Ernestine Spencer Scholarship Fund

The John D. and Ernestine Spencer Scholarship Fund was established October 7, 1988, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from Ernestine Spencer of Newark, Ohio.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of

October 6 and 7, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Named Funds (contd)

John D. and Ernestine Spencer Scholarship Fund (contd)

The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide scholarships for students who are recent graduates of the Licking County Schools. Students must be enrolled full time and declare a major in journalism, education, or political science. Candidates must demonstrate academic ability and have documented financial need. Recipients must be attending The Ohio State University at Newark and maintaining a minimum 2.5 accumulative grade point average to be eligible for the annual award. The student may receive the scholarship two times. Applicants are to complete the Newark campus financial aid application form and provide a letter of recommendation from their high school guidance counselor. Award recipients shall be chosen by the Newark Campus Scholarship Committee consisting of two faculty members, one senior administrator and the financial aid coordinator, in consultation with the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in order to carry out the desire of the donor.

MerryMakers Club of Columbus, Inc., Endowment Fund

The MerryMakers Club of Columbus, Inc., Endowment Fund was established October 7, 1988, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from members of the MerryMakers Club of Columbus, Inc., Columbus, Ohio.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide scholarship support for the National Achievement program at The Ohio State University. Award recipients shall be chosen by the University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in order to carry out the desire of the donors.

October 6 and 7, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Named Funds (contd)

The Harry Binkovitz and Lachie Kline Award Fund

The Harry Binkovitz and Lachie Kline Award Fund was established October 7, 1988, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from Gene and Joy Binkovitz of Granville, Ohio.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide an annual award for the best written essay on the Holocaust (the Nazi extermination of six million Jews between 1941-1945). Students entering or returning to The Ohio State University at Newark may compete. The winning essay will be selected by a committee appointed by the dean/director of The Ohio State University at Newark and composed of a Newark campus history department faculty member, an English department faculty member, and one other appropriate professional employee within the University system in consultation with the University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in order to carry out the desire of the donors.

The Jack N. Taylor, M.D., Urology Lectureship Fund

The Jack N. Taylor, M.D., Urology Lectureship Fund was established October 7, 1988, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from the family, colleagues, patients and friends of the late Jack Neel Taylor, M.D. (B.A. '40) of Columbus, Ohio.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to fund an annual lecture (or lectures), administered by the Division of Urology in the College of Medicine, to be named The Jack N. Taylor, M.D. Lectureship in Urologic Education and Research. Each year a distinguished speaker of national or international reputation will present a major presentation on a topic related to an area relevant to the mission and disciplines of the Division of Urology. The fund will be used for the speaker's honorarium and for related expenses. The selection of the annual speaker will be the responsibility of the Director of the Division of Urology or his or her designee(s).

October 6 and 7, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Named Funds (contd)

The Jack N. Taylor, M.D., Urology Lectureship Fund (contd)

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in order to carry out the desire of the donors with preference being given to recommendations which meet the educational, research and patient care goals of the Division of Urology.

The Richard E. Bridwell Fund

The Richard E. Bridwell Fund was established October 7, 1988, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University Development Fund from the estate of Richard E. Bridwell (B.S. Bus. Adm. '49, J.D. '51) of Zanesville, Ohio.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide financial assistance for second- and third-year students in The Ohio State University College of Law with preference being given to students from Muskingum County. If there are no eligible recipients from Muskingum County, then the income may be used to provide financial assistance to students from the surrounding counties of southeastern Ohio. Award recipients shall be chosen by the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in order to carry out the desire of the donor.

Change in Description of Named Fund

The Michael Swink Memorial Scholarships in Theatre

The Michael Swink Memorial Scholarships in Theatre were established September 5, 1980, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from the family and friends of Michael Swink (B.A. '75), Columbus, Ohio. The description was revised October 7, 1988.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

October 6 and 7, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Change in Description of Named Fund (contd)

The Michael Swink Memorial Scholarships in Theatre (contd)

The income is to be used to provide one or more scholarships for sophomore and upper level undergraduate students who have demonstrated exceptional talent and ability in theatre in the area of stage lighting, sound and/or stage design and for incoming first-year students who have demonstrated exceptional talent and ability in the aforementioned areas of theatre in high school. Not more than half of the annual income may be awarded to incoming students. Selection of the recipient(s) is to be made upon the recommendation of the chairperson of the Department of Theatre and the Dean of the College of the Arts in coordination with the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in order to carry out the desire of the donor.

**EMPLOYMENT OF ARCHITECTURAL FIRM AND AN ENGINEERING FIRM
AND REQUEST FOR CONSTRUCTION BIDS**

Resolution No. 89-44

Synopsis: Authorization to employ an architectural firm and an engineering firm and to request construction bids for the AmeriFlora '92 Technology and Horticultural Information Center project is proposed.

**AMERIFLORA '92 TECHNOLOGY AND HORTICULTURAL
INFORMATION CENTER**

WHEREAS The State of Ohio and the City of Columbus will be hosting AmeriFlora '92, which will be part of the 1992 Quincentennial Celebration of Christopher Columbus' first voyage to the Americas; and

WHEREAS AmeriFlora '92 will include a facility to be constructed on a site selected within Franklin Park to house horticultural and technological displays and horticultural education and information programs, with construction anticipated to begin in spring 1989, and be completed in fall 1991; and

WHEREAS at the conclusion of the year-long celebration this facility will be moved to a site to be selected on The Ohio State University Columbus campus; and

WHEREAS funds in the amount of \$4,500,000.00 have been appropriated to the University for this project by Amended House Bill 810 (the 1988-90 Capital Appropriations Bill) enacted by the 117th General Assembly;

NOW THEREFORE

October 6 and 7, 1988 meeting, Board of Trustees

**EMPLOYMENT OF ARCHITECTURAL FIRM AND AN ENGINEERING FIRM
AND REQUEST FOR CONSTRUCTION BIDS (contd)**

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to select qualified architectural and engineering firms for this project, in conjunction with the Department of Administrative Services, and that the fees for these services be negotiated between the firms selected and the Department of Administrative Services, Division of Public Works; and

BE IT FURTHER RESOLVED, That the President and/or the Vice President for Business and Administration be authorized to request construction bids on this project in accordance with established University procedures, and if satisfactory bids are received, to recommend to the Department of Administrative Services, Division of Public Works, the award of contracts, with all actions to be reported to this Board at the appropriate time.

Upon motion of Ms. Casto, seconded by Mrs. Bowser, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

**REPORT OF AWARD OF CONTRACTS AND
ESTABLISHMENT OF CONTINGENCY FUNDS**

Resolution No. 89-45

Synopsis: Contracts have been awarded for the projects listed below to the lowest and best bidders in accordance with University procedures.

WHEREAS resolutions adopted by the Board of Trustees at previous meetings authorized the President and/or Vice President for Business and Administration to sign the plans and specifications and, in accordance with established University procedures, to request bids and, if satisfactory bids were received, to make the award of contracts for the Athletic Maintenance Building - North Athletic Facility project; and

WHEREAS resolutions adopted by the Board of Trustees at previous meetings authorized the President and/or Vice President for Business and Administration to sign the plans and specifications and, in accordance with established University procedures, to request bids and, if satisfactory bids were received, to recommend to the Department of Administrative Services, Division of Public Works, the award of contracts for the Bradford Commons Remodeling project:

ATHLETIC MAINTENANCE BUILDING - NORTH ATHLETIC FACILITY

Description: This project provides for the construction of a maintenance facility to house athletic equipment and materials necessary to maintain the athletic facilities and grounds and provide a service area for the Athletic Department's motor vehicles. Construction is scheduled to begin September 1988, and be completed by December 1988.

General Contract

Date Received: July 28, 1988

October 6 and 7, 1988 meeting, Board of Trustees

**SALE OF REAL PROPERTY
92.6 ACRES ON HARRISBURG PIKE
COLUMBUS, OHIO**

Resolution No. 89-46

Synopsis: Sale of approximately 92.6 acres of unimproved real property located on Harrisburg Pike in Columbus, Ohio, is proposed.

WHEREAS in December 1986, the Board of Trustees of The Ohio State University acquired by gift from Mr. Leonard J. Immke, Jr., approximately 92.6 acres of unimproved real property located on the east side of Harrisburg Pike near the intersection of Briggs Road in Columbus, Ohio; and

WHEREAS under the terms of this gift, the property is to be sold, and this gift is being used to support the Leonard J. Immke, Jr., and Charlotte L. Immke Chair in Cancer Research Fund to support the work of a distinguished researcher in the University's Arthur G. James Cancer Research Institute; and

WHEREAS T & D Properties, Inc., has offered to purchase this property for \$300,000.00; and

WHEREAS the appropriate University officials have determined that this sale of the property is in the best interest of the University and it is the desire of this Board to accept the offer of T & D Properties and to sell all of the Board's right, title, and interest in and to this property:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized, in the name of the Board of Trustees of The Ohio State University, to sell all of the University's right, title, and interest in and to this property to T & D Properties, Inc., at a price of \$300,000.00 upon such terms and conditions as are deemed to be in the best interest of the University.

Upon motion of Ms. Casto, seconded by Mrs. Bowser, the Board of Trustees adopted the foregoing resolution with six affirmative votes cast by Messrs. Teaford, Barone, Kessler, Wexner, and Mrs. Bowser and Ms. Casto, and an abstention by Mr. Immke.

October 6 and 7, 1988 meeting, Board of Trustees

**EASEMENT
COLUMBUS SOUTHERN POWER COMPANY
350 WEST DODRIDGE STREET, COLUMBUS, OHIO**

Resolution No. 89-47

Synopsis: Authorization to grant an electric service easement to Columbus Southern Power Company is requested.

WHEREAS the Columbus Southern Power Company has requested a 15-year easement consisting of a strip of land approximately 20 feet in width and approximately 780 feet in length for the installation of electric service at 350 West Dodridge Street; and

WHEREAS the electric service will serve University property leased to the Franklin County Board of Mental Retardation and Developmental Disabilities; and

WHEREAS the appropriate University offices have recommended the approval of this easement:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to request the Deputy Director of Public Works of the Department of Administrative Services, pursuant to his statutory duties, to act for and on behalf of the University in developing the necessary legal instruments to provide for this easement.

Upon motion of Mr. Wexner, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

**EASEMENT
TRANS-OHIO PIPELINE COMPANY
LIMA REGIONAL CAMPUS**

Resolution No. 89-48

Synopsis: Renewal of a gas pipeline easement to Trans-Ohio Pipeline Company is requested.

WHEREAS in 1973 the University granted to Trans-Ohio Pipeline Company a 15-year easement consisting of a strip of land 30 feet in width and 2,365 feet in length for an underground gas pipeline on property located at the Lima Regional Campus; and

WHEREAS this easement has expired and Trans-Ohio Pipeline Company has requested a renewal of the easement for a period of 15 years; and

WHEREAS this easement will serve both University property and others and the University will receive a fee of \$5,540.00 for this easement; and

WHEREAS the appropriate University offices have recommended the renewal of this easement:

October 6 and 7, 1988 meeting, Board of Trustees

**EASEMENT
TRANS-OHIO PIPELINE COMPANY
LIMA REGIONAL CAMPUS (contd)**

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to request the Deputy Director of Public Works of the Department of Administrative Services, pursuant to his statutory duties, to act for and on behalf of the University in developing the necessary legal instruments to provide for this easement.

Upon motion of Mr. Teaford, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

OFFICIAL PROCEEDINGS OF THE
SECOND JOINT MEETING
OF THE OHIO STATE UNIVERSITY BOARD OF TRUSTEES
AND THE UNIVERSITY HOSPITALS BOARD

Columbus, Ohio, November 3, 1988

The Chairman of the University Board of Trustees, Mr. Leonard J. Immke, convened the meeting of the Board of Trustees and University Hospitals Board at 4:45 p.m. in the Alumni Lounge of the Fawcett Center for Tomorrow.

*

*

*

University Board of Trustees Present: Leonard J. Immke, Chairman, John W. Berry, Shirley D. Bowser, Hamilton J. Teaford, John J. Barone, Deborah E. Casto, John W. Kessler, and Milton A. Wolf.

University Hospitals Board Present: Arthur I. Vorys, Chairman, John G. Kramer, Charles Y. Lazarus, John R. Hodges, Susan J. Insley, Morris S. Rosenblum, and William M. Bennett.

November 3, 1988 Joint Meeting, Board of Trustees and University Hospitals Board

The Chairman, Mr. Immke, called a joint meeting of the Board of Trustees and University Hospitals Board to order on November 3, 1988, at 4:45 p.m. He requested the Secretary to call the roll.

Present: Leonard J. Immke, Chairman, John W. Berry, Shirley D. Bowser, Hamilton J. Teaford, John J. Barone, Deborah E. Casto, John W. Kessler, Milton A. Wolf, John G. Kramer, Arthur I. Vorys, Charles Y. Lazarus, John R. Hodges, Susan J. Insley, Morris S. Rosenblum, and William M. Bennett.

--0--

Mr. Immke:

I'm delighted that we could meet today in joint session to consider some of the more important issues which the Hospitals, as well as the University, must grapple with over the next several years. Before we move to the main purpose of our meeting, I would like to take this opportunity to express the Board of Trustees' thanks and appreciation to members of the Hospitals Board, current and former, who have contributed in such a noteworthy manner to the work and accomplishments of our Hospitals.

We have indeed been fortunate over the years to have men and women of your stature, commitment, and dedication to serve as members of the University's Hospitals Board. All of my colleagues join me in expressing our thanks for a job well done.

At this time, I would like to ask Dr. Tzagournis, together with his associates, to lead us through the agenda.

Dr. Tzagournis:

Thank you, Mr. Chairman. Approximately three years ago, the Board of Trustees and the Hospitals Board met and asked the President to develop a long-range strategic plan for the medical center. We are happy to report that we are prepared to do this today. I would like to introduce the subject and spend a very short time doing that and then briefly, Ron St. Pierre, who chaired the committee, will summarize the College of Medicine's strategic plan, and Jim Nichols will summarize the Hospitals' strategic plan.

A number of changes have occurred in the past decade in academic health centers. There is nothing unusual about that, but it has happened. It probably isn't the most difficult thing that has happened, either. I suspect it was a lot more difficult to amputate somebody's leg without anesthesia 100 or so years ago, and the advent of anesthesia revolutionized hospitals, operating rooms, patient care, and so on. But at any rate, it has happened. Some of the key things that have happened are as follows: one is that the reimbursement or the way the payers pay hospitals in academic health centers has changed drastically. Up until a few years ago, the hospital would submit a bill for its costs for a patient's care each year to Medicare or to Blue Cross/Blue Shield, and they would be reimbursed that amount. That abruptly changed when prospective

November 3, 1988 Joint Meeting, Board of Trustees and University Hospitals Board

Dr. Tzagournis: (contd)

payment came into being and now, basically, the government has said, "Well, we will pay you so much for somebody who has had a heart attack and is in the hospital an average length of time, or for an appendectomy." This changed drastically.

Another thing that has changed is that our institution has become a much more research-oriented institution than it has been in the past. We have been very good in teaching, developed a fine reputation nationally, and we have been a good patient-care institution. We now have a whole new set of problems with recruiting researchers, investigators, and trying to buy the equipment and developing the laboratory space for them.

Finally, there have been changes in medical education. For example, since prospective payers now expect somebody who has gallbladder disease to come in that morning and be operated on later in the morning, and then be in the hospital, this changes the way a medical student can spend time with that patient and get a history and physical examination, as we use to do in previous days. There has to be much more ambulatory teaching and out-patient teaching now than there was in the past. Also, medical students are learning totally different ways of practicing medicine from the MedOhio concept, to HMO's, to PPO's, to hospital in-patient.

So, we have tried to take all this into consideration to develop a plan. The plan is basically a process to determine objectives, to have the ability to change those objectives, and then to be in a position to attract the resources we need, and to establish policies on how to acquire those resources, and then expend.

We had a great number of meetings, negotiations, consensus forming, and the process has been a very valuable one. There are a number of ways that one could do this thing. We had an example of that recently on a Saturday morning when three colleges on campus each developed a strategic plan and each one developed it differently. We developed ours differently.

I just have a couple of slides to show you on some other aspects of this that impacted us tremendously. In 1980, the Geminac Report, which is a major national report, estimated that there would be 70,000 excess physicians by the year 1990, and 150 surplus positions by the year 2000. Therefore, the government basically stopped capitation funds and a number of other funds that they were giving medical schools. And medical students finally caught hold of this and said, "My goodness, I'm not going to spend 8, 10, or 12 years in training and then go out and not be able to get a job." So, individuals interested in medicine decreased their interest to some extent, and you will see that in a moment. Notice that this was in 1980. This was before the first case of AIDS was diagnosed. This is before people realized that 35%-40% of all medical school students are females. Females have now been shown to spend about 8%-10% less time in practice, taking time off to raise their families and

Dr. Tzagournis: (contd)

take care of their children. The aging population wasn't fully considered and, importantly, the surplus, by most people's estimates today, are really gone. It looks like we are producing just about enough physicians and they will all be needed. That is the latest consensus among medical educators. The students have not heard about it yet. Because as you can see, here is what is happening to national applicants over the last few years. This is what has happened to Ohio applicants. There is a dramatic decrease in the number of applicants that are applying to medical schools throughout the country and in Ohio. Accordingly, we've had to change to a recruiting stance for good medical students, competitive medical students, whereas a few years ago we just sat back, let people come to us, and then chose the best out of the thousands of people who applied to medical school. Again, a large change and an important change.

In the last six or seven years we have had a dramatic increase in the number of grants and in the amount of dollars funded by outside agencies, including the National Institute of Health. This makes a big difference. Ten years ago if we needed a cardiovascular surgeon, we basically recruited somebody who was a good surgeon, could come in and operate on people and do a good job, and he didn't need any money. He needed basically an office, a resident, and what we had readily available to us. Now, to recruit a top-notch transplant surgeon who is going to do research, who is going to do something on the cutting edge, we have to provide laboratories, calves for the artificial hearts -- I know some of our Hospitals Board members heard the talk that we had at one of the Board meetings -- and a whole host of new and different things.

Over 200 of our faculty members were interviewed, studied together, had several retreats, fifty members of the Hospitals Administration, Board Members, our referring physicians, our consumers -- all of this information was put together to summarize a plan. A plan that told us how to deal with present circumstances and how to approach the next few years. This took into account also how we can become a better medical center, a more distinguished one, a more recognized one. Our goal and objective is, basically, to become one of the top 10 medical centers in the country. We have had tremendous support for this plan. Chuck Lazarus advocated it from the very beginning, worked throughout this entire time making sure we did it, along with many of the other Board Members. We appreciate the support that we got from our colleagues in the central administration, and particularly the leadership of the President. He has been very responsive to our requests.

Some of these strategies have already been implemented. Let me give you an example. We have already decided that due to the competition, due to the changing environment, we have to have more practicing physicians and teachers in the Hospitals. We cannot have only researchers. Again, with the help of the University we did get through a non-tenure pathway for some of these individuals. We now have almost 400 regular faculty

November 3, 1988 Joint Meeting, Board of Trustees and University Hospitals Board

Dr. Tzagournis: (contd)

members and 65 of these are on that non-tenure path, which allows them to practice and to teach medicine, but not have to do research and worry about getting tenure.

One of our other strategies is that we now need to have a primary care network to take care of our patients and be able to refer some of these patients to the Hospitals, because HMO's and PPO's basically capture some of these people. In the past, all of them were able to come to University Hospitals, that is not true anymore, financially. So, MedOhio and some of our other satellites were established. This is the type of thing that we have already started to do and we hope that we can continue to do this and make changes along the way. I would like to stop now, because I assured everybody that this was going to be brief, so that you can ask questions and we can have a dialogue instead of a monologue. Thanks for listening to the introduction. Ron --

Dr. St. Pierre:

Thank you, Members of the Board. I would just like to reaffirm a couple of things that Dr. Tzagournis has said and that is the tremendous number of people that have been involved in this. I have a list of the members of the Strategic Planning Task Force and in talking to this group, in many ways is like preaching to the converted. Because in the room today is Shirley Bowser, who is a member of our Strategic Planning Task Force; Weldon Ihrig, who is a member of the Task Force; Kathryn Clausen, who is the elected Chief of Staff of the University Hospitals; Mr. Charles Lazarus from the Hospitals Board; myself; Dr. Tzagournis; and Mr. Vorys from the Hospitals Board. I could go through the number of people that have been involved and have been contacted by the Task Force activities as we've developed what we have for you tonight.

In your packet you should have a two page summarization. This is a summary of a summary. Someone once said, "a strategic plan should be put on two pages," and it took us a good deal of time to get it down to two pages. What we have done is to take the key elements, the five strategies from the College of Medicine and some seven strategies combined to make a single strategy for the University Hospitals and Clinic, and give you the essence of what we want to talk about here. We also have provided for you on that sheet with some page numbers so that you can turn to those pages that incorporate those particular strategies.

My responsibility would be to talk to you about the five strategies of the College of Medicine. If you like, what I'm going to do is simply to take the first one on page 8, which is the education strategy. As you can see here, the principal strategy of the College of Medicine for the education strategy is to reduce the class size by 2% per year for the next 5 years. And to continue to modify clinical education experience and strengthen graduate medical educational programs directed by changes in clinical practice and the overall commitment to the

November 3, 1988 Joint Meeting, Board of Trustees and University Hospitals Board

Dr. St. Pierre: (contd)

College of Medicine becoming a top 10 medical school in the United States.

I should point out, as Dr. Tzagournis mentioned, there are a number of changes going on in major medical centers throughout the country. As you will see here in the brief directions we have given, in terms of the way the strategy will be carried out, there is not a significant modification in the overall undergraduate, that being the Pre-MD portion of the medical education. We feel that the content is appropriate, but what has to happen is that there has to be a change in the emphasis. That is really number one, up there, to modify the teaching focus, to get more into the ambulatory setting, to deal more in the out-patient services, and to get more into physicians' offices. We want to think more about a total patient perspective, to work as most major medical centers should towards aggressive and innovative technology and procedures. In my humble opinion, that is the one thing that differentiates an academic medical center from other kinds of medical facilities. This is where innovative technology and new procedures should not only be developed, but should be assessed as to their quality and their efficacy.

As Manny talked there have been many changes, in terms of the health care delivery system, and we have to utilize those referral areas as training sites to supplement OSU Hospitals and Clinics. As we become more and more involved in tertiary medical care and beyond, we have to rely on other sources for the primary and many of the secondary care activities. We have to maintain the full range of educational experiences from medical students all the way through allied health students, including continuing medical education and post doctorate fellows. We need to attract quality students, because one of the keys to assessing where you stand relative to your competitive peers, is the quality of our students and the achievements they get in terms of placing them in leading residency programs throughout the country. We also have to recognize the importance of graduate medical education.

One of the things that is becoming very apparent is that research has become much more competitive in the last few years. The acquisition of research dollars is becoming more and more difficult. There are more and more people out there competing for them. There are more and more medical centers that are competing for the same kinds of dollars. We have a significant need to increase our extramural research activity. We've set for ourselves a goal of 15% to 20% per year. Over the last three years, there has been an acute increase that would reflect that, as Manny showed you on the last slide he presented.

We need to coordinate the areas of existing and potential strength, not only within the Hospitals and the College of Medicine, but in the University. We have to become a focus for many of the research activities that would involve colleges that are not normally associated with University Hospitals. We have to establish criteria -- and I will talk about that -- for

Dr. St. Pierre: (contd)

evaluating and monitoring criteria, priorities, and emerging opportunities within our existing strengths. We have to become more self-sufficient. There has to be a greater college control over the priorities and the additional seed funds that are available to the College. We have to remember that many of the faculty members that we're asking to do these kinds of research activities are people who still have clinical responsibilities, and we have to maintain a supportive environment as a two-way street with University Hospitals.

The resources, again, just to reaffirm what I have said, we are going to have to look more to ourselves and to areas of opportunity than to simply think that we can go to the well all the time. We have to look at reallocating our existing revenues, increasing the funding for research, from endowment, from development sources, and targeted federal and state activities that are available to us. We need to increase the amount of funds available to the Dean. There has to be more central control over the ability to fund emerging priorities, strengthen development efforts, strengthen the support to the Hospitals so we can continue to have an environment that enhances the College's development. We have to initiate or respond to state funding opportunities for specific programs that we should be the leaders in. We have to initiate or respond to opportunities for federal support. We have recently done that in two significant areas, in terms of the AIDS clinical grant which brings significant dollars for research and for patient care in this critical area to University Hospitals. We also are involved in a regional AIDS education and training grant that was an initiative by several individuals. We need to look more long-range in terms of our budgeting. And most critically, at the five-year space development plan, because we are now running out of space.

Who are the people we are going to look to for this? Well, we need to recruit as well as retain faculty members who are consistent with the requirements of the College's educational and research strategies, or -- and I would emphasize the or, because it is becoming more and more difficult to become a triple threat academician in the academic medical center. We need to have faculty members who are dedicated to the educational and research activities or those people who are dedicated to quality patient care, innovative patient care, and will serve as delivery goals of University Hospitals and Clinics. And you can see the directions, we have to get out and compete for these people, people who are going to bring research dollars into the medical center. We are going to have to find and encourage and reward the increased participation to gain a national prestige, because that is one of the significant criteria for where we stand -- what kind of prestigious societies do our faculty members belong to, upon what editorial boards do they sit. We have to increase the number and desirability of the clinically-oriented physicians to meet the patient service demands and needs. I can't tell you how important the regular clinical track has been to the College of Medicine over the past four years. It has allowed for that

November 3, 1988 Joint Meeting, Board of Trustees and University Hospitals Board

Dr. St. Pierre: (contd)

increase in research dollars being brought in, because we now have a very highly desired group of faculty members who are engaged in clinical teaching and clinical care. We have to adjust the faculty size to both improve the educational research, as well as the clinical environment for the faculty.

This is probably the most innovative and revolutionary thing that has been done within the College of Medicine in recent years. And that is that we have a tremendous consensus from among the faculty of the nineteen departments, the School, and the major divisions within the College of Medicine, in terms of establishing what will be our initial selected areas of emphasis. This was done by having the Executive Committee of the College of Medicine determine what particular areas we wanted to look at. You can see that we have established twenty areas that we felt we had some responsibility for and expertise in. Then we developed five criteria, not in any sense of priority order, but more like a yardstick. Those five criteria that would be held up to each of these areas of opportunity or emphasis to see where they stood were: has this particular area clinical importance for OSU Hospitals' competitiveness; is it multi-disciplinary in nature, not singularly oriented to one particular department or individual; does it draw upon a strong research (basic science) component; does it exhibit a strong presence within the OSU system, generally, do we have some strengths within Dentistry, Optometry, Pharmacy, Mathematical and Physical Sciences whose faculty members can contribute to this; and lastly, do we have established leadership that can take hold of this. As these priorities came back and we put them into order, you can see that those top six and the others are in priority order. There is a clear break between number six and seven. Number six being Geriatrics/Gerontology, and a nice break from that to Molecular Genetics. But you can see cancer, neurosciences, transplantation, cardiovascular, women's and children's health, geriatrics and gerontology. These will be the areas that will be sited as we begin to put scarce resources into new areas of activity.

I was asked just recently by several people from a particular area of the College of Medicine, "What if we don't like the strategic plan or if we have different activities within the Centers of Emphasis? Do we not get to exercise those?" No, a gun is not going to be held at anyone's head. They said, "Well, will we still receive support from the scarcest resources?" The answer is clearly no. But no one is going to be left out if they can find their own funding.

Notice the thirteen areas of opportunity, how will they raise their level of visibility? Primarily by this, that we need to establish an ongoing program of review by a committee that will consist of representation from the College of Medicine, the College of Medicine Administration, and University Hospitals that will establish and evaluate and continually monitor these Centers of Emphasis. As some are well off on their own, which from the lower portions will work their way up and receive more appropriate visibility.

November 3, 1988 Joint Meeting, Board of Trustees and University Hospitals Board

Dr. St. Pierre: (contd)

Those are the five areas of strategy from the College of Medicine. I would be happy to respond to any questions you might have or shall we let Jim go ahead with his areas of University Hospitals and talk about it collectively.

Mr. Teaford:

We just might add, doctors, that we did, as a Board, adopt the Affirmative Action Plan of the College of Medicine, as a sixth strategy. And likewise did it for the Hospitals.

Dr. St. Pierre:

Good point. That was just done recently. Jim --

Mr. Jim Nichols:

This is not on a slide, but I thought I would read to you the Core Strategies of the Hospitals and Clinics: improve market responsiveness and competitiveness of OSU Hospitals and Clinics; support the medical staff in developing a geographically distributed physician network; and establish a service network to attract the necessary patient volumes, consistent with College of Medicine's Core Strategy, that we have just covered.

The seven principal strategies of the OSU Hospitals and Clinics are broken into two parts: 1) market responsiveness and competitiveness; and 2) physician and services network.

Under the Structural Strategy, the first one is to improve the flexibility of the OSU Hospitals and Clinics to respond to marketplace changes. I think that the word flexibility is one that needs to be underlined here. Clearly, the strategic planning process of the Hospitals and Clinics, and also the College of Medicine, needs to be an ongoing type activity that is constant. In other words, it is not run one year and put up on the shelf for five years and then done again for another five-year period or some other applied period of time. There clearly is a very strong need, with regards to our structure, to be constantly reevaluating what we want to do. That integration and flexibility between the College of Medicine and the Hospitals and Clinics, and the other health sciences colleges is very important.

The other key point in this strategy is to improve communication among and between the College of Medicine, the Hospitals, and the other health sciences areas, as well as the main campus. It is extremely important that as we decide how we are going to move forward, that we move forward as a cohesive group in our activities.

With regards to the Financial Strategy in the improvement of the financial position of OSU Hospitals, cost effectiveness becomes a very key issue, as well as other creative ways to provide funds. I think one of the major issues that we need to work on is a clear awareness among the employees, medical staff, College

Mr. Nichols: (contd)

of Medicine personnel, and the entire health sciences area is the need for cost effectiveness. I think often that that point is not driven home enough and it is clearly an issue that needs to be continually strengthened with our employees.

In today's competitive health care environment it is going to be extremely important to work on our productivity. There is no question about it. The federal government, primarily for Medicare and Medicaid, is controlling the amount of revenue that is going to come in for the large parts of the hospitals, and other third party payers that we have are also using various controls to hold down their costs which decrease our revenues. As a result of that, efficiency, cost effectiveness, and productivity becomes very key and an important point with how we need to operate the University Hospitals.

In short, with regards to the Hospitals and Clinics, we need to function very much -- we are really no different than a business. We do have a teaching and research mission, we do have a patient care mission, there is no doubt about that, but with regards to our business activities we need to begin to function more and more and think more and more like a business.

I am only briefly going to touch on the Centers of Emphasis Strategy, which really coincides with the College of Medicine. I think Dr. St. Pierre has covered that very well, but I only want to comment on the areas that are initially selected for emphasis are clearly those that are also being focused on by the Hospitals and Clinics. As we work on our marketing efforts and our public relation campaign, those are the six areas that are going to receive the major concentration.

With regards to a Consumer Strategy this is an extremely important point that needs considerable additional work at the Hospitals and Clinics. We need to create that user-friendly environment. We are talking about the Clinics building; we are talking about Ambulatory Surgery; we are talking about access to the medical complex; we are talking about the patient feeling good about their experience or as best they can about their experience in the hospital. You know as you work with a patient, their families and friends, as they come into the hospital, you can do a hundred things correctly, but if one or two things go wrong -- it doesn't have to be something that goes wrong with the medical staff, it could be something that goes wrong with the housekeeper or something that goes wrong with someone in the dietary area -- that bad experience creates a sour taste in our customer's mind. This is what we are trying to avoid. It is going to be very important to understand the areas that our patients are most interested in. We need to coordinate our ability very carefully in order for them to access these areas and receive care in a timely fashion. We have already started that in several areas, with both a patient and financial ombudsman with regards to those particular problems. But the entire area of access, signage, and so on, that many of you are familiar with, is clearly an important

Mr. Nichols: (contd)

issue. These are some additional areas with regards to user-friendliness that are in your books.

With regards to a Marketing Strategy -- with the situation we have in today's health care market we can really no longer sit back and expect that the people are going to come into University Hospitals. They will come in for tertiary type activities, many times because of the particular medical schools we have, but for many other activities we are going to have to be much more aggressive in marketing our skills to the general public. And in marketing them, frankly, to the physician network areas. This, in essence, will become our principle communication strategy and our principle operating strategy for the Hospitals. We need to clearly capitalize on the strengths of the faculty, clearly capitalize on those areas of emphasis that we talked about previously, and we clearly need to develop a very strong and focused campaign that is appropriate for a university medical complex, a tertiary care facility in the marketplace. I don't think we are aiming, and we are not aiming, for a Riverside situation or some other situations that you have seen around the State. But we need something that is appropriate for our medical staff and our particular mission with regards to medical care, teaching, and research. That is primarily going to come from focusing on the principle areas of strategy that we have.

In regards to the Local Area Strategy, again, we are primarily talking about our out-reach program. MedOhio is an example of that. Another example of that is the Stoneridge that we discussed at the Board of Trustees' retreat. SkyMed is another example of that. These and other models that we are working on are typical of those kinds of local area strategy -- that is being in the Central Ohio area -- necessary for us to get greater penetration. We need penetration because we need the referrals from the physician networks into our attending physicians so that we can continue with the appropriate patient mix for our teaching and research missions. It also ties in clearly with our abilities to assist the medical staff in identifying those physicians who are in the community and wish to affiliate with University Hospitals. There have been some considerable strides made in this area in the last couple of years. We anticipate that there be other initiatives that will be coming to the Board of Trustees in the future and also to the Hospitals Board.

This is the second slide on the Local Area Strategy. We think one of the areas to do that is the strengthening of continuing medical education, as well as the Speaker's Bureau and working with our alumni groups. Just like we think of working with our alumni of the University, in terms of areas like fund raising, we need to think in terms of working with our College of Medicine alumni in terms of developing our physician networks for a referral basis.

Finally, with regards to the last strategy -- Referral Area Strategy -- you will find that the referral area now extends

November 3, 1988 Joint Meeting, Board of Trustees and University Hospitals Board

Mr. Nichols: (contd)

beyond the Columbus area and includes virtually all of the counties in Southern and Southeastern Ohio and also into other states. As you all know, we receive about 50% of our patients from outside of Franklin County. We have a very significant and positive reputation, probably better outside of Franklin County than inside Franklin County. But the strengthening of that entire referral area is very crucial. An example, I think, that best illustrates the situation -- there are two hospitals in Portsmouth, Ohio, that used to give significant referrals to the physicians at University Hospitals. As you are aware, those hospitals were purchased as part of the U.S. Health Corporation, the Riverside Umbrella Corporation Health Care. We don't get referrals from those hospitals anymore. That is not to say that we are going to go out and acquire hospitals in Portsmouth or some other city, we are not going to do that. But those relationships that we established with hospitals and specific areas of strength among our faculty are very crucial in getting them to come in. We have been talking with people more and more in the last year or so. Currently, we have discussions going on with three or four hospital areas and physician groups outside the Central Ohio area that will lead to the kinds of referrals that I have been talking about.

Again, we feel that the programs that we need to work on, our principle programs, need to be consumer oriented. Again, the business side of the issue. The need for the physician networks for feeder purposes and referral areas, as well as the Hospitals in the feeder area are really crucial.

The referral issue, with regards to the hospital, is very important to providing enough revenue and enough profit, so we can hire the quality of employees that we want; we can purchase the types and amounts of capital equipment that are important; we are able to upgrade the physical plant; to add new additions to the physical plant, all for the purpose of supporting the teaching and research missions of the College of Medicine and the Hospitals. I think that really becomes the bottom line with regards to the entire financial issue. As you know, there are no shareholders to worry about in the sense of having to divvy up or send out dividends or create profit, but the more efficient we are at the Hospitals, the better we are at making a stronger bottom line and the better we will be at providing the employees, the equipment, and the physical plant. All of which are necessary to carry out the overall mission of the University. Dr. Tzagournis --

Dr. Tzagournis:

That is the end of the monologue. We are ready to tackle questions or hear your comments; not only the three of us, but I think, Dr. Clausen and Dr. Mekhjian are here and are willing to answer questions.

November 3, 1988 Joint Meeting, Board of Trustees and University Hospitals Board

Mrs. Bowser:

Manny, tell them what their titles are so that the Board will know.

Dr. Tzagournis:

Dr. Mekhjian is Medical Director and Dr. Clausen is President of the Medical Staff.

Mrs. Bowser:

Charles, it is up to you.

Mr. Lazarus:

My questions have been answered.

President Jennings:

All of them, right Charles?

Dr. St. Pierre:

I think it is important for the University Board of Trustees to know that we fully recognize that University Hospitals is essentially the clinical laboratory, not only for the College of Medicine which includes the School of Allied Medical Professions, but also is the site where clinical training goes on for a small portion of the College of Pharmacy -- the Division of Clinical Pharmacy, within the College of Pharmacy. There is some training that goes on in the College of Dentistry and, of course, the College of Nursing. I met, over the course of the development of this plan, with not only the Deans of those Colleges, but in many cases with their own strategic planning groups that are active. In fact, Dean Cassady of Pharmacy has co-opted me to serve on his long-range plan. I think it is important to keep those kinds of things in mind, because while the programs are not nearly as large and extensive as the one for the College of Medicine, it clearly is one of the reasons for being.

Mr. Bennett:

Over the next eleven to twelve years, as this plan becomes reality, one of your objectives is to involve the Hospitals Board in the process of strategic planning. How will we track and monitor progress as the years go by against -- are there going to be benchmarks established? How will we know how well we are doing, in terms, of meeting timetables on that plan?

Dr. Tzagournis:

Ron -- he is Chairman of our Committee --

November 3, 1988 Joint Meeting, Board of Trustees and University Hospitals Board

Dr. St. Pierre:

One of the things I normally say when I start a presentation about strategic planning is that this is really nothing more than a summary progress report, because it will be ongoing. There will be no stopping and starting point. As we move into this process, each side in this particular strategy of University Hospitals and the College of Medicine, is going to have working groups that will be dealing with each of the major strategies. Obviously, the Hospitals Board has its own strategic planning committee which will develop how they will monitor. As these groups begin to flush out the five skeletons that we showed here, at least as it stands with the College of Medicine, they will set goals, timetables, evaluative points, and those mechanisms by which we'll know we will be making progress, and they will report back and forth. The Board, as this structure dictates, will become the monitoring group for both sides of the plan. So, I think as we develop this as an evolutionary process, we develop those kinds of benchmarks and evaluative criteria that will tell us where we are going and what directions we should alter. We are in a very dynamic environment and we may be making a lot of effort and no progress, and we would then have to change our strategy. I think that is one of the key features of any kind of strategic plan, the ability for us to be flexible.

Mr. Nichols:

I think, from the point of view of the Hospitals, the next step is really to develop the operating plan and road maps on how we are going to proceed in each area. Part of that will clearly be a benchmark as to how we are doing.

Mr. Teaford:

It seems to me that part of that, too, is that when things come to the Hospitals Board, any new innovative ideas, they all have to say "this is in fulfillment of this part of the strategic plan." In other words, it shouldn't come to the Hospitals Board without an explanation about where it fits.

Dr. St. Pierre:

I think that is true. Also, the Office of Academic Affairs and the Provost have determined that all colleges are going to begin strategic planning. That is going to be the mechanism for which the budgeting process proceeds. So, the Provost and his staff are going to require that each of the Deans come in and as they establish various requests that go to the University, it is going to have to coincide with the strategic plan and its impact.

President Jennings:

Ron and Bill, along with your question about measuring, maybe Myles, you could say a word or two about what is being done on the institutional-wide basis -- which is virtually identical to this, but also is addressing the measuring issues, too.

November 3, 1988 Joint Meeting, Board of Trustees and University Hospitals Board

Dr. Brand:

I apologize, I have no slides. About a year, eighteen months ago, we started university-wide strategic planning. The main feature of that planning is that we are not trying to create a university-wide single plan, but rather we are asking each college to develop a plan for itself. The College of Medicine did not have to be asked since they are already underway through the efforts of the Hospitals Board. But we expect each college to come up with a plan, for themselves, similar to the kind of flexible and goal-oriented planning that is taking place in the College of Medicine.

In the past, we have had an annual budget process by which colleges would come forward with requests. The first year I was here, I had no way of determining how that fit into the overall development of the college. Was this a haphazard request or was this part of a long-range development? What we need to have is the strategic plans, like this one, to drive the budgetary process that will be in place approximately December 1 of this year. And so next year's budget process, when we allocate funds this spring, as we do for the College of Medicine and any other college, we will do it on the basis of goals and objectives that the college has set.

One thing I should emphasize, and Ron spoke very well about this, but let me reemphasize this, is that the process here is at least as important as the outcome. It is the process of getting people involved and it makes no sense to charge up the hill by yourself. People have to come along, be part of the process, and accept the goals. Yes, there will be outliers. You won't be able to bring everyone aboard, but you have to have consensus so that everyone is pulling in the same direction and working together -- not university-wide, because each College on a decentralized model must develop its own strategic plan. Then from central administration what we need to do is two things: coordinate those plans, so that they are not in opposition to each other; and find ways to support university-wide endeavors -- multi-college efforts -- no single college can develop its own effort. For example, Biotechnology and Molecular Biology as you listed on your second list yes, that involves the College of Medicine, but it involves a biotec center, the College of Agriculture, and the bio sciences, pharmacy, math and physical sciences. So, we can't ask the College of Medicine to do all that, we have to coordinate it with each other. Secondly, there are some activities that are university-wide, that we all have to bring to bare, such as the libraries. No one college can support the libraries, and we can't be a great University without great libraries. Similarly, with information technology and computerization that supports the entire campus, and we need to do that in a way that is supportive of the various activities of the colleges.

How will we measure this? We will set up benchmarks, clear benchmarks. I think of the planning process as a five-year process, plus or minus a year or two, with constant revisions. We know more about next year and the third year, a little less by the fourth and fifth year. As we get out, we expect changes,

November 3, 1988 Joint Meeting, Board of Trustees and University Hospitals Board

Dr. Brand: (contd)

and we expect the process to continue. That is the nature of the process. But we have to set up benchmarks so we can respond to the changing environment, so we can take advantage of new opportunities. For example, as we attract a Nobel Laureate to campus who is interested in theoretical physics and condensed matter physics, this is an area we are obviously going to move in. We are going to take advantage of that opportunity. It was not present a few years ago. So we need to be able to be flexible and respond. That is a brief answer.

President Jennings:

I think that is a very good answer. I think the thing that really does need to be emphasized, what Myles said, is the process, particularly in an academic institution, is more important than the particular activities. Because, most of the great results that we may hope to have are not predictable in the sense that they are in most other operations. Myles mentioned attracting a Nobel Laureate in condensed matter and physics. That is an accident, in the sense that Ohio State has become one of the world's major supercomputer centers. That now moves the process to a different type of activity. Ohio State is becoming a major heart transplant and transplant research center. Because of that fact, we attracted a few years ago, an outstanding surgeon from the University of Wisconsin, Dr. Myerowitz. It is that type of flexibility. I think the plan you just saw is an extraordinarily good one in the context that it is flexible and it does allow for that type of accidental activity. But remember when I say it is accidental, not accidental that you get somebody excellent like a Hank Myerowitz, it is accidental as to what you get from him. We can't always predict that, but if we know going after it, we are going to get something outstanding on the activity.

Myles, for example, is being somewhat modest. This Board of Trustees was given a presentation a few months ago on materials science, where Ohio State is doing some extraordinarily innovative work in materials science. We pretty well know that we are going to have a Center for Materials Science very soon. But let's, at Ohio State, wait to establish that until we have seen all the strategic plans and how that fits into it. We are close enough in that activity.

Another thing, I think, that has changed is that in times gone by, we could, without a lot of planning, take advantage of our strengths. We knew we were good in chemistry, we knew we were good in political science, we knew we were good in dance, and we could take advantage of that. Over the years, we have exploited those opportunities. The decisions now are getting finer. It is just not obvious as to what we should be going into, as it has been in times gone by. That is why the planning process is coming along now.

The other thing that Ohio State is way ahead of the rest of the academic world in is our program review mechanism. As you all recognize, we were criticized in the press fairly recently over

President Jennings: (contd)

at WOSU, which was going through our program review mechanism. The criticism was essentially, "why was this happening?" That is the essential key of accountability, that we can't measure it on a quarter to quarter basis. But what we need to do consistently is every five years, and that is a pretty good cycle, is get outsiders to come in and take a look at us and tell us where we're good or bad, or where we are weak or strong. That is the key to accountability. That is why Myles says it is a five-year plan. That is why when the press asked me, for example, "what I am going to do about WOSU?" My answer was, "I'm going to wait until the process is finished." Because the last step on WOSU, of course, is what we call a memorandum of understanding, which is the five-year plan with the measurements in it. And we aren't going to go into it now. That becomes the key ingredient on a collegiate-wide basis, but also on a public broadcasting basis.

I think that the other thing that needs to be said is that the Hospitals Board has done an extraordinarily good job in working on this, in providing some of the motivation, providing some of the tough decisions on developing this planning process, not only for the Hospitals, but for the College of Medicine. It is absolutely essential that a teaching hospital and a medical school work together. There are going to be tensions. There is no doubt that there are going to be tensions. When Manny talks about his research grants going up, doubling in five years, that is marvelous. But it is not so marvelous for the Hospitals, because those things by and large are expensive for the Hospitals. But working together like that and doing things together is an extraordinarily important thing. And I think this plan presents an opportunity for the institution really to make progress in Medicine.

I also might add that we have now a practice plan that is basically working. There is always tension there. But it is a good plan and a plan that is consistent with most other great university teaching hospitals. It is going to be hard to accomplish this. The thing that, I think, is absolutely clear is that they will accomplish it long before the world recognizes its been accomplished. Reputations take a long time to change. We will be one of the top ten medical schools, but it won't get recognized for probably ten years after we become one. I have preached enough.

Mr. Teaford:

One more thing that the Board of Trustees should appreciate, is that this is being submitted to us for our approval and that the Hospitals Board does expect our action on this. I think that it is important that we do that. So, I think, that we need, as the Board of Trustees, to -- if we have questions about this, we need to address those now to the Hospitals Board. I, as a part of both, think it is a wonderful improvement to our process as the Board of Trustees, and I want to make sure that we understand it and do adopt it.

Mr. Teaford: (contd)

There are a couple of things that Shirley wants to point out on the summary that call for a discussion, and I think that we ought to make sure that we have that discussion.

Mrs. Bowser:

Part of being a good Trustee is asking the right questions, right? I know that this is a large document for the Trustees. They have had time to read it and I am sure that they appreciate the summary, but I would like to ask both the College of Medicine and the Hospitals to point out some areas in this where there is a difference of opinion, or where you feel that the Trustees should certainly know that there is going to be some difference of opinion or a problem. I don't know if you, Jim, want to start that off or if Manny does? I went through this three-year process with you and I know that it has been thoroughly done. When you get that many people together, you are bound to have differences of opinion. I think that is healthy. So, maybe you could just sort of summarize some points where the Trustees should be aware that there is a difference of opinion. Ron --

Dr. St. Pierre:

Mrs. Bowser, I don't think there is any of these strategies that you couldn't say there was some degree of conflict -- I think "tension" has been used, which I like. Because tension in many respects is healthy and it is good that we have it.

I think that you will find that there are significant people, within the College of Medicine and on the Dean's staff, who would say that our process of reducing by 2% per year the number of students, is not enough. That given what the demographics show, we may be -- if we stay at that particular level -- we may be taking students that will require our educational process to take a longer period of time, a great deal more remediation, etc., etc. But, I think there we are going to have a give and take, back and forth. We probably are in a position where, unless we have some very innovative ways, we are not going to significantly increase the number of faculty, which will cause the ratio to be adjusted enough and really give the kind of support to the research activities that we have. So there is a little tension there.

I don't think anybody is going to give us any difficulty, both locally or in our wider environment, in terms of wanting to increase the amount of extramural funding. The President pointed out though that it does become expensive if we expect those kinds of activities to go on within the University Hospitals area. The University Hospitals and the Board have been very responsive to providing research opportunities in the case of giving the environment the appropriate ambience for the person to carry out the work. Heart transplantation is a perfect example.

Dr. St. Pierre: (contd)

The resource strategy -- notice what we are doing -- we are going to be looking towards ourselves. We talked very quickly about enhancing the practice support -- practice dollar support. We may be in a very amicable situation right now, but I think that we have to pick and choose our battles as to how we off-set that. Because the amount that comes back to the dean, relative to our competitive peers, is less in our particular college. Michigan invokes a much bigger tax on their faculty.

Faculty recruitment -- I don't think we have many problems within the College. We will have, at the next meeting of the University Senate, a discussion of the continuation of the regular clinical track. The Provost asked a review group, in response to the mandate from the University Senate when the regular clinical track was approved, that in the fourth year there be a review. There were significant individuals who felt that the cap, which presently is at one-third the number of regular faculty, that that cap be either greatly raised or removed. So that it became the responsibility of the department chair, the dean, and the provost to determine the appropriate balance given the needs and responsibilities of the particular unit with the College of Medicine. That, I think, is going to make a real impact. As the review committee reviews the present situation, we are not in a stance where all of the clinical departments are bumping their heads against the ceiling, but we are rapidly approaching that. I want to emphasize that I don't think there is a clinical department chair that doesn't feel that that is a very important component to his or her ability to carry out the mandates of this strategic plan.

The Centers of Emphasis -- I have already said that there are some people who are in the lower category and want to be in the upper category. But as I've used the analogy, "that if you stick around long enough, pretty soon your horse will come around, so that the brass ring is within reach." What they have to do is persevere and to work within this. I think that if we can give some sense that eventually your key project is one that is going to make it to the top, then that degree of disaffection with the process will be reduced. That is where I see the tensions within the College.

Mrs. Bowser:

I think that is helpful.

Mr. Teaford:

One of the ways, I presume, your Center of Emphasis moves up is that if you attract enough extramural funding so that they feed themselves.

Dr. St. Pierre:

One of the areas that is down there, within that second category, called "Molecular Genetics." If, through the Provost's Advocacy Program, we can get a Nobel Laureate within

November 3, 1988 Joint Meeting, Board of Trustees and University Hospitals Board

Dr. St. Pierre: (contd)

molecular genetics, I can almost guarantee that will move to the top.

Dr. Tzagournis:

Dr. Clausen spent a lot of time in the trenches and she might very well be able to identify a few other of the problems.

Mrs. Bowser:

I just think it is helpful to know what these are.

Dr. Clausen:

Well, I don't think there is any question that one of the reasons we summarized it so briefly, was to abstract out of a 64 page plan -- taking away the God and motherhood issues -- the things that you really have to decide about. I think some of these are reasonably strong alterations in existing policies.

There was less tension than you would have thought over the Centers of Emphasis. And I think that was because after we developed the criteria, which everybody agreed to, when they applied the criteria they were so obvious, that I don't think anybody even whimpered about it. Some of them were disappointed, but nobody complained, because they agreed with the process in advance. So, that was an area of controversy that didn't happen. It really didn't.

One that is an obvious, constant, and existing tension from the faculty perspective, representing the medical staff, is what is it we are supposed to be. The original plan said that we were expected to get extramural federal research funding, while at the same time doing more clinical practice, so that we can enhance our practice plans to support our departments. And the obvious question was "well, which is it?" The first plan said both. It is impossible. It is humanly impossible to do both and be good at everything. So, we cried and pleaded and groveled and everything, to change that in the plan to "or" rather than "and." It was almost heartbreaking from the Promotion and Tenure Committee point of view, to sit and listen to the Vice Provost tell us "that young faculty have to be warned, not to engage in too much clinical practice." And then, their chairpersons had a strategic plan that said they must engage in more clinical practice. So, we have to decide which is it going to be. The University needs to recognize that both are equally valuable, but that you can't do everything. So, we put it in here, and we would like for you to think about it.

President Jennings:

Well, and I think that is what Ron was saying about the debate on the Faculty Senate issue, on the clinical professorial track that is there.

November 3, 1988 Joint Meeting, Board of Trustees and University Hospitals Board

Mr. Teaford:

I think somebody needs to tell the Board members what a clinical faculty member is. In other words, you said on one basis that they don't have tenure, what are the other reasons that they aren't on tenure track?

President Jennings:

It is not on tenure track. Let me try and explain what that is -- and the great research institutions do this. This is a person who will be employed at the institution on a contractual basis with a relatively fixed salary, although there could be some additions depending on the income they bring in. But their responsibility will be patient care. There may be some teaching, there may be some research, but their primary responsibility will be patient care. They then will be evaluated on a five-year basis, with job security increasing at various levels on the basis of those evaluations. But they will not be evaluated on the basis of their teaching or their research activities. They would be evaluated on the basis of their clinical practice activity within the Hospitals.

Mr. Teaford:

Are they within the practice plan?

President Jennings:

They will be in a departmental practice plan, but they will be on a fixed salary.

Mrs. Bowser:

And how does tenure work with this?

President Jennings:

There won't be any tenure, but there will be job security.

Mrs. Bowser:

So, it is like Cooperative Extension.

President Jennings:

No. Cooperative Extension is tenure track. There are a variety of levels up there where the contracts get longer as you perform --

Dr. St. Pierre:

As you first come into it, you are evaluated yearly like everyone else. During the fourth year of your original employment you are given a thorough evaluation. The intent is will you be given a fifth year contract. If a fifth year contract comes up, then the sixth year becomes the first year of a five-year term appointment, renewable every five years.

November 3, 1988 Joint Meeting, Board of Trustees and University Hospitals Board

Mr. Teaford:

So, you go from an annual appointment, to a five-year appointment.

President Jennings:

That is where the job security -- the key thing is that the responsibility is clinical, rather than teaching and research.

Mrs. Bowser:

Well, that also has ramifications in the hospital because if you don't have doctors that are willing to take care of patients, then there are beds empty in the hospital.

Mr. Teaford:

In addition to the fixed salary, they are beneficiaries of the practice plan. They get paid within those plans, too. So, in other words there is a financial incentive as well.

President Jennings:

Oh, yes.

Mr. Barone:

Where does Ohio State stand? When you are talking tenure and teaching, where do we stand in the field of medical research? I don't really think that you are expounding on that. Being on the Research Foundation Board, you know, when the public gives us all this money -- I don't hear enough, Ed. What are we doing in the field of medical research? You are talking about tenure, are these teachers -- are they strictly taking care of patients, are they working like Dr. Salk did? Because that, to me, is very important. Should you find a cure, like Dr. Salk did, it changes your whole hospital foundation and your manner of managing that hospital. Especially a university hospital. Are any of our teachers doing any medical research? I don't seem to find out from anybody, at any time, where we stand on that position.

President Jennings:

One of the reasons this strategic plan is so important, is that at this stage we are not doing the amount of research one would expect out of a medical school the size of The Ohio State University. I don't think there is any question about that. At the same time, our rate of change is far exceeding virtually anybody in the country. The chart that Manny put up, showed a doubling of the research dollars -- which in medicine is a good measure of the totality of the research that is being done. One of the reasons this plan today is so very important is because in order to get into the top ten, we are going to have to not only double that \$30 million, but it probably is going to have to get into the \$90 - \$100 million range in today's dollars in

November 3, 1988 Joint Meeting, Board of Trustees and University Hospitals Board

President Jennings: (contd)

terms of research grants. The twenty percent a year rate of change is what is the critical measure right now, because we are not a large research institution at this stage. But Ohio State is moving in that direction. And that is really what this plan is all about -- it is about how we get there.

Hopkins is the largest research grant institution and 60% of the procedures done in the hospital at Hopkins are done by clinical faculty. Whereas, as you heard, the number that Manny was talking about, we have 65 clinical faculty out of 400, or about 15%. We must increase that clinical faculty substantially so that we can take a Hank Myerowitz, or take one of these young gunners who is going to develop that AIDS cure or that cancer cure, and support them while they do that. John, the basic answer is we are low today, but we are rapidly changing. That is what is causing the hospital so many problems. They have been accustomed to having a medical faculty over there that does nothing but clinical work. Last year our University Hospitals did 1000 heart procedures and 17 appendectomies. Every hospital director in the country will say you make your money off the appendectomies. But when Hank Myerowitz transplants a heart, or somebody else does a full bone marrow transplant, the money for the hospital is just zapped right out the window, because those things are costly. What we have to do is get through that period to become a research hospital.

Mr. Teaford:

I think it means we have got to do what Dr. Clausen said and put "or" in there. We have two distinct missions, both of which are absolutely essential to the future of the hospital.

President Jennings:

That is right. And that is what the intention is to put "or" in. But to put "or" in it, you have got to get the institution and the rest of the faculty -- because everyone knows that is an important issue for an academic institution -- as to what are the duties of a faculty member. The duties of a faculty member are teaching, research and service. What we are saying here is because of special circumstances, we are creating a faculty member whose duties are just service.

Mr. Barone:

I bring it out because it is also important. Mr. Immke gave \$1 million to the University for cancer research, now the public, I believe --

Mr. Immke:

\$2 million.

November 3, 1988 Joint Meeting, Board of Trustees and University Hospitals Board

Mr. Barone:

I think the impression they get is that Ohio State University is going to take these funds and do cancer research. I never hear anything -- I get the question asked of me, but nobody expounds on what our cancer research is and even if it is functioning. If I were Mr. Immke, I would wonder where my \$2 million went to?

President Jennings:

That is of course why cancer showed up as number one up there.

Mrs. Bowser:

The second part of my question was a response from the Hospitals and I want to be sure we have time to hear that side, too.

Mr. Nichols:

Let me give, what I would call, three areas where some people are going to have concerns or disagreements. They are broad based so they don't focus in on any one of them, but that they encompass multiple ones of the particular strategies. Number one is communications, advertising, PR, we have to become more active in terms of publicizing ourselves to attract patients and attract physicians. We started that process recently with two programs: 1) MedOhio advertising -- which has been print advertising and radio advertising; and 2) we have also done it with the Ask-A-Nurse program, which has been primarily with print advertising, but it is going to start some T.V. in about two to three weeks. Which is the first time it will be in T.V. advertising.

There is not complete agreement among the medical faculty on these issues. There is not complete agreement within the Hospitals personnel with these issues. And I know there is not complete agreement within the community. I had some letters of complaint that have come to me. The past president of the Medical Academy of Central Ohio was extremely displeased with some of our advertising and had some very nasty things to say about it. These are our first two test runs. We have made some improvements in that area. But clearly where we are going to increase ourselves -- we are not going to be a Riverside, as I mentioned before. Absolutely, we must begin to publicize our areas of emphasis, to increase our competitive stature, to attract additional physicians to the network. That is number one.

The second issue is our outreach programs. There is no question that there is controversy involved with outreach. If we look at a Riverside, well they have a few physicians in an office building there next to the hospital, but their basic physician feeder group is all over the community. Our basic feeder physician group is right in OSU Hospitals and Clinics. We don't have that impact out in the community. We need to get the feeders, the feeding of patients coming in from the physicians of Central Ohio and from other hospitals. To do that means becoming active in several ways. MedOhio is an example of

Mr. Nichols: (contd)

that. As you all know, that was not warmly received by everyone -- our acquisition of MedOhio and our involvement in that program. Not everyone is pleased that we are involved in SkyMed. Not everyone is pleased that we are involved with the Stoneridge. Other types of affiliations that we are talking about with physician practice groups in the community, with individual physicians, with hospitals and clinics throughout Central and Southeastern Ohio, are all areas that are going to cause controversy of one type or another. There are going to be people that feel we are going strictly into the private area. This is not unlike the discussion you've heard about areas like bookstores and other such activities.

Thirdly, you are going to hear some dissatisfaction from the employees. Some degree -- some of you have already heard, I know. In the process of becoming more efficient, in the process of structuring ourselves to be more competitive, in the process of setting up a more business-like structure at the Hospitals, in terms of how we operate from a service delivery point of view, requires a number of things. A key one, for example, is that we are not going to be able to have as many employees at the Hospitals as we have had in the past. And that is an area some of you have already heard about. We have had complaints from the nursing staff, we have had complaints from support staff, and I think we can expect that, to some degree, those will continue. I believe that if we properly do it, we will be able to mitigate most of that. But we are not cutting down below what other hospitals are, we are not even down as far as many of them. But as we look at teaching and research hospitals and as we look at community hospitals, we are clearly much higher. And I guess the only way to say it is that our employees are used to having more people around. So, as we become competitive we have to have fewer people around, and those who remain have to be more efficient. So, I think, we can expect that will be a third area where there is not complete agreement, but also we will be hearing some complaints regarding that. Those are the three that I would mention at a broad base.

Mrs. Bowser:

Thank you. Charles, you can't go through the meeting and not comment.

Mr. Lazarus:

I would like to comment that I think it is terribly important that we all realize that the Hospitals is here to support the program in the College of Medicine. That is its basic function. And if the Hospitals is doing some things that are inconsistent with the goals of some of the individual members in the College of Medicine and some of their ideas, it is only to further the strategic plans and programs in the College. We have to go out and find ways to provide more patients in the Hospitals, to raise more money through a clinical faculty to support the research that is in the College of Medicine. I

November 3, 1988 Joint Meeting, Board of Trustees and University Hospitals Board

Mr. Lazarus: (contd)

think the College of Medicine and the Hospitals have done a superb job of integrating the direction they are going. When we talked two or three years ago and said this was the kind of direction we needed. I think that they have achieved it and done a great job in doing it.

Hospitals Board Member:

Mr. Chairman, I would just like to concur with what Mr. Lazarus said, and on behalf of the Hospitals Board, we certainly appreciate the opportunity to present this plan to you. Personally, I think that we need some form of consensus, if not, a direct ratification of this strategic plan, so that gives us some direction -- are we going in the right direction, are we doing the right thing. If we are not, if you want us to alter our course, tell us which direction you would like us to go, and from there we will proceed.

Mr. Immke:

I think I can assure you that we will meet on it very quickly and you will hear back from us very shortly.

Mr. Teaford:

You are going to get an absolute nay or yea response, we are not going to take it under advisement forever.

Mr. Immke:

Jim --

Mr. Nichols:

Mr. Immke, I sense you are going to close here fairly quickly, and one other person is going to be joining us for dinner who has been in the room and who has been involved in the plan. I wanted to at least introduce him to you. John Cottillion is in the back of the room. Stand up, John. He is on the senior management team at the Hospitals; he is the administrator for marketing and communications and has had a very active part to play involving the plan. He will join us for dinner this evening, but I wanted you to meet him.

Mr. Kessler:

Mr. Chairman, would it be appropriate to have a motion now on this plan? Or do you prefer to --

Mr. Immke:

I think we should have some discussion on it, but I think we can do that relatively quickly -- in December.

November 3, 1988 Joint Meeting, Board of Trustees and University Hospitals Board

Mr. Kessler:

The thing I would say, speaking for the Board, we want to compliment and thank you all on the Hospitals Board for the tremendous amount of time and energy that you are devoting for the Hospitals. I think the community appreciates it and I know we as a Board do.

Mr. Immke:

We thank you all for the presentation and the capsulizing of your strategic plan. I can assure we won't dilly-dally about it. Any other questions or comments?

Mr. Teaford:

I think, too, it is a model for the rest of the University. And I am happy to hear that they are doing it.

Mr. Immke:

We will now recess for dinner, which will be served in the Insurance Room which is all the way down the hall and to your right. The Board of Trustees regular meeting will convene with the committee meetings at 8:30 in the morning and the regular meeting at 10:00.

THE OHIO STATE UNIVERSITY
OFFICIAL PROCEEDINGS OF THE
ONE THOUSAND TWO HUNDRED AND FORTY-SIXTH MEETING
OF THE BOARD OF TRUSTEES

Columbus, Ohio, November 4, 1988

The Board of Trustees met at its regular monthly meeting on Friday, November 4, 1988, at The Ohio State University Fawcett Center for Tomorrow, Columbus, Ohio, pursuant to adjournment.

* * *
Minutes of the last meeting were approved.
* * *

November 4, 1988 meeting, Board of Trustees

The Chairman, Mr. Immke, called the meeting of the Board of Trustees to order on November 4, 1988, at 11:00 a.m. He requested the Secretary to call the roll.

Present: Leonard J. Immke, Chairman, Shirley D. Bowser, Hamilton J. Teaford, John J. Barone, Deborah E. Casto, and John W. Kessler.

--0--

Ms. Casto:

Thank you, Mr. Chairman. I would like to call on Mr. Ihrig who has some statistics for us about our freshmen.

Mr. Ihrig:

Thank you, Madam Chair. Under the orange tab, Special Reports, are the official enrollment reports for the Autumn Quarter 1988, prepared by the Office of the Registrar. The first three pages are of written materials and explanations and I will start on the fourth page of that document which is Table I, "Total Enrollment by Campus."

The overall enrollment for the University for Autumn Quarter 1988 is 59,547 students. The head count was 53,669 on the Columbus Campus. It is interesting, the Columbus Campus is up about 1%, and there is an even higher percentage of increase on each of the Regional Campuses this year. The most significant one is at Wooster, with a 26% increase. That campus had a significant decrease in enrollment about four to five years ago. The faculty on that campus have gathered together and reevaluated what they were doing, worked very hard on their programs and recruited students throughout the state. This is a direct effort on their behalf to turn that enrollment situation around. There is a significant increase and it looks like it will continue into the next year.

The enrollment increases at the Regional Campuses -- they are up about 8%, with Newark the highest at 14% -- are consistent throughout the State with what has been happening with the Technical Colleges and the other Regional Campuses around the State. The community colleges' growth around the State are just about the same level as the University's -- it is under 2%. But the Technical Colleges and the Regional Campuses are the ones where the real growth is showing right now throughout the State of Ohio.

Table 2 tends to show where the students have come in, how many are returning students or new freshmen. At the top of that table under the Undergrad, NFQF means "new first quarter freshmen." That is our inside terminology to identify a new first quarter freshmen from one that is still a freshman after being here several quarters. These are the entering freshman class for the Autumn Quarter. They are up almost 800 from last year, 784.

At this point, I would like to digress a little bit and give some background on the overall process. The team work that is involved to bring these enrollments together and getting the students into the University is significant. It starts off really with the contacts the students have with University faculty and staff way before their

November 4, 1988 meeting, Board of Trustees

Mr. Ihrig: (contd)

preparing to go to college. Those contacts and the impressions of the University are very important. Then, the Admissions Department, headed by Jim Mager -- and Jim is in the audience here -- and Jim's office, Admissions, is a part of the area of Student Affairs that Russ Spillman heads under the Provost, Myles Brand.

Mr. Kessler:

Could Jim wave his hand so we could see him?

Mr. Ihrig:

Jim, you want to stand a minute? That is Jim Mager, Director of Admissions. He is another engineer who found the light of day. The Admissions Office makes that early contact and involvement with the students. Then there is the registration area where the students get involved with quarterly registration at the University and that is Gene Schuster's area. Gene is unavailable today, but John Dickhaut from the office is here in case there are questions. Those two offices make the initial contact with the students and get them registered and coordinate with the faculty to get the students scheduled in the classes.

Then we get into the real life of the University, and that is paying tuitions. That is where the Treasurer's Office gets involved with the Fees and Deposits Office. A gentleman by the name of Leonard Copeland, who works under Jim Nichols, handles the fees and deposits. And Leonard isn't here today, he is working collecting fees. This is the week they are making the refunds for the students who overpaid. In addition, the Treasurer's Office has Student Aid Accounting which gives out the aid checks to the students. Again, under Russ Spillman's office, headed by Mary Haldane, Student Financial Aid makes the aid awards, and, to provide adequate checks and balances, the Treasurer's Office actually gives out the award checks. So those offices all work together and have to be really tied together in their coordination with people, as well as with their computer systems to make all of this work.

Now, where does the Finance Office come into all of this? Why am I talking about enrollments? Well, we get in on both the very front end and the very tail end of this process, because right now our people are summarizing the data on all of these enrollments. The Board of Regents requires us, as of the 14th day of the Autumn Quarter, to give them a count of tuitions that are actually paid. That is the closing date. That is like the last day of the fiscal year in financial terms. But that is the day they take the count, on which we get our instructional subsidy. So all of these data that you have here are based upon those 14th day enrollments as the official count. Our people take those raw data from the Registrar's Office, the numbers of students by classes they are taking, and put that together for the Board of Regents. We are finishing that up now, so that by December's Board of Regents' meeting we can find the exact dollar amount we will have in instructional subsidies for the University this year.

November 4, 1988 meeting, Board of Trustees

Mr. Ihrig: (contd)

At the same time we have to take all these data and the same people in our office run projections using the actual retention of students and the student enrollments to project out what next year's class sizes will be. That sets the basis for budgeting for next year, as well as the overall planning of enrollment targets, especially for the entering freshmen, so we can remain in the 40,000 enrollment limitation on FTE basis. We will get into that a little more later.

Now after having dealt with enrollment -- I hate to admit it now for about twenty years -- and trying to project where they will come out, I will admit to you at this point in time, betting on us coming out on the exact numbers of enrollments are lower odds than playing the Ohio lottery. It is an impossible situation. We give you very good explanations, which came to light as I was reviewing some of our past explanations in preparation for this report. We are very good at explaining what happened, but we are very bad at anticipating what the students will do. They are always surprising us every year. And it is not the totals. We come in very close when we do our totals. The real problem is the mix. That is estimating the retention of undergraduates becoming upper division undergraduates, versus the freshmen coming in and what the graduate students will do. So you might keep that in mind as we go through these numbers and give you, again, our 1988 version of the explanation of the differences between what happened.

Now first place is that entering freshmen are up about just under 800 over what they were last year. And that is just about 600 freshmen above what we projected for our target this year. We originally had targeted 6,500; they are up about 7,100. What has happened here is that since 1981 or 1982 the yield rate from the students that are admitted as freshmen has been dropping each year. So, obviously, we predicted that it would drop again this year. Well, this is the year in which it turned around and the yield rate went up again. It cost us about 3 percentage points over where we thought they would be. When Jim Mager in the Admissions Office learned this and saw this happening with the data, we got early alert on it, we could not unadmit students that we had already admitted. We had to make very certain that all the rest of the deadlines through orientation and everything else were really held to. This was a rough time for the Admissions Office and the orientation people. In addition, we worked on transfers of the freshmen and sophomore levels to reduce them. We held the deadlines on those admissions to counteract the numbers of freshmen coming in. At the same time, students who had been enrolled previously and stopped out for a quarter or two or a year, and wanted to come back at the freshman and sophomore level, if they missed the deadlines, they were told they were early for the Winter Quarter. So, we made a lot of adjustments. When we look across the table of what has happened at the undergraduate classes, it is fairly close in grand total, it is just the mix within it that is creating the problem for us and creating a bulge in the freshman class and those courses throughout the University that the Provost, along with the colleges are trying to deal with this year.

The other interesting aspects relate to the retention rates. The continuing students -- we have had a jump in retention rates this year. Comparing the freshmen from last Autumn Quarter to this year,

November 4, 1988 meeting, Board of Trustees

Mr. Ihrig: (contd)

a year ago that one-year retention was 79.5%, it is up to 82.5% this year. That is a significant jump. That will have long-term impact as we continue the enrollment, because those students are here for an average of around 4 to 5 to 6 years. So that impact will be on the system a long time. That is why we are very concerned when we have an increase like this. It is not a one-year phenomenon, we live with it for the whole period of the undergraduate experience.

Now, to add more interest, the undergraduate students are taking fewer courses overall. The credit load -- the average credit load by the undergraduate students are down. At the freshman level they have maintained constant at about an average of 15.1 hours, in average credit hours per student. But we have had a drop of 13.93 down to 13.87 overall for the total undergraduate class. And those, with the large numbers we have, result in significant class load reductions. Some of that is, and we haven't fully analyzed this, as we have higher retentions and there are more students in the upper divisions, the lowering of the number of credit hours on the average is happening at the junior and senior levels. But there are fewer numbers of those students, so we don't have that data fully analyzed yet. The freshmen, the rank one students, are holding steady in the number of credit hours they are taking, and the sophomores are dropping a little bit. But the biggest reductions are happening at the junior and senior levels. We are still trying to understand what all that means.

In moving to the graduate students, their enrollments are up by about 5% this year. This is about 1.5% higher than we projected. And the retentions on graduate students were higher, as were the graduate admissions. But when you look at the graduate admissions there is something that is interesting also, and that is that the graduate admissions from other universities were down this year by about 4.5%, while the graduate admissions of our own undergraduates who have received bachelor degrees from Ohio State are up about 23%. That raises some interesting questions, also. I don't yet have a clear explanation of what is happening here and that is why I will quickly turn to Myles, if there are questions. The professional students are holding relatively constant and there is not a significant change.

Now that brings us on to the Columbus Campus to the infamous over-enrollment figures. The Board of Regents says that on a FTE basis -- this is not a head count, these numbers we have been talking about are on a head count. FTE means -- the simplified version of it is taking the total number of credit hours that students enroll in and dividing by fifteen -- that is considered an average load -- and you get the number of FTE -- "full-time equivalent" students. The Board of Regents say on the Columbus Campus, with certain exclusions, that Ohio State should be no higher than 40,000 FTE. And we have exceeded that the last several years. With these higher enrollments overall, I am pleased to report that our over enrollment has decreased -- from 598 last year to 218, was the number I was given yesterday getting ready to report to the Regents. Now, how can this be? It is the credit hour load. And another significant reduction in credit hour loads were in the graduate students. While the graduate students were up the credit hour loads were down, and I think that is a direct impact on what has happened with the tax situation, of taxing their

November 4, 1988 meeting, Board of Trustees

Mr. Ihrig: (contd)

stipends, that went into effect in January of this year. So the graduate students were taking a lower number of class loads so that their tuitions would be lower, so that their federal income tax rates would be lower. Now that that has been adjusted as of the October payroll, we will probably see a change in this Winter Quarter back to normal levels of credit hours. That is another uncertainty that we have in projecting for next year.

You may have read in the paper where the Board of Regents at their meeting in October passed a 1,000 FTE increase for certain universities in Ohio, that had this limitation on enrollments. We have 40,000 and the Regents are passing a rule that says we could go to 41,000. That will not change the 40,000 enrollment limit that we are targeting for at Ohio State. We have to be able to serve the students we have here, and we will not adjust our enrollment limit upward on this campus to 41,000. What the 1000 will do though is provide a buffer. In other words, the feasibility of us hitting exactly 40,000 is very slim. So if we err on the side of being over 218, as we are this year, that means that there would be no penalty or reduction of instructional subsidy. Now that is the good news. So that give us the buffer that we have been looking for. The bad news is that that is not intended to go into effect (that is the fine print) until next biennium, because the Regents already had their budget in place. Now if they had some extra revenues -- if all of the other universities and two year colleges don't claim all of their revenues, we may get some of that adjustment this year, but we can't count on it. And the over enrollment reduction in our subsidy last year was a \$1.5 million. The year before it was \$1.8 million. So that does have a significant impact on the instructional subsidy.

As a result of the Autumn Quarter emphasis on students wanting to come to Ohio State, that has spilled over impacting the Regional Campuses, but also onto Winter Quarter. On October 14 it was the first time in the history of the University that freshman admissions to the Columbus Campus were closed for the Winter Quarter. And at that time we had enough applications to have exactly the same number of new freshmen enrolled in the Winter Quarter -- 780, as last Winter. And with the increase in students on the Autumn Quarter campus and our ability to service those students and provide the types of educational experience that they look for in coming to Ohio State, we decided that we could not keep Winter Quarter admissions open. So the Columbus Campus freshman admissions for Winter Quarter and transfer students were closed on the 14th of October. So there is a significant interaction among what is happening among these various quarters.

Also, on the Regional Campuses it is interesting to note that their retention of continuing undergraduate and transferred admissions show the highest increases, but there is a slight decline in the entering freshmen on the Regional Campuses. That is an interesting phenomenon. They are retaining their students longer and doing more with their students on those campuses and getting transfers, but their new freshmen are down. And I don't know yet how to project that one in the trends either, but that is another interesting piece of data.

November 4, 1988 meeting, Board of Trustees

Mr. Ihrig: (contd)

So those are the overall issues with regard to enrollment on the various campuses that we are dealing with. And we will be, in the next month, here, working to put this all together and come up with our targets and what the impact is for next year so the people in Admissions know what they are dealing with as far as admissions for next year. I think this second year of selective admissions for the Autumn Quarter has just increased the complexity of knowing what to do in the admissions process. So we are going to have some more years of shaking this out, and having to work with it.

The next table in your book, Table 3, starts showing the enrollments, compared to last Autumn Quarter, by college. You will see that under Arts and Sciences, in the unknown category -- that is students who have not declared a major -- dropped by about 38%. And the biggest area of pick up there was the College of the Humanities at 20%. The other significant changes, which I would say are in the double digit area, are Continuing Education which is down by about 24%; I think this is a direct result of our announcing the closing of admissions at Ohio State. I don't have a clear indication of why that is down, because our enrollments after 5:00 p.m. are up, which usually increases Continuing Education enrollments. But it appears that the people who are enrolling after 5:00 p.m. are in actual degree granting programs. Education is down, also, but that is a planned enrollment adjustment in that College of limiting the number of students going into education. And the same thing on Nursing -- which is down 13%.

The next table is a little more interesting, in that it shows -- the enrollment by curriculum. It takes the students that are in University College and spreads those numbers by the basis of the college they would select, in addition to the actual college enrollments. So it is curriculum of study. And it shows that in addition to the ones that I have mentioned, that there is a significant increase in interest in Home Economics and Pharmacy. But also, if you look at the pre-professional criteria, those interested in pre-dentistry, pre-medicine, and pre-optometry all show declines. Students who are interested in going into veterinary medicine, shows the only increase in the pre-professional curriculum. The one with pre-medicine relates to what Dean Tzagournis showed the Board and the Hospitals Board last evening.

Mrs. Bowser:

Are Dentistry and Vet Medicine also planned, besides Nursing and Medicine, to have a decrease in enrollment?

President Jennings:

Dentistry yes. Dentistry is -- that deserves a little bit of explanation. Basically, if you recall what Manny was saying about the number of applicants in Medicine, the same thing is applying in Dentistry. Dentistry, right now, their applicant to slot ratio is about one to one. So that they will take whatever qualified applicant they get. They get more applicants, but they will only take the qualified applicants. So it will fluctuate a bit on the basis of qualified applicants.

November 4, 1988 meeting, Board of Trustees

Mrs. Bowser:

How about Vet Medicine?

President Jennings:

Vet Medicine, no.

Mrs. Bowser:

I just wondered, we knew about Medicine and Nursing. Excuse me.

Mr. Ihrig:

No, that is fine. The next two tables -- 5 and 6 -- gives you everything you wanted to know about credit hours and FTE's. You see the FTE data shows 47,343, and I just mentioned that we were around 40,000 at our figure. The difference is that the Board of Regents allows certain exemptions from the enrollment limit and those are the programs in Agriculture, Dentistry, Medicine, Optometry, Veterinary Medicine, and Nursing, study a broad courses, and students enrolled at 5:00 p.m. or after as commuter students. So we take all those adjustments out and that is how we bring that 47,000 down to the 40,218, that I mentioned previously.

Table 7 then shows the source where the student's home county, states, or countries are. And that shows that 86% of the students at Ohio State are from Ohio, with 9% from other U.S. states and territories, and 4.7% are from foreign countries.

Mr. Teaford:

It also shows they are from the 88 counties.

Mr. Ihrig:

Yes, it does.

President Jennings:

Absolutely.

Mr. Ihrig:

And of the counties, Franklin County has 26% of the students. Cuyahoga is second with 6.6% and Licking, Hamilton, and Montgomery Counties have just under 3% each.

Table 8 then shows the countries with the largest enrollment of students. You see the Republic of China has the largest numbers with 473, and it appears that the countries on the Asian rim have the largest representation of foreign students.

Table 9 shows the areas of studies by those students from foreign countries and engineering leads at both the undergraduate and graduate level.

November 4, 1988 meeting, Board of Trustees

Mr. Ihrig: (contd)

Table 10 is a summary of the students numbers, by enrollment, by ethnic categories, on each of the campuses. That will show that we have increased the black students and both Tables 10 and 11 are different summaries of that. Table 11 shows total University and Table 10 shows by the various campuses. The number of black students for the total University in new first quarter freshmen has increased by 17%, from 412 last year to 482. The overall black enrollments at Ohio State have gone up about 5.7% or 2,569. This table summarizes the various categories of both ethnic categories of the students.

Those are the summary data of the enrollments. I would be glad to try and respond to any further questions that you might have.

Mr. Berry:

Weldon, you set a goal for 6,500 new freshmen. How many do you accept to obtain that goal? You have, I assume, a drop out rate --

Mr. Ihrig:

That is correct. We admitted this Autumn Quarter 15,593 students.

Mr. Berry:

So you accepted 15,000 and you ended up with 7,000.

Mr. Ihrig:

That is right. That was a 45.5% yield rate.

Mr. Berry:

So, I can assume that you based your acceptances on past drop adjustments.

Mr. Ihrig:

That is right. There were actually just under 20,000 applications received for the Autumn Quarter.

Mr. Berry:

So, if you received 20,000 and you accepted 15,000, you accepted 3/4 of the applications. O.K. My other question is don't you have a requirement for credit hours that the students are required to take?

Mr. Ihrig:

The number of credit hours that the students are required to take for a degree, not on a per quarter basis.

Mr. Berry:

So, in other words, for a freshman it is up to them how many credit hours -- there is no --

November 4, 1988 meeting, Board of Trustees

Mr. Ihrig:

We have advisors, and I can let Myles talk about this, but there are advisors and counselors and faculty members that work with the students to advise them on what they should take to make normal progress. But it is still, in the final sense, the students choice. Now there are some limitations on that. Certain programs, if they are going to make standard progress, will require a certain number of courses to be taken in each quarter. And also, certain students who want to compete in intercollegiate athletics have to maintain a certain level of credit hours to meet their eligibility.

Mr. Teaford:

I know grad students have to do three quarters in a row of a certain number of credit hours -- my wife does, I know that.

Mrs. Bowser:

What John is saying is that in the old days you had to take so many hours each quarter so that at the end of three quarters you would be ending your freshman year. How many hours are required to go into your sophomore year? Forty-five, Myles?

Dr. Brand:

That is approximately right, a little higher maybe.

Mrs. Bowser:

Fifteen hours a quarter is kind of a basic rule.

Dr. Brand:

That is correct.

President Jennings:

You are talking about roughly, depending on the degree, 192 to 215 or there about as the boundaries on an undergraduate degree. But the phenomenon you are seeing today is students taking fewer credit hours on an average in any one quarter.

Mrs. Bowser:

You could have more bodies, but less hours.

President Jennings:

Yes. But that is what we are talking about, John, is that the typical Ohio State student, and I might add the typical college student today across the country, takes five to five 1/2 years to graduate from undergraduate school. Where, I realize, in our day we sat down and took fifteen hours every quarter and there wasn't any say in it. That is typical across the country.

Mr. Berry:

Public and private?

November 4, 1988 meeting, Board of Trustees

President Jennings:

Public and private, the typical undergraduate student takes five to five 1/2 years of school.

Mr. Berry:

That is a hard thing for me to digest.

President Jennings:

It is for me, too.

Mr. Berry:

Most kids that are acquaintances of mine -- I don't have children recently in school or anything, but I don't know hardly any of them who didn't graduate in four years for undergraduate studies. I'm like Shirley, a couple of years ago when I went to school, as I recall, your freshman year you had to take certain courses and you had certain electives and you had a certain number of hours. I don't recall that you had that choice. I guess that is too far back in history.

Mr. Teaford:

I think the biggest difference from when I was in school until now is the fact that the men could not drop out or we would find ourselves in the army. So that tended to keep the men in school and going straight through.

President Jennings:

Well, there is another thing, too, and Joel, I think there is something to that. That is, first of all you stayed in school because of the draft, but I think also because of the draft, when we were young people we really didn't have to start to think about starting our career in earnest until we were twenty-four or twenty-five. Depending on when we went into the military, we were at least twenty-four, twenty-five before we started thinking seriously about our careers. These young people when they graduate from college they don't have that draft. And I am not suggesting that we put the draft back, but they are twenty-two. I know they don't realize that, but I think that is still pretty young to be starting a career.

Mrs. Bowser:

Are there other reasons for that though -- are there other reasons that they don't take as many? Are the courses harder? Is it more expensive, financially?

Dr. Brand:

That is one issue. We have a lot more students working part-time. Also, it has become socially acceptable and healthy, I might add, to occasional stop out and assess where you are in your career. So we find a lot of that. We find more acceptance of that amongst students, their peers, and to some extent, not entirely, John,

November 4, 1988 meeting, Board of Trustees

Dr. Brand: (contd)

amongst the people who have been around for awhile to be stopping out, reassessing where you are, looking at your major, and then moving forward again. And that is why when Weldon points to juniors and seniors taking smaller number of courses, some of it is work related, and some of it is a financial issue.

Mr. Berry:

I can see the work related part of it.

Mr. Teaford:

But I think it works on the other hand, too. That there are more parents who can afford to spend for five years. In other words, it works for people who need to work to get through, and also at the other end the families that can afford to foot another year.

President Jennings:

Keep in mind, that the publics adjusted for inflation are not all that different from when we were in school. The other thing, I think, too, Myles, is that tendency to experiment more -- to take courses that won't necessarily apply towards a degree, but a course that a student might be interested in. And I applaud that. I absolutely applaud that. I frankly don't think there is any hurry to graduate from college. I think this is a good trend, because if they are taking more courses, experimenting more, they get a broader education.

Mr. Berry:

Are you advocating to have more professional students?

President Jennings:

No. I think the opportunity for these people to experiment with different courses, different activities, is a good trend.

Mr. Immke:

How about you kids back there, what are you doing and why?

Mr. Jon F. Keller:

Well, this is how I've feel, I think that five and five 1/2 years is pushing it a little. But I think that the average college student probably graduates from this University in fours years and a quarter or two quarters. When I came here I was in international business and I had no idea that I would want to be in public relations. I am going to graduate next fall, so I am one quarter behind. But I had a quarter, like the man said, to experiment, to see what I wanted to do. When you're eighteen years old you don't have any idea of what you want to do; you can't see the light at the end of the tunnel, there is no direction. I think it is better than an hourly requirement. I think to be full-time you have to take eleven or twelve hours, I think that is fine right there. When you have to

November 4, 1988 meeting, Board of Trustees

Mr. Keller: (contd)

work to get yourself through school, you can't really afford to do more than that and keep up your grades.

Ms. Laura Schultz:

Now I disagree with him. It is going to take me five to five 1/2 years and I do work and I do go to night school. So it is going to take me a little more time to get through.

Mr. Berry:

Because this is work related, right?

Ms. Schultz:

Right.

President Jennings:

The five to five 1/2 is the average, it doesn't necessarily mean you are going to do it in five years, but it is an average.

Ms. Melissa Allison:

It depends what you are majoring in. If you are majoring in English and your classes are worth five credit hours, it might be the same amount of work as a Journalism class or an Architecture class which is worth only worth 3 or 4 credit hours.

Mr. Jeffrey A. Thornhill:

I took two years off after high school before I started at Ohio State. I played around for two years. I think Dr. Jennings said "experimenting with different classes," I have had three or four different majors deciding where I wanted to go. I have an agricultural background, but in that area there is just nothing there. In my county it just isn't there. I finally settled on a major, it took me two years to do that.

Mrs. Bowser:

Fred, you need to talk to him. Well that is interesting.

President Jennings:

The other thing that I think is important to recognize, too, is that I think these reports, it is going to get more complicated and more difficult to hit these enrollment targets, because of selective missions. With the new admissions policy, we don't have good information on what the yields are right now. It is going to change a lot.

Mr. Teaford:

I want to ask one more question about those numbers. You said that the number of freshmen was up 19%. Do I extrapolate from that that the retention among black students is down?

November 4, 1988 meeting, Board of Trustees

Mr. Ihrig:

No. Myles, do you have the numbers on that?

Dr. Brand:

Down slightly, not a lot.

Mr. Teaford:

We don't have that one licked yet.

President Jennings:

The total increase in all blacks is 139 or a 5.7% increase. There is a slight decline in the undergraduate retention, but a slight increase in the graduate retention. So in the end, that retention is about even. The key thing, and of course, your retention is going to take a longer time to grab hold. We are doing a lot of that on the affirmative action activity. The key thing that we should all be pleased with is that 17% increase in the freshmen. The key is to keep them here through the period of time. And that is well above the goals of the action plan that was set last year of 440 new first quarter freshmen. As you can see, it is 482 new freshmen.

Mr. Ihrig:

I need to interject. As all these numbers, you have to get into them a little bit, because the continuing students in the other categories also can be a reaction of the increasing black students graduating. There is data that you don't have. In looking at our retention data we just got -- remember that I mentioned the freshman classes after one year had increased from 79% to 82%, there was a similar increase in the retention of black freshmen the second year. So what is happening is an increase. You have to take into account the graduation rate, as well as the retention of the students staying on.

Mr. Berry:

I was just going to ask, is there any way we can really evaluate our action plan that we put in a year or so ago yet.

President Jennings:

We can't evaluate the totality, but we do have annual goals. And that is what I said, that this had an annual goal of 440 new first quarter freshmen, and as you see we got 482.

Mr. Berry:

What I am thinking about is going down to a sixth grader.

President Jennings:

No. We have got those youngsters in, but that is a much longer term. You do have annual steps along the way in terms of evaluating that action.

November 4, 1988 meeting, Board of Trustees

Mr. Ihrig:

Thank you.

--0--

Mr. Immke:

Dr. Brand --

Dr. Brand:

Thank you, Mr. Chairman. It is my privilege to introduce C. William Kern. Bill was born in Middletown, Ohio. Upon completion of his high school education in that area, he entered Carnegie Institute of Technology, now Carnegie-Mellon University, and received his bachelor of science degree in chemistry. He then went on to earn a Ph.D. in theoretical chemistry from the University of Minnesota.

Significant portions of Bill's Ph.D. research was conducted at Harvard University. From 1961 - 1963, he was a postdoctoral fellow in the Department of Chemistry at the IBM Watson Laboratory at Columbia University. Following a brief faculty appointment at the State University of New York at Stony Brook, Bill joined the staff of Battelle Memorial Institute and concurrently had a faculty appointment at The Ohio State University. Where, over time, he became Corporate Director of Sponsored Programs and Professor of Chemistry. Bill left those positions and joined the National Science Foundation in 1978, and served both in the Division of Chemistry as Acting Director and the Division of Computer Sciences as Project Director for National Network. Before returning to The Ohio State University, he was appointed Assistant Director for General Sciences in the President's Executive Office of Science and Technology Policy.

Presently, Bill is the Dean of the College of Mathematical and Physical Sciences, a position he assumed in 1986. Bill is the author of sixty-five refereed papers on various aspects of theoretical and physical chemistry, chemical physics, and computer networking. He is a member of the American Chemical Society and the American Physical Society. He has served as associate editor of the Chemical Physics Letters. Bill has been playing a major role in the leadership of one of our most important colleges -- the College of Mathematical and Physical Sciences. He has been particularly influential in the planning of that College and the strategic planning that the College is undertaking right now, and is now leading the way on Campus in that direction. I thought it would be helpful for the Board to have an update on the progress we are making in the College of Mathematical and Physical Sciences. Bill, if you will please --

Dr. C. William Kern:

Good morning, it is a pleasure to be with you. Thank you, Myles. I am going to use this view graph machine to show you a few transparencies as I tell you about the College. I will try to respect the three rules of public speaking: be honest, be brief, be seated.

There are many definitions of our College -- I have a number of them here that I will go through with you. There are the five colleges in

November 4, 1988 meeting, Board of Trustees

Dr. Kern: (contd)

the Arts and Sciences confederation. In Math and Physical Sciences, we have seven departments that include chemistry, physics, math, astronomy, statistics, geodetic science and surveying (which is very close to engineering), and also geology and mineralogy. One way to think about our faculty is that they have very basic tools which can be applied to a lot of other activities that are relevant to the academic mission. And I have listed on this view graph twelve of them that we are currently involved in -- all the way from the biotechnology center to delivering consulting through statistics. The Byrd Polar Research Center has been on campus now for over twenty years -- Geology is heavily involved in that. The Cancer Institute is new -- chemistry and statistics get involved in that activity. The instrumentation center is a shared facility which is directed by Alan Marshall, Professor of chemistry and biochemistry. The telescope project you know about. The math placement testing, I will come back to in a moment, because I think that it gets us into a much larger critical issue for the '90's. The Mapping Center is relatively new; Materials Research Laboratory you know about; the Supercomputer Center, of course; the Geological Museum; and the Perkins Observatory we share with Ohio Wesleyan University. So one picture of our activity is that we have a lot of basic tools that can be applied to many cross-disciplinary areas across the University.

Another way to think about our impact and our centrality to the mission of the University, is given on this view graph where I have listed across the top our various departments from astronomy to statistics, and the sixteen other colleges down this row. The "x's" here indicate very strong interaction of these colleges with our various departmental faculty members and their expertise. You will see, for example, that statistics interacts very strongly with almost everything, as you might expect -- statistics being a guide to the unknown. Social and Behavioral Sciences has a very strong interaction with most of our departments, largely through the atmospheric sciences program and geography. Engineering, of course has a very strong overlap in their college, as does the College of Biological Sciences. If you count the "x's" as opposed to the "0's", it turns out to be about 55% "x's." In other words, our college has a very dominant role in terms of the expertise that we provide not only for research but also for instruction.

To give you some idea of our teaching mission, I indicated here along the ordinate the numbers of students, and again across the abscissa here, our various departments. There are three types of students: undergraduate students, graduate students, and undergraduate majors in various departments. The most important thing about this view graph is that this is a log scale, so every time you go up a tick here, you add an order of magnitude. So you see, for example, that the Math Department in terms of its instruction has contact with about 50,000 students on campus. Almost everybody, in fact. And you'll see that chemistry, physics, and statistics are big players -- astronomy down here is something like 4,000; geology is also large. So we have a very massive teaching mission for the undergraduate student body. Our undergraduate majors are smaller in number, just about the same as our number of graduate students. The undergraduate teaching mission is really a very critical part of our activity.

November 4, 1988 meeting, Board of Trustees

Dr. Kern: (contd)

Let me talk a couple of minutes about the faculty. Here I have indicated faculty by rank in various departments. There are about 250 of us all together. The cross-hatches indicate the various levels by faculty rank. We are approximately 80% tenured, about 20% instructors and assistant professors. Instructors are in math to help in the undergraduate instruction. They have 3-year, untenured, term appointments. Looking ahead, we do not presently anticipate major quantitative growth in these numbers. What we are most concerned about is the qualitative growth; that is the main emphasis of our thinking, longer term.

We have been extremely fortunate in the last few years in really accelerating through a number of special programs our senior leadership in the College. On this view graph I have listed twelve of our senior faculty: Dr. Wilson who arrived on campus in August; the eminent scholars, we have five that have been funded through the College, the most recent one being for molecular structure in chemistry. We heard about water quality this morning. Hydrology is a very key part of that for the University, Frank Schwartz is on hand; the University Professorship Program that Professor Brand, the Provost, runs through his office; and some other designated professorships, two of which are vacant at the present time.

Now, perhaps I could say just a few words about long-range planning and what the significance of this list might be for our national and international reputation. You have already heard about long-range planning this morning from Dr. Moser, and I understand that you had a briefing yesterday from the College of Medicine and the Hospitals. Perhaps you have seen this view graph -- this gives the essence of what we try to do in the planning process. We try to make a frank assessment of where we are, and then we try to have some very clear vision of where we are going. The difference between the left hand column and the right hand column is called the performance gap by the planners. It is that gap that we are trying to analyze to understand what the key parameters are for getting from the left hand side to the right hand side. Being a quantitative college, I can tell you that we have masses of data, we are very high on data. I will try not to present any more data this morning, however, but to talk with you a little bit about the qualitative measures.

One of the questions we're wrangling with here, department by department, and across the college, is just where we want to be and where we are in terms of our competition. To do that we need to assess whether we are in the top five, or top ten, or top twenty. Just how we can determine that? What changes do we need to make in order to do even better? That is a non-trivial exercise, because there are so many factors that we can call upon. At times it becomes confusing, what is really dominant and on the critical path and what is a consequence, what's cause and what's effect. Let me just indicate generally what some of these measures are and how one might go about thinking about a department. I am in a rather special position, myself, in that my research interests sit at the intersection of three of our departments -- math, physics, and chemistry. My research concerns the question of when a big molecule actually becomes a solid, that transition between a supermolecule state and the solid state. And to analyze those kinds of problems

November 4, 1988 meeting, Board of Trustees

Dr. Kern: (contd)

we use techniques from applied mathematics and computing. One can see that depending on the field, you assess these boxes differently. They depend upon exactly what specialty you are talking about.

So let me just pick physics -- Core strengths. If you look at other major departments around the country you will recognize quickly that each of them has a major program in condensed matter physics, the key to high temperature superconducting materials for instance, as well as experimental and theoretical high energy physics. And indeed, at Ohio State our department has these core strengths. So that is a plus; we are in the ball game in terms of the core programs.

Faculty specialty areas -- Again looking at physics, you will find that theoretical physics has a special place in the hierarchy. It is very important to have a strong theoretical physics program.

Research infrastructure -- In physics it is necessary if you have a high energy physics program, to have outstanding shop facilities -- an electronic shop, a machine shop. Because that is where the new black boxes are designed and made and fabricated and imported into the major facilities such as Fermi Lab and Cern and the laboratories in Japan. It is very much an international ball game. But the really creative work, fabrication of devises, is done on campus.

Communications network -- What that means is that if some big question comes up in Washington and the New York Times reporter wants information, it is necessary that our local network be well in place so that we get the phone calls, we're involved, we know about it, we participate. That is a very non-trivial aspect. It is a role that the senior leadership in the college must play.

Reputational aura, again, using physics -- you think about the Manhattan Project. You remember that Columbia University and the University of Chicago played very important roles. And quite independently of what the current strengths of those programs are today, people still remember that. And so that Chicago and Columbia are still viewed as centers of strength in physics, independently, of what reality might be.

So all these factors have to be taken into account for physics, all the other areas in our college, and somehow integrated into a measure that we can deal with operationally.

Now where are we and where would we like to go as a college. Let me show you a little more data here. What we have is another view graph giving the average National Research Council ranking. Average ranking of our three major departments, that is 80% of the college faculty wide -- chemistry, physics, and mathematics -- for the last year that it was done, 1982. The new ranking will probably come out about 1992, around every 10 years. Along the abscissa I have given the number of National Academy members for the current year. This is a scatter diagram and the smaller the number the better the quality, according to the studies. So if you had a perfect score of one down here, you would be the best university in the land as far as these three fields are concerned. So what you notice is that Berkeley,

November 4, 1988 meeting, Board of Trustees

Dr. Kern: (contd)

Harvard, Chicago, Stanford, Princeton, MIT, CalTech, Cornell, and Columbia, essentially the privates, are in the most favored positions in terms of their rankings. And it is also apparent from the view graph that they also have the largest number of National Academy of Science members, which this view graph suggests is an indicator of quality.

Then you get back here to the major institutions in the heartland where we have Illinois, Wisconsin, University of Texas, Pennsylvania, University of California at San Diego, Minnesota, Ohio State, along with Brandeis, North Carolina, and the University of Michigan. So in terms of where we are today, in terms of our major departments, we have three members of the National Academy in our College and according to this analysis, one needs to get to around ten or so, in order to substantially improve our ranking over the competition. So one of the questions that we are dealing with is whether it is realistic for us to have that kind of goal, and if so, how we would attempt to meet it over the course of five years or more.

I would like to shift gears to tell you something that is very much on our minds these days within the College. Perhaps you saw this last Sunday, I believe it was in the New York Times -- "Shrinking Pool of American Mathematicians." For the first time (this is Ph.D. level) the number of foreign citizens who have received Ph.D.'s in mathematics has exceeded fifty percent of the total. That is an average number, but it is true here. It is also true in other fields such as physics. Moreover, I am sure you are very much aware of this, but I want to emphasize it -- as a former policy maker I am very much aware of these data, very much concerned under the banner of science education. The problem isn't just at the Ph.D. level, it is much, much earlier in the pipeline. Here is a list of some familiar litany of problems we are concerned with in preparation of teachers, performance of students, in terms of the basic science and mathematics that we really need in order to be a quantitatively and scientifically literate society. We simply have an inadequate supply of U.S. and foreign talent coming through the pipeline.

If you think about it very carefully, you conclude that it is not just the chemists and the physicists and the professional people that one is dealing with, but you are really dealing with a society as a whole. We want to ensure that our voters and our professionals in other fields are scientifically and mathematically literate. It is very clear that we are going to be having an increasingly high-tech work force. The question really is, as a nation, whether we can be competitive unless we make some changes.

This problem was recognized quite early in the College. My predecessor, Dean Emeritus Bull, was very active in putting into place a program that we call "Early Math Placement Testing." It is on the first chart that I will show you. It is a program whereby faculty from our College work with the high schools, the high school teachers and students, in order to increase the proficiency of those students who will be coming on to college, not only to Ohio State University, but just in general. This program has matured to the point now where over 75% of the high schools in Ohio are participating -- it affects some 70,000 high school students each

November 4, 1988 meeting, Board of Trustees

Dr. Kern: (contd)

year. And increasingly we are trying to deal with the student's proficiency and evaluation early on. It started with seniors, juniors, sophomores, and finally down to the junior high levels. And what I would like to indicate to you here -- I have some new data -- that this program has been extremely effective. From 1979 to 1988, almost a ten-year period, the fraction of those students who are coming to Ohio State as freshmen on this campus and who are ready for calculus has increased from 7% to 11%. Perhaps more importantly the level of remediation that we now give has dropped by almost a factor of two. Instead of half the students needing remediation in mathematics, now only one out of five do -- a significant improvement.

I might just say as an aside that for the last few years, I think in fact '86, '87, and '88, these numbers over here for remediation have been flopping around 19%, 20%, 21%. It doesn't seem to go any lower. We don't know exactly why, but the mathematicians who are involved in this program suspect that it is due to the inability of the students to comprehend the written word. At some point that becomes the limit, in terms of what you can achieve through this program and mathematics proficiency alone.

In terms of our planning, we are giving a great deal of thought to the possible generalization of the EMPT Program in mathematics to the other sciences. I don't know how that is going to come out. Professor Wilson is very interested in this topic and he himself has taken a lead role, not only within physics but within the College to try to stimulate some additional discussion on this subject. We are, of course, dealing with science literacy in the undergraduate curriculum. I am sure that you have heard about that in some earlier meetings, the general education reform. It is very much in our interest as well as in the interest of the engineering college, biological sciences college, that we try to improve the pipeline to our own professionals who will be coming through the system.

I very much appreciate this opportunity to tell you about our College. We are, of course, concerned with producing scientists for the next generation, but also ensuring that our society is literate in science and technical subjects. Our mission is very broad; you have seen the massive teaching instructional mission at the undergraduate level and our public service role. We certainly appreciate your support very deeply and thank you again for this opportunity to be with you.

President Jennings:

Thank you, Bill. Any questions or comments?

Mr. Teaford:

Mr. Wexner asked a question of the Dean at our last meeting and I think I would like to ask it for him. Are there things that you think this Board can do for your College and, if so, what are they?

November 4, 1988 meeting, Board of Trustees

Dr. Kern:

Yes, well -- I will answer that in two ways, Mr. Teaford. One is that there are some short-term concerns and some longer term concerns. The longer term aspects involve facilities and buildings. It is not a question of space per se, but really the quality of the space that is available for teaching and research. The tools that we need are very sophisticated for research, but also for teaching, in terms of computers. It is very important that the undergraduate laboratories be in top shape. We have been getting to the immediate concerns. We have made an estimate of the cost that it would take to completely modernize the undergraduate laboratories in our College -- it is multi-millions. We know what to do, the space is there, it is a matter of the dollars available.

A related answer -- at the research level, is start-up costs for new faculty. The competition for outstanding faculty at all levels is extreme. A large number of positions in our fields go unfilled each year. So, if we want the best people, we must offer competitive packages. The salary, per se, is less of a concern than the start-up costs. These costs range from say \$50,000 to \$100,000, even for a mathematician at junior levels now, up to over a \$1 million for very senior people. An example, in chemistry this year we added five new junior faculty members. The average start-up cost was \$300,000. These prices escalated by a factor of 2 and 3 just over the last two or three years. I do not know where it will end.

Mr. Teaford:

Are those escalating because of the increasingly complex nature of their research?

Dr. Kern:

Yes and no. I think in part that is so, but I believe that the more critical factor now is simply the short supply of outstanding scholars -- they are really in very great demand. Universities are just competing with one another and offering the best possible package.

Mr. Teaford:

Thank you.

President Jennings:

Thank you, very much.

--0--

Mr. Immke:

Mr. Barone, would you like to give your report on the Research Foundation?

Mr. Barone:

Yes, Mr. Chairman. On the Research Foundation, I would like to report that the contracts for the month of September 1988, are shown

November 4, 1988 meeting, Board of Trustees

Mr. Baron: (contd)

in the agenda books. I think that there are times when the members of the Board should kind of peruse them, because we are utilizing the sum of \$7 million for research. I think it is very important that the Research Foundation keep up its good work. And in order to keep up its good work, there are certain other facets that I think we should give a sound study to.

For example, the funding for the first three months of the fiscal year is 10.6% lower than for the same period of the last fiscal year, although the number of awards is up. The drop in dollar value is due largely to the timing of awards from the Department of Education, and the National Association of Regulatory Utility Commissioners.

Some of the highlights of the awards are:

- * \$360,000 award from the State of Ohio to Bruce Vondracek of the Department of Zoology for the Acquisition of a Research Vessel, up in the northern part of the State.
- * \$130,496 award from the Public Health Service to Stephen C. Olson of the Department of Psychiatry to study Brain Development in Schizophrenics.
- * \$40,000 award from the National Aeronautics and Space Administration to David D. Woods and Philip J. Smith of the Department of Industrial and Systems Engineering to conduct a study of Cognitive Engineering in Aerospace.

I have saved the last report:

- * \$135,000 award from the Department of Agriculture to Charles R. Curtis of the Department of Plant Pathology to fund a Study of the Agricultural Benefits of in the use of Pesticides.

I have been fortunate enough to have been with Dr. Curtis on various occasions, and I am most impressed with the area of plant pathology and microbiology. It is not just by chance that Ohio, for example, per acre, has the greatest corn production in the United States. It is not by chance, for example, that our grain is six times more nutritious than in Russia. The Russians make every effort to buy our grain for that reason, they are very well acquainted with that fact. Dr. Curtis has been doing outstanding work in the use of pesticides in plant pathology. Last year he was up in the Toledo area and there was an epidemic of bean infestation. He created an embargo and found that that bean came from South America. It has helped the State of Ohio, tremendously.

In this regard, I think that these millions of dollars in awards could begin to dry up unless we give it our special attention. We need to encourage people who have the excellent ability. And, in order to do that, once again, I would like to call on my good friend, Mr. Jackson, to see if he can help out to give our Research Foundation workers just a little bit better facility to work in. I think I brought that up once before. I hate to be repetitious, but I feel very strongly that with the market drying up, and these awards being more difficult, that in order to obtain good researchers we

November 4, 1988 meeting, Board of Trustees

Mr. Barone: (contd)

must in effect give them a good place to function and work, Mr. President.

President Jennings:

John, we appreciate that and, of course, we will be talking to the General Assembly about those issues. We are also in a private fund-raising campaign, too, Sir, and we would be delighted to accept checks for a research facility --

Mr. Immke:

Are you offering a building, John?

Mr. Teaford:

That has a good ring to it.

President Jennings:

"The Barone Research Center."

Mr. Teaford:

It goes together.

Mr. Kessler:

We need a little more support from Toledo. That is a good idea. Dick, don't worry about it, I think we got it.

Mr. Barone:

Right. I'll worry about it.

President Jennings:

We expect, how much is it, John, for the Columbus Campaign -- a \$130 million?

Mr. Kessler:

\$136 million.

President Jennings:

From Toledo we can expect, maybe, \$100 million?

Mrs. Bowser:

A challenge to Toledo. Match it.

Mr. Barone:

That completes my report. I was going to ask for a discussion, but maybe I'll wait.

November 4, 1988 meeting, Board of Trustees

Mr. Immke:

Thank you.

**WAIVER OF PARAGRAPH (G) OF BYLAW 3335-1-08
OF THE ADMINISTRATIVE CODE**

Resolution No. 89-50

Synopsis: Request to waive paragraph (G) of bylaw 3335-1-08 of the Administrative Code for the naming of a center is proposed.

WHEREAS the Board of Trustees of The Ohio State University did, on January 9, 1976, amend paragraph (G) of bylaw 3335-1-08 of the Administrative Code to state that "buildings and structures shall not be named for any person who is an officer or employee of the University or the State of Ohio, but may be named for a person who has been retired or has otherwise left such a position for a minimum of three years"; and

WHEREAS the President wishes to recommend that the Black Cultural Center be named to honor Frank W. Hale, Jr., who will retire in December as Special Assistant to the President and Vice Provost for Minority Affairs:

NOW THEREFORE

BE IT RESOLVED, That the applicable requirements of paragraph (G) of bylaw 3335-1-08 of the Administrative Code be waived so that the Black Cultural Center may be named for an officer or employee of the University or the State of Ohio who has not been retired from such position for three years.

Upon motion of Mr. Kessler, seconded by Mr. Teaford, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

NAMING OF CENTER

Resolution No. 89-51

Synopsis: A name is proposed for the Black Cultural Center now under construction in Bradford Commons at 153 West Twelfth Avenue.

WHEREAS this Board has authority in naming of all buildings and structures at The Ohio State University, as set forth in paragraph (G) of rule 3335-1-08 of the Administrative Code; and

WHEREAS the Black Cultural Center symbolizes the University's continuing commitment to excellence through diversity; and

WHEREAS Frank W. Hale, Jr., serves the University as Special Assistant to the President and Vice Provost for Minority Affairs; and

WHEREAS his commitment to the highest standards of quality and equality is an inspiration to students, faculty, staff, and the community; and

November 4, 1988 meeting, Board of Trustees

NAMING OF CENTER (contd)

WHEREAS Frank Hale's accomplishments in his long and loyal service as a teacher, an educator, and a humanitarian are well known; and

WHEREAS the President recommended, with the concurrence of the President's staff, that the aforementioned Black Cultural Center at 153 West Twelfth Avenue be named in honor of Frank W. Hale, Jr.

NOW THEREFORE

BE IT RESOLVED, That hereafter the Black Cultural Center at 153 West Twelfth Avenue shall bear the name "The Frank W. Hale Black Cultural Center."

Upon motion of Mr. Kessler, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

HOSPITALS BOARD APPOINTMENT

Resolution No. 89-52

Synopsis: Approval of emeritus status to a Hospitals Board member.

WHEREAS pursuant to bylaw 3335-93-01 of the University Hospitals Board Bylaws, the Board of Trustees may designate emeritus Hospitals Board members; and

WHEREAS Wilbur W. Jones has had a long and loyal association with this University and with University Hospitals; and

WHEREAS he was among the original members appointed to the Hospitals Board in 1980; and

WHEREAS his dedicated service, commitment and contributions to the Hospitals Board have been noteworthy:

NOW THEREFORE

BE IT RESOLVED, That upon the recommendation of the Hospitals Board and the President, the title of Hospitals Board Member Emeritus be conferred upon Mr. Wilbur W. Jones, effective September 1, 1988.

Upon motion of Mrs. Bowser, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

DEGREES AND CERTIFICATES - AUTUMN QUARTER COMMENCEMENT

Resolution No. 89-53

Synopsis: Approval is being requested for awarding degrees and certificates for Autumn Quarter Commencement.

November 4, 1988 meeting, Board of Trustees

DEGREES AND CERTIFICATES - AUTUMN QUARTER COMMENCEMENT (contd)

WHEREAS pursuant to paragraph (E) of rule 3335-1-06 of the Administrative Code, the Board has authority for the issuance of degrees and certificates; and

WHEREAS the faculties of the colleges and schools shall transmit, in accordance with rule 3335-9-29 of the Administrative Code, for approval by the Board of Trustees the names of persons who have completed degree and certificate requirements:

NOW THEREFORE

BE IT RESOLVED, That the degrees and certificates be conferred on December 9, 1988, to those persons who have completed the requirements for their respective degrees and certificates and are recommended by the colleges and schools, and that the names of those persons awarded degrees and certificates be included in the minutes of this meeting.

Upon motion of Ms. Casto, seconded by Mr. Teaford, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

HONORARY DEGREE

Resolution No. 89-54

Synopsis: Approval is requested for awarding an honorary degree.

WHEREAS the Committee on Honorary Degrees and the University Senate, pursuant to rule 3335-5-488 of the Administrative Code, have approved for recommendation to the Board of Trustees awarding of an honorary degree as listed below:

Andrew W. Marshall

Doctor of Science

NOW THEREFORE

BE IT RESOLVED, That the above honorary degree be awarded in accordance with the recommendation at a time convenient to the University and the recipient.

Upon motion of Ms. Casto, seconded by Mr. Barone, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

PERSONNEL ACTIONS

Resolution No. 89-55

RESOLVED, That the personnel actions as recorded in the Personnel Budget Records of the University since the October 7, 1988 meeting of the Board, including the following Appointment of Chairpersons of Departments, Leaves of Absence Without Salary, Leaves of Absence Without Salary--Continuation, Professional Improvement Leave--Change in Dates, and

November 4, 1988 meeting, Board of Trustees

PERSONNEL ACTIONS (contd)

Emeritus Titles as detailed in the University Budget be approved, and the Medical Staff Appointments/Reappointments approved September 29, 1988, by the Hospitals Board be ratified.

Appointment of Chairperson of Departments

October 1, 1988 through September 30, 1989

Philosophy

Donald C. Hubin*

October 1, 1988 through June 30, 1992

Veterinary Preventive Medicine

Lawrence E. Heider

*Acting Chairperson

Leaves of Absence Without Salary

DAVID M. GOSS, Associate Professor, Department of Mathematics, effective Autumn Quarter 1988, Winter Quarter and Spring Quarter 1989, to do consulting work at the University of Maryland at Baltimore County.

MARTIN F. KENNEY, Assistant Professor, Ohio Agricultural Research and Development Center and Department of Agricultural Economics and Rural Sociology, effective November 7, 1988, through March 31, 1989, to be a Visiting Professor at the Institute of Business Research at Hitotsubashi University in Japan.

POK-SANG LAM, Assistant Professor, Department of Economics, effective Autumn Quarter 1988, Winter Quarter and Spring Quarter 1989, to be a Visiting Professor at Stanford University.

SARAH E. WILLMER, Assistant Professor, Department of Architecture, effective Autumn Quarter 1988, Winter Quarter and Spring Quarter 1989, for personal reasons.

PAUL YIU, Instructor, Department of Mathematics, Autumn Quarter 1988, Winter Quarter and Spring Quarter 1989, for personal reasons.

Leaves of Absence Without Salary--Continuation

KARL C. RUBIN, Professor, Department of Mathematics, effective Autumn Quarter 1988, Winter Quarter and Spring Quarter 1989, to do research at Columbia University.

ERNST RUH, Professor, Department of Mathematics, effective Autumn Quarter 1988, Winter Quarter and Spring Quarter 1989, to continue in a position at the University of Basil.

CRICHTON L. OGLE, Assistant Professor, Department of Mathematics, effective Autumn Quarter 1988, Winter Quarter and Spring Quarter 1989, to work on projects at Penn State University.

ALICE SILVERBERG, Assistant Professor, Department of Mathematics, effective Autumn Quarter 1988, Winter Quarter and Spring Quarter 1989, to pursue research at IBM Watson Laboratory.

November 4, 1988 meeting, Board of Trustees

PERSONNEL ACTIONS (contd)

Professional Improvement Leave--Change in Dates

THOMAS W. MILBURN, Professor, Mershon Center, change dates from Winter Quarter, Spring Quarter and Autumn Quarter 1989, to Spring Quarter and Autumn Quarter 1989.

Emeritus Titles

FRANK W. HALE, JR., Office of Minority Affairs and Department of Communication, with the title Vice Provost and Professor Emeritus, effective January 1, 1989.

FREDERICK W. HEBBARD, College of Optometry, with the title Dean and Professor Emeritus, effective November 1, 1988.

HERSHEL J. HAUSMAN, Department of Physics, with the title Professor Emeritus, effective January 1, 1989.

DEVON W. MEEK, Department of Chemistry, with the title Professor Emeritus, effective November 1, 1988.

WALTER C. SWEET, Department of Geology and Mineralogy, with the title Professor Emeritus, effective October 1, 1988.

WALTER W. WADA, Department of Physics, with the title Professor Emeritus, effective January 1, 1989.

HARRY R. BLAINE, Academic Faculty of Management and Human Resources, with the title Associate Professor Emeritus, effective January 1, 1989.

JAMES E. JONES, Department of Veterinary Preventive Medicine, with the title Assistant Professor Emeritus, effective November 1, 1988.

CAROL R. KRUMM, University Libraries, with the title Assistant Professor Emeritus, effective January 1, 1989.

CATHARINE P. WARBROD, National Center for Research and Vocational Education, with the title Research Specialist II - Vocational Education Emeritus, effective July 1, 1988.

Upon motion of Mr. Teaford, seconded by Mr. Barone, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

RESOLUTIONS IN MEMORIAM

Resolution No. 89-56

Synopsis: Resolutions honoring the service of three of the University's faculty members who have recently died are being proposed.

RESOLVED, That the Board adopt the following Resolutions in Memoriam and that the President be requested to convey a copy to the families of the deceased.

November 4, 1988 meeting, Board of Trustees

RESOLUTIONS IN MEMORIAM (contd)

E. Milton Boone

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on September 17, 1988, of E. Milton Boone, Professor Emeritus in the Department of Electrical Engineering.

Professor Boone was born February 17, 1903. He received his B.A. (cum laude) from the University of Colorado in 1926; an M.S. in Physics from the same institution in 1932; and an M.S. in Electrical Engineering from the University of Michigan in 1932. He served as head of the Engineering Department at Amarillo College from 1932 to 1937. He joined the faculty of The Ohio State University in 1937 as Assistant Professor of Electrical Engineering. He was promoted to Associate Professor in 1944 and to Professor in 1947. He retired from University service and was named Professor Emeritus in 1973.

In teaching, research and service, Professor Boone epitomized the excellence for which the University strives. He was a teacher virtually without peer. He was a teacher of unique capability and dedication. He won a University Alumni Award for Distinguished Teaching in 1970 and the departmental Eta Kappa Nu Distinguished Teaching Award three times, nearly every year he was eligible from the time of the award's inception in 1964 until his retirement in 1973. In the final analysis the contribution of a teacher to society is measured by the success of his or her students. Many of Professor Boone's students have achieved national and international recognition as leaders of the technological revolution in electronics and communication which has occurred over the last four decades. Professor Boone's students made equally dramatic contributions to education. It is not possible for a student to receive an education in Electrical engineering without encountering the names of Drs. Moll, Early and Ebers in electronics and Dr. Huffman in communication theory, for example. Many of his other students became accomplished educators.

Professor Boone founded the Electron Device Research Laboratory and personally made fundamental contributions to the understanding of electronic devices and phenomena. This group conducted basic research which produced a large volume of journal articles relating to electronics over a period of many years. The research unit which Professor Boone founded remains to this day a vital and productive unit within the Department of Electrical Engineering. He personally published many technical articles, and a textbook, Circuit Theory of Electron Devices, in 1953.

Professor Boone's service to his profession and to the University was truly exemplary. In addition to service on many college and departmental committees, he served on nearly 30 University-wide committees. He worked unselfishly for the Institute of Radio Engineers and the American Institute of Electrical Engineers. In addition to heading local sections of these professional organizations, he served on approximately a dozen national committees.

Professor Boone achieved and personified excellence in all areas of faculty involvement: teaching, service and contribution to knowledge. He was a leader who inspired those around him to strive for high levels of achievement.

November 4, 1988 meeting, Board of Trustees

RESOLUTIONS IN MEMORIAM (contd)

E. Milton Boone (contd)

On behalf of the University community, the Board of Trustees expresses to the family its deepest sympathy. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Charles W. Conroy

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on September 11, 1988, of Charles W. Conroy, Professor Emeritus in the College of Dentistry.

Dr. Conroy was born on December 19, 1927, in Neodesha, Kansas. He received an A.B. degree from the University of Kansas in 1950, a D.D.S. degree in 1954 and M.S.D. degree in 1957, both from the University of Missouri, Kansas City and an M.Sc. degree from The Ohio State University in 1958.

He first joined the College of Dentistry as a National Institutes of Health Postdoctoral Fellow in Oral Pathology in 1957. After three years as a faculty member of the University of Texas Dental Branch, he returned to Ohio State in 1961 as an Instructor in Periodontics and the Director of Postgraduate Periodontics, a position he held until 1968. He became an Assistant Professor in 1962, an Associate Professor in 1965, and was promoted to Professor in 1967. From 1968 until 1976 he served as a research supervisor for the Research Foundation. He was a member of the faculty of the Graduate School from 1963 until his retirement in 1981.

Dr. Conroy contributed to the growth of postdoctoral education in the dental specialty of periodontics at Ohio State and in clinical research of a variety of problems relating to the etiology of periodontal disease and methods of diagnosis, prevention and treatment.

He was a research consultant to the United States Air Force, the Westinghouse Electric Company, the Johnson and Johnson Company, and the Procter and Gamble Company, and contributed to the development of several oral health products.

Dr. Conroy was elected to Sigma Xi and Omicron Kappa Upsilon, dental honorary society and awarded fellowship in the International College of Dentists. He was a Diplomate of the American Board of Periodontology. Active in organized dentistry, he was a member of the American Dental Association, the Ohio Dental Association and the Columbus Dental Society. He served as Chairman of the Columbus Section of the International Association of Dental Research and as President of the American Society of Dental Electrosurgery.

On behalf of the University community, the Board of Trustees expresses to the family of Charles W. Conroy its deepest sympathy. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

November 4, 1988 meeting, Board of Trustees

RESOLUTIONS IN MEMORIAM (contd)

James H. Warner

The Board of Trustees of The Ohio State Univeristy expresses its sorrow upon the death on September 26, 1988, of James H. Warner, Associate Professor Emeritus of the Ohio Cooperative Extension Service.

Mr. Warner was born on November 5, 1904, in Calais, Ohio. He received his B.S. in Agriculture from The Ohio State Univeristy in 1929.

Upon graduation from The Ohio State University, James Warner began teaching Vo-Agriculture in Radnor, Ohio (Delaware County). In May 1936 he began his Extension experience when he joined the faculty at The Ohio State University as a County Extension Agent, Agriculture in Allen County. Mr. Warner continued in this position until April 1948 when he became an Extension Specilalist in the Department of Animal Science. He remained in this position untl his retirement in 1966.

Mr. Warner was well known in the cattle industry and his contributions in providing excellent Extension educational programs during his career earned him the respect and admiration of his co-workers and many thousands of Ohio citizens throughout Allen County and in the Department of Animal Science at The Ohio State University.

On behalf of the University community, the Board of Trustees expresses to the family of Mr. Warner its deepest sympathy. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's realization of the loss that the family, the University, and his many friends and associates have sustained.

Upon motion of Ms. Bowser, seconded by Mr. Barone, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS

Resolution No. 89-57

Synopsis: The reports on contracts, grants, and gifts and the summary for September 1988 are presented for Board acceptance.

WHEREAS monies are solicited and received on behalf of the University from governmental, industrial, other agencies, alumni, and various individuals in support of research, instructional activities, and service; and

WHEREAS such gifts and grants are received through The Ohio State University Research Foundation, the Engineering Experiment Station of The Ohio State University, The Ohio State University Development Fund, and The Ohio State University Foundation:

NOW THEREFORE

November 4, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

BE IT RESOLVED, That the research agreement between The Ohio State University and The Ohio State University Research Foundation for the contracts and grants reported herein, and the acceptance of the reports from the Engineering Experiment Station, The Ohio State University Development Fund, and The Ohio State University Foundation during the month of September 1988 be approved.

Upon motion of Mr. Kessler, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

\$111,993.00 - National Science Foundation, Washington, D.C., Glaciological and Climatological Analysis of the Past 2,000 Years from Antarctic Ice Cores, Byrd Polar Research Center (E. Mosley-Thompson and L. G. Thompson), 1 July 1988 through 30 June 1989. (Project 764798 - Continuation)

\$107,861.00 - National Aeronautics and Space Administration, Ames Research Center, Moffett Field, California, Target Signature Modeling and Bistatic Scattering Measurement Studies, Department of Electrical Engineering, ElectroScience Laboratory (W. D. Burnside, R. J. Marhefka and I. J. Gupta), 1 September 1988 through 31 August 1989. (Project 767063 - New)

\$92,123.00 - Department of Education, Washington, D.C., Enhancing Mathematics Through Technology Inservice, Department of Mathematics (F. Demana and B. K. Waits) and Department of Educational Theory and Practice (A. Osborne), 1 January 1989 through 31 December 1989. (Project 767006 - New)

\$92,021.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Neurochemical Correlates of Cerebellar Development, Department of Pharmacology (A. Rotter), 1 September 1988 through 31 August 1989. (Project 767074 - New)

\$89,916.00 - Department of the Army, Army Materiel Command, Redstone Arsenal, Alabama, Radar Cross Section Prediction Code Development, Department of Electrical Engineering, ElectroScience Laboratory (R. J. Marhefka), 1 October 1988 through 22 August 1989. (Project 765718 - Continuation)

\$87,921.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Inhibitory Mechanism of Gossypol on Tapeworm, Department of Veterinary Pathobiology (Y. Rikihisa), 1 September 1988 through 31 August 1989. (Project 765683 - Continuation)

\$81,900.00 - Department of Education, Office of Postsecondary Education, Washington, D.C., Retention-Based Counseling Program, Agricultural Technical Institute - Administrative Support (D. D. Garrison), 1 September 1988 through 31 August 1989. (Project 767032 - New)

\$81,485.00 - Department of Energy, Idaho Falls, Idaho, Upgrade of The Ohio State University Nuclear Reactor Laboratory, Engineering Experiment Station (D. W. Miller), 19 September 1988 through 30 June 1989. (Project 764911 - Continuation)

\$81,200.00 - Department of Agriculture, Science and Education, Washington, D.C., Molecular Mechanisms of Geminivirus Replication, Biotechnology Program and Department of Molecular Genetics (D. M.

November 4, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

Bisaro), 1 September 1988 through 31 August 1989. (Project 766350 - Continuation)

\$79,798.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, The Optimal Corneal Shape, College of Optometry (L. G. Carney), 30 September 1988 through 29 September 1989. (Project 766416 - Continuation)

\$74,704.00 - Department of Education, Office of Special Education and Rehabilitation Services, Washington, D.C., Development and Implementation of a Ph.D. Program in Special Education with Emphasis in Applied Behavior Analysis, Department of Education Services and Research (W. L. Heward), 1 October 1988 through 30 September 1989. (Project 766390 - Continuation)

\$74,360.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Neurochemical Studies of Central Nervous System Cardiovascular Centers, Department of Pharmacology (A. Rotter), 1 September 1988 through 31 March 1989. (Project 767018 - New)

\$73,962.00 - Environmental Protection Agency, Washington, D.C., Development of Improved Field Equipment and Interpretation Procedures for Ground Penetrating Radar to Analyze the Geohydrologic Setting of Hazardous Waste Sites, Department of Geology and Mineralogy (J. J. Daniels) and Department of Electrical Engineering (L. Peters, Jr.), 29 September 1988 through 28 September 1990. (Project 767043 - New)

\$73,296.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Human Erythroid-Potentiating Activity, Department of Internal Medicine (B. R. Avalos), 1 August 1988 through 31 July 1989. (Project 766427 - Continuation)

\$70,000.00 - Department of Agriculture, Forest Service, Broomall, Pennsylvania, Juvenile Hormones and Hormone Regulators in the Development of the Gypsy Moth, Department of Entomology (D. L. Denlinger), 18 August 1988 through 15 September 1991. (Project 765658 - Continuation)

\$69,983.00 - National Science Foundation, Washington, D.C., Consortium for Integration of Engineering Research Groups, Engineering Experiment Station (T. Altan), 1 August 1988 through 31 January 1989. (Project 765393 - Continuation)

\$68,021.00 - Department of Agriculture, Science and Education, Washington, D.C., Extracellular Bacterial Proteases as Enhancers of Avian Influenza Virus Virulence, Department of Veterinary Preventive Medicine (R. D. Slemons) and Department of Veterinary Pathobiology (D. E. Swayne), 1 September 1988 through 31 August 1990. (Project 767076 - New)

\$65,798.00 - Department of Education, Office of Special Education and Rehabilitation Services, Washington, D.C., Training Grant in Rehabilitation Counseling, Department of Education Services and Research

November 4, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

(B. Growick), 1 September 1988 through 31 August 1989. (Project 765724 - Continuation)

\$60,460.00 - National Science Foundation, Washington, D.C., The Organization of Informational Structure in Articulator Movement and Acoustic Duration Patterns, Department of Linguistics (M. E. Beckman), 1 December 1989 through 30 November 1990. (Project 766069 - Continuation)

\$56,030.00 - National Science Foundation, Washington, D.C., Nuclear Physics at Low and Intermediate Energies, Including Investigations of Fundamental Symmetries and Nuclear Astrophysics, Department of Physics (T. R. Donoghue and H. J. Hausman), 1 November 1988 through 30 April 1989. (Project 764671 - Continuation)

\$53,000.00 - Department of Agriculture, Science and Education, Washington, D.C., Mechanisms Regulating Nodulation Formation in Soybean, Department of Agronomy - OARDC and Department of Agronomy (W. D. Bauer), 1 October 1988 through 30 September 1989. (Project 765653 - Continuation)

\$50,000.00 - National Science Foundation, Washington, D.C., High Resolution X-Ray Diffraction Studies of Silicate Minerals, Department of Geology and Mineralogy (J. W. Downs), 1 June 1988 through 30 November 1989. (Project 765971 - Continuation)

\$48,000.00 - Department of Agriculture, Science and Education, Washington, D.C., A Multidisciplinary Ph.D. Fellowship Program in Food Chemistry, Department of Food Science and Nutrition (J. H. Martin), 1 September 1988 through 31 August 1993. (Project 767034 - New)

\$41,231.00 - Department of Education, Office of Postsecondary Education, Washington, D.C., National Resource Fellowships for Slavic and East European Studies, Graduate School Administration (R. A. Koenigsknecht) and Office of International Affairs (J. P. Scanlan and C. Hermann), 15 August 1988 through 14 August 1989. (Project 767007 - Continuation)

\$40,663.00 - Department of Commerce, National Bureau of Standards, Gaithersburg, Maryland, A Centralized Database for Thermodynamic Data on Lipid Mesomorphic Phase Transitions and Miscibility, Department of Chemistry (M. Caffrey), 1 September 1988 through 31 August 1989. (Project 767047 - New)

\$40,000.00 - Department of Energy, Idaho Falls, Idaho, Energy Reactor Sharing Program, Engineering Experiment Station (R. D. Myser), 1 September 1988 through 30 August 1989. (Project 762411 - Continuation)

\$40,000.00 - National Aeronautics and Space Administration, Ames Research Center, Moffett Field, California, Cognitive Engineering in Aerospace: The Alarm Problem, Department of Industrial and Systems Engineering (D. D. Woods and P. J. Smith), 1 September 1988 through 31 August 1989. (Project 767035 - New)

November 4, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$35,018.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Coronary Patients' Response to Noise and Communication, Department of Life Span Process (C. F. Baker), 1 June 1988 through 31 May 1990. (Project 766732 - Continuation)

\$35,000.00 - National Aeronautics and Space Administration, Lewis Research Center, Cleveland, Ohio, Adaptive Arrays for Satellite Communication, Department of Electrical Engineering, ElectroScience Laboratory (I. J. Gupta and E. K. Walton), 19 August 1988 through 19 October 1988. (Project 764040 - Continuation)

\$30,000.00 - National Foundation for the Arts and Humanities, National Endowment for the Humanities, Washington, D.C., An Archaeological Study of Proto-Elamite Civilization in Anshan, Department of Anthropology (W. M. Sumner), 1 October 1988 through 30 September 1989. (Project 767053 - New)

\$27,000.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, In Vitro and In Vivo Persistence of Canine Distemper Virus, Department of Veterinary Pathobiology (G. S. Krakowka and M. J. Oglesbee), 1 September 1988 through 31 August 1989. (Project 767020 - New)

\$26,004.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Intracellular Survival of Ehrlichia risticii, Department of Veterinary Pathobiology (Y. Rikihisa and M. Y. Wells), 15 September 1988 through 14 September 1989. (Project 767058 - New)

\$24,783.00 - National Aeronautics and Space Administration, Lewis Research Center, Cleveland, Ohio, Studies in Electromagnetic Scattering, Department of Electrical Engineering, ElectroScience Laboratory (P. H. Pathak), 1 September 1988 through 31 December 1988. (Project 763822 - Continuation)

\$24,639.00 - Department of Health and Human Services, Office of Human Development Services, Administration of Children, Youth and Families, Chicago, Illinois, Child Welfare Traineeship Program, College of Social Work (N. J. Rindfleisch), 1 July 1988 through 30 June 1989. (Project 767062 - New)

\$21,450.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Lead and Cadmium from Smokeless Tobacco in Male Users, Diagnostic Services (C. J. Neal, Jr.) and Oral Biology (K. Schroeder), 1 September 1988 through 31 August 1989. (Project 767064 - New)

\$19,797.00 - Department of the Army, Army Corps of Engineers, Fort Belvoir, Virginia, Process Data from Dynamic Global Positioning System Studies, Department of Geodetic Science and Surveying (C. C. Goad), 25 August 1988 through 24 December 1988. (Project 767060 - New)

November 4, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$17,886.00 - National Science Foundation, Washington, D.C., A Cooperative Climatological-Glaciological Program in the Antarctic Peninsula -- Phase 1, Byrd Polar Research Center (L. G. Thompson and E. Mosley-Thompson), 1 September 1988 through 31 August 1989. (Project 767075 - New)

\$17,132.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, MARC Predoctoral Fellowship, Department of Microbiology and Immunology (J. F. Sheridan), 1 September 1988 through 31 August 1989. (Project 766363 - Continuation)

\$16,882.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Genotoxicity in Human Fetal Brain, Dermis and Kidney Cells, Department of Radiology (S. M. D'Ambrosio and A. A. Wani), 1 June 1988 through 31 May 1989. (Project 763673 - Continuation)

\$15,000.00 - Department of the Interior, National Park Service, Omaha, Nebraska, Interpreting Biological Diversity: A Manual for National Park Service Communicators, Department of Natural Resources - OARDC and School of Natural Resources (G. W. Mullins), 15 August 1988 through 30 September 1989. (Project 767044 - New)

\$15,000.00 - National Science Foundation, Washington, D.C., Ecological Engineering -- Theory and Development in the United States and China, Department of Natural Resources - OARDC and School of Natural Resources (W. J. Mitsch and D. L. Johnson), 1 October 1988 through 31 March 1990. (Project 767057 - New)

\$6,000.00 - National Science Foundation, Washington, D.C., Satellite Studies of West Antarctic Surface Winds, Byrd Polar Research Center (D. H. Bromwich), 1 July 1988 through 31 December 1989. (Project 766840 - Continuation)

\$5,908.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Comparative Aspects of Peripheral Lung Mechanics, Department of Veterinary Physiology and Pharmacology (L. E. Olson), 1 December 1987 through 30 November 1988. (Project 765821 - Continuation)

\$5,518.70 - Department of Agriculture, Science and Education, Peoria, Illinois, Cooperative Agricultural Research, Office of the Director - OARDC (H. R. Conrad and R. F. Edwards), 1 October 1987 through 30 September 1988. (Project 766472 - Continuation)

\$5,085.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Deoxyuridine Metabolism in Herpes Labialis, Department of Microbiology and Immunology (M. V. Williams), 1 July 1988 through 30 June 1989. (Project 764006 - Continuation)

November 4, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$5,000.00 - Department of Agriculture, Forest Service, Broomall, Pennsylvania, Effects of Acid Precipitation on the Stability of Insecticides Used for Gypsy Moth Control, Department of Entomology (S. W. Fisher), 1 July 1988 through 30 June 1989. (Project 767022 - New)

\$2,275.00 - National Aeronautics and Space Administration, Langley Research Center, Hampton, Virginia, Decentralized Control and Identification Experiments for the NASA Langley Research Center SCOLE (Spacecraft Control Laboratory Experiment Program), Department of Electrical Engineering (U. Ozguner, S. Yurkovich and K. Ossman), 1 September 1988 through 31 December 1988. (Project 765807 - Continuation)

TOTAL - FEDERAL AWARDS \$4,275,100.70

State of Ohio Research Contracts/Grants

\$360,000.00 - State of Ohio, Department of Natural Resources, Columbus, Ohio, Acquisition of a Research Vessel, Department of Zoology (B. Vondracek), 12 September 1988 through 30 June 1989. (Project 767054 - New)

\$60,500.00 - State of Ohio, Board of Regents, Columbus, Ohio, Training Program for Middle School Life Science Teachers with Special Impact on Minority Teachers and Students, Biological Sciences Administration (A. M. Ackermann-Brown), Department of Botany (R. E. J. Boerner) and Department of Zoology (D. A. Culver), 15 July 1988 through 31 December 1989. (Project 767016 - New)

\$50,000.00 - State of Ohio, Department of Health, Columbus, Ohio, Comprehensive Adult Hemophilia Clinic, Department of Internal Medicine (S. P. Balcerzak), 1 July 1988 through 30 June 1989. (Project 762760 - Continuation)

\$45,099.00 - State of Ohio, Board of Regents, Columbus, Ohio, A Seminar and Curriculum Material Development in Computer Science for Industrial Technology Teachers, Department of Engineering Graphics (G. R. Bertoline), 15 July 1988 through 31 December 1989. (Project 767031 - New)

\$40,000.00 - State of Ohio, Department of Development, Columbus, Ohio, Retention and Expansion of Existing Businesses, Department of Agricultural Economics and Rural Sociology - OARDC and Cooperative Extension State Operations (G. W. Morse), 1 July 1988 through 30 June 1989. (Project 765667 - Continuation)

\$40,000.00 - State of Ohio, Department of Mental Health, Columbus, Ohio, Forensic Psychiatry Traineeship, Department of Psychology (H. L. Mirels), 1 July 1988 through 30 June 1989. (Project 767021 - Continuation)

\$19,500.00 - State of Ohio, Ohio Arts Council, Columbus, Ohio, AIDS: The Artists' Response, Wexner Center for the Visual Arts (J. W. Green), 1 July 1988 through 30 June 1989. (Project 767026 - New)

November 4, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

State of Ohio Research Contracts/Grants (contd)

\$9,500.00 - State of Ohio, Department of Human Services, Columbus, Ohio, Advanced Training in Facilitating Adoption in Ohio for Developmentally Disabled Children, Nisonger Center (S. R. Schroeder and V. L. Reynolds), 1 July 1988 through 30 September 1988. (Project 767012 - Continuation)

\$5,750.00 - State of Ohio, Ohio Arts Council, Columbus, Ohio, Mershon Concert Series, Mershon Auditorium (T. M. Van Leer), 23 September 1988 through 30 June 1989. (Project 767024 - New)

\$5,400.00 - State of Ohio, Department of Health, Columbus, Ohio, OSU High Risk Perinatal Project -- Care of the High Risk Mother and Infant, Department of Pediatrics (L. Cordero), 1 October 1987 through 30 September 1988. (Project 765042 - Continuation)

\$5,000.00 - State of Ohio, Board of Regents, Columbus, Ohio, Training Program for Middle School Life Science Teachers with Special Impact on Minority Teachers and Students, Biological Sciences Administration (A. M. Ackermann-Brown), Department of Botany (R. E. J. Boerner) and Department of Zoology (D. A. Culver), 15 July 1988 through 30 September 1988. (Project 767015 - New)

\$4,149.00 - State of Ohio, Ohio Arts Council, Columbus, Ohio, Publication Support for "The Journal: The Literary Magazine of The Ohio State University," Department of English (D. J. Citino), 1 October 1988 through 30 June 1989. (Project 767008 - New)

\$3,916.00 - State of Ohio, Ohio Arts Council, Columbus, Ohio, The Columbus Living Theatre, Department of Theatre (J. Reilly), 1 July 1988 through 30 June 1989. (Project 767025 - New)

TOTAL - STATE OF OHIO AWARDS \$ 648,814.00

Industrial Research Contracts/Grants

\$145,504.00 - The Procter and Gamble Company, Cincinnati, Ohio, The Relative Effects of Diets Containing Canola Oil, Safflower Oil, Olive Oil, and Lipids High in Saturated Fat on Serum Lipids and Platelet Function in Men, School of Allied Medical Professions (G. M. Wardlaw) and Department of Human Nutrition and Food Management (J. T. Snook), 1 July 1988 through 31 March 1989. (Project 766996 - New)

\$135,785.00 - Chartwell Technologies, Inc. Columbus, Ohio, Diphenhydramine Bioavailability Full Study Protocol, Department of Pharmacology (N. Gerber), 3 May 1988 through 2 May 1989. (Project 765696 - Continuation)

\$94,085.00 - The Procter and Gamble Company, Cincinnati, Ohio, Dry Socket Study, Oral/Maxillofacial Surgery (L. J. Peterson), 15 August 1988 through 15 February 1990. (Project 767070 - New)

\$84,952.00 - Burroughs Wellcome, Research Triangle Park, North Carolina, A Multicenter, Placebo-Controlled, Parallel Design, Dose-Response

November 4, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Industrial Research Contracts/Grants (contd)

Evaluation of the Safety and Efficacy of Lamotrigine as Add-On Therapy in Outpatients with Partial Seizures, Department of Neurology (M. E. Drake, Jr.), 1 May 1988 through 31 October 1989. (Project 766736 - New)

\$67,520.00 - Pfizer, Inc., Groton, Connecticut, A Phase I Study to Determine the Difference Between Urine Concentrations of CP-73,850 at Steady State and the Urine Solubility of CP-73,850 in Healthy Volunteers, Department of Pharmacology (N. Gerber), 1 August 1988 through 31 July 1989. (Project 765696 - Continuation)

\$52,163.00 - Pfizer, Inc., Groton, Connecticut, A Phase I Multiple Dose Study to Determine the Presence of Azithromycin in Cerebrospinal Fluid and to Assess Peripheral Blood Lymphocytes for Phospholipid Accumulation, Department of Pharmacology (N. Gerber), 18 April 1988 through 17 July 1988. (Project 765696 - Continuation)

\$42,409.00 - Pfizer, Inc., Groton, Connecticut, A Phase I Study of the Effect of Concomitant Antacide Administration on the Absorption of Azithromycin, Department of Pharmacology (N. Gerber), 20 May 1988 through 19 August 1988. (Project 765696 - Continuation)

\$38,379.00 - Pfizer, Inc., Groton, Connecticut, A Pilot Study to Assess the Reproducibility of Steady State Serum Lithium Concentrations and Renal Clearance of Lithium in Healthy Volunteers, Department of Pharmacology (N. Gerber), 26 July 1988 through 5 August 1988. (Project 765696 - Continuation)

\$32,768.00 - Chartwell Technologies, Inc. Columbus, Ohio, Diphenhydramine Bioavailability Pilot Study Protocol, Department of Pharmacology (N. Gerber), 11 April 1988 through 10 April 1989. (Project 765696 - Continuation)

\$32,000.00 - Pfizer, Inc., Groton, Connecticut, A Randomized Multicenter Study of the Efficacy, Safety, and Toleration of Fluconazole or Clotrimazole Troches in the Patient with Oropharyngeal Thrush in Association with Malignancy, Department of Internal Medicine (S. L. Koletar and R. J. Fass), 1 July 1988 through 30 June 1990. (Project 767033 - New)

\$28,048.00 - Kaiser Aluminum Corporation, Ravenswood, West Virginia, Administering a Competency Assessment Program for Kaiser Aluminum Maintenance Personnel, The National Center for Research in Vocational Education (R. D. Ryan), 1 August 1988 through 31 December 1988. (Project 767078 - New)

\$23,870.00 - Ortho Pharmaceutical Corporation, Raritan, New Jersey, A Multicentric, Open-Label, Randomized Study to Evaluate the Safety and Efficacy of Oral Ofloxacin Versus Standard Antimicrobial Therapy in the Treatment of Pneumonia, Department of Internal Medicine (S. L. Koletar and F. J. Fass), 1 September 1988 through 31 August 1989. (Project 767039 - New)

November 4, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Industrial Research Contracts/Grants (contd)

\$17,617.00 - World Book Encyclopedia, Chicago, Illinois, Graduate Student Practicum -- 1988-1989, Education Administration (T. M. Stephens), 1 September 1988 through 30 June 1989. (Project 767011 - Continuation)

\$16,525.00 - Advanced Decision Systems, Mountain View, California, Sensor Algorithm Research, Department of Electrical Engineering, ElectroScience Laboratory (R. J. Marhefka), 10 April 1987 through 15 August 1988. (Project 766088 - Continuation)

\$10,003.00 - Datascope Corporation, Oakland, New Jersey, Evaluation of a Collagen Barrier System to Facilitate Guided Tissue Regeneration and New Attachment to the Human Tooth Root Previously Exposed by Periodontitis, Periodontology (C. W. Solt), 1 August 1988 through 31 July 1989. (Project 767073 - New)

\$5,101.00 - CIBA-GEIGY Corporation, Summit, New Jersey, Efficacy and Tolerability of Anafranil Versus Placebo in Obsessive-Compulsive Disorder, Department of Psychiatry (M. R. Mavissakalian), 11 November 1986 through 1 September 1989. (Project 765782 - Continuation)

\$4,482.82 - CIBA-GEIGY Corporation, Greensboro, North Carolina, Efficacy and Pharmacokinetics of Formulations of CGA-184699, An Experimental Compound for the Control of Fleas and Other Ectoparasitic Insects, Department of Entomology (W. F. Hink) and College of Pharmacy (J. J. MacKichan), 1 March 1988 through 28 February 1990. (Project 766635 - Continuation)

\$1,000.00 - Chartwell Technologies, Inc., Columbus, Ohio, Bioequivalence Studies on Sustained Release Formulations, Department of Preventive Medicine (M. L. Moeschberger), 1 May 1988 through 30 September 1988. (Project 766893 - Continuation)

TOTAL - INDUSTRIAL AWARDS \$ 832,211.82

Other Non-Federal Research Contracts/Grants

\$397,391.00 - American Institute of Indian Studies, Minneapolis, Minnesota, American Institute of Indian Studies Center for Art and Archaeology, Department of History of Art (S. L. Huntington), 1 July 1988 through 30 June 1989. (Project 766037 - Continuation)

\$238,304.00 - Riverside Research Institute, New York, New York, Compact Range Analysis Research, Department of Electrical Engineering, ElectroScience Laboratory (W. D. Burnside), 1 August 1988 through 31 July 1989. (Project 767079 - New)

\$168,759.00 - Pennsylvania Department of Education, Harrisburg, Pennsylvania, Alternative Design(s) for the Commonwealth of Pennsylvania's Delivery of a Comprehensive Articulated Program of Vocational Education, The National Center for Research in Vocational Education (R. D. Ryan), 1 August 1988 through 15 March 1989. (Project 767030 - New)

November 4, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Other Non-Federal Research Contracts/Grants (contd)

\$60,000.00 - Southern Regional Education Board, Atlanta, Georgia, Secondary School Dropout Prevention Demonstration Project, The National Center for Research in Vocational Education (R. D. Ryan), 15 September 1988 through 31 August 1989. (Project 767069 - New)

\$51,694.50 - Battelle Memorial Institute, Columbus, Ohio, Cloning of the IBV Spike Protein Gene and In Vivo Studies on a Fowl Poxvirus Vector, Department of Veterinary Pathobiology (G. S. Krakowka), 24 June 1988 through 30 June 1989. (Project 767029 - New)

\$49,887.00 - University of Washington, Seattle, Washington, Communicative Interactions in Mainstream Settings, Nisonger Center (S. R. Schroeder), 1 July 1988 through 30 June 1989. (Project 767028 - Continuation)

\$46,000.00 - American Cancer Society, New York, New York, Biochemical Pharmacology of New Aromatase Inhibitors for the Treatment of Estrogen-Dependent Cancers, College of Pharmacy (R. W. Brueggemeier), 1 July 1988 through 30 June 1989. (Project 764529 - Continuation)

\$37,657.00 - Pennsylvania Department of Education, Harrisburg, Pennsylvania, Consortium for the Development of Professional Materials for Vocational Education, The National Center for Research in Vocational Education (R. D. Ryan), 1 July 1988 through 30 June 1989. (Project 767072 - Continuation)

\$25,000.00 - American Heart Association, Ohio Affiliate, Inc., Columbus, Ohio, Lipid and Lipoprotein Characterization of Both Familial Combined Hyperlipidemia and Familial Hypertriglyceridemia, Department of Pathology (H. A. I. Newman), 25 May 1988 through 31 August 1989. (Project 766758 - New)

\$23,322.60 - Capital University, Columbus, Ohio, Student Personnel in Higher Education, Department of Educational Policy and Leadership (R. F. Rodgers), 1 August 1988 through 31 May 1989. (Project 767023 - Continuation)

\$22,655.00 - Hildegard Doerenkamp-Gerhard Zbiden Foundation 1, Chur, Switzerland, Advanced Suture Pattern Techniques: Application and Performance, Department of Veterinary Clinical Sciences (D. D. Smeak), 1 September 1988 through 31 August 1989. (Project 767046 - New)

\$20,803.00 - University of California, Livermore, California, Noncontact Ultrasonic Method to Evaluate Porous Materials in Hostile Environments, Department of Welding Engineering (L. Adler), 1 October 1987 through 30 September 1988. (Project 767050 - New)

\$15,476.40 - Ohio Dominican College, Columbus, Ohio, Student Personnel in Higher Education, Department of Educational Policy and Leadership (R. F. Rodgers), 15 August 1988 through 15 May 1989. (Project 767041 - Continuation)

November 4, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Other Non-Federal Research Contracts/Grants (contd)

\$14,659.00 - Bowling Green State University, Bowling Green, Ohio, On-Site Instruction for Vocational Agriculture Instructors in the Northwest Region, Department of Agricultural Education (L. H. Newcomb), 1 July 1988 through 30 June 1989. (Project 767049 - New)

\$14,650.00 - The Colorado Public Utilities Commission, Denver, Colorado, Telecommunications Assistance to the Colorado Public Utilities Commission, National Regulatory Research Institute (D. N. Jones), 1 July 1988 through 31 December 1988. (Project 766662 - Continuation)

\$14,000.00 - Seven Members of the National Alliance of Community and Technical Colleges, National Alliance of Community and Technical Colleges, The National Center for Research in Vocational Education (R. D. Ryan), 1 July 1988 through 30 June 1989. (Project 766839 - Continuation)

\$13,950.00 - Texas A & M University, College Station, Texas, Ocean Drilling Program Leg 120 Siliceous Microfossil Biostratigraphy and Paleoenvironmental History of the Central Kerguelen Plateau, Byrd Polar Research Center (D. H. Elliot and D. M. Harwood), 1 September 1988 through 31 August 1989. (Project 767067 - Continuation)

\$12,992.00 - Columbus State Community College, Columbus, Ohio, Intramural and Recreation Internship Program, School of Health, Physical Education and Recreation (W. A. Sutton), 1 July 1988 through 30 June 1989. (Project 767009 - Continuation)

\$12,500.00 - Virginia Community College System, Blacksburg, Virginia, Models to Estimate the Premiums for Options on Commodity Future Contracts, Department of Agricultural Economics and Rural Sociology - OARDC and Department of Agricultural Economics and Rural Sociology (S. H. Irwin), 1 January 1988 through 31 March 1989. (Project 767014 - New)

\$10,905.00 - Western Iowa Technical College, Sioux City, Iowa, Approaching a Comprehensive Institutional Plan for Western Iowa Technical College, The National Center for Research in Vocational Education (R. D. Ryan), 1 October 1988 through 28 February 1989. (Project 767055 - New)

\$9,261.00 - University of Maine at Orono, Orono, Maine, Producing Orthophoto Maps for Studying Ice Dynamics on Jakobshavns Glacier, Byrd Polar Research Center (D. H. Elliot and H. H. Brecher), 1 May 1988 through 31 October 1988. (Project 764717 - Continuation)

\$9,000.00 - Taiwan Government, Washington, D.C., Study on the Training and Employment of Service Industries Fellowship Program -- Taiwan, The National Center for Research in Vocational Education (R. D. Ryan and V. M. Axelrod), 15 September 1988 through 15 March 1989. (Project 767056 - New)

\$8,995.00 - Northwestern University, Evanston, Illinois, Toughness, Strength, and R-Curve Behavior in Microcracking Materials, Department of Ceramic Engineering (D. W. Readey), 1 April 1988 through 30 June 1988. (Project 767017 - Continuation)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND

Establishment of Named Funds

The TRC, Inc. Research Fund

The TRC, Inc. Research Fund was established November 4, 1988, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from TRC, Inc., a nonprofit corporation located in Columbus, Ohio.

November 4, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Named Funds (contd)

The TRC, Inc. Research Fund (contd)

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used in the College of Engineering for the support and encouragement of research in automotive, vehicular and related forms of transportation and for development of improved highway facilities for vehicular traffic. The Dean of the College of Engineering shall supervise the expenditure of the fund.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

The Ruth Jane Yauger Scholarship Fund

The Ruth Jane Yauger Scholarship Fund was established November 4, 1988, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from the estate of Ruth Jane Yauger (B.S. Home Economics '29, M.S. '48) of Akron, Ohio.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used for Home Economics graduate student scholarships, fellowships, or associateships. Selections shall be made each year by the Dean of the College of Home Economics or his/her designees.

Should the need for this fund cease to exist or so diminish as to provide unused income, then the income may be used for any purpose whatsoever as determined by the Board of Trustees, with preference being given to the recommendations from the Dean of the College of Home Economics or the appropriate administrative officials of the University who are then directly responsible for Home Economics education, in order to carry out the desire of the donor.

The Hospitality Management Research Fund

The Hospitality Management Research Fund was established November 4, 1988, by the Board of Trustees of The Ohio State University with gifts to

November 4, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Named Funds (contd)

The Hospitality Management Research Fund (contd)

The Ohio State University Development Fund from industry and friends, faculty, and alumni of The Ohio State University.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

Annual income shall be used to support faculty and graduate student research in hospitality management in the Department of Human Nutrition and Food Management, as authorized by the department chairperson with the advice of the faculty.

Should the need for this fund cease to exist or so diminish as to provide unused income, then the income may be used for any purpose whatsoever as determined by the Board of Trustees, with preference being given to the recommendations from the appropriate administrative officials of the University who are then directly responsible for Hospitality Management programs or the Dean of the College of Home Economics, in order to carry out the desire of the donors.

The Robert E. Georges Scholarship Fund

The Robert E. Georges Scholarship Fund was established November 4, 1988, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from corporations and friends of Robert E. Georges (B.S. Bus. Adm. '56) of Westerville, Ohio.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide a scholarship(s) to any senior in the undergraduate program in the College of Business in good standing who is recommended by any faculty chairperson and approved by the College of Business Scholarship Committee in coordination with the University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees with preference being given to recommendations from the appropriate administrative official of the University who is then directly responsible for undergraduate education in the College of Business in order to carry out the desire of the donors.

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Named Funds (contd)

The Charles Richard Hays Memorial Scholarship Fund

The Charles Richard Hays Memorial Scholarship Fund was established November 4, 1988, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from the family and friends of Charles Richard Hays (B.S. Landscape Architecture '55) of Pittsburgh, Pennsylvania.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide one or more undergraduate scholarships to students in the field of landscape architecture. Selection shall be made by the Department of Landscape Architecture Scholarship Committee in coordination with the University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate department chairperson or program administrative officer responsible for landscape architecture education, in order to carry out the desire of the donors.

Change in Name of a Named Funds

The Lucile and Roland Kennedy Scholarship Fund in Dairy Science

The Roland Kennedy Scholarship Fund in Dairy Science was established September 2, 1988, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from the estate of Lucile W. Kennedy (B.S.H.E. '21), Marysville, Ohio, in memory of Roland N. Kennedy. The name was changed November 4, 1988.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide undergraduate and/or graduate scholarships, fellowships, or associateships for students enrolled in the Department of Dairy Science. The selection of the recipient(s) is to be made upon the recommendation of the Chairperson of the Department of Dairy Science in the College of Agriculture, in consultation with the University Committee on Student Financial Aid.

Should the need for this fund cease to exist or so diminish as to provide unused income, then the income may be used for any purpose whatsoever as

determined by the Board of Trustees, with preference being given to the recommendations from the appropriate administrative officials of the University who are then directly responsible for Dairy Science Education or the Vice President for Agricultural Administration, in order to carry out the desire of the donor.

The Lucile and Roland Kennedy Scholarship Fund in Home Economics

The Roland Kennedy Scholarship Fund in Home Economics was established September 2, 1988, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from the estate of Lucile W. Kennedy (B.S.H.E. '21), Marysville, Ohio, in memory of Roland N. Kennedy. The name was changed November 4, 1988.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide undergraduate and/or graduate scholarships, fellowships, or associateships for students enrolled in the College of Home Economics. The selection of the recipient(s) is to be made upon the recommendation of the Dean of the College of Home Economics, in consultation with the University Committee on Student Financial Aid.

Should the need for this fund cease to exist or so diminish as to provide unused income, then the income may be used for any purpose whatsoever as determined by the Board of Trustees, with preference being given to the recommendations from the appropriate administrative officials of the University who are then directly responsible for Home Economics, or the Dean of the College of Home Economics, in order to carry out the desire of the donor.

Change in Description of Named Fund

The Robert B. Sutton Lecture in History of Education

The Robert B. Sutton Lecture in History of Education was established December 5, 1986, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from family and students in honor of Robert B. Sutton, Professor Emeritus in the Department of Educational Policy and Leadership. The description was revised November 4, 1988.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of

November 4, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Change in Description of Named Fund

The Robert B. Sutton Lecture in History of Education (contd)

The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support the Sutton Lecture in History of Education. The Dean of the College of Education shall form a committee of three to plan the lecture and select the speaker. There shall be one professor from the department responsible for teaching the history of education, one professor from the College of Education at large, and one professor from some other college of the University.

The topics addressed in the lecture should be related in some significant way to the history of education, broadly conceived, and therefore not necessarily limited to the United States of America. Successive lecturers may be chosen from any field of scholarly study.

Should the need for this fund cease to exist or so diminish as to provide unused income, then the income may be used for any purpose whatsoever as determined by the Board of Trustees, with preference being given to the recommendations from the appropriate administrative official of the University who is then directly responsible for the study of the history of education.

THE OHIO STATE UNIVERSITY FOUNDATION

Approval of Description and Establishment of Fund

The Ingram-White Castle Scholarship Endowment Fund

The Ingram-White Castle Foundation Scholarship Endowment Fund was established November 4, 1988, by the Board of Trustees of The Ohio State University through funds received by the University from The Ohio State University Foundation, which has established an endowed fund with a gift from the Ingram-White Castle Foundation, of Columbus, Ohio.

Income provided by the Foundation shall be used to award undergraduate scholarships annually to students from the State of Ohio who show financial need. The scholarship recipient(s) shall be determined by the Committee on Student Financial Aid.

NON-MANDATORY TRANSFER FROM CURRENT FUNDS
FISCAL YEAR 1987-88

Resolution No. 89-58

Synopsis: Transfers to Endowment Principal Funds, Loan Funds, Annuity and Life Income Funds, Unexpended Plant Funds, Renewal and Replacement Funds - Remodeling and Renovation, Renewal and Replacement Funds - Repair

November 4, 1988 meeting, Board of Trustees

**NON-MANDATORY TRANSFER FROM CURRENT FUNDS
FISCAL YEAR 1987-88 (contd)**

and Replacement, and Retirement of Indebtedness Funds are being recommended for approval.

WHEREAS non-mandatory transfers from current funds for the fiscal year 1987-88 have been made; and

WHEREAS this accounting procedure is in compliance with the Auditor of State that all transfers made among fund groups be reported:

NOW THEREFORE

BE IT RESOLVED, That the transfers as detailed in the accompanying report be accepted and approved.

Upon motion of Mrs. Bowser, seconded by Mr. Barone, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

REPORT - UNIVERSITY'S INVESTMENT PORTFOLIO

Resolution No. 89-59

RESOLVED, That the report on the University's Investment Portfolio, dated October 21, 1988, as submitted to the Fiscal Affairs Committee of the Board of Trustees, be received and filed with the official records of the Board.

--0--

**FIRST QUARTER REPORT -
1988-89 CURRENT FUNDS BUDGET**

Resolution No. 89-60

RESOLVED, That the first quarter report on the 1988-89 Current Funds Budget, dated November 4, 1988, as submitted to the Fiscal Affairs Committee of the Board of Trustees, be received and filed with the official records of the Board.

--0--

**QUARTER REPORT -
WAIVERS OF COMPETITIVE BIDDING REQUIREMENTS**

Resolution No. 89-61

RESOLVED, That the quarterly report on the Waivers of Competitive Bidding Requirements, dated July through September 1988, as submitted to the Fiscal Affairs Committee of the Board of Trustees, be received and filed with the official records of the Board.

--0--

President Jennings:

I should recognize -- as you know, Larry Thompson has gone to "Rock and Roll Heaven." I am pleased and delighted that Jim Meeks, former Dean of our Law School and currently a member of the College of Law, has agreed to pick up Larry's duties until we can permanently replace Larry, which we will begin a search for shortly. I think most of you know Jim, but for those of you who don't -- I'm delighted that Jim has agreed to do this. I don't think Jim will become head of Rock and Roll Hall of Fame, but lawyers do strange things.

--0--

Thereupon the Board adjourned to meet Friday, December 2, 1988, at The Ohio State University Fawcett Center for Tomorrow, Columbus, Ohio.

Attest:

Madison H. Scott
Secretary

Leonard J. Immke
Chairman

APPENDIX II
Degrees Conferred at
THE OHIO STATE UNIVERSITY
COMMENCEMENT CONVOCATION
December 9, 1988

Commencement Speaker

Austin H. Kiplinger Doctor of Humane Letters

Austin H. Kiplinger is chairman and president of the Kiplinger Washington Editors, Inc., editor-in-chief of the *Kiplinger Washington Letter*, and editorial chairman of *Changing Times* magazine. His publications are renowned for their clarity and reliability; his national reputation is that of an objective and fair journalist and a patron of journalism education and of the arts.

With a career that has spanned 50 years as a columnist, broadcast commentator, and editor, he has specialized in business and political affairs. His full-time reporting began in 1940 with the *San Francisco Chronicle*. After World War II, in which he served as a Navy aviator in the South Pacific, he helped launch *Changing Times*, a personal finance guide magazine.

In 1948, Kiplinger became the front-page daily columnist of the *Chicago Journal of Commerce*. During the 1950's, he was a Chicago anchorman and network correspondent for the ABC and NBC television networks. He rejoined the Kiplinger Washington Editors in 1956 as executive editor of the *Kiplinger Washington Letter* and succeeded his father, W.M. Kiplinger, as editor-in-chief in 1961. He covered presidential and vice-presidential trips and summits throughout Europe, the Soviet Union, and the Middle East between 1959 and 1972.

Kiplinger graduated from Cornell University in 1939 with a bachelor's degree in political science and has served as a trustee at Cornell since 1960. His involvement at Ohio State includes the establishment of the Kiplinger Chair in Public Affairs Reporting in the School of Journalism in 1973. He created the chair in honor of his father, who was one of the first two graduates in journalism at Ohio State.

In addition to his distinguished career as a journalist, he has been a long-time supporter of the arts and is a past president of the National Symphony Orchestra. He has been called a "bulwark" of the arts, and described as "perpetually charming, unhurried, and thoughtful" despite heavy professional and civic responsibilities. Ohio State is grateful for his continuing support and is proud to present him an honorary degree.

Recipients of Honors

Marshall Hall, Jr. Doctor of Science

Marshall Hall, Jr., is among the most distinguished mathematicians in the world. His work in group theory and combinatorics has been very influential, and his textbooks in those areas have been standard references in their respective fields. His 120 research publications also include well-known work in number theory and projective geometry, and he is considered a pioneer in the use of computers in mathematical research.

Currently a visiting distinguished professor at Emory University, he taught at Ohio State from 1946 to 1959 and played a significant role in building the Department of Mathematics. Since leaving the University, he continues to be an important influence on Ohio State through both research and personal contacts.

He has taught at Yale University, the University of California at Santa Barbara, and the California Institute of Technology, where he was named professor emeritus in 1981. Hall also conducted work at Oxford and Cambridge Universities in Great Britain, as well as at institutions in Israel and India. His present research includes work in the area of codes and designs and the Burnside problem of Group Theory.

Hall's honors include the Henry Fellowship to Trinity College, Cambridge; two Guggenheim Fellowships, the Wilbur Cross Medal from Yale; the IBM Professorship at Cal Tech; membership in the American Academy of Arts and Sciences; and a fellowship in the American Association for the Advancement of Science. He has been a major influence on several generations of young mathematicians and an inspiration for scientists of many disciplines. Ohio State salutes his immense contributions to mathematics.

Ilsedore M. Edse Distinguished Service Award

For over 30 years, associate professor Ilsedore Edse has shared German language and culture with her students, as well as thousands of people across the state. In addition to her regular teaching responsibilities, she has produced German Language programs on WOSU radio and television since the mid 1950s. Her programs are filled with wit and imagination, always the product of much thought and enthusiasm.

Edse came to the United States from Germany after World War II. She earned her bachelor's, master's, and Ph.D. degrees from Ohio State and was inducted into several honorary societies for outstanding scholarship. She began her broadcast career in 1954 as producer and director of the German Language Series on WOSU-AM Radio. In 1957, she launched a series of German television programs on WOSU-TV and since then has produced and directed over 350 shows.

The broadcast industry, as well as her audiences, applaud her work; her programs have earned awards from the National Institute for Education by Radio-Television and two Emmy nominations from the Columbus Chapter of the National Academy of Television Arts and Sciences.

Edse is also held in high regard for her teaching ability. She was the first woman to win Ohio State's "Teacher of the Year" award, given by the Colleges of Arts and Sciences Student Council.

The West German government has also recognized Edse by awarding her the Bundesverdienstkreuz (Order of Merit) for her service to the community. Ohio State is pleased to honor her for her contributions—both to the University and to the many whose lives she has touched.

Recipients of Honors

John B. Gerlach Distinguished Service Award

The record-breaking Ohio State University Campaign is fueled by hundreds of dedicated volunteers—and among the most enthusiastic is John B. “Bernie” Gerlach. He has given unstintingly to Ohio State—both of his personal resources and of his time—to support several facets of the Campaign. He has worked to further fund-raising efforts in the Columbus region and for athletics and the College of Business. Under his leadership, the Columbus Campaign, which is part of the overall five-year Campaign, has reached 101 percent of its \$135 million goal in just three years.

Gerlach has also guided his own business to great success. He is president, director, and a founder of Lancaster Colony Corporation, which manufactures glassware, plastic housewares, cookware, specialty foods, automotive products, and other items. He has taken the company from a small private business to a highly successful corporation that now generates more than \$453 million in annual sales.

In honor of his father, Gerlach established a professorship in accounting and management information science in 1982. He has also supported the University by serving as a consultant in planning business courses.

Gerlach, who attended Ohio State in the late 1940s, is a life member of the Alumni Association, a member of The Presidents Council, and is serving his fourth term on the executive committee of The Presidents Club. In addition, he is a charter member of The Ohio State University Foundation’s Board of Directors. His loyalty and dedication to Ohio State have made him an exceptional model to follow, and we are proud to present him with the Distinguished Service award as an expression of the University’s appreciation.

Ruth M. Kessler Distinguished Service Award

Ruth M. Kessler brings new meaning to the term “self starter.” After leaving her successful career as an attorney to spend 23 years raising her children, she took a part-time job in a suburban public library. Twenty-four years later, she has built the Ohio State College of Law Library into one of the finest legal research facilities in the nation.

Kessler, who holds both B.A. and J.D. degrees from Ohio State, began a second career in library work at the College of Law in 1968. She started as head of cataloging and moved on to become assistant director, acting director, and finally, director and professor of law. She retired in June 1987 as a professor emeritus.

Without the advantage of formal library science training, she was forced to acquire her skills on the job. During her nineteen-year tenure at Ohio State, the law library has experienced dramatic change. The collection has swelled to fill all available shelf space, patronage has doubled, and outside use of the resources has increased tremendously. Under Kessler’s guidance, this growth was skillfully managed. She subsequently oversaw the integration of state-of-the-art library technology.

The College of Law Library was one of the first in the country to use the computerized research service LEXIS. Since that time, electronic innovation has dramatically improved library operations—a fact due largely to Kessler’s foresight. In addition, her work in building the collection, expanding personnel, and developing technological capacity has laid the foundation for a major expansion of the library in fall 1989. Her contributions will live on to benefit countless future law students. The University is pleased to honor her with the Distinguished Service Award for her invaluable service.

Recipients of Honors

Ruth Weimer Mount Distinguished Service Award

Ruth Weimer Mount has devoted a lifetime of service to both Ohio State and to the central Ohio community. She came to Ohio State in 1953 as a member of the staff of the Dean of Women. In 1961, she was appointed associate dean of women and director of women's housing, a position she held until 1967 when she became the University's first dean of students.

She resigned in 1969 but continued her support of Ohio State through a variety of volunteer roles. Mount served as adviser to the Mortar Board honorary society and has assisted numerous other student groups. She has also organized several alumni programs and activities, served as president of the Board of Trustees of the Friends of the Library, and is currently president of the Board of Directors of the Friends of WOSU.

Mount has compiled a staggering record of community service. Among the organizations she has given time to are the Columbus Symphony Orchestra, the Ohio Theatre, Children's Hospital, Zonta Club of Columbus, Central Ohio Heart Association, and many others. Her involvement with youth organizations includes service to Buckeye Boys Ranch, the Girl Scouts, Friends in Action, and Columbus Junior Theatre of the Arts.

Her dedication has not gone unnoticed; she has been honored with many awards, such as the Columbus School for Girls Distinguished Contribution Award, the Upper Arlington Rotary Club Service Above Self Award, and the Columbus Junior League Community Service Award. Most recently, she has received the Columbus Mayor's Award, the Woman of the Year Service Award from the Pilot Club of Columbus, and the YWCA Woman of Achievement Award for Human Services. We are pleased to honor her with the Ohio State Distinguished Service Award and applaud her tireless commitment to serving others.

The Graduate School

Dean: Roy A. Koenigsnecht

Doctor of Musical Arts

John Douglas Fry, Mansfield; B.M., M.M. (Cleveland Institute of Music); *Music*
Dr. Sylvia Zaremba

Doctor of Philosophy

Mahmoud Hammam Abdel-Latif, Cairo, Egypt; B.F.A., M.F.A. (Helwan University); M.A. (The University of Kansas); *Theatre*
Dr. George Crepeau

Zamel Abbass Abuzinada, Saudi Arabia; B.A. (King Saud University); M.A. (University of Denver); *Communication*
Dr. Thomas McCain

Eve Mayo Adams, Columbus; B.A. (Ohio Wesleyan University); M.A.; *Psychology*
Dr. Nancy Betz

Donggyu Ahn, South Korea; B.A. (Seoul National University); M.B.A. (Duke University); M.A.; *Business Administration*
Dr. Riad Ajami

George Olalaye Odewale Akintonde, Ikeja, Nigeria; B.A. (Northeastern Illinois University); M.S. (Embry-Riddle Aeronautical University); *Education*
Dr. Aaron Miller

Ramble Osbert Ankumah, Shama, Ghana; B.S. (Cape Coast University); M.S. (McGill University); *Agronomy*
Dr. W. A. Dick

Gilberto Aristizabal, Cali, Colombia; B.A. (National University); M.S. (University of Wisconsin at Madison); *Agricultural Economics and Rural Sociology*
Dr. William Flinn

Harold Wayne Arnett, St. Joseph, MO; B.S., M.S. (Murray State University); *Education*
Dr. E. Keith Blankenbaker

Sunetary Chanapai Berlin, Thailand; B.A. (Ursuline College); M.S. (Kent State University); *Chemistry*
Dr. Derek Horton

William Kingsley Bertin, Columbus; B.S. (Trinity University); *Chemistry*
Dr. Derek Horton

Melissa Wells Bixler, Marion; B.S. (Kent State University); M.A.; *Health, Physical Education and Recreation*
Dr. Mary K. Beyrer

Jin-Hwan Borm, Seoul, South Korea; B.S. (Seoul National University); M.S.; *Mechanical Engineering*
Dr. C. H. Menq

Rebecca Jane Boyd, Bluefield, WV; B.S. (Bluefield State Teacher's College); M.A.; *Education*
Dr. Anthony Olinzock, Dr. Otto Santos

Andrew Michael Calabrese, Columbus; B.A. (Denison University); M.A.; *Communication*
Dr. Brenda Dervin

Nicholas W. Calderone, Columbus; B.A., B.S., M.S.; *Entomology*
Dr. David L. Denlinger

John Richard Carruthers, Canal Winchester; B.A. (Park College); M.S. (Central Michigan University); *Education*
Dr. William Dowling

Celso De Castro Filho, Londrina, Brazil; B.S. (ESALQ-Piracicolor); M.S.; *Agronomy*
Dr. Terry Logan

Tai-Wai David Chan, Hong Kong; B.A. (The International Christian University); M.S.; *Chemical Engineering*
Dr. J. L. Lee

Kanjana Chansa-ngavej, Bangkok, Thailand; B.Sc. (The University of Tasmania); M.Sc. (The University of New South Wales); *Botany*
Dr. V. Raghavan

Hong-Chei Chen, Taipei, Taiwan, R.O.C.; B.S. (National Taiwan University); *Chemistry*
Dr. Heinz Floss

Hsiu-Ho Chen, Taipei, Taiwan, R.O.C.; B.S. (Taipei Medical College); M.S. (National Defense Medical Center); *Pharmacy*
Dr. Robert W. Brueggemeier

Kan Chen, Shouning, P.R.C.; B.S. (University of Science and Technology of China); *Physics*
Dr. C. Jayaprakash

Yun-Shiow Chen, Taipei, Taiwan, R.O.C.; B.S. (National Tsing-Hua University, Taiwan); *Statistics*
Dr. Douglas Wolfe

Margaret Lee Clark, Reno, NV; B.A. (University of the Pacific); M.A. (University of San Diego); *Political Science*
Dr. Chadwick F. Alger

Arthur M. Cohn, Dayton; B.A. (Queen's College); M.S.W. (New York University); *Social Work*
Dr. Beverly Toomey

Debra S. Cohn, Muscatine, IA; B.A. (Drake University); M.S.W. (Washington University); *Social Work*
Dr. Keith M. Kilty

Roy Baker Crawford, Matawan, NJ; B.S.Ed., M.A.; *Health, Physical Education and Recreation*
Dr. R. Corey Bates

Steven Jay Cuvelier, Grove City; B.S. (Iowa State University); M.A. (The University of Northern Iowa); *Sociology*
Dr. Simon Dmitz

Peter Charles Diaz, Miami, FL; A.B. (The University of Miami); M.S. (Nova University); *Education*
Dr. David L. Boggs

Thomas Scott Dicke, Defiance; B.S.Ed. (Bowling Green State University); M.A.; *History*
Dr. Mansel Blackford

Barbara Maria Doerr, Dayton; B.S. (Xavier University); M.S. (Wright State University); M.S.; *Physiology*
Dr. J. A. Grossie

Theodore Nicolas Dracopoulos, Athens, Greece; B.S. (Embry-Riddle Aeronautical University); M.S. (The University of Michigan); *Aeronautical and Astronautical Engineering*
Dr. Hayrani Oz

Patrick William Dunne, Toronto, Ontario, Canada; B.A., M.A. (York University); M.S. *Microbiology*
Dr. B. Oakley

Gulbin M. Dural, Ankara, Turkey; B.S., M.S. (Middle East Technical University); *Electrical Engineering*
Dr. D. L. Moffatt

Godwin Chukwunye Dura, Nigeria; B.A. (University of Dallas); M.A. (Morgan State University); *Agricultural Economics and Rural Sociology*
Dr. Martin F. Kenney

Francis Olayemi Eguaroje, Bendel, Nigeria; B.A.(Hons) (University of Ife); M.A. (University of South Carolina, Columbia); *Art Education*
Dr. Kenneth A. Marantz

Margaret Mary Elgas, Columbus; B.A. (Lewis University); M.Ed. (University of Illinois); *Home Economics*
Dr. Rebecca Kantor

Cheryl Anita Evans, Columbus; B.A. (Fisk University); M.A.; *Psychology*
Dr. Felicisima C. Serafica

Jyh-Dar Fan, Taipei, Taiwan, R.O.C.; B.S. (National Taiwan University); M.S.; *Chemical Engineering*
Dr. L. James Lee

Marcia B. Fear-Fenn, Youngstown; B.A., M.S. (Youngstown State University); *Education*
Dr. Susan Jones Sears

Gail Eileen Foreman, Columbia, SC; B.S. (The University of South Carolina); *Zoology*
Dr. Thomas C. Grubb

- Patricia Gay Fornash**, Hyden, KY; B.A. (Georgetown College); M.S. (University of Kentucky); *Vocational Education, Comprehensive Program*
Dr. Dewey A. Adams
- Robert Peter Fynn**, England; B.S. (Southampton University, U.K.); M.S. (National College of Agricultural Engineering, U.K.); *Agricultural Engineering*
Dr. Warren L. Roller
- John Matthew Ginder**, Galion; B.S. (Rensselaer Polytechnic Institute); M.A.; *Physics*
Dr. A. J. Epstein
- Mark William Glogowski**, Mansfield; B.A. (Case Western Reserve University); *Chemistry*
Dr. Daryle H. Busch
- William Richard Goe**, Akron; B.A., M.A. (Marshall University); *Agricultural Economics and Rural Sociology*
Dr. Martin Kenney
- Jane Karen Gray**, Perrysburg; B.S., M.P.A.; *Sociology*
Dr. Simon Dinitz
- Scott Sinclair Grigsby**, Rivervale, NJ; B.A. (Lycoming College); *Biophysics*
Dr. Carl R. Ingling, Jr.
- Peter Michael Haas**, Columbus; B.S., M.S.; *Physics*
Dr. Harris Kagan
- Marilyn Kgomoco Habedi**, Manzini, Swaziland; B.S., M.Ed. (Tuskegee Institute); *Health, Physical Education and Recreation*
Dr. Sharon S. Redick
- Karl Edward Hackenbrack**, Harrisburg, PA; B.S. (Davis and Elkins College); M.B.A. (Shippensburg University); *Accounting and Management Information Systems*
Dr. Andrew Bailey
- Michael Robert Hamerski**, Columbus; B.S. (The University of Mississippi); M.S.; *Entomology*
Dr. Richard W. Hall
- Silva Hrant Hanissian**, Memphis, TN; B.S. (Memphis State University); *Pharmacology*
Dr. Gopi A. Tejwani
- Glenda Marie Hanna**, Edmonton, Alberta, Canada; B.P.E.; M.A. (University of Alberta); *Health, Physical Education and Recreation*
Dr. Charles Mand
- Shangyou Hao**, Columbus; B.S. (Wuhan Institute of Hydraulic and Electrical Engineering); M.S.; *Electrical Engineering*
Dr. Ali Keyhani
- Cynthia Conner Hickenbottom**, Woodsfield; B.S.Cer.E.; *Ceramic Engineering*
Dr. Dennis W. Readey
- Khai Leong Ho**, Malaysia; B.A. (National University of Malaysia); M.A. (Western Michigan University); *Political Science*
Dr. William Liddle
- Gordon Randolph Holcomb**, Worthington; B.S.Met.E., M.S.; *Metallurgical Engineering*
Dr. George St. Pierre
- Gabriele Ulrike Hoover**, West Germany; B.A. (University of Louisville); M.A.; *German*
Dr. Hugo Bekker
- Brian Thomas Huber**, Medina; B.S. (University of Akron); M.S.; *Geology and Mineralogy*
Dr. Peter N. Webb
- David William Hunter**, Cleveland; B.A. (Hiram College); M.A.; *Health, Physical Education and Recreation*
Dr. Robert L. Bartels
- Susan E. Inglis**, Ontario, Canada; B.P.E., M.A. (University of Alberta); *Health, Physical Education and Recreation*

Stephen John Winslow, Columbus; B.S.Ed.; *Education*

Susan Carol Yost, Newark; B.A.; *Communication*

Master of Business Administration

Ron-Chang Liu, Taiwan, R.O.C.; B.A. (Taiwan University); *Business Administration*

Master of City and Regional Planning

Ranjit Varkki George, Alwaye, India; B.Arch(Hons) (Indian Institute of Technology); *City and Regional Planning*

Dianne Chandler Harris, Amherst; B.S.; *City and Regional Planning*

Nader M. Hussein, Cairo, Egypt; B.Sc. (Cairo University); *City and Regional Planning*

Junmo Kang, Seoul, South Korea; B.A. (Hong-Ik University); *City and Regional Planning*

G. Loren Kravig, Columbus; B.A.; *City and Regional Planning*

Kevin Douglas Might, Canfield; B.S.Land.Arch.; *City and Regional Planning*

John Morris Stamm, Westerville; B.Philosophy (Miami University); *City and Regional Planning*

Christopher Thaddeus Wojno, Columbus; B.A. (Michigan State University); *City and Regional Planning*

Master of Fine Arts

Lesley Anne Hall, Terre Haute, IN; B.F.A.; *Art*

Tracee Jo Hein, Columbus; B.F.A.; *Art*

Dale Hobert Marsh, Elyria; B.A. (Kenyon College); M.S.; *Art*

Andrew Fitzgerald Scott, Brooklyn NY; B.F.A. (Long Island University); *Art*

Donald Robert Welty, Everett, WA; B.A. (Central Washington University); *Art*

Master of Health Administration

Amy Byers Shannon, Worthington; B.S.N. (The University of Pennsylvania); *Hospital and Health Services Administration*

Master of Labor and Human Resources

Mary Elizabeth Absi, Galena; B.A. (Ohio Dominican College); *Labor and Human Resources*

Anne Murnane Arena, Galloway; B.A.; *Labor and Human Resources*

James Craig Brant, Bartlett; B.Bus.Adm. (Ohio University); *Labor and Human Resources*

Diana Faye Mallin, Lima; B.A. (Miami University); *Labor and Human Resources*

Deborah Pisko Mosko, Worthington; B.S.Ed.; *Labor and Human Resources*

Linda Jane Wunderley, Cincinnati; B.S.Bus.Adm., M.B.A. (Pennsylvania State University); *Labor and Human Resources*

Master of Liberal Studies

James Robert Reske, Parma; B.A., M.A.; *Liberal Studies*

Master of Music

Darla Marie Dixon, Milford, PA; B.M. (Lebanon Valley College); *Music*

John Franklin Link, Lincoln, NE; B.A., B.M. (University of Nebraska); *Music*

Fang Lin Lu, Taipei, Taiwan, R.O.C.; B.M. (National Taiwan Normal University); *Music*

Jeffrey Kenneth Olson, Muskego, WI; B.M. (University of Wisconsin at Madison); *Music*

Master of Public Administration

Roger Anthony Hess, Columbus; B.S., M.B.A., D.D.S. (Emory University); *Public Administration*

Master of Science

Panayota Agouris, Athens, Greece; Diploma (National Technical University); *Geodetic Science and Surveying*

Najam Akhter, Columbus; B.S.E.E. (The University of Mississippi); *Electrical Engineering*

Zeyad O.I. Al-Hekail, Riyadh, Saudi Arabia; B.Sc. (King Saud University); *Electrical Engineering*

Ibraheem Abdalrahman Al-Sheddy, Alkarj, Saudi Arabia; B.S. (King Saud University); *Food Science and Nutrition*

Brian Charles Alsdorf, Wooster; B.S.Nat.Res.; *Natural Resources*

John Christopher Anderson, Westerville; B.S. (Miami University); *Computer and Information Science*

Spring Iris Atwater, Columbus; B.Tech. (DeVry Institute of Technology); *Computer and Information Science*

Joseph V. Bachman, Sardinia; B.S.Pharm.; *Pharmacy*

Daniel R. Balseer, Burton; B.S.Nat.Res.; *Natural Resources*

Deborah Kay Barrow, Adrian, MI; B.S. (Colorado State University); *Home Economics*

Abdulla Mohammed Bataineh, Jordan; B.S.E.E. (Yarmouk University); *Electrical Engineering*

Susan Diane Bell, Worthington; B.S.Nurs.; *Nursing*

Virendra Shantilal Bhakta, Orna, Gujarat, India; B.S. (Sardar Patel University); *Civil Engineering*

Margaret Lambert Bicking, Columbus; B.A. (State University of New York at Buffalo); *Chemistry*

Leonard Paul Black, Randolph; B.S.Nat.Res.; *Natural Resources*

Douglas Paul Blas, Columbus; B.S.E.E. (University of Toledo); *Electrical Engineering*

James Edward Bost, Columbus; B.S. (Carnegie-Mellon University); *Statistics*

Jean Jules Botomogno, Yaounde, Cameroon; Ingenieur Agronome (École Nationale Supérieure Agronomique); *Agricultural Economics and Rural Sociology*

Alan John Brown, Gahanna; B.S.; *Computer and Information Science*

- Philip D. Brune**, Newark; B.A. (Wittenberg University); *Plant Pathology*
- Timothy James Bush**, Ballwin, MO; B.S. (The University of Missouri at Columbia); *Geodetic Science and Surveying*
- Joan Bushek**, Powell; B.F.A. (Ohio University); *Computer and Information Science*
- Michael John Canfield**, Wakeman; B.S. (Muskingum College); *Computer and Information Science*
- James Duncan Carswell**, Pembroke, Ontario, Canada; B.Tech (Ryerson Polytechnical Institute); *Geodetic Science and Surveying*
- Eric Georges Caumartin**, Paris, France; Diploma (Ecole Des Mines); *Engineering Mechanics*
- Teresa Marie Cavanaugh**, Columbus; B.S. (Ohio University); *Natural Resources*
- Hin Ching Hubert Chan**, New York, NY; B.S.E.E.; *Electrical Engineering*
- I-Chung Norman Chang**, Toledo; B.S.E.E. (Case Western Reserve University); *Electrical Engineering*

- Barbara Lynn Nunley**, St. Albans, WV; B.S.N. (West Virginia University); *Nursing*
- John Edward Ogden**, Whitehall; B.A., B.S.; *Mathematics*

- Ali Tayfun Ozkan**, Ankara, Turkey; B.S. (Middle East Technical University); M.S.; *Chemical Engineering*
- Judith Marie Packman**, St. Louis, MO; B.S. (Wheaton College); *Geodetic Science and Surveying*
- Marco Tulio Padilla**, San Mateo Alajuela, Costa Rica; D.D.S. (Universidad de Costa Rica); *Dentistry*
- Todd Michael Penkowski**, Mentor; B.S.E.E.; *Electrical Engineering*
- Leslie Cay Phillips**, Blacklick; B.S.Nat.Res.; *Natural Resources*
- Janet Chandler Pickford**, Fredericktown; B.S.Agr.; *Agricultural Education*
- Sagy Pundak-Mintz**, Shaker Heights; B.S.; *Computer and Information Science*
- J. Ramachandran**, Bangalore, India; B.Tech. (Indian Institute of Technology); *Computer and Information Science*
- Francisco Aristides Ramirez-Aybar**, Santo Domingo, Dominican Republic; Lic. Economia (Universidad Autonoma de Santo Domingo); *Agricultural Economics and Rural Sociology*
- Chaya Somasekhara Rao**, Bombay, Maharashtra, India; B.S. (University of Texas at Austin); *Home Economics*
- Joseph Re, Jr.**, Shrub Oak; B.A. (Cornell University); *Computer and Information Science*
- Daniel Martin Retz**, Columbus; B.S. (Andrews University); *Chemistry*
- Nancy Lynn Rhynard**, Hilliard; B.A. (Otterbein College); *Animal Science*
- Steven Lane Richardson**, Lawrence, KS; B.S., M.D. (University of Kansas); *Preventive Medicine*
- Janet Marie Schilk**, Lewiston, NY; B.S.; (University of Miami); *Chemistry*
- Robert William Schmidley**, Columbus; B.S. (Trinity College); *Geodetic Science and Surveying*
- Mark Odell Scott**, Baltimore, MD; B.S. (Brigham Young University); B.S. (University of Maryland at College Park); *Bio-Medical Engineering*
- Ramon Randolph Grey Selove**, Shepherdstown, WV; B.S. (George Mason University); *Zoology*
- Cindy Chia-Sheng Sergent**, Dublin; B.A. (Tu-jen University); *Computer and Information Science*
- Keith Edward Shafer**, Marion; B.A. (Mount Vernon Nazarene College); *Computer and Information Science*
- Deborah Ann Shands**, Columbus; B.S. (The University of Minnesota); *Computer and Information Science*
- Alan Lee Shank**, Aurora, IL; B.S. (Illinois State University); *Agricultural Economics and Rural Sociology*
- Vicki Lee Sharrer**, Nashport; A.A. (Ohio University at Zanesville); *Nursing*
- Asish Kumar Sinha**, Asansol, India; B.S. (Jadavpur University); M.S. (Indian Institute of Science); *Metallurgical Engineering*
- Thomas Edward Skelly, Jr.**, Silver Spring, MD; B.S. (University of Maryland); *Geodetic Science and Surveying*
- Bruce Loring Smith**, Cincinnati; B.S. (University of Cincinnati); M.S. (Eastern Washington University); *Geodetic Science and Surveying*
- Robin L. Smith**, Grove City; B.S.Ed.; *Natural Resources*
- Melinda Joyce Springfield**, Riceville, TN; B.S. (West Georgia College); *Geology and Mineralogy*
- Sidlgata V. Sreenivasan**, Bangalore, Karnatka, India; B.Eng. (Bharathidasan University); *Mechanical Engineering*
- Thomas David Stafa**, Columbus; B.S.E.E.; *Electrical Engineering*
- Jeffrey Steven Stapleton**, Erlanger, KY; B.S. (Xavier University) *Nuclear Engineering*
- Anthony Stefanidis**, Athens, Greece; Diploma (National Technical University); *Geodetic Science and Surveying*
- Lalith Ganapathi Subramanian**, Madras, India; B.E. (Regional Engineering College); *Mechanical Engineering*
- Chih-Cheng Sun**, Taiwan, R.O.C.; B.S.M.E. (Feng Chia University); M.S.M.E. (South Dakota School of Mines and Technology); *Welding Engineering*
- Albert J. Sutherland**, Toledo; B.S. (Oregon State University); *Horticulture*
- Gary Albert Theil**, Dublin; B.S.Agr.; *Agricultural Education*
- Javier Trevino**, Monterrey, Mexico; B.S., M.S. (I.T.E.S.M.); *Electrical Engineering*
- Ko Tseng**, Taipei, Taiwan, R.O.C.; B.S. (Taipei Medical College); *Pharmacy*
- Nora Michelle Wallace**, New Concord; B.A. (Oberlin College); *Chemistry*
- Liguo Wang**, Beijing, P.R.C.; B.S., M.S. (Tsinghua University); *Welding Engineering*
- Jeffrey Alan Ward**, Alexandria, KY; B.A., B.S. (Northern Kentucky University); M.S.; *Computer and Information Science*
- Melena Sue Whittington**, Rushsylvania; B.S.Agr.; *Agricultural Education*
- Laura Kimberly Wilkinson**, Chippewa Lake; B.S.Nurs. (Kent State University); *Nursing*
- Ian Thomas Williams**, Reston, VA; B.S. (College of William and Mary); *Preventive Medicine*
- Francine Donovan Winter**, Columbus; B.S. (Duke University); *Preventive Medicine*
- Kurt Alan Wright**, Columbus; B.S.; *Veterinary Pathobiology*
- Pamela Ainsley Wright**, Bracebridge, Ontario, Canada; Bachelor's, B.S. (Lakehead University); *Natural Resources*
- Ruth Schroeder Yerardi**, Chillicothe; B.S.Nurs.; *Nursing*
- Janice Kaye Yount**, Shelbyville, KY; B.A. (Western Kentucky University); *Computer and Information Science*
- Bruce Paul Zimmer**, Marietta; B.S.Agr.; *Agricultural Education*
- Sara Louise Zimmerly**, Columbus; B.S.N. (Goshen College); *Nursing*

Master of Social Work

- Peggy Lynne Cartwright**, Worthington; B.S.Soc.Wel.; *Social Work*
- Timothy Yi Ling**, Dayton; B.S. (Wright State University); *Social Work*
- Michele Denise Mijic**, Canton; B.S. (Kentucky Christian College); *Social Work*

Colleges of the Arts and Sciences

Chairman, Coordinating Council of
Deans: Joan Huber

Associate Dean for Undergraduate Studies
in Arts and Sciences:
Robert M. Arkin

The Colleges of the Arts and Sciences, a
federation of five colleges, includes:

College of the Arts
College of Biological Sciences
College of Humanities
College of Mathematical and Physical
Sciences
College of Social and Behavioral Sciences

College of the Arts

Dean: Donald Harris

Bachelor of Arts

Joy-Marie Nwakaego Abulokwe, Port-
Harcourt, Nigeria
Erin Ann Ackdoe, Cincinnati
Stephen Akio Fugikawa, Toledo
Leslie Ann Hammond, Grove City
Timothy Lee Henthorne, Westerville
Kurt Allen McNew, Mansfield
Kevin S. O'Brien, Worthington
Julie Roseanne Palmquist, Medina
Judith Rentel, Columbus
David Andrew Setterlin, Columbus
Craig Steven Smithberger, Columbus
Karen Elizabeth Weise, Youngstown

Bachelor of Fine Arts

Julianne Marie Bach, Wadsworth
Mary Cathleen Barnes, Upper Sandusky
Mary Beth Branham-Butler, Plain City
Kate Cushman, Rochester, NY
Kevin Patrick Dorenkott, Fairview Park
Tamara Sue Gilman, Wyoming
Richard Peter Jacobs, Tiffin
Ellen Diane Kidd, Tiffin
Maureen Ellen Kinnear, Columbus
David Sang Lee, Brecksville
Jack Neiberlein, Jr., Parma
Lisa Marie Olmstead, Mt. Vernon
Diane Lynn Sadosky, North Canton
Jo H. Teschner-Caruzzi, Columbus
Joni Lynn Wood, Fairborn

Bachelor of Music

David J. Friedlander, Cleveland
Daniel Paul May, Columbus

Bachelor of Art Education¹

Sandra Hughes Aska, Columbus

Bachelor of Art Education²

Stanley Bruce Cain II, Mansfield
Saundra Lynn Myers, Columbus
Bienda Ciccone Steller, Columbus
Julie Ann Trocchia, Worthington
Theresa Ann Troy, Columbus

Bachelor of Music Education²

Patricia Anne Del Ciello, Columbus
Emilie Dawn Weiler, Grove City

College of Biological Sciences

Dean: William A. Jensen

Bachelor of Arts

Jill Elizabeth Staver, Lima

Bachelor of Science

Nicole Lee Angel, Houma, LA
David L. Armstrong, Jr., Versailles
Carolyn Dawn Bohmer, Tipp City
Daniel John Cleary, Niles
Joseph Edward Curran, Westerville
Lisa Marie DiPinto, Cleveland
Michael Francis Fusko, Canton
Molly Ann Giere, Coldwater
Michael Andrew Grouse, Cincinnati
Mary Elizabeth Honse, Bluffton
Jill Stephanie Hutton, Columbus
Susan Yuri Ishiyama, Parma
Kent Allen Joseph, Zanesville
Stephanie Elaine Miller, Grove City
Sean Douglas Mulroy, Hudson
James Louis Murphy IV, Upper Arlington
Patricia Ann Ortiz, Cincinnati
Stephanie Jo Ott, Circleville
Troy Myron Palmer, Zanesville
Carolyn Marie Sekerak, Berea
Constance Marie Wahl, Bel Air, MD

College of Humanities

Dean: G. Micheal Riley

Bachelor of Arts

Madeline Spencer Acton, Bexley
Doris Ann Ahting, Cincinnati

¹Offered by the College of the Arts
²Offered by the College of the Arts and the College of
Education

Jessica Ann Baggett, Dayton
Brenda Kay Bob, Columbus
Shawn Ray Butz, Mt. Sterling
Craig Alan Canaday, Orient
James Frederick Crates, Findlay
Mary Giselle Decker, Cincinnati
Frederick Louis De Naples, Waynesville
Pamela Claire DeWitt, Mansfield
Lisa Renée DiGiacomo, Wooster
Brent Allan Feldman, Columbus
Lisa Marie Fife, Columbus
Margot Jill Frieder, Cincinnati
Jill Annette Frye, Mount Vernon
Cynthia Kay Gill, Columbus
Charles Joseph Goodburn, Columbus
Judith Clare Gorjanc, Mentor
Robert James Grogan, Jr., Columbus
Thomas Edwin Hemstock, Seattle, WA
Cathy Jo Hickman, Elida
Patrick Joseph Higgins, Columbus
Raymond Dye Irwin, Marysville
Laura Beth Jones, Columbus
Laura Christine Joondeph, Akron
Richard Maxim Kuninger, Newark
Patricia Ann Kunzen, Columbus
Jacqueline Marie Labbe, Medina
Christopher Louis Lang, Holland
Clayton Richard Luckie II, Dayton
Kelly Ann McCalla, Columbus
Carol Lynne Mitchell, Columbus
Melinda Marie Moore, Columbus
Pamela C. Parisi, Cleveland
Michael David Paton, Kent
Rhonda Evelyn Robb, Williamsport, PA
Beth Ellen Rucker, Granville
Renee Ellen Russell, Olmsted Township
Andreas Ferdinand Schueler,
Youngstown
Wesley David Shank, Columbus
Richard Keith Simms, Worthington
Kate Elizabeth Sommers, West Union
Michelle E. Steele, Delaware
Rebecca Lynn Test, Oneonta, NY
Timothy Frederic Thompson, Columbus
Patrick Allen Thornton, Marysville
Ann Melissa Tiernan, Solon
John Matthew Todd, Mansfield
Lewis Warner Wexler, Bexley
Howard Vernon Withrow, West Chester
Nils Barthel Wolfcale, Canfield

College of Mathematical and Physical Sciences

Dean: C. William Kern

Bachelor of Arts

William Kerr Gibson, Columbus
Christopher John Hassmann, Mansfield
Suzanne Marie Holm, Dublin
Kenneth Nicholas Jaryga, Orange Village
Pauline Rae Kan, Mogadore
Anette Lai-Kuan Lam, Kuala Lumpur,
Malaysia
Angela Yvette Ortiz, Buffalo, NY

Bachelor of Science

Scott Kenneth Ackers, Columbus
Dylan Eugene Barrett, Columbus
Ralph Edward Bentley, Plantation, FL
Cheryl Ann Bihn, Perrysburg
Brian John Carroll, Toledo
Richard James Elliot, Columbus
John Mark Gutman, Cincinnati
Joseph Anthony Mamone, Cleveland
Mark Christian McClure, Bexley
Raymond Robert Moreno, Columbus
James Gerard Palte, Glandorf
Joel F. Salas, Lorain
Barbara Lynn Schummer, Columbus
Michael David Stoner, Burke, VA
Bruce Matthew Tuttle, Fredericktown
William Paul Wallace, Olmsted Falls
Jason Wendelin Weisgerber, Worthington
Kent Sherwood Whiting, Columbus
James Ray Wirtley, Seven Mile

College of Social and Behavioral Sciences

Dean: Joan Huber

Bachelor of Arts

Alicia Neville Akin, Cincinnati
Sven Erik Anderson, Columbus
Timothy Scott Anderson, Meeker
Leslie Carol Ayers, Paris, KY
David Alan Baas, Columbus
Julie Marie Baris, Cincinnati
Ellen Prine Barney, Hillsboro
Ian Carter Bates, Gates Mills
Michael Joseph Behm, Marion
Patricia Susan Benkowski, Worthington
Mary Catherine Betts, Columbus
Paul Gilles Binette, Columbus
Christopher Joseph Boerger, Columbus
Amy Lynn Bowling, Heath
David Lawrence Brail, Bainbridge
Michele Rae Brocius, Youngstown
Tammi Renée Brooks, Ashland
Greg S. Brown, Tipp City
Jeffrey John Burke, Brookpark
Susan Diane Capaldo, Bedford
Leanne Marie Carter, St. Paul, MN
Craig Alan Chubb, Findlay
John Carroll Cleek, Columbus
Jennifer L. Clement, Worthington
John Stuart Cohen, Columbus
Marshall Dean Cohen, Columbus
Kathleen Mary Cohill, Columbus
Cynthia Sue Conn, Pataskala
Brendan Timothy Connair, Kettering
John Michael Couri, Columbus
Coleen Lynn Day, Berea
Kim Anne Dessoir, Defiance
Brian Alan Donley, Austintown
Stephen Michael Dotts, Mentor
Renea Elaine Dowdy, Columbus
Sherry Jean Duda, St. Clairsville
Stephen Anthony Duffett, Shaker Heights

Carl Raymond Dumke, Fairborn
Samuel Elison, Toledo
Todd Michael Evans, Upper Arlington
Cheryl Lynn Fegley, Marion
Jeffrey James Ferguson, Chagrin Falls
Kevin P. Foley, Youngstown
Anthony Lyle Foust, Elida
Matthew Howard Frantz, Cincinnati
Debra Therese Freathy, Columbus
Judith Elaine Freppon, Cincinnati
Joanne Kristine Fry, Columbus
Angela Fung, Hong Kong
Lori Lynn George, Mount Vernon
Valerie Lynn Granchi, Akron
Robert Patrick Greer, Columbus
Michele Lynn Hackett, Columbus
Tracey JoAnne Hall, Cleveland Heights
John Philip Hamilton, Jr., Westerville
Lori Kathleen Hamilton, Canal Fulton
Timothy Joseph Hayden, Whitefish Bay, WI
Christopher Scott Hedrick, Columbus
Paula Jean Higgins, Columbus
Craig Reese Hildreth, Grove City
Steven Thomas Hill, Heath
Linda Ellen Hilsheimer, Rittman
Mark L. Honsaker, Warren
Andrew Lawrence Huneck, Columbus
Todd Allen Hunter, Columbus
Julie Anne Hurd, Kent
Marianne Hyland, Worthington
Brandon Stuart Jackson, Shaker Heights
Jay Brennan Johnson, Macedonia
Tamara Lynn Jones, Worthington
Stephen Anthony Jun, Toledo
Michael Joseph Kasun, Columbus
Kenneth Michael Kaufman, Bellaire
Michael Thomas Kearney, Cincinnati
Sallie Ann Keith, Youngstown
Paul David Kelley, Medina
John Jeffrey Kifer, Westerville
Thomas Joseph King, Upper Arlington
Anna M. Koldys, New Orleans, LA
Katherine Ann Krizovski, Barberton
Hans Charles Kuenzel, Avon Lake
Bonnie Jean Ladina, Mentor
Kenneth Martin Lasure, Louisville
Lauri Ann Laurita, Lima
SueEllen Liesak, Oxford, CT
Andrea Kay Lindsey, Miamisburg
Thomas Andrew Lorenz, Upper Arlington
Constance Sue Louthen, Reynoldsburg
Karen Irene Mantell, Jefferson
Teresa Ann Massaro, Upper Arlington
Jeffery Michael Matthaes, Columbus
James Richard Maynard, Wooster
Kenrick Brooke McConnell, Lockport, IL
John Lee McDaniel, Jr., Cincinnati
Terry Ellen McMullen, Hilliard
Michele LáMae McPeters, Hubbard
Michele Ann Melaragno, Grandview Heights
Sean Allen Michalski, Pepper Pike
Anthony Bryant-Thomas Milburn, Columbus
Mary Christine Montenaro, Columbus
Marc Montgomery Moody, Newark
Deborah Jean Morford, Williamsfield
Lance Allworth Morrison, Hubbard

Gwynn Eric Mosher, Richwood
Cigarette Moskovitz, Bexley
Yolanda Joann Natal, Lorain
Troy Allen Nelson, West Chester
Michele L. Oravec, Westerville
Andrew Steven Palka, Columbus
Jeffrey Michael Palmer, Upper Arlington
Cynthia Ann Palur, Northfield
Johanna Marie Passalinqua, Tallmadge
Marlene Beth Pavlofsky, Dayton
Kenneth Lewis Payne, Columbus
Lloyd Lawrence Pfahler II, North Olmsted
Brian Scott Pfeffer, Ripley
Jodi Ann Pinney, Lima
Amy Elizabeth Poston, Columbus
Gwendolyn Mae Quimby, Waterford
Janice Ann Rehard, West Lafayette
Lisa Marie Rhees, Columbus
Sarah Therese Rindfleisch, Worthington

James Scott Rodney, Lawrenceville, NJ
Dawn Marie Rogier, Risingsun
Terri Lynn Rollins, Columbus
David Micheal Rose, Columbus
Anthony Joseph Ruvalo, Jr., Corning, NY
Mary Colleen Ryan, Westerville
Sarah Hart Ryan, Willoughby
Jessica Leigh Salyers, Powell
Sheila Ann Santoro, Solon
Sherry Ann Schlater, Worthington
Karen Lynn Schrader, Barberton
Karin Schroth, Middletown
Penny Lynn Schultz, Delaware
David Scot Seech, Columbus
Jeffrey Alan Shapiro, Cleveland
Jane Ann Sheplavy, Eastlake
Joseph Dean Short, Archbold
Cathleen Marie Sikora, Mentor
Richard Jay Sillman, Columbus
Mary Ellen Simmons, Westerville
Peter Joseph Slyman, Springfield
Nancy Ann Smole-Dunham, Wadsworth
Tiffany Ann Speir, Columbus
Sandra R. Stout, Marion
David Allen Strause, Upper Arlington
Kelly Page Strickling, Dublin
Jill Anne Stueve, Dayton
Susan Jeanne Swartz, Batavia, NY
Susan Marie Tiberi, Dublin
Michael John Trueman, Columbus
Stephen Bruce Tyson, Columbus
Michael Dean Vanecko, Columbus
Timothy Lee Villies, Steubenville
Christopher John Vogt, Canton
George Gregory Wagner, Middletown
Jean M. Webner, Columbus
Scott H. Weisman, Bexley
Nancy Jean Williams, Niles
Tracy Randall Williams, Columbus
Lynne Ann Wilson, East Liverpool
Matthew Warren Wirth, Columbus
David Gerard Zadnik, Columbus
Robert Gerald Zamary, Jr., Struthers

Bachelor of Science

Steven Michael Baskerville, Goose Creek, SC
Angela Bianco, Worthington
John Scott Bowshier, Mt. Sterling
Daniel Duane Buckey, Byesville
Timothy Alan Graham, Findlay
Deanne Rae Hart, Richmond, VA
Gary Michael Hutchinson, Solon
Truman Gest Johnson, Urbana
Robert Richard Killinger, Uniontown, PA
Lisa Marlene Koski, Huron
David Alan Kraemer, Columbus
Karol Elaine Massey, Grove City
Kevin S. O'Brien, Worthington
Dawn Michele Parker, Champion
John A. Savolaine, Sylvania
Christie Gail Smith, Worthington
John Stephen Wolfenberger, Tuscola, IL

School of Journalism

Bachelor of Arts in Journalism

Karis Lynn Andrews, Chillicothe
Spiros L. Bakeris, Warren
Scott Michael Bayne, Columbus
Karen Kimberly Bird, Highland Heights
Barbara L. Bohmer, Canton
John Robert Borrows, Upper Arlington
Leslie Ann Braun, Columbus
LeRoy Dennis Bray, Omaha, NE
Tamara Barbara Brunetti, Warren
Katherine Ellen Busch, Columbus
Brian Joseph Calamita, Mayfield Heights
Douglas Stuart Carter, Berea
Douglas Ray Claggett, Issaquah, WA
Nicole Gentit Daniels, Dayton
Karen Sue Davis, Columbus
Thomas Anthony Diederich III, Kettering
Megan Marie Donahue, Westerville
Julie Janine Ellis, Monroe
Jill Marie Emerson, Bucyrus
Walter Berchman Fraher III, Columbus
Allen Wayne Fruth, Tiffin
David Lee George, Columbus
Paul Andrew Gitter, West Hempstead, NY
Stacy A. Glass, Pickerington
Michael D. Gormas, Columbus
Eric Ray Guenther, Dayton
Jill Lynne Gwin, Columbus
Patricia Ann Harden, Circleville
Kelly Michele Harper, Reynoldsburg
Cole E. Hatcher, Bucyrus
Rebecca Rae Hessel, Columbus
Richard Matthew Hopkins, Dayton
Dana Lynn Hurt, Ashland
Randall Scott Jacobs, Mansfield
Janine Diane Jefferson, Columbus
Scott Anthony Jun, Toledo
Denise Kim Kastelic, Bedford Heights
Karen Marie Katalinas, Cleveland
Tamera Lee Kaufman, Worthington
Jon Michael King, Springfield
Karen Christine King, Steubenville

Stephen Doug Kisor, Reynoldsburg
Betsy Kristin Lee, Beaver Creek
Elizabeth Anne Lee, Columbus
Howard Steven Lerman, Williamsville, NY
Lynne Marie Machovina, North Ridgeville
Sandra Ursula Matarrese, Upper Arlington
Andrea Dawn McClarren, Galion
Jennifer Elizabeth McIlvaine, Southport, CT
Kelli L. Newman, Kenton
Ann-Maria Noland, Wilmington
Timothy Neil O'Donnell, Grove City
James Anthony Palermo, Youngstown
Monica Ann Palermo, Pickerington
Laura Jean Reed, Canton
Melanie Ann Rose, Columbus
Gail Lee Rosenbaum, Dayton
Timothy John Ryan, Toledo
Sherry Maria Sas, Lorain
David Joseph Sereno, Stow
Susanne Marie Sharp, Worthington
Becky Sue Sherer, Grove City

Michelle Christine Stalnacker, Boardman
Tonja Denise Stewart, Diamond
Diane Elaine Terflinger, Westerville
Robert Joseph Underwood, Lorain
Michele Anna Vrooman, North Ridgeville
Jean Leslie Wakefield, Columbus
Kevin Ray Walter, Fremont
Matthew Hamilton Welch, Perrysburg
Cathleen Marie Wimmers, Bellbrook
Todd Clinton Wirick, Dublin
Robert Wayne Young, Willoughby

College of Agriculture

Dean: Frederick E. Hutchinson

Bachelor of Science in Agriculture

Thomas Eugene Ashby, Ashland
Robert Melvin Beck, Pemberville
Thomas Edgar Begg, Bluffton
James Edward Beucler, Bryan
Diana Jean Canaday, Columbus
Andrea Marie Chech Fee, Columbus
Daniel Shawn Domigan, Urbana
Andrew Mark Gallagher, Loveland
David Allen Garringer, Jamestown
Dwayne Mark Gauck, Cincinnati
Andrew William Grace, Johnstown
Elizabeth Mary Gress, Columbus
Laurie Jane Griffin, Columbus
John Thomas Harbauer, Perrysburg
Dave Andrew Harper, Loveland
Thomas Dean Hart, Warren
Mark William Hesse, Cincinnati
Timothy Lynn Howser, Georgetown
Lorenzo W. Jara, Springfield
Daniel Jay Jennings, Perrysburg
Pamela Irene Johnson, Gahanna
Christine Marie Kahoun, Timberlake
Benjamin Dean Kasler, Amesville

Gregory John Koller, Chardon
Daniel Paul Krupa, Wexford, PA
Laura J. Kujawa, Sylvania
John Mawisy Lesotho, Columbus
Aaron Frazier Locker, Anna
Robert Michael Lyons, Cumberland
Haydar Hassan Miari, Columbus
Deborah Lynn Miller, Hilliard
Tracy Ray Morrison, New Concord
Christopher Dean Penrose, Stockport
Karen Louise Peters, Columbus
Patrick Paul Puskarich, Cadiz
Noreen Marie Rodriguez, Brookpark
Timothy Douglas Rooney, Urbana
David Cappel Savage, Blanchester
Jeffrey Alan Sayers, Columbus
Robert Kirk Scott, Millford Center
Derek Fitzgerald Sheppard, Newcomerstown
Robert Alton Shugert, Lore City
Gary Evan Smallsreed, Newton Falls
Royden Hiram Smith, Monroeville
Jeffrey Scott Spangler, Columbus
Peter William Stacey, Cincinnati
Danielle Jodi Stearns, Bowling Green
Brian Blaine Taylor, Columbus
Charles Ivan Ulrich, Delaware
Scott Vaughan Upton, Reedsville
Kent Robert Walker, New Vienna
Michael Wade Westendorf, Columbus
Robert David Wheeler, Piqua
Wesley W. Wilson, Columbus

Bachelor of Science in Food Science

Thomas K. Knopp, Toledo
Gregg Alan Larsen, Columbus
Terrence Joseph Miesle, Cincinnati
Michael Dick Runbaugh, Lima

School of Natural Resources

Bachelor of Science in Natural Resources

David Alexander Campbell, Worthington
Tomas Paul Davenport, Spencer
Brittite Irene Helfrich, Washington Court House
Andrew Gordon Hyde, Chagrin Falls
Constance Sue Kick, Loudonville
Luke William Lines, Worthington
Leobardo Martinez, La Feria, TX
Ava Marie McVey, Conesville
Michael Edward Pitts, Elyria
Joel Richard Plott, Findlay
April D. Tibbles, Bexley
Philip Charles White, Piqua

Agricultural Technical Institute - Wooster

Associate in Applied Science

Robert Henry Boeckermann, Cincinnati
Diane Therese Brodnick, Mentor
Bryan Dale Cooper, Tiffin
Hazel Sharlene Davidson, Uniontown
Paul Michael Dietzel, Mayfield Heights
Lora Christine Goerlich, Toledo
Robert Paul Haney, Tippecanoe
Brian Evan Heiser, Amanda
Thomas Lee Lands, Beaver
Amy Elizabeth Lebold, Apple Creek
Catherine Jane McGilton, Morristown
Eric Tyler Peterson, Hillsdale, MI
James Stephen Prekop, Bedford Heights
Gregory Keith Reed, North Canton
Michael Edward Russell, Prospect
Joseph Toth, Jr., Cuyahoga Falls
Todd Reid Wigington, Cuyahoga Falls
Regina Faith Yoder, Berlin

College of Business

Dean: H. Justin Davidson

Bachelor of Science in Business Administration

Janet Lynn Adams, Worthington
Joseph Olakunle Adumati, Newark
Mark Scott Alvarez, Columbus
Karen A. Anderson, Plain City
Robert Joseph Antonelli, Fairview Park
Robin Renée Apple, Columbus
David W. Arthur, Columbus
Michael David Ashby, North Canton
Christopher Lee Babcock, Batavia
Jan E. Bair, Fredericktown

Graduates with Honors

Criteria for graduating with honors are as follows:

Summa Cum Laude designates those graduating in the top 3% of the class.

Cum Laude designates those graduating in the top 10% of the class.

With Distinction requires successful completion of a Senior Honors Thesis, oral examination, and graduation in the top 25% of the class.

With Honors in the Liberal Arts requires successful completion of the Arts and Sciences Honors Contract and graduation in the top 25% of the class.

With University Honors designates those graduating with curricular distinction and dedication to high educational goals.

Summa Cum Laude with Distinction in Art Education

Sandra Hughes Aska

Summa Cum Laude with Distinction in Forest Resource Management

Ava Marie McVey

Summa Cum Laude with Distinction in Mechanical Engineering

Thomas James Gieseke

THE OHIO STATE UNIVERSITY
OFFICIAL PROCEEDINGS OF THE
ONE THOUSAND TWO HUNDRED AND FORTY-SEVENTH MEETING
OF THE BOARD OF TRUSTEES

Columbus, Ohio, December 2, 1988

The Board of Trustees met at its regular monthly meeting on Friday, December 2, 1988, at The Ohio State University Fawcett Center for Tomorrow, Columbus, Ohio, pursuant to adjournment.

* * *
Minutes of the last meeting were approved.
* * *

December 2, 1988 meeting, Board of Trustees

The Chairman, Mr. Immke called for the special opening reports to be presented.

Present: Leonard J. Immke, Chairman, John W. Berry, Shirley D. Bowser, Hamilton J. Teaford, John J. Barone, Deborah E. Casto, and John W. Kessler.

REPORT ON REZONING OF THE UNIVERSITY

Mr. Jackson:

If I could, I would like to take a minute prior to talking about the Research Park and talk about something that fits in with it which is the rezoning of the University.

Back in 1980, the Supreme Court of Ohio, in the case of Brownfield vs. State of Ohio, ruled that universities really had to make a "good faith" effort to comply with local zoning codes and really to try to be a good neighbor. So as a result of that, we began to look around to see what kind of zoning codes were available locally. As it turned out, there was nothing that really fit the needs of The Ohio State University for a research park or for the kinds of business development that we might like to get into which supported the research and the public service and the education purposes of this institution. As a result of that, we went to the City and worked with them to develop a model zoning which was called "University-College Research Park District." We worked with them and in 1986 the Council approved this research park district. It really is a very comprehensive zoning classification and allows the University to do almost anything that is appropriate in support of the goals of the institution.

Since the Code was enacted we took a look at the Campus and we had, as you know, annexed the portion that was in the township which was essentially west of the river. We thought it best that we try to rezone the entire Campus, even those portions east of the river and those portions which had been in the City for some period of time. So we did apply to the City for this rezoning for the entire Central Campus -- everything from High Street to North Star, from Ackerman essentially down to Kinnear, and down through the Hospital Complex and down to Eighth Avenue, east of the river. It was an area about 1625 acres -- probably as large a rezoning as the City of Columbus has ever done. This rezoning classification will fit any other higher education institution in Columbus, so it is not just a rezoning that will apply to us.

The purpose of this rezoning district, obviously, is to permit us to build the facilities that are needed for educational purposes, as well as those that we think we would like to have in the research park area. It would allow us also, after going to the Board of Zoning Appeals, to build somethings like gas stations, restaurants, and the like. But we would, for certain uses, have to go to the City for those variances. In addition, prototype manufacturing is allowed as is usual at a research institution.

The restrictions within the district are those that you would have in any zoning district. They are more restrictive as you get nearer the edges of any property. And certainly, we would have to meet all of those that have to do with noise, sound, odor, vibration, and all

REPORT ON REZONING OF THE UNIVERSITY (contd)

Mr. Jackson: (contd)

of the other things that are involved. There is no parking requirement in this zone. We think that it is really very applicable for our entire campus and we are very pleased.

As you know, there was an extended period of discussion with some of the neighbors to the west and we did end up with a limitation to the text of this rezoning. In essence, the limitation applies to the western boundary along North Star and our northern boundary from North Star over to Kenny Road. The western portion of that is woods, a very dense woods, and on the north side of our property are houses which are in the City of Columbus. On the eastern side there are some office buildings and an office complex.

The Limitation Text provides for a 150-foot setback along the western portion with essentially nothing except green space. You can put some seating out there and some benches and that sort, but essentially it is a landscaped area. From 150 to 250 feet we are permitted to build buildings up to 50 feet, for all practical purposes. The parking would be screened, as well as mechanical equipment and any sort of refuge collection and the like. In the next 100 feet, or between 250 and 300 feet, we would be allowed to step up in building height 1 foot for every 2 feet in back of that line. And beyond the 350 foot, there are no requirements other than the standard requirements of that rezoning district.

Along the northern boundary it changes just a little bit because of the density of the woods. What we indicated there was that we would not put any buildings for 150 feet, but after the first 55 feet of woods, then we would be able to put shielded parking and the like. In the area where there is no woods, which is a very short distance, we agreed to plant some trees and create a forest and not build anything until those trees matured to a 25-foot height. That is the Limitation Text.

The Columbus City Council on November 28, 1988, did approve this limited University-College Research Park District with a six to zero vote, with one councilman abstaining because of a "conflict of interest." They limited the discussion to twenty-five minutes per side. You may know that the residents over there did apply to rezone our property. So there were actually two resolutions before Council -- one was our rezoning and one was the residents' rezoning of our property. Council voted, as I said, six to zero to support us and turned the residents down by the same margin.

It has been truly a learning experience for me. I think it has been a learning experience for a lot of us who worked on it. Like so many things, it was truly a team effort: Dan Schoedinger and George Jenkins from the Voyrs firm, who assisted us; Weldon's staff, who put in endless hours of work in trying to prepare documents and work with the residents; my own staff; friends of the University; members of the Board of Trustees; and citizens. It was just a real team effort on an awful lot of peoples' part, and without them we would have not accomplished this. I want to pay public tribute to them for that. As I said, it has been a learning experience. I think

December 2, 1988 meeting, Board of Trustees

REPORT ON REZONING OF THE UNIVERSITY (contd)

Mr. Jackson:

the University is well-positioned to add that to the assets of the University as it moves forward in the coming years. I would be glad to try to answer any questions as it relates to that.

Mr. Teaford:

Does this mean that the State Computer Center can now proceed?

Mr. Jackson:

The State at this point does intend to proceed with the Computer Center. I have asked them to look at a couple of things in talking with some of the people involved over there. They had talked about moving the building a little further to the east and the State has agreed to take a look at that. There is also, as you know with any large computer center, large cooling equipment, and that is presently planned on the northwest side of that building which is adjacent to that apartment complex. So there is concern by the owners of the apartment house about noise, vibration, and what have you. And so we have agreed to take another look at that. I think those are justifiable and the State Architect has agreed to do that.

The only thing that, I think, was discussed by some folks in the media after -- not only after the rezoning, but even during the rezoning and prior -- was their concern about whether or not the zoning classification was constitutional. At the rezoning meeting, Ms. Lazarus asked the City Attorney about that issue and he was quite firm in his position that that issue had been discussed when the rezoning classification was applied for as to whether or not he thought it met that test. He felt very strongly that it did, that it is a mixed use zoning, and it was not different than many other zoning classifications which require a broad base of utilizations within those classifications.

So, I think, Mr. Teaford, it is my understanding that the State does intend to proceed and we will certainly work with them and encourage them to proceed.

(See Appendix III for complete text of Zoning of the Columbus Campus of The Ohio State University, page 405.)

--0--

REPORT ON THE RESEARCH PARK

Mr. Jackson:

We do have a document we would like to share with you which has a fair amount of background on what has happened, where we are and what we are doing. I think it is helpful. I would like to take just a few minutes, if you will permit me, to go down through some of it.

REPORT ON THE RESEARCH PARK (contd)

Mr. Jackson: (contd)

Back in 1983, Professor Arthur Adams forwarded his Research Complex feasibility Report to the President. At that point, he did recommend that the University proceed with a research complex. President Jennings then asked the community to proceed to develop a research park complex. We do have a slide showing the three sites that were essentially picked out; they were the West Campus, Ackerman Road, and Don Scott Field. What we want to talk about here today, I think, is to review where we are with each of those.

In the upper picture is the Don Scott site which shows the entire airport. And as a part of the process when we had first gone through this, the site we had all chosen on to do first up there, was about 200 acres (the red area) along Rt. 161 and it actually bent around and went over to Sawmill Road. That site, as we all know, has been put on hold until such time as we are done with the Master Plan for the airport itself and the noise study. And as an update on that, I would indicate that we now are at the point in that process where the consultant has recommended three different alternatives. They have had a public hearing and will now go back and come up with one particular recommendation and will then finish the noise study as it relates to that one choice. After that, it will come to the University, and approximately in June or July of next year we will be in the position, if the University so chooses, to send that on to the FAA for consideration and perhaps final approval. If that sort of time frame is followed and is not delayed, we would expect some sort of approval from the FAA probably in late 1990. So what that really means is that further consideration -- or a Master Plan or a land use plan -- for any property beyond the airport's needs would probably commence at that point in time. Based on the assumption that the plan is accepted and the airport -- as recommended in reports to this point -- stay there, I think that the long-range changes at Don Scott are truly long-range, but the potential is truly there to blend the airport and other uses at that site. There obviously will be much discussion about that.

Secondly, the West Campus site has been talked about in many configurations and in many ways. But the bottom line for the West Campus is that we have essentially chosen to walk and crawl a little bit before we try to run over there. We have acquired three buildings, two we have actually purchased now, and one we have leased that we have developed into research park uses. One is the Edison Welding Institute at 1100 Kinnear Road, which is the old farm machinery distribution center -- Allis Chalmers. And you will remember the Edison Welding Institute is a product of the Governor's move to combine universities and industrial units in this State and across the country to do research. And, we, as a part of our commitment to that, besides buying the building and improving it, they have a five-year \$1.00 a-year lease, and those five years for the most part are pretty much up.

The second building is 1212-1216 Kinnear Road. It has several mixed uses in it at this point. And the other one is 1224 Kinnear Road, which we talked about this morning, in terms of making a purchase.

December 2, 1988 meeting, Board of Trustees

REPORT ON THE RESEARCH PARK (contd)

Mr. Jackson (contd)

Those buildings represent some 125,195 square feet, and we have some slides of those buildings which I think we should go through. Again, that is the building that you saw this morning which we purchased. I think we have a couple of other pictures of that building. That is the front or the inside, I guess, of the lobby of that particular building. That is a picture of actually some of the work areas where we have left the ceiling open, run the air conditioning through the structure itself, painted the underside of the structure, insulated it, and provided a very open and airy space. It looks dark because the majority of the work done in that building is with computers and CRT screens and so there is not a great deal of light needed. It turns out, I think, that that is not probably quite enough and there is some need for some additional lighting.

This is 1100 Kinnear Road, or the old Allis Chalmers building, which has been modified. The front side now contains the Edison Welding Institute. This is a picture of the Destructive Materials Lab, which is inside that building. This is the Laser Welding Lab. And this is 1212-1218 Kinnear Road that I talked about a little bit ago. This is the lobby for the Center of Mapping, which is in that building. And you have heard, over time, about the AMT Walking Machine -- the walking project which has been talked about for sometime. They have taken over the backside of this building. This is the area that Sanese, the local vending machine people, used to use for their preparation of foods for their vending machines until they moved onto Busch Boulevard. This is the engineering portion of the AMT Lab.

When you add the buildings we just talked about, we still have some vacancy, along with the square footage which is presently being used in the West Campus facilities for research, you end up with a total of almost 900,000 square feet which will be dedicated to uses in the Research Park. That, of course, includes the State Data Center. And we are talking about, possibly, in the neighborhood of 1300 or 1400 people.

We have taken some very major steps as it relates to this whole project and this whole concept. Not only have we accomplished some actual utilization: 1) we have annexed the area to the City of Columbus so we can get access to the public utilities, not just us, but any private users who will come later perhaps; 2) we have zoned the entire Campus, including the West Campus; 3) we have, as I have said, acquired the three buildings and we have improved those buildings and have research tenants in them; 4) we have executed the lease for the State Data Center; and 5) which is one that you don't see necessarily, but I think is a great asset in terms of promotion, and that is that we have obtained access to uplinks from the entire campus, not only through public broadcasting, but also through the commercial communication by use of Com III, which is down at Third Avenue and Olentangy.

So we have uplink capability for both private and public uses throughout the entire Campus. And we have used the commercial one

December 2, 1988 meeting, Board of Trustees

REPORT ON THE RESEARCH PARK (contd)

Mr. Jackson: (contd)

for several athletic events and that way they don't have to bring in quite as much equipment in order to originate broadcasts from the Campus. But we think, in light of continuing developments -- and Mrs. Bowser talked this morning about the use of uplinks and the satellites for the distribution of education, and I think the potential will certainly grow. So, we think that is an asset to the Park, also.

We have talked about Don Scott, we have talked about the West Campus, and I think the only other one I would like to make a few comments about is Ackerman Road. Last year we talked about dedicating about 45 acres on the east side of St. Rt. 315, lying essentially between Ackerman Road and the water tower, and from 315 over to where we have built the Day Care Center. It is an extremely attractive site with a major highway interchange adjacent to the University. The back end of that, south of the water tower, will be an arboretum, an open space, and, of course, to the east is the married student housing and some open area. So, it is an extremely attractive site.

We did invite developers to make proposals, to see if anybody was interested in developing that. We did receive nine proposals and a committee of staff have recommended that perhaps four of them were capable of doing the job and a project in a vein which would be consistent with the University's desires. Quite frankly, that's the point at which we are with that. It has not proceeded due to the pressures of other things going on in the last few months. And quite frankly, I must tell you, I didn't really think it was appropriate to push it too hard until we had it rezoned. So, I think it now lays on the table for further discussion by all of us and I would hope that it will be.

Again, as I said before about the rezoning, Jack Hollander, myself, Weldon, and all of our staffs have all worked very hard together. Jack has had tremendous input with keeping us honest about keeping it pure, particularly the West Campus portions of it, with research and looking for people who would fit into it well. Weldon's staff, in terms of the financing and the logistics of it all, and my staff. Again, it has been a team effort and, I think, we have gotten an awful lot done in really a relatively short period of time. And, I think, the ground is now laid for whatever directions the University really wants to take with these opportunities. I would be glad to answer any questions.

Mr. Teaford:

How much vacant space is there on the West Campus?

Mr. Jackson:

Presently, there is about 20,000 square feet -- 10,000 of which is a basement area. We are at the point where 10,000 square feet is essentially nothing and the people who are adjacent to it would like to have it, but they can't come up with the bucks right now. We

December 2, 1988 meeting, Board of Trustees

REPORT ON THE RESEARCH PARK (contd)

Mr. Jackson: (contd)

really have worked with several people -- as an example, I would recommend to this Board that all of the buildings that become available along Kinnear Road on the north side, from Kenny all the way to North Star, if we can at a reasonable price, we ought to acquire those and obtain those in some fashion.

One of them has been bought by an individual who, I think, intends to fix it up and perhaps hopes that we will lease it or somebody interested in being close to the University will lease it. We have talked to developers about the possibility of a leaseback kind of arrangement like we had with the Day Care Center, where they would build it and lease it back to us and then we would go forward, but we are not willing to make the kind of financial commitments that they need to get it done. But, we have worked with a number of people on that sort of thing within that area. So, we continue to try to be vigilant about that, because I think it is important -- and I think most everybody else would agree -- that we ought to have everything within that parameter. Jack, would you like to add anything?

Dr. Hollander:

No. You've done a fine job.

Mr. Teaford:

We do expect that we will start moving again then on the site on Ackerman at least.

Mr. Kessler:

What ever happened, Mr. President, of the idea that we talked about sometime ago to have a Board that would focus on --

President Jennings:

It is still there, Jack. As Dick said, we have not been pushing it, not only because of other activities, but because we have been waiting on what will be the disposition of the West Campus land. That's an alternative, a board or bringing in somebody who would do this for us. In my mind, the key decision is how closely it has to relate to the University's normal activities for a tenant to be eligible to be in that park. To this day, we have been awfully stringent on that. I think it is fair to say that our stringency on the use by the tenants is what has kept this as a small operation. We have to continue to ask that question as to the tenants, what are their contributions to the institution other than just the rent. That becomes the key decision. That is what we have to continue to focus on.

Mrs. Bowser:

Have we ever seen the strategic plan by Dr. Charles Perry?

December 2, 1988 meeting, Board of Trustees

REPORT ON THE RESEARCH PARK (contd)

Mr. Teaford:

Yes.

Mrs. Bowser:

We did. He sent us a copy?

Mr. Teaford:

Yes.

Mr. Jackson:

Mr. Kessler, the West Campus, I think most everybody agrees that it would be best to keep that very closely related and associated for faculty needs, student needs, and to the research of the institution. It was hoped, at least on my part, that the area at Ackerman Road that we would have those kinds of uses there, but we would also have the kinds of uses where -- as an example, Cray, who sold us the Supercomputer, they need a support staff and it would be good to have that support staff in proximity to the Campus. That might be a good place for them. Maybe IBM, maybe any one of the computer type folks, maybe a faculty member who has a small project on the side outside of the institution might want space in the facility. Those are the kinds of utilizations I think that we perceive at that site.

Mr. Kessler:

I don't have the answer. It is a wonderful asset of the University to have that land, because of the close proximity to Ohio State, the road systems, and to downtown Columbus. So, the location is excellent from a developer's standpoint. We are not a developer and as Dick was saying on the rezoning, he learned a lot by going through the rezoning. We do that all the time. I am not proposing that we be a developer, but I think we should really give a lot of thought to what we should do with the property. Having said that, I don't know what we should do, but I don't think we, as a university, will ever be quite as aggressive as a developer would be or somebody willing to go out and get these tenants. Because the Cray's and IBM's, people are out there trying to get them everyday right near us. So, whatever we do with it, I think we should try to work as a Board and concentrate on what we should be doing. I don't think we have made any mistakes yet on the property, and I think getting the rezoning is appropriate. We have had some fanfare about what we are going to do with it and we -- as Dick said -- I think properly we are crawling.

Mrs. Bowser:

I think we are one of the few major, comprehensive universities in the United States that has an opportunity like this, as far as land is concerned. I can't think of any other that has this advantage.

December 2, 1988 meeting, Board of Trustees

REPORT ON THE RESEARCH PARK (contd)

President Jennings:

That is really so incredibly important now for Ohio State, the fact that we are not land-locked. I don't know of another university right now that doesn't generate a major problem, in terms of land use, every time they talk about a new building. But we have those land opportunities, now we need to use them. And that is why I say the emphasis must be on what the tenant uses it for. At this stage, we don't need West Campus land beyond the normal plan for the next fifty years. But, all the property and the buildings -- there have been a lot of university presidents and a lot of boards of trustees severely criticized throughout Ohio, for land purchases that we now take as a normal part of The Ohio State University and are utilizing them in a very major way.

Once a month I have a breakfast with students and the typical question I get is, "why can't we have better parking at Ohio State?" And I say, "well, we can -- we can have better parking right now at Ohio State. We can't build more ramps, because that is \$13,000 a slot, but we can for example, put a parking lot down perhaps on the South Oval Mall or perhaps in the Oval." Obviously, I am kidding. The point is that on this side of the river there is no land left. That is the realistic activity at every university in America. There will come a time, fifty years from now, when the West Campus is not thought of as separate from the rest of the institution. We do not have any land for practical purposes. Myles was talking about us wanting to build a major new central library. Where? Wonderful, underground?

Mr. Teaford:

Under the Oval.

President Jennings:

Unless you're talking about doing something like that, you are taking major green space if you want to put it close to the Oval.

Mr. Teaford:

Harvard Library is under part of Harvard Yard.

President Jennings:

The Michigan Law Library is six stories underground and the bottom floor gets sunlight. It is built on an angle. It is a magnificent facility, it is a beautiful facility inside. That is right, as you just said, it is expensive. The point is there is no land left on this side of the Campus. For major activities on this Campus we have to go to the West Campus. That land is important to preserve.

Mr. Kessler:

I think it is clear that we wouldn't take land to develop a research park that would be needed for the University. But not only do we have a research park area, but we also have Don Scott. There is a

December 2, 1988 meeting, Board of Trustees

REPORT ON THE RESEARCH PARK (contd)

Mr. Kessler: (contd)

lot of unused land there. I think that we should study it. And now that it is zoned, I think it is really appropriate to look at it.

President Jennings:

Jack, I am not disagreeing with you and I am not suggesting you do anything else. I am saying that the call on that is a closer call as to what is valuable and what is not. The land on this side isn't here. What is going to happen, for example, when the children of the baby boomers start arriving. That is when the demographics start pushing the enrollments up.

Mr. Jackson:

I would like to make one more comment and that is that I think this an extremely appropriate time to review this. But I would also like to say for the sake of the press that this doesn't indicate any massive new development tomorrow morning along North Star Road that nobody has known about.

(See Appendix IV for complete text of The Ohio State University Research Park -- Progress Report to the Board of Trustees, page 409.)

--0--

REPORT ON THE COLLEGE OF PHARMACY

Dr. Brand:

It is my pleasure to introduce you to Dr. John Cassady. John received his undergraduate B.A. degree from DePauw University in 1960, with a major in chemistry. He obtained his Master's degree and Ph.D. degree -- Ph.D. degree in 1964 from Western Reserve, now Case Western University in Ohio, with a major in organic chemistry. Dr. Cassady was an NIH post-doctoral fellow in the mid-60's, 1965-1966, at the University of Wisconsin.

In 1966, he joined the faculty of the School of Pharmacy at Purdue, as an assistant professor and he remained there to work his way through the ranks to become professor in 1974. He was appointed department head in medicinal chemistry and pharmacognosy in 1980. In 1987, Dr. Cassady was appointed the Glen L. Jenkins Distinguished Professor of Medicinal Chemistry at Purdue. He came to us April 1, 1988, as Dean of the College of Pharmacy.

Amongst his many awards he was elected to the Membership in the American Association for Advances in Cancer Research and was elected a Fellow of the Academy of Pharmaceutical Sciences in 1979. In 1987, he was elected a Fellow of the American Association of Pharmaceutical Scientists, as well. In 1981, Dr. Cassady received the Purdue Cancer Research Award and recently in 1985, the Giswald Lecture Award from the University of Minnesota.

December 2, 1988 meeting, Board of Trustees

REPORT ON THE COLLEGE OF PHARMACY (contd)

Dr. Brand: (contd)

His research interests involve the discovery and design of anti-cancer drugs from natural products and biosynthesis. And his current projects funded by NIH involve studies of anti-tumor and chemo-preventive agents from higher plants and synthesis of potential anti-tumor agents.

Since his coming to Ohio State he has been very active in continuing to support research in the College of Pharmacy. A very strong college, I should tell you. Ranked highly amongst competing colleges of Pharmacy in the country and the Big Ten. And he has initiated a strategic planning process within the College, as well. John, if you will tell us a bit about the College we would appreciate it.

Dr. John M. Cassady:

Thank you, very much Provost Brand, President Jennings, Members of the Board and colleagues. I appreciate this opportunity to come and address you on behalf of the College of Pharmacy. One of the things that Myles asked me to do as part of my remarks is to comment on some personal factors. I decided to relay some of those personal factors that led to my decision to leave a predominantly teaching and research position, in which I was very comfortable and happy, and come into a situation where I was involved in a different level of administration. There were a number of things that I felt were necessary in order for me to make a decision to move in that direction. Ohio State University presented, in almost every case, a very positive answer to my questions.

One of the things that I was looking for was an institution and a college that had strength and tradition. Another that I was looking for was an institution where there was administrative support for developing programs of excellence including multi-disciplinary graduate and research programs. Another factor was that the college should be a comprehensive college. That is one that is involved in both undergraduate education and a graduate education and research and located in a major medical center. It had to have a very high quality infrastructure, in terms of instrumentation and computer facilities. It had to have the vision to develop facilities that will allow program development. In that regard, without spending a great deal of time on it, I should mention, you probably are aware, that there has been a major commitment of the university and the State to construct a connector building that will link the College of Pharmacy and the College of Biological Sciences. This will allow us to generate centrally shared resources with Biological Sciences and this will provide a unique facility for interdisciplinary research and education in the biological and pharmaceutical sciences.

Another thing that I think we sometimes take for granted at Ohio State University are some of the unique funding mechanisms that we have to support program development and faculty. Among these are the Eminent Scholar, the Academic Challenge and others. These certainly do not exist at Purdue University and probably do not exist at most universities in the United States. I think that from

December 2, 1988 meeting, Board of Trustees

REPORT ON THE COLLEGE OF PHARMACY (contd)

Dr. Cassady: (contd)

a personal point of view I was also interested, as Myles indicated, in an institution that encouraged administrators to remain involved as much as possible in teaching and research. It was important for me to continue my research program in the area of medicinal chemistry.

I will also say -- as long as I am on the personal side and before I get into the slides and overheads -- that I also enjoy sports. And this is nothing against Purdue -- by the way, I don't want any of this quoted. Among the things I enjoy is Big 10 football. So, Myles arranged on one of my visits for me to attend a game. It was a great game and we had great seats -- we were on the 50 yard line. So, I came to the University with great expectations. To make a long story short, I made a trip over to talk with the people in the Ticket Office to ensure myself of the best seats possible. I went to my first game and we were on the minus 5 yard line. I came to a reception not to long after that and ran into the young man you was supposedly helping me get excellent tickets and I told him, "when I was an Assistant Professor at Purdue University, I was in better seats than this." And he looked at me and he said, "Welcome to the Major Leagues." So, I'd like to say that I am happy to be in the Major Leagues. And I think clearly, I hope you will feel also, that our College of Pharmacy is in the Major Leagues.

Let me show a few initial slides and then I will go to transparencies. I just want to give you a little bit of an overview and then focus initially on the undergraduate program and then move to the graduate research program and some of the things that we are interested in doing.

First of all you should know that the College of Pharmacy at The Ohio State University is one of the oldest in the country -- 103 years old and celebrated its' centennial in 1985. The College has always provided leadership in undergraduate education and graduate education. The College was the first with the four-year B.S. degree in Pharmacy and the first with the five-year B.S. degree in Pharmacy. And was one of the first -- probably the first two or three colleges in the country to establish a graduate program with a Ph.D. degree in the pharmaceutical sciences.

We are currently housed in Parks Hall and, as I indicated -- it is going to be difficult, probably, for you to locate -- but I think you can locate it if you look just below the -- out of the horse shoe, you can see just below Lincoln Tower there, Biological Sciences and Pharmacy. And somewhere between those two structures we hope within the next four to five years there will be a connector building or buildings that will allow us to advance our programs. As I indicated, we are concerned at both levels in education in pharmacy, both at the undergraduate professional level and at the graduate research level.

Now, what I would like to do, if I could, is switch to some transparencies to give you some data. First of all, to give you The Ohio State University College of Pharmacy in a nutshell, there are

December 2, 1988 meeting, Board of Trustees

REPORT ON THE COLLEGE OF PHARMACY (contd)

Dr. Cassady: (contd)

five major divisions in the college. As you can see, we are not one of the large colleges in the institution. We have thirty-six tenure track faculty. You get another feeling about our program when you look at the number of clinical faculty that we have. And I should indicate that those are clinical faculty that for the most part are volunteers. They are working with us, working with our students in clinical situations, but they are in a zero pay situation. This is extremely important to our program. We have approximately four individuals that are in the clinical faculty track.

We have about 470, and this has been roughly the same for the last decade, undergraduate and professional students. At the undergraduate degree we offer basically two degrees: the main degree is the five-year B.S. in Pharmacy; and then we also have -- and this is a trend as I think you will see in a minute in Pharmacy -- we offer the post-B.S. Doctor of Pharmacy degree, which is a five plus two configuration. We have a very active graduate program with approximately 90 graduate students. We have a small Pharm.D. program, as I indicated, and offer all of the graduate degrees up through the Ph.D. degree.

I think that a couple of things should be said in terms of trends in Pharmacy. There is an increasing emphasis on communication in Pharmacy, as there is an increasing need to provide drug information to patients and to other health professionals. This is then in addition to the traditional dispensing function of the College of Pharmacy. This is a clinical function, patient-oriented. Our curriculum has been and will be modified to reflect this. This means that we are going to have to pay more attention to communication skills among our graduates. We are going to have to be more concerned about the experiential component that they are participating in. And, we are going to have to be concerned that we are moving from more general practice type study to more specialized opportunities for individuals as the amount of knowledge in these areas simply goes out of bounds.

Next, I would like to show you how we are doing with regard to admissions and where our students are coming from. Again, we have a very good situation in Pharmacy. I don't think we have reached the point where we have a problem with accessibility, but you can see that we have a very high ratio of applicants to individuals that are enrolled in the College and that is increasing. We also are seeing an increase in the quantitative measures in terms of the abilities in the students that are coming into the program. You can see that a majority of our students are Ohio residents. We have roughly an appropriate distribution in terms of gender. We have an inappropriate situation with regards to diversity and that is something that we are working on as part of our affirmative action plan.

We also have in Pharmacy a tremendous amount of diversity in terms of career opportunities. And I want to indicate that because a lot of times people don't really realize the breadth of this. Our Pharmacy students have a great diversity of career paths and

December 2, 1988 meeting, Board of Trustees

REPORT ON THE COLLEGE OF PHARMACY (contd)

Dr. Cassady: (contd)

opportunities. The majority of our students are still going into the top category: Community Pharmacy and Institutional Pharmacy. I would say approximately 90% of our students go in that direction. This requires an entry level degree of either a bachelor's degree, an entry level Pharm.D., which a number of institutions are adopting, or a post-B.S. degree, either M.S. or Pharm.D., plus licensure. But in addition to that, about 10% of our graduates end up in public pharmacy, industrial pharmacy, or academic pharmacy. Here we are talking about advanced degrees, in many cases a Doctor of Philosophy Degree.

Mr. Teaford:

What does industrial pharmacy mean?

Dr. Cassady:

Well, for example, if someone left with a Ph.D. and went to work with Upjohn or Lilly or one of the pharmaceutical companies or one of the chemical companies. Many of our Ph.D. graduates go into chemistry and other areas.

I think one of the trends that we are seeing in Pharmacy is that there is a change in the demographics. This is similar, in a sense, as to what is happening or happened in Agriculture, and it is because of economics. And I will talk a little bit about some of the pressures of economics. But there is a move from the traditional independent, community pharmacy to small chains and large chains -- corporate pharmacy. I think we are seeing that because of the economic difficulty of making a business go when you are in a small configuration. This is something that, obviously, we have to be concerned about as we establish our curriculum and educate our students.

I think you might be interested in the impact of our undergraduate alumni. We currently have about 3,000; we have 600 graduate alumni. And, currently, almost the majority, two-thirds of our alumni practice pharmacy in Ohio. Twenty-five percent of the pharmacists in the State of Ohio graduated from The Ohio State University.

I want to switch a little bit now to the graduate area and just give you some figures. In order to carry out a graduate program, one has to be able to attract support and I wanted to show you and give you a perspective on that. This is a five-year time frame. You can see that we have a significant amount of support in excess of \$2 million and growing each year -- coming both from federal and non-federal sources. My analysis of this is that we are static in this area, and we need to do something to move this forward at an accelerated rate. I think this is something that will come out of our planning process and the opportunity that we have because of the opportunity to grow with the expanded facilities that we have.

December 2, 1988 meeting, Board of Trustees

REPORT ON THE COLLEGE OF PHARMACY (contd)

Dr. Cassady: (contd)

Now this is a perceptual -- I want to emphasize this is one Dean's perception. But I think that most people that you would talk to would agree with this and this is based to some extent on quantitative measures. The top comprehensive colleges of pharmacy in the United States are public colleges of pharmacy. If you look at the top fifteen colleges of pharmacy, and Ohio State is certainly within that group, in my opinion, all of the Big 10 colleges of pharmacy are included within that group. So, we have a very competitive situation with regard to the Big 10 in terms of colleges of pharmacy. I think you can see where we rate. One thing that you have to look at is the B.R.S.G. rank, it is a rank based on the amount of NIH support that these colleges obtain. But, it is not monitored or modified based on the number of faculty. So, for example, the University of California at San Francisco, which is number one in terms of NIH funding, you should realize has 70 faculty in comparison to our 35 faculty. So there are some differences in the size of these programs.

Mrs. Bowser:

They don't have any B.S. degree either? Is that right, they don't do any undergraduate work?

Dr. Cassady:

Which one are you talking about?

Mr. Teaford:

California at San Francisco.

Dr. Cassady:

There are really three basic configurations that these colleges are going to and I think that is something that is certainly of importance to us. There is a trend, as I indicated, toward the Doctor of Pharmacy degree. Some of the colleges have moved to entry level Doctor of Pharmacy degrees and have left behind and eliminated the five-year Bachelor of Science in Pharmacy. Some schools have gone to a situation where they have both and some schools have gone to a situation where they have all three. You can see that there is some controversy and debate about exactly what should be done. Currently, Ohio State University has the five-year B.S., the post-baccalaureate Pharm.D., and the Ph.D., but we do not have a six-year entry level Pharm.D. You can see that some of the major schools have only the entry level Pharm.D., and this is certainly something that we need to keep an eye on.

I think you can see that another factor is being at a major medical center and there are a number of other considerations that went into this. But I think that we feel that we are in the top fifteen, that we are competitive in the Big 10, and we feel that we can certainly move to the top tier of these universities in the next ten to fifteen years.

December 2, 1988 meeting, Board of Trustees

REPORT ON THE COLLEGE OF PHARMACY (contd)

Dr. Cassady: (contd)

I think as we position ourselves for the future and as we go into strategic planning, we have to be concerned with some of the dramatic changes that are occurring that impact on all of our areas and certainly on Pharmacy. I have divided some of these areas that we are considering now as part of our strategic planning into economic, social, and technological courses of change. I think that change is good, and in fact, Clark Kerr had a quote which I think was meaningful to me. He indicated that, "change comes more from spawning the new than reforming the old." I think that is something that we need to keep in mind as we look at the development of our programs. We want to build from excellence, but we also want to think about moving to frontier areas when they are apparent. We want to orient our research to solve real world problems. And I think this is consistent with the type of institution where our College is placed. I also believe, and I think most of the individuals in the College believe, that the most significant research problems that are present today in our area are occurring at the interface of disciplines. And in order to address some of these problems, we need to take interdisciplinary approaches.

I am not going to have time to go into detail on a number of these, but I'll put these up and if some of you are interested in more detail at some point I would be happy to discuss this with you. In the area of economics in the health care industry, we have a number of impacts. The structure of the health care delivery system is changing dramatically. We are talking about third parties, rather than just two parties being involved in this process. Manpower is a tension in the health sciences. As I indicated there is a shortage of manpower in Pharmacy and Nursing. However, if you look at the other health sciences like medicine and dentistry, this is not the case at the present time. This produces a tension among the professional areas. There is an extreme pressure on cost effectiveness and cost accountability. And in some cases the attempt to meet this criteria has led to a problem in balancing economics in quality health care.

There are also tremendous social courses of change and factors. And this influences the role of Pharmacy, in terms of how the pharmacists operate. And I alluded to that when I indicated that the pharmacists are becoming more clinically oriented and less drug product oriented. There is a tremendous dynamic in the area of health care for the elderly. Eleven percent of our population consumes 25% of our pharmaceuticals. This percentage of the population is rapidly growing. It is estimated by somewhere around 2020 or 2030 that this will double, and this group of individuals will double in size. This has great significance in terms of research and practice, in terms of educating our pharmacists and our researchers to identify problems in this area. Diseases of life-style are a tremendous problem that need to be addressed. I've just indicated three in this area that at least partially fit in the areas of diseases of life-style. We need to take this into consideration when we're thinking about the types of research programs that we want to develop and the type of curriculum

December 2, 1988 meeting, Board of Trustees

REPORT ON THE COLLEGE OF PHARMACY (contd)

Dr. Cassady: (contd)

that we have. I think that when you look in terms of some of the diseases of life-style, you find that in some cases prevention is a much more attractive approach than treatment. And the pharmacists needs to think in terms of prevention in their practice, as well as therapy. And this gets into the area of education.

Now, another area that I indicated is an extremely dynamic area that effects almost all of our programs at Ohio State is the area of technology. I have divided it into three major areas: instrumentation; dramatic advances in the way we can diagnose, treat, and carry out research -- I will try and illustrate a few of these. The area of computers has an impact on both pharmacy and research, and I just indicated two areas. Computer-assisted pharmaceutical services, not just robotics, but moving artificial intelligence and we need to be very concerned about the developments in that area. Computer assisted drug design -- a fundamentally different approach to the drug discovery which is complementary to the classical screening approach.

Here I have biotechnology, novel therapeutic products, delivery systems, and research techniques. In the area of biotechnology we currently have ten products on the market that are products of biotechnology. There are a hundred products in development and it is estimated within ten years we will have 25-50% of the pharmaceutical products that will be products of biotechnology. This has extreme implications for pharmacy.

I want to show you just a couple of what I would call molecular advances. I won't go into all of the examples, but I do want to show you one of the things that we are doing. There are extremely dramatic changes and instrumentation that are allowing us to look at structure at a very, very microscopic level. This is an example of looking at a very small benzene molecule, and you can see the molecule. So, you are at the point where you can use a scanning, tunnelling, electron microscope and now see things at the molecular level. This is now going to move to the biological matrix and we'll be able to see, at molecular resolution, some of these biological systems which at the present time are black boxes. This type of research is the type of research that we should be doing at Ohio State University because it is frontier research.

Drugs of the future -- as I indicated, there has been a transition in this case. We still include all of these, among the drugs that we utilize. But the big impact here is going to be the new directions in drug delivery and therapy that occur as a result of biotechnology.

I'm not going to be able to go into detail in this, but I just want to show you that there is a number of important areas that we need to deal with here: drug production and applications; novel drug delivery systems; diagnostic and therapeutic immunology; and the genetic phases of the disease state and gene therapy. This is going to be an extremely important area. The ability to sequence genes, to understand the genetic defects that lead to disease, to use that

December 2, 1988 meeting, Board of Trustees

REPORT ON THE COLLEGE OF PHARMACY (contd)

Dr. Cassady: (contd)

in a diagnostic way, and then eventually to be able to treat genetic diseases by repair. This has implications that are not only scientific, but social and economic. We are going to go through a period of time where we are going to have to look at the ethics of this and there will have to be laws governing the production and use of these types of pharmaceuticals. We have to educate the pharmacists to be able to carry out this type of work in the future.

Finally, I would just like to say, as I indicated, that we are very concerned and feel that it is very important for us to move in the direction of interdisciplinary thrusts. We are in the process of planning and these are areas that we are considering and prioritizing. But these are some of the things that I feel that we can develop. As you see, we are going to be developing these with other disciplines: with Math and Physical Sciences; with the Computer Center using the supercomputer; Chemical Instrumentation Center; and very important to us, the College of Medicine, the Biotechnology Center, and the Cancer Center. We are beginning to develop these interfaces and, as you are probably aware, we are very heavily involved in the Cancer Research area. We see a very bright future at Ohio State moving into these disciplinary areas.

I would say that we are very good at Ohio State and feel that we are competitive with the top tier universities, but we do not feel that we are the best that we can be. That will be our objective. In conclusion, I would like to say that the faculty and I are involved in comprehensive planning that will establish these priorities and we will have a common goal to further develop the College as an innovation center for pharmacy education and research. Thank you.

Mr. Immke:

Thank you, John. Any questions or comments?

Mrs. Bowser:

I notice that your research grants have doubled. I don't remember what the time-frame was -- five years?

Dr. Cassady:

I don't think it was quite double. In 1983 we went from about \$1.4 million and in 1987 we went to a little over \$2 million. We are seeing a significant advance this year, which I did reflect in there. So, I think that we will be advancing. And I think that we have a lot more potential as the faculty grows and moves towards our new facilities to really begin to move up to that top tier of the top fifteen in terms of research.

Dr. Brand:

John is a little modest. He wouldn't say this, but one of the reasons why our grant activities have increased significantly is because of the grants John brought with him from Purdue.

December 2, 1988 meeting, Board of Trustees

REPORT ON THE COLLEGE OF PHARMACY (contd)

Dr. Cassady:

I did get my last one renewed a month ago.

Mr. Teaford:

You indicated that drugs are going to be the products of biotechnology. Is that fundamentally going to change the disciplines of your professors because of that?

Dr. Cassady:

It absolutely will, and this is where the planning process comes in. There is no way that we can be competitive and not develop linkages to other disciplines that are involved and also develop faculty with expertise in that area. And we plan to do that. In fact, this may be our first major development.

Mr. Teaford:

That to me is an astounding thing, to really change --

Dr. Brand:

That point can't be over emphasized. It is a small College, 35 faculty, but it's really our crucial linkage point among a number of colleges: medicine, biological sciences, agriculture, biotechnology. And it can act as a catalyst in bringing along multi-disciplinary work. I think that is one of the thrusts of the College and John gets credit for emphasizing that.

--0--

The Chairman, Mr. Immke, called the meeting of the Board of Trustees to order on December 2, 1988, at 2:20 p.m. He requested the Secretary to call the roll.

Present: Leonard J. Immke, Chairman, John W. Berry, Shirley D. Bowser, Hamilton J. Teaford, John J. Barone, Deborah E. Casto, and John W. Kessler.

--0--

Mr. Immke:

I would like to make the following statement relative to some of the changes and activities that you have noted with respect to Board committee meetings.

For some time this Board has been considering making changes in its schedule, along with the Board Committee structure. As University Trustees we feel it is important from time to time for us to step back from the normal course and to engage in healthy self-assessment.

With the intent of enhancing the overall effectiveness of our committees, we have shifted from a committee of the whole structure to smaller, simultaneous committee meetings which will report to the

December 2, 1988 meeting, Board of Trustees

Mr. Immke: (contd)

entire Board at this regular meeting. It is expected that each committee will be able to thoroughly review matters of importance to the University and to discuss its deliberations with the full Board. Each committee will make appropriate recommendations to the Board for it to discuss and act upon. In addition, we have elected to revert back to a former practice of the Board of meeting for the full day on Friday, rather than following the schedule of Thursday afternoon/evening and Friday morning meetings which was adopted in the early 1980's.

It is hope that this modification of previous practice will facilitate the open and complete evaluation of all matters brought before the Board for its timely response and action.

--0--

DEVELOPMENT FUND REPORT

Mr. Kessler:

We talked about Development and we had Mr. Tobin in our Investments Committee meeting this morning. We had an update on the University Campaign, where the receipts and expectancies through October of this year were \$319 million, which is 91% of our goal. Mr. Tobin indicated that everything was going along well. Weldon reported that there has been verification of the pledges and that all is well in terms of the money that has been reported. It has been documented, and should be received by the University. There has been no Development Board meeting since the last Board meeting.

--0--

RESEARCH FOUNDATION REPORT

Mr. Barone:

Mr. Chairman and Members, in reporting for the Research Foundation, I would like to report that the Research Foundation Grants and Contracts for the month of October 1988 are shown in the Board agenda book. There are 93 awards listed which provide a gross income of \$18.7 million.

Funding for the first four months of the fiscal year is about twenty percent ahead of the same period of the last fiscal year. Timing of awards from the U.S. Department of Labor and the Agency for International Development accounts for most of the growth.

Some of the highlights of the awards are:

- * \$1,000,000 award from the Department of Health and Human Services to Ronald Glaser of the College of Medicine to study the effect of stress on health.
- * \$1,000,000 award from the Department of Defense to Kenneth Waldron and Charles Klein of the College of Engineering for further development of the walking machine.

December 2, 1988 meeting, Board of Trustees

RESEARCH FOUNDATION REPORT (contd)

Mr. Barone: (contd)

- * \$150,000 award from the U.S. Department of Education to Weldon Mathews of the Department of Chemistry for Fellowships in Chemistry.
- * \$120,000 award from the U.S. Department of Education to the Graduate School and the College of Medicine for a Summer Internship Program for Minority Undergraduate Students.

I wish to further report in our meeting yesterday afternoon that most of the members who were at the meeting were elated. And I would like to thank Dr. Jennings and this Board, that in the next thirty days most of the workers and associates at the Research Foundation will be moving to very fine quarters. They are very happy about it. I'm sure that will reflect on the work that they will be doing. At this time, I would rather turn the rest of the matter over to Jack Hollander to see if he wishes to amplify any of these points. Jack, do you have anything you want to add?

Dr. Jack Hollander:

Well, maybe a point or two. Mr. Barone mentioned that the awards are twenty percent ahead of the same period last year. When you are counting a small fraction of the year like that, you have to realize that the small number of large awards can very much affect the apparent growth at that time. These two awards that he mentioned, the Department of Labor and the Agency for International Development, the first of those is a \$4.5 million renewal reward which the Center for Human Resources Research has received. That actually is a two-year award, so we won't be seeing that one next year. That is for the ongoing Longitudinal Survey of Labor Market Experience. The other one is an award from the Agency for International Development which is actually a five-year award -- \$1.8 million. Also, a renewal to the College of Agriculture for study in manpower for Agricultural Development in Uganda. So, those are major awards and we won't be seeing that one again for five-years, because that is a five-year award.

I would like to point out, also, that most of the external support that we get goes for research, but Mr. Barone mentioned two awards that are interesting in that they support the teaching function at the University. He mentioned the \$150,000 award from the Department of Education for Chemistry. The full title of that award is for "Competitiveness in Chemistry in the 21st Century." The purpose of that award is to help us recruit the very best graduate students in Chemistry. This particular amount will help to support ten pre-doctoral students, and I might mention also, that five of those ten are to be awarded to minority students. So, this kind of award also serves other very important functions, as well as the research function.

The other \$120,000 from the Department of Education to the Graduate School and College of Medicine for Summer Internship Program, that is entirely for minority undergraduate students for nine-week internships for twenty-five minority students from 5 institutions.

December 2, 1988 meeting, Board of Trustees

RESEARCH FOUNDATION REPORT (contd)

Dr. Hollander: (contd)

Of course, we have to be frank about it, we would like to attract some of these students to come to Ohio State for graduate work. We hope that we can get the best of them to come back here for graduate school after they finish their undergraduate work. If they so choose, then these funds will also help us to provide stipend support for those students when they return to Ohio State as graduate students.

There is another award that Mr. Barone did not mention and I would just like to add -- \$166,000, also from the Department of Education, for Supplemental Financial Aid for Graduate Students in Mathematics. So, I think these three awards do illustrate for you the importance of some of the external support for the educational and graduate programs, as well as the research awards which we more normally discuss. Thank you.

--0--

STRATEGIC PLAN FOR UNIVERSITY HOSPITALS

Mr. Teaford:

Let me start with a report on the Hospitals Board. All University Hospitals Board members were invited to attend the Executive Committee meeting of the Board on November 3, which was held just prior to the joint meeting with this Board.

The meeting began with Mrs. Bowser's report from the Strategic Planning Committee. In two separate meetings, members of that committee had carefully reviewed the Hospitals' capital plan to ensure that it supports future directions of Health Services, the College of Medicine, the Hospitals and the medical faculty as contained in our Strategic Plan. At the recommendation of the Strategic Planning Committee, we gave overall approval to the capital plan. We will continue to discuss priorities and funding, and will make adjustments if necessary. We agreed on the necessity of generating more public and private support for the medical center, although such support must not detract from support for the University as a whole.

We received reports from Dr. Mekhjian, the Hospitals' medical director, and Dr. Clausen, the Chief of Staff. We reviewed medical staff appointments and approved a Physician Extender application form, which will be used as a means of verifying their training and deciding which specific privileges will be granted. We received financial reports from the Hospitals and from the MedOhio network. We are pleased to report the MedOhio facilities are not only serving our three-part mission of teaching, research and patient care; they are also providing inpatient and outpatient referrals to University physicians and facilities, and operated for the first quarter of the fiscal year with a positive bottom line. That is so long as you don't count the capital -- I'd just like to clarify that. Needless to say, that was my editorial comment.

December 2, 1988 meeting, Board of Trustees

STRATEGIC PLAN FOR UNIVERSITY HOSPITALS (contd)

Mr. Teaford: (contd)

Hospitals Board members unanimously approved incorporation of the affirmative action policies of the College of Medicine and University Hospitals into the Medical Center's Strategic Plan. Following the Executive Committee meeting, Hospitals Board members met with the University Board of Trustees for a full review and discussion of the Strategic Plan. Presentations were made by Dr. Manuel Tzagournis, Vice President for Health Services and Dean of the College of Medicine; Dr. Ronald St. Pierre, Associate Dean and Chairman of the Medical Center's Strategic Planning Task Force; and Mr. James L. Nichols, the Hospitals' Interim Executive Director. Following the presentations there was a discussion of the Strategic Plan by the joint Boards. And as you know, at that time this Board indicated to the Hospitals Board that it was our intention to bring that strategic plan before us for adoption, if we want to adopt it. I might say that I think this strategic plan is a model for what we expect from all of the departments of this University. It is a superb job and I might say owes much of its genesis and much of the thing that has kept it going to my colleague, Mrs. Bowser. I think, frankly, without her pushing we would be still looking for it.

At this time, I want to just read the one-page strategy summary and then I would move that we adopt it. That summary:

"That we understand and work towards achieving the criteria which determine a top ten national medical school;

Recognize that substantial funding will be required to achieve top ten national ranking;

The major long-term source of increased funding will be extramural research grants, however initial resources of seed money could also include reallocation of present resources, normal income, program-focused state grants, and clinical hospital and practice plan income;

That we continue to foster an environment within The Ohio State University Hospitals and Clinics, which supports the College of Medicine's progress towards top ten status;

And, acknowledge that supporting the College of Medicine's goals will require that OSU Hospitals and Clinics and its medical staff become much more market responsive, cost competitive, and efficient."

That is the twenty-five words or less -- although it is a little bit more -- of this strategic plan. Mr. Chairman, I would move that this Board adopt that plan and require its fulfillment.

December 2, 1988 meeting, Board of Trustees

**STRATEGIC PLAN FOR THE OHIO
STATE UNIVERSITY MEDICAL CENTER**

Resolution No. 89-62

Synopsis: The Committee of the whole of the Board of Trustees recommends for approval the strategic plan for The Ohio State University Medical Center.

WHEREAS the Board of Trustees has requested the President to develop a strategic plan for The Ohio State University College of Medicine and The Ohio State University Hospitals and Clinic, collectively referred to as The Ohio State University Medical Center; and

WHEREAS such a plan was presented at a joint meeting of this Board and the Hospitals Board on November 3, 1988; and

WHEREAS during the review of the strategic plan it was agreed by Hospitals Board and this Board that the Affirmative Action plan for the College of Medicine and University Hospitals be incorporated as part of the strategic plan; and

WHEREAS at the November 3, 1988 meeting the Board of Trustees pledged to review the strategic plan and to take action on it at the December Board meeting:

NOW THEREFORE

BE IT RESOLVED, That the strategic plan for The Ohio State University College of Medicine and The Ohio State University Hospitals and Clinic, attached hereto, be approved and that the appropriate University officials undertake to fulfill its mandate.

(See Appendix V for complete text of Summary of Recommended Goals and Strategies for the College of Medicine and the Hospitals and Clinics, page 415.)

Upon motion of Mr. Teaford, seconded by Mrs. Bowser, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

INVESTMENTS COMMITTEE REPORT

Mr. Kessler:

The Investments Committee met this morning with the full committee in attendance. We did have the update on the University Campaign, which I mentioned earlier. We had an Endowment Investment Report, which showed the value of our investments totaling \$250 million as of November 18. We had a discussion of the goals of the Endowment and the need for reviews of investment managers. We had a discussion on our hotel that we recently acquired and indicated that we will have a more thorough discussion on that at a later committee meeting.

December 2, 1988 meeting, Board of Trustees

INVESTMENTS COMMITTEE REPORT (contd)

Mr. Kessler: (contd)

And we also received the report of Ennis, Knupp & Associates, the investment consultants hired by the Board earlier this year to review the investment policies of the Endowment and make recommendations. This report was just received. We discussed it just generally and we are going to take it up at our next committee meeting in full review. We have also instructed the staff to mail this to all of the full Board, with a letter explaining, so that you will have a chance to be familiar with it before our next Board meeting.

That is the end of our report, unless either Mr. Berry or Mrs. Bowser have anything to add to it.

(See Appendix VI for complete text of The Ohio State University Endowment Summary, November 18, 1988, page 503.)

--0--

ACADEMIC AFFAIRS COMMITTEE REPORT

Ms. Casto:

This morning the committee met and they recommended that the Board of Trustees of The Ohio State University strongly endorse the Strategic Planning initiative that is currently underway in the Office of Academic Affairs. The Provost's strategic planning and ongoing strategic thinking are essential components of The Ohio State University's continuing advancement into the top ranks of America's public universities.

I think that we had some very good discussion. As Joel said, the strategic planning of the Hospitals has really been a key point and we hope this will go on throughout the departments, so that we can move on to greater things at Ohio State University. Do you have anything to add, Joel?

Mr. Teaford:

Well, I think we should note that the strategic planning process is well into its early stages. I understand that there are a few tardy reports that are due actually on your desk right now and they are probably all over there. But, they are at the first stage and there will be hearings on them over the next few months. I think, particularly, if we are faced with some of the budget constraints which I fear, having these plans will greatly facilitate our making sound decisions about why we have to pick some things over others. I think it is a very important and timely process that we are into.

(See Appendix VII for complete text of "Strategic Planning at The Ohio State University -- an Update," November 23, 1988, page 513.)

--0--

December 2, 1988 meeting, Board of Trustees

Ms. Casto:

The Academic Affairs Committee is recommending for approval the following resolutions:

GAR FOUNDATION

Background

The GAR Foundation is situated within the law firm of Buckingham Doolittle & Burroughs in Akron. Lisle Buckingham, an Ohio State graduate (Arts and Science '68 and Law '71), is a trustee of the Foundation. The Foundation awards grants to higher and secondary educational institutions for programs promoting the private enterprise system. It also makes donations to the arts, to hospitals, and to civic and social agencies. Its assets are more than \$120 million.

The resolution requested by GAR, submitted to the Board, is a precondition for release by the Foundation of a \$25,000 gift to the University. It is hoped that the receipt of this gift from the GAR Foundation would represent the beginning of a constructive relationship between The Ohio State University and this Foundation. The GAR gifts have historically been restricted to the Akron area.

GAR FOUNDATION

Resolution No. 89-63

Synopsis: The Academic Affairs Committee recommended the approval of the procedure which will allow for the acceptance of a gift from the GAR Foundation.

BE IT RESOLVED, That the funds received by the Board of Trustees of The Ohio State University from the GAR Foundation for endowment, unless otherwise specified by the Foundation, shall be held with the principal thereof neither to be invaded nor encumbered and only income therefrom to be utilized and that the Foundation be furnished yearly a copy of the audit report certifying that the principal is intact and only income is being distributed; and

BE IT FURTHER RESOLVED, That the foregoing resolution shall not be rescinded, amended, changed, annulled or revoked without the prior consent of the GAR Foundation.

Upon motion of Mrs. Bowser, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

PERSONNEL ACTIONS

Resolution No. 89-64

Synopsis: The Academic Affairs Committee recommended the approval of the following Personnel Actions.

December 2, 1988 meeting, Board of Trustees

PERSONNEL ACTIONS (contd)

RESOLVED, That the personnel actions as recorded in the Personnel Budget Records of the University since the November 4, 1988 meeting of the Board, including the following Appointment of Directors to Center and Hospitals, Leaves of Absence Without Salary, Professional Improvement Leave--Change of Dates, and Emeritus Titles as detailed in the University Budget be approved, and the Medical Staff Appointments/Reappointments approved November 3, 1988, by the Hospitals Board be ratified.

Appointment of Directors to Center and Hospital

October 1, 1988 through September 30, 1990

Center for African Studies

Isaac J. Mowoe

November 1, 1988 through June 30, 1989

Veterinary Hospital

John A. E. Hubbell

Leaves of Absence Without Salary

BRUCE S. GROWICK, Associate Professor, Department of Educational Services and Research, effective Winter Quarter, Spring Quarter and Autumn Quarter 1989, to assume the position of Director of the Rehabilitation Division of the Industrial Commission of Ohio.

JOANNE H. TURNER, Assistant Professor, Academic Faculty of Accounting and Management Information Systems, effective Autumn Quarter 1988, Winter Quarter and Spring Quarter 1989, for personal reasons.

Professional Improvement Leaves--Change of Dates

HOWARD A. I. NEWMAN, Professor, Department of Pathology, change leave from September 1, 1988, through August 31, 1989, to October 1, 1988, through September 30, 1989.

Emeritus Titles

KENNETH W. REISCH, College of Agricultural Administration, with the title Associate Dean Emeritus, effective January 1, 1989.

DAVID L. MEEKER, School of Music, with the title Director and Professor Emeritus, effective January 1, 1989.

GOODWIN F. BERQUIST, Department of Communication, with the title Professor Emeritus, effective January 1, 1989.

S. EARL BROWN, Department of Geography, with the title Professor Emeritus, effective January 1, 1989.

PHILIP S. JASTRAM, Department of Physics, with the title Professor Emeritus, effective January 1, 1989.

MASAO KINOSHITA, Department of Architecture, with the title Professor Emeritus, effective January 1, 1989.

December 2, 1988 meeting, Board of Trustees

PERSONNEL ACTIONS (contd)

Emeritus Titles (contd)

ALBERT J. KUHN, Department of English, with the title Professor Emeritus, effective January 1, 1989.

EMIL M. MIKOLAJCIK, Department of Food Science and Nutrition, with the title Professor Emeritus, effective January 1, 1989.

MARGARET T. NISHIKAWARA, Department of Physiology, with the title Professor Emeritus, effective January 1, 1989.

BOBBY DALE VANSTAVERN, Department of Animal Science, with the title Professor Emeritus, effective January 1, 1989.

VIRGINIA E. YAGELLO, University Libraries, with the title Professor Emeritus, effective January 1, 1989.

PAUL G. ALTHOUSE, Department of Animal Science, with the title Associate Professor Emeritus, effective January 1, 1989.

DONALD L. DUNCAN, Department of Art Education, with the title Associate Professor Emeritus, effective January 1, 1989.

DAVID H. NOYES, Department of Physiology, with the title Associate Professor Emeritus, effective January 1, 1989.

ELLEN D. TELLER, Cooperative Extension Service, with the title Assistant Professor Emeritus, effective November 1, 1988.

ROY L. BUTLER, National Center for Research and Vocational Education, with the title Senior Research Specialist - Vocational Education Emeritus, effective January 1, 1989.

WAYNE E. SCHROEDER, National Center for Research and Vocational Education, with the title Senior Research Specialist - Vocational Education Emeritus, effective January 1, 1989.

SHIRLEY A. CHASE, National Center for Research and Vocational Education, with the title Research Specialist II - Vocational Education Emeritus, effective January 1, 1989.

Medical Staff--Appointments

ROBERT S. MIGGANTZ, DMD, Limited Staff, General Dentistry.

E. MITCHEL OPREMCAK, M.D., Attending Staff, Ophthalmology.

PATRICIA C. TEMPLE, M.D., Courtesy Staff, Pediatrics.

JOHN C. MYERS, M.D., Limited Staff, Division of Thoracic & Cardiovascular Surgery.

Upon motion of Mr. Barone, seconded by Mrs. Bowser, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

December 2, 1988 meeting, Board of Trustees

RESOLUTIONS IN MEMORIAM

Resolution No. 89-65

Synopsis: The Academic Affairs Committee recommended the approval of the Following Resolutions in Memoriam.

RESOLVED, That the Board adopt the following Resolutions in Memoriam and that the President be requested to convey a copy to the families of the deceased.

Frank T. Gaumer

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on September 19, 1988, of Frank Thomas Gaumer, Associate Professor Emeritus in the School of Journalism.

Born July 22, 1913, in Marysville, he graduated from Marysville High School in 1931. He attended Denison University for three years before transferring to The Ohio State University where he earned a B.S. in journalism in 1935 and a M.A. in 1965. He served in the U.S. Army Air Force from 1943-44.

Professor Gaumer was raised in the newspaper business, his father having been owner of the semi-weekly Union County Journal in Marysville. He became editor of the paper upon graduation in 1935, and continued until 1950. Professor Gaumer was an editor and publisher of the Marysville, Ohio, Journal-Tribune, before he joined the faculty as a journalism lecturer in 1960, advising the Lantern. He later taught courses in journalism law, reporting, editing, graphics, and typography until he retired in 1980. Upon his retirement, he was named Associate Professor Emeritus.

Professor Gaumer knew the "back shop" as well as the "front office" of the newspaper. He was thoroughly versed with the operation of the printing equipment, as well as being able to handle any editorial assignment, reporting, advertising layout, and sales.

He was past president of the Marysville Chamber of Commerce and the Union County Historical Society and was a member of the Society of Professional Journalists. He was a long-time member of the First Presbyterian Church of Marysville, serving as deacon, trustee, and Ruling Elder.

On behalf of the University community, the Board of Trustees expresses its sympathy and understanding to the family of Professor Gaumer. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Richard A. Miller

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on October 19, 1988, of Richard Arthur Miller, Professor in the Department of Architecture.

Professor Miller was born on June 27, 1925, in Sheboygan, Wisconsin. After studying architecture at the Taliesin Fellowship of Frank Lloyd Wright, he

December 2, 1988 meeting, Board of Trustees

RESOLUTIONS IN MEMORIAM (contd)

Richard A. Miller (contd)

graduated magna cum laude from Harvard College in 1949 and in 1952 he earned a Master of Architecture from the Harvard Graduate School of Design.

After practicing architecture in Elyria, Ohio, from 1953 to 1957, he assumed a position with Architectural Forum, an internationally known architectural journal published by Time Inc. Between 1957 and 1963, he served as associate editor and then senior editor of this journal.

From 1963 until 1978, he practiced architecture in his firm of Westermann/Miller Associates. Among his major architectural designs are the Yale University Health Services Building, New Haven, Connecticut; the Smith College Center for the Performing Arts, Northampton, Massachusetts; the Silverstein Pavilion of the Hospital of the University of Pennsylvania, Philadelphia; and the North Central Bronx Hospital for the City of New York.

Professor Miller's teaching career began with a one-year adjunct appointment at The Ohio State University in 1960, at which time he and his students completed a project that served as the major impetus for the renovation and preservation of German Village. Between 1961 and 1979, he established and served as the Director of the Graduate Program in Health and Hospital Planning in the School of Architecture at Columbia University.

In 1979, Professor Miller accepted a position on the faculty of the Department of Architecture at The Ohio State University, where he was teaching at the time of his death. One of the first projects that his students completed upon his return to Ohio State was a Visual Arts Center for the University. This project figured significantly in the subsequent international competition which led to the design of the Wexner Center for the Visual Arts.

On behalf of the University community, the Board of Trustees expresses its sympathy and understanding to the family of Professor Miller. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Aldrich Syverson

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on September 18, 1988, of Aldrich Syverson, Professor Emeritus in the Department of Chemical Engineering.

A native of Minnesota, Dr. Syverson attended the University of Chicago and received his B.Ch.E. in 1938, and his Ph.D. in 1942 from the University of Minnesota. He joined the B. F. Goodrich Chemical Company in 1942, where he contributed to the development of synthetic rubber for military use during World War II, and subsequently became the founding plant manager of the Avon Lake Experimental Station. He later served as the Director of Research for the O. M. Scott Company from 1959-60.

Prior to joining the Chemical Engineering faculty at The Ohio State University in 1950, he taught for two years at Syracuse University. He served as the Chemical Engineering Department Chairman from 1967 to 1976 and

December 2, 1988 meeting, Board of Trustees

RESOLUTIONS IN MEMORIAM (contd)

Aldrich Syverson (contd)

was active in faculty governance, serving on a wide range of academic committees both locally and nationally.

Dr. Syverson played an important role in the use of computers in the design and development of chemical processes. He served as a consultant to a number of industrial firms in this area and in the area of chemical reaction kinetics and catalysis.

Dr. Syverson was honored as the Columbus Technical Council Man of the Year in 1974, and was elected to the rank of Fellow in the American Institute of Chemical Engineers. Upon his retirement in 1977, he was named Professor Emeritus.

Sy was a respected teacher and a true gentleman. He enjoyed working with young people and helping them to develop their fullest potential. Through his dedication to excellence in teaching, research and public service both his profession and his university have gained much and will miss his clear insights.

On behalf of the University, the Board of Trustees wishes to express its deep sympathy to Aldrich Syverson's wife, Eleanor, and his children, Elizabeth and William and their spouses, his beloved grandchildren and his brother and sisters. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Upon motion of Mr. Berry, seconded by Mrs. Bowser, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

STUDENT AFFAIRS COMMITTEE REPORT

Ms. Casto:

The Student Affairs Committee received a report this morning from Vice Provost Russ Spillman. Basically, what he did for us was to outline all the different departments that are within Student Affairs -- twelve different departments. And then we went into greater detail about our dormitories and food services.

I don't know if you have anything more to add to that, but I was very pleased about where we are headed with the improvements that we have made in these facilities. Does anybody have any questions? They have gone into a process of updating it over the last ten years, cleaning and painting, and they have actual specifications for the quality that they want and the living conditions among the students. I was quite pleased.

I would like to call on Steve Dibert for the Interprofessional Council Update --

December 2, 1988 meeting, Board of Trustees

STUDENT AFFAIRS COMMITTEE REPORT (contd)

Mr. Steve Dibert:

Good afternoon. The Interprofessional Council has been busy lately investigating several issues that have been brought to us by our constituency. The Interprofessional Athletic Council representative, along with some other Interprofessional students, have been examining the OSU ticket policy and why it is that professional students do not move up in priority consistent with moving up in rank. They do not move up, for example, as undergrads do. As a freshman, one moves up in priority as you move up to a sophomore, junior, senior -- this is not done with professional students and we are looking into that.

In another area of concern, the law students anticipating the expansion of the Law School Building are having some concern with the fifty parking spaces that will be eliminated there. The concern is being pursued through the Traffic and Parking Committee by the Interprofessional Representative.

Finally, it was of concern to veterinary students, med students, and optometry students who purchased books from the OSU Medical Bookstore on Neil Avenue that perhaps the markup on these books was inconsistent with policies across University campus. It was felt that since no competition existed in the area, the bookstore had some sort of a free hand in setting the price. I pursued this matter personally, since I paid \$120.50 for a pathophysiology book last Spring. I discussed this matter to see if this was in fact the case. I talked to Robert Carlson, OSU Bookstore Director, and he went over the pricing policies and assured me that the policy was uniform throughout Campus. He also mentioned that the OSU Bookstore Manager from last year is no longer with us, and I should expect the new Manager to be more cooperative and sensitive to professional students' needs. I will keep you informed on any new developments in these areas.

Getting on to the matter of the student to sit on the Board of Trustees -- the three student governments have been working closely together developing the final criteria to interview the fifteen candidates that we currently have to narrow down to five for the Governor. I was very pleased to have received over twenty applications from professional students for this position. Although only representing about 5% of the population on campus, the professional student applications accounted for over 40% of the final applications received. It is encouraging and I believe the campus should take note that the professional students are not taking a passive role in the future of this University.

Thank you for your time and if anyone has any questions, I'll be happy to answer them now. Happy holidays and I will see you next year.

President Jennings:

Any particular sporting event that you are talking about tickets for?

December 2, 1988 meeting, Board of Trustees

STUDENT AFFAIRS COMMITTEE REPORT (contd)

Mr. Teaford:

It's basketball, Mr. President.

Ms. Casto:

Roger Musgrave is going to give us a report on CGS.

Mr. Roger Musgrave:

Good afternoon. I wish I could honestly tell you that I missed you all last month, but I was in linen pants and a mesh shirt at a research conference in New Orleans. So, I won't tell you I missed you.

The Council of Graduate Students hosted the Regional National Association of Graduate Students Conference on campus, the second weekend in November. We think it was very successful. The presentations stimulated quite a bit of spirit in the discussion and some pretty important networking occurred. We had thirty-five graduate students from twelve different universities in our region in attendance. And while that number doesn't on its face appear to be impressive, it is my understanding that it a larger attendance than they had at the first national meeting a couple of years ago. So, the organization is growing and Ohio State's graduate students are trying to stay a relatively large force in it. Registration fees paid for most of it. It just about covered itself. We would like to express our appreciation to our Graduate School and the American Association of University Professors for helping us cover the small remaining costs we had.

Next year's regional conference will probably be at Notre Dame or the University of Toledo. This year's national, in March, will be at the University of Miami, Florida. Six delegates from the Council of Graduate Students will be attending there trying to get our proposal excepted for Ohio State to host the national in 1990.

Plans are now complete for the first in a series of TA fora to occur this Winter and Spring. It is being cosponsored by the Center for Teaching Excellence, our Graduate School, the Council of Graduate Students, and, possibly, the Undergraduate Student Government. It will be relatively similar to the faculty forum series that has occurred, but with primary focus on issues strictly of concern to Teaching Associates. We want to thank Chris Jones at the Center for Teaching Excellence, who is a Research Associate for TA Development, for doing a lot of work on it. The first one will take place January 17, from 7:00-9:00 p.m. in Stillman Hall. The title of it will be, "Keeping All the Balls in the Air -- Juggling the Multiple Roles of the TA." And committed to that panel so far is Dean Koenigsknecht, Professors Pilotta, and Jamie Cano, and Jeffrey Leptak, and one other TA, who has not yet been determined.

Luke Evans, our vice president, is hard at work on plans for the Third Annual Graduate Research Forum. Things are looking fairly good, although we are still being challenged to replace the \$5,000 cut from our requests to the Council on Student Affairs Allocations

December 2, 1988 meeting, Board of Trustees

STUDENT AFFAIRS COMMITTEE REPORT (contd)

Mr. Musgrave: (contd)

Committee. One way or another we will make it, because it is important enough for us to find some way to do it.

CGS wishes to express its gratitude, one last time, to Julie Franklin, our graduate student in physics, who worked so hard for graduate students the last two or three years. It has come the time when Julie needs to pay back a little bit of the time to her own research and study that she has been borrowing against. So, she is giving up the Chair of our Federal, State and Local Affairs Committee to Terry Krukemyer, who is a graduate student in Agricultural Economics and Rural Sociology. Terry is, I think, as energetic as Julie was, and will do an excellent job. He is looking forward to jumping into determining how CGS and graduate students can aid in some way the University's efforts at getting a favorable budget allocation next year.

The Council of Graduate Students spent a large part of its last meeting in a discussion of the issues which need to be addressed this coming year, now that we don't need to spend so much time on taxes. Among the items identified as major concerns were Traffic and Parking issues, especially the proposal for turning the area from 17th to 19th Avenues into a pedestrian campus. It's of concern, largely because there are a lot of physical sciences buildings there where graduate students are enrolled. They essentially are required to work evenings and nights in those buildings, because of apparatus they can't take home, as I can take my books home. Folks are asking and we will continue talking to folks, but people want to be assured that safety issues will be taken into account very seriously.

Questions were raised about the Brutus Registration System. Is it time yet to take a very intense look at how it is serving the groups that it is suppose to serve? For example, how does someone conducting research elsewhere register for their dissertation hours? And in effect, is a long distance phone call required, which is really an extra registration fee?

There is still a great deal of dissatisfaction among members with the coverage we seem to manage to get with our Group Student Health Insurance. And questions are being raised whether or not folks at the University have ever considered approaching other large student groups, nationally, to develop a larger group to have a little bit more leverage in trying to negotiate a group insurance plan.

As David indicated last month, CGS is still very concerned about day care issues, child care issues, and whether the problems in this area have a disproportionate negative effect on women wishing to return to graduate school.

I will end this list with work and study space for graduate students. Because you often can hear the question, "where do graduate students manage to study." The number of carrels we have available in our library system really isn't adequate for a graduate program a quarter of our size. And work space is also an issue that

December 2, 1988 meeting, Board of Trustees

STUDENT AFFAIRS COMMITTEE REPORT (contd)

Mr. Musgrave: (contd)

we would like to see continually addressed. We realize the kind of pressure that we have on our space, and yet we still see people asked to behave professionally while they are working in a room with twenty-five and thirty other people sometimes.

Unless there are questions, I will close and wish you a Happy Holiday Season from CGS and Happy New Year.

Ms. Casto:

Thank you. USG Update by Athena Yiamouyiannis --

Ms. Athena Yiamouyiannis:

Mr. Chairman, Mr. President, Members of the Board of Trustees, good afternoon. I would like to begin my report on the Undergraduate Student Government by bringing you up-to-date on the Financial Aid Survey that the Undergraduate Student Government did. The purpose of the survey was to find out what problems students are encountering with the financial aid process and how the Undergraduate Student Government can work to improve the relations. We polled 225 students and compiled the results and are working on making final revisions on the copy before we will be distributing the final report to all the Members of the Board next week.

We met with Mary Haldane, who is the Director of Financial Aids and have worked to host a workshop in January to help students. This is one of the visible things that we would like to do and we are still working at trying to get some of the other things ironed out as well.

To update everyone on the Board of Trustees' Interviewing Committee Process, which Steve has talked about; I am the Chair of the Committee and things are going very well. We have talked about criteria, the role of a student trustee on the Board, as well questions that we are going to be asking the candidates. The interviewing will take place during the end of finals week, Wednesday, Thursday, and Friday, and our final process will be wrapped up on that Friday night. So, on Monday morning we will be submitting the names and we will be making the deadline of December 15.

Earlier this month, I attended a President's Breakfast with President Jennings, and I really enjoyed it. There was ample opportunity for students to present some of their concerns or problems or suggestions for the University as a whole. Later that day, I was talking to a student of mine about the President's Breakfast and he had the opportunity the year before to attend a President's Breakfast, as well. His name is Dave Moore and he is a blind student and he had made a suggestion about Disability Services needing a computer terminal or some type of additional gadget. Two weeks later it appeared there, and he was very pleased. I just wanted to say thank you. I would like to encourage these, we did them last year, we are doing them this year, and I would definitely encourage them to continue in the future.

December 2, 1988 meeting, Board of Trustees

STUDENT AFFAIRS COMMITTEE (contd)

Ms. Yiamouyiannis: (contd)

USG's Chairman of the Council of Presidents, Lora Stilke, held the first meeting for the Council of Presidents on November 29. Her goal as Chair was to bring together the presidents of all the student organizations to exchange ideas and knowledge and to be able to work together as a unit. The meeting went very well and it looks like we have a strong interest. We will be continuing this program Winter and Spring Quarter, as well.

Along with this program, where student leaders are getting together and discussing issues, I attended a Student Involvement on Racism Task Force last week, which was very informative. First of all, to get racism wiped out on campus we have to educate the leaders and this is a starting point. In addition to educating the leaders, they can bring this information back to their groups and we can expand outward from there. The group looks like it's not going to be a passive group, we are going to get out there and do things. We are planning on a few events, visible events, in Winter and Spring Quarter as well.

This brings up a concern that USG is going to be looking into. The University, as a whole, has been doing a very good job in affirmative action, striving for more equality, more diversity on campus, but a concern that I have is with women's issues. A letter from Diana Hulick, which appeared in the newspaper today, brought up some concerns about minority and women's issues compared on the campus as a whole. A couple of weeks ago, I had received this letter and referred it to Paulette Foss, who is in a cabinet position for Women's Affairs, and asked her to look up some things that the letter was talking about. She came up with some facts that I wasn't aware of and I guess it is common knowledge, but I would like to bring up to the Board. Especially, when we are talking about the extremely low numbers of female professors here at the University. When I heard the figures, I was very surprised and think this is something the University, as a whole, should strive to improve in the future. The number of current faculty members or current full professors are 6.8%, compared to the 92.3% male professors. I would think that this is something we would definitely want to look into. We will be getting back to you with additional information on this as well.

Well, the quarter is almost over, today is the last day of classes, and next week is finals week. One of our last projects for the year is going to be Textbook Traders, which is running from December 5-8, and next Quarter from January 3-6. This project is where students can come and sell their books and buy their books at prices that they set themselves.

The last thing that I would like to mention is something that we are doing over the break. On December 28, we are holding a conference where student government leaders from around the State will be working on the lobbying effort for the Biennium Budget. We are going to have a few guest speakers come in for that.

I would like to thank you and answer any questions at this time.

December 2, 1988 meeting, Board of Trustees

STUDENT AFFAIRS COMMITTEE REPORT (contd)

Dr. Brand:

Athena, I agree with you about the problem of women faculty members. Just to put a perspective on the issue though, and to add something to the data base, we are first or second in every category in the percentage of women faculty members, including full professors, in the Big 10. We are also near the bottom in the number of women who teach in the University who are not on tenure track faculty, which is a traditional area of abuse. So, yes we need to do a better job, but we also -- the context is that Ohio State is working hard on this issue, as well as other affirmative action issues.

Ms. Yiamouyiannis:

Thank you and Happy Holidays.

--0--

AGRICULTURAL AFFAIRS COMMITTEE REPORT

Mr. Teaford:

Today we discussed the Cooperative Extension and OARDC budget requests that were given to the Board of Regents. And just to briefly summarize the requests that were prepared, the University requested a 34.6% increase in Cooperative Extension and a 33.3% in OARDC. I might point out that the Regents have respectively recommended a 15% and a 9% increase. We need to see this in terms of the fact that basically the funding from the State and Federal Government over the last four year is basically level. Which we all know means down.

We discussed, in particular, I think, the need to broaden the base of support for those two line items of the budget. They so often are limited simply to farmers and their admittedly related parties and that is by no means what the programs of the Cooperative Extension and the OARDC are involved in. When you see the topics like agricultural profitability, water quality, family strength, youth development, food processing, what you are really seeing are the same priorities there as in the State in general. It is clear that there is an uphill struggle on this budget, as there is with all the rest. I think that the Committee is very comfortable with that. Dr. Hutchinson and his staff are doing a superb job in advancing those two line items.

That basically is my report, Mr. Chairman. Unless anyone wants to add to that.

Mr. Immke:

Any questions or comments?

December 2, 1988 meeting, Board of Trustees

AGRICULTURAL AFFAIRS COMMITTEE REPORT (contd)

President Jennings:

I wasn't there, but I want to emphasize the urban nature of a lot of the Cooperative Extension today. Yes, it is providing information to the farming community and agricultural community, but it is also performing a function that it has historically performed; namely, teaching individuals about life and about the tools of living. And that is going on in the urban communities. One of the amazing affirmative action successes is in 4-H in the State of Ohio. That is not only becoming urban, but I think, Fred, 16% are minorities today in 4-H, and becoming more so. Fred and Bobby are working very hard to increase their urban participation of the 4-H activity.

Mrs. Bowser:

We need to try and get some of that money.

Mr. Teaford:

We need to make sure that the General Assembly appreciates that.

President Jennings:

We hope that they appreciate a lot of things about The Ohio State University.

--0--

FISCAL AFFAIRS COMMITTEE REPORT

Mr. Kessler:

The Fiscal Affairs Committee received a report this morning from Mr. Ihrig on the Biennium Budgets and Capital Plans Budget request for the 1988-1990 academic year. (See Appendix VIII and Appendix IX for complete text of the Capital Budget Request and 1989-91 Biennial Budget Activities and Plans, pages 533 and 549.)

In addition, to this report the Committee is recommending the following resolutions:

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS

Background

SUMMARY FOR OCTOBER 1988

Source	No. of Projects	Support Level
The Ohio State University Research Foundation	93	\$18,691,780.33
Engineering Experiment Station	92	\$ 597,199.00
Total	185	\$19,288,979.33

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$44,483.00 - National Aeronautics and Space Administration, Lewis Research Center, Cleveland, Ohio, Microstructural Characterization of Intermetallic Matrix Ceramic Particulate Composites, Department of Materials Science and Engineering (W. E. Lee and M. D. Drory), 1 October 1988 through 30 September 1989. (Project 767100 - New)

\$39,956.00 - Department of the Navy, Office of Naval Research, Washington, D.C., Scattering from Parabolic Antennas, Department of Electrical Engineering, ElectroScience Laboratory (B. A. Munk), 15 September 1988 through 14 September 1989. (Project 767088 - New)

\$39,930.00 - National Aeronautics and Space Administration, Lewis Research Center, Cleveland, Ohio, The Evaluation of Coatings and Lubricants for Increased Service Lives of Die Casting Dies, Engineering Experiment Station (T. Altan) and Department of Industrial and Systems Engineering (R. L. Lewis), 1 October 1988 through 30 September 1989. (Project 767083 - New)

\$39,900.00 - National Science Foundation, Washington, D.C., Spectroscopic Observations of Active Galactic Nuclei, Department of Astronomy (B. M. Peterson), 1 May 1989 through 30 April 1990. (Project 766292 - Continuation)

\$32,000.00 - Department of Agriculture, Animal and Plant Health Inspection Service, Moorestown, New Jersey, Cooperative National Plant Pest Survey and Detection Program (Ohio Plant Pest Survey), Cooperative Extension State Operations (H. R. Willson), 1 October 1988 through 30 September 1989. (Project 767104 - Continuation)

\$30,000.00 - Department of Agriculture, Forest Service, Broomall, Pennsylvania, Structural Genes Important for Viral Replication in the Nucleopolyhedrosis Virus of the Gypsy Moth, Department of Molecular Genetics (P. S. Perlman), 15 September 1988 through 30 September 1990. (Project 768003 - New)

\$29,458.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Stereochemistry of Enzyme Reactions to Phosphorus, Department of Chemistry (M. D. Tsai), 1 July 1987 through 30 November 1988. (Project 762722 - Continuation)

\$25,000.00 - International Development Cooperation Agency, Agency for International Development, Washington, D.C., International Conference on Sustainable Agricultural Systems, Department of Entomology - OARDC (C. A. Edwards), 12 September 1988 through 31 December 1988. (Project 767103 - New)

\$25,000.00 - National Science Foundation, Washington, D.C., Presidential Young Investigator Award, Department of Linguistics (M. E. Beckman), 1 September 1988 through 28 February 1990. (Project 766861 - New)

\$24,622.00 - International Development Cooperation Agency, Agency for International Development, Washington, D.C., Zaire Agricultural Credit Bank, Department of Agricultural Economics and Rural Sociology (C. E. Cuevas), 15 October 1988 through 30 November 1988. (Project 767091 - New)

December 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$17,100.00 - National Aeronautics and Space Administration, Washington, D.C., High Temperature Superconducting Thin Film, Department of Electrical Engineering (G. J. Valco), 1 October 1988 through 30 September 1989. (Project 767084 - New)

\$13,476.00 - Department of Transportation, National Highway Traffic Safety Administration, East Liberty, Ohio, Comparison of Materials for Hybrid III Ribs, Department of Mechanical Engineering (J. A. Collins), 1 September 1988 through 31 March 1989. (Project 766989 - Continuation)

\$10,000.00 - National Aeronautics and Space Administration, Lewis Research Center, Cleveland, Ohio, Documentation of Ice Shapes for the Helicopter Icing Flight Test Program, Department of Aeronautical and Astronautical Engineering (J. D. Lee), 1 December 1988 through 30 November 1989. (Project 763362 - Continuation)

\$9,737.00 - Environmental Protection Agency, Chicago, Illinois, Acid Deposition Monitoring Program for Western Lake Erie, Center for Lake Erie Area Research (J. M. Reutter), 1 July 1988 through 30 June 1989. (Project 767085 - New)

\$9,703.00 - Department of Defense, Maryland Procurement Office, Fort George G. Meade, Maryland, Microwave Antenna Technology, Department of Electrical Engineering, ElectroScience Laboratory (R. C. Rudduck), 1 August 1988 through 31 October 1988. (Project 765096 - Continuation)

\$5,400.00 - National Science Foundation, Washington, D.C., Phylogeny and Speciation in Polygonella (Polygonaceae), Department of Botany (D. Crawford), 1 November 1988 through 31 October 1990. (Project 768002 - New)

\$5,000.00 - Department of Agriculture, Soil Conservation Service, Washington, D.C., International Conference on Sustainable Agriculture Systems, Department of Entomology - OARDC and Department of Entomology (C. A. Edwards), 20 April 1988 through 23 September 1988. (Project 767066 - New)

TOTAL - FEDERAL AWARDS

\$15,783,761.00

State of Ohio Research Contracts/Grants

\$84,477.00 - State of Ohio, Department of Education, Columbus, Ohio, A Community-Based Network to Assist Handicapped Youths' Transition from School to Work: A Four-Part Model, The National Center for Research in Vocational Education (R. D. Ryan), 1 September 1988 through 31 August 1989. (Project 767115 - Continuation)

\$49,979.70 - State of Ohio, Department of Mental Health, Columbus, Ohio, Linkage Between Modules of Peace Education Curricula and Mental Health in Adolescents, Marion Campus and Department of Psychology (D. J. Christie), 1 August 1988 through 30 June 1989. (Project 767051 - New)

December 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

Vocational Education (R. D. Ryan), 1 October 1988 through 30 April 1989.
(Project 767128 - New)

\$20,754.00 - AT&T Bell Laboratories, Columbus, Ohio, Improving Oral/Aural Skills of Non-Native Speakers of English in the Work Setting Through Group Work and Individualized Tutorial, Department of English/Second Language (R. N. Kantor), 1 October 1988 through 30 June 1989. (Project 767106 - Continuation)

\$6,700.00 - Norwich-Eaton Pharmaceuticals, Inc., Norwich, New York, A Double-Blind, Multicenter Study to Compare the Safety and Efficacy of Nitrofurantoin Controlled Release Capsules, 100 mg, Twice a Day for Seven Days to Macrodantin Capsules, 50 mg, Four Times a Day for Seven Days in the Treatment of Urinary Tract Infections, Department of Internal Medicine (C. M. Kunin), 21 April 1988 through 20 April 1989. (Project 766768 - Continuation)

TOTAL - INDUSTRIAL AWARDS \$ 454,017.50

Other Non-Federal Research Contracts/Grants

\$1,687,000.00 - National Association of Regulatory Utility Commissioners, Washington, D.C., The Research and Assistance Plan and Budget for the National Regulatory Research Institute: The Business Plan for Fiscal Year 1989, National Regulatory Research Institute (D. N. Jones), 1 September 1988 through 31 August 1989. (Project 763289 - Continuation)

\$109,303.00 - University of Texas, Dallas, Texas, Yeast Mitochondrial DNA Recombination, Department of Molecular Genetics (P. S. Perlman), 1 September 1988 through 31 August 1989. (Project 765272 - Continuation)

\$86,055.00 - University of Chicago, Argonne, Illinois, Optical Readout System for the ZEUS Barrel Calorimeter, Department of Physics (T. A. Romanowski), 1 August 1988 through 31 December 1988. (Project 767107 - New)

\$63,078.00 - Smokeless Tobacco Research Council, Inc., New York, New York, Effect of Smokeless Tobacco on the Postnatal Development of the Mouse and Rat, Oral Biology (R. B. Paulson), 1 January 1989 through 31 December 1989. (Project 767102 - New)

\$43,525.00 - Fifteen Members of the National Entrepreneurship Education Consortium, National Entrepreneurship Education Consortium, The National Center for Research in Vocational Education (R. D. Ryan), 1 July 1988 through 30 June 1989. (Project 766880 - Continuation)

\$35,941.00 - Helen Keller National Center for Deaf-Blind Youth and Adults, Sands Point, New York, Technical Assistance to Helen Keller Center, Education Administration and School of Health, Physical Education and Recreation (K. D. Arnold), 1 October 1988 through 30 September 1989. (Project 767126 - Continuation)

TOTAL - INDUSTRIAL AND OTHER SPONSORED RESEARCH \$ 583,381.00

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND

Establishment of Named Funds

The Marilyn R. Hathaway Education Scholarship Fund

The Marilyn R. Hathaway Education Scholarship Fund was established December 2, 1988, by the Board of Trustees of The Ohio State University in consideration of gifts to be received by The Ohio State University Development Fund from the estates of Marilyn R. Hathaway (B.S.Ed. '73, M.A. '77) and/or her mother, Emily L. Hathaway, both of Cincinnati, Ohio.

All gifts not otherwise designated which are received from the estates of Marilyn R. Hathaway and/or her mother, Emily L. Hathaway, are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income attributable to such gifts following their receipt by The Ohio State University shall be used to provide scholarships for junior, senior, or post-baccalaureate students in teacher certification programs. Selection shall be made by the Dean of the College of Education or his/her designee in consultation with the University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

The Joseph G. Svehla Technical Book Fund

The Joseph G. Svehla Technical Book Fund was established December 2, 1988, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from the estate of Joseph G. Svehla, Jr., (B.M.E. '31, B.E.E. '31, M.S. '34), formerly of New Buffalo, Michigan.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to purchase technical books for the University's library. Of the fund's annual earnings, 30 percent shall be

The Joseph G. Svehla Technical Book Fund (contd)

used to purchase books specifically for the use of electrical and mechanical engineers. The remainder of the annual earnings are to be used to purchase technical books related to engineering, economics, mathematics, chemistry, physics, nuclear physics, astrophysics and astronomy.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

The W. E. "Bill" Stuckey Memorial Fund

The W. E. "Bill" Stuckey Memorial Fund was established December 2, 1988, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University Development Fund from the Ohio Farm and Home Safety Committee, the Stuckey family and friends to honor Professor Emeritus W. E. Stuckey (B.S.Agr. '33, M.S. '44) of Columbus, Ohio.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income from this fund shall be used for the development of action programs in the area of farm, home, fire and traffic safety. Dispersal of the funds will be made by the Director of the Ohio Cooperative Extension Service (or his/her designee) with direct input from the Ohio Farm and Home Safety Committee. The major thrust will be the conservation of life and property through:

1. Grants to individuals and groups for the development of safety projects and programs;
2. Scholarships to students for safety education and research;
3. Promotion and diffusion of timely safety information;
4. Special funding to organizations for the development and distribution of package programs in safety.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer who is then directly responsible for the College of Agriculture in order to carry out the desire of the donors.

Change in Name and Description of Named Fund

The Ruth Haignere Rose Student Nurse Scholarship Fund

The Ralph and Ruth Haignere Rose Student Nurse Scholarship Fund was established June 11, 1986, with funds donated December 5, 1985, by Ruth Haignere Rose (B.S.Ed. '40, Certificate of Graduate Nursing '40) and contributions by Ralph Rose (B.Cer.E. '42). The name and description were revised December 2, 1988.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income is to be used for tuition and incidental fees for the College of Nursing by qualified undergraduate Black students who are citizens of the United States and who have financial need. They must agree to sponsor another student nurse in their lifetime. Such is not the responsibility of The Ohio State University, but it is incumbent upon the award recipient. The selection of the recipients is to be made by the chairperson of the Affirmative Action Committee for the College of Nursing at The Ohio State University in conjunction with the regular selection committee for nurses and in cooperation with or with the approval of the University Committee on Student Financial Aid.

Should the need for this fund cease to exist or so diminish as to provide unused income, then the income may be used for any purpose whatsoever in the College of Nursing as directed by the Board of Trustees, with preference being given to recommendations from the Dean of the College.

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS

Resolution No. 89-66

Synopsis: The Fiscal Affairs Committee recommended the approval of the following reports on contracts, grants, and gifts and the summary for October 1988.

WHEREAS monies are solicited and received on behalf of the University from governmental, industrial, other agencies, alumni, and various individuals in support of research, instructional activities, and service; and

WHEREAS such gifts and grants are received through The Ohio State University Research Foundation, the Engineering Experiment Station of The Ohio State University, and The Ohio State University Development Fund:

NOW THEREFORE

BE IT RESOLVED, That the research agreement between The Ohio State University and The Ohio State University Research Foundation for the contracts and grants reported herein, and the acceptance of the reports from

December 2, 1988 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

the Engineering Experiment Station and The Ohio State University Development Fund during the month of October 1988 be approved.

Upon motion of Mr. Kessler, seconded by Mrs. Bowser, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

**Employment of an Architect/Engineer and
Request for Construction Bids Aviation Academic Facility**

Background

Aviation Academic Facility

The Department of Aviation has a very successful academic program to prepare students for aviation careers and to conduct research in aircraft operations and safety. The Department's academic facilities currently are located at the University Airport at Don Scott Field. Academic offices and classrooms are housed in the old Department of Transportation hangar (occupied by the Department of Aviation in 1973) and the Airport Administration Building (occupied by the Department in 1967).

Those academic offices, however, have become inadequate due to increased enrollment and need to be expanded and modernized. Moreover, there is a need to relocate these academic facilities to the central campus area to ensure greater faculty accessibility to students, reduce commuting time for students, staff, and faculty, and provide more efficient facility scheduling. Because of this, the University proposes to construct a new two-story facility east of, and connected to, the north wing of Koffolt Laboratories at 140 West 19th Avenue.

The total estimated cost for this project is approximately \$1,257,000. The University has obtained a grant from the Federal Aviation Administration for 90% (\$1,007,000) of this cost; the remaining 10% (\$250,000) will be provided from University funds. At this time, authorization is requested to select an architectural/engineering firm to prepare the plans for the project, request construction bids, and award contracts for construction of the facility. (See Appendix X for the map, page 633.)

**EMPLOYMENT OF AN ARCHITECT/ENGINEER AND
REQUEST FOR CONSTRUCTION BIDS
AVIATION ACADEMIC FACILITY**

Resolution No. 89-67

Synopsis: The Fiscal Affairs Committee recommended authorization to employ an architectural/engineering firm and request construction bids.

WHEREAS The Ohio State University has obtained a grant from the Federal Aviation Administration to provide 90% funding (\$1,007,057.00) for a new two-story facility which will be constructed east of and connected to the north wing of Koffolt Laboratories, to provide administrative and academic space for the Department of Aviation; and

December 2, 1988 meeting, Board of Trustees

**EMPLOYMENT OF AN ARCHITECT/ENGINEER AND
REQUEST FOR CONSTRUCTION BIDS
AVIATION ACADEMIC FACILITY (contd)**

WHEREAS the remaining 10% (\$250,000.00) of this project will be funded from University funds, for a total project cost of \$1,257,057.00:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and administration be authorized, in accordance with established University procedures, to select a qualified architectural/engineering firm to prepare the plans and specifications for this project, to request construction bids on this project, and if satisfactory bids are received, to award the necessary contracts, with all actions to be reported to this Board at the appropriate time.

Upon motion of Mr. Kessler, seconded by Mrs. Bowser, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

**REPORT OF AWARD OF CONTRACTS AND
ESTABLISHMENT OF CONTINGENCY FUNDS**

Resolution No. 89-68

Synopsis: The Fiscal Affairs Committee recommended the acceptance of the report of the award of contracts for the projects listed below to the lowest responsive and responsible bidders in accordance with University procedures.

WHEREAS resolutions adopted by the Board of Trustees at previous meetings authorized the President and/or Vice President for Business and Administration to sign the plans and specifications and, in accordance with established University procedures, to request bids and, if satisfactory bids were received, to recommend to the Department of Administration, Division of Public Works, the award of contracts for the following project:

**VETERINARY HOSPITAL
UPGRADING LABORATORY ANIMAL FACILITIES**

Description: This project upgrades the quality of the laboratory animal facilities used by the College of Veterinary Medicine located on the ground floor of the Veterinary Hospital for both animal care and research, including containment capabilities for working with pathogenic agents for large and small animals, barrier maintained areas and special needs areas to support the surgery programs. Construction is scheduled to begin in January 1989, and be completed in September 1989.

General Contract

Date Received: September 14, 1988

No. of Bids: 4

December 2, 1988 meeting, Board of Trustees

**REPORT OF AWARD OF CONTRACTS AND
ESTABLISHMENT OF CONTINGENCY FUNDS (contd)**

**VETERINARY HOSPITAL
UPGRADING LABORATORY ANIMAL FACILITIES (contd)**

General Contract (contd)

Low Bid:	\$ 408,000.00*
High Bid:	\$ 687,500.00*
Estimate of Cost:	\$ 645,700.00*
Awarded to:	Concept Construction Co., Columbus, OH

Plumbing Contract

Date Received:	September 14, 1988
No. of Bids:	2
Low Bid:	\$ 59,076.00*
High Bid:	\$ 73,912.00*
Estimate of Cost:	\$ 68,859.00*
Awarded to:	Williamson Builders, Inc., Plain City, OH

HVAC Contract

Date Received:	September 14, 1988
No. of Bids:	4
Low Bid:	\$ 254,800.00*+
High Bid:	\$ 402,404.00*
Estimate of Cost:	\$ 198,741.00*
Awarded to:	Wayne Mechanical Inc./J. A. Guy, Joint Venture, Dublin, OH

Electric Contract

Date Received:	September 14, 1988
No. of Bids:	4
Low Bid:	\$ 78,600.00*

*Recommended alternates reflected in these figures.

+HVAC Contract is in excess of filed estimate of cost; however, the total price of all contracts is within 10% of the total estimate of cost and is recommended for award as provided by Section 153.12 of the Revised Code.

High Bid:	\$ 88,850.00*
Estimate of Cost:	\$ 86,085.00*
Awarded to:	Avant Contractor Inc./Romanoff Electric, Joint Venture, Columbus, OH
Total All Contracts:	\$ 800,476.00*
Total Contingency Allowance:	\$ 61,694.17 (which is 7.7% of construction cost)
Total Project Cost:	\$1,000,000.00*
Funding:	Federal Grant and University Funds

*Recommended alternates reflected in these figures.

(See Appendix XI for map on the Veterinary Hospital Upgrading Laboratory Animal Facilities, page 635.)

WHEREAS resolutions adopted by the Board of Trustees at previous meetings authorized the President and/or Vice President for Business and Administration to sign the plans and specifications and, in accordance with established University procedures, to request bids and, if satisfactory bids were received, to award contracts for the following project:

DOAN HALL - CHILLER STATION RENOVATION

Description: Due to the Health Science Center Medical Logistical (Infill) project currently under construction adding additional floors to Doan Hall, the present air cooled chiller plant located in Room N302 of Doan Hall must be relocated, once temporarily and then permanently. This project will avoid two relocations by eliminating the reciprocating air cooled chiller plant and providing chilled water for the critical Computer Room air conditioning from the Doan Hall penthouse by installing two chilled water pipes from the 12th floor to the 3rd floor. Construction is scheduled to begin November 1988, and be completed by February 1989.

Mechanical Contract

Date Received:	October 5, 1988
No. of Bids:	4
Low Bid:	\$180,300.00*+

*Recommended alternate reflected in these figures.

+Mechanical Contract is in excess of filed estimate of cost; however, the total price of all contracts is within 10% of the total estimate of cost and is recommended for award as provided by Section 153.12 of the Revised Code.

December 2, 1988 meeting, Board of Trustees

**REPORT OF AWARD OF CONTRACTS AND
ESTABLISHMENT OF CONTINGENCY FUNDS (contd)**

DOAN HALL - CHILLER STATION RENOVATION (contd)

Mechanical Contract (contd)

High Bid:	\$240,700.00*
Estimate of Cost:	\$165,000.00*
Awarded to:	Farber Corp., Columbus, OH
Total All Contracts:	\$180,300.00*
Total Contingency Allowance:	\$ 18,030.00 (which is 10% of construction costs)
Total Project Cost:	\$215,293.50*
Funding:	University Hospitals Funds

*Recommended alternate reflected in these figures.
(See Appendix XII for map on the Doan Hall Chiller Station Renovation, page 641.)

NOW THEREFORE

BE IT RESOLVED, That pursuant to the actions previously authorized by the Board, the award of contracts and the establishment of project funds and contingency funds for the projects listed above are hereby approved.

Upon motion of Mr. Kessler, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

**LEASE OF LAND TO THE CITY OF COLUMBUS
0.78 ACRES AT DON SCOTT FIELD**

Background

Description

The site consists of approximately 0.78 acres of land at the University Airport at Don Scott Field. Precise boundaries of the site have not yet been determined; they will be delineated in drawings prepared by the City of Columbus. The general site area is vacant land on the north side of Case Road, just west of the Airport Entrance Road.

Terms of the Lease Arrangement

The University proposes to enter into a long-term land lease with the City of Columbus for the site. The terms of the lease will be negotiated under Section 3334.11 of the Ohio Revised Code for a period of between 20-50 years with renewal options. The City of Columbus will be solely responsible for constructing, managing, operating and maintaining the facility. However, design plans for the facility and site development will be subject to

December 2, 1988 meeting, Board of Trustees

**LEASE OF LAND TO THE CITY OF COLUMBUS
0.78 ACRES AT DON SCOTT FIELD**

Background (contd)

University approval. The rental payment under the lease will be \$1.00 per year.

Benefits of the Lease

Location of a new fire station on University property would be mutually beneficial to the University and current residents of the northwest area of Franklin County. Such an arrangement would enhance the safety of University buildings and equipment and provide a method for responding to aircraft emergencies, as well as to non-airport emergencies. The City of Columbus would train University personnel in aircraft rescue and fire fighting equipment in response to airport emergencies. A fire alarm enunciator panel and emergency alert phone would be installed in the fire station to shorten response time to such emergencies. (See Appendix XIII for map on the .78 Acre Parcel at Don Scott Field, page 645.)

**LEASE OF LAND TO THE CITY OF COLUMBUS
0.78 ACRES AT DON SCOTT FIELD**

Resolution No. 89-69

Synopsis: The Fiscal Affairs Committee recommended the lease of approximately 0.78 acres of University land at Don Scott Field for the construction of a fire station.

WHEREAS the City of Columbus proposes to construct a new fire station and is interested in leasing approximately 0.78 acres of land at the University Airport at Don Scott Field for this purpose; and

WHEREAS the City of Columbus will develop, construct, and operate the fire station; and

WHEREAS the location of this fire station will be mutually beneficial to the University and private properties in the northwest area of Franklin County; and

WHEREAS the appropriate University offices are in agreement as to the desirability of leasing this parcel of land for this purpose:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration, be authorized to negotiate, develop, and execute the proposed lease with the City of Columbus, upon such terms and conditions as are deemed to be in the best interest of the University.

Upon motion of Mr. Kessler, seconded by Mrs. Bowser, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

December 2, 1988 meeting, Board of Trustees

**PURCHASE OF REAL PROPERTY -
1224 KINNEAR ROAD, COLUMBUS, OHIO**

Background

Location and Description

The property consists of approximately 3.18 acres of developed land located at 1224 Kinnear Road in Columbus. There is a modern one-story brick and glass building, in excellent condition, that contains approximately 42,000 gross square feet. The property is bounded on the east and north by University property and is located east of the University's Research Center. The property is owned by Byers Realty, Inc.

Present Lease and Use

Pursuant to authorization by the Board of Trustees in October 1984 (Resolution No. 85-45), the University leased the property from Byers Realty. The lease term is five years, with one five-year renewal option. The rent is \$7,500.00 per month (\$90,000.00 per year). The lease contains an option for the University to purchase the building at a price of \$750,000.00.

The University has used this leased building to provide space for tenants of The Ohio State University Research Park. Tenants include: Ohio Supercomputer Center, Advanced Computing Center for Art and Design, Whittaker Coatings, Inc., Ohio Radiological Health Program, and Mattson Instruments, Inc. Approximately 6,400 square feet (15%) of the building is vacant. Over the last four years, there has been extensive remodeling (totalling approximately \$3.23 million) to the interior and exterior of the building. The University has paid approximately \$1.8 million for renovation of the shell of the building and interior improvements not charged to tenants; there has been an additional \$1.43 million in interior renovations charged to the building occupants.

The University's Research Park now is well established, and the University needs to acquire this building to provide permanent space for Research Park tenants.

Purchase Price and Appraisals

As noted above, the purchase price established by the option is \$750,000.00. An MAI appraisal conducted by Nash-Wilson Associates, Inc., in November 1988, places the market value at \$3,850,000.00. A separate MAI appraisal, done by Kohr Royer Griffith, Inc., in October 1988, places the property's market value at \$3,200,000.00. (See Appendix XIV for map on Property at 1224 Kinnear Road, page 647.)

**PURCHASE OF REAL PROPERTY
1224 KINNEAR ROAD, COLUMBUS, OHIO**

Resolution No. 89-70

Synopsis: The Fiscal Affairs Committee recommended the purchase of approximately 3.18 acres of land with improvements located at 1224 Kinnear Road, Columbus, Ohio.

December 2, 1988 meeting, Board of Trustees

**PURCHASE OF REAL PROPERTY
1224 KINNEAR ROAD, COLUMBUS, OHIO (contd)**

WHEREAS to provide additional land and facilities to accommodate organizations participating in The Ohio State University Research Park, the University, pursuant to authorization by this Board in October 1984 (Resolution No. 85-45), entered into a five-year lease with Eyers Realty, Inc., for the land and building located at 1224 Kinnear Road in Columbus, Ohio; and

WHEREAS under the terms of this lease, the University has an option to purchase this property at a price of \$750,000.00; and

WHEREAS the appropriate University officers have determined that the purchase of this property is in the best interest of the University:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to purchase, in the name of the Board of Trustees of The Ohio State University, the property at 1224 Kinnear Road, Columbus, Ohio, at a price not to exceed \$750,000.00, upon such terms and conditions as are deemed to be in the best interest of the University, subject to the University receiving the necessary approvals from the Ohio Board of Regents and the State Controlling Board.

Upon motion of Mr. Kessler, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

Mr. Immke:

We will adjourn the meeting by wishing you all a very happy, healthy, and safe holiday season.

--0--

Thereupon the Board adjourned to meet Friday, February 3, 1989, at The Ohio State University Fawcett Center for Tomorrow, Columbus, Ohio.

Attest:

Madison H. Scott
Secretary

Leonard J. Immke
Chairman

APPENDIX III

ZONING OF THE COLUMBUS CAMPUS OF
THE OHIO STATE UNIVERSITY

(See page 342)

ZONING OF THE COLUMBUS CAMPUS OF THE OHIO STATE UNIVERSITY

Briefing Report to the Board of Trustees

Background

In 1980, the Ohio Supreme Court ruled, in Brownfield v. State of Ohio, that State agencies "must make a reasonable effort to conform to the provisions of local land use regulations." In an effort to comply with that ruling, staff of The Ohio State University reviewed the Columbus Zoning Code and determined that no zoning district was contained therein appropriate to the uses usually found at a large educational and research complex. The staff then worked with City of Columbus staff to develop such a district for the Columbus Campus. The possibility of such a district had become part of the Columbus Zoning Code in 1986; it was designated the "University-College Research Park District." Early this year, the University applied for that zoning for the contiguous campus area north of King Avenue, west of North High Street, south of Ackerman Road, and east of North Star Avenue, an area consisting of about 1625 acres. Because of impending planning work, the Don Scott Field area was not included in the application.

Purpose

In applying to be zoned as a UCRP District, the University's intent was to seek zoning which would permit typical university and research park uses, while ensuring that the University and our tenants comply with the intent of the Ohio Supreme Court ruling, i.e., to assure that State agencies do not develop and use land entrusted to them with disregard for the potential impact of those developments and uses on neighboring property owners.

Permitted Uses

Within a UCRP District, all typical principal and support uses usually found on a major university campus or in a university-related research complex are permitted. In addition, prototype manufacturing is allowed as a usual use in a research institution. Moreover, certain uses are permitted upon issuance of a Special Permit by the Columbus Board of

Zoning Adjustment; these would include commercial, recreation, financial institutions, fuel/food/service stations, and restaurants - uses which may be justified because of their value in improving the quality of life in a research complex or on a university campus.

Restrictions

The UCRP District contains the usual site development regulations found in most zoning districts but, in this district, they are generally applied only within a 100-foot boundary area. In the core of the district, there are few restrictions because internal land uses have little impact on neighboring properties. In the 100-foot boundary area, any use established by the institution must take into consideration the standards in residential, commercial, or industrial districts of the Zoning Code which permit the proposed institutional use. Examples are setback and height, signage, lighting, side and rear yards adjacent to the neighboring property, landscaping, and drainage. The UCRP District has no parking number requirement, but other standards for parking and loading are included, such as screening and drainage. Finally, any institutional use must recognize the performance standards in the Zoning Code with respect to noise, vibration, smoke, dust, odor, heat, and glare as measured at the boundary line.

In its applications, the University submitted a Limitation Text in response to concerns expressed by some neighboring property owners. That Text provides for certain other limitations on the west boundary and a portion of the north boundary, principally the establishment of a 150-foot setback area, additional limitations on building heights, landscape screening of parking and loading areas, an emphasis on preserving wooded areas, and other limitations on lighting, signage, and drainage.

Approval by Columbus City Council

After completion of the public hearing process, including meetings to resolve neighbors' concerns, the Columbus City Council, on November 28, 1988, approved the University's zoning application by a vote of six to zero, with Councilman Ben Espy abstaining because of "conflict of interest." Because of the existence of a Limitation Text, the zoning of the Columbus Campus became a "Limited University-College Research Park District."

Page 408 is blank

APPENDIX IV

THE OHIO STATE UNIVERSITY RESEARCH PARK

(See page 344)

THE OHIO STATE UNIVERSITY RESEARCH PARK

Progress Report to the Board of Trustees

Introduction

On April 22, 1983, Professor Art Adams forwarded his Research Complex Feasibility Report to the President, recommending that the University "proceed to the establishment of a Research Complex." President Jennings responded five days later with a letter to the University community essentially initiating this effort. The Research Park concept was formally approved by the Board of Trustees on October 5, 1984. Three sites were identified: Don Scott Field, Ackerman Road, and the West Campus. The initial focus would be on the Kinnear Road area of the West Campus with the acquisition of two existing buildings. This would provide space for potential users more quickly than would development from the ground up at the other two sites. Potential tenants at the West Campus site would be required to have strong research linkages to the University as a prerequisite for participation. The Ackerman Road and Don Scott Field sites would be held for future development that would be more investment oriented in operation.

The Vice President for Business Administration has been responsible for acquisition of Research Park facilities, site preparation, improvements and alterations to meet tenants' needs, and management of the facilities. This work has been done with the support of, and review and consultation by, the Vice President for Research and Graduate Studies to enhance the efforts to expand the University's research capabilities and programs. Planning and financing arrangements have been coordinated with the Office of Finance.

Background

Following the approval of the planning process, three major studies were completed: a Comparative Study of University-Affiliated Research Parks, done by Professor Adams; a land use concept study for the West Campus, done by Schooley-Caldwell Associates; and a strategic plan for future research park activities, done by Dr. Charles Perry.

Subsequently, the following implementation actions have been accomplished: (1) annexation of approximately 1,200 acres of the West Campus to the City of Columbus for access to public utilities, (2) zoning of all of the Main Campus for University and Research Park Uses, (3) acquisition of three buildings for Research Park tenants, and (4) the execution of a lease for the State Data Center.

The University has spent approximately \$7.173 million in acquiring the three Research Park buildings and improving them for tenants. These buildings contain approximately 125,195 square feet of space. They are occupied by nine tenants who employ approximately 153 people. Approximately 23,626 square feet is still available, of which approximately 10,150 square feet is storage space. In addition, there are approximately 15 University-related research entities on the West Campus occupying approximately 771,688 square feet of space and employing approximately 1,331 people. Thus, there is a total of 896,883 square feet of space dedicated to research and related activities at the West Campus Research Park. (See attached table.)

Present Status and Plans

Don Scott Field:

Approximately 200 acres have been identified for development of the Research and Business Park on State Route 161 west of the National Guard Armory. All utilities now are available to the site, and it is zoned for light manufacturing by the City of Columbus. The University has developed restrictive development covenants to eliminate the undesirable activities that are permitted by this zoning. All activity with regard to selecting a developer or marketing this site has been tabled pending completion of the Airport Master Plan Revision for the FAA, the Noise Study, and the overall Don Scott Field land use study.

Ackerman Road:

Approximately 45 acres have been identified for development of a Research and Business Park on the east side of State Route 315. The site has been rezoned for use as a University-College Research Park District and has all utilities available to it. A Request for Information was tendered to local developers this past Spring to determine their interest in developing such a project. Nine positive responses were received, and four of

those responding would be capable of developing the park. A request for proposals has been formulated to elicit detailed development and business plan proposals from the four developers.

West Campus:

Approximately 150 to 270 acres have been identified, through the Schooley-Caldwell Associates study, for development of a University Research Park. As mentioned above, three buildings on Kinnear Road have been acquired, the State Data Center is being designed, and numerous other University-related research activities are taking place in the neighborhood.

The three Research Park buildings are almost full. The Office of Business and Administration, in consultation with the Offices of Finance and Research and Graduate Studies, has been exploring possibilities for acquisition or construction of an additional 50,000 square foot building for future West Campus Research Park tenants. The intent is to develop the Park incrementally so as not to exceed the demand for space. In addition, efforts are continuing to encourage the private sector to participate in this endeavor through master leasing such as was done with 1224 Kinnear Road or lease/leaseback such as was done with the Day Care Center.

APPENDIX V

SUMMARY OF RECOMMENDED GOALS AND STRATEGIES
FOR THE COLLEGE OF MEDICINE AND
THE HOSPITALS AND CLINICS

Adopted by the Board of Trustees December 2, 1988
(See page 363)

**SUMMARY OF
RECOMMENDED GOALS AND STRATEGIES
FOR THE
COLLEGE OF MEDICINE AND THE HOSPITALS AND CLINICS**

MAY 10, 1988

Revised 11/23/88

STRATEGY SUMMARY

- **UNDERSTAND AND WORK TOWARDS ACHIEVING THE CRITERIA WHICH DETERMINE A "TOP 10" NATIONAL MEDICAL SCHOOL**
- **RECOGNIZE THAT SUBSTANTIAL FUNDING WILL BE REQUIRED TO ACHIEVE TOP 10 NATIONAL RANKING. THE MAJOR LONG-TERM SOURCE OF INCREASED FUNDING WILL BE EXTRAMURAL RESEARCH GRANTS. HOWEVER, INITIAL SOURCES OF SEED MONEY COULD ALSO INCLUDE REALLOCATION OF PRESENT RESOURCES, DEVELOPMENT INCOME, PROGRAM-FOCUSED STATE GRANTS, AND CLINICAL (HOSPITAL AND PRACTICE PLAN) INCOME**
- **CONTINUE TO FOSTER AN ENVIRONMENT WITHIN OSU HOSPITALS AND CLINICS WHICH SUPPORTS THE COLLEGE OF MEDICINE'S PROGRESS TOWARDS TOP 10 STATUS**
- **ACKNOWLEDGE THAT SUPPORTING THE COLLEGE OF MEDICINE'S GOALS WILL REQUIRE THAT OSU HOSPITALS AND CLINICS AND ITS MEDICAL STAFF BECOME MUCH MORE MARKET-RESPONSIVE, COST-COMPETITIVE, AND EFFICIENT**

**THE OHIO STATE UNIVERSITY
COLLEGE OF MEDICINE**

OSU COLLEGE OF MEDICINE

GOAL

BECOME A "TOP 10" NATIONAL MEDICAL SCHOOL BY 2000 A.D.

OSU COLLEGE OF MEDICINE

CRITERIA FOR ESTABLISHING RELATIVE POSITION

- **RESEARCH DOLLARS**
- **TRAINING GRANTS**
- **PROGRAM-PROJECTS/CENTERS OF EXCELLENCE**
- **PRESTIGIOUS FACULTY MEMBERSHIPS**
- **NIH STUDY SECTIONS**
- **EDITORIAL BOARDS/LEAD EDITORSHIPS**
- **FACULTY RECRUITMENT/ADVANCEMENT**
- **EMINENT SCHOLARS**
- **ENDOWMENTS**
- **STUDENT PLACEMENT**
- **MD/PhD JOINT DEGREES**
- **OTHER JOINT DEGREES**
- **THEORY INNOVATION**
- **PUBLICATIONS IN RESEARCH JOURNALS**
- **TEXTBOOKS AUTHORED BY FACULTY**
- **QUALITY OF STUDENTS/TRAINees ATTRACTED**
- **ATTRACTIVENESS OF EDUCATION AND TRAINING PROGRAMS**
- **LEADERSHIP POSITIONS IN NATIONAL AND INTERNATIONAL ORGANIZATIONS**

**SPECIFIC, QUANTIFIED TARGETS MUST BE ESTABLISHED FOR EACH
OF THESE CRITERIA, AND PROGRESS MEASURED AND REPORTED**

OSU COLLEGE OF MEDICINE

WHERE IS OSU NOW?

IN TOP 1/3 OF 126 U.S. MEDICAL SCHOOLS

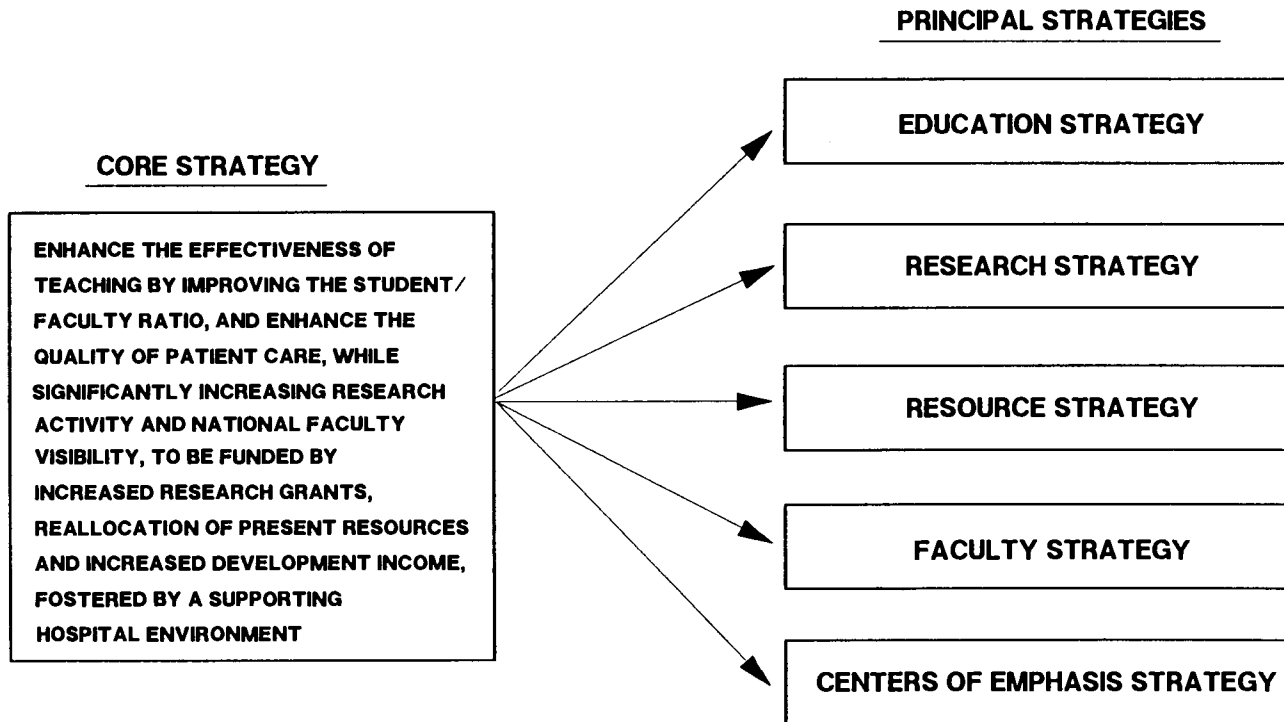

WHAT STRATEGY WILL ACHIEVE "TOP 10" POSITIONING?

OSU COLLEGE OF MEDICINE

CORE STRATEGY

ENHANCE THE EFFECTIVENESS OF TEACHING BY IMPROVING THE STUDENT/FACULTY RATIO AND ENHANCE THE QUALITY OF PATIENT CARE, WHILE SIGNIFICANTLY INCREASING RESEARCH ACTIVITY AND NATIONAL FACULTY VISIBILITY, TO BE FUNDED BY INCREASED RESEARCH GRANTS, REALLOCATION OF PRESENT RESOURCES, AND INCREASED DEVELOPMENT INCOME, FOSTERED BY A SUPPORTING HOSPITAL ENVIRONMENT, IN ACCORDANCE WITH THE AFFIRMATIVE ACTION POLICIES AND PROCEDURES OF THE OHIO STATE UNIVERSITY, ITS COLLEGE OF MEDICINE, HOSPITALS AND CLINICS.

**THE COLLEGE OF MEDICINE'S CORE STRATEGY
COMPRISES FIVE PRINCIPAL STRATEGIES...**

OSU COLLEGE OF MEDICINE

EDUCATION STRATEGY

PRINCIPAL STRATEGY

REDUCE CLASS SIZE BY AT LEAST 2% PER YEAR FOR THE NEXT 5 YEARS, CONTINUE TO MODIFY THE CLINICAL EDUCATIONAL EXPERIENCE, AND STRENGTHEN GRADUATE MEDICAL EDUCATIONAL PROGRAMS, IN ORDER TO RECOGNIZE CHANGES IN CLINICAL PRACTICE AND OSU'S COMMITMENT TO BEING A "TOP 10" MEDICAL SCHOOL

DIRECTIONS

- o **MODIFY TEACHING FOCUS**
 - **AMBULATORY SETTINGS**
 1. **OUTPATIENT SERVICES**
 2. **PHYSICIAN OFFICES**
 - **TOTAL PATIENT PERSPECTIVE (E.G., GERIATRICS, ONCOLOGY, WOMEN'S HEALTH)**
 - **AGGRESSIVENESS IN INNOVATIVE TECHNOLOGY AND PROCEDURES**
- o **UTILIZE REFERRAL AREA TRAINING SITES TO SUPPLEMENT OSU HOSPITALS AND CLINICS**
- o **MAINTAIN A FULL RANGE OF DESIRED EDUCATION EXPERIENCES**
 - **MEDICAL STUDENTS**
 - **GRADUATE STUDENTS**
 - **ALLIED HEALTH STUDENTS**
 - **RESIDENTS/FELLOWS**
 - **MD/PHD DUAL DEGREES**
 - **CONTINUING MEDICAL EDUCATION**
 - **POST-DOCTORAL FELLOWS**
- o **ATTRACT QUALITY STUDENTS AND ACHIEVE PLACEMENT IN LEADING RESIDENCY PROGRAMS**
- o **RECOGNIZE THE IMPORTANCE OF GRADUATE GRADUATE MEDICAL EDUCATION IN ACHIEVING THE COLLEGE OF MEDICINE'S GOAL**

EDUCATION STRATEGY

PRINCIPAL STRATEGY:

REDUCE CLASS SIZE BY AT LEAST 2% PER YEAR FOR THE NEXT 5 YEARS, CONTINUE TO MODIFY THE CLINICAL EDUCATIONAL EXPERIENCE, AND STRENGTHEN GRADUATE MEDICAL EDUCATIONAL PROGRAMS, IN ORDER TO RECOGNIZE CHANGES IN CLINICAL PRACTICE AND OSU'S COMMITMENT TO BEING A "TOP 10" MEDICAL SCHOOL.

RATIONALE:

OSU HAS A LONG HISTORY OF EDUCATIONAL EXCELLENCE, AND IT CURRENTLY EDUCATES ONE OF THE LARGEST MEDICAL STUDENT BODIES IN THE COUNTRY. TO CONTINUE TO FULFILL ITS EDUCATION MISSION, CHANGES MUST BE MADE IN CURRICULAR AND CLINICAL TEACHING EXPERIENCES TO RECOGNIZE THE EVOLUTIONARY ENVIRONMENT IN WHICH OSU'S GRADUATES WILL PRACTICE. HOWEVER, GREAT MEDICAL SCHOOLS MUST ALSO HAVE SUBSTANTIAL RESEARCH PROGRAMS, AND TEACHING DEMANDS OFTEN LIMIT THE RESOURCES WHICH CAN BE DEVOTED TO RESEARCH. IN LIGHT OF CURRENT RESOURCE LIMITATIONS AND THE PERCEIVED OVERSUPPLY OF PHYSICIANS, THE NUMBER OF MEDICAL STUDENTS SHOULD BE REDUCED TO FOCUS FACULTY TIME AND RESOURCES ON RESEARCH.

DIRECTIONS:

o TEACHING FOCUS

- REDUCE THE CONCENTRATION OF CLINICAL EXPERIENCE IN ACUTE CARE SETTINGS AND PROVIDE MORE AMBULATORY AND NON-ACUTE PROVIDER EXPERIENCES.

- FACILITATE THE DEVELOPMENT OF PACESETTING INTER-DISCIPLINARY PROGRAMS, SUCH AS GERIATRICS, THAT CROSS TRADITIONAL DEPARTMENTAL LINES.
- BUILD AND REINFORCE OSU'S ROLE AS THE LEADING MEDICAL SCHOOL IN THE STATE OF OHIO BY AGGRESSIVELY MAINTAINING ITS POSITION AT THE FRONTIERS OF MEDICAL TECHNOLOGY AND EVOLVING TREATMENT METHODOLOGIES.

O REFERRAL AREA TRAINING SITES

- IF PRESENT TRENDS IN GOVERNMENT PAYMENTS AND CLINICAL PRACTICE CONTINUE, OSU HOSPITALS AND CLINICS MAY NOT BE ABLE TO SUPPLY SUFFICIENT CLINICAL TRAINING OPPORTUNITIES TO MEET THE COLLEGE OF MEDICINE'S NEEDS.
- HOSPITALS, PHYSICIANS AND OTHER PROVIDERS IN THE REFERRAL AREA WILL FIND TEACHING RELATIONSHIPS WITH OSU STRATEGICALLY BENEFICIAL.
- DEVELOPING NEW TEACHING RELATIONSHIPS IN OUTLYING AREAS WITH NON-COMPETING PROVIDERS WILL STRENGTHEN OSU'S REFERRAL POSITION.
- IF AT ALL POSSIBLE, PROGRAMS IN GRADUATE MEDICAL EDUCATION SHOULD BE BASED AT THE OSUH. RESIDENTS AND FELLOWS IN THE UNIVERSITY'S PROGRAMS MAY BE ASSIGNED FOR IMPORTANT EDUCATIONAL OPPORTUNITIES TO OTHER MEDICAL INSTITUTIONS IN THE CENTRAL OHIO AREA, BUT ONLY FOR PURPOSES OF ENHANCING THE OSU PROGRAMS.

O RANGE OF EDUCATIONAL EXPERIENCES

- TRADITIONALLY, THE EDUCATIONAL EMPHASIS AT OSU HAS BEEN TOWARD MEDICAL STUDENTS.
- ADDITIONAL RESIDENTS/FELLOWS, PHDs, AND MD/PHD DEGREE CANDIDATES WILL BE REQUIRED TO SUPPORT THE COLLEGE'S GROWING EMPHASIS ON RESEARCH.
- PROVIDING QUALITY EDUCATIONAL PROGRAMS WILL SUPPORT EFFORTS TO PROTECT AND ENHANCE OSU'S REFERRAL POSITION.

O QUALITY STUDENTS AND RESIDENCY PLACEMENT

- THERE IS A FUTURE THREAT TO THE AVAILABLE POOL OF QUALITY MEDICAL STUDENTS.
- INCREASED RECRUITING ACTIVITY AND PUBLICITY PROGRAMS CAN ASSURE OSU'S ACCESS TO THE BEST POTENTIAL STUDENTS.
- MEDICAL SCHOOLS ARE EVALUATED, IN PART, BY WHERE THEIR STUDENTS GO FOR RESIDENCIES.
- PROACTIVE PLANNING AND COUNSELING CAN INFLUENCE WHERE OSU'S STUDENTS APPLY—AND WHERE THEY ARE ACCEPTED—AND INCREASE THE NUMBER OF OSU GRADS IN PRESTIGIOUS RESIDENCIES.

O GRADUATE MEDICAL EDUCATION

- NATIONWIDE, LEADING INSTITUTIONS EMPHASIZE GRADUATE MEDICAL EDUCATION.
- STRENGTHENING GRADUATE MEDICAL EDUCATION IS A KEY COMPONENT OF THE COLLEGE'S RESEARCH AND FACULTY STRUCTURE STRATEGIES.

OSU COLLEGE OF MEDICINE

RESEARCH STRATEGY

PRINCIPAL STRATEGY

SIGNIFICANTLY INCREASE EXTRAMURAL RESEARCH ACTIVITY BY CONCENTRATING ADDITIONAL SEED MONEY AND RELATED RESOURCES IN SELECTED AREAS OF EXISTING STRENGTH OR EXCEPTIONAL EMERGING OPPORTUNITIES

DIRECTIONS

- o **ESTABLISH AN OBJECTIVE OF INCREASING AGGREGATE RESEARCH FUNDING BY 15-20% PER YEAR**
- o **COORDINATE AREAS OF EXISTING OR POTENTIAL STRENGTH WITH HOSPITAL, COLLEGE OF MEDICINE, AND UNIVERSITY-WIDE STRENGTHS**
- o **ESTABLISH CRITERIA AND MECHANISMS FOR EVALUATING AND MONITORING PRIORITIES FOR EMERGING OR EXISTING STRENGTHS**
- o **PROVIDE FOR GREATER COLLEGE CONTROL OVER PRIORITIES FOR ADDITIONAL "SEED FUNDS"**
- o **PROVIDE ADDITIONAL "SEED FUNDS" TO ADDRESS COLLEGE OF MEDICINE PRIORITIES**
- o **CONTINUE TO FOSTER AN ENVIRONMENT WHICH SUPPORTS INCREASED RESEARCH ACTIVITY IN BASIC AND CLINICAL SCIENCES**

RESEARCH STRATEGY

PRINCIPAL STRATEGY:

SIGNIFICANTLY INCREASE EXTRAMURAL RESEARCH ACTIVITY BY CONCENTRATING ADDITIONAL SEED MONEY AND RELATED RESOURCES IN SELECTED AREAS OF EXISTING STRENGTH OR EXCEPTIONAL EMERGING OPPORTUNITIES.

RATIONALE:

SIGNIFICANT INCREASES HAVE OCCURRED IN RESEARCH ACTIVITY DURING RECENT YEARS. HOWEVER, THE TOTAL LEVEL OF RESEARCH FUNDS AT OSU COLLEGE OF MEDICINE IS FAR BELOW THE "TOP 10" LEVEL. UNTIL THIS "RESEARCH GAP" IS CLOSED, OSU WILL NOT BE A "TOP 10" SCHOOL. HOWEVER, RESOURCES WILL NOT BE AVAILABLE TO EXPAND RESEARCH IN ALL AREAS SIMULTANEOUSLY. PRIORITIES MUST BE ESTABLISHED AND EFFORTS CONCENTRATED IN THOSE AREAS WHERE STRENGTHS PRESENTLY EXIST AND LARGE AMOUNTS OF RESEARCH FUNDS WILL BE AVAILABLE.

DIRECTIONS:

- 0 ESTABLISH AN OBJECTIVE TO BE ACHIEVED FOR RESEARCH FUNDING
 - TO ACHIEVE "TOP 10" LEVEL RESEARCH FUNDING, EXTRAMURAL RESEARCH FUNDING MUST BE INCREASED AT A COMPOUND RATE OF 15-20% PER YEAR. RECENTLY, OSU HAS ACHIEVED A 15% COMPOUND ANNUAL RATE.
 - PROGRESS TOWARD THIS OBJECTIVE SHOULD BE MONITORED AND REPORTED PERIODICALLY.

O COORDINATED RESEARCH

- INCREASINGLY, MAJOR UNIVERSITY RESEARCH EFFORTS ARE MULTI-DISCIPLINARY.
- THERE ARE SOURCES OF STRENGTH OUTSIDE OF THE COLLEGE WHICH CAN SUPPORT ITS EFFORTS TO INCREASE EXTRAMURAL RESEARCH FUNDING.
- THE PRESENT UNIVERSITY-WIDE EFFORT TO INCREASE RESEARCH ACTIVITY WILL PROVIDE GREATER OPPORTUNITIES FOR INTEGRATED RESEARCH EFFORTS.

O CRITERIA FOR EVALUATING PRIORITIES

- ACCORD HIGH PRIORITY FOR SEED MONEY TO RESEARCH EFFORTS THAT HAVE THE POTENTIAL TO BE FINANCIALLY SELF-SUSTAINING (E.G., EXTRAMURAL FUNDING)
- PROVIDE ADDITIONAL SUPPORT TO EXISTING PRODUCTIVE PROGRAMS.
- ESTABLISH TIMETABLES AND BUDGETARY TARGETS FOR PROGRAM-SPECIFIC RESEARCH GROWTH.
- CREATE A JOINT COLLEGE OF MEDICINE AND HOSPITALS/CLINICS REVIEW COMMITTEE TO EVALUATE EXISTING AND PROPOSED RESEARCH EFFORTS.

O SEED FUNDS FOR COLLEGE PRIORITIES

- INVESTMENT OF ADDITIONAL FUNDS INTO HIGH-PRIORITY AREAS WILL BE REQUIRED FROM SEVERAL AREAS AND SOURCES.
- NO SATISFACTORY MECHANISM EXISTS TO CONCENTRATE OR DIRECT ADEQUATE FUNDS TO PRIORITY PROGRAMS.
- POTENTIAL SOURCES OF ADDITIONAL SEED FUNDS ARE PRESENTLY CONTROLLED AT THE DEPARTMENTAL LEVEL—NOT COLLEGE-WIDE.
- IN ORDER TO INCREASE THE LEVEL OF INVESTMENT IN RESEARCH ACTIVITIES WHICH SUPPORT ESTABLISHED COLLEGE PRIORITIES, CONTROL OF THESE ADDITIONAL FUNDS MUST BE FOCUSED AT THE COLLEGE OF MEDICINE LEVEL.

O SUPPORTIVE RESEARCH ENVIRONMENT

- THE PROVISION OF SEED MONEY IS ONLY ONE OF THE ESSENTIAL REQUIREMENTS FOR A SUCCESSFUL RESEARCH PROGRAM.
- APPROPRIATE PHILOSOPHICAL COMMITMENT TO RESEARCH MUST EXIST AT ALL LEVELS OF COLLEGE OF MEDICINE LEADERSHIP, IN BOTH BASIC AND CLINICAL DEPARTMENTS.
- THE COMMITMENT TO GREATER RESEARCH MUST BE COMMUNICATED TO THE ENTIRE FACULTY AND DEMONSTRATED IN ALL COLLEGE ACTIVITIES.

OSU COLLEGE OF MEDICINE

RESOURCE STRATEGY

PRINCIPAL STRATEGY

GENERATE THE RESOURCES TO BECOME A "TOP 10" MEDICAL SCHOOL BY REALLOCATING EXISTING REVENUE AND INCREASING FUNDING FROM RESEARCH, ENDOWMENT AND DEVELOPMENT SOURCES, AND TARGETED FEDERAL AND STATE GOVERNMENT PROGRAM FUNDS

DIRECTIONS

- o INCREASE THE AMOUNT OF FUNDS AVAILABLE TO THE DEAN FOR SELECTED RESEARCH PRIORITIES**
- o STRENGTHEN DEVELOPMENT EFFORTS AND INCREASE THE LEVEL OF ANNUAL SUPPORT TO GENERATE GREATER ENDOWMENT INCOME**
- o STRENGTHEN SUPPORT TO THE HOSPITAL SO THAT IT CAN CONTINUE TO PROVIDE AN ENVIRONMENT WHICH ENHANCES THE COLLEGE'S DEVELOPMENT**
- o INITIATE (OR RESPOND TO) STATE FUNDING OPPORTUNITIES FOR SPECIFIC PROGRAM AREAS**
- o INITIATE (OR RESPOND TO) OPPORTUNITIES FOR FEDERAL SUPPORT VIA THE VA OR SPECIFIC PROGRAM AREAS**
- o DEVELOP A FIVE-YEAR COLLEGE OF MEDICINE BUDGET**
- o DEVELOP A FIVE-YEAR SPACE PLAN**

RESOURCE STRATEGY

PRINCIPAL STRATEGY:

GENERATE THE RESOURCES TO BECOME A "TOP 10" MEDICAL SCHOOL BY REALLOCATING EXISTING REVENUE AND INCREASING FUNDING FROM RESEARCH, ENDOWMENT AND DEVELOPMENT SOURCES, AND TARGETED FEDERAL AND STATE GOVERNMENT PROGRAM FUNDS.

RATIONALE:

ADDITIONAL DISCRETIONARY FUNDS TO ACCELERATE RESEARCH ACTIVITIES WILL BE REQUIRED. NEITHER THE STATE OF OHIO NOR OSU IS LIKELY TO COMMIT TO A SIGNIFICANT INCREASE IN ITS LEVEL OF SUPPORT TO THE COLLEGE OF MEDICINE. THE BEST POTENTIAL SOURCE OF SIGNIFICANT ADDITIONAL FUNDS IS FROM CLINICAL PRACTICE ACTIVITIES, PARTICULARLY UNIVERSITY HOSPITALS AND PRACTICE PLAN CONTRIBUTIONS (MRDF). SMALLER, BUT STILL IMPORTANT SOURCES OF ADDITIONAL FUNDING ARE INCREASED STATE FUNDS AND DEVELOPMENT FUNDING FOCUSED AROUND CLINICAL RESEARCH CENTERS OF EXCELLENCE. IN ADDITION TO GROWTH, EXISTING SOURCES OF FUNDING MUST ALSO BE REALLOCATED TO SUPPORT THE PRIORITIES OF THE COLLEGE OF MEDICINE.

DIRECTIONS:

O GREATER COLLEGE CONTROL

- POTENTIAL SOURCES OF SEED MONEY FOR RESEARCH ARE PRESENTLY AVAILABLE AT THE DEPARTMENTAL LEVEL.

- THE DEAN SHOULD HAVE ACCESS TO MORE DISCRETIONARY FUNDS TO FUND HIGH-PRIORITY EFFORTS.
- POTENTIAL SOURCES OF FUNDS ARE INCREASED TRF PAYMENTS, A PORTION OF RELEASE TIME FUNDS, STATE OF OHIO "EXCELLENCE GRANTS", AND HOSPITAL FUNDS.
- AVAILABLE FUNDING SHOULD BE USED AS SEED MONEY FOR PROGRAMS THAT WILL BECOME FINANCIALLY SELF-SUSTAINING WITHIN A REASONABLE TIMEFRAME.
- AT LEAST \$5-10 MILLION PER YEAR SHOULD BE AVAILABLE FOR THE DEAN'S DISCRETIONARY CONTROL WITHIN 5 YEARS.

O DEVELOPMENT

- THE OSU COLLEGE OF MEDICINE HAS A SIGNIFICANTLY SMALLER PERMANENT ENDOWMENT THAN TOP 10 UNIVERSITIES NATIONWIDE.
- AT MOST MEDICAL SCHOOLS WITH SUCCESSFUL RESEARCH PROGRAMS, ENDOWMENT FUNDS ARE A SIGNIFICANT SOURCE OF DISCRETIONARY "SEED" FUNDING.
- OSU'S HISTORICAL DEVELOPMENT EFFORTS FOR THE COLLEGE OF MEDICINE HAVE BEEN INADEQUATE AND SHOULD BE IMPROVED. HOWEVER, THERE WILL NECESSARILY BE A LAG BETWEEN THE ESTABLISHMENT OF A STRONGER DEVELOPMENT PROGRAM AND THE REALIZATION OF GREATER DEVELOPMENT INCOME.

O HOSPITAL SUPPORT

- THE HOSPITAL PRESENTLY SUPPORTS MANY COLLEGE OF MEDICINE PROGRAMS, BUT MUCH OF THIS SUPPORT IS INDIRECT, DIFFUSED, AND NOT CLEARLY QUANTIFIED.
- IN RECENT YEARS, HOSPITAL PROFITABILITY HAS BEEN DECLINING; IT IS IN DANGER OF BECOMING A FINANCIAL DRAIN ON THE UNIVERSITY AND THE COLLEGE OF MEDICINE IF TRENDS ARE NOT REVERSED. HOWEVER, IMPROVED FINANCIAL PERFORMANCE IS POSSIBLE IF THE HOSPITAL BECOMES MORE COMPETITIVE, EFFICIENT, AND MARKET-RESPONSIVE.
- THE HOSPITAL'S ABILITY TO SUPPORT THE COLLEGE'S PURSUIT OF ITS GOAL IS CONTINGENT UPON THE SUPPORT IT RECEIVES FROM THE COLLEGE TO ACHIEVE IMPROVED PERFORMANCE.

O STATE FUNDING

- LITTLE ADDITIONAL STATE MONIES WILL BE AVAILABLE TO THE COLLEGE OF MEDICINE FOR INCREASED SALARY SUPPORT OR GENERAL FUNDING.
- SPECIFIC PROGRAM AREAS OF PARTICULAR INTEREST TO THE CITIZENS OF OHIO, SUCH AS THE HEALTH NEEDS OF THE AGING, WILL REPRESENT THE MOST PROMISING OPPORTUNITIES FOR SECURING NEW FUNDS.

O FEDERAL FUNDING

- MANY TEACHING INSTITUTIONS RELY UPON A MAJOR RELATIONSHIP WITH THE VA TO SUPPORT SIGNIFICANT COMPONENTS OF THEIR MISSION.

- OSU'S EXISTING RELATIONSHIP WITH THE VA, THOUGH VALUABLE, IS COMPARATIVELY MODEST.
- OSU SHOULD AGGRESSIVELY SEEK TO EXPAND THIS RELATIONSHIP IN A MANNER WHICH SUPPORTS THE ATTAINMENT OF THE COLLEGE'S GOAL.
- OSU SHOULD ALSO IDENTIFY AND PURSUE OPPORTUNITIES FOR FEDERAL PROGRAM FUNDING.

O BUDGETING

- SIGNIFICANT STEPS HAVE BEEN TAKEN TO IMPROVE THE COLLEGE OF MEDICINE'S FINANCIAL POSITION AND FINANCIAL OPERATING SYSTEMS.
- ACHIEVING "TOP 10" STATUS WILL REQUIRE CAREFUL PLANNING AND JUDICIOUS USE OF FUNDS.
- MULTI-YEAR BUDGETING AND FINANCIAL PLANNING IS REQUIRED TO COORDINATE AND CONTROL THE USE OF RESOURCES TO SUPPORT THE COLLEGE'S PRIORITY PROGRAMS.
- A FIVE-YEAR BUDGETING SYSTEM SHOULD BE IMPLEMENTED AS SOON AS POSSIBLE.

O SPACE PLANNING

- A FIVE-YEAR SPACE PLAN FOR OFFICE, RESEARCH, AND CLINICAL AREAS SHOULD BE DEVELOPED AND IMPLEMENTED.

OSU COLLEGE OF MEDICINE

FACULTY STRATEGY

PRINCIPAL STRATEGY

RECRUIT AND RETAIN FACULTY MEMBERS WHO ARE CONSISTENT WITH THE REQUIREMENTS OF THE COLLEGE'S EDUCATIONAL AND RESEARCH STRATEGIES, OR WHO WILL SUPPORT THE PATIENT CARE AND SERVICE DELIVERY GOALS OF THE HOSPITALS AND CLINICS

DIRECTIONS

- o **RECRUIT NATIONALLY RECOGNIZED FACULTY IN AREAS OF IDENTIFIED PRIORITIES; BRING GRANT DOLLARS TO THE MEDICAL CENTER VIA SPECIFIC FACULTY RECRUITMENT**
- o **ENCOURAGE AND REWARD INCREASED PARTICIPATION IN ACTIVITIES THAT GAIN NATIONAL PRESTIGE**
- o **INCREASE THE NUMBER AND DESIRABILITY OF CLINICALLY-ORIENTED POSITIONS TO MEET PATIENT SERVICE NEEDS AND DEMANDS**
- o **ADJUST FACULTY SIZE TO IMPROVE THE EDUCATIONAL, RESEARCH AND CLINICAL ENVIRONMENTS FOR THE FACULTY, CONSISTENT WITH AVAILABLE FUNDING**

FACULTY STRATEGY

PRINCIPAL STRATEGY:

RECRUIT AND RETAIN FACULTY MEMBERS WHO ARE CONSISTENT WITH THE REQUIREMENTS OF THE COLLEGE'S EDUCATIONAL AND RESEARCH STRATEGIES, OR WHO WILL SUPPORT THE PATIENT CARE AND SERVICE DELIVERY GOALS OF THE HOSPITALS AND CLINICS.

RATIONALE:

THE COMPOSITION OF THE FACULTY OF THE COLLEGE OF MEDICINE IS THE PARAMETER THAT WILL HAVE THE GREATEST IMPACT UPON ACHIEVING "TOP 10" STATUS. THE CRITERIA USED FOR EVALUATION ARE HEAVILY WEIGHTED TO WHO IS ON THE FACULTY AND WHAT THEY ACHIEVE. FORTUNATELY, OSU HAS A SOLID BASE UPON WHICH TO BUILD. CAREFUL ATTENTION MUST BE PAID TO THE MIX AND SIZE OF THE FACULTY TO ASSURE THAT THE RESEARCH AND TEACHING MISSIONS ARE MET, AT THE SAME TIME THAT PATIENT CARE NEEDS ARE BEING SATISFIED.

DIRECTIONS:

0 NATIONALLY RECOGNIZED FACULTY

- COORDINATE RECRUITING EFFORTS WITH COLLEGE OF MEDICINE AND HOSPITAL CENTERS OF EMPHASIS AND WITH EMERGING OPPORTUNITIES.

- PROVIDE SUFFICIENT FUNDS TO HIRE THE VERY BEST CANDIDATES.

- MAKE—AND DELIVER UPON—THE REQUIRED COMMITMENTS OF SUPPORT. COORDINATE COMMITMENTS MADE TO CANDIDATES DURING THE RECRUITMENT PROCESS BETWEEN THE COLLEGE OF MEDICINE, HOSPITALS, AND OTHER AFFECTED PARTIES.

O REWARDING INCREASED NATIONAL PARTICIPATION

- IDENTIFY THOSE EDITORIAL BOARDS, REVIEW PANELS, NATIONAL ASSOCIATION BOARDS, PUBLICATIONS, ETC., IN WHICH OSU FACULTY MUST PARTICIPATE IN ORDER TO ACHIEVE NATIONAL PRE-EMINENCE.
- SET SPECIFIC TARGETS, BASED UPON THE PRESENT POSITION, FOR EACH NATIONAL FORUM—AND PERIODICALLY MEASURE PROGRESS TOWARD ACHIEVING THESE TARGETS.
- RECOGNIZE AND REWARD THOSE INDIVIDUALS WHO STEP UP TO RESPONSIBILITY OF ACHIEVING THESE POSITIONS.
- PROVIDE FUNDING TO SUPPORT GREATER PARTICIPATION IN THESE ACTIVITIES.

O CLINICALLY-ORIENTED FACULTY

- TO ACHIEVE PATIENT SERVICE AND REVENUE REQUIREMENTS WHICH WILL SUPPORT THE COLLEGE OF MEDICINE'S PROGRAMS, ADDITIONAL PRODUCTIVE, CLINICALLY-ORIENTED FACULTY WILL BE REQUIRED.
- THE PRESENT STRUCTURE AND STATUS OF REGULAR CLINICAL TRACK OPTIONS WILL NOT ATTRACT AND RETAIN THE NUMBER AND QUALITY OF PHYSICIANS REQUIRED.

- A STRONG, CLINICALLY-ORIENTED FACULTY CAN ONLY BE CREATED BY RECOGNIZING THEIR IMPORTANCE TO THE COLLEGE OF MEDICINE AND CREATING APPROPRIATE CAREER PATHS.
- ORGANIZATIONAL OPTIONS TO STRENGTHEN THE CLINICAL ORIENTATION OF THE FACULTY INCLUDE:
 - A STRENGTHENED, REGULAR CLINICAL TRACK WITHIN EXISTING DEPARTMENTS
 - COMMUNITY FACULTY STATUS FOR SALARIED PHYSICIANS WHO ARE ADDED TO OSU'S PRIMARY CARE NETWORK
 - A DEPARTMENT OF COMMUNITY MEDICINE

441

0 FACULTY SIZE

- THE FACULTY IS PRESENTLY DISSATISFIED WITH THEIR WORKLOAD, THE TIME AVAILABLE TO PURSUE RESEARCH ACTIVITIES, AND THE MECHANISMS AVAILABLE TO RECOGNIZE THEIR VARIOUS CONTRIBUTIONS.
- ADJUSTMENTS TO FACULTY SIZE CAN ONLY BE MADE IF THEY ARE CONSISTENT WITH COLLEGE-WIDE PRIORITIES AND AVAILABLE FUNDING.
- FACULTY TIME IS ONE OF THE RESOURCES THAT SHOULD BE CONSCIOUSLY RE-ALLOCATED TO FOCUS UPON DEFINED PRIORITIES.

OSU COLLEGE OF MEDICINE

CENTERS OF EMPHASIS STRATEGY

IDENTIFY AREAS OF EMPHASIS AROUND EXISTING COLLEGE OF MEDICINE STRENGTHS AND EMERGING RESEARCH OPPORTUNITIES; COORDINATE WITH THE HOSPITALS AND CLINICS IN DETERMINING CENTERS OF EMPHASIS. CRITERIA FOR DETERMINING AND PRIORITIZING CENTERS OF EMPHASIS ARE:

- 1) HAS CLINICAL IMPORTANCE FOR OSU HOSPITALS' COMPETITIVENESS;**
- 2) IS MULTIDISCIPLINARY IN NATURE;**
- 3) DRAWS UPON A STRONG RESEARCH (BASIC SCIENCE) COMPONENT;**
- 4) EXHIBITS A STRONG PRESENCE IN THE OSU SYSTEM;**
- 5) HAS ESTABLISHED LEADERSHIP.**

DIRECTIONS

- o **COM ADMINISTRATION, COM FACULTY AND HOSPITALS ADMINISTRATION COLLABORATIVELY SELECT CENTERS OF EMPHASIS**
- o **INITIALLY SELECT FOR EMPHASIS:**
 - **CANCER**
 - **NEUROSCIENCES**
 - **TRANSPLANTATION**
 - **CARDIOVASCULAR**
 - **WOMEN'S AND CHILDREN'S HEALTH**
 - **GERIATRICS/GERONTOLOGY**
- o **OTHER AREAS OF OPPORTUNITY:**
 - **MOLECULAR GENETICS**
 - **DIAGNOSTIC SERVICES**
 - **IMMUNOLOGY**
 - **AIDS**
 - **PRIMARY CARE**
 - **DIABETES**
 - **REHABILITATION**
 - **DIGESTIVE DISEASES**
 - **TRAUMA AND EMERGENCY CARE**
 - **BIOMEDICAL TECHNOLOGY**
 - **CLINICAL PHARMACOLOGY**
 - **HEALTH CARE SERVICES RESEARCH**
 - **PREVENTIVE SERVICES AND HEALTH EDUCATION**
 - **INFORMATION TECHNOLOGY**

OSU COLLEGE OF MEDICINE

CENTERS OF EMPHASIS STRATEGY

(CONTINUED)

PRINCIPAL STRATEGY

DIRECTIONS

- o **ESTABLISH AN ONGOING PROGRAM REVIEW COMMITTEE CONSISTING OF REPRESENTATION FROM COLLEGE OF MEDICINE DEPARTMENTAL LEADERSHIP, COLLEGE OF MEDICINE ADMINISTRATION, AND OSU HOSPITALS ADMINISTRATION TO ESTABLISH EVALUATION CRITERIA AND MONITOR SUCCESS OF CENTERS OF EMPHASIS**

THE OHIO STATE UNIVERSITY

HOSPITALS AND CLINICS

OSU

HOSPITALS AND CLINICS

GOAL

PROVIDE A RESPONSIVE TEACHING AND RESEARCH ENVIRONMENT AND HIGH-QUALITY, COST-EFFECTIVE PATIENT CARE, TO SUPPORT THE FUTURE INTERRELATED DIRECTIONS OF THE COLLEGE OF MEDICINE AND OSU HOSPITALS AND CLINICS, IN ACCORDANCE WITH THE AFFIRMATIVE ACTION POLICIES AND PROCEDURES OF THE OHIO STATE UNIVERSITY, ITS COLLEGE OF MEDICINE, HOSPITALS AND CLINICS.

OSU

HOSPITALS AND CLINICS

**STRATEGICALLY, THE HOSPITALS AND CLINICS
(INCLUDING THE DEPARTMENTAL PRACTICES)
SHOULD BE VIEWED ON A UNIFIED BASIS
FOR PLANNING PURPOSES**

WHY:

- o **IN THE MARKETPLACE, THEY ARE PERCEIVED AS AN INTEGRATED DELIVERY UNIT**
- o **THE CLINICS (AND THE CLINICAL DEPARTMENTS) FUNCTION AS THE "ENGINE" OF OSU HOSPITALS**
- o **EXTERNAL PERCEPTION OF QUALITY VIEWS THE HOSPITALS AND PHYSICIANS/CLINICS AS ONE**

OSU

HOSPITALS AND CLINICS

CRITERIA FOR EVALUATION OF HOSPITALS AND CLINICS' PERFORMANCE:

- o MARKET SHARE/VOLUME
- o RELATIVE COST
- o PAYOR MIX
- o RATIO OF INPATIENT TO AMBULATORY REVENUE
- o EMPLOYEE MORALE
- o PHYSICIAN PERCEPTIONS
- o CONSUMER PERCEPTIONS
- o ALTERNATIVE DELIVERY SYSTEM PARTICIPATION
- o LEVEL OF TECHNOLOGY/CLINICAL EXCELLENCE
- o OPERATING MARGIN
- o RESPONSIVENESS TO COMMUNITY HEALTH NEEDS AND DEMANDS
- o NEW PATIENT VISITS
- o APPOINTMENT AVAILABILITY
- o CONTRIBUTIONS TO COLLEGE OF MEDICINE
- o CUSTOMER SATISFACTION AND ACCEPTABILITY OF SERVICES RENDERED
- o PERFORMANCE OF CLINICAL AND MANAGERIAL SYSTEMS
- o PERFORMANCE OF AMBULATORY SERVICES DELIVERY SYSTEMS

**SPECIFIC QUANTIFIED TARGETS MUST BE ESTABLISHED FOR EACH OF THESE CRITERIA,
AND PROGRESS SHOULD BE MEASURED AND REPORTED ON A REGULAR BASIS**

OSU

HOSPITALS AND CLINICS

CORE STRATEGY

**IMPROVE MARKET RESPONSIVENESS AND COMPETITIVENESS
OF OSU HOSPITALS AND CLINICS, SUPPORT THE MEDICAL
STAFF IN DEVELOPING A GEOGRAPHICALLY DISTRIBUTED
PHYSICIAN NETWORK, AND ESTABLISH A SERVICE NETWORK
TO ATTRACT THE NECESSARY PATIENT VOLUMES, CONSISTENT
WITH THE COLLEGE OF MEDICINE'S CORE STRATEGY**

OSU HOSPITALS AND CLINICS

THE HOSPITALS AND CLINICS CORE STRATEGY COMPRISES
2 KEY COMPONENTS AND 7 PRINCIPAL STRATEGIES....

CORE STRATEGY

IMPROVE MARKET RESPONSIVENESS AND COMPETITIVENESS OF OSU HOSPITALS AND CLINICS, SUPPORT THE MEDICAL STAFF IN DEVELOPING A GEOGRAPHICALLY DISTRIBUTED PHYSICIAN NETWORK, AND ESTABLISH A SERVICE NETWORK TO ATTRACT THE NECESSARY PATIENT VOLUMES, CONSISTENT WITH THE COLLEGE OF MEDICINE'S CORE STRATEGY

KEY COMPONENTS

MARKET RESPONSIVENESS AND COMPETITIVENESS

- o STRUCTURE STRATEGY
- o FINANCIAL STRATEGY
- o CENTERS OF EMPHASIS STRATEGY
- o CONSUMER STRATEGY
- o MARKETING STRATEGY

PHYSICIAN AND SERVICES NETWORK

- o LOCAL AREA STRATEGY
- o REFERRAL AREA STRATEGY

PRINCIPAL STRATEGIES

OSU

HOSPITALS AND CLINICS

STRUCTURE STRATEGY

PRINCIPAL STRATEGY

IMPROVE THE FLEXIBILITY OF THE OSU HOSPITALS AND CLINICS TO RESPOND TO MARKETPLACE CHANGES, AND STRENGTHEN ITS GOVERNANCE AND MANAGEMENT IN ORDER TO RESPOND MORE EFFECTIVELY TO THE COMPETITIVE DEMANDS OF THE EXTERNAL ENVIRONMENT

DIRECTIONS

- o **STRENGTHEN THE ROLE OF THE UNIVERSITY HOSPITALS BOARD BY BROADENING ITS AGENDA RELATIVE TO SETTING STRATEGIC DIRECTIONS, STANDARDS, CLINICAL ACTIVITIES, AND MONITORING PERFORMANCE**

- o **FORMALIZE A STRATEGIC PLANNING PROCESS TO BE DIRECTED BY THE BOARD THAT INTEGRATES THE PLANS OF THE COLLEGE OF MEDICINE AND HOSPITALS AND CLINICS, AND CONSIDERS THE PLANS OF OTHER HEALTH COLLEGES, IN ANALYZING AND RECONCILING THE DEMANDS OF THE COMPETITIVE ENVIRONMENT**

- o **IMPROVE COMMUNICATIONS AND JOINT DECISION MAKING BETWEEN HOSPITALS AND CLINICS ADMINISTRATION, COLLEGE OF MEDICINE ADMINISTRATION, AND MEDICAL STAFF/FACULTY**

- o **ACHIEVE GREATER FLEXIBILITY WITHIN THE UNIVERSITY STRUCTURE FOR SELECTED ADMINISTRATIVE AND SUPPORT ACTIVITIES**

o OSU HOSPITALS WILL IMPLEMENT THIS
STRATEGY (AS WELL AS OTHERS
CONTAINED IN THE PLAN) IN ACCORDANCE
WITH ITS EXISTING AFFIRMATIVE ACTION
PLAN IN ORDER TO MEET UNIVERSITY
REQUIREMENTS, MANDATES, GOALS, ETC.

STRUCTURE STRATEGY

PRINCIPAL STRATEGY:

IMPROVE THE FLEXIBILITY OF THE OSU HOSPITALS AND CLINICS TO RESPOND TO MARKETPLACE CHANGES, AND STRENGTHEN ITS GOVERNANCE AND MANAGEMENT IN ORDER TO RESPOND MORE EFFECTIVELY TO THE COMPETITIVE DEMANDS OF THE EXTERNAL ENVIRONMENT.

RATIONALE:

IN ORDER TO MAINTAIN FINANCIAL VIABILITY AND TO PROVIDE ADDITIONAL FUNDING FOR THE COLLEGE OF MEDICINE'S PROGRAMS, OSU HOSPITALS AND CLINICS MUST BE MORE RESPONSIVE TO THE DEMANDS OF TODAY'S COMPETITIVE HEALTH CARE MARKETPLACE. A MAJOR RESEARCH EFFORT BY THE CONSORTIUM FOR THE STUDY OF UNIVERSITY HOSPITALS HAS SHOWN THAT, IN GENERAL, THOSE UNIVERSITY HOSPITALS WHICH ARE MORE INDEPENDENT OF THE STATE, UNIVERSITY AND MEDICAL SCHOOL ARE MORE SUCCESSFUL. A COMPETITIVE ENVIRONMENT REQUIRES QUICK, DECISIVE ACTIONS AND A CONCENTRATION ON STRATEGIES. THIS CAN BEST BE ACHIEVED BY CONCENTRATING MORE AUTHORITY IN THE UNIVERSITY HOSPITALS BOARD AND, BY EXTENSION, IN HOSPITAL MANAGEMENT.

DIRECTIONS:

o UNIVERSITY HOSPITALS BOARD

- THE UNIVERSITY HOSPITALS BOARD SHOULD BE RESPONSIBLE AND ACCOUNTABLE TO THE UNIVERSITY TRUSTEES, FOR THE OVERALL DIRECTION AND OPERATION OF THE HOSPITAL—AND FOR ITS SUPPORT OF BOTH THE COLLEGE OF MEDICINE'S PROGRAMS AND THOSE OF THE UNIVERSITY'S OTHER HEALTH COLLEGES.

- THE EXECUTIVE DIRECTOR OF UNIVERSITY HOSPITALS WILL BE RESPONSIBLE FOR THE OPERATIONS OF THE HOSPITALS; WILL BE RESPONSIBLE TO THE UNIVERSITY HOSPITALS BOARD FOR CARRYING OUT ITS ASSIGNED FUNCTIONS; AND SHALL REPORT TO THE VICE PRESIDENT FOR HEALTH SERVICES FOR UNIVERSITY GOVERNANCE.
- THE UNIVERSITY HOSPITALS BOARD, CONSISTENT WITH ITS MANDATE FROM THE TRUSTEES, SHOULD SET POLICIES AND STANDARDS, APPROVE PLANS, AND MONITOR PERFORMANCE FOR THE HOSPITALS AND CLINICS.

O STRATEGIC PLANNING

- THE PRESENT STRATEGIC PLANNING EFFORT SHOULD BE TRANSFORMED INTO AN ONGOING PROCESS UNDER THE DIRECTION OF THE BOARD.
- THE PLAN OF OSU HOSPITALS AND CLINICS SHOULD BE INTEGRATED WITH THE COLLEGE OF MEDICINE'S PLANS AND SHOULD CONSIDER THE PLANS OF THE UNIVERSITY'S SEVERAL HEALTH COLLEGES. SIGNIFICANT CONFLICTS WHICH CANNOT BE RESOLVED BY THE UNIVERSITY HOSPITALS BOARD SHOULD BE DISCUSSED WITH APPROPRIATE UNIVERSITY OFFICIALS.
- THE UNIVERSITY HOSPITALS BOARD, AS PUBLIC REPRESENTATIVES, ARE IN AN EXCELLENT POSITION TO RECOGNIZE THE CONFLICTING DEMANDS UPON OSU HOSPITALS AND THE COLLEGE OF MEDICINE, AND TO RECONCILE INTERNAL AND EXTERNAL DEMANDS IN GOVERNING THE HOSPITALS AND CLINICS.

O COMMUNICATION AND DECISION MAKING

- CLINICAL PRIORITIES AND INVESTMENT STRATEGIES SHOULD INVOLVE PERSONNEL FROM BOTH THE ADMINISTRATION OF THE HOSPITALS AND THE COLLEGE IN THE PLANNING AND EVALUATION PROCESS.
- MECHANISMS SHOULD BE ESTABLISHED TO INCREASE INTER-DEPARTMENTAL COMMUNICATION AND COORDINATION TO FOSTER THE MANY HIGH-PRIORITY, MULTI-DEPARTMENT EFFORTS WHICH WILL BE DEVELOPED.

O INDEPENDENCE/FLEXIBILITY

- THE ABILITY OF OSU HOSPITALS AND CLINICS TO SUCCEED IN THE EVOLVING COMPETITIVE HEALTHCARE ENVIRONMENT IS COMPROMISED WHENEVER THE UNIVERSITY STRUCTURE SIGNIFICANTLY IMPINGES UPON MANAGEMENT/GOVERNANCE FLEXIBILITY.
- THE MANAGEMENT OF OSU HOSPITALS AND CLINICS SHOULD ESTABLISH THE AREAS WHERE FLEXIBILITY IS CURRENTLY BEING CONSTRAINED IN A SIGNIFICANT WAY, AND WORK TO ACHIEVE DELEGATED INDEPENDENCE (UNDER THE AUSPICES OF THE HOSPITAL BOARD) IN THOSE KEY AREAS.
- HOSPITALS MANAGEMENT MUST PLAN FOR ADEQUATE SPACE TO MEET SHIFTING HEALTH CARE DEMANDS AND CHANGES IN DELIVERY MECHANISMS.

OSU

HOSPITALS AND CLINICS

FINANCIAL STRATEGY

PRINCIPAL STRATEGY

IMPROVE THE FINANCIAL POSITION AND THE COST EFFECTIVENESS OF OSU HOSPITALS AND CLINICS TO ACHIEVE FINANCIAL SELF-SUFFICIENCY

DIRECTIONS

- o **CREATE AWARENESS OF THE IMPORTANCE OF COST EFFECTIVENESS AMONG PHYSICIANS, MANAGEMENT AND EMPLOYEES**
- o **STRENGTHEN COST REDUCTION RESULTS THROUGH AGGRESSIVE BUDGETING, PRODUCTIVITY MANAGEMENT, AND RESPONSIBILITY DELEGATION EFFORTS**
- o **EXPAND HOSPITAL/UNIVERSITY EFFORTS TO CONTAIN THE COSTS OF JOINT ACTIVITIES, INCLUDING BOTH DIRECTLY PURCHASED SUPPLIES AND SERVICES AND UNIVERSITY OVERHEAD ITEMS**
- o **PARTICIPATE IN ALL MANAGED CARE PLANS WHOSE REIMBURSEMENT STRUCTURE IS ACCEPTABLE FOR THE HOSPITALS AND CLINICS**
- o **MONITOR AT THE BOARD LEVEL PROGRESS IN ACHIEVING TARGETED COST PERFORMANCE INDICATORS**
- o **ALLOCATE FUNDS FOR REINVESTMENT NEEDS IN ACCORDANCE WITH DEFINED PRIORITIES TO SUSTAIN A COMPETITIVE POSITION FOR OSU HOSPITALS AND CLINICS; REINVESTMENT NEEDS MUST BE ACCORDED PREFERENCE WITHIN THE SCHEME OF CAPITAL RESOURCE ALLOCATION**

FINANCIAL STRATEGY

PRINCIPAL STRATEGY:

IMPROVE THE FINANCIAL POSITION AND COST EFFECTIVENESS OF OSU HOSPITALS AND CLINICS TO ACHIEVE FINANCIAL SELF-SUFFICIENCY.

RATIONALE:

THE PRESENT COMPETITIVE HEALTH CARE ENVIRONMENT PROVIDES NO SAFE HARBOR FOR COSTLY, INEFFICIENT PROVIDERS. THE POSITION OF OSU HOSPITALS AS THE MOST EXPENSIVE INSTITUTION IN FRANKLIN COUNTY, AND AMONG THE MOST EXPENSIVE IN OHIO, PLACES THE INSTITUTION AT FINANCIAL RISK. IN SPITE OF ITS HIGH CHARGE LEVELS, HOWEVER, THE PROFITABILITY OF OSU HOSPITALS HAS BEEN DECLINING FOR SEVERAL YEARS. IF THIS TREND IS NOT REVERSED, VALUABLE FUNDS NOW BEING USED FOR EDUCATION AND RESEARCH EFFORTS WILL HAVE TO BE REDIRECTED TO OFFSET THE HOSPITALS' DEFICIT. ACROSS THE COUNTRY, ACADEMIC MEDICAL CENTERS ARE STRUGGLING WITH THIS SAME ISSUE; ONLY A FEW ARE ACHIEVING SUCCESS. THE SUCCESSFUL INSTITUTIONS RECOGNIZE THAT WHILE THE COMPREHENSIVE MISSIONS OF TEACHING HOSPITALS PRECLUDE ABANDONING HIGH-COST TERTIARY SERVICES, THERE IS NO REQUIREMENT THAT THEY HAVE TO OPERATE IN AN INEFFICIENT MANNER.

DIRECTION:

O AWARENESS OF COST-EFFECTIVENESS

- AT PRESENT, COST-EFFECTIVENESS IS NOT A HIGH PRIORITY CONCERN OF MOST PHYSICIANS, MANAGEMENT STAFF AND EMPLOYEES.
- EDUCATIONAL PROGRAMS CAN HEIGHTEN AWARENESS AND DEMONSTRATE THAT COST EFFECTIVENESS AND QUALITY DO NOT NECESSARILY CONFLICT.
- WITHOUT AWARENESS AND ACCEPTANCE, THE COST PERFORMANCE OF THE INSTITUTION WILL NOT IMPROVE.

O RESPONSIBILITY DELEGATION

- UNIVERSITY HOSPITALS MANAGEMENT STAFF MUST BE GIVEN BOTH THE AUTHORITY AND RESPONSIBILITY TO TRY OUT FRESH ALTERNATIVES TO THE PRESENT HIGH-COST METHOD OF SERVICE DELIVERY WITHIN THE HOSPITALS AND CLINICS.
- WITH PROPER GUIDANCE, COST REDUCTION AND PRODUCTIVITY IMPROVEMENT EFFORTS CAN BE MOST EFFECTIVELY ACCOMPLISHED BY DEPARTMENT AND FIRST-LINE SUPERVISORY EMPLOYEES.
- POTENTIAL TARGETS FOR IMPROVED PRODUCTIVITY AND COST-EFFECTIVENESS SHOULD INCLUDE DEPARTMENTS AND SERVICES WITHIN THE COLLEGE OF MEDICINE, AS WELL AS UNIVERSITY HOSPITALS.

- MUTUAL DETERMINATION OF INITIAL BUDGET TARGETS AND REGULAR FOLLOW-UP WITH FRONT-LINE SUPERVISORS IS THE MOST EFFECTIVE MEANS OF ACHIEVING COST REDUCTIONS AND PRODUCTIVITY GAINS.

0 SUBSIDY TO UNIVERSITY

- CURRENTLY, UNIVERSITY HOSPITALS IS PAYING MORE THAN \$7 MILLION ANNUALLY TO OSU FOR SERVICES WHICH WOULD COST CONSIDERABLY LESS IF PURCHASED ON THE OPEN MARKET.
- WHILE MANY OF THE FACTORS RESPONSIBLE FOR THIS SITUATION WILL BE DIFFICULT TO ELIMINATE IN THE NEAR FUTURE, THERE SHOULD BE A CLEAR, MUTUAL UNDERSTANDING THAT THE COSTS OF SERVICES PURCHASED FROM THE UNIVERSITY MUST BE CONTAINED; LEADERSHIP OF BOTH INSTITUTIONS SHOULD WORK JOINTLY TO MOVE OVERHEAD ALLOCATIONS AND PURCHASED SERVICES MUCH CLOSER TO LEVELS COMMENSURATE WITH THE OPEN MARKETPLACE.

0 ALTERNATIVE DELIVERY SYSTEMS

- ADS PENETRATION WILL INCREASE IN THE COLUMBUS AREA TO 30-35% OF THE MARKET.
- OSU'S HIGH COST AND IMAGE MAKE PARTICIPATION IN ADS PROGRAMS DIFFICULT.
- ONCE OSU IS EXCLUDED FROM A PARTICULAR PROGRAM, ITS MEMBERS ARE LOST AS POTENTIAL PATIENTS TO OSU.

- THE HOSPITALS AND CLINICS SHOULD PARTICIPATE IN AS MANY ADS PLANS AS NECESSARY TO ASSURE THAT THE COLLEGE OF MEDICINE'S TEACHING REQUIREMENTS ARE SUPPORTED BY ADEQUATE PATIENT VOLUME. THE HOSPITALS AND COLLEGE FACULTY MUST COLLABORATE ON THE SELECTION OF ADS PLANS. IN REVIEWING AN ADS PLAN, CONSIDERATION MUST BE GIVEN TO THE FISCAL IMPACT OF THE PLAN'S REIMBURSEMENT STRUCTURE ON THE ECONOMIC VIABILITY OF THE HOSPITALS AND CLINICS; DEEP DISCOUNTING MAY NOT BE IN THE BEST INTERESTS OF NEITHER THE HOSPITALS AND CLINICS OR THE COM.

O BOARD INVOLVEMENT

- BECAUSE OF ITS IMPORTANCE, FINANCIAL-EFFECTIVENESS SHOULD BECOME A TOP PRIORITY OF THE BOARD.
- SPECIFIC, MEASURABLE TARGETS SHOULD BE SET, AND PROGRESS MONITORED PERIODICALLY, TO INSURE THAT IMPROVEMENT IS BEING MADE.

O REINVESTMENT NEEDS

- IN ORDER TO REMAIN FINANCIALLY SOLVENT, THE HOSPITALS AND CLINICS MUST BE PERMITTED TO REINVEST THE NECESSARY FUNDS REQUIRED TO BE COMPETITIVE.
- A LONG TERM CAPITAL AND REINVESTMENT PLAN SPANNING 3 TO 5 YEARS SHOULD BE DEVELOPED, AND ITS REQUIREMENTS GIVEN HIGH PRIORITY.
- THE SUCCESS OF THESE INVESTMENTS SHOULD BE MONITORED PERIODICALLY, AND ADJUSTMENTS MADE, AS REQUIRED.

OSU

HOSPITALS AND CLINICS

CENTERS OF EMPHASIS STRATEGY

PRINCIPAL STRATEGY

IDENTIFY AREAS OF EMPHASIS AROUND EXISTING INSTITUTIONAL STRENGTHS AND EXCEPTIONAL EMERGING MARKETPLACE/CLINICAL RESEARCH OPPORTUNITIES; THEN CONCENTRATE OPERATIONAL RESOURCES AND MARKETING ACTIVITIES IN THESE AREAS. CRITERIA FOR DETERMINING AND PRIORITIZING CENTERS OF EMPHASIS ARE THAT IT:

- 1) HAS CLINICAL IMPORTANCE FOR OSU HOSPITALS' COMPETITIVENESS;**
- 2) IS MULTIDISCIPLINARY IN NATURE;**
- 3) DRAWS UPON A STRONG RESEARCH (BASIC SCIENCE) COMPONENT;**
- 4) EXHIBITS A STRONG PRESENCE IN THE OSU SYSTEM;**
- 5) HAS ESTABLISHED LEADERSHIP.**

DIRECTIONS

- o **INITIALLY SELECT FOR EMPHASIS:**
 - **CANCER**
 - **NEUROSCIENCES**
 - **TRANSPLANTATION**
 - **CARDIOVASCULAR**
 - **WOMEN'S AND CHILDREN'S HEALTH**
 - **GERIATRICS/GERONTOLOGY**
- o **OTHER AREAS OF OPPORTUNITY:**
 - **MOLECULAR GENETICS**
 - **DIAGNOSTIC SERVICES**
 - **IMMUNOLOGY**
 - **AIDS**
 - **PRIMARY CARE**
 - **DIABETES**
 - **REHABILITATION**
 - **DIGESTIVE DISEASES**
 - **TRAUMA AND EMERGENCY SERVICES**
 - **BIOMEDICAL TECHNOLOGY**
 - **CLINICAL PHARMACOLOGY**
 - **HEALTH CARE SERVICES RESEARCH**
 - **PREVENTIVE SERVICES AND HEALTH EDUCATION**
 - **INFORMATION TECHNOLOGY**
- o **ACCENTUATE THE UNIQUE STRENGTHS WITHIN EACH AREA OF EMPHASIS, BUILDING THE FOCUS OF OSUH'S MARKETING AROUND THEM IN ORDER TO GAIN/MAINTAIN A COMPETITIVE ADVANTAGE**

OSU HOSPITALS AND CLINICS

CENTERS OF EMPHASIS STRATEGY

(CONTINUED)

PRINCIPAL STRATEGY

DIRECTIONS

- o ESTABLISH AN ONGOING CLINICAL PROGRAM REVIEW COMMITTEE CONSISTING OF REPRESENTATIVES FROM COM DEPARTMENTS, COLLEGE OF MEDICINE ADMINISTRATION, AND THE HOSPITALS ADMINISTRATION TO ESTABLISH EVALUATION CRITERIA AND MONITOR SUCCESS OF CLINICAL PROGRAMS
- o DEVELOP THE CANCER INSTITUTE WITH INDEPENDENCE IN CANCER-SPECIFIC SERVICES AND MEDICAL DIRECTION WHILE ACHIEVING INTEGRATION WITH THE HOSPITALS FOR ALL OTHER ADMINISTRATIVE SERVICES

CENTERS OF EMPHASIS STRATEGY

PRINCIPAL STRATEGY:

IDENTIFY AREAS OF EMPHASIS AROUND EXISTING STRENGTHS AND EXCEPTIONAL EMERGING OPPORTUNITIES; THEN CONCENTRATE RESOURCES AND PROMOTIONAL ACTIVITIES IN THESE AREAS.

RATIONALE:

SINCE RESOURCE CONSTRAINTS PROHIBIT PUTTING EQUAL EMPHASIS ON ALL AREAS. SOME AREAS MUST BE SELECTED FOR SPECIAL EMPHASIS. THE CRITERIA UTILIZED FOR IDENTIFYING AND PRIORITIZING CENTERS OF EMPHASIS ARE:

- 1) HAS CLINICAL IMPORTANCE FOR THE OSU HOSPITALS' COMPETITIVENESS;
- 2) IS MULTIDISCIPLINARY AND NATURE;
- 3) DRAWS UPON A STRONG RESEARCH (BASIC SCIENCE) COMPONENT;
- 4) EXHIBITS A STRONG PRESENCE IN THE OSU SYSTEM;
- 5) HAS ESTABLISHED LEADERSHIP.

ONCE SELECTED, CENTERS OF EMPHASIS WOULD HAVE PRIORITY FOR RESOURCES AND ATTENTION. OVER TIME, THE AREAS OF EMPHASIS WILL CHANGE, REFLECTING THE CONDITIONS THAT EXIST AT THAT FUTURE TIME AND THE MATURITY OF PARTICULAR PROGRAMS.

DIRECTIONS:

O INITIAL EMPHASIS

- THESE AREAS CURRENTLY HAVE GREAT GROWTH POTENTIAL.
- STRONG PRESENT POSITIONS EXIST (OR RECENT IMPROVEMENTS HAVE BEEN MADE) IN EACH AREA.
- RESOURCES ARE AVAILABLE TO CAPITALIZE ON THE OPPORTUNITIES.

O UNIQUE STRENGTHS FOR EACH AREA OF EMPHASIS

- THE UNIQUE STRENGTHS OF EACH AREA ARE CRITICALLY IMPORTANT; THEY WERE RESPONSIBLE FOR ITS BEING SELECTED FOR EMPHASIS.
- THESE UNIQUE STRENGTHS SHOULD BE IDENTIFIED AND THEN ENHANCED.
- MARKETING PROGRAMS SHOULD BE CENTERED AROUND THESE PARTICULAR AREAS OF STRENGTH FOR EACH PROGRAM.

O CLINICAL PROGRAM REVIEW COMMITTEE

- BEING SELECTED AS AN INITIAL AREA OF EMPHASIS DOES NOT MEAN THAT THE AREA WILL ALWAYS BE EMPHASIZED. PRIORITIES ASSOCIATED WITH CENTERS OF EMPHASIS AND THE IDENTIFICATION OF CENTERS OF EMPHASIS MUST BE REEVALUATED PERIODICALLY AS PART OF THE PLANNING PROCESS.

- PERFORMANCE CRITERIA, WITH SPECIFIC GOALS FOR EACH AREA, SHOULD BE ESTABLISHED AND ACTUAL RESULTS COMPARED AGAINST THE TARGET.
- WHEN PERFORMANCE DOES NOT MEET EXPECTATIONS, CORRECTIVE ACTION SHOULD BE TAKEN OR EMPHASIS STATUS REMOVED.
- A REVIEW COMMITTEE WITH REPRESENTATIVES FROM THE COLLEGE OF MEDICINE ADMINISTRATION, SELECTED COM DEPARTMENTS AND THE HOSPITALS ADMINISTRATION SHOULD BE ESTABLISHED TO EVALUATE AND MONITOR PROGRAMS.

o CANCER INSTITUTE

- THE CANCER INSTITUTE REPRESENTS A MAJOR, HIGHLY VISIBLE INVESTMENT BY THE STATE OF OHIO.
- UNLIKE MANY NEW CANCER INSTITUTES, NO SIGNIFICANT ON-GOING STATE OPERATING APPROPRIATIONS WERE MADE.
- THE CANCER INSTITUTE HAS THE POTENTIAL TO COST THE COLLEGE OF MEDICINE (OR USU) GREAT SUMS OF MONEY IF THE HIGHER COST STRUCTURE OF THE INSTITUTE IS NOT OFFSET BY GREATER OPERATING OR NON-OPERATING REVENUES.
- INDEPENDENCE IN CANCER-SPECIFIC SERVICES, AND MEDICAL DIRECTION WILL BE REQUIRED TO MEET THE OBJECTIVES OF THE INSTITUTE.
- OTHER SERVICES CAN BE MORE EFFECTIVELY INTEGRATED WITH THE HOSPITAL WITHOUT COMPROMISING THE INSTITUTE'S MISSION, THUS PERMITTING OPERATING EFFICIENCIES TO BE ACHIEVED.

- FINANCIAL REPORTS, SEPARATE FROM THOSE OF UNIVERSITY HOSPITALS, WILL BE MAINTAINED FOR THE CANCER INSTITUTE.

OSU

HOSPITALS AND CLINICS

CONSUMER STRATEGY

PRINCIPAL STRATEGY

CREATE A USER-FRIENDLY ENVIRONMENT THAT IS ACCESSIBLE, CONVENIENT AND RESPONSIVE TO PATIENTS AND REFERRING PHYSICIANS THROUGH THE DEVELOPMENT OF A CONSUMER SERVICE PHILOSOPHY

DIRECTIONS

- o **ESTABLISH IN-HOUSE CONSUMER RELATIONS PROGRAMS TO CREATE AWARENESS AND EDUCATE EMPLOYEES, MANAGEMENT, STUDENTS, CLINICAL RESIDENTS, AND FACULTY ABOUT THE IMPORTANCE AND NEEDS OF CONSUMERS**
- o **ANALYZE AND MODIFY CONSUMER CONTACT OPERATING SYSTEMS TO MEET THE PERCEIVED AND ACTUAL NEEDS OF PATIENTS AND REFERRING PHYSICIANS**
- o **COORDINATE PATIENT ACCESS, CLINIC SCHEDULING, BILLING AND RELATED ADMINISTRATIVE ACTIVITIES FOR ALL ON-CAMPUS CLINICS, AND OFF-CAMPUS PRIMARY CARE NETWORKS ESTABLISHED OR BEING ESTABLISHED**

OSU

HOSPITALS AND CLINICS

CONSUMER STRATEGY -- CONTINUED

PRINCIPAL STRATEGY

CREATE A USER-FRIENDLY ENVIRONMENT THAT IS ACCESSIBLE, CONVENIENT AND RESPONSIVE TO PATIENTS AND REFERRING PHYSICIANS THROUGH THE DEVELOPMENT OF A CONSUMER SERVICE PHILOSOPHY

DIRECTIONS -- CONTINUED

- o **MEASURE, IMPROVE AND MONITOR EMPLOYEE COMMITMENT TO CONSUMER SERVICE AND OVERALL JOB SATISFACTION**

- o **CREATE MECHANISMS TO ASSURE COMMUNICATIONS WITH REFERRING PHYSICIANS**

- o **WORK WITH STATE OFFICIALS TO OBTAIN APPROVAL FOR AN EXIT OFF HIGHWAY 315**

- o **IMPROVE ACCESS, SIGNAGE AND PARKING WITHIN THE MEDICAL CENTER'S CAMPUS**

- o **DEVELOP SPECIFIC PROGRAMS DESIGNED TO "DEINSTITUTIONALIZE" THE MEDICAL CENTER'S INTERNAL ENVIRONMENT AND ENHANCE PATIENT, VISITOR, AND FAMILY MEMBER PERCEPTIONS OF OSUH AS A POSITIVE HEALING ENVIRONMENT**

CONSUMER STRATEGY

PRINCIPAL STRATEGY:

CREATE A USER-FRIENDLY ENVIRONMENT THAT IS ACCESSIBLE, CONVENIENT AND RESPONSIVE TO PATIENTS AND REFERRING PHYSICIANS THROUGH THE DEVELOPMENT OF A CONSUMER SERVICE PHILOSOPHY.

RATIONALE:

IN A COMPETITIVE ENVIRONMENT, THE PERCEPTIONS OF BOTH PATIENTS AND REFERRING PHYSICIANS CONCERNING BOTH CLINICAL QUALITY AND CONSUMER ORIENTATION ARE VITAL TO THE CONTINUED VIABILITY OF THE HOSPITALS AND CLINICS. IT IS THE USERS' VIEW, NOT WHAT THE PROVIDERS THINK, THAT IS THE REAL MEASURE OF SUCCESSFUL PATIENT CARE. OSU HOSPITALS AND CLINICS PROVIDE CARE OF HIGH CLINICAL QUALITY. HOWEVER, THE QUALITY OF THE DELIVERY PROCESS—AND USERS' PERCEPTIONS OF ITS QUALITY—MUST BE IMPROVED SIGNIFICANTLY. THIS MUST BE ACCOMPLISHED AT THE SAME TIME THAT THE CARE IS DELIVERED IN A MORE COST-EFFECTIVE MANNER.

DIRECTION:

0 AWARENESS

- ALL INTERNAL GROUPS—MANAGEMENT, EMPLOYEES, STUDENTS, RESIDENTS AND FACULTY—MUST RECOGNIZE THAT PATIENTS AND REFERRING PHYSICIANS ARE OSU'S CONSUMERS, AND THUS THEIR NEEDS MUST BE UNDERSTOOD AND MET.

- THE AWARENESS LEVEL OF THESE INTERNAL GROUPS MUST BE INCREASED BEFORE PERFORMANCE WILL IMPROVE.
- FREQUENT REINFORCEMENT MUST OCCUR.

0 CONSUMER-CONTACT OPERATING SYSTEMS

- ALL CONSUMER-CONTACT OPERATING SYSTEMS (SUCH AS BILLING, APPOINTMENT SCHEDULING, ADMITTING AND OUTPATIENT REGISTRATION) SHOULD BE IDENTIFIED AND ANALYZED FOR THEIR IMPACT ON USERS.
- USER PROBLEMS SHOULD THEN BE IDENTIFIED AND CORRECTED.
- A CONTINUING USER-ORIENTED ANALYSIS AND TESTING PROGRAM SHOULD BE INITIATED.

0 CLINIC ACTIVITIES

- PRESENT CLINIC ACTIVITIES ARE VERY FRAGMENTED AND DIFFICULT TO USE FOR BOTH PATIENTS AND PHYSICIANS.
- ACROSS THE COUNTRY, CLINICS WITHIN SUCCESSFUL MAJOR REFERRAL CENTERS EITHER OPERATE AS A COORDINATED, SINGLE ENTITY OR GIVE THE IMPRESSION OF BEING ONE.

- CLINIC SCHEDULING, BILLING AND RELATED PATIENT-CONTACT ADMINISTRATIVE ACTIVITIES SHOULD BE COORDINATED, CONSOLIDATED, AND CONTROLLED BY A SINGLE MANAGEMENT UNIT. A TASK FORCE COMPRISED OF MEDICAL STAFF REPRESENTATIVES AND HOSPITALS ADMINISTRATION REPRESENTATIVES WILL ESTABLISH POLICY FOR AND MAINTAIN OVERSIGHT OF THE MANAGEMENT UNIT.

o EMPLOYEE MORALE

- EMPLOYEE MORALE IS THE MAJOR SINGLE PARAMETER THAT IMPACTS PATIENTS' PERCEPTIONS OF HOSPITALS AND CLINICS.
- MORALE MUST BE CONSTANTLY MEASURED, MONITORED AND STRENGTHENED TO IMPROVE PATIENT PERCEPTION OF THE HOSPITALS AND CLINICS.

o ACCESS FROM HIGHWAY 315

- VEHICLE ACCESS THROUGH THE CAMPUS TO THE HOSPITALS AND CLINIC IS EXTREMELY POOR.
- PLANS HAVE EXISTED FOR AN ACCESS ROAD FOR YEARS. THIS IS A HIGH PRIORITY NEED, AND BREAKING THE POLITICAL LOGJAM FOR THIS ACCESS ROAD SHOULD THUS BECOME A TOP MEDICAL CENTER AND UNIVERSITY PRIORITY.

o SIGNAGE/ACCESS

- OSU HOSPITALS AND CLINICS ARE A VERY LARGE, COMPLEX ENTITY WHICH IS IMBEDDED IN AN EVEN LARGER ENTITY. IT IS BOTH CONFUSING AND INTIMIDATING FOR MANY PATIENTS TO ACCESS THE HOSPITALS AND CLINICS.
- FOR PATIENTS FROM THE DISTANT REFERRAL AREAS, THIS INTIMIDATION IS EVEN MORE OF A DETERRING FACTOR.
- EXPEDITIOUS DEVELOPMENT AND IMPLEMENTATION OF PROGRAMS DESIGNED TO MAKE THE FACILITIES EASIER TO USE SHOULD BE PURSUED. THESE EFFORTS MAY INCLUDE:
 - . INFORMATIONAL MATERIALS (BROCHURES, MAPS, KIOSKS, INFORMATION PERSONNEL)
 - . CREATIVE SIGNAGE
 - . EASE OF PATIENT DROP-OFF
 - . EASE OF PARKING FOR NON-GEOGRAPHIC MEDICAL FACULTY/STAFF
 - . EASE OF PARKING FOR AMBULATORY SURGERY PATIENTS AND OUTPATIENTS

O INTERNAL ENVIRONMENT

- EFFORTS MUST BE MADE TO DEVELOP PROGRAMS AND OPERATING SYSTEMS THAT MEASURABLY IMPROVE THE PUBLIC'S PERCEPTION ABOUT THE INTERNAL SERVICE DELIVERY ENVIRONMENT OF UNIVERSITY HOSPITALS. CURRENTLY, A HIGH-TECHNOLOGY POSITION COMBINED WITH A "LOW TOUCH, IMPERSONAL" SERVICE DELIVERY RATING EXISTS IN THE MINDS OF THE CONSUMER PUBLIC.

- IN THE FUTURE, QUALITY HEALTH SERVICE DELIVERY AND THE PUBLIC'S SATISFACTION DERIVED THEREIN WILL BE LINKED TO SUCH ORGANIZATIONAL ATTRIBUTES AS:
 - 1) APPEARANCE OF THE FACILITY AND STAFF
 - 2) COURTESY OF PHYSICIANS AND EMPLOYEES
 - 3) FRIENDLINESS OF THE WORKFORCE
 - 4) COMPETENCE OF PRACTITIONERS AND PROFESSIONALISM DISPLAYED
 - 5) RESPONSIVENESS TO PATIENT/FAMILY NEEDS
 - 6) COMFORT FACILITIES, ETC.
 - 7) PROVISION OF EXTRAS/VALUE-ADDED SERVICES

- THE SUCCESSFUL MEDICAL CENTER OF THE FUTURE MUST BLEND TECHNOLOGY WITH THOSE SERVICE DELIVERY ATTRIBUTES SOUGHT BY THE CONSUMING PUBLIC.

OSU

HOSPITALS AND CLINICS

MARKETING STRATEGY

PRINCIPAL STRATEGY

AGGRESSIVELY EDUCATE TARGETED MARKETS ABOUT THE CENTERS OF EMPHASIS OF OSU HOSPITALS AND CLINICS, AND THE TECHNOLOGY, LEADERSHIP, AND INNOVATION OF OSU'S PHYSICIAN FACULTY, AND CREATE A COMPETITIVE POSITION THAT FAVORABLY DIFFERENTIATES THE MEDICAL CENTER FROM ITS PRINCIPAL COMPETITORS

DIRECTIONS

- o RECOGNIZE THE IMPORTANCE OF FAVORABLE "WORD OF MOUTH" ENDORSEMENTS FROM PATIENTS AND FAMILY, AND GEAR THE MEDICAL CENTER'S CONSUMER STRATEGY TO THIS END
- o INCREASE FACULTY INTERACTION/INTERRELATIONSHIPS WITH PRESENT AND POTENTIAL REFERRING PHYSICIANS; AND ACTIVELY MARKET THE MEDICAL STAFF TO TARGETED PHYSICIAN MARKETS IN CENTRAL OHIO
- o CAPITALIZE ON THE STRENGTHS OF THE FACULTY BY ORGANIZING A MEDICAL CENTER-WIDE PUBLIC RELATIONS PROGRAM, AND INTEGRATE WITH OTHER PHYSICIAN MARKETING ACTIVITIES
- o DEVELOP AND IMPLEMENT A FOCUSED COMMUNICATIONS CAMPAIGN TO ESTABLISH OSU'S COMPETITIVE POSITIONING, INCREASE UTILIZATION IN OSU'S AREAS OF CLINICAL STRENGTH, AND INCREASE REFERRALS TO THE MEDICAL STAFF IN THESE AREAS
- o ESTABLISH OSU'S POSITION IN THE MARKETPLACE AS AN INNOVATIVE, HIGH TECH, HIGH QUALITY PROVIDER THAT ALSO MEETS THE BROAD MEDICAL AND PERSONAL HEALTH CARE NEEDS OF THE PATIENT

MARKETING STRATEGY

PRINCIPAL STRATEGY:

AGGRESSIVELY EDUCATE TARGETED MARKETS ABOUT THE CENTERS OF EMPHASIS OF OSU HOSPITALS AND CLINICS, AND THE TECHNOLOGY, LEADERSHIP, AND INNOVATION OF OSU'S PHYSICIAN FACULTY, AND CREATE A COMPETITIVE POSITION THAT FAVORABLY DIFFERENTIATES THE MEDICAL CENTER FROM ITS PRINCIPAL COMPETITORS.

RATIONALE:

IN A COMPETITIVE ENVIRONMENT, MARKET SHARE MUST BE WON. COMPETITORS IN CENTRAL OHIO—AS WELL AS OTHER MAJOR OHIO TERTIARY CENTERS—HAVE SIGNIFICANTLY INCREASED THEIR MARKETING EFFORTS IN RECENT YEARS. THERE IS A REAL DANGER THAT OSU WILL LOSE THE NECESSARY CRITICAL VOLUME OF PATIENTS REQUIRED TO PROVIDE SUFFICIENT CLINICAL TRAINING AND ASSURE THE FINANCIAL SUCCESS OF THE HOSPITALS AND CLINICS. OSU HAS TREMENDOUS RESOURCES AND IS A LEADER IN MANY IMPORTANT NEW PROCEDURAL AREAS. HOWEVER, ITS POSITION AND STRENGTHS ARE NOT AS WELL-KNOWN OR FULLY APPRECIATED IN CENTRAL OHIO AS THEY NEED TO BE.

DIRECTIONS:

0 CONSUMER ENDORSEMENTS

- RECOMMENDATIONS FROM FAMILY, FRIENDS AND ACQUAINTANCES ARE THE MAJOR COMPONENT IN PHYSICIAN AND HOSPITAL SELECTION DECISIONS.

- WHEN PATIENTS ARE SATISFIED WITH THEIR EXPERIENCE, THEY WILL RECOMMEND THAT PROVIDER TO FRIENDS AND FAMILY.
- PROGRAMS CAN BE DESIGNED TO ENCOURAGE SATISFIED PATIENTS AND FAMILY MEMBERS TO SHARE THEIR EXPERIENCE.

O REFERRING PHYSICIANS

- PHYSICIAN REFERRALS ARE A PHYSICIAN-TO-PHYSICIAN PHENOMENON.
- PHYSICIANS REFER TO OTHER PHYSICIANS WHOM THEY KNOW, RESPECT AND TRUST.
- AN ACTIVE PROGRAM TO INCREASE FACULTY INTERACTION WITH REFERRAL AREA PHYSICIANS WILL INCREASE REFERRAL VOLUME.

O PUBLIC RELATIONS

- PUBLICITY IS THE LEAST EXPENSIVE—AND MOST EFFECTIVE FORM OF ADVERTISING.
- OSU HAS MANY STRENGTHS AND PROGRAMS THAT ARE TRULY "NEWSWORTHY", BUT WHICH ARE RELATIVELY UNKNOWN TO THE LOCAL COMMUNITY.
- A MEDICAL CENTER-WIDE PUBLIC RELATIONS PROGRAM IS NEEDED TO IDENTIFY PUBLICITY OPPORTUNITIES AND ASSURE THAT THEY ARE TAKEN ADVANTAGE OF APPROPRIATELY.

O MARKETING/COMMUNICATIONS

- WITHIN COLUMBUS AND THROUGHOUT CENTRAL OHIO, REPETITIVE MESSAGES ABOUT UNIVERSITY HOSPITALS MUST BE A COMPONENT OF A TOTAL MARKETING PROGRAM.
- COMMUNICATION EFFORTS SHOULD BE DIRECTED TOWARDS REINFORCING OSU'S STRATEGIC POSITIONING AND INCREASING VOLUME IN AREAS OF EMPHASIS.
- COMMUNICATION EFFORTS SHOULD BE CONCENTRATED HEAVILY, BUT NOT EXCLUSIVELY, ON CENTERS OF EMPHASIS.

O IMAGE AND POSITIONING

- PRESENTLY, OSU HOSPITALS AND CLINICS HAVE A LIMITED POSITION WITH THE PUBLIC (I.E., A HIGH TECH SERVICES POSITION COUPLED WITH HIGH LEVELS OF PHYSICIAN AND CONSUMER NON-AWARENESS ABOUT OTHER OSUH SERVICES).
- A DEFINITE POSITIONING THEME MUST BE ESTABLISHED THAT IS SUPPORTED BY THE REALITY WHICH CAN BE DELIVERED.
- THE BEST POSITION WOULD BE TO CONTINUE TO ENHANCE OSU'S CURRENT POSITION AS AN INNOVATIVE, HIGH TECH, HIGH-QUALITY PROVIDER WITHIN ITS IDENTIFIED CENTERS OF EMPHASIS—BUT WHICH ALSO MEETS THE HUMAN NEEDS OF THE PATIENT.

OSU

HOSPITALS AND CLINICS

LOCAL AREA STRATEGY

PRINCIPAL STRATEGY

ASSIST MEDICAL STAFF IN IDENTIFYING SPECIFIC COMMUNITY BASED PHYSICIANS WHO WISH TO AFFILIATE WITH AN OSU NETWORK OF PHYSICIANS AND AMBULATORY CARE SERVICE CENTERS WITHIN FRANKLIN COUNTY AND IN SELECTED NEARBY POPULATION CENTERS; SPECIFICALLY, THOSE COUNTIES THAT COMPRISE THE COLUMBUS METROPOLITAN STATISTICAL AREA

DIRECTIONS

- o DEVELOP AN AMBULATORY SERVICES DISTRIBUTION PLAN WHICH IDENTIFIES PREFERRED LOCATIONS AND SERVICE MIX FOR PHYSICIANS, DIAGNOSTIC/TREATMENT CENTERS, AND OTHER AMBULATORY HEALTHCARE FACILITIES
- o CREATE A MANAGEMENT STRUCTURE FOR THE AMBULATORY SERVICES NETWORK WHICH IS INTEGRATED WITH THE CLINICS AND DEPARTMENTS, AND WHICH ALSO FOSTERS COMPETITIVE SERVICE DELIVERY
- o SINCE IT IS IN THE BEST INTERESTS OF OSU, ENCOURAGE AND ASSIST MEDICAL STAFF AND CLINICAL DEPARTMENTS IN IDENTIFYING THOSE SPECIFIC PHYSICIANS WHO WOULD LIKE TO AFFILIATE WITH THE AMBULATORY NETWORK OR ARE SEEKING ASSISTANCE IN THE DEVELOPMENT OR TRANSITION OF THEIR PRACTICE. THE HOSPITALS SHOULD INVEST FUNDS NECESSARY TO ACCOMPLISH THE CREATION OF THIS DISTRIBUTION NETWORK/SYSTEM

OSU

HOSPITALS AND CLINICS

LOCAL AREA STRATEGY -- CONTINUED

PRINCIPAL STRATEGY

ASSIST MEDICAL STAFF IN IDENTIFYING SPECIFIC COMMUNITY BASED PHYSICIANS WHO WISH TO AFFILIATE WITH AN OSU NETWORK OF PHYSICIANS AND AMBULATORY SERVICE CENTERS WITHIN FRANKLIN COUNTY AND IN SELECTED NEARBY POPULATION CENTERS; SPECIFICALLY, THOSE COUNTIES THAT COMPRISE THE COLUMBUS METROPOLITAN STATISTICAL AREA

DIRECTIONS -- CONTINUED

- o **STRENGTHEN OR CREATE REFERRAL RELATIONSHIPS FOR TERTIARY SERVICES THAT NOW RESULT IN PATIENT OUTMIGRATION FROM FRANKLIN COUNTY**

- o **STRENGTHEN CME, SPEAKER'S BUREAU AND ALUMNI RELATIONS PROGRAMS**

- o **OSU HOSPITALS MEDICAL STAFF SHOULD BECOME MORE ACTIVELY INVOLVED IN MEDICAL SOCIETY ACTIVITIES AT THE LOCAL (FRANKLIN COUNTY) AND STATEWIDE LEVELS**

- o **DEVELOP UNIVERSITY HOSPITALS AS A DIRECT PROVIDER OF SERVICES TO STATE, LOCAL AND FEDERAL GOVERNMENT EMPLOYEES, AS WELL AS TO LOCAL BUSINESSES**

LOCAL AREA STRATEGY

PRINCIPAL STRATEGY:

ESTABLISH AN OSU CONTROLLED OR AFFILIATED NETWORK OF PHYSICIANS AND AMBULATORY SERVICE CENTERS WITHIN FRANKLIN COUNTY AND IN SELECTED NEARBY POPULATION CENTERS.

RATIONALE:

OSU HOSPITALS AND CLINICS MUST MAINTAIN THE APPROPRIATE MIX OF PRIMARY, SECONDARY, TERTIARY PATIENTS REQUIRED TO SUPPORT CLINICAL TEACHING ACTIVITIES AND MAINTAIN FINANCIAL VIABILITY. PRIMARY AND SECONDARY PATIENTS MUST COME FROM AN AREA GEOGRAPHICALLY PROXIMAL TO COLUMBUS. COMPETITIVE CONSIDERATIONS, INCLUDING ALTERNATIVE DELIVERY SYSTEM CONTRACTING, DICTATE THAT THE NETWORK SERVING THIS LOCAL AREA BE OWNED AND CONTROLLED BY OSU. THIS GEOGRAPHICALLY DISTRIBUTED NETWORK OF PHYSICIAN AND AMBULATORY CARE SERVICES IS ESSENTIAL TO PROVIDING THE ACCESSIBILITY AND CONVENIENCE NECESSARY TO ATTRACT PATIENTS. WHILE THIS "OWNED AND CONTROLLED" STRATEGY FOR THE LOCAL AREA IS NOT WITHOUT RISK, IT IS BASED ON A REALISTIC ASSESSMENT OF THE PRESENT SITUATION: THAT PRESENT PHYSICIAN ALIGNMENTS AND REFERRAL RELATIONSHIPS ARE SUCH THAT THE POTENTIAL LOSS OF PATIENT REFERRALS AS A RESULT OF DEVELOPING THIS NETWORK IS SMALL.

DIRECTIONS:

o LOCATION AND SERVICE MIX

- PHYSICIAN, DIAGNOSTIC AND TREATMENT SERVICES MUST BE BROUGHT TO PATIENTS—NOT VICE VERSA.
- A DETAILED PLAN MUST BE DEVELOPED TO ASSURE THAT THE RIGHT MIX OF SERVICES ARE PROVIDED IN THE APPROPRIATE LOCATIONS. THIS WILL PRINCIPALLY REQUIRE A FRANKLIN COUNTY NETWORK, BUT OTHER NEARBY POPULATION CENTERS MAY ALSO BE CONSIDERED IF THE RISK OF SUBSTANTIAL LOST REFERRALS IS SLIGHT.
- THE EXISTING MED OHIO SYSTEM CAN SERVE AS A BASIS FOR THIS NETWORK—BUT IT WILL REQUIRE SUBSTANTIAL GROWTH AND CHANGE BEFORE IT WILL MEET OSU'S NEEDS.
- THIS NETWORK MUST, BY FIRST PRIORITY, BE COMPETITIVE WITH NON-TEACHING COMMUNITY SERVICES, WHILE STILL SUPPORTING OSU'S EDUCATIONAL PROGRAMS WHENEVER FEASIBLE.

O EXISTING PHYSICIANS

- QUALIFIED PHYSICIANS CURRENTLY PRACTICING IN THE LOCAL AREAS SHOULD BE ENCOURAGED TO JOIN THE OSU NETWORK.
- OSU SHOULD ASSIST PHYSICIANS SEEKING TO TRANSITION THEIR PRACTICES AND ASSURE THAT THE NEW PRACTICES ARE PART OF THE NETWORK.
- OSU MUST GIVE HIGH PRIORITY TO THE FUNDS REQUIRED TO EXPAND THIS CONTROLLED AREA NETWORK—WITHOUT IT, FUTURE CLINICAL INCOME AND PATIENT VOLUME WILL BE SHARPLY CONSTRAINED.

O REFERRAL RELATIONSHIPS

- BECAUSE OF EXISTING HOSPITAL-PHYSICIAN ALLIANCES, IT WILL BE DIFFICULT TO ATTRACT A SIGNIFICANT NUMBER OF REFERRALS FROM NON-NETWORK PHYSICIANS FOR SERVICES WHICH ARE AVAILABLE ELSEWHERE IN COLUMBUS.
- FOR THOSE TERTIARY SERVICES CURRENTLY LEAVING COLUMBUS, REFERRAL RELATIONSHIPS SHOULD BE CULTIVATED.
- CME AND ALUMNI RELATIONS PROGRAMS CAN BE USED TO BUILD AND STRENGTHEN PRODUCTIVE REFERRAL RELATIONSHIPS.

O CME AND ALUMNI RELATIONS

- EVERY EFFORT SHOULD BE MADE TO MAINTAIN GOOD RELATIONS WITH PHYSICIAN COMPETITORS IN THE COLUMBUS AREA. OSU CAN STILL SERVE AS ONE OF THEIR REFERRAL OPTIONS FOR TERTIARY/QUATERNARY SERVICES.
- CME, SPEAKER'S BUREAUS AND ALUMNI RELATIONS PROGRAMS CAN BUILD BRIDGE TO PHYSICIANS.

O MEDICAL SOCIETY PARTICIPATION

- ACTIVE PARTICIPATION BY A GREATER NUMBER OF OSU FACULTY IN THE ACTIVITIES OF THE ACADEMY OF MEDICINE OF FRANKLIN COUNTY REPRESENTS AN OPPORTUNITY TO INCREASE OSU PHYSICIAN VISIBILITY AND BUILD PHYSICIAN-TO-PHYSICIAN CONTACTS WHICH BECOME THE BASIS FOR FUTURE REFERRALS.

O HOSPITAL SUPPORT SERVICES

- NON-COMPETING HOSPITALS CAN BENEFIT FROM THE SKILLS AND EXPERTISE AVAILABLE AT OSU, AND OSU SHOULD CULTIVATE THIS POTENTIAL DEMAND.
- CONTRACTS FOR SERVICE SHOULD BE ACTIVELY SOUGHT.

OSU

HOSPITALS AND CLINICS

REFERRAL AREA STRATEGY

PRINCIPAL STRATEGY

ENHANCE THE HOSPITALS' COMPETITIVE POSITION BY STRENGTHENING RELATIONSHIPS WITH ALL PHYSICIANS IN THE DEFINED REFERRAL AREA (BEYOND THE GREATER COLUMBUS AREA) TO INCREASE TERTIARY REFERRALS, AND SEEK TO ESTABLISH A REGIONALIZED HEALTHCARE DELIVERY SYSTEM MODEL WITH OSUH SERVING AS THE HUB OF THE SYSTEM

DIRECTIONS

- o CREATE, MANAGE AND MONITOR CONSUMER- AND PHYSICIAN-ORIENTED REFERRAL PROGRAMS
- o FUND AGGRESSIVE ALUMNI AND POST-GRADUATE RELATIONS PROGRAM THROUGHOUT THE STATE OF OHIO
- o INCREASE AND STRENGTHEN CME ACTIVITY ON AND OFF CAMPUS FOR PHYSICIAN AND ALLIED HEALTH PERSONNEL THROUGHOUT CENTRAL OHIO
- o DEVELOP CONTRACTUAL SERVICE ARRANGEMENTS WITH OTHER CENTRAL OHIO HOSPITALS IN ORDER TO FOSTER INTERHOSPITAL RELATIONSHIPS, LOYALTIES, AND ALLIANCES
- o CONSIDER THE ESTABLISHMENT OF A STRONG RELATIONSHIP WITH ONE OR MORE REGIONALLY-BASED MANAGED CARE PLAN(S) TO ENHANCE REFERRALS TO THE MEDICAL CENTER

REFERRAL AREA STRATEGY

PRINCIPAL STRATEGY:

ENHANCE THE HOSPITALS' COMPETITIVE POSITION BY STRENGTHENING RELATIONSHIPS WITH ALL PHYSICIANS IN THE DEFINED REFERRAL AREA (BEYOND THE GREATER COLUMBUS AREA) TO INCREASE TERTIARY REFERRALS, AND SEEK TO ESTABLISH A REGIONALIZED HEALTHCARE DELIVERY SYSTEM MODEL WITH OSUH SERVING AS THE HUB OF THE SYSTEM.

RATIONALE:

TO BE A "TOP 10" MEDICAL SCHOOL NATIONALLY, OSU MUST HAVE A SUCCESSFUL, HIGHLY-VISIBLE SPECTRUM OF TERTIARY SERVICES, AND SUFFICIENT PATIENT VOLUME TO SUPPORT THESE COSTLY SERVICES. THE AREA IMMEDIATELY SURROUNDING COLUMBUS WILL NOT PROVIDE ALL OF THE NEEDED VOLUME; THE AREA OF CENTRAL OHIO BETWEEN 50 AND 150 MILES FROM COLUMBUS SHOULD ALSO BE CONSIDERED A PRIME REFERRAL AREA. OSU CURRENTLY HAS A STRONG POSITION IN THIS AREA, BUT IS UNDER SIGNIFICANT COMPETITIVE PRESSURE. TO OBTAIN REFERRALS FROM PHYSICIANS IN THIS AREA, OSU MUST NOT BE PERCEIVED AS COMPETITIVE WITH THEM, BUT RATHER AS SUPPORTIVE OF THEIR ACTIVITIES.

DIRECTIONS:

o PHYSICIAN REFERRAL PROGRAM

- OSU NEEDS A COMPREHENSIVE PHYSICIAN REFERRAL PROGRAM, WHICH IT CLEARLY DOES NOT HAVE AT PRESENT.

- SIGNIFICANT COMMUNICATIONS PROBLEMS EXIST WITH PHYSICIANS IN THE REFERRAL AREA, ALTHOUGH OSU'S PERFORMANCE VARIES BY REGION AND SPECIALTY.
- PHYSICIAN RELATIONS PROGRAMS MUST BE TARGETED AND EXECUTED TOWARD SPECIFIC GEOGRAPHIC AREAS.
- EXTENSIVE FACULTY INVOLVEMENT AND SUPPORT IN DEVELOPING STANDARDS OF PERFORMANCE AND APPROPRIATE MONITORING SYSTEMS WILL BE ESSENTIAL FOR SUCCESS.
- AGGRESSIVE FOLLOW-UP AND MONITORING OF PERFORMANCE IN BUILDING CONSTRUCTIVE PRACTICES WILL BE REQUIRED.

O ALUMNI RELATIONS

- OSU COLLEGE OF MEDICINE ALUMNI REPRESENT A LARGE---AND GREATLY UNDERUTILIZED--- ASSET.
- EXISTING PROGRAMS DO NOT CAPITALIZE ON MANY OF THE REFERRAL OPPORTUNITIES WHICH EXIST.
- A SIGNIFICANTLY ENHANCED EFFORT WOULD RETURN GREAT ECONOMIC BENEFITS.

0 CONTINUING MEDICAL EDUCATION

- OSU IS UNIQUELY POSITIONED TO CONDUCT CONTINUING EDUCATION PROGRAMS FOR PHYSICIANS AND ALLIED HEALTH PROFESSIONALS ACROSS A BROAD GEOGRAPHIC AREA.
- SUCCESSFUL CME PROGRAMS WILL STRENGTHEN REFERRAL RELATIONSHIPS.

PART A

COLLEGE OF MEDICINE
AFFIRMATIVE ACTION STRATEGY

**AFFIRMATIVE ACTION
STRATEGY**

COLLEGE OVERVIEW

The College of Medicine is committed to the goals and objectives of Affirmative Action as outlined by President Edward Jennings in the fall of 1987. The plan which follows intends to bring about a significant increase in the number of underrepresented minorities (Blacks, Mainland Puerto Ricans, Mexican-Americans and Native Americans) as students, staff and faculty of the College of Medicine. It should be made explicit that, over the next three to five years, our efforts in the affirmative action arena will be directed toward recruitment and retention of Blacks.

The most recent figures on Black faculty indicate that 1.8% of all medical faculty in United States Allopathic Medical Schools are Black (950 of 52,464).¹ Of these 950 faculty, 225 are found in the historically Black colleges of medicine (Howard, Meharry and Morehouse). At the present time, The Ohio State University College of Medicine is at 2.2% (10 of 457). While this percentage is better than the national figure, we can take little comfort. We must work actively and aggressively to increase the numbers through a three part strategy:

One, increase the numbers of Black and other underrepresented minority medical graduates; two, increase the number of Black and other underrepresented minority housestaff; three, by a combination of national recruitment and retaining our graduates and housestaff, (1 and 2 above), increase the number of Black and other underrepresented minority staff and faculty.

Students

In an initial attempt to increase the number of available minority M.D.'s, the goal of The Ohio State University College of Medicine Affirmative Action Program is to increase the number of minority student graduates of the College of Medicine. Efforts have been directed toward four major objectives to accomplish the project goal. The objectives are: 1) identify and motivate minority students interested in medicine and provide them with information about the appropriate preparation for medical school; 2) enhance the competitiveness of minority premedical students for their admission into medical school; 3) improve the college retention rate for minority medical students; and 4) provide students with financial aid information and assist minority students in securing financial aid.

¹ Minority students in Medical Education: (Facts and figures III). Association of American Medical Colleges, March 1987.

The recruitment component is very closely linked with the component to disseminate financial aid information. The Ohio State University College of Medicine Recruitment Facilitator serves as both recruiter and financial aid officer. Most recruitment presentations involve a session on financial aid information. The Recruitment Facilitator also meets with students at all levels of the educational pathway to provide these students and their parents with financial aid counseling. The Recruitment Facilitator's primary emphasis of recruitment is on undergraduate minority students. The Retention Facilitator and other College faculty and staff serve to add recruitment efforts at the junior high school and high school levels. Recruitment activities take a variety of forms including presentations at schools, on-campus visits by groups and individuals, and work with community and alumni groups to get others involved in recruitment. We have continued College and University premedical program visits, presentations at post-baccalaureate programs, and efforts to develop strong on-campus networks that will enable minority premedical students to access The Ohio State University College of Medicine Health Careers Opportunity Program to facilitate entry activities.

There are presently 124 minority students at The Ohio State University College of Medicine, including Black (46), Hispanic, (7) and Asian (71) students. The retention support services are offered to all levels of students but are primarily focused on the first-year class. The 1987 entering medical school class at the College enrolled 16 Black students, 3 Hispanic students, and 23 Asian students. A minority student orientation was planned by the minority student organization during the first week of classes. The Retention Facilitator offers learning strategies and a test taking skills course for Fall and Winter terms. This material is also offered on an individual basis for students, particularly for students in academic difficulty. Students are referred to these study skills development programs after each examination if their performance is not adequate. The College of Medicine staff, as well as College faculty, monitor student performance and encourage students to utilize academic support services that are a part of the curricular program. The College of Medicine counseling services are designed to handle academic and nonacademic concerns. Study groups are organized by students and staff. Learning resources consist of course reference materials, supplemental books and manuals, board preparation review books, practice test booklets, and previous in-house examinations.

The Summer Pre-Entry Program consists of especially designed courses developed for gross anatomy, learning strategies, neuroanatomy, and physiology by Pre-Entry Program faculty. Gross anatomy was offered as a lecture and laboratory for 6 hrs/wk for eight (8) weeks. Learning strategies was offered for 2 hrs/wk for five (5) weeks. Neuroanatomy and physiology were each offered for 4 hrs/wk for four (4) weeks, one following the other. Biochemistry 511, a regular University course, was available as an alternative to gross anatomy or physiology. No students chose to take Biochemistry 511. However, the Academic Support Programs Director assigned independent study reading in biochemistry and reviewed this material with a few students on an individual basis. Students were also offered computer-assisted instruction in biochemistry and physiology to be done on an individual basis. Also medical student offered cardiopulmonary resuscitation (CPR) for the summer program students.

In addition to basic science course work, non-academic components to the summer program were offered. An orientation program was provided to acquaint students with faculty, staff, and other students and to introduce students to the program. Students were also provided counseling sessions on anxiety reduction, time management and interpersonal skills. Meetings with other medical students were arranged for discussion as to the best way to gain the most benefit from the summer program and expectations in medical school. Students were also assigned a preceptor with whom to work.

The College of Medicine assisted the Student National Medical Association (SNMA) in planning and sponsoring the first College of Medicine Black Alumni Reunion. The staff assisted the SNMA students in writing a proposal for University funds to sponsor the reunion. The grant proposal was approved for funding in July 1987 and plans were made to hold the reunion in September 1987 in conjunction with the College reunion. Involvement with Black college alumni and community physicians was initiated. Three committees were formed: program, communications, and finance. The main events of the alumni reunion weekend were a presentation/discussion on minority health, continuing education programs, and a scholarship/awards banquet and program. Forty Black alumni of the College attended the reunion and over 200 were in attendance at the scholarship/awards banquet and program. In addition, SNMA members are producing a document on the history of Black medical education at the College of Medicine. Columbus corporations have been contacted for contributions to the scholarship fund and a scholarship drive is planned to obtain funds from alumni and others.

Goal:

Although the College intends to reduce the number of entering medical students by 2% per year for five years, there will be a commitment to enroll at least fifteen black and other underrepresented minority students per year.

	<u>1988</u>	<u>1989</u>	<u>1990</u>	<u>1991</u>	<u>1992</u>
<u>Minimum Goal</u>	15	15	15	15	15
<u>Ideal Goal</u>	20	20	20	20	20

Financial Resources needed:

\$50,000 of new continuing funds in the College of Medicine Financial Aid Scholarship account for each of the next four years.

As shown in appendix one, 991 Black Americans matriculated into U.S. Allopathic Medical Schools in 1987. This represents 6% of all matriculants in 1987. The College of Medicine matriculated 16 Black Americans into its first year class in 1987, a percentage of 7%. Our goal will allow us to achieve between 7 and 10 percent total enrollment of Black and other underrepresented minorities in the College by 1992. Also, in appendix one, is a projection by the Student Financial Aid Office which shows the needed scholarship dollars to support the Colleges matriculation goal.

Residents and Fellows

The residency training program offers an opportunity for the recruitment and training of Black physicians in preparation for academic positions. At present we have 16 Black and other underrepresented minority housestaff members from among 445, equalling 3.6%. This strategy involves identification of candidates with the appropriate qualifications and interest with the goal of "grooming" minority trainees for a career in academic medicine. The structure will work through the existing match process to make the appropriate placement.

Goal:

To select at least eight new Black and other underrepresented minority residents/fellows in each year of the match program starting in 1989.

	1989	1990	1991	1992
<u>Minimum Goal</u>	8	8	8	8
<u>Ideal Goal</u>	10	10	10	10

Resources Needed:

In order to facilitate the hiring of minority physicians into Fellowship positions, we will:

Actively Pursue through the Provost's Office for 1/3 salary lines.

We are requesting that Fellowship lines in Clinical Departments be included in the Provost's Office definition of new faculty. We will use minority Fellowship appointments as another pathway in the faculty development model.

Doctoral Candidates (non-M.D.)

In addition to regular student of the College of Medicine, most basic science department have a number of graduate students who are candidates for the degree, Doctor of Philosophy. On an average, twenty such candidates are granted their Ph.D. degree by the College of Medicine each year. (See graph under Appendix II)

One hundred forty-four Ph.D. candidates are currently enrolled in College of Medicine departmental programs. Of these, seventy-four are women (51%). Of the 116 who are citizens of the United States, ten are Asian/Pacific Islanders (8.6%), two are Black (.017%), and one is Hispanic (.009%). (See departmental charts in Appendix II).

These figures are important to the overall affirmative action goals of the College of Medicine as many faculty in the basic science departments hold the degree, Ph.D., and these students are potential basic science faculty members.

The goals of the College of Medicine are to keep the percentage of women at its current high rate while increasing the numbers of Blacks and underrepresented minorities by the following:

	<u>1988</u>	<u>1989</u>	<u>1990</u>	<u>1991</u>	<u>1992</u>
<u>Minimum Goal</u>	1	1	1	1	1
<u>Ideal</u>	2	2	2	2	2

Faculty

Faculty recruitment and retention strategies developed by departments and units in the College of Medicine and Health Services showed a great deal of concern for increasing the numbers of women and underrepresented minorities through the College's Faculty Recruitment Programs. Almost all Departments point out that the applicant pool is not sufficient to enable them to identify or recruit a sufficient number of females or Blacks. The worst case is illustrated by the Department of Otolaryngology and the Department of Pathology (see attached departmental appendices). Dr. David E. Schuller, Chairperson of the Department of Otolaryngology reports;

National statistics from AAMC indicate that Black faculty in Otolaryngology is represented by 0%. The American Speech and Hearing Association reports that in 1986 there were 5500 clinically certified Audiologists, with 96.2% being white and 1.2% Black, with the remainder being other minorities.

Dr. Donald Senhauser, Chairperson of the Department of Pathology reports equally grim data:

Thus, in any one year, no more than 5-7 Black pathologists enter the pool for positions in the 120 academic pathology departments. Nearly all of these become concentrated in the predominantly Black medical schools, for example Meharry and Howard Universities.

Departments have put a number of strategies into effect to compensate for the insufficient applicant pool. It is safe to reiterate that the most effective strategy for all disciplines is that of increasing the numbers of underrepresented minorities matriculating into and graduating from our College of Medicine, and then recruiting minorities for our residency training programs with the hope and intention of nurturing them through their training and convincing them to make The Ohio State University their academic home.

Many other strategies have been proposed and are in current use by various Departments. The Department of Ophthalmology employs the following strategy:

The strategy involves identification of a specific candidate with appropriate qualification and probably availability, the location of adequate funding sources, and the tailoring of existing departmental capabilities and interests so as to match these three essentials to the goals of advancing knowledge in a selected, very important subject and developing an important future member of the Department.

The Department of Physiology, and other Departments place recruiting responsibilities on all faculty members attending national and regional professional meetings. Dr. Wood describes their strategy as follows:

The Department registers with the placement services of various national meetings and members of the departmental faculty are charged with canvassing the conventions for likely minority candidates.

Other Departments, such as Ophthalmology, emphasize encouraging candidates for faculty positions to seek outside funding sources to augment their research efforts. The Robert Wood Johnson Minority Medical Faculty Development Program was mentioned as one funding source. A number of Departments cite making personal contact with coordinators of residency programs in their specialty and inquiring about qualified minority candidates. Special emphasis is put on nurturing relationships with administrators and faculty members in the three traditionally Black colleges of medicine.

The College of Medicine intends to monitor closely the progress of minority faculty members through their chosen career track and make every effort to retain faculty. Affirmative Action Officers in each Department and the Associate Dean for Academic Affairs are charged with this responsibility.

Currently, there are ten Black faculty members in the College of Medicine, the total full-time faculty of which numbers 457. This yields a percentage of 2.2. While this is above the national average of 1.8%, the College will strive to meet the following goals:

	<u>1988</u>	<u>1989</u>	<u>1990</u>	<u>1991</u>	<u>1992</u>
<u>Minimum Goal</u>	3	3	3	3	3
<u>Ideal</u>	5	5	5	5	5

At the end of five years, this increase in faculty members from underrepresented minorities, would bring our total to 25 faculty members (minimum goal) and 35 faculty members in the ideal scenario. Given that faculty size is projected to grow only minimally, this would mean that the percentage of Black faculty would then equal 5.2% if the minimum goal were attained and 7.3% should the ideal goal be reached.

Staff

Departments and special units report 632 positions in the following categories: (03) professional/non-faculty, (04) clerical/secretarial, and (05) technical/paraprofessional. Of these positions 50 are held by Blacks, and 44 are held by other minorities. Women comprise 458 of the 632 positions, or 73%. Blacks comprise approximately 7% of the 632 positions. (Please see Staff Positions Chart in Appendix IV).

While these figures are fairly heartening, the Colleges hopes to improve both the numbers of Blacks and other minorities over the next five years.

Blacks	<u>1988</u>	<u>1989</u>	<u>1990</u>	<u>1991</u>	<u>1992</u>
<u>Minimum Goal</u>	3	3	3	3	3
<u>Ideal</u>	5	5	5	5	5
Other Minorities	<u>1988</u>	<u>1989</u>	<u>1990</u>	<u>1991</u>	<u>1992</u>
<u>Minimum Goal</u>	2	2	2	2	2
<u>Ideal</u>	3	3	3	3	3

By meeting this minimum goal, within five years, Blacks in staff positions would equal 10 % and other minorities would equal 8.5%, if professional/non-faculty, clerical/secretaries, and technical/paraprofessional employee numbers remain fairly constant.

Monitoring and Reviewing

Each Department shall have an Affirmative Action Officer who will monitor all Search Committees and review recommendations for appointment, including civil service and administrative and professional appointments, against the current minority census and the five year goals of that Department, before an offer is extended to any candidate. The Affirmative Action Officer shall report to his or her Department Chairperson, the affect of each appointment on the short and long-range goals of that Department.

In the case of faculty appointments, whether they be tenure track appointments or not, the recommendations of the Search Committee shall be conveyed to the Associate Dean for Academic Affairs, with a written narrative describing the impact of this appointment, in light of the current minority census of the Department and the short and long-range goals of that Department. The Associate Dean for Academic Affairs shall have the oversight responsibility for the Affirmative Action plan for the College, as a whole, and will judge the efficacy of each and every appointment against the goals of the College. No formal offer shall be made before approval has been granted by the Associate Dean for Academic Affairs.

The Associate Dean for Academic Affairs shall also have the responsibility of monitoring the retention of members of underrepresented groups and will follow closely their timely progress through the promotion and/or tenure process.

The Associate Dean for Academic Affairs will also have the responsibility of conveying to the Vice President for Academic Affairs and Provost the Departmental and College progress toward meeting our Departmental and College goals, on an annual basis.

The Chief Fiscal Officer shall be responsible for monitoring Administrative and Professional and Civil Service appointments in light of the goals of the College.

In the case of student admission and retention goals, the Associate Dean for Student Affairs, the Director of Admissions, and the Associate to the Dean for Student Affairs shall all have responsibility for monitoring admission and retention data in light of the goals of the College. Graduate students (Ph.D. candidates) shall be monitored by both the Department Affirmative Action Officer and, ultimately, by the Associate Dean for Academic Affairs.

Monitoring the progress toward attaining the goals of the College for women and underrepresented minorities in residency programs shall be the responsibility of the Associate Dean for Clinical Affairs and Medical Director of University Hospitals. This individual approves all residency contracts and is thus in the best position to monitor and report these goals.

Resources Needed

In order to facilitate the hiring of minority faculty, we will:

Actively pursue funds available from the Provost's Office for 1/3 salary lines. Use vacant lines available in departments and loan 2/3 of lines to departments which do not have any available lines. These will be repaid by the next vacant line of the department.

We have requested start-up funds for minority faculty in our one-time equipment requests for this budget year.

We will continue to use Total Resource Management to fund this high priority of affirmative action. This includes using resources from practice income, release time, other research funds, development funds, as well as other University sources.

PART B

UNIVERSITY HOSPITALS
EQUAL OPPORTUNITY/AFFIRMATIVE ACTION POLICY

THE OHIO STATE UNIVERSITY HOSPITALS
EQUAL OPPORTUNITY/AFFIRMATIVE ACTION POLICY

PURPOSE OF POLICY

To provide guidelines for Equal Employment Opportunity by means of an Affirmative Action Program.

POLICY STATEMENT

The Ohio State University Hospitals policy of equal opportunity is founded on sound business judgement and the basic belief in respect for all individuals. It has been both the traditional and current policy of the Hospitals to extend to all individuals equal access to employment opportunities, programs and other activities without regard to race, color, religion, sex, national origin, handicap or age.

GENERAL POLICY OBJECTIVES

- To achieve and maintain a racially diverse workforce by encouraging appropriate employment levels of Black and other underrepresented groups by way of valid recruitment and selection practices. All hiring goals will be determined based on the availability of qualified minority candidates in the Columbus area, Central Ohio and nationally.
- To eliminate artificial and overtly discriminatory practices affecting minority group members by examining all personnel action requests and enforcing the use of validated employment practices.
- To establish accountability and responsibility for Affirmative Action Plan implementation through regular performance appraisal. Special plan initiatives will be directed towards Administrative, Managerial and Supervisory levels where hiring, training, promotions, assignment, compensation and disciplinary action decisions are made.
- To promote harmonious employee relations by further developing personnel policies and fair employment practice, increasing employee awareness of Affirmative Action initiatives and developing training programs to insure fair and equitable treatment of minority staff.
- To build a more positive environment by communicating the social and business ramification resulting from an effective affirmative action program.

PROCEDURE

Purpose: To describe the procedures necessary to achieve the objectives of the Affirmative Action Plan.

I. HUMAN RESOURCE ACTIVITIES

A. Recruitment

All applicants regardless of race, color, religion, sex, national origin, handicap or age will be considered for employment opportunities in accordance with the Hospitals Appointment of Staff Procedure, #2-02-21. In addition, the following guidelines will be adhered to:

1. The Office of Hospital Human Resources will, on an annual basis, establish numerical goals to correct instances of minority underrepresentation within the various EEO categories. These goals will serve as benchmarks for recruitment efforts focused primarily at the Administrative, Managerial and Professional levels.
2. The statement, "The Ohio State University Hospitals is an Equal Opportunity/Affirmative Action Employer," will be used in all advertisements placed in journals, newspapers and other periodicals for recruitment purposes. In addition, prospective employees will be notified of our equal employment philosophy via the employment application form and signs posted on the bulletin boards.

B. Internal Promotions

The Ohio State University Hospitals maintains a policy of promotion from within pursuant to the provisions of Chapter 124 of the Ohio Revised Code. All eligible and qualified staff will receive consideration for job vacancies without regard to race, color, sex, religion, age, or national origin. Areas within the Hospital which indicate underutilization of minorities will receive good faith efforts when promotional opportunities are available.

C. Training and Development

The Hospitals will establish and vigorously pursue programs to include the protective groups in training and development. Plans to stimulate career interest and growth opportunities are encouraged; such plans may include course study, rotational job assignments, OSU Professional Development Program activities and other self-development assignments consistent with individual needs.

II. COMMUNICATION OF EQUAL EMPLOYMENT OPPORTUNITY POLICY

The Office of Hospitals Human Resources will take appropriate steps to insure that all personnel know of the Hospitals commitment to honor Equal Employment Opportunity/Affirmative Action principles in all of its personnel and business-related activities. General EEO information will be communicated in or on:

- Bulletin Boards
- Employee Handbook/Orientation
- Policy and Procedure Manual
- Pulse Publication
- Management Council/Supervisory Group Meeting
- Training and Development Programs

III. AFFIRMATIVE ACTION PROGRAM RESPONSIBILITIES AND ACCOUNTABILITIES

A. Administrator, Human Resources

The Administrator for Human Resources will be responsible for the general administration of the plan. Further, this individual will be accountable for the continued review of all Hospital policies, employment practices and procedures pertaining to Affirmative Action and will make recommendations consistent with equal employment opportunity development.

B. Members Administrative Group, Management Council and Supervisory

All Hospital administrators, managers and supervisors shall adhere to the policy and the intent of the Affirmative Action Plan by accepting responsibility for all applicable policy initiatives, goals, and timetables affecting their areas.

C. Office of Hospitals Human Resources

The Office of Hospitals Human Resources will be responsible for program planning, analysis and compliance activities as it relates to Affirmative Action. In addition, this office will serve as a liaison between the Hospitals and the University's Office of Human Relations, the Affirmative Action Advisory/Policy Subcommittee, enforcement agencies, minority/womens groups, disability groups and other community organizations.

IV. INTERNAL MONITORING AND REPORTING SYSTEM

In order to insure that the Affirmative Action Plan is being met, the following internal evaluation and reporting system has been implemented:

- The Office of Human Resources will continually monitor records of referrals, placements, transfers, promotions and terminations at all levels to assess whether they are consistent with our Affirmative Action initiatives.
- Formal reports regarding Affirmative Action activities will be disseminated to the Hospitals Administrative Group on a quarterly basis to determine the degree to which the Hospitals goals and objectives are being met. A year-end report will be prepared on an annual basis outlining plan accomplishments and recommendations.
- The Hospitals Affirmative Action Plan will be updated on an annual basis with a revised workforce analysis, recruitment/development goals and specific activities designed to achieve these goals. Copies of this plan will be distributed to the Hospitals Executive Director, Administrative Group, and the Office of Human Relations for review.

APPENDIX VII

STRATEGIC PLANNING AT THE OHIO STATE UNIVERSITY
AN UPDATE
November 23, 1988

(See page 366)

STRATEGIC PLANNING AT THE OHIO STATE UNIVERSITY
AN UPDATE
November 23, 1988

I. Background

This University currently is among the top institutions of higher education in the country. In fact, we can accurately say, among the top in the world. Some of our departments already rank among the best at any university. Faculty in other departments have the potential and desire to be on the cutting edge of instruction and research in their field. With careful long-range academic planning, these faculty can have the support necessary to reach their professional goals.

Successful long-range planning is a cooperative effort. This institution is much too large in scope for centralized academic planning to be effective. We CAN, however, set certain institutional goals. For example, in the last few years we have increased our expectations in the areas of faculty scholarship and instructional performance. But the criteria by which scholarship is measured may, quite correctly, vary from discipline to discipline. The Office of Academic Affairs relies on individual colleges and departments to assist us in determining what these differences in evaluation should be.

During the summer of 1987, the Office of Academic Affairs initiated a formal strategic planning process at the Ohio State University. While many departments and colleges had been engaged in strategic planning for some time, there had not been until that point any systematic effort to coordinate the planning across the university and to relate the college and departmental planning efforts to one another and to the budgetary process.

There are three key overall objectives of the Ohio State strategic planning activity:

- (1) through a formal strategic planning process, the university, colleges and departments can best identify the steps that will lead to the Ohio State University moving into the ranks of the nation's pre-eminent public universities by the turn of the century.
- (2) through a coordinated planning process, the Office of Academic Affairs will be in a better position to help colleges and departments to work more closely together, to take best advantage of one another's strengths and resources, and to avoid ineffective redundancy of programs;
- (3) with clearly articulated and justified plans, the Office of Academic Affairs will be in a position to simplify the budgetary process and to maintain consistency in budgetary allocations over time.

The strategic planning effort was formally launched with a presentation to the Dean's at a retreat in September, 1987. Similar presentations were made to college Executive Committees during the Autumn of 1987. The year since the strategic planning effort was initiated has seen a continuing refinement and sharpening of the concepts and processes of strategic planning as they are most appropriate to the Ohio State University.

It is a truism that while Ohio State is a comprehensive research university, we cannot be all things to all people. The purpose of long-range planning is to allow us to sort through the many possibilities and identify those that bear most centrally on our mission. Moreover, in order to have the resources to accomplish our goals, we must identify which efforts we can no longer support. While our programs cannot continue to grow in size and number indefinitely, they can continue to develop in distinction and productivity if we use our resources wisely.

Let us stress the word "programs". There is no contemplation that departments or colleges will cease to exist. Their roles in providing instruction and research in the broadly defined academic and professional disciplines will persist. What will change is the content of these disciplines, what is to be emphasized and what is no longer relevant, what is relevant to modern society and what is not.

II. Concepts and results

A number of issues need to be addressed at the beginning of long-range planning. The initial question we must ask ourselves is: Where are we now?

That is, where are the program's current strengths and weaknesses, defined against the backdrop of the field in general?

What is the scope of the research, instructional, and service programs? What is missing that is essential to any major program or that would make a strong program more distinguished?

This brings us to the second fundamental question we must ask ourselves: Where do we want to go?

First, what is expected of the program, as an academic unit of a major research university? What are the central areas of focus in the field, and what are the peripheral areas? The answers to these questions are determined largely by the consensus of the academic

field nationally, but there may be local considerations that give a program a special flavor.

Second, which are the best programs in this field in the country and the world? What makes them the best?

Third, where do we see the field going? Which areas have peaked and which are just now beginning to attract attention? What interdisciplinary developments are beginning to emerge that will require the combined efforts of a number of programs?

In effect, these kinds of questions all bear on the same fundamental issue: Where must we be if the department is to be one of the best?

In other words: Where are we now, and where do we want to go?

Finally there is a third natural, fundamental question: How do we get there?

What specific steps can we take to move the program forward? What are the available and projected resources? What are the contingencies that must be considered?

What new programs should we be planning now for development over the next few years? What interdisciplinary efforts could be productive?

The three fundamental issues, then, are: Where are we now? Where do we want to go? How do we get there? The essential point of the long-range planning process is to get us into the habit of regularly engaging in long-range THINKING. There are no simple answers to these fundamental questions, and most importantly, the answers change over time. Through long-range thinking, we constantly review our current state, our resources, our future directions, while we make decisions that affect our ability to achieve our objectives.

Let us finally consider the potential outcomes of long-range planning. There are many units that have been carrying out such planning for some time. The fruits of their efforts are significant, and we can learn from their successes. The following example is illustrative of what we can achieve.

The Department of Physics has been fortunate to attract a Nobel Prize winning scientist to its faculty. While there is no

doubt that fortune plays a role in achieving such a success, it is important to realize that the ability of a department to attract such a distinguished individual is the outcome of careful, long-range planning.

Five years ago, the Physics department developed a plan. There were four main components. First, certain key areas were identified for programmatic development, and the decision was made to deemphasize and phase out other areas. Second, the commitment was made to bring in only the very best people, regardless of the temporary difficulties that might result. Third, the commitment was made to facilitate the development of junior faculty, those in whom the future of the department would lie. And finally, there was an explicit recognition that this department would move aggressively to seize on "golden opportunities" whenever they arose, regardless of the directions laid out in the programmatic plan.

Every major departmental decision since that time has been made with close attention to the key strategic issues facing this department: Where are we now, where do we want to be, and how do we get there. Even (or should we say "especially") at the level of junior appointments, the Physics department carefully considered the qualifications of applicants in all relevant areas. In several years, no offers were made even though there were available positions, because there were no suitable applicants. One outcome of this careful process is that this year three junior members of the Department of Physics won prestigious Presidential Young Investigator awards.

By focusing their efforts in this way, the Physics department was able to compete successfully for an Academic Challenge award in the area of condensed matter physics. In order to compete for such an award, a department must identify areas of strength, and make the commitment to select a single area or small group of areas in which to build excellence.

Next, by building areas of strength, this department was able to compete successfully for an Eminent Scholar position in materials research and condensed matter physics. The individual who now fills this position adds additional distinction to an already strong department, and will enhance the productivity of his colleagues.

This brings us to the present. By careful planning, this department has created an intellectual environment able to attract a Nobel Prize winning physicist. Looking back, we can see a series of decisions, all based on long-range planning and demonstrating long-range thinking, that enabled the department to

take advantage of opportunities as they arose. This is the essence of long-range planning.

III. Organization of planning

Let us turn now to the organization of the planning process at the University. It is important to recognize that while the President and the Provost provide essential leadership to the University, the success of a planning process depends on the participation, the talent, and the enthusiasm of the faculty. It is the faculty who can best assess strengths and weaknesses, evaluate the competition, and evaluate the likelihood of success of various alternative strategies.

Effective long-range planning requires a clear understanding of not only the strengths and weaknesses of individual programs, but also a knowledge of how each program corresponds with the directions the field is taking nationally and internationally. This understanding and knowledge must come out of the college. Only at a level close to the activity of the departments can a determination be made of which programs are on the cutting edge of research and instructional innovation, and which should be downsized through attrition because they are no longer productive. Those programs that are a college priority will, in many cases, receive additional resources through reallocated funds.

In the academic arena, the overall objective of long-range planning is to identify ways in which the faculty can achieve excellence. It is the intent of the Provost and his staff to work with the faculty through the Deans, Directors, department chairs, and faculty groups to identify what their specific goals are, and how to reach them.

We cannot achieve University-wide goals of qualitative growth if we do not work together. While the Office of Academic Affairs can suggest guidelines for attaining academic goals, the most critical decisions must be made at the college level. The decisions made in these areas will determine the direction and quality of academic programs at this University well into the 21st century.

Thus, the college is a key unit in the planning process. Typically, the various academic programs that are carried out within a college have a certain affinity for one another, in that together they comprise a reasonably coherent intellectual area. Resources that can be identified at the college level often serve the needs of more than one program. For example, in the College of Humanities the Foreign Language Center provides a focus that ties together efforts in the many departments that are engaged in

foreign language instruction. Planning in this area concerning, for example, the introduction of computers into foreign language instruction, can be most effectively done at the college level. The ambition of the faculty involved with this Center is for Ohio State to enhance its reputation as one of the leading institutions in the area of language instruction, and to share in the pride and professional productivity that comes with such recognition.

There are in fact many intellectual areas that do not reside solely within a single department, but which cut across departments or even across colleges. In order to stimulate the development of such areas, the perspective from the college level is essential. Consider the example of the Advanced Computing Center for the Arts and Design, or ACCAD. The mission of this Center is to stimulate and carry out research on the use of computers in artistic creativity and instruction in the arts. The areas of the arts that have been and will be impacted by computing range from music to dance and theatre, and from studio art to photography and cinema. ACCAD already has a preeminent national reputation. The promise for the future consists not only of continuing success for the Center itself, but also a growing national reputation for the College of the Arts as a focus for groundbreaking work that applies new technologies to the task of artistic creativity. Again, the payoff for the faculty will be manifold, but perhaps most important will be the creation of an environment in which they can continue to grow in productivity and distinction.

While the college provides a necessary perspective, departments, of course, play a key role in the planning process. The University's continued march towards excellence will result in large part from the efforts of its many departments. For the vast majority of faculty, the department is their primary home. Being a member of a distinguished department is in itself a source of pride. Having outstanding colleagues and students makes us as faculty more productive and makes our work better and more satisfying.

IV. The role of faculty and administrators in planning

Another point that cannot be stressed too strongly is that faculty and administrators must develop a consensus in order for a planning exercise to be successful. Let us consider the example of the College of Dentistry. In 1981, the College of Dentistry had a strong clinical program, but only \$70,000 in external research funding. At that time, the college committed itself to an active role in the University's focus on excellence. It entered into a period of intense analysis during which decisions were made about how to achieve this goal. This was by

no means a painless process, but it was handled with insight and vision and the active involvement of faculty and administrators.

Faculty and chairpersons participated in meetings and retreats to identify college and section strengths and weaknesses, specific goals, and strategies for attaining these goals. Three key ideas that came out of these discussions were the interrelated needs to place a stronger emphasis upon research, to become more thoroughly integrated into the rest of the campus, and to increase external funding.

The Section of Oral Biology was targeted for development as a research-oriented program. This section received three new positions from the Provost and eight positions were reallocated to Oral Biology from within the college. Across the college, teaching loads have been adjusted to facilitate faculty involvement in research. There has been a strong effort to ensure that clinical and research faculty complement each other's efforts.

What have been the results of these changes? The college now has 33 faculty collaborating with researchers in 55 departments across the campus. That \$70,000 in external funding in 1981 has grown to around \$2.5 million a year, twice the national median for dental schools of one and a quarter million dollars per year. And equally dramatic, student performance has improved by all national measures.

The College of Home Economics is already in the midst of a similar activity of overall assessment. College administration and departmental administrators and faculty have taken a hard look at current and projected resources. They have begun the process of deciding which departments would show the greatest qualitative growth if infused with additional resources. As these departments further enhance their reputations, they will attract growing numbers of top faculty and students, and increased external funding. Their reputation for excellence will strengthen both the college and the University as a whole.

Each college must determine the planning process that will be most effective in building qualitative growth in its academic programs. This is a difficult, but ultimately rewarding challenge. As we all know, our current and projected resources place very real limitations on quantitative expansion. Fortunately, the quality of the faculty and researchers on this campus gives Ohio State a strong base as we plan for the University's future. Wise decision making today will ensure that tomorrow Ohio State will be on the cutting edge of teaching and research.

**A Framework for Strategic Planning
at The Ohio State University**

**Office of Academic Affairs
The Ohio State University
October 1987**

1. Introduction

The long-range goals that we are now setting for ourselves are these: to be the finest university in the Big Ten, and to be one of the top five public universities in the United States. The purpose of the current planning process is to set out a strategy for attaining these goals by the turn of the century.

The intended immediate product of the planning process is a comprehensive plan for each of the academic units of the University, and for those units that serve the academic units. Once arrived at, such plans will be revised and reevaluated on a yearly basis, and will guide the allocation and reallocation of resources that constitute the budgetary process. It is expected that a similar global planning process will take place after about five years.

Conventionally, the definition of strategic planning takes the following form: the process of deciding on objectives of the organization, on changes in these objectives, on the resources used to attain these objectives, and on the policies that are to govern the acquisition, use, and disposition of these resources. The call for University-wide strategic planning does not mean that the University will engage in central planning of academic programs. Rather, the purpose of a University-wide strategic planning process is to engage all relevant units in the planning process, so that future directions may be mapped out intelligently, so that resources may be allocated to meet anticipated needs, and so that unanticipated opportunities may be recognized and taken advantage of. What constitutes a relevant unit from the point of view of planning will be discussed later.

Some general principles that are intended to guide the planning process are discussed in section 2. Section 3 takes note of the resources that should be assumed. Section 4 provides some suggestions on how to implement a planning process within an

academic unit. Section 5 describes interim planning reports requested of Deans¹ prior to the submission of full plans. Section 6 provides some guidelines for plans.

As discussed here, the term academic planning refers directly to instruction and research, the business of the academic programs. Non-academic planning must be taken into account in regard to the implementation of academic plans, because of the interrelationships between the academic and many of the non-academic functions of the University.

2. General principles

At the very foundation of our thinking about academic planning are these four ideas.

The first is that *the University is essentially an academic institution*. The main business of the University is instruction and research, and service to the extent that it flows naturally from the instructional and research missions. All activities of the University, be they overtly academic or non-academic, must be examined in light of what effects they may have on the quality of the academic programs.

The second idea is that *the overriding goal of the University is to build quality throughout*. This University has the opportunity to be truly outstanding across a wide range of disciplines and programs, through the wise disposition of its resources. The planning process is intended to help us meet that goal.

The third idea is that *while considerable, resources are finite*. Therefore it is necessary to set

¹For simplicity, in this document the term Dean is used to refer to all those who submit annual reports directly to the Office of Academic Affairs.

priorities, through careful planning. The planning process will interact intimately with the budgeting process; budgetary proposals should implement agreed upon long-term plans.

The fourth is that *in order to set priorities well, it is necessary to have good data, in the form of program review and evaluation.* Program evaluation is essential to a determination of the strengths and weaknesses of a program. It provides indispensable input to the determination of what changes and additions need to be made to a program. It provides a way of determining what constitutes quality, and when quality has been achieved. A rigorous and demanding review process makes the goal of excellence a realistic one for every program.

These central ideas lead us to several relevant points:

Resources should be allocated in the context of a plan. The annual budgeting process should be a working out in detail of the broader objectives that emerge from long-term planning.

Plans provide the framework in which the value of opportunities can be developed. It is very important that plans be flexible and open-ended. Plans should allow for reordering of priorities when unforeseen opportunities arise. They should allow for entirely new undertakings when new possibilities emerge. They should provide alternatives where appropriate. It is in the nature of the academic enterprise that things continue to change, sometimes quickly. We should not lock ourselves into plans that are no longer productive.

Every current decision must be examined carefully in the context of long-range objectives. We must begin now to evaluate every hiring decision,

every tenure decision, every decision bearing on programmatic emphasis or deemphasis, every decision to allocate space, with the following question in mind: What decision will take us furthest towards our goal of being the best?

Non-instructional areas must be evaluated and planned as part of academic planning. It is not the case, of course, that every activity of the University is intimately associated with the academic programs. But there are many relationships, and they are significant. The creation, acquisition and allocation of space, for example, while not strictly academic functions, have enormous implications for the feasibility of implementing particular academic programs of high quality. Similar observations hold for the libraries, computing services, student services, financial support of graduate students, etc.

On a more concrete level, we stress that the planning process is a cooperative one between the programs, the Deans, and Academic Affairs. The more carefully we think through the basis on which we allocate resources, the more impact will those resources have. The planning process is intended in part to bring forward those areas of the University that are already excellent or that have a very real opportunity to achieve genuine excellence in the coming five- to ten-year period. The ordering of priorities is not set in advance by the Provost in the absence of review, evaluation, and serious planning by academic units with opportunities for greater distinction.

The close involvement of the Deans in setting priorities is crucial. The process of resource allocation must be a competitive one, with the most exciting opportunities and the most pressing needs given the highest priority in the University overall. But middle-level priorities will also receive

particular attention, in that they will be provided with seed resources. Seeding of relatively many such middle-level priority items, and subsequent evaluation of their relative success, will help to determine which initiatives will move to the top further along in the planning process.

3. Resources

In many cases the implementation of plans will require new resources, in the form of personnel, space, and equipment. It is realistic to assume that the resources available to the University from the state will not grow significantly in the foreseeable future. It is expected, for example, that state funding will constitute a constant or slightly declining percentage of the resources available to the university. Therefore the resources needed for the implementation of plans must be generated through internal reallocation.

In order to add new programs, and to add new strength to existing programs, it will be necessary to identify resources that now have marginal or peripheral effect, and redirect them to areas where they will have greater impact. Such redirection may occur within a program, a department, a college, or at the level of the University, depending on the circumstances. The decision as to what resources to redirect and where to redirect must be based on careful review and evaluation, and priorities must be set. It will not be possible for us to do everything that we are now doing, and at the same time move forward into new efforts.

In formulating plans, Deans should not be bound by any specific budgetary constraints. Significantly, while the total amount of available resources is limited, such limitations should not be imposed on the units involved in the planning. The present objective is to determine what we would do and what the priorities are. How much will be possible can only be

determined subsequently. It should be understood, of course, that only the highest priorities can be addressed at any one time.

As noted earlier, the annual budgeting process will be tied closely to the planning process. In practical terms, what this means is that permanent resources for a particular purpose can be made available only if that purpose is demonstrated to be consistent not only with priorities, but with quality (excellence) as determined by program evaluation, and with planning as set out by a careful strategic planning process.

The demand for instruction created by short-term enrollment shifts will be met by temporary funding, not permanent funding. Where enrollments cannot be met without compromising on academic quality, it may be necessary to engage in enrollment management planning.

4. Planning mechanisms

The goal of the planning process is the development of a comprehensive academic plan for the University. As part of the University-wide planning process, Deans will be asked to design planning mechanisms appropriate to their Colleges. In this section we describe as an example several planning mechanisms that Deans may wish to modify as they see fit.

Deans will be asked to provide to the Provost descriptions of their planning mechanisms by January 1, 1988.

4.1. Planning units

From the point of view of the Office of Academic Affairs, the planning units are the colleges. It is the Deans who submit annual budgets to the Provost, and these budgets must be tied to plans developed for the colleges. Similarly, the Provost allocates resources to the Deans, who then

determine their distribution. Individual Deans must therefore decide what approach to planning would be best suited to their individual colleges.

One key question to be answered before developing a planning mechanism is what are the relevant planning units within the college. In some colleges, there may be no internal structure sufficiently well-developed to justify decentralizing the planning further. In others, the departmental structure may be strong in general, but there may be broad interdisciplinary concerns that transcend the departmental structure. In still others, the Dean may wish to rely closely on the departmental structure.

4.2. Example - Departmental planning

Each departmental unit reporting to the Dean is asked to prepare a plan according to a format specified by the Dean. The department chairperson works out a planning structure for the department in consultation with the Dean. There should be provisions for review and evaluation of plans within the college. One suggestion is that the entire set of plans be reviewed and evaluated by two advisory committees, one composed of senior faculty, and the other of chairpersons. A faculty Planning Advisory Committee could meet with a representative of each program, and subsequently forward recommendations to the Dean.

4.3. Example - College planning

The Dean forms a Planning Advisory Committee that formulates a comprehensive plan for the college, in consultation with departments. The draft plan is circulated to all faculty for comments, and hearings are held. The rationale for such an approach is that in a given college, there may be many intellectual and resource issues that cut across departmental lines. New

developments within a number of fields might be most comprehensively addressed at the level of the college.

5. Reports from Deans

On the basis of input from individual programs, from advisory committees and from other sources, the Dean should prepare an overall plan for the College. The overall plan should summarize the development plans for the individual units where relevant, and make clear the general resource implications. It is not necessary in this summary plan to provide a detailed discussion of what went into arriving at the particular decisions, but particularly salient opportunities, problems, trends, etc. should be taken note of. We would expect a final plan to contain about two to four pages for each distinct program.

Since we are at the very beginning of the strategic planning process, several progress reports are requested.

5.1. Input to the enrollment planning model

The initiation of a long-term strategic academic plan will require the better part of a year, beginning in 1988. There is, however, a short term planning issue that can be addressed immediately: enrollments. During Fall 1987 the Provost's Office will solicit information from all academic units concerning the extent to which they already carry out enrollment planning and the parameters according to which enrollments can be predicted. As far as the latter is concerned, there are several types of information that may be relevant: (i) identification of service obligations with respect to a known student population, (ii) discipline-wide data on effective student/faculty ratios, students/section ratios, students/laboratory ratios, etc., (iii) known correlations between prerequisites and enrollments (e.g. the effect of math

Strategic Planning

prerequisites on enrollments in elective courses), (iv) comparisons with other institutions. Such information will be incorporated into an independent enrollment planning study.

5.2. Resource inventory

Also during Fall 1987 the Provost's office will identify and verify available data that the academic units will need to take into account during the planning process. These items will include data on enrollment trends, equipment, space usage, and financial commitments. The data will be provided to the units to assist their planning efforts.

5.3. First progress report, January 1, 1988

This report should contain the following:

- (1) A summary of immediate identifiable needs, projected over five years.

There are certain high priority needs of programs that do not require a complex planning process in order to be identified. These needs should be addressed as soon as possible. The cost of meeting these needs over the five year period should be identified.

- (2) Identification of striking opportunities, for example in the form of individual recruiting objectives.
- (3) Summary of significant enrollment trends within the College, and indication of anticipated impact on its academic programs.
- (4) Outline of the planning mechanisms adopted for the College.

- (5) Summary of ongoing planning efforts.

5.4. Spring 1988 budget process

The curriculum review will have been enacted during the Winter quarter of 1988 for piloting in 1988-1989. Full implementation will occur in 1989-1990. Planning for enrollments, identification of future curricular needs, identification of capital equipment necessary for present new courses, etc. should begin in Spring 1988, so that we are prepared for the Spring 1989 budget process.

5.5. Second progress report, July 1, 1988

This report should consist of a brief memo updating the status of the planning process within the College.

5.6. Strategic Plan, December 1, 1988

This should be the annual version of the Strategic Plan for the College. It will be referred to during the budgeting process for the coming academic year that takes place in the Winter and Spring quarters. Subsequent revisions of strategic plans are due in the Provost's office every year on December 1.

Planning hearings will be scheduled each January to review with Deans their plans and priorities. These planning hearings will be structured like the budget hearings, with the participation of the same individuals. The focus of these hearings will be the broad, long-term planning issues facing the academic units and the University.

By instituting planning hearings, it will be possible to remove future long-term plans from the Annual Reports. These

Annual Reports will refer to the strategic plans, and lay out the details of how those plans will be implemented.

The structure and scope of a typical strategic plan is set out in the next section.

6. The Strategic Plan

Here is a set of questions and topics that should be addressed in a strategic plan, if relevant. These are organized in a way that suggests a format in which strategic planning documents may be presented. Deans should feel free to provide the information in a way that is most convenient for them, along these general lines. A summary outline is given in Appendix A.

The Strategic Plan should be a concise document. It should focus on essentials. A plan from a college ought not to exceed twenty-five pages, single-spaced.

I. Overview (mission)

What is it that the program expects to do and is expected to do, as an academic unit of the University? In certain cases the answer is determined largely by the consensus of the academic field nationally, in other areas the answer is determined in part as well by the demands for public service, for professional education, and by student (consumer) expectations.

This section should be addressed to the intelligent and critical non-specialist. It should inform the reader in concise and non-technical terms what the unit's mission is .

A. Thematic definition of the program

What is the subject matter that the program is concerned with? Is the field

characterized by a special methodology that distinguishes it from others working on similar problems? What are the central areas of focus in the field, and what are peripheral areas?

B. Undergraduate education

What is the program's mission in regard to undergraduate education? What role does the program play in general education? Does the program have a service obligation to supply certain courses for majors in other programs? What does the typical major end up doing after graduation?

C. Graduate education

What is the program's mission in regard to graduate education (Master's and Doctoral level)? Does the program make a service contribution at the graduate level to other programs? What are the employment options for graduates?

D. Research

What are the major research areas covered by the program?

E. Public service

What are the public service expectations of the program?

II. State of the field

A. Evaluation of the best of the field

What are the five or so best programs of this type in the country? Describe them briefly - how big are they, what is their coverage of the field, why are they so highly ranked?

B. Identification of future trends

Where do you see the field going? External reviews that have already occurred or that are ongoing as part of the evaluation process are often useful sources of forecasting perspectives.

1. Research

What are the areas that have peaked? What are the areas of traditional importance that are no longer central? What are the areas that are just now beginning to attract attention that we need to keep track of? What interdisciplinary developments are beginning to emerge that will require the efforts of a number of programs? Where will extramural funding be focussed in the next five years?

Please give some rationale for your statements. It is useful here to take note of pending or published studies, surveys, and reports from task forces, panels, foundations, national organizations, etc.

2. Enrollments

What have the trends been nationally? Where do you see them going? Why? Please cite published studies where possible. How dependent is the graduate enrollment on external funding (e.g., grants, fellowships, etc.)?

III. *Strengths and weaknesses of the program*

Please provide an evaluation of the program's strengths and weaknesses. Reference to internal and external reviews is essential where they are available. Reference to studies by national panels, etc. is very relevant; strengths and weaknesses are, in part, defined against the backdrop of how a particular field views its mission.

IV. *Plan for program development*

Given the above analysis, what steps would you take to move the program forward? Here it may be necessary to identify groups of initiatives, ranked according to priority and feasibility. (For example, we might be able to move up rapidly if we make three appointments in area X, but only if Dr. J is available. Otherwise it would be more sensible to make one appointment in area X and two in area Y.) You may find it useful to review the plans of units with members of the external committee involved in the program evaluation process for the program, if the evaluation occurred within the last two or three years.

Plans for program development are relevant within departments, within colleges, and across the University. Colleges should examine their current allocation of resources, and plan for reallocation between units in order to maximize the effectiveness of resources, whether or not new program funds are available. College-level planning is essential for the development of new interdisciplinary programs, for the optimal allocation of resources to departments and for the best use of resources when a number of programs within the college have similar faculty, equipment or staffing needs.

A. New programs

What new programs would you plan now to develop over the next five years? To what extent will existing faculty be sufficient, to what extent will replacements of retiring faculty be sufficient, and to what extent will new resources be required? What interdisciplinary efforts would you want to be involved in that would involve units not under your jurisdiction?

B. Merging or phasing out of programs

What existing programs would you now hypothesize should be merged or phased out over time? It is important to stress that the formulation of such a hypothesis is not an irrevocable decision; it may simply involve for the near-term the decision to delay putting new resources into it, to delay replacing individuals who resign or retire, etc. In such a case, what would the timetable for review be, and when would an irrevocable decision have to be made? What would be the consequences of such a decision?

In other cases, the decision to merge or phase a program out may be more concrete. What is the basis for this decision? What is the fate of tenured faculty who are still associated with the program? If there are such people, consideration must be given to helping them to be as productive as possible, as discussed below in section D, Faculty Development.

C. Faculty recruitment

What categories of faculty expertise would you seek, in priority order? Why? If there is a realistic immediate target of opportunity, who is it? How would new faculty fit into the existing structure?

D. Faculty development

What opportunities are there for making better use of existing faculty resources? Are there faculty members whose productivity can be improved by refocussing their efforts? Here there are many possibilities that may or should be entertained, including: (i) assigning primarily teaching and service functions to faculty with a concern for being productive but who are not capable of quality research; (ii) giving faculty the opportunity for reeducation and refocussing for teaching

and research, either through professional leave, research leave, released time, or in-house faculty seminars (perhaps led by distinguished visiting faculty).

E. Affirmative action

Please refer to the assessment of the current state of the unit regarding the number of women and minorities on the faculty, in the graduate student ranks and in the undergraduate population, compared to the available pools. In this light, what concrete steps will you take to address imbalances, over the long-run? If an affirmative action plan has already been developed, it is sufficient to refer to that plan.

F. Research development

What are the prioritized plans for developing new research emphases? How do these plans fit into (i) current activities in the program, (ii) efforts at the University in other programs? What do you expect to deemphasize or phase out?

V. Impact on resources

Indicate the expected resource demands that would be tied to carrying out your plan, and the resources that are currently available or will be available in the foreseeable future. (Indicate the timetable.) Relevant categories include:

A. Personnel

What auxiliary personnel will be required if a particular effort that is now in the planning stage is successful? This category includes research personnel, technicians, secretarial staff, etc.

B. Equipment and operations

In some areas it is possible to predict with some accuracy the cost of setting up new faculty and new areas of research. Such costs must be explicitly identified as part of the planning process. They include not only equipment costs, but other operational costs, such as supplies, software, etc.

C. Space

What specific space requirements will result if a particular effort now in the planning stage is successful? To what extent is the program able to provide the needed space from current resources?

VI. Sources

What resources do you plan to reallocate in order to make these long-plans possible?

Specifically, what resources would be reallocated from areas or faculty positions that you have identified as marginal to the mission of the unit, no longer central to the field, or of less than acceptable quality? What is the extent of the resources that would be freed up, and what is the timetable for doing so?

VII. Background

Please indicate how the plan was developed, who wrote it, etc. Indicate who was consulted outside of the program and outside of the University, if relevant.

Comments or questions regarding this document should be addressed to Dr. Peter W. Culicover, Associate Provost for Planning, Office of Academic Affairs, 203 Bricker Hall, 190 North Oval Mall.

Plan Format

I. Overview

- A. Thematic definition of the program
- B. Undergraduate education
- C. Graduate education
- D. Research
- E. Public service

II. State of the field

- A. Evaluation of the best of the field
- B. Identification of future trends
 - 1. Research
 - 2. Enrollments

III. Strengths and weaknesses of the program

- A. Faculty quality
- B. Curricular comprehensiveness
- C. Scope of research programs
- D. Public service
- E. Comparison with the best
- F. Affirmative action

IV. Plan for program development

- A. New programs
- B. Merging or phasing out of programs

APPENDIX VIII
CAPITAL BUDGET REQUEST
(See page 379)

FISCAL AFFAIRS COMMITTEE

Item for Discussion: Capital Budget Request

BACKGROUND

The University is at the initial stages of updating the capital plan for Ohio State as a basis for submitting capital budget needs for six fiscal years 1991-96, to the Board of Regents' in July 1989. This session will review the overall capital needs and describe the schedule and process to be followed in updating the six year capital plan over the next seven months. Provided as background is a summary of the current capital plan as presented to you in August of 1987, with the projects designated which have been funded by the State.

Capital Plan 1989-1994

**Prepared By
The Office of Campus Planning & Space Utilization**

August 1987

Principles for Capital Projects

June 1987

PRINCIPLES FOR CAPITAL PROJECTS

June 1987

There are five basic principles guiding the identification of capital needs that must be addressed in the next three biennia. To a large extent we have weighed these principles in the order in which they are listed. However, the interplay among the principles has resulted in certain projects receiving higher priority.

Academic Excellence and Start-up Facilities

- o The University has new opportunities for excellence. Distinguished faculty are being recruited with very particular space needs that must be met if the faculty are to be hired.
- o Some academic programs are limited in their development by inadequate and inappropriate space. Both the quality of the work done in these programs and the ability to hire distinguished faculty are decreased by current physical facilities.
- o Some academic disciplines have taken on new directions in scholarship and research. Space needs for these disciplines have changed, and new types of facilities need to be created.

Aging Physical Facilities

- o Many buildings are aging and require major renovation. The University must give high priority to general maintenance in the offices, classrooms, and laboratories of these buildings. In particular, many classrooms have inadequate ventilation, heating, and seating.
- o We have some space that is not well used because of its present configuration. This space, which includes storage areas and poorly shaped classrooms, could be converted into usable space at modest cost. One goal of this type of renovation is to create additional student study space across campus.

Requirements for Use of New Technology

- o Classrooms need to be readied to take advantage of new instructional technology, including both computer support and video projection. Instructional laboratories require updating.
- o Across campus many classrooms, laboratories, and offices need to be wired for future use of computing equipment.

Library and Other Collections

- o The University has great resources in its libraries and other collections. To a large extent, these collections are crowded and in other ways inadequately housed.

Matching for Gift Monies

- o Increasingly, the University has the opportunity to benefit from large gifts for new buildings and for additions to existing buildings when it can add matching money to the gifts.

PL9394

**The Ohio State University
Capital Plan
State Funding Request
1989-1994**

The Ohio State University
Capital Plan
State Funding Request
Fiscal Years 1989-1994

The Ohio State University requests for state appropriated capital improvement funds in the period 1989 through 1994 are based upon careful study of its facility needs. In arriving at these requests, both the program needs as well as the physical condition of the facilities housing these programs have been reviewed.

While a large portion of this plan is for the renovation and renewal of facilities, some new facilities are required to meet current program needs. Demolition of several buildings will offset a large portion of the space added by new construction. The plan also includes projects required to assure the University's prominent roles in the evolving programmatic thrusts of Bio-technology, High-technology, and Computer and Information Sciences.

The total of Ohio State's request for the three biennia is \$356.5 million. \$136.3 million is requested in the 1989-90 biennium. Highlights and comments on the 1989-90 biennium capital request are as follows:

- a. Nearly \$12 million is for projects which are the second phase of current projects. These include Hamilton Hall Renovation-Phase II (\$8,300,000), Derby Hall-Phase II (\$2,575,000) and Classroom Building-Phase II (\$850,000).
- b. The Library Book Warehouse (\$3,100,000) will provide compact storage and preservation space for 1.5 million volumes. This is in line with the recommendations of the Regents' Library Study Committee.
- c. The Evans Lab Addition is a small wing to house modern research facilities for the Department of Chemistry. This is the first phase in the rehabilitation of McPherson Lab. The present facilities are deteriorated and it has been difficult to attract and keep outstanding chemistry faculty.
- d. The Bioscience/Parks Hall Addition is another project required to house modern teaching and research facilities relating to instrumentation, biohazard and cell culture laboratories. This will permit the joint use (Colleges of Biological Sciences and Pharmacy) of very sophisticated equipment required to support modern instruction in the biosciences programs.
- e. The Drees Lab Addition will provide a central facility for Computer and Information Sciences (CIS). They are now housed in four separate buildings. This project is essentially a replacement for the Welding Engineering Building and the Communications Lab since the occupants will use space vacated by CIS.
- f. Funds are requested for the rehabilitation of Mendenhall Lab. This 82 year old building requires major rehabilitation if it is to continue to function as a teaching and research facility for Geology and Mineralogy.

Other projects within the six year plan include several buildings relating to the consolidation of departmental libraries and to improving the

projects listed for the 1989-90 biennium (the Library Book Warehouse, the consolidation of the Pharmacy and Biological Sciences Libraries in the Bioscience/Parks Hall Addition and the Law Building Addition project) the Capital Plan contains the construction of a new Main Library and the renovation of the Health Sciences Library.

The Plan includes several rehabilitation projects which require phasing the construction. Due to the lack of space to temporarily house occupants of the buildings undergoing renovation, the buildings need to be partially occupied during the construction stage. These include Derby Hall, Hamilton Hall, B & Z Building, McPherson Lab and Smith Lab.

PROPOSED CAPITAL IMPROVEMENT PROJECT DESCRIPTION
(1989-90)

1A. GENERAL UTILITIES & RENOVATIONS -- COLUMBUS	\$13,000,000
(SEE ATTACHED LIST FOR PROJECTS)	
1B. PCB TRANSFORMER REMOVAL	\$8,000,000
REMOVE AND REPLACE 173 PCB TRANSFORMERS TO MEET FEDERAL EPA REQUIREMENTS	
1C. UTILITIES & RENOVATION -- REGIONAL CAMPUSES	\$1,000,000
(SEE ATTACHED LIST FOR PROJECTS)	
1D. UTILITIES & RENOVATION -- ATI	\$250,000
(SEE ATTACHED LIST FOR PROJECTS)	
1E. UTILITIES & RENOVATION -- OARDC	\$500,000
(SEE ATTACHED LIST FOR PROJECTS)	
1F. ASBESTOS ABATEMENT	\$2,000,000
THIS IS FOR ADDITIONAL FUNDS TO REMOVE AND/OR CONTAIN ASBESTOS MATERIALS BEYOND THOSE ALLOCATED BY THE OBR FORMULA.	
2. DERBY HALL RENOVATION - PHASE II	\$2,575,000
RENOVATE SELECTED AREAS TO ACCOMMODATE CHANGES IN OCCUPANCY. INSTALL CENTRAL HVAC. UPGRADE ELECTRICAL AND PLUMBING SYSTEMS. REPLACE ROOF AND WINDOWS. PHASE I WAS FUNDED LAST BIENNIIUM.	
3. HAMILTON HALL RENOVATION - PHASE II	\$8,300,000
REPLACEMENT OF OBSOLETE MECHANICAL/UTILITY SYSTEMS IN 60 YEAR OLD BUILDING AND REMODELING OF TEACHING/RESEARCH LABORATORIES. THIS IS A TWO PHASE PROJECT. PHASE I WAS FUNDED LAST BIENNIIUM.	
4. DENTAL INSTRUCTIONAL LAB RENOVATION	\$3,000,000
THIS PROJECT INCLUDES ENLARGING TEACHING CLINICS AND REPLACING FIXED EQUIPMENT TO CONFORM TO ACCREDITATION REQUIREMENTS. THIS PROJECT WILL BE SUPPLEMENTED WITH \$1.5 MILLION IN LOCAL FUNDS.	
5. LIBRARY BOOK WAREHOUSE	\$3,100,000
THIS FACILITY WILL PROVIDE COMPACT STORAGE/PRESERVATION SPACE FOR 1.5 MILLION VOLUMES AS WELL AS NEW QUARTERS FOR UNIVERSITY ARCHIVES.	
6. EVANS LAB ADDITION	\$4,100,000
CONSTRUCTION OF AN ADDITION TO EVANS LAB IN ORDER TO ACCOMMODATE EXISTING CRITICAL CHEMISTRY FUNCTIONS DURING THE REHABILITATION OF MCPHERSON LAB AND TO PROVIDE NECESSARY RESEARCH SPACE.	

7. CLASSROOM BUILDING RENOVATION - PHASE II \$850,000
- THIS IS PHASE II OF THE PROJECT TO CONVERT THE CENTRAL SERVICES BUILDING TO CLASSROOMS AND UNIVERSITY BOOKSTORE.
8. BIOSCIENCE/PARKS HALL ADDITION \$20,325,000
- THIS PROJECT WILL CONSTRUCT AN ADDITION TO THE BIOSCIENCES BUILDING AND PARKS HALL TO HOUSE INSTRUMENTATION, BIOHAZARD, CELL CULTURE AND OTHER LABS, A VIVARIUM AND A COMBINED LIBRARY FOR PHARMACY AND BIOLOGICAL SCIENCES.
9. GREENHOUSE MODERNIZATION \$5,300,000
- THIS PROJECT WILL REPLACE THE 40 YEAR OLD S&Z GREENHOUSES AND CONSTRUCT A NEW GREENHOUSE, ANIMAL QUARTERS AND GROWTH CHAMBERS FOR BIOTECHNOLOGY.
10. EQUINE CENTER \$4,800,000
- THIS WILL PROVIDE AN ADDITION TO THE VETERINARY HOSPITAL TO ESTABLISH AN EQUINE TRAUMA UNIT. FUNDING WILL BE SUPPLEMENTED WITH \$1.5 MILLION IN PRIVATE FUNDS.
11. HEALTH CENTER ACCESS ROAD - PHASE I AND II \$9,900,000
- THIS PROJECT WILL CONSTRUCT AN EXIT RAMP FROM NORTHBUILD SR 315 TO CANNON - 9TH AVE. INTERSECTION AND WIDEN CANNON DRIVE FROM KING AVE. TO WOODY HAYES DRIVE.
12. DREESE LAB ADDITION \$15,450,000
- THIS PROJECT WILL CONSTRUCT AN ADDITION TO DREESE LAB TO HOUSE COMPUTER AND INFORMATION SYSTEMS AND ELECTRICAL ENGINEERING. THIS WILL BE A REPLACEMENT FACILITY FOR THE WELDING ENGINEERING BUILDING AND THE COMMUNICATIONS LAB.
13. MENDENHALL LAB RENOVATION \$11,300,000
- THIS PROJECT WILL BE A TOTAL REHABILITATION OF MENDENHALL LAB AND WILL INCLUDE THE ADDITION OF A NEW FLOOR IN THE BUILDING. THIS BUILDING HOUSES GEOLOGY AND MINERALOGY.
14. RIGHTMIRE HALL REMODELING \$4,500,000
- THIS PROJECT WILL COMPLETE THE CONVERSION OF RIGHTMIRE HALL INTO THE OSU BIOTECHNOLOGY CENTER.
15. SMITH LAB RENOVATION - PHASE I \$3,250,000
- THIS PROJECT WILL REMODEL SPACE FOR THE DEPARTMENT OF ASTRONOMY.
16. SISSON HALL RENOVATION \$2,820,000
- THIS PROJECT WILL UPGRADE UTILITIES AND REMODEL FACILITIES TO MEET ACCREDITATION REQUIREMENTS.
17. LAW BUILDING ADDITION AND RENOVATION \$7,500,000
- THIS PROJECT WILL BUILD AN ADDITION TO THE LAW BUILDING FOR EXPANSION OF THE LAW LIBRARY AND REMODEL THE EXISTING BUILDING. \$7.5 MILLION IN PRIVATE FUNDS WILL SUPPLEMENT THIS PROJECT.

AUGUST 31, 1987 REPORT

APPENDIX IX

1989-91 BIENNIAL BUDGET ACTIVITIES AND PLANS

(See page 379)

December 2, 1988

FISCAL AFFAIRS COMMITTEE (contd)

Item for Discussion: 1989-91 Biennial Budget Activities and Plans

BACKGROUND

The State is at the mid-point of the budget process for the upcoming 1989-91 biennium, where the Governor's staff are preparing the Executive Budget for presentation to the Ohio General Assembly in January 1989. For Ohio State this process started last April with work beginning on the University's biennial budget request to the Ohio Board of Regents. In July 1988, this request was submitted (copy attached which contains a summary on pages 1-9) followed by discussions between President Jennings and Chancellor Coulter in August. During September, the Board of Regents submitted their 1989-91 Biennium budget recommendation to the Governor, which is summarized in the attached materials prepared by the Regents' staff.

Discussion will deal with the time schedule until a budget is approved by the Ohio General Assembly and issues regarding the Regents' budget recommendation.

Revised 9-14-88

OHIO'S IMPERATIVES

OHIO IS IN A PERIOD OF INCREASINGLY RAPID SOCIAL, ECONOMIC, AND TECHNOLOGICAL CHANGE. OHIOANS NEED MORE AND BETTER EDUCATION TO UNDERSTAND AND MASTER THE FORCES PRODUCING SUCH CHANGE. THE NEED FOR MORE EDUCATION IS MOST OBVIOUS IN THE ECONOMIC SPHERE, BUT IT IS CRITICALLY IMPORTANT IN OTHER ASPECTS OF LIFE AS WELL.

THE 1990-91 BUDGET RECOMMENDATIONS OF THE BOARD OF REGENTS ARE MADE TO PROVIDE BETTER EDUCATION FOR OHIOANS.

TOMORROW'S INDUSTRIES REQUIRE HIGHLY SOPHISTICATED WORKERS: THREE OF FOUR NEW JOBS WILL REQUIRE POSTSECONDARY EDUCATION.

OHIO FACES A SHORTAGE OF SUCH WORKERS.

OHIO'S FUTURE WORKFORCE WILL, AND MUST, INCREASINGLY REPRESENT THOSE FROM MINORITY, POOR, BROKEN FAMILY BACKGROUNDS. THESE NOW ARE PEOPLE UNLIKELY TO ENTER COLLEGE OR SUCCEED THERE.

Census figures show that the total non-white population has been increasing from 8.2% of the total in 1960 to 11.1% in 1980. Steady increases are projected for the future.

OHIO'S IMPERATIVES -- CONTINUED

AMERICA'S NEW INDUSTRIES WILL EMERGE WHERE CORPORATE R & D IS DONE, ESPECIALLY
IF DONE CLOSE TO CENTERS OF UNIVERSITY RESEARCH.

OHIO'S CURRENT POSITION

OHIOANS HAVE BELOW AVERAGE LEVELS OF EDUCATION.

Based on 1990 census information, Ohio ranked 30th with 67% of its population having at least 4 years of high school. Ohio ranked 40th in the number of college graduates with 13.7% as compared to the national average of 16.2%.

OHIO'S MANUFACTURING WORKERS HAVE LESS EDUCATION THAN SIMILAR WORKERS IN OTHER STATES.

ONE MILLION OHIO WORKERS ARE JUDGED TO NEED RETRAINING.

RELATIVELY FEW OHIOANS GO ON TO COLLEGE AFTER GRADUATION FROM HIGH SCHOOL; THE EDUCATION GAP IN OUR WORKFORCE, IF NOT ADDRESSED, WILL CONSEQUENTLY GROW IN THE FUTURE. RECENT IMPROVEMENTS IN STATE EDUCATION AND R & D FUNDING ARE HELPING -- BUT OTHER STATES ARE MOVING AGGRESSIVELY TOO.

FOR A LONG PERIOD, OHIO HAS BEEN IN DECLINE.

- OHIO'S PER CAPITA PERSONAL INCOME IS SLIPPING RELATIVE TO THE NATIONAL AVERAGE.

(From rank 14, equal to national average in 1970, to rank 25, 5.6% below the national average in 1987.)

OHIO'S CURRENT POSITION -- CONTINUED

- OUR SHARE OF U.S. MANUFACTURING IS STEADILY FALLING.

According to the Census Bureau, as a percent of U.S. totals, Ohio's share of employees in manufacturing declined from 7.2% in 1967 to 6.0% in 1981. The share of value added and value of shipments has also been declining. In addition, based on the Hudson Institute Workforce 2000 Report, U.S. manufacturing as a whole will be a much smaller share of the U.S. economy with service industries gaining importance.

- OUR UNEMPLOYMENT RATE, RELATIVE TO U.S. AVERAGES, HAS BEEN RISING DURING EACH ECONOMIC CYCLE.

OHIO IS STILL WELL BELOW THE NATIONAL AVERAGE IN CORPORATE RESEARCH AND DEVELOPMENT AND IN UNIVERSITY SPONSORED RESEARCH. CONSEQUENTLY, INDUSTRIES THAT WILL SPRING UP AROUND NEW TECHNOLOGIES ARE UNLIKELY TO EMERGE IN OHIO.

In 1984, Ohio ranked 37th among the states in Federal research grants per capita to colleges and universities. Ohio's per capita share was 42% below the national average.

In addition, Cleveland Tomorrow has reported that from 1970 to 1985, U.S. industry had a 68% increase in R & D spending. Although the Great Lakes states reflected a 30% increase, Ohio showed virtually no change.

OHIO'S CURRENT INVESTMENT

HIGH TUITIONS AND LOW STATE SUPPORT - A RISKY COMBINATION

STATE APPROPRIATIONS PER STUDENT, 1987-88

- 18% Below National Average.
- Ranks 41st Among States, Even After the Increased Investments of the 1980's.

TUITION PER STUDENT, 1987-88

- 46% Above National Average.
- Ranks 7th Highest Among States.

TUITION PER STUDENT, 1985-86

Public 4 Year Campuses

- 41% Above National Average.
- Ranked 5th Highest Among States.

Public 2 Year Campuses

- 74% Above National Average.
- Ranked 5th Highest Among States.

COMBINED STATE APPROPRIATIONS AND TUITION PER STUDENT, 1987-88

- 3% Below National Average.
- Ranks 28th Among States.

MAJOR BUDGET THEMES

- STRONG BASE BUDGETS, REINFORCING AND BUILDING QUALITY - BETTER EDUCATION AT A FAIR COST

- ENHANCING ACCESS AND SUCCESS

- FOSTERING EXCELLENCE

- FOSTERING RESEARCH

- SERVING WORKERS' NEEDS
 - For Currently Displaced Workers
 - For A Lifetime of Changing Careers

**STRONG BASE BUDGETS
INSTRUCTIONAL SUBSIDY**

FUNDING IS NEEDED TO REDUCE THE STUDENT'S SHARE OF THE COST OF HIGHER EDUCATION. THIS IS EXPENSIVE. IT ADDS NOTHING TO COLLEGE AND UNIVERSITY BUDGETS, SINCE IT SIMPLY SHIFTS SOME OF THE BURDEN OF SUPPORT FROM STUDENTS TO THE STATE. BUT IT IS ESSENTIAL IF MORE OF OUR PEOPLE ARE TO BE PREPARED FOR THEIR FUTURES.

FUNDING IS NEEDED TO PRESERVE STABILITY AND QUALITY IN OUR INSTITUTIONS. STABILITY MEANS AN ATTRACTIVE ENVIRONMENT AND FUNDS TO GO FOR THE BEST FACULTY TALENT. IT ENABLES UNIVERSITIES TO SET, AND MEET HIGHER QUALITY STANDARDS. IT ALSO ALLOWS THE IMPROVEMENTS FUNDED IN PAST YEARS TO DEVELOP MOMENTUM AND PRODUCE SUBSTANTIAL IMPACT IN THE FUTURE.

THIS REQUIRES INCREASES ADEQUATE TO MEET COSTS OF INFLATION (E.G. RISING HEALTH INSURANCE) AND TO KEEP PACE WITH ACADEMIC JOB MARKET.

INCORPORATION OF SECOND ROUND OF ACADEMIC CHALLENGE FOR PERMANENT ENHANCEMENT OF QUALITY.

STRONG BASE BUDGETS - INSTRUCTIONAL SUBSIDY -- CONTINUED

ALLOWANCE FOR ENROLLMENT INCREASES OF 1.0 - 1.5 PERCENT.

A FINE TUNING OF THE SUBSIDY FORMULAS WILL PRODUCE STATE SUBSIDIES MORE PROPORTIONATE TO INSTRUCTIONAL COSTS ON VARIOUS CAMPUSES.

ACCESS AND SUCCESS

- **REDUCTION OF STUDENT SHARE FROM 41% NOW TO 35% BY 1991**

COST: \$ 50 Million 1990

\$110 Million 1991

Nothing done on campus will help those who cannot afford to get to campus. Public higher education must be affordable to all the public. Families need stability in fees if they are to plan effectively to support the education of their children.

- **INCREASES IN FINANCIAL AID**

- 60% Increase in Ohio Instructional Grant Support Over 2 Years, Targeted to Poor and Near-Poor Families. Significantly Reduces Their Dependence On Loans. Assists Students in Both Public and Private Institutions.
- New Single Parent Grant Program for Part Time Students.

- **TARGETED ACCESS PROGRAMS, COSTING \$38 MILLION FOR THE BIENNIUM**

- New Access/Retention Challenge Program.
 - Formula Funding to Support Additional Efforts by All Institutions.
- New Minority Graduate Opportunity Program.
 - Ohio's Response to the Nationwide Shortage of Minority Faculty.
 - Participation to Include Case Western and Dayton.
- Access Improvement
- New Early Intervention Program Aimed at Middle School Students.
 - Designed to Reinforce Motivation at a Critical Age.
 - Competitive Grants Available to Public and Private Institutions.
- New School/College Transitions Program Aimed at Senior High School Students.

ACCESS AND SUCCESS -- CONTINUED

- New Demonstration Laboratories.
 - To Bring Together All Concerned Agencies in A Community to Work On the Problems.
- Significant Increase in Developmental Education to Provide More Help to Ill-Prepared College Students.

FOSTERING EXCELLENCE

● CONTINUE A STRONG INVESTMENT IN SELECTIVE EXCELLENCE: \$80 MILLION

Eminent Scholar: Nine Additional Awards to Further Strengthen Superior Graduate Research Departments.

Program Excellence: Twenty-Two Additional Awards to Recognize and Enhance Outstanding Undergraduate Programs.

Academic Challenge: A Third Round of Programs on Every Campus.

Research Challenge: Additional Leverage to Increase Sponsored Research.

Productivity Improvement Challenge: A New Focus on Business and Industry Relationships with Two Year Campuses.

Supercomputer Center: Continued Support for A Center Quickly Achieving National Recognition.

Independent College Challenge: A Second Round of Awards for Outstanding Liberal Arts Programs.

Library Access System.

● ENHANCE UNDERGRADUATE EDUCATION

Build on Program Excellence Results with Undergraduate Education Enhancement, \$3 Million.

FOSTERING RESEARCH

- **SELECTIVE EXCELLENCE INITIATIVES**

 - Eminent Scholars

 - Research Challenge

 - Supercomputer Center

 - Library Access System

- **OHIO AEROSPACE INSTITUTE**

 - One Year of Administrative Support

 - Two Years of Fellowship Support

- **OHIO ACADEMIC NETWORK**

- **OHIO COUNCIL ON RESEARCH AND ECONOMIC DEVELOPMENT**

SERVING OHIO'S WORKERS

● ENHANCEMENT AND TARGETING OF PRODUCTIVITY IMPROVEMENT

- Focus on Building Relationships with Business and Industry.
- Support for Collaborative Regional and Statewide Projects.
- Support for Customized Credit Instruction.

THE OHIO STATE UNIVERSITY
1989-1991 BUDGET REQUEST

OVERVIEW

The Ohio State University, as Ohio's land-grant university, is committed to keeping higher education accessible, and holding tuition increases to the lowest possible levels is essential in maintaining accessibility. However, tuition levels are directly impacted by the degree of support provided by the State of Ohio. This University is in the midst of enhancing Ohio State's status not only as the flagship University of the State, but also creating a nationally recognized model for the leading universities of the 21st century. Such institutions will combine the comprehensiveness of a broad spectrum of high-quality programs with diverse student bodies and tuitions that maximize accessibility.

The emerging national and international preeminence of The Ohio State University can only be maintained during this crucial developmental period if State support is provided at a level similar to that of the 1985-87 biennium. This University cannot sustain excellence solely through student fees. The State must strengthen the instructional subsidy if Ohio State is to maintain its progress within the context of its land-grant mission.

This goal can be reached only with a partnership effort by the Regents, Governor, General Assembly, and University. Now is the time for this partnership to take the lead and establish the new standard for the model university for the twenty-first century. Ohio is in a unique situation since there is a single flagship university having the diversity and comprehensiveness so critical to the needs of the modern world as we move toward the next century.

Higher education is still unattainable for many Ohioans and, in particular, minorities who have low family income. Our minority students contribute to one of the University's greatest assets - diversity. We can ill-afford to lose this asset due to a lack of economic support; nor can the State of Ohio afford the loss of this untapped talent for leadership, creativity, and service. Among the middle classes, academic high-achievers are increasingly caught between rising education costs and the maximum income allowed to qualify for need-based financial aid. State funding for Ohio National Merit and National Achievement Scholarships will help insure that our academic achievers -- minority and majority students -- remain in Ohio for their education and their careers.

I. INSTRUCTIONAL SUBSIDY

For the 1989-91 biennium, the University's highest priority is once again full funding of the instructional subsidy model. Offering the highest-quality curriculum while maintaining accessibility to higher

education is a key component of our mission. Thus, we are most concerned about the student share increases since 1987. This share again soared to 40 percent during the current biennium, reversing a promising trend to lower the student share to 30 percent.

The subsidy model also must provide for salary levels which keep pace with other comparable institutions. The case for competitive salaries for faculty and staff members cannot be overstated. Ohio institutions must continue to attract faculty members who can contribute to the economic resurgence of this State and provide the academic quality that is required to attract the best and brightest students from Ohio, the nation, and the world.

Graduate and professional education are critical elements of this University's mission. The Graduate, Medical I, and Medical II instructional fee assumptions are far greater than the amounts actually charged by Ohio's public universities for students in these categories. For instance, at Ohio State, academic year 1988-89 annual resident instructional fees are \$2,283 for graduate students, \$3,924 for Medical I students, and \$4,785 for Medical II students. The assumed fees for fiscal year 1988-89 are \$4,247 for graduate students, \$6,821 for Medical I students, and \$7,571 for Medical II students. In light of the large disparities between the fees assumed and charged, we request that the Board of Regents lower these fee assumptions.

The nature of doctoral and professional programs at Ohio State and other universities has changed over the years. In an increasingly complex world, greater levels of knowledge, more sophisticated techniques, and increased specialization are necessary. As a consequence, it now takes much longer to complete a doctoral or professional degree program than it did several years ago. This phenomenon is not restricted to a few areas; it is occurring in most disciplines. Current rules of the Board of Regents do not allow subsidizing students who have already accumulated more than 200 credit hours towards their doctorates or for Medical I and II students beyond the 12-quarter limit. These rules, which have been in effect for many years, should be reexamined and an increase in the ceiling implemented to preserve program quality and provide for financial equity.

Another result of a more complex world is the heightened importance of libraries to colleges and universities. Library patrons must be able to access easily the information they require. The Ohio State University enthusiastically supports the Regents' initiatives for library automation. We see the need to move forward with comprehensive efforts to electronically link the catalogues of Ohio's university libraries as the first stage of integrating academic library resources. In addition, major acquisition needs for serials and journals, as well as books, require attention in the subsidy funding models. These costs continue to rise at a rate that exceeds 40 percent over the past two years. A related emphasis should be continued planning of computer-assisted library communication and establishing statewide access to on-line databases, perhaps through negotiations in which the Regents act on

behalf of all State universities to gain reduced rates from the information providers.

II. STUDENT ACCESS AND SUCCESS

The Ohio Board of Regents has argued for bold new steps in addressing accessibility of higher education for Ohio's youth. The Ohio State University proposes that the Board of Regents support the Young Scholars Program -- an innovative way to increase the pool of college-eligible minority youth.

The Ohio State University has established the Young Scholars Program to increase the number of Black, Hispanic, and other underrepresented minorities who obtain college degrees. This program identifies students during their middle school years and works with them to realize their academic and personal potential to the point of entry into college. A pilot program has begun with 200 minority youth from eight urban areas of the State. This summer, the youth who have just completed the 6th grade will have a two-week summer experience on the Columbus campus of The Ohio State University. This summer program will be part of their participation each year from the 6th through the 12th grades. In addition, each student will be assigned a community mentor to maintain contact with the student and his or her family, and to provide a link to the University. Students who participate fully in the Young Scholars Program and who satisfactorily complete a college preparatory high school curriculum, are guaranteed admission into The Ohio State University with an appropriate financial aid package.

The Young Scholars Program provides a model for expanding the pool of college-eligible minority youth in the State. It is our hope that the pilot program will be expanded to include 400 new sixth grade students each year beginning in fiscal year 1990. We request State appropriations of \$1.2 million in fiscal year 1990 and \$2 million in fiscal year 1991. This funding would support 600 students in fiscal year 1990 with 200 from the pilot project and 400 new students. The fiscal year 1991 request would fund 1,000 participants. There is every reason to believe that once the program has been piloted on The Ohio State University campus, the model could be readily replicated at a number of state-assisted campuses across Ohio.

The State of Ohio has the opportunity to move ahead aggressively to prepare the coming generation for State and national leadership through excellence and access in higher education. We must send a clear message to the minority population of Ohio that they should settle for nothing less than the full development of their talents and abilities. Our economy, our quality of life, and our hopes for the future rest on the initiation of effective measures for nurturing talent in our growing minority population. This proposal is a small beginning at moving into the 21st century as a state that embraces its entire population in a voice of pride, productivity, and purpose.

III. EXCELLENCE

The mounting intensity of global competition and the emergence of a true world economy underscore the vital role that will be played by excellence in research in the next decades. In the international economy of the future, America's competitive strength will not be based on inexpensive natural resources or low-cost manufactured goods. Instead, knowledge will be at the forefront of the new economic era.

For Ohio to be a successful competitor in tomorrow's economy, the strength and excellence of its academic and research programs in higher education is critical. This excellence must extend to all areas of education -- the humanities as well as business, the social sciences and education as well as engineering and the physical sciences. All areas of the University will be making contributions to the organization, interaction, and production of our global economy.

In this context, the role played by The Ohio State University within the State can be critical. This University is in a unique position due to its diversity of programs and extensive pool of talent and knowledge. We must serve as a pilot institution to help discover, coordinate, and disseminate methods, techniques, and facilities to our sister institutions.

The role of Ohio State in the Ohio Supercomputer project is one such example. Working cooperatively with other institutions throughout the State, this project is creating the most advanced Supercomputer facility in the nation. In return, this facility provides a major boost to research and computational capability for the academic and the business communities and significantly increases the caliber of talent that can be attracted to Ohio institutions and industries.

However, we cannot rest on our past successes. We must continue to recognize and develop new opportunities. We recommend support of a project at the University that could serve as a critical pilot effort that would be beneficial to the entire State. We propose the extension of excellence funding to implement the new undergraduate curriculum model at The Ohio State University. The University already has made considerable progress in defining the elements of this new program. Further refinement and implementation of such a massive undertaking, however, will involve costs beyond those incurred in the typical instruction program.

The new undergraduate curriculum will prepare citizens for an increasingly complex, technical, sophisticated, and international world. By nurturing students' capacity for effective communication, logical thinking, and critical analysis, the foundations for life-long learning to adapt to a changing world will be established. To achieve this objective has meant the development of a new curriculum and new courses, far beyond reshuffling of current requirements. The University has made major strides in this context.

We have been able to break some of the traditional boundaries between disciplines and focus on the total educational experience. The extensive breadth and expertise of our faculty have brought definition to the essential elements of a general education, and agreement has been reached as to the direction and form of this new curriculum. The result is a truly rich and diverse program that also is very focused. The Ohio State University is emerging as a national leader in the effort to implement significant curriculum reform to address the needs of a changing world. The directors of both the Educational Testing Service and the Carnegie Foundation have come to Ohio State to provide advice and to view our efforts.

With the implementation of the new curriculum will be new costs. The University has been able to use internal funds to assist in the development process. Once these changes are implemented, however, significant changes will occur in the patterns of instruction. Instead of selecting from a range of general requirements early in their undergraduate careers, students will pursue a comprehensive, integrated general education program that extends across their entire undergraduate experience. A greater emphasis will be placed on developing skills in communications, critical analysis, and logical thinking as an integral part of a student's program of study. The study of foreign language and culture will be expanded to all students. New courses will be added to provide an interdisciplinary, integrative capstone experience at the end of a student's program.

These changes will demand smaller classes, a multi-disciplinary approach, and more classes being taught by senior faculty. We must also assist the faculty in adapting to an increasingly interdisciplinary environment that demands a broad range of skills, and we will have to retrain advising and support staff to assist in this bold new effort. A two-percent increase in the enrollment-related elements of the undergraduate models would fund Ohio State's additional expenses, which will total approximately \$3 million annually. Support for our efforts would not only assist this University, but would help us serve as a pilot project and facilitate sharing our experiences and findings with other institutions in the State.

The current Selective Excellence programs have focused national attention on Ohio's higher educational leadership and have aided Ohio State in achieving great strides in its three-fold mission of teaching, research, and related public service.

The Research Challenge Program has proven to be of great assistance in bringing new money into Ohio. During the 1983-85 biennium, the University's expenditure of external research funds was approximately \$179.4 million. During the 1985-87 biennium, due in large part to the Research Challenge initiative, this amount increased by \$44.8 million to \$224.2 million. As federal agencies move more aggressively toward funding large centers, in contrast with the traditional individual investigator grants, we must be in a position to respond positively. Large center grants demand more direct cost sharing on the part of the

institution and improved infrastructure, but they provide maximum opportunity for the support of graduate students, for productive interdisciplinary relationships among students and faculty members, and for useful interaction with industry. Ohio's universities have been successful in attracting external funding to Ohio due to incentives provided through the Research Challenge Program. Additional funding will better enable our universities to compete for public and private funding for major research centers. We are requesting that the Research Challenge Program match be funded at twenty percent of all external research funds.

The Eminent Scholars Program has greatly enhanced the ability of the State's universities to increase the number of high-caliber faculty. The advantages of this program have been successfully realized during the last three biennia. However, we recommend that this program be altered in its focus to recognize and encourage young faculty scholars throughout Ohio's colleges and universities. This can be accomplished by utilizing these funds for awards to institutions whose faculty members are honored as Governor's Young Investigators through a competitive process similar to that conducted for the Presidential Young Investigators awards funded by the National Science Foundation. The award winners would receive the interest distributed from the \$500,000 endowed fund for four years to aid their scholarly activities. By endowing these funds, these awards can continue to recognize young faculty scholars beyond the biennia of initial program funding.

The Productivity Improvement Challenge was created to help increase participation and retention of Ohio's citizens in postsecondary education and to develop greater flexibility in responding to the educational, training, and retraining needs of local business and industry. We recommend continued funds to enhance the quality of programs at our regional campuses and the Agricultural Technical Institute.

The continuation of the Academic Challenge funds will allow us to expand and enhance efforts to support programs which are outstanding and have the potential to quickly achieve preeminence. This important funding allows departments to plan long-range programs of the highest quality within the context of the strategic planning efforts now occurring at the University. Through the process of strategic planning, we are facilitating the drive for excellence by helping to clarify our areas of strength and how we can make progress. Funds provided by the first two rounds of the Academic Challenge Program have enabled us to very effectively recruit outstanding new faculty which in turn helps to attract the brightest graduate and undergraduate students. The programs supported compete effectively with the very best programs available in the country. In combination with our strategic planning efforts, continued Academic Challenge funds will ensure that the long term gain in excellence at this University will be multiplied.

The Program Excellence initiative enriches the quality of undergraduate programs in response to the expectation of better-prepared students entering Ohio's colleges and universities. The last entering

class of freshmen at Ohio State showed a noteworthy improvement in standardized test scores and in their curricular preparation for college compared to the previous class. Increased funding will allow continued expansion of excellence in undergraduate education which will challenge and excite these students. It is particularly important that new technologies and methodologies be made available to our undergraduate students.

It is important to note that the excellence and challenge programs of the State have enabled this University to extend initiatives already begun with our own reallocated internal resources. Combined with our enormous campaign for private and corporate gifts, we have been able to aggressively recruit some of the top faculty in the country. A recent noteworthy accomplishment was our success in bringing a Nobel Laureate to the University. The faculty continues to attract increasing amounts of sponsored research. Many of the programs made possible through these sources, together with the excellence funding, are applying technology and scholarship to Ohio's problems and contributing to a strong future for the State.

IV. EQUIPMENT & FACILITIES RENOVATION

The need for equipment and facilities upkeep and modernization is a continuing one. Additional instructional subsidy funds are necessary to keep pace with research needs and technological changes. Remedial measures such as asbestos and PCB removal from existing buildings also must be addressed. We support the Regents' initiative to review the subsidy formula's plant operation and maintenance models.

Beyond full funding of the currently defined instructional subsidy, it is important that in the 1989-91 biennium, new components of the subsidy model be initiated to fund facilities and equipment modernization and replacement from the operating budget. While Utilities and Renovation monies from the capital budget have been the resource for these funds, the uncertainties of capital appropriations limit long-range planning for facilities and equipment maintenance/replacement. In addition, such activities impact operating funds through debt service expenses. It is crucial that the State begin the process of converting this support to an on-going commitment or an extension of the annual instructional subsidy. This new approach not only will encourage improved long-range planning of more effective maintenance and modernization of the State's investment in facilities and equipment, but over the long-run will reduce operating costs and debt service expense.

The Ohio State University supports the concept of developing a formula for the distribution of facilities renovation funds as part of the instructional subsidy. It is proposed that the formula include funds for: street improvements, building maintenance such as window replacement and roof improvements/replacements, utility system improvements, and other similar renovation projects. In addition, there should be a component that considers the aging and obsolescence of buildings.

Finally, a component that recognizes changes in the University's programs should be included in the formula.

Such a formula should generate \$30 million for the Columbus campus, and approximately \$2 million for the Agricultural Technical Institute and the regional campuses. Of course, it is assumed that major capital improvements, including new buildings, the backlog of renovations, and other large capital projects would continue to be funded from the capital budget.

We urge that the Regents request \$52 million for equipment replacement to be allocated according to the formula developed by the Regents. This level of funding would provide approximately \$13 million for the Columbus campus of The Ohio State University and \$275,000 for the regional campuses and the Agricultural Technical Institute.

V. AGRICULTURE AND HEALTH SCIENCES

While we have emphasized priorities related to core instructional and research support, we cannot overlook the particular needs of the various line-item funded programs, especially those in agriculture and medicine. These specially funded programs provide The Ohio State University with a margin of excellence to meet the needs of Ohio's agribusiness community as well as to enhance the clinical teaching and medical research initiatives for the people of Ohio.

Assistance is needed in agricultural research efforts in the biotechnology fields. Increased support is necessary for the Ohio Agricultural Research and Development Center so that Ohio can construct longer-term responses to current crises and be better prepared for the 21st century.

We ask that full funding be provided for the Ohio 21 agricultural programs of the Ohio Agricultural Research and Development Center and the Ohio Cooperative Extension Service. The Ohio 21 program has thrust Ohio into a national and international leadership position in the agricultural and food industries. Now, it is imperative that additional funds be provided to allow full implementation of Ohio 21 so that The Ohio State University will be positioned to respond to the economic and social changes that are underway in agriculture.

It is in the health sciences area, perhaps, that one can see most clearly the inter-relationship between instruction, research, and service. Continued research holds promise for the successful treatment of untold numbers of patients in the future. Clinical experience and patient care are at the heart of health-related instructional programs. Our health services center is preparing for the opening of the new Arthur G. James Cancer Hospital and Research Institute currently under construction. Funding is needed for the 1989-91 biennium to assist in the costs associated with this major new facility that cannot be covered by patients and third parties.

While The Ohio State University will continue ambitious plans for the Arthur G. James Cancer Hospital and Research Institute, further improvement is required in our University Hospitals. Funding is needed to continue our efforts in the biotechnological fields of medicine, in gerontology, in maternal and pediatric treatment, in primary care, in neurological diseases, and in basic care support in our University Hospitals. New initiatives in research in Alzheimer's disease, arthritis, and molecular biology also must be supported to assist the citizens of Ohio.

The Ohio State University uses appropriations for the Area Health Education Centers (AHEC) to attract and retain health care professionals in areas needing them. Funding for AHEC has been provided jointly by the state and federal governments, but the federal government is terminating its support. For these centers to survive, the State must continue to compensate for these lost federal funds.

FORMULA-BASED INSTRUCTIONAL SUBSIDIES

The Ohio State University supports most of the changes proposed by the Board of Regents to the instructional subsidy. The Regents' proposals to include funding for the first two rounds of the Academic Challenge Program in the instructional subsidy, to reassign biological sciences to the Baccalaureate III model, and to reduce all students' share of their educational expenses are all very positive steps.

However, the University opposes in the strongest possible terms the Regents' proposal to create separate fee assumptions for each undergraduate model. A two-tier system that would track students toward certain types of institutions with fee differentials risks establishing structural discrimination. There is no place for economic educational elitism in the State of Ohio. The Regents has maintained that this change would improve access. In fact, such a change would have a devastating effect on access for low-income students.

The Regents' proposal works counter to our efforts at enhancing retention. Furthermore, it is disadvantageous to institutions to accept upper-division transfer students, which is counter to our efforts to improve articulation programs.

The desire to have students pay an equal share at all program levels ignores the actual costs to the students in the interest of percentage equality. If the Regents' proposal were adopted, in fiscal year 1991, General Studies I students would be assumed to pay about \$1,500 toward the cost of their education, while Baccalaureate III students would be assumed to pay more than double that amount--\$3,175!

There are, nevertheless, several recommendations that the University supports. The incorporation of the first two rounds of the Academic Challenge Program into the instructional subsidy provides the stable funding necessary to guarantee the continued development of excellent programs. Efforts made by the Regents to reduce students' share of educational costs move us closer to the goal of students paying no more than 30 percent of the cost of providing a college education.

We endorse the Regents' proposal to adjust base year enrollments for growing and contracting institutions. The planned phase-in of new base year enrollments protects institutions against radical changes in their subsidy earnings. Furthermore, the Regents' proposed change in the Small Campus Factor for the General Studies models will assist small institutions that suffer enrollment declines in these model categories.

Ohio State welcomes the proposed reassignment of biological sciences from the Baccalaureate II to the Baccalaureate III model. It is a recognition of the very high costs associated with this area.

Adjustments to the cost components of the subsidy model are quite reasonable. We feel that the factors used by the Regents to advance the

model rates, especially those for compensation and library acquisitions, reflect the cost increases that colleges and universities will incur in the coming biennium.

The University's request for the instructional subsidy incorporates all of the changes recommended by the Regents with the exception of fee assumptions. Students' decisions about which college or university to attend should be based on academic, not economic factors. We favor inviting open, competitive proposals for access incentives and retention solutions that will fully develop Ohio's human resources. Our request retains one undergraduate fee assumption--\$1,976 for each year of the biennium. This amount was calculated by weighting the Regents' separate undergraduate fee assumptions, based on fiscal year 1988 enrollments, to achieve one undergraduate fee assumption. Also, the Regents proposes increasing the Graduate, Medical I and Medical II fee assumptions, but proposes a reduction in the aggregate undergraduate fee assumption. Our request holds the Graduate, Medical I and Medical II fee assumptions at the fiscal year 1989 levels.

THE OHIO STATE UNIVERSITY
1989-91 BIENNIAL BUDGET REQUEST

The Ohio Supercomputer Center

<u>Budget Summary</u>	<u>1989-90</u>	<u>1990-91</u>
Budget Request	\$5,000,000	\$5,000,000

Program Statement Summary

Although The Ohio Supercomputer Center has been in existence only a matter of months, it has already had a very positive impact on Ohio's businesses and institutions of higher education. The University strongly supports the Center's request for State funding.

Program Statement

The Ohio Supercomputer Center was dedicated on November 2, 1987. In the seven months between November, 1987 and June, 1988, the Center's impact on the research community in the State clearly is meeting expectations. At 22 private and public universities and colleges, faculty investigators are addressing scientific and engineering problems of a scale previously impossible within the State of Ohio. Representatives from 23 Ohio industries are discussing applications of supercomputing technology of interest to their firms. Presently, two industries have signed contracts. In central Ohio, research staff at Battelle Memorial Institute are initiating use of the Center's Cray X-MP machine. In northwest Ohio, research engineers at Glasstech in Ferrysburg are designing the windshields for automobiles of the 1990s using the Cray. Negotiations are proceeding toward closure on more such agreements.

The Center's impact in the higher education community is evident in the number of outstanding scientists and engineers who have joined faculties at Ohio institutions and who expressly stated that access to the Ohio Supercomputer Center was the determining factor in their choice to come to this state. The Center was pivotal in the decision process that resulted in a nobel laureate, Doctor Kenneth Wilson, and an Ohio Eminent Scholar, Doctor Gregory Burns, joining the faculty at The Ohio State University. Ohio's higher education institutions now have a competitive advantage in attracting and keeping some of the best scholars in the nation.

The impact of the Center in attracting new funds for the conduct of research hitherto impossible in the State of Ohio is evident in the number of proposals being submitted to federal agencies. Faculty members seeking external funds to support their research efforts now have a distinct competitive advantage. In northeast Ohio, access to the Ohio Supercomputer Center's supercomputer aided the University of Akron's

engineering faculty in securing a \$677,000 grant to study advanced computational techniques. With the Center providing supercomputing resources, scientists and engineers in Ohio now represent high-quality, cost-effective alternatives to the traditional East Coast/West Coast distribution of research funds.

Of perhaps greater importance than the number of proposals from individual investigators is the synergy among scholars in different disciplines and among faculty located at separate Ohio schools. A number of major multi-disciplinary Center proposals have been dispatched specifically because the Center's presence prompted technologically oriented initiatives that crossed traditional boundaries. A faculty group at Kent State University has proposed a \$17 million NSF Science and Technology Center for joint university-industry research. This proposal depends upon access to the Ohio Supercomputer Center for solution to problems in liquid crystal research.

As a new generation of advanced students is educated in the supercomputing environment, the role of Ohio's educational institutions in providing professionals for the nation's technologically sophisticated industries will grow. In southeast Ohio, physicists and chemists at Ohio University use the Ohio Supercomputer Center's Cray to study nuclear and atomic structure. At the University of Cincinnati, surface scientists and engineers study new materials and dynamics of fluid flow in machinery using the computational power of the Cray. This community of professionals will serve to enhance the reputations of their respective institutions and attract new high-technology industries to locations in Ohio.

In fiscal year 1989, the operating budget provided by the State of Ohio is \$4.5 million. This sum is augmented by \$1.1 million from The Ohio State University for one-time start-up costs. We propose that the State commit to level funding of \$5.0 million in each year of the next biennium. The Ohio State University will continue its commitment to augment this operating budget with \$2.0 million over the 1989-91 biennium to assist in defraying the Ohio Supercomputer Center's start-up costs.

Even with the arrival of the Cray Y-MP 8/32 supercomputer in the fall of 1989, the success of the Center to date enables it to request only a small percentage increase in the State-supplied operating funds to cover the additional costs of operating this next generation supercomputer, a machine with 10 times the computing power of the current generation Cray X-MP/24 machine. The annual budget of \$5.0 million will allow us to complete the Center's start-up phase through 1991 and support the fast-growing community of academic and industrial users, as well as train the very first generation of Y-MP users in the nation.

Program Statement Summary

The Ohio Agricultural Research and Development Center requests \$51,577,292 in line-item support from the State of Ohio for the 1989-91 biennium. The request includes funding required to maintain ongoing high-priority research activities at current levels and increased funding for program enhancement of continuing and new research thrusts. Activities at the Center already have been initiated to accommodate several new research programs, such as biotechnology for plant and animal agriculture and forestry; development of integrated technology systems for food and fiber production and related post-harvest technology; and research on conservation, preservation, and effective utilization of soil, water, and other natural resources. However, existing research commitments and limited resources will not permit reaching effective operational levels in these areas of research or to addressing new national and State issues such as water quality, farm profits, diet and health, and biotechnology in food and agriculture.

Ohio Agricultural Research and Development Center

Program Statement

The Ohio Agricultural Research and Development Center's current 1987-89 biennial operating budget amounts to \$61,730,000, of which \$38,692,642 were State appropriated. The improved operating budgets over the past four years have permitted the Center to make significant accomplishments in both its plant and animal research programs. Several key faculty and staff members were hired to initiate research in high-priority areas, redirecting research efforts toward the new areas described above in the Program Statement Summary. This work has increased the scientific output of the Center by 36 percent, much of this in areas that clearly contribute to the highest priority research -- rapid advancement of agricultural efficiency.

The 1989-91 biennial operating budget for the Ohio Agricultural Research and Development Center is projected to total \$35,561,000 for the first year and \$39,580,000 for the second year. To continue these research initiatives and move forward with the new efforts described below, which have come from the Ohio 21 program, the Center requests increases in State appropriations of \$4,295,000 for the first year of the biennium, and \$8,198,000 for the second year. The proposed increases in the operating budget will be used to maintain new equipment and two new buildings which were completed during 1987. However, the largest portion of the new funding will go for an increase in new programs underway, including the biotechnology programs. The new priority areas of research total \$10,053,074 for the 1989-91 biennium. The eight new research initiatives briefly described below document the scientific areas to be covered and define the relationship to the Ohio Cooperative Extension Service.

Key Issues and Priority Areas

The following plan establishes the direction of the research programs of the Ohio Agricultural Research and Development Center (OARDC) and the adjunct educational programs of the Ohio Cooperative Extension Service (OCES). Summaries for each of eight major areas of emphasis outline activities designed to ensure that Ohio will remain a strong and competitive factor in U.S. and world agriculture for the next decade and into the 21st century. These priorities address initiatives important to the citizens of Ohio, and build on the strengths of the College of Agriculture and several sister colleges within the University. Concomitantly, they will improve the delivery of services by providing a much closer alignment of scientific research OARDC reporting and the Cooperative Extension Service's initiatives.

Using funding from Ohio 21, The Ohio State University installed state-of-the-art equipment and updated several laboratories for research scientists. Most of those initiatives were in support of scientific endeavors extending from molecular biology to economic theory. To follow up on these beginnings, it now is necessary to continue support of those

programs and, with new projects, to harness the negative impact of 40 years of dramatic increase in agricultural technology with new information gained through experimentation. We now need to implement those projects which could help us solve such problems as water contamination from herbicides and pesticides and food oxidation.

An Agenda for the Future of Ohio Agriculture

AGRICULTURAL PROFITABILITY

Critical to the future of Ohio agriculture is efficiency in agricultural technology, financial management, farm marketing, farm size, utilization of new genetic resources in plants and animals, and waste management. Attention must be given to sustainable agriculture, new crops, and alternative farm enterprises to improve financial survival and increase profits. The potential for profit in a global economy hinges on an economically efficient U.S. production and marketing system and supportive agricultural, macroeconomic, and international trade policies. The areas of leadership in research existing in Ohio are: world trade, farm crises abatement, low-input agriculture, and biological productivity of plants and animals. The research to be pursued includes:

- *Establishing linkages among national agriculture policies; world, national, and State trading positions with profitability and productivity.
- *Establishing systems for rapid delivery of information on linkages in national agriculture policy and world trading position.
- *Determining the role of marginal cost and asset positions in farm income crises management and sustaining agricultural productivity.
- *Determining efficiency of production management by incorporating decision/risk models, a total farm approach, and impact assessment of new technologies.
- *Improving genetic resources in plant/animal systems.
- *Identifying and evaluating alternative production systems and practices.
- *Developing new and improved plant and animal protective systems, pest management, vaccines and biological control agents, and crop protection agent delivery systems for improved environmental/health costs.
- *Enhancing on-farm profitability by developing predictive assessment models for a sustainable agriculture; new enterprises, markets, and cropping systems.

WATER QUALITY

The program will focus on the preservation and enhancement of Ohio's surface and ground water resources to provide safe drinking water in rural and urban areas, and clean water for industrial use, parks and recreational areas, wildlife habitats, and wetland ecosystems.

The quality of water is a result of a number of complex biological, chemical, and physical interactions which occur at the soil-water, sediment-water, and air-water interfaces. These interactions are integral components of the processes of erosion and sedimentation, and have direct impact on the fate of nutrients, pesticides, and agricultural, municipal, and industrial wastes introduced to the soil-water system. Research must be undertaken on several levels--the laboratory, greenhouse, small-plots, and watershed--to translate our mechanistic laboratory observations into large-scale, real-world solutions.

For water-quality research, the appropriate field scale is one that encompasses natural hydrologic boundaries--the subwatershed. Subwatersheds representing major cropping systems should be established on several soil associations with contracting hydrologic properties and instrumented to monitor and sample precipitation, runoff, and percolation. These systems should be in place for at least 10 years to cover the range of climatic conditions likely to be encountered and ensure that the system is at or near equilibrium. These watersheds become the outdoor laboratories in which scientists from the various disciplines can test their models and from which, in time, the water quality questions facing agriculture can be answered with confidence. Ohio has the research scientists to lead the nation in this effort but needs major support elements to develop interdisciplinary research programs.

Present expertise for scientific exploration of the water, soil, and plant production interactions is distributed interdepartmentally, and this program would bring together experimental scientists investigating drainage systems, ground and surface water movement, soil chemistry, soil structure, pesticide assessment, and food chain kinetics. The comprehensive nature of the University provides the interdisciplinary resources necessary for the success of this effort.

FOOD PROCESSING, MARKETING, AND SAFETY

Food processing is a growing industry in Ohio. While farm sales of products for U.S. food total \$1.8 billion annually, the value additions in processing raise this to a value of sales equaling \$18 billion. Ohio's food products are marketed without many real connections between the food producers and consumers. Consequently, Ohio's agriculture is vulnerable to increasing risks from choices in the domestic market.

The food processing industry will benefit from basic research programs for improving food quality, packaging, and safe delivery of a

food supply to the consumer. Reorganization of the research and teaching efforts in the College of Agriculture is now underway in order to direct the scientific effort into goal-oriented science and engineering units to meet the basic research needs of Ohio's food industry. Scientific groups providing expertise for research on food quality, food safety, and food mechanics include post-harvest physiology, enzymology, the biochemistry of plant wounds, meat physiology, dairy technologies, cereal chemistry, oil seed technology, and physical properties and fluid mechanics.

Research will be targeted to increase the amount of value added through innovative processing and packaging of food products in Ohio. We will also focus on the quality of food products, and develop and evaluate techniques for monitoring food safety from microbiological and toxicological perspectives.

BIOTECHNOLOGY IN FOOD AND AGRICULTURE

The biotechnology programs established with Ohio 21 funding must be continued, particularly in research. They are conducted in collaboration with the Ohio State Biotechnology Center. Scientists in animal and plant research intend to move forward and support existing and new agricultural research programs through the use of biotechnology. In the animal sciences, research will lead to identification of methods to promote faster growth, improve commodity quality, increase disease resistance, and enhance reproductive viability and productivity. Examples of specific investigations include the determinant genes regulating growth and development, pituitary hormones, uterine proteins, fetal development, nutrient utilization, virulent agents, immunogenetic factors for vaccine production, and toxicology markers.

Advances in the plant sciences will lead to the development of superior varieties of plants and microbes and can provide knowledge about the interactions of molecular structure and significant traits such as yield, disease resistance, herbicide resistance, and crop quality. Examples of specific investigation include the interaction of plants with both beneficial and disease-causing microbes, photosynthetic mechanisms, genetic reactions to growth regulators and herbicides, environmental stress responses, plant growth, and plant reproduction.

NEW PRODUCTS FROM AGRICULTURAL SYSTEMS

Research needs to be directed toward the farm family and how they can effectively seek alternative sources of income from marketing current products in an alternative manner, new uses of current products, or new products not currently made from agricultural commodities. Scientists will seek to identify non-food uses for Ohio's farm and forest commodities which are, or will be, economically feasible in the long run on the basis of genetic abilities and profitability. The benefits are improved utilization of agricultural land in Ohio, increased financial stability for farmers, decreased dependence upon federal subsidies, and a reduction in commodities imported into Ohio. The research teams will examine the potential benefits and costs to an Ohio farmer of producing

new or alternative crops as a substitute for traditional farm commodities. Other work to be done includes the study of the existing chemistry of current Ohio products for the purpose of inventing products for commercial use such as stock for plastics and more efficient biological systems for fermentation energetics and pharmaceuticals. Several teams of scientist are prepared to enter this area with expertise in biochemistry, chemical engineering, genetic engineering, plant and animal genetics, farm management, and economic theory of commodity marketing.

Research Priorities with Cooperative Extension

COMMUNITY DEVELOPMENT AND ECONOMIC REVITALIZATION

Revitalizing rural America is a major program goal. It is dependent on the timely delivery of information from OARDC to the Ohio Cooperative Extension Service (OCES). The OARDC and OCES educational programs will result in economic development, including the creation of off-farm jobs with entrepreneurial and small business management education. Programs will be focused on the follow-through of the community's economic development plan. Related local educational programs by OCES on essential public services include solid waste and wastewater disposal and water supply quality. The research phase of this initiative will be extensively integrated with the Extension's information delivery system.

FAMILY STRENGTHS

Programming will focus on family economics and the physical and emotional well-being of members of families. Educational priorities include family stability, parent education, managing family resources, goal setting and decision-making, balancing work and family, and improving health through nutrition and life-style practices. The OARDC will plan research and educational programs with OCES which will help individuals, families, and communities identify the obstacles to improved productivity and develop strategies to attain optimal growth and satisfaction. Studies on assistance will be focused on the critical transitional phases in individual and family development.

YOUTH DEVELOPMENT

The direction of the youth development program for the future will be on positive living skills, decision-making skills, communication skills, and leadership skills. Through a focus on science and technology, youth will develop technical skills as a part of their total education and career exploration for the future. Program issues include career exploration, citizenship, communication skills, personal development, practical skills for living, and social development.

Program Statement Summary

The Ohio Cooperative Extension Service's programs on agricultural industry, home economics and family living, community and natural resource development, and 4-H youth development provide instruction and assistance to nearly six million Ohio residents each year. To continue and update educational programs, OCES requests funding of \$30,507,692 for the biennium.

Program Statement

As we approach the 1990s, the magnitude and dynamics of technological, environmental, social, and occupational concerns demand lifelong learning by every individual in Ohio. People in both the public and private sectors, rich and poor, need prompt access to new knowledge and research results. They need reliable and unbiased information on

critical issues in order to realize their potential and remain in the mainstream as effective citizens. The Ohio Cooperative Extension Service provides programs to meet those needs.

Ohio Cooperative Extension Service

The Ohio Cooperative Extension Service is a continuing education program established by Ohio law in 1909 to serve the needs of Ohio's citizens in agriculture, home economics, natural resources, and related subjects. Faculty of the Ohio Cooperative Extension Service (See Table 1) teach off-campus educational programs in all counties of the State as a part of The Ohio State University. The colleges of Agriculture, Home Economics, Biological Sciences and Veterinary Medicine provide major technical research. Extension's educational programs annually reach nearly six million adults and young people. Major programs focus on agricultural industry, home economics and family living, community and natural resource development, and 4-H youth development.

The goal of the Extension's agricultural industry programs is to assist farm families and agri-business in becoming more competitive, profitable, and environmentally acceptable, thus creating a healthier agriculture and rural Ohio. Agricultural industry extension programs, utilizing 22 computer programs, have assisted Ohio's 87,000 farmers to improve their profitability significantly. Educational programs in cooperation with agri-business have nearly tripled the value of Ohio's agricultural products (\$3.9 billion in farm sales). With the assistance of trained technicians, in 1987 more than 1,800 farmers utilized the FINPACK financial management computer program to evaluate their farming operations. Other agricultural industry programs include: 1) soil and water conservation programs targeted toward farmers and agri-business leaders; 2) teaching safe and proper use of pesticides to more than 9,000 pesticide applicators; and 3) on-farm demonstrations illustrating conservation tillage-fertility, crop varieties and pest control, livestock production, and management practices.

Extension home economics programs focus on the economic, physical, and emotional well being of families. In 1987, OCES provided consumers with information on managing resources, coping with change, and strengthening family relationships. The home economics program trained more than 300 budget counselors in 11 urban counties to work with financially troubled families. A 24-county nutrition educational program targeted at families with young children resulted in marked improvements in food preparation and management skills of almost 6,000 low-income participants. In addition, 20,536 youth improved their dietary intakes as a result of a nutrition program targeted to low-income youth. Nearly 12,000 members of Extension homemakers' clubs in 73 counties studied topics including water quality, drug and diet interactions, and leadership development.

The Community and Natural Resource Development (CNRD) program focuses on economic development with retention and expansion (R&E) of businesses and industry as one strategy for rural revitalization. More

than 30 counties in Ohio have completed an R&E business visitation program and a strategic plan for economic development. Resources will be committed to providing educational programs to implement these economic development plans and others as they are developed. The CNRD has assisted small and home-based businesses through workshops, the Home Business Digest newsletter, and a series of fact sheets; additional educational materials are being developed. Other emphases include conducting educational programs to assist in protecting groundwater and providing assistance to farmers in transition to other full-time jobs.

The 4-H youth program focuses on helping youth develop into successful, productive, self-directed members of society. The 4-H program serves 140,406 members; 17,347 members participated in the camping program last year. Volunteer adult leaders total 18,544; 7,549 junior leaders also provide services to 4-H. Program priorities include decision-making skills with emphasis on commitment and responsibility, positive living skills, leadership development and training, communication skills, economic education and career exploration, and technical knowledge and skills. The 4-H project is the unique tool for providing young people with real-life experiences in goal setting, decision making, and work ethics.

The Goals Underlying This Budget Request Are Three-Fold:

- 1) To meet emerging new program needs as requested by Ohio's citizens - and identified in our goal-setting program;
- 2) To challenge present faculty and staff members to develop creative programs as they have done in past years -- with guidelines from committees of clientele at the county, district, and state levels; and
- 3) To improve information delivery systems equipment and to keep abreast of modern technology.

To attain the first and second goal, OCES must continue selected high priority programs in agriculture, home economics, community and natural resource development, and 4-H youth development, as well as respond to new program needs. Following is a listing of our highest priorities.

Highest Priorities

Agricultural Profitability

- Financial management
- Farm marketing
- Waste management
- New crops and alternative farm enterprises

Water Quality

- Safe water for families
- Non-point pollution of water
- Rural home and enterprise wastewaters

Community Development and Economic Revitalization

- Small business management education
- Retention and expansion of the community economic base
- Community leadership

Family Strengths

- Managing family resources
- Balancing work and family
- Improving health through nutrition

Youth Development

- Positive living skills
- Communication skills
- Leadership skills

Food Processing, Marketing, and Safety

- Packaging
- Safe delivery of food supply

New Products from Agricultural Systems

Biotechnology in Food and Agriculture (In collaboration with the Ohio State Biotechnology Center)

Meeting the information delivery goal will require additional microcomputers for departments on campus as well as at the county level, computer software, and modern video teaching equipment. Such a system will enable faculty members to provide cost-effective ways of fulfilling the educational mission. This change in thrust will involve more county agents in teaching groups, while specialist support will be utilized through direct satellite broadcasts, videotapes, teleconferences, and software development.

New priorities and programs such as those identified in the preceding sections of this budget request require additional funding. In order to address current and emerging issues facing Ohio's citizens, the Ohio Cooperative Extension Service requests State funding of \$30,507,692 for the 1989-91 biennium. Nationally, Cooperative Extension Service programs receive 48.3 percent of their funds from the state; Ohio contributed 35 percent of total OCES funds in 1987-88 (Table 2). Because Extension programs contribute to the improvement of the Ohio economy as a whole, OCES requests that the State provide a higher percentage of total OCES support.

The Ohio Cooperative Extension Service recognizes the need to keep salary increases for existing faculty and staff members consistent with the rest of the University. This proposed budget will permit the OCES to remain competitive and retain outstanding faculty and staff members, and, at the same time, to meet the new needs expressed by clientele.

Approximately 35 OCES faculty members have retired during the last year, partly as a result of the early buyout program. The OCES has used this opportunity to effect a permanent reduction in faculty numbers. Table 1 illustrates that total OCES faculty members have decreased by 29 percent during the last nine years. As a result, some faculty members at the county level are responsible for conducting programs in two counties. This arrangement will be facilitated by adding non-tenured positions to assist in program delivery. This change in staffing patterns will provide a more efficient and cost-effective system of delivering programs in the field.

1989-91 BIENNIAL BUDGET REQUEST

Medical Clinical Teaching and Research

Budget Summary

	<u>1989-90</u>	<u>1990-91</u>
Full Continuation Funding	\$15,353,540	\$16,721,560

Program Statement Summary

The Ohio State University Hospitals was established by the Ohio General Assembly as the primary teaching and research laboratory for The Ohio State University College of Medicine. Its primary purpose is to provide a patient care facility in which medical, as well as other healthcare students, may learn the practical or applied aspects of their professions. Essential to the success of this mission are the associated functions of research and clinical service. The Ohio State University is the flagship institution for the State of Ohio and over 50 percent of The University Hospitals' patients come from outside Franklin County to receive specialized treatment. Patient fees are set at the lowest possible rate to cover the total cost of patient care.

The General Assembly has traditionally provided funds for teaching and research. These educational costs are estimated to exceed \$49 million per year by fiscal year 1991. With the continued changes in funding for teaching hospitals, it is now imperative that the State of Ohio more fully fund the teaching and research costs of University Hospitals. Funding of \$32,075,100 is requested for the coming biennium.

Program Statement

The Ohio State University Hospitals has undertaken a careful examination of its total medical education costs. Included in this request is a Summary of Direct and Indirect Teaching Costs for the 1989-91 biennium which resulted from these efforts.

The Indirect Medical Education Costs were computed using both the federal formula as well as the results of the Cameron Study which recently was completed for the State of California. The Cameron Study was sophisticated in its approach to measuring the indirect costs in medical education, and the financial staff of The Ohio State University Hospitals would be pleased to discuss these results should questions arise. In addition to the indirect costs of medical education, the direct costs for our allied health programs and clinical operations were added to determine the total costs of health-related education at University Hospitals.

Once the total costs of direct and indirect medical education were determined (approximately \$47 million for fiscal 1990 and \$49 million for fiscal year 1991), they were compared with the direct sources of funding, Medicare and Medicaid programs. Their reimbursement is shown on the attached summary as well. The direct reimbursement sources total \$22,520,000 for fiscal year 1990 and \$23,645,000 for fiscal year 1991. Both costs and reimbursements were inflated 5 percent for fiscal 1991 as compared with fiscal year 1990.

Please note the shortage of sources versus costs of \$24,258,000 in fiscal year 1990 and \$25,471,000 in fiscal year 1991.

Given the recent reductions by the federal government for reimbursement of indirect medical education costs, it is very important that the State of Ohio begin to increase its funding. Other third-party payers are informing the Hospitals that medical education costs are not their patients' concern, and they are stating that education is a societal issue. While we at The Ohio State University Hospitals do not agree with this position, it is important that the State of Ohio recognize these negotiations are ongoing and that major teaching hospitals are facing significant challenges as we negotiate against community hospitals. It is obvious that the education of interns and residents, as well as paramedical professionals, is in everyone's best interest and that the issue of funding has not yet been settled.

Because of the current financial status of Ohio, we do not expect the State to pick up all of this shortfall in one biennium. We do hope, however, that the State will make an effort over several biennia to close the gap so that education for future physicians and other health care professionals in this State is not in jeopardy.

SUMMARY OF DIRECT AND INDIRECT TEACHING COSTS

THE OHIO STATE UNIVERSITY
1989-91 BIENNIAL BUDGET REQUEST

Health Professions Clinics Support

Budget Summary

	<u>1989-90</u>	<u>1990-91</u>
Budget Request	\$1,276,000	\$1,370,000

Program Statement Summary

The colleges of Dentistry and Veterinary Medicine have experienced dramatic increases in their clinical costs. Veterinary Medicine's cost of purchasing animals for teaching purposes has risen dramatically with the lack of availability of lower-cost pound animals. Dentistry is incurring additional expenses for the purchase of masks, gloves, and other consumable sterile supplies to comply with recently enacted legislation that is designed to help control the spread of infectious diseases. These developments, when combined with inflationary increases in other areas, place a burden on patient fees that is unrealistic inasmuch as the instructional mission requires large numbers of diverse patients.

Program Statement

The health sciences colleges are in a unique position. They must provide and operate educational facilities where patient care is provided as a necessary by-product of required student training. The costs of maintaining and operating these facilities are very high -- obviously higher than a non-teaching patient-care facility. The facilities offer two services: training professional students for the future of Ohio, and offering care to the citizens of Ohio. Even though patients are charged for these services, the total costs of operating these educational facilities cannot be recovered through patient fees alone.

Services in these facilities are provided by advanced students who are supervised by faculty members. In such a setting, a greater commitment of time from the patient or client is required. In order for the educational goals of the clinics to be met, a diversity and large number of patients are needed. Therefore, fees have to be set at or below community rates so that appropriate numbers and types of patients for adequate training experiences can be attracted. This is absolutely vital so that graduates may enter into practice immediately upon obtaining the professional degree and license.

These educational facilities combine in one place the instructional, research, and service components of the University's mission. The

responsibilities of Dentistry's and Veterinary Medicine's faculty and staff members do not include providing patient care. They teach students, further the students' clinical experiences, and perform clinical research. In order to maintain these educational facilities, special subsidies continue to be needed for the clinical facilities of the colleges of Dentistry and Veterinary Medicine.

State support of these two clinics has not increased since fiscal year 1987. This lack of growth in the State subsidy has placed an excessive burden on patients' fees. As an example of increased costs for instruction and research, until recently the veterinary teaching hospital could purchase dogs from pounds for \$20. The animals now must be purchased elsewhere for prices ranging from \$75 to \$300 per animal. Public concern about the spread of AIDS and other infectious diseases has resulted in legislation that requires increased safety measures by the dental clinic. The clinic is incurring an onerous rise in its costs principally due to expenditures for gloves, masks, and other consumable sterile supplies.

The University requests State support for the dental and veterinary medicine clinics of \$1,276,000 in fiscal year 1990 and \$1,370,000 in fiscal year 1991. These funding levels would help offset inflationary cost increases and help defray expenditures resulting from legislation and practices in disease control and animal use.

THE OHIO STATE UNIVERSITY
1989-91 BIENNIAL BUDGET REQUEST

Arthur G. James Cancer Hospital and Research Institute

Budget Summary

	<u>1989-90</u>	<u>1990-91</u>
Budget Request	\$3,000,000	\$3,000,000

Program Statement Summary

The Arthur G. James Cancer Hospital and Research Institute will be completed in late 1988. It will be a "state-of-the-art" facility for instruction, research, and service. Since it is a center for teaching and research, the Institute cannot be supported solely by revenue from patients. The Ohio State University requests \$6 million for the 1989-91 biennium to finance the incremental costs of education and research.

Program Statement

Pursuant to the intent and appropriation from the Ohio General Assembly, construction of the Arthur G. James Cancer Hospital and Research Institute is nearing completion. It is anticipated that this facility will be operational during the 1988-89 academic year. In accordance with the legislative intent creating this facility, The Ohio State University is making every possible good-faith effort to establish an institute that will provide oncology-related teaching, research, and service programs to the citizens of Ohio heretofore unavailable except by traveling to Texas or New York. A consequence of establishing such a premier institute is the need for a separate funding base, at least during the developmental years. Therefore, The Ohio State University requests a line-item appropriation for the 1989-91 biennial budget, to provide for support of (1) the incremental teaching costs, (2) direct and indirect research-related costs, and (3) operational start-up costs.

With adequate support in its early stages of development, the Arthur G. James Cancer Hospital and Research Institute can become a premier facility that will provide the best possible educational, research, and service programs to the citizens of the State of Ohio. Once operational and reasonably established, such a facility will generate patient revenues and receive extramural grant support and endowments that will offset the need for separate State funds.

(1) Incremental Teaching Costs

Support Requested: (\$1,000,000 per year)

The Arthur G. James Cancer Hospital and Research Institute will provide specialized educational and training programs to students and trainees in medicine, nursing, allied medical professions, psychology, social work, nutrition, dietetics, dentistry, optometry, pharmacy, veterinary medicine, and a host of other disciplines across the Ohio State campus. Approximately 3,000 students and trainees from Ohio State alone will gain cancer-specific educational experience at this facility.

However, it cannot be overlooked that potentially thousands of other students and trainees from health-care related organizations and educational institutions also will benefit from exposure to the unique programs that only a facility such as this can offer. Obviously, it is reasonable to anticipate that such an educational opportunity not only will assist in attracting highly qualified students and trainees, but also will serve as a tremendous asset in retaining these individuals as professional practitioners in the State of Ohio.

(2) Direct and Indirect Research-Related Costs

Support Requested: \$1,000,000 (per year)

More effective diagnostic and treatment procedures for cancer patients can evolve only as a result of strong basic research (laboratory studies) and clinical research (tested applications of new knowledge) programs. To be at the forefront of oncology-related educational, research, and service programs, investments must be made in technology as well as in the recruitment of additional scholars and support staff members. Of course, successful efforts in the development of basic and clinical research programs result in additional extramural funding, which in turn assists in the continuing support of such programs.

(3) Operational Start-up Costs

Support Requested: \$1,000,000 (per year)

As an independent institute, the Arthur G. James Cancer Hospital and Research Institute will require a funding base to begin operation. Although \$1,000,000 has been appropriated to support operational costs for the period July 1988 through June 1989, this amount is far from adequate considering a projected patient revenue deficit of \$9.5 million in the first year of operation, and \$7.2 million in the second. Although patient revenues will ultimately support a large portion of the operational costs, such revenues will not be realized until the facility has been operational for a reasonable time. Funds to support initial staffing, systems, supplies, and services costs must be available early on if this facility is even to become operational.

THE OHIO STATE UNIVERSITY
1989-91 BIENNIAL BUDGET REQUEST

Developmental Education

Budget Summary

<u>Columbus Campus</u>	<u>1989-90</u>	<u>1990-91</u>	<u>Total</u>
Budget Request	\$184,000	\$192,700	\$376,700

Regional Campuses

Budget Request	\$ 77,447	\$ 86,554	\$164,001
----------------	-----------	-----------	-----------

Total University

Budget Request	\$261,447	\$279,254	\$540,701
----------------	-----------	-----------	-----------

Program Statement Summary

Developmental Education will continue its tradition of giving priority for service to specially recruited minority students with economic and basic skills deficiencies. During the next biennium, Developmental Education wants to expand its services to a wider range of students entering the University with limited skills. The budget request for \$376,700 for the Columbus campus and \$164,001 for the regional campuses for the biennium would enable more students enrolled at Ohio State who are in need of basic skills development to be reached by special tutoring and peer counseling.

Program Statement - Columbus Campus

The Office of Developmental Education on the Columbus campus has historically given priority to minority students with special academic and social needs. As the Ohio Board of Regents' report on access and success indicates, we must continue and increase our efforts in the area given current demographic data. Special attention must be given to Black and Hispanic students to reverse the national decline in college attendance by students from these groups.

Ohio State has in place a Young Scholars Program designed to increase minority participation in higher education beginning with students in middle school. This effort has the potential not only of increasing minority student enrollment at Ohio State, but also at other institutions of higher learning in Ohio. This increase in minority student enrollment could have major impact on the need for academic and

social support services provided by the Office of Developmental Education.

The American College Test statistical data reveal that 2058 students with a composite American College Test score of 20 or below matriculated on the Columbus campus during autumn quarter of 1987. Among these students were 584 with scores between 1 and 15. Each of these students might well be judged to need assistance to "overcome any deficiencies they may have in their preparation for post-secondary instruction," as stated in the legislation establishing a program for developmental instruction at State-assisted institutions in Ohio.

In an effort to meet the needs of all our students, it is our judgment that with adequate financial resources, we can become more inclusive without diminishing the services to the approximately 900 specially recruited minority students who have the highest priority for the use of limited Developmental Education funds. We propose to expand these services during the next biennium to a wider range of students entering the University with limited skills rather than focusing almost entirely on minority students.

The proposed budgets would enable the University to expand its program to approximately 2,000 majority students in University College with similar needs. We were not able to address these needs during the current biennium because of limited funding.

The requested increase in funding is directed toward the following, in order of priority:

A) Expand services provided by the Learning Skills Program to more students. The American College Test Class Profiles for Ohio State freshmen have consistently shown that 37 to 39 percent of the students responding expressed a need for help in reading and study skills. Recently, students with a score of 16 or below on the social studies component of the American College Test have been invited to take a reading test during new-student orientation. This assessment revealed that we have more students reading below the college freshman level than the Learning Skills Program can accommodate. The Reading Program assisted 461 students during the 1987-88 academic year because of limited staff. Our request for Learning Laboratories will provide assistance for an additional 500 students in this area.

B) Strengthen the current tutoring and peer counseling programs. The requested amounts would provide an opportunity for more students to receive tutorial assistance in basic mathematics, basic English, and related areas.

C) Increase the Developmental Education staff by three full-time equivalent staff members to accommodate the additional students who need to be served by the program. We will maintain the current ratio of Graduate Administrative Associate positions to full-time professional staff members.

It is proposed that this modification of the composition of students served will begin with the next biennium, which will coincide rather closely with the physical relocation of the program.

Our current resources are inadequate to undertake these increased responsibilities. Developing access to the University as well as access to its curricula must continue to be emphasized strongly. The Developmental Education Program is an important component of this institution-wide and Statewide focus on improving access.

Program Statement - Regional Campuses

It is apparent from the materials submitted by each regional campus that the demand for Developmental Education services will increase during the ensuing academic year and the subsequent biennium.

As the budget requests indicate, the Learning Laboratories and Tutoring Centers will continue to be the areas of emphasis on the regional campuses. With adequate funding, increased attention will be given to assisting area students in preparing themselves for a successful higher education experience. Inadequately prepared college-bound youths and mature persons matriculating in a university for the first time should be provided opportunities to develop skills basic to success in higher education. These campuses have experienced a modicum of success in the area of recruitment of minority students. Similar to the Columbus campus, the areas of minority recruitment and retention will be given high priority during the next biennium. It is from this vantage point the enclosed budgets are presented.

Developmental Education - Newark

Comments:

In 1980, when Developmental Education (DE) funding was drastically reduced, former Chancellor Edward Q. Moulton outlined the procedure followed to distribute the DE appropriation. That procedure was based on ACT scores of incoming freshmen. Since 1980, many Ohio colleges have ceased using the ACT test. What is the current procedure being used to distribute the DE appropriation? Just as the subsidy formula system and line-item projects were sent around for review, the procedures for DE distribution need to be reviewed by all eligible institutions.

THE OHIO STATE UNIVERSITY
1989-91 BIENNIAL BUDGET REQUEST

Labor Education and Research Service

Budget Summary

	<u>1989-90</u>	<u>1990-91</u>
Budget Request	\$2,139,957	\$2,182,038

Program Statement Summary

In 1987-88, The Ohio State University's Labor Education and Research Service (LERS), a nationally acclaimed program, conducted 229 programs for 8,301 students. These numbers represent a gradual growth since the 1981-82 low year. It is apparent with the changing nature of labor-management relations and Ohio's changing economy that a comprehensive primary research program is needed by both labor and management. A program to design this type of research was requested for the present biennium but not funded. The need for such a program is now critical. Over the years, LERS has successfully integrated itself into the six other faculties of the College of Business and can meet this research need together with its sister Faculty of Management and Human Resources. To meet this added demand, \$4,321,995 is requested for the biennium.

Program Statement

The Ohio State University's Labor Education and Research Service (LERS) continues to fulfill its mission of providing non-credit educational programs for Ohio workers. With the cooperation of the Ohio labor movement, LERS conducted 229 programs with a total enrollment of 8,301 students. These figures are presented in Table I along with those of the preceding eleven fiscal years.

Table I
 LERS Programs
 Fiscal Years 1976-77 through 1987-88

<u>Year</u>	<u>Programs</u>	<u># of Students</u>
1976-77	176	7,353
1977-78	167	7,288
1978-79	239	9,467
1979-80	276	9,568
1980-81	228	7,420
1981-82	202	6,611
1982-83	201	7,185
1983-84	215	8,388
1984-85	242	8,154
1985-86	230	7,678
1986-87	220	7,989
1987-88	229	8,301

The LERS has continued its policy of planning programs with all levels of Ohio labor. Programs cover a wide range of topics. The most popular topics are those related to some aspect of collective bargaining: labor law; contract negotiations; grievance handling; and arbitration. The single most common program continues to be stewards' training, which is a combination "Introduction to the Labor Movement" and "Grievance Handling" programs.

There has continued to be an emphasis on occupational safety and health education. The highlight of programs in this area is the annual week-long Workers' Safety and Health Institute, which attracts over 200 Ohio workers each year. In the broad area of union leadership are programs such as the psychology of labor management relations, parliamentary procedure and effective communications. Finally, LERS continues to provide programs that allow Ohio's union members to better understand the history of the labor movement and the relationship of labor to the economic and political systems.

Plant shutdowns, decline of basic industries, layoffs of employees in various occupations, and movement of plants to other states, are evidence of an unstable economy in the State of Ohio.

In addition, low productivity growth in the nation's business and commerce has added to our difficulties. At the same time, the world's major industrial nations, e.g., West Germany, Japan, Sweden, and Italy, have become significantly more aggressive in their production processes and marketing policies. At one time, the United States dominated in the production of automobiles, steel, tires, radios, and television sets. Today, other nations now are the leaders in these products as well as in the production of cameras, watches, musical instruments, motorcycles and bicycles, industrial machine tools, office copying equipment, and semi-conductors for electronics, sport equipment, and toys.

It is clear that comprehensive initiatives are needed. We must increase our productivity. Waiting to see what will happen merely will continue our drift. Old ways simply will not do as other industrial nations continually expand their plant and productive bases. New ways are being tried but need to be researched to prove acceptability between labor and management.

Among the needed initiatives are: new product and service innovations, extensive investment in energy-efficient technologies and facilities, new skill training in all occupational levels, incentives for relocation to Ohio to create new employment growth areas, and greater cooperation among all the relevant actors (unions, management, academic institutions, and governmental agencies) to improve productivity. The requested levels of funding will enable LERS to undertake these initiatives.

With respect to worker-management cooperation, several attempts currently are underway in some private and public sector organizations to improve output, reduce adverse job actions such as strikes, and increase employee satisfaction and job security. These typically are referred to as Quality of Working Life (QWL), Quality Circles, and Joint Cooperation Programs. Some have involved unions such as United Steelworkers of America, Communications Workers of America, and United Auto Workers. Some of these efforts are very commendable and represent steps in the right direction, while others have circumvented the collective bargaining process causing further strife.

What is needed is careful, systematic study of these and other labor-management endeavors and dissemination of the lessons to others. Among the key questions to be studied are: How do such programs of cooperation begin? Under what conditions? How are they organized? How do they relate to the formal institutional union-management framework (the collective bargaining agreement and grievance procedures)? How effective are they in meeting their professed goals? What factors contribute to their overall successful functioning and/or demise? In what ways may their activities be improved?

To examine these and related questions and assure objectivity, multi-disciplinary research themes will be established. Each will be comprised of faculty members and graduate students drawn from both the faculty of Management and Human Resources and the Labor Education and Research Service of the College of Business. The Faculty of Labor Education and Research Service has, over the years, become an effective part of the College and enjoys full academic status equal to other faculties.

With the funding requested, research sites representing private and public sector organizations throughout the State of Ohio will be included for consideration. The full consent and support of management and union officials is, of course, essential prior to any research on our part. Recently, a demand for this information is becoming more apparent.

A longitudinal research approach spanning at least three to five years at each research site is recommended. Ideally, a cooperative relationship should be tracked from its inception to maturation. In this manner, relevant data may be collected prior to establishing a formal cooperative arrangement, thereby increasing productivity and employee well-being.

In this proposal, we recommend conducting longitudinal studies by the faculties of Management and Human Resources and Labor Education and Research Service in a cooperative arrangement with Ohio. The objective is to determine those conditions that led to constructive relationships over time and contribute to improvements in the economy, productivity, employee satisfaction, and job security. Longitudinal research is among the most expensive approaches, but also one of the most productive in terms of useful results obtained.

THE OHIO STATE UNIVERSITY
1989-91 BIENNIAL BUDGET REQUEST

Family Practice

Budget Summary

	<u>1989-90</u>	<u>1990-91</u>
Budget Request Components:		
Departmental		
Undergraduate (Medical School)	\$ 255,000	\$ 281,000
Graduate (Residencies, etc.)	1,198,000	1,317,000
Collaborative Activities	380,000	400,000
Focus On Underserved Populations	<u>50,000</u>	<u>55,000</u>
TOTAL	\$1,883,000	\$2,053,000
Number of Residents to be Supported:		
	<u>96</u>	<u>98</u>

Program Statement Summary

The Family Practice medical program encourages students to select family medicine as a career specialty and provides students opportunities to study medicine in community situations. On July 1, 1986, a required course in family medicine for all Ohio State medical students was instituted. This enhanced exposure of prospective family physicians has led to the selection of family medicine as a specialty by increasing numbers of Ohio State students, among the highest of U.S. medical schools. It is expected that the retention of students, residents, and fellows in Ohio will continue to exceed that of other specialties.

We request \$3,936,000 for the biennium in order to continue current operating levels with the opportunity for quality enhancement, in keeping with Ohio State's goal of fostering academic excellence, and the training of fellows for academic careers to fill the many vacant faculty positions in departments of family medicine.

Program Statement

The family medicine specialty was established in 1973-74 by the Ohio General Assembly's Amended House Bill 474, which mandated that State-assisted medical schools establish and maintain a Department of Family Medicine. As a recent medical specialty, family medicine has been moving steadily towards institutionalization by establishing itself as an

academic discipline and carving out its own primary care niche within a traditional tertiary care setting.

In this regard, a major objective was achieved in 1986 with the approval of a required family medicine rotation for Ohio State's medical students. Additionally, the residency program has filled during the current biennium and is anticipated to maintain that status through fiscal year 1991. Fellowship training has increased substantially during this biennium as well, and the reputation of this program is advancing steadily. A special minority focus has developed in the fellowship program, requiring additional funding to remain viable.

However, as the program flourishes with the attainment of many of its training objectives and increases in responsibility through required course implementation and administration, resources have not kept pace with overall needs. Actual funding provided by the State during the current biennium was significantly below that requested, and current program levels cannot be maintained without the additional funding requested. Though successful in achieving substantial gains in grants and contracts to maintain financial viability over the last few years, such programs require a commitment to long-term continuation following the sponsored time-frame. Consequently, departmental operations and conservative growth in keeping with established goals and objectives will require additional resources as projected in this document.

The emphasis of the Department of Family Medicine is teaching primary care and quality care. The broad objectives are:

1. To promote the missions of the University and the College of Medicine by creating a viable department and through managing its orderly growth and academic contribution;
2. To expose all students in the College of Medicine to the general concepts and skills of family practice and to provide in-depth training to those students who elect a career in family practice;
3. To provide an accredited three-year residency program in family practice that will prepare the resident to pass the State Medical Board's examination and to practice medicine as a family physician;
4. To make scholarly contributions to the field of family medicine and to provide advanced academic study beyond the residency in family practice (fellowships);
5. To provide quality patient care for the citizens of central Ohio in the Family Practice Center, satellite training centers, and in University Hospitals;
6. To recruit qualified minority applicants into The Ohio State University, its medical school, and into family medicine careers;

7. To study the special medical needs of the minority population and train physicians to meet those needs; and
8. To assist in the placement of resident graduates into positions of need, giving preference to the physician-short rural and inner city locations.

The proliferating demand from managed-care health plans for family practice residency graduates has only served to increase the shortage of family physicians in the rural and inner-city areas, where such plans have yet to penetrate. Programs to enhance recruitment of graduates to these areas surely are needed and are planned for the next biennium.

The Department of Family Medicine is participating in the University's minority program to nurture the interests of minority middle-school students toward enrollment at The Ohio State University. The success of a Black Fellow during the past year has generated interest in developing a special minority fellowship line with a faculty position devoted to the development and supervision of the program.

Family physicians should be providing counseling services to patients regarding such problems as marital strife, substance abuse, career dissatisfaction, and the stress of aging. The addition of a stress center to the services of the Family Practice Center is anticipated to address the increasing needs for individual and family counseling encountered in current practice. The Center would provide direct patient counseling by family physicians and behavioral scientists, and the instruction of students and residents in counseling skills.

THE OHIO STATE UNIVERSITY
1989-91 BIENNIAL BUDGET REQUEST

Primary Care

Budget Summary

	<u>1989-90</u>	<u>1990-91</u>
Budget Request Components*	\$ 600,000	\$ 648,000
Departmental		
Undergraduate (Medical School)		
Graduate (Residencies, etc.)		
Collaborative Activities		
Focus On Underserved Populations	_____	_____
TOTAL	\$ 600,000	\$ 648,000

* We were not able to cost out Primary Care by the components. For this request we have reported in the same format as in the past.

Estimated number of Residents to be Supported:	<u>94</u>	<u>98</u>
--	-----------	-----------

Program Statement Summary

The main objective of Primary Care Residency support is to increase the quality and availability of primary care training positions in General Internal Medicine, General Pediatrics, and Family Medicine. Separate rotations have been established in General Internal Medicine and General Pediatrics. In addition, a four-year combined residency training program has been established which will lead to board certification in both General Internal Medicine and General Pediatrics. Our request of \$1,248,000 for the biennium will assist the continuation of these efforts.

Program Statement

The Ohio State University College of Medicine is committed to the advancement of primary care training as an integral part of our mission. We have been successful in providing an environment which stimulates and encourages medical students to enter primary care fields. This has been accomplished with the support of the General Assembly through appropriations for primary care residencies in Family Medicine, General Medicine, and General Pediatrics.

The Ohio State University Primary Care Program is designed to implement the objectives of the Ohio General Assembly and the Ohio Board

of Regents to increase the number and quality of post-M.D. trainees in primary care disciplines. Since The Ohio State University has existing programs in the three primary fields of Internal Medicine, Pediatrics, and Family Medicine, emphasis has been placed on establishing specific General Internal Medicine and Pediatric residency positions. Also, funds will be used to support the teaching activities of primary care trainees in those departments which particularly need this help.

THE OHIO STATE UNIVERSITY
1989-91 BIENNIAL BUDGET REQUEST

Geriatric Medicine and Gerontology

Budget Summary

	<u>1989-90</u>	<u>1990-91</u>
Budget Request Components:		
Office	\$ 155,000	\$ 165,000
Research	90,000	110,000
Other Educational Activities	<u>95,000</u>	<u>120,000</u>
TOTAL	\$ 340,000	\$ 395,000

Program Statement

Current support for geriatrics and gerontology in the Ohio General Assembly is limited to support of medical student education to ensure that these students are adequately prepared to serve the estimated 70 percent of their patient population who will be over the age of 65. Ohio's current 65+ population is 12.3 percent, with a 12.9 percent increase from 1980 to 1986. An even more rapid population growth is taking place in the 75-and-older segment. This segment is expected to have a net growth of 48.5 percent from 1980 to the year 2005.

Today's medical student must be trained to take care of the elderly; therefore, the primary focus of The Ohio State University's Office of Geriatrics and Gerontology is on improving the basic science and clinical education of our medical students in geriatric medicine. The Office currently is working closely with the Area Health Education Center Program, now funded by the State of Ohio, to provide community outreach and educational sites for medical students, nurses, dentists, and students in the allied medical professions. This effort will continue. The purpose of this program request is to fund the education and training of non-physician health-care workers who will be needed to care for the one-in-five Ohioans who will be over the age of 65 by the year 2020.

Special education and training funding is being requested because of the critical shortage in all fields of faculty trained in geriatrics and gerontology. These fields include medicine, nursing, dentistry, the allied medical professions, pharmacy, and optometry. The national shortage of certified geriatric physicians clearly documents this major national problem. A special effort will be made to train faculty members in community and technical colleges throughout central and southeastern Ohio in the principles of geriatric medicine and gerontology.

Inasmuch as the health care delivered in such institutions as nursing homes is delivered by licensed practical nurses (LPN) who are typically trained in community hospitals, colleges, and technical schools, we would hope this training program would address the critical problem of the 100 percent turnover of LPN staff in many nursing homes in this region. High turnover rates have been shown to be directly correlated with the quality of life of nursing residents.

The second focus of our training and education programming will be on the development and implementation of educational programs for both pre-service and in-service students from the various health professional disciplines such as medical students, residents, practicing nurses, student nurses, allied medical professions students (including physical therapy and nutrition), dentists, pharmacists, optometrists, long-term care facility administrators, geriatric social workers, and health and recreation specialists. A significant portion of the "office" and "other educational activity" funds will be used to develop "teaching nursing homes" along the same model and for the same reasons that teaching hospitals have been developed. Upon the opening of The Ohio State University Hospitals' Davis Center for Arthritis and Geriatrics, expanded educational programs will be possible for medical students as well as other non-physician health professional students. The Geriatric Patient Assessment Unit will be a teaching and research unit providing state-of-the-art knowledge in disease prevention and detection. A Geriatric Patient Assessment Program also will provide an excellent opportunity to teach health professional students to become patient educators by having them actively participate in our community outreach programs.

Funding also is requested for geriatrics and gerontology research programs which will keep Ohioans active and independent for as many years as possible, and for the development of innovative patient care services which will ensure high-quality care for the elderly at a minimal cost.

Research is needed on a wide variety of problems affecting Ohio's elderly, which range from basic research on aging to clinical research. For example, it is estimated that there are 10,000 Alzheimer's disease victims in Franklin County alone. Research also is needed on health policy and the delivery of health services through innovative mechanisms. Most of the requested funds will be used to support competitively awarded seed grants which result in increased federal and foundation support. Some funds also will be used as matching money for special research equipment in both the clinical and basic science laboratories. These matching funds are required to participate in such programs as the National Institutes of Health's major research equipment support program.

Research funds will not be limited to biomedical research, however. There are significant non-medical problems affecting Ohio's elderly which fall into the general category of gerontological research. Such problems as legal issues, housing, transportation, safety and physical security, living arrangements, exercise, and recreation will be explored.

THE OHIO STATE UNIVERSITY
1989-91 BIENNIAL BUDGET REQUEST

Maternal and Child Health Institute

Budget Summary

	<u>1989-90</u>	<u>1990-91</u>
Budget Request	\$ 800,000	\$ 800,000

Program Statement Summary

The mission of the Maternal and Child Health Institute is the promotion and augmentation of interdisciplinary research, education, and training, and the provision of health-care services for women and children. The Institute fosters an environment in which basic scientists, clinical researchers, social scientists, and policy makers work together in the interest of maternal and child health in Ohio and the nation. It will generate and disseminate new knowledge and promote the use of such knowledge to improve the health status of women and children.

Program Statement

The Institute will link the Department of Pediatrics of The Ohio State University College of Medicine/Children's Hospital--one of the nation's major resources in research and health care for children; the Department of Obstetrics and Gynecology/The Ohio State University Hospitals, a major resource for research in women's health and high-risk pregnancy; and the Department of Preventive Medicine/The Ohio State University Hospitals, with its strengths in epidemiology, biostatistics, the economics of community health, and health policy and planning. Our reputation in training already has been recognized by major funding from the federal Maternal and Child Health Program to establish a Continuing Education Institute for children with special health care needs and the funding of fellowships in behavioral-developmental pediatrics.

In obstetrics, we have been awarded a grant by the Robert Wood Johnson Foundation for the regionalization of perinatal care programs, received monies from the State of Ohio for a high-risk pregnancy project, and been funded by the March of Dimes for study of the prevention of pre-term delivery. In preventive medicine, our Biometrics Laboratory is involved in the design and analysis of approximately fifty projects each year, and we have been studying the data of the National Longitudinal Survey of Youth, U.S. Department of Labor, 1979 to 1986. This data base now contains maternal-child information on a sample of nearly 6,000 births, including developmental measures.

To our knowledge, there is no other Institute that combines such resources and strength in research, training, and health care activities in one community. In addition to the departments and facilities mentioned above, other University departments and State and local health and health-related agencies will be involved to enhance the potential of this endeavor for serving the health of women and children in Ohio and disseminating information throughout the country. This is a most important and exciting opportunity for The Ohio State University and the State of Ohio.

THE OHIO STATE UNIVERSITY
1989-91 BIENNIAL BUDGET REQUEST

Neurobiotechnology

Budget Summary

	<u>1989-90</u>	<u>1990-91</u>
Budget Request	\$ 800,000	\$ 800,000

Program Statement

Recombinant DNA technology is fundamental to the practice of medicine in the 21st century. Molecular biology will allow scientists to identify the gene, establish the defect in the gene, and develop a rational gene replacement therapy. These techniques represent the future in establishing the diagnosis of disease already present, susceptibility to the disease in the future, and a treatment regime that corrects defects instead of symptoms. Neurobiotechnology will describe the normal brain and nervous system. This methodology will provide rational therapy for diseases of the nervous system in an aging population. Familial Alzheimer's disease, muscular dystrophy, Parkinson's disease and the devastating hereditary diseases of the very young, such as the lipidoses, can and will be treated by the scientific advances of the Neurobiotechnology Laboratory. This laboratory will be a resource for the State, the nation, and, indeed, the world.

An initial investment of \$800,000 per year for two years will provide start-up funds for four senior investigators. Within two years, these senior investigators will be expected to generate funds in excess of \$1,500,000 per year for the Neurobiotechnology Laboratory. The laboratory will initially create over thirty new positions for technical staff members. Planned expansion will allow the Neurobiotechnology Laboratory to grow within five years to a staff of ten senior scientists, a supporting staff of 60 to 80 technical people, and a budget of between \$3,000,000 and \$5,000,000 per year.

THE OHIO STATE UNIVERSITY
1989-91 BIENNIAL BUDGET REQUEST

Ohio Sea Grant Program

Budget Summary

	<u>1989-90</u>	<u>1990-91</u>
Budget Request	\$ 385,000	\$ 385,000

Program Statement Summary

The Ohio Sea Grant Program at The Ohio State University is part of the National Sea Grant College Program--a partnership of government, higher education, and industry--designed to accelerate the development, conservation, proper management, and economic utilization of our country's marine and aquatic resources. And, because Ohio's north coast is Lake Erie, Ohio Sea Grant focuses its efforts on the economic and environmental revitalization of this resource. The goals of the program are to be accomplished through research applied to current problems, education and training, and advisory service--the transfer of technology and knowledge to the people who need it in a form they can use.

Program Statement

Ohio Sea Grant is part of the Lake Erie Program at The Ohio State University which also includes the Center for Lake Erie Area Research (CLEAR) and the Franz Theodore Stone Laboratory. Stone Laboratory, located on Gibraltar Island in the harbor at Put-in-Bay, Ohio, is the oldest freshwater biological field station in the country, having operated since 1895. This laboratory fulfills an important educational role for the program. Each summer 12 to 16 college courses are offered at the laboratory, while an aquatic biology workshop program for students Statewide is offered during the spring and the fall. The programs at the laboratory are of particular benefit to science teachers throughout the State, and the graduates of the program are among the leaders and decision-makers who have brought about the dramatic improvement in Lake Erie.

The Ohio State University recognizes that Stone Laboratory is a unique teaching and research facility and, as such, is an asset to the entire State. As a result, since 1985, Ohio State has operated the laboratory as a consortium for all State-assisted colleges and universities in Ohio by allowing students from these schools to register and pay fees at their home institution. Research projects, some of which are funded at other colleges and universities within Ohio, are both basic and applied/problematic in nature and designed to solve problems which

are inhibiting the wise development and utilization of our Lake Erie resources.

The program is requesting \$770,000 for the biennium to support the use of Stone Laboratory by all State-assisted schools and to increase the research, education, and advisory service efforts of Ohio Sea Grant to better leverage federal funds.

The Ohio Sea Grant Extension Program within the Ohio Cooperative Extension Service includes three full-time agents in Port Clinton, Elyria, and Painesville. It is the responsibility of each agent to transfer the most recent technological developments to those Lake Erie users needing the information, and identify problems and determine needs for future research projects and/or educational programs. The activities of these agents are both of an educational and public service nature. Furthermore, the agents work throughout the State, as evidenced by a Lake Erie fishing clinic conducted in Dayton and attended by 430 people, and teacher workshops in Cincinnati and Marietta.

Ohio Sea Grant's ability to bridge the gap between Ohio's colleges and universities and the private and public sectors, one of the program's major strengths, was greatly enhanced with the formation of an advisory committee for each agent. Each committee is composed of influential and energetic citizens who represent a diverse set of interests in Lake Erie. The functions of the committees are to: (1) legitimize and lend credibility to activities; (2) provide technical and socio-economic guidance; (3) advise on program and area needs; (4) aid in prioritizing Sea Grant activities; (5) evaluate programs; and, (6) help conduct programs.

Consequently, Ohio Sea Grant provides for input from the private sector when research priorities are established, and it provides a mechanism to coordinate and direct the capabilities and expertise of the private and public sectors and Ohio's many colleges and universities toward critical problems and issues relating to Lake Erie and Ohio's coastal resources. The program's successes are well recognized. In addition to being a land-grant University, the U.S. Department of Commerce will soon designate The Ohio State University as a Sea Grant University.

Surrounded by four states and two countries, Lake Erie is one of the most important lakes in the world and is Ohio's most valuable natural resource. A measure of the program's success has been the development of the charter fishing industry, each a small business. Since the start of Ohio Sea Grant, the number of charter fishing businesses has increased from 34 to more than 1,000. Lake Erie is truly at the heart of Ohio's developing tourist industry--the average sports enthusiast comes from 86 miles away, and 10 percent come from more than 150 miles away.

However, Lake Erie has economic values reaching far beyond its recreational assets. Each day 11 million people get their drinking water from Lake Erie. The lake is surrounded by well over 20 power plants,

many of which use in excess of 500,000 gallons per minute for cooling purposes. Annually, Ohio ships almost as much coal from Ohio ports as is produced within the State. Lake Erie also is the most productive of the Great Lakes, and produces more fish for human consumption than the other four combined.

Lake Erie is not without problems. It is the most organically enriched of the Great Lakes, with tons of agricultural fertilizers and sewage pouring in daily. This fertilization has caused major portions of the bottom water in the central basin of the lake to become devoid of oxygen and fish life. Furthermore, fish from areas such as the Ashtabula River and the Black River (Lorain) cannot be eaten because of contamination with toxic chemicals. The Ashtabula River and the Maumee River are considered "Areas of Concern" by the U.S. Environmental Protection Agency. Erosion is also a significant problem, with \$60 million of erosion damage documented in Lake and Ashtabula counties from 1972 through 1976.

Ohio Sea Grant and CLEAR have addressed all these issues in the past and will continue to do so in the future, as the program's projects deal with all issues related to Lake Erie. In addition to the biological emphasis on fishery development and management and pollution abatement, the program has ongoing projects to: evaluate and determine the impact of various segments of Ohio's coastal economy (such as charter fishing, marinas, the bait industry, fishing tournaments, private boat fishing, marine trades, and shipping); determine new techniques for underwater welding; develop a biological organism to control blue-green algae blooms; determine movement of contaminated sediments in the lake; and many more. A portion of the funds requested in this proposal (\$275,000 per year) will be used to support the research, education, and advisory service efforts of Ohio Sea Grant to maintain this program as a true center of excellence for all water and coastal research in Ohio.

The remainder of the funds requested, \$110,000 per year, will be used to further develop the course program at the Franz Theodore Stone Laboratory for all students in Ohio's State-assisted colleges and universities. It is widely recognized that experience at a biological field station is essential for students pursuing degrees in ecological, environmental, and resource management fields. Stone Laboratory's island location near Put-in-Bay provides a valuable and unique experience for Ohio's college and pre-college students. There are things that one cannot learn in a classroom or from a book. Stone Laboratory emphasizes the hands-on approach, and students learn by doing. The requested funds will provide valuable assistance to the summer teaching program as we open the laboratory to all students at Ohio's State-assisted colleges and universities for valuable training. These funds will enable us to augment the laboratory's role as a center of excellence in the State, the region, and, indeed, the nation.

Because a 1 to 2 match is required for Sea Grant's federal assistance, previous support from the Board of Regents literally has allowed Ohio Sea Grant to exist. Without that funding, most of the

research, education, and advisory service efforts would not have been possible. These efforts include such activities as: the publication of our newsletter "Twine Line," approximately 10 to 12 research projects per year going back to 1983 (the first year of the Regents' support), the activities of three Sea Grant agents and their advisory committees, and the training of countless science teachers through our education program.

Some of Ohio Sea Grant's accomplishments include:

1. Work with the U.S. Army Corps of Engineers to have sand that was dredged from the harbor at Fairport returned to the littoral drift zone, where it will reduce erosion. The success of this effort has been valued at \$380,000 per year;
2. The organization and development of "State Legislature/Congressional Days on Lake Erie" in June annually from 1982 to 1987. These programs allowed members of our General Assembly and Congressional delegations and their aides to learn of the value of Lake Erie and experience personally its beauty and richness. They now understand not only that Lake Erie is not dead, but that it is one of the most productive and important lakes in the world. This valuable educational program began operating on alternating years in 1987;
3. The development of a market for gizzard shad, a heretofore valueless fish, valued in excess of \$100,000 per year;
4. The development and implementation of a Marine Reports Program (MAREPS) with NOAA Weather Service to improve Lake Erie weather forecasts and make the lake a safer place to boat;
5. The development and implementation of an artificial reef program for the central basin of Lake Erie, which will serve as an economic stimulus for the region (over 7,000 tons of material has been placed at reef sites near Cleveland and Lorain);
6. The development of economic value estimates for the various components of the Lake Erie economy to aid resource managers;
7. Assistance to communities in planning shoreline and tourist development projects to avoid wasting valuable community dollars and to help them maximize the impact of tourism dollars rather than simply increasing their number. As an example of our success in this area, one community saved \$8,000, and others received federal grants of \$375,300 and \$200,000;
8. The education component of the Ohio Sea Grant Program is considered the best in the nation, and Ohio's Sea Grant agents have received two-thirds of all the Great Lakes Sea Grant awards for their work on recreational fishing development, artificial reef development, market development for underutilized fish, and erosion prevention;

9. Assistance to many small businesses, including charter fishing businesses which have increased in number from 34 when the program started to more than 1,000 in 1988;
10. The development of new techniques to weld under water.

THE OHIO STATE UNIVERSITY
1989-91 BIENNIAL BUDGET REQUEST

The Ohio Center for Foreign Languages
and International Development

Budget Summary

	<u>1989-90</u>	<u>1990-91</u>
Budget Request	\$250,000	\$275,000

Program Statement Summary

The growing importance of international activities and the increased role of Ohio in a global economy make it essential for Ohio's students, government agencies, and businesses to have access to the skills and knowledge necessary to understand foreign languages and cultures. Without such support, Ohio risks the considerable progress it has made in the international economy as other states undertake efforts to improve their competitive edge. The establishment of an Ohio Center for Foreign Languages and International Development would be a vital step in helping to maintain and enhance our position in an increasingly competitive world economy. The Center will provide instructional programs, research, and enhanced use of technology in promoting the understanding, study, and teaching of foreign languages, as well as services to businesses and the public sector dealing with foreign interests in international commerce.

Program Statement

Funds are sought to permanently establish an Ohio Center for Foreign Languages and International Development at The Ohio State University. The Center would pursue a program of service and outreach, program development, research, instructional projects, and liaison to achieve its objectives. Its statewide mission would include, but not be limited to, the following:

1. Instructional and Program Development: Promoting the study and teaching of foreign languages -- especially the less-commonly taught languages -- throughout the educational system of the State of Ohio, elementary school through graduate school. Particular attention would be paid to the needs of the Ohio business community for instruction in languages and cultures in world areas of particular interest.
2. Research and Technology: Conducting research and development programs on the application of educational technology to foreign language instruction, disseminating the results of these programs, and assisting in the implementation of advances in educational

technology for the benefit of foreign language instruction throughout the State. Such technological developments (including computer-assisted instruction, satellite broadcasting, and two-way interactive video) could be used, for example, to make language instruction available at numerous sites around the State, eliminating the need for learners to commute to a major urban center.

3. Service, Outreach, and Liaison: Enhancing the capacity of the government of the State of Ohio and Ohio's businesses to interact effectively with foreign governments and businesses for the betterment of the economy of the State of Ohio.

Ohio has taken a place in the world economy, exporting agricultural and manufactured products and simultaneously becoming a center for foreign investment as well. If these ties with foreign governments and businesses are to continue to grow and add to the economic welfare of the State, we need an educated, internationally sophisticated populace. The proposed OCFID could provide a valuable and economical link, ensuring through one office and administrative network that appropriate resources around the State were known by, and made available to, schools, colleges, government agencies, and businesses as they develop programs or uncover needs related to foreign languages, cultural understanding, and international commerce. Duplication of effort in establishing and maintaining expensive, low-use programs in languages, cultural, and business support would be eliminated. Instead, economies of scale could be realized by consolidating these activities into a common center.

The establishment of such a Center would be consistent with, and could even help achieve, goals articulated in recent State and federal legislation, such as the State and federal versions of the "Education for Economic Security Act," the establishment of federal language and area centers at colleges and universities around the country, and two more federal programs passed in recent months: the School Improvement Amendments of 1988 and the Omnibus Trade and Competitiveness Act of 1988. Included in both of these acts are a number of English literacy provisions, model elementary and secondary foreign language programs, outstanding foreign language teacher awards, and the star schools program for technology to improve instruction in mathematics, science, and foreign languages. The more forward-looking Ohio can appear through, for example, the establishment of a Center such as the one proposed here, the more likely we are to be favorably positioned to receive federal funding from programs that focus on these same areas.

In many ways The Ohio State University is the ideal setting for such a statewide Center. Located in the State's capital, at the geographic center of the State, and at its flagship university, such a Center could be in direct touch with government and international trade offices, would have easy access to legislators and the legislative process, and would be reachable by (and could reach out to) any school, business, or community in the State via a relatively short drive. The existing Ohio State Foreign Language Center, with its established Statewide, national, and

international contacts could serve as the starting point for such a Center. The University's foreign language departments, offering regular instruction in some 25 languages, have a history of cooperation, innovation, service, and dissemination. The University already is home to two federally funded language and area studies centers (Middle East and East Asian), has two more centers (Slavic and Latin American) of long standing, and the relatively new Institute for Japanese Studies. Finally, The Ohio State University is internationally known as a result of decades of hosting thousands of international students, scholars, and visitors on this campus every year. The existing network of international alumni could be used to provide Ohio businesses ready access to their counterparts in dozens of countries around the world.

The need is there, the time is right, and the resources are largely in place to make the Ohio Center for Foreign Languages and International Development a reality, for the economic and educational benefit of all Ohioans. Ohio, like many other states, is now recognizing its need to ensure an educated populace that will be in a position to assume leadership positions in internationally interdependent communities in the 21st century. New York, Florida, Tennessee, North Carolina, Louisiana, and Oklahoma are among the states that have taken, and are taking, vigorous action to upgrade their capacity to provide instruction in foreign languages and to provide support for international studies and business activity. Ohio's initiative will ensure an impressive level of support to its educational institutions and businesses, and a leadership position in the economic redevelopment that will be the result of a forward-looking State commitment to enhanced international competitiveness.

THE OHIO STATE UNIVERSITY
1989-91 BIENNIAL BUDGET REQUEST

Ohio State Biotechnology Center

Budget Summary

	<u>1989-90</u>	<u>1990-91</u>
Budget Request	\$1,577,000	\$1,774,000

Program Statement Summary

Biotechnology is rapidly emerging as a major factor in the economy of the future. Agriculture, medicine, and industry all stand to benefit tremendously from developments in biotechnology. Worldwide, nations and businesses are making biotechnology a top priority. The Ohio State Biotechnology Center is emerging as a focus of research and knowledge in this area. Through this proposed program, we intend to expand our activities to include a major effort in training, research, service, and technology transfer to establish the foundations necessary to make the academic and industrial communities in Ohio major participants in the field of biotechnology.

Program Statement

Through the use of recombinant DNA technology, biotechnology promises to revolutionize current practices in agriculture, medicine, and industry in general. Its potential is so immense that hundreds of new companies have been founded in the United States and in other countries to pursue the new avenues opened up by this technology, and most major corporations have started major divisions in biotechnology. Many nations, including Japan and other industrialized countries, have declared biotechnology a top national priority and invested heavily. Worldwide investment in this emerging field is estimated to have already exceeded \$50 billion. By 1991, it is projected that the market size for biotechnology products will be about \$5 billion. This market is expected to quadruple to \$20 billion by the year 2000. The economic impact of this new technology is obviously recognized.

Most major industries realize that biotechnological aspects will assume an increasing proportion of their industrial activities and by the turn of the century, biotechnology products are expected to represent a major portion of the business in agriculture, medicine, and industry in general. The pharmaceutical industry already depends on biotechnology for diagnostics and the production of new drugs for the treatment of diseases.

In agriculture, the chemical industry that currently produces large amounts of chemicals to protect our crops will be involved in improving plants to resist diseases and adverse environmental conditions, including drought and salinity. Food producers also are involved in developing methods to improve the preservation, processing, and nutritional value of food crops. A quantum jump in profitability in agriculture will occur as new uses for agricultural raw materials are discovered in manufacturing, specialty chemicals, and consumer products.

Methods of environmental decontamination and protection also are being examined. Biotechnology is currently addressing the issues of coal desulphurization and oil spills. Already familiar household goods such as detergents, produced by corporations such as Proctor and Gamble, are being made environmentally safer by the use of biotechnology.

Most states have recognized that industrial competitiveness depends on the ability of the state or the region to provide skilled workers who can handle new technologies and provide expertise at the cutting edge of science. Therefore, most states have launched major efforts to promote biotechnology research and training, and thus attract new industry to their areas. One striking example, of course, is Iowa, a relatively small state that provided \$55 million for a physical facility and \$18 million for operating expenses over a four-year period to launch an agricultural biotechnology center.

A broad range of major programs in biotechnology already exists in most states. A coordinated research and training effort in this new technology will be vital to Ohio's economic future. The Ohio State University proposes to provide the lead in coordinating and promoting biotechnology research, training, service, and technology transfer through the Ohio State Biotechnology Center. A major emphasis of the proposed program will be to bridge the basic and applied areas of biotechnology and thus facilitate development and transfer of the new technology.

The comprehensive nature of The Ohio State University allows it to provide a leadership and coordinating role in all of the areas that would be affected by this new technology. This proposed program, although modest in its scope for a state as large as Ohio, will concentrate on four aspects: research, training and education, service, and technology transfer.

In the research area, it is intended to provide support for innovative, exploratory, and interdisciplinary projects that are likely to generate new technology. Such select projects will constitute collaborations among researchers in basic sciences and those who are attempting to solve practical problems in agriculture, medicine, industry, and other areas. The frequent interactions among basic and applied scientists resulting from such collaborative efforts will facilitate both the development and implementation of new technologies.

The training and educational aspect will include workshops designed to provide theoretical knowledge and hands-on experience to personnel in the academic, industrial, and governmental communities throughout the State. A research participation program will allow faculty members in smaller institutions to pursue projects in major university laboratories involved in research at the cutting edge. Such training will enable them to apply new technology in their own research and in teaching their students.

Since biotechnology will affect all aspects of our lives, education in this field must begin in the high schools. However, teachers usually lack formal training in newly emerging and fast moving fields such as biotechnology. Workshops and summer research participation will be provided for high school science teachers and junior college faculty so that they can incorporate the latest knowledge into their instructional programs. To attract Ohio's fair share of the brightest, creative young people into biotechnology, predoctoral and postdoctoral fellowship programs will be established. Such outstanding scholars will be placed in interdisciplinary research efforts involving collaboration between basic and applied sciences in the best laboratories in Ohio. Their creativity will strengthen research, open up new dimensions, and provide the intellectual resource that will attract industry.

Service activities of the proposed program will include establishing a core facility with technical staff that will provide access to sophisticated instrumentation and technological expertise. Researchers from both the academic and industrial communities would have access to this service. Such access will allow individuals not located in the largest industrial and academic centers to conduct research at the cutting edge.

The final component of the proposed program is technology transfer, a critical need for industrial development. It is said that without a vigorous effort in technology transfer, the United States will become the greatest exporter of basic information and greatest importer of finished products. This program will facilitate the transfer of information that is generated in the academic laboratories of the State to the industrial clientele who can use it to improve the processes and products that will have a direct impact on the Ohio economy. Such a program will include the evaluation of new technologies, their possible applications, and the feasibility of implementation. This effort will identify potential opportunities to the Ohio academic community and facilitate the sharing of knowledge between the researcher and the producer.

James L. Nichols, Treasurer

THE OHIO STATE UNIVERSITY
OFFICIAL PROCEEDINGS OF THE
ONE THOUSAND TWO HUNDRED AND FORTY-EIGHTH MEETING
OF THE BOARD OF TRUSTEES

Columbus, Ohio, February 3, 1989

The Board of Trustees met at its regular monthly meeting on Friday, February 3, 1989, at The Ohio State University Fawcett Center for Tomorrow, Columbus, Ohio, pursuant to adjournment.

** ** *

Minutes of the last meeting were approved. The meeting recessed into Executive Session for the purpose of considering legal issues and personnel actions as follows: faculty/staff appointments and reappointments, resignations and terminations, leaves of absence without salary, professional improvement leaves, emeritus titles, and medical staff appointments/reappointments. Upon motion of Mr. Teaford and seconded by Mr. Berry.

** ** *

February 3, 1989 meeting, Board of Trustees

The Chairman, Mr. Immke, called the meeting of the Board of Trustees to order on February 3, 1989, at 1:20 p.m. He requested the Secretary to call the roll.

Present: Leonard J. Immke, Chairman, John W. Berry, Shirley D. Bowser, Hamilton J. Teaford, John J. Barone, Deborah E. Casto, John W. Kessler, Milton A. Wolf, and Leslie H. Wexner.

--0--

REPORT ON THE COLLEGE OF EDUCATION

Mr. Immke:

Dr. Brand, will you please introduce Dean Donald Anderson.

Dr. Brand:

I would like to introduce Donald Anderson. Don is the Dean of our College of Education and received his Master's degree and Ph.D. degree at the University of Minnesota, where he was also a high school teacher and principal for a number of years. He took a post-doctoral degree at Ohio State. He is prominent in a number of national organizations and has been with Ohio State since the late 1960's. Don is going to spend a few minutes in telling us about recent developments in the College of Education. Don --

Dean Donald P. Anderson:

Thank you. I have some material to distribute here. There are a few of my colleagues who think that I also should have an appointment in the College of The Arts because I was Acting Dean of the College four times. Maybe that qualifies me for an appointment in Drama, I'm just not sure. Myles, did say that I taught. I was a mathematics teacher for a number of years in Minnesota. I was a high school principal, first in a very rural school and then one of the suburban schools of Minneapolis before I finished my degree and came down here.

I have a lot of ties to Ohio State, including the fact that three of my four children have graduated from Ohio State. My oldest in engineering, a Bachelors and Masters; he then changed careers and is now finishing his residency in medicine at the University of Cincinnati. My second has his degree in Natural Resources and is part way through an MBA degree program here. My youngest, the third to graduate from here, finished in teacher education last year and is substitute teaching and looking for a job for next year. So, I hope I can help her in that regard. Then I have a very severely retarded daughter who has been living in a private residential school for fifteen years.

Let me, if I may, talk a little bit about the College, following this outline. There are over fifty institutions in Ohio training and preparing teachers -- the thirteen state universities plus a large number of the private liberal arts colleges. That means in effect that Ohio State's College of Education is committed to playing a very unique role. There is no need for us to get into the mass production of teachers. There are shortage areas right now, but we do not see that as our major charge. Being a part of a flagship university, we feel that we have a special capacity and a commitment to research and development kinds of activities to preparing programs to deal with certain at-risk populations, doing some of the kinds of things that I think we are best suited for.

We have been, over the last fifteen years, consistently ranked as one of the best -- in many cases the best -- colleges of education in public universities. There has been no recent ranking. The most recent was in 1980 which was a major reputational study where Stanford University was identified as first and Ohio State as second among all

REPORT ON THE COLLEGE OF EDUCATION (contd)

Dean Anderson: (contd)

colleges of education. We have a number of program areas that are ranked in the top five including: educational administration; foreign language education; industrial technology; our whole School of Health, Physical Education, and Recreation; special education; curriculum; and an area that is coming into great prominence with us, the area of reading and literacy. There is a conference going on downtown right now. It started last night and we had 2,400 people in attendance at a conference on children's literature. It follows on a conference that we had earlier in the week on reading recovery where we had 1,300 people in attendance from twenty states and foreign countries, as well as Ohio.

The College has a long history of leadership development. In fact, that is how we gained our reputation -- I am convinced -- the reputation of fifteen, twenty years ago. A number of our graduates have moved into very prominent spots. I will sometime later talk a little bit about the Holmes Group. The Holmes Group is a group of 97 universities committed to reform in teacher education. They are primarily the major research universities. Eleven of the 97 deans have a connection to Ohio State. Three are on the faculty here and eight of them are our graduates. We have a number of people in major school superintendencies across the country -- interestingly enough, not many in Ohio. Most of them have moved to the east or west because of the salary differentials. The chief state school officer in this state and one other state, Frank Walters and one of his colleagues, is a graduate of our College. We have a number of people on State Department of Education staff's. A number of the people, in fact, on our Board of Regent's staff downtown are graduates of our College. The Chancellor of the Higher Education System in Tennessee, Arliss Roaden, was a member of our faculty, then Dean of our Graduate School here, before going to Tennessee. So I think our reputation has been built more on that kind of prominence than it has on something that is coming up. We want to continue to do that, obviously, but we also want to increase substantially our research productivity, and I will get back to that.

Our faculty is changing. The faculty grew substantially twenty years ago. Those people who joined the faculty then, many of whom were in their 30's, earlier 40's, some of them are at or now past retirement. We have a faculty that is still predominantly male, although that is changing very, very rapidly. We hired twelve new faculty members last year, eleven happened to be female. We were working at that, but that was an extraordinary event. More importantly however, of the thirteen retirees last year, only one was female. That is where we will make the difference. Our male faculty are the senior, older faculty and as they leave and we are replacing them, we are getting a better distribution.

During the last year we graduated 900 students with Baccalaureate degrees, 429 Masters students, and 113 Ph.D. students. Our baccalaureate students, I think, are very typical of the undergraduate population here at Ohio State, in terms of their origin. Most of them come from Ohio, but there are a relatively small number of foreign students in our undergraduate program. Our masters students are mostly local students. Most of our masters students are part-time students --evenings and summers -- they are teachers and administrators in school systems or working in educational organizations throughout Central Ohio. Our Ph.D. students come from across the country. And again, we have a relatively small number of foreign students. Of the 113 Ph.D. graduates, my guess is that less than 10 of them would have been from outside the United States. We had the highest graduate enrollments in the University. Most of our students are involved in someway or the other in professional education. There was a time fifteen years ago when most of them were preparing for and had experienced working in the K-12 schools. That has changed a good bit. We have a larger number of people now that

REPORT ON THE COLLEGE OF EDUCATION (contd)

Dean Anderson: (contd)

are interested in higher education. We are moving very rapidly in working with business and industry, providing people that move into training positions and in many, many spots across the country.

At the undergraduate level we offer a very large program. Thirty percent of our undergraduate student credit hours are offered in Health Education and Physical Education. These are elective courses primarily for the undergraduate student population here at Ohio State. A very attractive program and it would grow much more if we had both the personnel and the physical resources to do it. The ACT scores and the grade point averages of our undergraduates are increasing. And that is in large part a function of the demand to get into the field. We hit our low probably seven or eight years ago when there were very few people electing to come into our undergraduate programs in teacher education. Now we are pressed in the opposite direction. We accept from one-half to two-thirds of the students who are trying to get into our elementary ed program, for example. The GRE scores of our Ph.D. student applicants are among the highest in the University. I was a little surprised about this myself when Roy Koenigsnecht mentioned this the other day. But, that too is changing very rapidly. And that is a function of generating a lot of outside support for students. And, again, I will spend some time on that later.

The faculty is involved -- and I have been very actively involved myself -- in providing some leadership in a national teacher education reform movement. That is the Holmes Group membership. The outside funding for our research and development activity in the College has doubled in the last five years. We are now at the point where our outside funds exceed our general budget, which is very unusual in any education college and may in fact be unusual in any of the colleges of the social sciences. We were able to generate that kind of outside funding. That was true before the National Center for Vocational Education moved into the College and now, of course, they will have about \$4 million worth of funded activity next year and so it will clearly exceed the general budget support. Last year we were the fourth highest college in terms of generating money for student support. With the addition of the National Center, we should move into the third slot next year. The National Center has been retitled the Center on Education and Training for Employment. I was a little bit concerned at the time as to why we were changing the name; and now, in fact, I am pleased with the change.

There is a real change in terms of what we are trying to do in employment education today. I think we need to schuck the term "vocational ed" because it has some very negative connotations on the part of a lot of people. Brad Butler, who some of you probably know, the former CEO of Procter and Gamble, is very active in the State and in working with the Governor's Commission recently, has been very critical of the old fashion vocational education. He has indicated so, going back to a committee that he chaired seven or eight years ago that prompted a lot of the change in teacher education. The report was entitled, "Investing In Our Children." It came out of the Committee on Economic Development and was an impetus for drastic changes in the teacher education field. We had 250 staff members in that Center two years ago and we are now down to 59 now. We will probably down size a little more between now and June 30. Although we have been very, very successful in generating support for the people that are there.

About two years ago I set up a Center for Special Needs Population. We have about \$3.5 million worth of annual project funds now dealing with the special needs students. The special needs students would be the special education, handicapped students and now to include the students that are at risk, who may or may not be handicapped.

REPORT ON THE COLLEGE OF EDUCATION (contd)

Dean Anderson: (contd)

Sometime this spring I intend to establish yet one more center. A way to connect colleagues in the College, and in this case across the University as well, in Teacher Education. The Art Ed, Music Ed, and Home Ec Ed and Ag Ed students' programs are housed near the Colleges, but we work very closely with them and we want to incorporate them in another major research thrust in Teacher Ed.

The American Educational Research Association is the most prestigious organization in our field, and we have moved, as indicated here, from fourteenth to fifth over a period of ten years in terms of the AERA presentations there. It is a tough jury system and we are very pleased with that kind of change.

Three years ago with some new program monies we established a Policy Center on campus in the College. There are ten such centers across the country. The model is the Pace Center at California. The Pace Center at California is supported by Hewlett Packard. The intent of our center and clearly of the Pace Center is to do research, do some synthesis of research, and the results should be something that would be intended to inform policy makers. We have been working with the State Board of Education, with school boards, with the State Department of Education, and have had some conversation with legislators. In fact, Herb Asher and a number of legislators met with the Pace Director when he was here on campus about two months ago and outlined the kinds of things they are doing there. We think there is a lot of promise here.

In terms of service, our faculty hold a lot of prominent positions. We have faculty members in our College who have been presidents of the National Council of Teachers in Mathematics; the International Reading Association; the Association for Supervision and Curriculum Development; the American Alliance of Health, Physical Education, and Recreation and Dance. Many of these, by the way, are organizations that are comprised of both the Higher Ed and K-12 persons. It is unusual in most of those cases for a Higher Ed person to be elected president of those -- something like the National Council of Teachers in Mathematics.

We have mechanisms for providing service to the community. I directed, until two years ago, the School Study Council of Ohio, a consortium of 70 school systems here in Central Ohio. The intent was to provide staff development opportunities for the persons in the school system -- at all levels of the school system. One of my colleagues saw that operation and spun off another similar organization -- our Business/Industry Consortium. We now have about fifty members of a Business/Industry consortium, including The Dispatch, which just joined a couple of days ago; Libert; Huntington; Banc One; Nationwide; Columbus Auto Parts; different kinds of organizations. We started off by working with training directors and have done a lot with them in terms of developing training materials for their employees.

Under the other services category identified here -- in physical education we have a large cardiac rehabilitation program. After my bypass surgery of a year and a half ago, I am a recipient of the service provided by this enterprise in our own College. We started the faculty/staff fitness program at least ten years ago. We are doing fitness assessment. We will be involved with the Health Service in this fitness assessment program for the whole of the University.

We run the Peters-Huelsman Clinic. A clinic on campus that is setup to provide diagnostic services and some kind of treatment services for youngsters with learning problems. We have major funded projects in the area of vocational rehabilitation. We are working with the Columbus Schools on an interesting induction year teacher project.

REPORT ON THE COLLEGE OF EDUCATION (contd)

Dean Anderson: (contd)

We had some outside funding at the beginning, we are now working without the funding. The reason we got involved in these kinds of services was to generate some funds, but that is not the major reason. We are providing mechanisms for our grad students to get experiences. That is true with all of our programs over in Physical Education. The Peters-Huelsman Clinic -- all of our school psych students have a lot of opportunity to work in the clinic in an internship kind of role. We do manage for the University, the Essex School and the Governor's Institute for gifted high school students. That is more of a service for us. There is not a lot of involvement of grad students in that kind of activity.

I want to take a couple of minutes to talk about two examples of major activity going on in the College right now. The first is Reading Recovery. I mentioned that Monday night of this week I was downtown, there were 1200 people in attendance. This was the fourth Reading Recovery Conference. This activity began six years ago, here on Campus. It began with an investment by you the Board. We brought to this campus a distinguished visiting professor from New Zealand. A woman, Marie Clay, who had begun over there to test out an idea about saving kids when they were very young, not allowing kids to fall behind. The basic concept of Reading Recovery is that we take the very worst readers, the very poorest readers in first grade and work with them one on one. It is a very costly project in the front end -- working with them one on one to bring them up to the average first grade level by the end of the year. If we have done that then they are discontinued -- we take them out of the program. Our success rate, over four or five years is very, very high. And the interesting part is that they have a little more experience in New Zealand, so they have longitudinal data there. Once we can bring kids up to that level, they don't slip. Some of them will because obviously you are going to have some very low ability people in that group. But the other programs of remediation in reading haven't worked very well. You keep providing remedial work on top of remedial work every year and they just keep falling farther behind. So the intent here is to take those first graders and work very intensely with them. It has really caught on. We received some funds after Marie Clay left from the Jennings Foundation to support an experimental effort with Columbus Schools. We began by preparing teacher leaders who will go back into their schools and work with teachers. The Legislature provided funding for the first time in '85-'86 and we prepare teacher leaders here at Ohio State who in turn, as I said, go out and work in their own school systems.

So we now have 23 sites across the State. During the last biennium the Legislature allocated \$1.5 million to this effort. Most of it going to the schools to release teachers so that they could come in here for study and to release them from some of the responsibilities on the job. We obviously get some support here. The State Board of Education for the next biennium is requesting \$7.6 million. The State Superintendent from Illinois has been over here and he thinks that he is going to out Reading Recover Ohio. We have a big jump on him right now, but Illinois is moving in very, very rapidly. We have two faculty members here from the University of Illinois who are going to be here all year. We have four teachers from the Chicago Schools here with us all year and they will begin over there next year. But as I said, we have about a four year lead on them right now.

We prepare about twenty teacher leaders per year. There are over 800 first grade teachers in Ohio who are now prepared to be Reading Recovery teachers. We have had over the last three years faculty members from fifteen universities here. And they come and spend a whole year with us. They are not registered for credit. Most of these people have degrees, but they work here and everybody in training works with a first grader. I was mentioning to my colleague over here, Dick Anderson is the head of a

REPORT ON THE COLLEGE OF EDUCATION (contd)

Dean Anderson: (contd)

very, very large funded project in Illinois -- the Center for Reading Instruction. He is also on the evaluation team for this enterprise. When he came over here three years ago, he made a speech at the very first Reading Recovery Conference. He indicated a lot of skepticism. He is now preparing to be a teacher leader. He is doing it in the Chicago Schools and every day he works with a first grade student. Which is what we expect of everyone preparing to be teacher leaders.

We now have gotten two major grants to supplement -- we have always had some evaluation funds from the State Department of Education, but we got a major grant last year from the MacArthur Foundation. Tom Tobin was here and watched some of this in action and it was a fascinating experience for the person who came down from Chicago. We got a federal project and we got some major MacArthur Funds to do more research associated with this particular activity. Just published is a monograph on Reading Recovery that went to every chief state school officer and probably to most of the superintendents in the country and I expect we will be plagued with calls from here on in. But the enterprise is growing. As I said we have had university people here from outside of the State and from inside Ohio who have spent the year with us. That is increasing because we have a national defusion project that will support some teachers coming in here.

The other activity that I want to spend a few minutes on is the Holmes Group. About five or six years ago, a number of deans from major research universities got together with two goals in mind. One is to be involved in the major reform of teacher education and at the same time to, as best we could, reform the teaching profession. These are major research universities. I was asked to serve on the writing team that prepared the first document and I now serve as the Vice President of the Holmes Group and I coordinate the Midwest Region, the nineteen universities in the ten state midwest area.

There are five goals -- I will only talk to two of them. The first is that of making the preparation of teachers more intellectually sound. It involves extended preparation, it involves building a program for teacher education on top of a liberal arts degree. The activity going on right now within our University is very, very supportive of where we want it to be. This works easily in our traditional secondary academic areas like mathematics and English. It doesn't work quite so well in science or in social science, because teachers out there generally teach a range of subjects, they just don't teach physics. They are very apt to be teaching physics and chemistry, especially in the smaller schools.

There were some real problems. Our faculty in Elementary Ed were very much concerned as to how they would proceed. We now have the third group of thirty students going through -- all of whom had degrees in a variety of areas. The faculty there are believers -- if they could, they would like to stop with undergraduate students right away. This year we -- without any publicity at all, we have not written anything about it to publicize it -- we had 275 applicants for thirty slots. We have an attorney; we have a Ph.D., in that group; most of them are baccalaureate degree holders. They are generally under thirty, most of them are twenty-three, twenty-four years of age. They have gotten a degree, most of them have gone out and worked for a little while. They are not brighter, but they surely are more mature and the faculty love them. And the hiring agencies do too.

So, that is our experience with post-bacs. It is a bit of a problem, because many of them come in without adequate preparation in mathematics or science, so they end up taking a lot of undergraduate course work in addition to their pedagogy courses. We will be

REPORT ON THE COLLEGE OF EDUCATION (contd)

Dean Anderson: (contd)

communicating to students the kinds of preparation they should have if they want to come in and move through the program without this remedial kind of activity.

The second of the five goals, and the last one I will talk about, is that of connecting better to the schools. We are working with area schools now and setting up what we are calling professional development schools, built on the model of the teaching hospital. And there will be a lot of contribution by our colleagues in the schools. There are 97 universities in the Holmes Group right now and the organization is in its third year and alive and well.

In the strategic plan for the College that we submitted to the Provost's Office a few weeks ago, we identified six major targets: we want to increase the level of research activity; we want to put our emphasis on the impact of research in educational problems -- we want to take on the tough topics, we want to deal with dropouts and at-risk kids and changing technology. We will continue emphasis on our Ph.D. and M.A. programs. We have an M.Ed. degree on the books, we will use that as a vehicle for our post-baccalaureate Teacher Ed -- our Holmes-type programs. And we will, of course over the years, reduce our undergraduate programs as those graduate programs are growing.

We will continue our international efforts. We want to maximize impact on Ohio State and on humankind around the world. We want to concentrate ourselves. We have had a history over the years of kind of having a shot gun approach. We have little kinds of activities going on in a lot of places. We have had some major, major service projects. I co-directed what, I guess, turned out to be a \$10 million Nigerian Ed project, where we had students here for about 6 or 7 years, at least. We don't want to do that again, that was just too much -- it was too much one way -- too much service delivery. We want to get involved in activity where students and faculty are exchanged. Where we learn from the experience, not just delivering services. And we would like to concentrate in a smaller number of places.

We are the College of Education and we are really concerned about high quality instruction, so we want to spend a lot of our attention on that. We have two major funded research projects now from the Apple Corporation, creating the Apple Classroom of the Future. And we have a faculty member in special education doing some very interesting work with robotics and how robotics might be used with multiply handicapped kids.

The last on our list and maybe the most important is our minority recruitment programs. As I expect you know, there are a decreasing number of minority, especially black minorities, in the K-12 classrooms. Currently across the country, and now I am dealing with all minorities, almost 25% of the students in K-12 schools across the country are minority students. The growing population, of course, is the Hispanic population -- not in this area but clearly in the South and the Southwest. Currently, about 12% of the teachers are minority. The projections are that within five years it will be over 30% of the students will be minority and the teaching population might be down to as low as 5%. It is a very, very serious problem so we need to attend to it. We are doing a little bit better in our post-bac programs than in our undergraduate programs. We have a better percentage of black minorities in the post-bac programs than in undergraduate, but it is still far too small.

A number of the leaders in some of the black colleges have, in the recent past, been discouraging students from going into Teacher Ed. The President of Wilberforce was on a talk show here a year and a half ago and she was very clear and she said she would

REPORT ON THE COLLEGE OF EDUCATION (contd)

Dean Anderson: (contd)

not encourage the talented young minority students to go into teaching, because they have many more opportunities available to them. Obviously, in the past teaching has been open to minority students, or at least for a long time here. And we have gotten more than our fair share. Now, we are in very, very tight competition for them and in the long run most of the people, most of the black leaders understand the dilemma about not having some of those people in the classroom, especially in classrooms where kids come from lower social economic levels.

Well, I'm going to stop there -- I have been rambling and I apologize for that. If there are questions, I would try to respond.

President Jennings:

A very thorough report for an exciting College.

Mrs. Bowser:

The Holmes Group. I know, Don, when you started you talked about no longer issuing a baccalaureate degree. I don't know where you are in that progression --

Dean Anderson:

Let me try to do that in a hurry if I can. We have had a real dilemma here with the Regional Campuses, because the Regional Campuses, as you may know, all have four-year teacher education programs right now. They are very dependent on those four year programs for a number of reasons, not the least of which is financial. Also, it is a strong tie into the communities through those programs and they recruit heavily in their community. So they want to maintain good relationships.

So we began exploration and Myles appointed a committee chaired by Joan Leitzel. We began exploring this a year ago of how we could deal with Regional Campuses. And the solution to the Regional Campuses seems to be a reasonable one for the way we will work in many of our programs on campus. We will maintain our baccalaureate degree in education. We will have a bachelor of science -- and let me stay with Elementary Ed for awhile. We will, down the road someplace when we can make this transition, have a Bachelor of Science in Education, but it will be a non-teaching degree. It will not lead to certification. Most of the course work, all but probably 20 or 30 hours will be in the Arts and Sciences. Right now there is a requirement for teacher certification in elementary that students have to have areas of concentration. Well, the major/minor doesn't work very well, because elementary teachers teach in about five or six different areas. So we will have a major concentration in one of those areas, but it will be like kind of a short major and maybe about four minors that these people will take. It will crowd them to do that in four years. A very modest amount of education. We will probably have some field experience and maybe some of the experience in education will be foundational, like take a course in sociology of the family. Some in the College; most of it outside.

Most of my faculty colleagues -- in probably all except English and mathematics where we just want to get rid of the undergraduate degree entirely. We know there are plenty of people to draw from out there and maybe in foreign languages as well. But in the social studies, as I said, we have the same kinds of problems. The teachers go out and they teach political science, economics, history, anthropology, and psychology. And maybe, if we can, it would be my preference to get out of the business, but we will not do

February 3, 1989 meeting, Board of Trustees

REPORT ON THE COLLEGE OF EDUCATION (contd)

Dean Anderson: (contd)

away with those degrees right now. We will have something like a pre-education baccalaureate.

Mrs. Bowser:

So you do both?

Dean Anderson:

We will do both.

Mrs. Bowser:

All right. Now my other comment was about Reading Recovery, which I am familiar with and I think it is a phenomenal program. What about, in addition to reading, doing a similar kind of program in math or science?

Dean Anderson:

It is a different kind of problem, I think, Mrs. Bowser. The study that was cited a couple of days ago -- the very poor showing that our students made is in part a reflection of the kind of people that we attract into Elementary Ed. We are attracting people who have great interest in reading. It is easy to talk, I mean -- there are 2,200 people downtown right now and they are excited about what they are doing because they are dealing with children's books and reading. These kinds of people are also strong in the social sciences, but they are not strong in math and science. And I am really concerned about that. Now, I am speaking of the general population. I think we attract more able students here, but if you take a look at all of the institutions that prepare elementary teachers -- when I said over fifty in Ohio prepare teachers, they all prepare elementary teachers. And some of them are very weak. They come in with very, very poor backgrounds. They know enough mathematics to teach mathematics, but it is the affect. I think they don't care about it, they are a little bit frightened by it, and it is very easy for that to be transmitted to kids. I am convinced that is a major problem.

Mrs. Bowser:

You don't think that children could be served by having a special program in math?

Dean Anderson:

I'm afraid not. I think that we are going to have to deal with it differently. We are going to have to somehow deal with special instruction, I think. We are going to have to break up a little bit, I don't want to do away with it entirely. The single classroom teacher who has control of all of a kid's experiences from grades 1-4. We are going to have to have a little bit of specialization there. I am not optimistic that we are going to be able to attract a lot of people with strong science and math backgrounds into education because of the great salary differentials. These people can go into other areas and make considerably more money.

Mrs. Bowser:

That is an interesting perspective --

February 3, 1989 meeting, Board of Trustees

REPORT ON THE COLLEGE OF EDUCATION (contd)

Dean Anderson:

It is a staffing problem, I am convinced.

Mrs. Bowser:

When you cited all of the honored persons that have graduated from the College of Education, you didn't mention my name.

Dean Anderson:

Or your daughter!

Mrs. Bowser:

My daughter, that's right!

Mr. Kessler:

Shirley, I thought that there was some question whether you graduated!

Mrs. Bowser:

I told you I wasn't an honor student, I didn't say I didn't graduate.

Dean Anderson:

Let me make it up by giving you a copy of a \$19.00 monograph -- how's that?

Mr. Teaford:

Again, with the Holmes Group -- in five years what do you anticipate is likely to be your M.A./B.S. mix? Is it going to be --

Dean Anderson:

I would say, I don't know what the numbers will look like, because we are really trying to work that out. We are fully committed to generate as much funds for this University as we are generating right now. We are not going to do anything crazy that is going to decrease tuition or subsidies coming into the University. We have an extended meeting coming up Tuesday of this week with a representative of the Provost's Office regarding that. The baccalaureates that we will provide -- we have two programs in physical education that are non-Teacher Ed. We have a very small recreational program that I think we are going to do away with. It is a very weak program right now. We also have a program in exercise science. A baccalaureate program which we will maintain. Now, that is not Teacher Ed. The rest of our programs, except for this large service compliment over there, are education related.

So, I really can't answer the question, Joel. Our bread and butter will be, of course, the post-baccalaureate, Holmes-type, masters degree program in Teacher Ed.

Mr. Teaford:

Do you expect that to be the majority?

REPORT ON THE COLLEGE OF EDUCATION (contd)

Dean Anderson:

That will be the majority, yes. We will keep the Ph.D. enrollments not any higher than they are right now. One of the concerns we had, of course, is how we are going to support all of those graduate students who now hold GTA positions. They will not be able to play the same kinds of roles and that is one of the reasons, again, why we're seeking outside fundings so we can attract the very best in here.

Mrs. Bowser:

Thank you.

Mr. Immke:

Any further questions? Thank you, Dean Anderson.

Dean Anderson:

Thank you, for the opportunity.

--0--

RESEARCH FOUNDATION REPORT

Mr. Barone:

Mr. Chairman, I would like to report on the Research Foundation grants and contracts for the months of November 1988 and December 1988 that are shown in the Board Agenda book. There are 177 awards listed for the two months which provide a gross income of \$18 million.

Funding for the first half of this fiscal year is 22% ahead of the same period last year. Federal funding is up 26% with increases from most agencies. Funding from industry is also up significantly with a \$2.2 million grant from Cray Research, Inc., to the Ohio Supercomputer Center accounting for much of this. Department of Defense awards are up largely due to a fear that there will be another DOD freeze. Program managers are trying to commit the money before this happens. Department of Education funding is down and here we see more clearly the effects of our loss of the National Vocational Center. National Science Foundation funding is down but only because of timing in awards. There is some speculation, though, that the big NSF Science and Technology Centers might reduce the money available for smaller projects. A number of big NIH awards has resulted in a substantial increase in Health and Human services funding.

Some highlights of awards are:

\$200,000 from Health and Human Services to Professors Chen, Guthrie, and Li to train Southeast Asian immigrants in the Franklin County area. This is for the purpose of exposing them to wellness techniques or health techniques.

\$134,000 from the Department of the Interior to Professor Bossler of the Center of Mapping for Digital Graph Enhancement.

\$85,000 from the NIH to Professor Litsky of the Department of Surgery to investigate Bone-Cement Biomechanics.

RESEARCH FOUNDATION REPORT (contd)

Mr. Barone: (contd)

A few highlights of these research projects. I thought the most important one was the Southeast Asian population. It is the fastest growing culture in this country. They are also at an unusual higher risk for high blood pressure and heart disease. However, they have little awareness of prevention or treatment measures. This projects brings together faculty in medicine, sociology, anthropology, and health education to train Southeast Asians in health techniques. It is unique in its cultural sensitivity. The researchers on this project are becoming internationally known for their expert knowledge in this field. The award they received is one of the largest granted by this agency.

Another one for the \$85,000 is the Bone-Cement Interface Biomechanics in the Department of Surgery given to Alan S. Litsky. The most frequent postoperative complication of cemented total joint replacement procedures is loosening of one or both components. The loosening process initiates by resorption of bones at the bone-cement interface. The hypothesis for this investigation is that the resorption is due to excessive local contact stresses which occur due to the geometry of the interface. This research will establish a firm experimental foundation for the contact stress hypothesis of loosening.

Dr. Tzagournis, would you like to highlight on the medical event?

Dr. Tzagournis:

I think you have done that very well.

--0--

HOSPITALS BOARD REPORT

Mr. Teaford:

Mrs. Bowser is going to let me do the talking today. There has been a Board meeting and an Executive Committee meeting of the Hospitals Board since we last met. At the December Board meeting, Dr. Clausen announced the new Medical Staff Officers: Dr. Bill Smead is the new Chief of Staff, and Dr. Bill Bay the Chief of Staff-Elect.

We heard a number of reports as we always do and did approve advertising for bids on the Dodd-Davis Interface Project and some patient unit upgrades and remodeling.

At the January Executive Committee Meeting, we heard a significant report from the Clinic Task Force on ways in which we can improve the delivery of services in the Clinic area. Everything always seems easy until you hear a report like that of the incredible components that go to make up the way our Clinics operate. So, it is not going to be something that we are going to be able to do overnight, but I think it is something that the Hospitals is clearly committed to advancing.

We did approve a revised budget. The principle reason the budget was revised was because, of course, we do not have a cancer hospital open and as a consequence we have a far better economic picture because it is not open.

We also approved, as subject, obviously, to the approval of this Board, the purchasing of a lease hold interest in the Beechwood Medical Center. And Dr. Kramer announced the formation of a Task Force on Nursing. Again, one of our very significant problems is the Hospitals. The problem is that we do not have enough nurses and indeed we have

HOSPITALS BOARD REPORT (contd)

Mr. Teaford: (contd)

closed a few beds because we do not have enough nurses. So as we all know, this is a problem that is not peculiar to Ohio State's Hospitals. In fact, we are probably better off than most hospitals, because for one thing we pay more. But nevertheless it is a crucial problem which this Task Force will address.

One other thing that Mr. Nichols did not add to my notes. As you know from the agenda, we will be appointing a new Director of the Hospitals. But I want to say that that Director will find it a far easier task because of the absolutely superb job that Jim Nichols has done in operating the Hospitals in the interim. It just cannot be over emphasized how well he has done and I think we owe him a great debt for that service.

Mrs. Bowser:

I certainly concur on that.

Mr. Teaford:

One other little thing that is my debt to our immediate past Chairman, Mr. Redman, I have, as I promised him I would, set with the Billing Committee. The one that is going to get us a unified bill in the year 10,000. It is indeed making progress. And I think that the difficulty now is how all of the medical groups will govern such a program. They have indeed been directed to come up with a method of governing that and there were certainly suggestions that they had better. I think that once the governance is in place that will be an easy task to complete.

Mr. Immke:

I'm sure that Mr. Redman will be encouraged by that.

Mr. Berry:

Why don't you tell them if they don't you are going to bring Mr. Redman back as a special advisor to see that they do.

Mr. Teaford:

Actually, I instilled enough fear just by myself, without even having to do that.

President Jennings:

On the nursing shortage, we have now had four straight months where the net change in nurses is positive. Not positive by a lot, but we are making some considerable progress on that issue. We do have to keep moving forward. We are gaining more than we are losing. So there is progress being made, but it is a national problem and our salary and benefits is helping considerably on that. But it is a tough one to get going.

Mr. Immke:

Any questions? Thank you, Joel.

--0--

STUDENT TRUSTEES

President Jennings:

Thank you, Mr. Chairman. Let me deviate one item from the agenda. Very late this morning Governor Celeste informed the University that he has named two students to serve on the Board of Trustees of The Ohio State University.

Sophia Lorraine Paige, a second-year student in the College of Medicine, from Columbus, Ohio, will serve a term expiring May 13 of this year. And I might add what we have asked the Governor to do is then to reappoint that person for a full term. The Governor is not under any obligation, of course, to do that, but that it is a phase in. The second person is Laurel Ann Davis, an honors student pursuing a Bachelor of Science degree in psychology, will serve a term ending May 13, 1990. She is from Tipp City, Ohio.

As you may remember, legislation calling for student membership on the Board of Trustees was signed by Governor Celeste April 26, 1988. I might add, a rigorous application and selection process was developed by the leadership of the three student government organizations at Ohio State, and five candidates were recommended to the Governor in mid-December for his consideration.

I want to thank and commend the leadership of those organizations -- Steve Dibert, President of the Inter-Professional Council; Roger Musgrave, President of the Council of Graduate Students; and Athena Yiamouyiannis, President of the Undergraduate Student Government. I want to thank them for all of the work they have done in bringing together a list of five outstanding people and I am absolutely certain these two will serve this Board well.

As an antidote, one of the members of the Board of Regents was present in the interviewing process for all the student candidates and the Governor's Office throughout the State and that individual was extraordinarily complimentary about Ohio State's candidates. We expect them to be the best, but it is nice to hear that confirmation that they are the best.

Unfortunately, this announcement came this morning so we couldn't have them here. We will have them here at our next meeting. And hope that that goes well, I am sure it will.

--0--

REPORT ON EARLY RETIREMENT

President Jennings:

Three years ago the State developed a process in the retirement system where institutions could buy up to five years of retirement credit for employees of the University. There are a variety of rules associated with that buying depending on age, length of stay, and the number of years one has been in the system, and that was in enabling legislation.

We instituted this, I think, three years ago for the faculty and two years ago for the staff. That program that we instituted three years ago for the faculty and staff has now expired and this year we will want to consider whether or not to renew that program either as it is or with any modifications. I want to bring that to you so that you can be thinking about the activities there. As you heard this morning in the Financial Report, the program on an economic basis is clearly to this point a success. Roughly, 1,400 people are taking

REPORT ON EARLY RETIREMENT (contd)

President Jennings: (contd)

advantage of this, a very large cost associated with it, but also a very large return. We expect eventually, as this has gone through, that the average pay back to the institution will be about 2 1/2 to 3 years. Obviously, we can't absolutely tell that right now depending on who gets replaced and as to what salaries, but clearly there is enough leeway where it looks like it is an appropriate economical thing to do.

Now, when we talk about renewing it we've got to talk about, I think, several aspects and we will look into detail on it. I would like your advice if there is anything else that we ought to look at. Obviously, economics -- as I say, they look good right now, although, as you also noted you have heard some cash flow problems and we have to deal with those. But economics becomes a part of it. In fact, the quality of the institution also becomes a major portion. Losing 1,400 of our long-time, fine people is a difficult thing for the institution to swallow. We have to evaluate those loses in the context of the institution as to whether that was appropriate. In the same context, it is a marvelous benefit and for the people still here it is a marvelous thing to be able to look forward to, to have that benefit available. Hopefully that will keep a lot of young people here at Ohio State for a lot of years even though they may have other opportunities elsewhere.

We have to look at how we might handle individual departments that have particular problems. For example, I think, in Veterinary Anatomy we had eight out of ten of our permanent faculty retire this year. Institution-wide that is not a major affect, but in a particular area like that it is especially hard. We also have to look at this in the context of the fact that with staff, now, mandatory retirement is gone and with faculty it will be gone by 1992. We have to deal with what the projections and and what we think right now is that the we have gone through the bulk of the retirements and we would not have the massive numbers of retirements in the future that we had this time. You will notice on the Personnel list, for example, there are some 98 - 100 Emeritus Titles. That is all a result of the retirements that took place in December.

We will be coming to you with this as we go, but if there are any comments that you have now or in the future, please let us know.

Mr. Teaford:

How many of the 1,400 were faculty?

Mr. Ihrig:

Four hundred and forty-six.

Mr. Teaford:

One of the senses that I had with the way it was done, this system of having it expire every so often, is that there is the psychology that it will never happen again and I better retire now. I almost wonder if we would be in better shape with that being a permanent benefit of the University and then we sort of have an even impact in terms of this. A number of persons asked me directly did I think this was ever going to happen again, because if I had said I didn't think it was going to ever happen again, they would have quit on the spot. So, I think, that is one of the reasons we had such a high number. There was a certain feeling that maybe that opportunity wouldn't pass again.

REPORT ON EARLY RETIREMENT (contd)

President Jennings:

I don't think there is any question. As you recall the key thing for making it temporary of course is not the long-term economics, those look good. It is the short-term cash flow. When we asked Weldon to come up with \$54 million, that is the one-time buy out. If that gets excessive, then we need an ability to shut it down, but not necessarily permanently. That is obviously something that we have to --

Mrs. Bowser:

It impacted the Hospitals' budget, too, if you remember.

Mr. Teaford:

It impacted everything.

President Jennings:

At the Hospitals the accountants are requiring us to charge this off all in one year, even though STRS and PERS allow the payment to be made over a five-year period. But the interesting thing and the evidence on this is it is worthwhile. Every time I offer to have the institution pay the cost of the early retirement, I get a very quick reject on that. Because the deans and the department heads know that they are going to be able to get the savings and keep that savings associated with it. But, it is a marvelous benefit and the economics are there, but the quality of funding --

Mrs. Bowser:

What is the time frame for decision on this?

President Jennings:

This summer.

Mr. Scott:

Mr. President, just one reaction to Mr. Teaford's comment that has to do with whether you make it permanent or not. As indicated, one of the things that you wanted was the flexibility. As you know, anytime you implement a program that people think is with perpetuity and you try to change it or to get rid of it, they perceive as a take back. So having it over a period gives you flexibility. And more importantly, looking at the demographics the University's faculty and staff now, the average age is probably under fifty. So, the bulk that the President is talking about went out last year and I would suspect a great many of them would have gone in any event, because they have the large number of years accumulated in the system.

President Jennings:

We also have, Scottie, a large number of people who went into this retirement system when they were students. That doesn't happen any more. This happened way back in the early '60's. So you have some people that are 60 years old with 40 years time in the retirement system. And that is at 80% of their final years pay.

--0--

DEMOGRAPHICS

President Jennings:

If we could then for a moment put on our long-term hat and talk about the demographics that we are facing as an institution over the next, roughly, fifteen years. As we begin getting into discussions about the long-term mission and activities of this institution, I would like to start today with a discussion about what our market looks like for the next several years.

I will start that discussion by noting first of all that enrollment predictions for higher education historically have been notably bad. In the Student Affairs Committee this morning we were talking about the reputation of a Morrill and Lincoln Tower. We were talking about how that is improving and so forth. If you were to look at the plans of the University that are sitting around from the early 1960's, you would find that all along Stadium Drive were a series of towers, like Morrill and Lincoln Towers. There are West Campus plans with thirteen additional buildings out there, all to house this huge surge that was being projected for Ohio State in the early '60's, to an institution of 100,000 based on a whole lot of things, and of course never happened. I think there would have been seven of those towers.

Probably the only characteristic that can be described about enrollments is that they are counter cyclical. Nationwide and generally locally, they go up during recession times and tend to decline during boom times. That is very, very important for us to note that for the State of Ohio. The best explanation of the reason they go up generally in recession times is that the opportunity cost of going to college, namely the other job, the job one would have had had they not been in college, that opportunity's costs goes down and makes college more expensive when there is unemployment and it goes up in times of recession. That is important for Ohio because Ohio's economy is changing radically right now and the value of education is becoming very different.

The second thing is that Ohio State is in an unusual situation where we have an enrollment cap placed on us by the General Assembly and we are at that cap today. The enrollment cap is 40,000. They ask, "Well, how do you get the 58,000?" That is because there are several exceptions, health sciences, agriculture, the regional campuses and so forth. But we are essentially at that cap today. That is important in the context that last year, for example, we got roughly 19,000 applications to Ohio State, with a class size projected at 6,500. So, we are way over the amount of students that we can handle. The reality probably is that there is zero risk that enrollment will decline over the next fifteen to twenty years, because we are so far above demand right now. Nevertheless, the characteristic of that student body is going to be affected very much by the demographics.

The key variable, of course, is the number of high school graduates, and that is pretty easy to project right now. The U.S. experienced, as you all know, a baby boom after the War. That baby boom officially ended, from a college point of view, in 1979. When I say officially ended, that is when the number of high school graduates began to decline. And nationally the number of high school graduates will continue to decline until 1994. When 1994 arrives, the children of the baby boomers will begin to arrive on campus. And as you see from that chart, there is a steady progression upwards in the number of high school graduates through the year 2000 into the 21st Century. Nationally, that characteristic is there -- a continuing decline and then a huge increase again after 1994.

In Ohio on the other hand, the pattern is roughly the same, but the increase after 1994 does not go nearly as high as in the United States. In fact, we will be down 14% in the number of high school graduates by the year 2004. So that Ohio's effect from the demographic echo is not going to be there.

DEMOGRAPHICS (contd)

Mrs. Bowser:

And that is because people are leaving the State or --

President Jennings:

People leaving the State because of the State's economy, the declining and the aging of the State's population. The only thing that could begin to change this would be some big population growth that would bring on a great deal of young people. These projections on high school graduates are relatively accurate, because these people have already been born by and large.

What effects that? Probably the biggest effect in Ohio is the initiatives that are being taken now in the economic situation where the percentage of youngsters going on to college is increasing rapidly. Historically, this State has been among the lowest in terms of students graduating from high school and going on to college. Historically we have sent about 43% of our high school graduates on to post-baccalaureate education. The national average historically has been 53%. We are about 37th in the nation, this is depending on how you count, in terms of our percentage of the applicants that go on to college. The best explanation that people can come up with is the fact that this State has been characterized as a heavy industry state. For the jobs available and the income available from those heavy industries, whether it is steel, auto, rubber, or whatever, those income opportunities are so much better in this State than they have been elsewhere. There again, the counter cyclical nature of enrollment. Remember when we were talking about a decline in a number of high school graduates from 1979-94, enrollment not only at Ohio State hasn't declined, but across the State enrollment in college has not only not declined, it has increased about 1% a year since that beginning decline took place. The other thing that is happening is that a much higher percentage of students are going on to college than has been the case in the past. So, I would expect Ohio to see a continued increase in the number of students going on to college. So, while the demographics are not favorable to us, the number of customers, if you will, will continue to rise over a long period of time.

In addition, State policy to improve -- when we talk about the overall variety of programs that we have, whether it is a reading assessment program being funded by the State that we were talking about this morning, or math placement where we are in virtually every high school in the State, or Ohio State out there, or Bowling Green out there recruiting students and giving them the information about the college -- the Governor and the General Assembly people mean it about getting the cost down in terms of going on to college, that all should all begin to force it on up.

Some other things that we need to be thinking about is continuing education activity. There is no question that the twenty-five to thirty-four year old category of population is increasing and is going to increase for several years to come. That is a large bulk for not only graduate education, but continuing education. As an institution, Ohio State is not a big continuing education institution. We have 7,000 continuing education students, but the Board of Regents' regulations close us out of a lot of continuing education that is done by Ohio University, by Miami, by Bowling Green.

Mrs. Bowser:

How do they close us out of it?

DEMOGRAPHICS (contd)

President Jennings:

They simply prohibit us from offering those courses in Franklin County.

Mrs. Bowser:

I see. It says 7,000 students that we have in Continuing Ed, does that go against our quota?

President Jennings:

If it is after 5:00 p.m., it does not. The other thing that it is pretty clear is that in Washington national service is beginning to be an attractive policy. There is an awful lot of discussion on both sides of the aisle in Washington about some sort of mandatory national service bill for young people. Not military -- military could satisfy it, but a peace corp type of thing, or a whole variety of things. That discussion seems to be gaining ground. That of course would probably effect us in terms of enrollment in a negative way. One of the interesting phenomena right now is the average undergraduate student at Ohio State takes 5 1/2 years to graduate. Probably if you had a national service, that number would go down very substantially, because they are staying in longer. I don't think there is anything wrong with that because the education is broadening.

Graduate enrollment -- we expect to remain the same, although there will be a lot of shifts there and we are going to have to stay flexible. We talked about one this morning, in terms of our new programs in foreign languages and a major shortage in foreign language instructors. We will be changing our undergraduate curriculum towards science. That may have an impact on what Don was talking about this morning, of more interest in science and mathematics at the lower levels, and better training for science and mathematics on the part of our elementary educational teachers in that context. That is a longer term activity.

The other thing we should recognize is that in 1970 the typical college student was a male undergraduate between the ages of 18 and 24, attending full-time. In 1987, the typical college student was a female undergraduate with an increasing likelihood that she was over 25 and attending part-time. That is not Ohio State, but that is national and that shift is taking place in a very major way. Discussion?

Mr. Teaford:

Mr. President, in the one area that seems to defy the sort of recession driven model of why people come to college, is in terms of minorities it seems to me. Because, as I understand it, while Ohio has significantly greater number of minorities graduating from high school, except for last year, it is the opposite in terms of going to college. Do we have any sense of what makes that population deal with it differently?

President Jennings:

We think that our young scholars program is directly related to that. It is a whole combination, but summed up in a social attitude that a college education is either of no value or beyond the means of the community. And what we need to be doing is to be whether it is in the Mt. Vernon area of Columbus, or the black neighborhoods it is not just the Young Scholars Program, but getting an educational process of the value of a higher education and the fact that it is available, independent of financial means. But that is a problem that so far has not been solved. We are attacking it in that direction, but those are hypotheses.

DEMOGRAPHICS (contd)

Mr. Teaford:

As you know, in Columbus it is now the case that any graduate of the Columbus Public Schools can attend one of the institutions of higher learning in this County. Hopefully, those kinds of programs will do something to --

President Jennings:

That is right. Remember that when Don says 25% of the primary and secondary school population are minority what that means is 75% of our market is either female or minority. And that is a market that we are not 75% enrolled in right now.

Mrs. Bowser:

How do you think the demographics that you have presented will change the relationship between the number of undergraduate students we have and the graduate students we have? What do you see there?

President Jennings:

Well, as we reach that bottom in 1994 and we begin to bottom out -- not as much in Ohio, but I think it will parallel -- what that is going to start doing is pressing the capacity of our educational system in Ohio. We've got excess capacity in our educational system right now, but not a lot. Shawnee State is there and it's got some expansion; Ohio University, I think, is 5,000 below its enrollment ceilings, and so forth. As that takes place, this State is going to have to be thinking about how they add capacity to the undergraduate program. I think that Ohio State is at its limits in terms of ability to deal with more students. That is why I think the enrollment ceiling is a good thing. But, I would be very reluctant myself to see us moving away from an institution that is roughly two-thirds undergraduate.

Mrs. Bowser:

So would I.

President Jennings:

I think that all the higher education administration literature would say that if you want to be a great university, you've got to be two-thirds graduate and one-third undergraduate. I think historically that was probably correct. But I think we are going to recognize that a large undergraduate population today is essential to accomplish all three of the teaching, research and service missions, because of comprehensiveness, because of scale economies, and because of the diversity needs of not only an undergraduate education, but graduate education as well.

Mrs. Bowser:

So you don't see a necessary fluctuation in the relationship between undergraduates and graduates?

President Jennings:

Right now, I think, we are 43,000 plus or minus undergraduates, and 12,000 plus or minus graduate professionals.

DEMOGRAPHICS (contd)

Mrs. Bowser:

And you are looking for the same ratios?

President Jennings:

I think we will be 43,000 undergraduates for the foreseeable future. I think that probably the time that we will test that is when our dropout rate stabilizes. That is going down right now. When that stabilizes and we find out what our future dropout rate -- and that is going to be several years before that stabilizes -- then we will be formally addressing that. But I think at this stage it is not there.

The other thing is to keep in mind -- the expansion of a graduate program is just not expensive, but it is a very, very long-term type of activity. But, there again it is one of our advantages over everybody else of being a comprehensive institution. We can shift within even though the totality doesn't change.

We were talking this morning, who would have thought ten years ago that I would be talking about shortages of language teachers. Who would have thought that one of the Provost's toughest issues is to accommodate the students demands for Spanish. Ten years ago, we were barely putting enough people into languages to justify having a Spanish department. But today it is just "boom." That's again our advantage, because those shifts come from within in a comprehensive institution. But if you are comprehensive, you can deal with that. But, if you are Johns Hopkins for example, you can't.

Mrs. Bowser:

They are dealing with it.

President Jennings:

Well, they are dealing with it in the sense of getting rid of 10% of their faculty. They're not going to fire them or anything like that. But, always note that in a University, one of the management principles that is fundamental is that you can tear down a department in no time, but it takes a generation to build it back up again. Ten years ago if we said, "we ought to wipe out Spanish because we don't have any demand for it," it would take a generation to build it back up again. That is one of the reasons that we are conservative about eliminating programs, because when Johns Hopkins cuts out 10% of their faculty in the liberal arts they are doing great, great damage to that program. They have a marvelous reputation.

Mrs. Bowser:

But they are also taking money from their medical field which is what they are noted for. Those persons are very unhappy because that is the amount of money they spend on research. So they are going to have to cut back their research.

President Jennings:

Johns Hopkins is a marvelous place, but it is small, not comprehensive, mostly graduate. But we don't have those overall enrollment risks, but we have internal enrollment risks. For example, in Dentistry today we are half of what we were five years ago.

DEMOGRAPHICS (contd)

Mrs. Bowser:

Half? Why is that?

President Jennings:

We were at 220 in a class, we are at 108 or 107 right now. First of all it is an economic situation. One cannot make a substantial living in dentistry now if you're a young dentist. We have been cutting it back in terms of qualified applicants. We knew we were going to come down, it is all over the country, but we've cut it back in terms of qualified applicants. That let mixes change. And Dentistry is one of the major improvements in quality throughout the institution.

I think the key though is we don't have that enrollment risk that a Hopkins would have or that many of these other have. Ours is mixed --

Mrs. Bowser:

Well, it is manageable because of the mix.

President Jennings:

That is right. I am probably the only University President and Myles the only Provost in the country that really don't have to worry about enrollment in terms of quantity. Because with these declines an awful lot of folks are scrambling. Ask any youngster who is reasonably bright and who has gotten reasonably good test scores, ask them how they are inundated by schools saying we want you in.

Mr. Kessler:

My daughter has missed it by graduating too early.

President Jennings:

An honor student might be visited by a hundred different universities -- they are scrambling for that activity. It is also why keeping costs down is so important, too.

Mrs. Bowser:

Thank you, good report.

--0--

INVESTMENTS COMMITTEE REPORT

Mr. Kessler:

The Investments Committee with all in attendance met this morning. Mr. Al Rodack gave a report on the Endowment Investment performance through January 20 which shows a total value of \$259.7 million. The Investment Portfolio is current at 41% equities; 25% fixed income; 14% real estate; and 20% cash. Mr. Rodack also reported on the performance of the University cash investments which has been invested at a yield to maturity rate of 7.5% over the past 12 months ending December 31, with an average maturity of 2.8 years. This exceeds the Donoghue money market index yield of 6.37% over the same period.

February 3, 1989 meeting, Board of Trustees

INVESTMENTS COMMITTEE REPORT (contd)

Mr. Kessler: (contd)

The Committee also reviewed the performance of the Endowment investment advisors through June 30, 1988.

The report of Ennis, Knupp & Associates along with comments by the Treasurer's staff were reviewed by members of the Committee. The principals of the Knupp firm will be on campus to meet with the Treasurer and his staff and the Investment Committee on February 20, at 1:30 p.m. Any interested members of this Board are also invited to attend.

The 2nd quarter preliminary report on the University's Capital Campaign shows total receipts and pledges of \$329.3 million through December 31. This December was the second largest December in the University's history, following the performance two years ago just prior to the implementation of the tax reform act.

That ends my report, Mr. Chairman.

Mr. Teaford:

That meeting would be here?

Mr. Kessler:

Yes.

(See Appendix XV for complete text of The Ohio State University Endowment Summary, January 20, 1989, page 727.)

(See Appendix XVI for complete text of the Recommendations from the Office of the Treasurer regarding the Ennis Knupp Report and the Investment Policy for The Ohio State University Endowment Fund, page 739.)

(See Appendix XVII for complete text of The Ohio State University Campaign, page 746.)

ACADEMIC AFFAIRS COMMITTEE REPORT

Ms. Casto:

This morning the Committee received a report from Provost Myles Brand regarding the work of the Special Committee on Undergraduate Curriculum Review and a model from a sub-committee in the Colleges of the Arts and Sciences dealing with proposals for the University's general educational requirements. The emphasis of these groups is on the development of basic skills in writing, data analysis and speech communication -- and simply put, speaks to curriculum changes effecting a liberal arts orientation. The current focus on campus is in the coordination of these goals with specific requirements for each major, a process which is expected to be completed in June with full campus implementation in 1990-91 academic year.

The Committee is excited about this activity and looks forward to the possibility of a more detailed report to the full Board from the Provost late this year. Are there any questions about it?

ACADEMIC AFFAIRS COMMITTEE REPORT (contd)

Mrs. Bowser:

Part of the problem with our new format is that you can't hear everything.

Ms. Casto:

That is true. But what is going on is really exciting. Of course, one of our biggest concerns is the expense of it, and our staff, and how it is all going to be implemented. But I'll tell you it could be one of the best things for this University and a model to follow for other universities. And I know it is really something that we all look forward to.

(See Appendix XVIII for complete text of Report to the Board of Trustees from the Subcommittee on Academic Affairs -- Undergraduate Curriculum Review, page 749.)

--0--

Ms. Casto:

The Academic Affairs Committee is recommending for approval the following resolutions:

AMENDMENTS TO THE RULES OF THE UNIVERSITY FACULTY

Resolution No. 89-71

Synopsis: The Academic Affairs Committee recommended the approval of the following amendments to the Rules of the University Faculty.

WHEREAS the University Senate pursuant to rule 3335-1-09 of the Administrative Code is authorized to recommend through the President to the Board of Trustees the adoption of amendments to the Rules of the University Faculty as approved by the University Senate; and

WHEREAS the proposed changes in the Rules of the University Faculty were approved by the University Senate on December 3, 1988, as follows:

AMENDED RULES

3335-5-4810 Faculty hearing committee.

(A) Membership.

The faculty hearing committee shall consist of twelve tenured members of the regular faculty elected by the faculty council. Each elected person shall serve a four-year term as a regular member followed by a one-year term as an alternate member.

Balance unchanged.

3335-5-4816 Committee on women and minorities.

(A) Membership.

The committee on women and minorities shall consist of thirteen members.

AMENDMENTS TO THE RULES OF THE UNIVERSITY FACULTY (contd)

- (1) unchanged.
- (2) Two staff members.
 - (a) One classified civil service staff member appointed by the steering committee from a slate of two nominees provided by the staff advisory committee. The term of service is three years.
 - (b) One administrative and professional staff member appointed by the steering committee from a slate of two nominees provided by the staff advisory committee. The term of service is three years.
- (3) Three students.
 - (a) One graduate student selected by the council of graduate students. The term of service is one year.
 - (b) One professional student selected by the inter-professional council. The term of service is one year.
 - (c) One undergraduate student selected by the undergraduate student government. The term of service is one year.
- (4) Two administration members, non-voting.
 - (a) The vice provost for minority affairs or designee.
 - (b) The executive officer for human relations, or designee.

Balance unchanged.

3335-9-10 Removal of entrance conditions.

Entrance conditions assessed against students at the time of admission or transfer to a college may be removed by the vice provost for student affairs, when the dean of a college in which the conditioned student is registered has certified to the director of admissions that the deficiencies have been made up. The methods to be followed in making up entrance conditions shall have the joint approval of the director of admissions and the dean of the college concerned and, for undergraduate students, shall be in accordance with policies established by the council on academic affairs in consultation with the council on admission and registration. Removal of entrance conditions shall take precedence over the student's regular college schedule. If credits earned in the university are to be substituted for such deficiencies, the student must earn a grade of A, A-, B+, B, B-, C+, C, C-, D+ or D in courses approved to remove admission conditions. Five quarter credit hours and ten credit points shall be added to the graduation requirements of the conditioned student for each unit of entrance condition to be removed by this method.

NOW THEREFORE

BE IT RESOLVED, That the foregoing amendments to the Rules of the University Faculty be adopted as recommended by the University Senate.

Upon motion of Ms. Casto, seconded by Mr. Teaford, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

**WAIVER OF PARAGRAPH (G) OF BYLAW 3335-1-08
OF THE ADMINISTRATIVE CODE**

Resolution No. 89-72

Synopsis: The Academic Affairs Committee recommended the following Waiver of Paragraph (G) of Bylaw 3335-1-08 of the Administrative Code.

WHEREAS the Board of Trustees of The Ohio State University did, on January 9, 1976, amend paragraph (G) of bylaw 3335-1-08 of the Administrative Code to state that "buildings and structures shall not be named for any person who is an officer or employee of the University or the State of Ohio, but may be named for a person who has been retired or has otherwise left such a position for a minimum of three years"; and

WHEREAS the President wishes to recommend that Honors House, be named to honor Albert J. Kuhn, who retired December 31, 1988, as Director of the University Honors Program:

NOW THEREFORE

BE IT RESOLVED, That the applicable requirements of paragraph (G) of bylaw 3335-1-08 of the Administrative Code be waived so that Honors House may be named for an officer or employee of the University or the State of Ohio who has not been retired from such position for three years.

Upon motion of Ms. Casto, seconded by Mr. Teaford, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

NAMING OF BUILDING

Resolution No. 89-73

Synopsis: The Academic Affairs Committee recommended the approval of the following naming of building.

WHEREAS this Board has authority in naming of all buildings and structures at The Ohio State University, as set forth in paragraph (G) of rule 3335-1-08 of the Administrative Code; and

WHEREAS during his 34 years at the University, Dr. Kuhn served as a faculty member, as Chairperson of the Department of English, and as Provost for the longest tenure of anyone in the past twenty-five years; and

WHEREAS Albert Kuhn's love of knowledge and learning and his loyalty to this institution are well-known; and

WHEREAS the President recommended, with the concurrence of the President's Staff, that Honors House be named in honor of and in tribute to Albert J. Kuhn who has been a role model for his faculty colleagues, a mentor for his students, and a most honorable and dignified leader for this community:

NOW THEREFORE

BE IT RESOLVED, That the above described building at 220 West 12th Avenue be named "Albert J. Kuhn Honors Hall" in honor of Dr. Kuhn.

February 3, 1989 meeting, Board of Trustees

NAMING OF BUILDING (contd)

Upon motion of Mrs. Bowser, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

DEGREES AND CERTIFICATES - WINTER QUARTER COMMENCEMENT

Resolution No. 89-74

Synopsis: The Academic Affairs Committee recommended the approval of degrees and certificates for Winter Quarter Commencement.

WHEREAS pursuant to paragraph (E) of rule 3335-1-06 of the Administrative Code, the Board has authority for the issuance of degrees and certificates; and

WHEREAS the faculties of the colleges and schools shall transmit, in accordance with rule 3335-9-29 of the Administrative Code, for approval by the Board of Trustees the names of persons who have completed degree and certificate requirements:

NOW THEREFORE

BE IT RESOLVED, That the degrees and certificates be conferred on March 17, 1989, to those persons who have completed the requirements for their respective degrees and certificates and are recommended by the colleges and schools, and that the names of those persons awarded degrees and certificates be included in the minutes of this meeting.

Upon motion of Ms. Casto, seconded by Mr. Teaford, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

PERSONNEL ACTIONS

Resolution No. 89-75

Synopsis: The Academic Affairs Committee recommended the approval of the following Personnel Actions.

RESOLVED, That the personnel actions as recorded in the Personnel Budget Records of the University since the December 2, 1988 meeting of the Board, including the following Appointment, Reappointments of Principal Administrative Officials, Appointment of Chairpersons and Directors of Academic Faculty, Departments, Program, and Schools, Reappointment of Chairpersons of Departments, Leaves of Absence Without Salary, Professional Improvement Leaves--Change in Dates, and Emeritus Titles as detailed in the University Budget be approved and the Medical Staff Appointments/Reappointments approved December 15, 1988, by the Hospitals Board be ratified.

PERSONNEL ACTIONS (contd)

Appointments

Name: R. REED FRALEY
 Title: Executive Director/Assistant Vice President
 Offices: University Hospitals/Health Services
 Effective: February 27, 1989
 Salary: \$124,680.00
 Present Position: Executive Director of Presbyterian Hospital of Dallas (PHD) and Executive Vice President of Presbyterian Healthcare System (PHS), Dallas, Texas

Name: NOEL MAYO
 Title: Professor (Ohio Eminent Scholar in Art and Design Technology)
 College: Arts
 Effective: October 1, 1989
 Salary: \$90,000.00
 Present Position: President of Noel Mayo Associates, Inc.

Reappointments of Principal Administrative Officials

J. LANCE KRAMER, Assistant Provost for Continuing Education, effective July 1, 1989, through June 30, 1994, pursuant to rule 3335-3-17 of the Administrative Code.

DONALD P. ANDERSON, Dean of the College of Education, effective May 1, 1989, through June 30, 1994, pursuant to rule 3335-3-17 of the Administrative Code.

LENA C. BAILEY, Dean of the College of Home Economics, effective July 1, 1989, through June 30, 1994, pursuant to rule 3335-3-17 of the Administrative Code.

Appointment of Chairpersons and Directors of Academic Faculty, Departments, Program, and Schools

January 1, 1989 through June 30, 1989

Electrical Engineering	Robert J. Mayhan*
School of Health, Physical Education, and Recreation	Melvin L. Adelman*
School of Music	Donald Harris*
University Honors Program	Alan M. Hausman*
Zoology	Peter W. Pappas*

April 1, 1989 through September 30, 1989

Academic Faculty of Labor Education and Research Services	Susan L. Josephs*
---	-------------------

*Acting Chair or Director

Reappointment of Chairpersons of Departments

July 1, 1989 through June 30, 1993

ATI - General Studies	Clyde E. Opliger
-----------------------	------------------

February 3, 1989 meeting, Board of Trustees

PERSONNEL ACTIONS (contd)

Reappointment of Chairpersons of Departments (contd)

October 1, 1989 through September 30, 1991

Linguistics

Brian D. Joseph

Leaves of Absence Without Salary

VLADIMIR E. BONDYBEY, Professor, Department of Chemistry, effective Winter Quarter, Spring Quarter, and Autumn Quarter 1989, to accept a position in the Department of Chemistry at the Technical University of Munich.

JOHN J. REAGAN, Assistant Professor, Department of Architecture, effective Winter Quarter, Spring Quarter, and Autumn Quarter 1989, to continue in the development of his professional skills.

RAKESH V. VOHRA, Assistant Professor, Academic Faculty of Management Sciences, effective Autumn Quarter 1988, to accept a Visiting Faculty position at the University of Pennsylvania, Wharton School of Business.

Professional Improvement Leaves--Change in Dates

ALEXANDER DYNIN, Associate Professor, Department of Mathematics, change leave from Autumn Quarter 1988 and Winter Quarter 1989, to Winter Quarter, Spring Quarter and Autumn Quarter 1989.

C. WILLIAM MCCURDY, Associate Professor, Department of Chemistry, change leave from Autumn Quarter 1987, Winter Quarter and Spring Quarter 1988, to Autumn Quarter 1988, Winter Quarter and Spring Quarter 1989.

Emeritus Titles

ALLEN W. HALL, College of Dentistry - Administration, with the title Associate Dean and Professor Emeritus, effective January 1, 1989.

PHILIP W. MURDICK, Department of Veterinary Clinical Sciences, with the title Associate Dean and Professor Emeritus, effective January 1, 1989.

ROBERT G. WHITEUS, Department of Veterinary Clinical Sciences, with the title Assistant Dean and Professor Emeritus, effective January 1, 1989.

JAMES M. DOWDY, School of Natural Resources, with the title Assistant Director and School Secretary Emeritus, effective January 1, 1989.

JOHN L. CRITES, Department of Zoology, with the title Chairperson and Professor Emeritus, effective January 1, 1989.

URHO A. UOTILA, Department of Geodetic Science and Surveying, with the titles Chairperson and Professor Emeritus, effective January 1, 1989.

GEORGE P. CREPEAU, Department of Theatre, with the title Professor and Associate Provost Emeritus, effective January 1, 1989.

ROBERT L. BARTELS, School of Health, Physical Education, and Recreation, with the title Professor Emeritus, effective January 1, 1989.

February 3, 1989 meeting, Board of Trustees

PERSONNEL ACTIONS (contd)

Emeritus Titles (contd)

LEO E. BENDIXEN, Department of Agronomy, with the title Professor Emeritus, effective January 1, 1989.

MARY K. BEYRER, School of Health, Physical Education, and Recreation, with the title Professor Emeritus, effective January 1, 1989.

JOHN L. BLAISDELL, Department of Agricultural Engineering, with the title Professor Emeritus, effective January 1, 1989.

GEORGE G. BLOZIS, College of Dentistry - Diagnostic Services, with the title Professor Emeritus, effective January 1, 1989.

ODUS R. BURGGRAF, Department of Aeronautical and Astronautical Engineering, with the title Professor Emeritus, effective January 1, 1989.

HARRY R. CONRAD, Department of Dairy Science, with the title Professor Emeritus, effective January 1, 1989.

CLARENCE J. CUNNINGHAM, Cooperative Extension Service, with the title Professor Emeritus, effective January 1, 1989.

LUVERN L. CUNNINGHAM, Department of Educational Policy and Leadership, with the title Professor Emeritus, effective January 1, 1989.

JON S. CUNNYNGHAM, Academic Faculty of Accounting and Management Information Systems, with the title Professor Emeritus, effective January 1, 1989.

JAMES C. DONHAM, Department of Veterinary Clinical Sciences, with the title Professor Emeritus, effective January 1, 1989.

WALTER F. ERSING, School of Health, Physical Education, and Recreation, with the title Professor Emeritus, effective January 1, 1989.

JAMES I. FREA, Department of Microbiology, with the title Professor Emeritus, effective January 1, 1989.

ALBERT A. GABEL, Department of Veterinary Clinical Sciences, with the title Professor Emeritus, effective January 1, 1989.

CHARLES M. GALLOWAY, Department of Educational Policy and Leadership, with the title Professor Emeritus, effective January 1, 1989.

GORDON E. GATHERUM, School of Natural Resources, with the title Professor Emeritus, effective January 1, 1989.

J. BRUCE GRIFFING, Department of Entomology, with the title Professor Emeritus, effective January 1, 1989.

FAZ HAGHIRI, Department of Agronomy, with the title Professor Emeritus, effective January 1, 1989.

MOHAMED Y. HAMDY, Department of Agricultural Engineering, with the title Professor Emeritus, effective January 1, 1989.

PERSONNEL ACTIONS (contd)

Emeritus Titles (contd)

E. LEONARD JOSSEM, Department of Physics, with the title Professor Emeritus, effective January 1, 1989.

EDISON L. KLINGLER, Cooperative Extension Service, with the title Professor Emeritus, effective January 1, 1989.

FELIX P. KOLLARITSCH, Academic Faculty of Accounting and Management Information Systems, with the title Professor Emeritus, effective January 1, 1989.

JULIUS P. KREIER, Department of Microbiology, with the title Professor Emeritus, effective January 1, 1989.

HOWARD B. KRIEBEL, School of Natural Resources, with the title Professor Emeritus, effective January 1, 1989.

MARION E. KROETZ, Cooperative Extension Service, with the title Professor Emeritus, effective January 1, 1989.

LEO E. LIPETZ, Department of Zoology, with the title Professor Emeritus, effective January 1, 1989.

RONALD K. LONG, Department of Electrical Engineering, with the title Professor Emeritus, effective January 1, 1989.

JOEL H. MAGISOS, Department of Agricultural Education, with the title Professor Emeritus, effective January 1, 1989.

CHARLES L. MAND, School of Health, Physical Education, and Recreation, with the title Professor Emeritus, effective January 1, 1989.

THOMAS J. MCNUTT, Cooperative Extension Service, with the title Professor Emeritus, effective January 1, 1989.

WILMA K. MECKSTROTH, Department of Chemistry, with the title Professor Emeritus, effective January 1, 1989.

EDWARD C. NABER, Department of Poultry Science, with the title Professor Emeritus, effective January 1, 1989.

JEREMIAH D. NOLAN, Department of Psychology, with the title Professor Emeritus, effective January 1, 1989.

JOSEPH J. PARNICKY, College of Social Work, with the title Professor Emeritus, effective January 1, 1989.

TONY J. PETERLE, Department of Zoology, with the title Professor Emeritus, effective January 1, 1989.

THOMAS E. POWERS, Department of Veterinary Physiology and Pharmacology, with the title Professor Emeritus, effective January 1, 1989.

GEORGE E. ROPP, Cooperative Extension Service, with the title Professor Emeritus, effective January 1, 1989.

PERSONNEL ACTIONS (contd)

Emeritus Titles (contd)

THOMAS D. STEVENSON, Department of Pathology, with the title Professor Emeritus, effective January 1, 1989.

THOMAS M. STOCKDALE, School of Natural Resources, with the title Professor Emeritus, effective January 1, 1989.

ALLEN L. ULRICH, Cooperative Extension Service, with the title Professor Emeritus, effective January 1, 1989.

BARRY D. VALENTINE, Department of Zoology, with the title Professor Emeritus, effective January 1, 1989.

ROBERT W. VAN KEUREN, Department of Agronomy, with the title Professor Emeritus, effective January 1, 1989.

WILLIAM W. WAYSON, Department of Educational Policy and Leadership, with the title Professor Emeritus, effective January 1, 1989.

LANSING E. WILLIAMS, Department of Plant Pathology, with the title Professor Emeritus, effective January 1, 1989.

VIRGINIA I. ZIRKLE, Cooperative Extension Service, with the title Professor Emeritus, effective January 1, 1989.

ROBERT B. ANDERSON, Academic Faculty of Labora Education and Research Services, with the title Associate Professor Emeritus, effective January 1, 1989.

DAVID H. AYERS, Department of Theatre, with the title Associate Professor Emeritus, effective January 1, 1989.

JOSEPH P. BROWN, Cooperative Extension Service, with the title Associate Professor Emeritus, effective January 1, 1989.

RICHARD M. CAMPBELL, Department of Electrical Engineering, with the title Associate Professor Emeritus, effective January 1, 1989.

INEZ CARDOZO-FREEMAN, Center for Comparative Studies in the Humanities (Newark Campus), with the title Associate Professor Emeritus, effective January 1, 1989.

NANCY R. CLENDENON, Department of Neurology, with the title Associate Professor Emeritus, effective January 1, 1989.

VICTOR D. COLOMBINI, Department of Geography (Lima Campus), with the title Associate Professor Emeritus, effective January 1, 1989.

ROBERT S. CRAWFORD, Cooperative Extension Service, with the title Associate Professor Emeritus, effective January 1, 1989.

ILSEDORE M. EDSE, Department of German, with the title Associate Professor Emeritus, effective January 1, 1989.

February 3, 1989 meeting, Board of Trustees

PERSONNEL ACTIONS (contd)

Emeritus Titles (contd)

DONALD D. HARPER, School of Health, Physical Education, and Recreation, with the title Associate Professor Emeritus, effective January 1, 1989.

ALBERT O. HUMBERTSON, Department of Anatomy, with the title Associate Professor Emeritus, effective January 1, 1989.

JAMES L. JESSE, Academic Faculty of Labor Education and Research Services, with the title Associate Professor Emeritus, effective January 1, 1989.

DONALD E. KIMMET, Cooperative Extension Service, with the title Associate Professor Emeritus, effective January 1, 1989.

R. NED KRAMER, College of Dentistry - Pediatric Dentistry, with the title Associate Professor Emeritus, effective January 1, 1989.

DAVID R. MISKELL, Cooperative Extension Service, with the title Associate Professor Emeritus, effective January 1, 1989.

R. DONALD MOORE, Cooperative Extension Service, with the title Associate Professor Emeritus, effective January 1, 1989.

PHILIP D. MOORHEAD, Department of Veterinary Preventive Medicine, with the title Associate Professor Emeritus, effective January 1, 1989.

DEAN H. OWEN, Department of Psychology, with the title Associate Professor Emeritus, effective January 1, 1989.

WILLIAM B. PHILLIPS, Cooperative Extension Service, with the title Associate Professor Emeritus, effective January 1, 1989.

GERALDINE G. PRICE, Department of Family and Community, with the title Associate Professor Emeritus, effective July 1, 1988.

JEANNE M. RUMBURG, Cooperative Extension Service, with the title Associate Professor Emeritus, effective January 1, 1989.

EDWIN C. SHUTTLEWORTH, Department of Neurology, with the title Associate Professor Emeritus, effective January 1, 1989.

BENNIE L. WHITE, Cooperative Extension Service, with the title Associate Professor Emeritus, effective January 1, 1989.

TERESA F. BARNES, Department of Communication (Lima Campus), with the title Assistant Professor Emeritus, effective January 1, 1989.

RICHARD O. DAGEFOERDE, College of Dentistry - Restorative and Prosthetic Dentistry, with the title Assistant Professor Emeritus, effective January 1, 1989.

WALTER M. ERICKSON, College of Dentistry - Restorative and Prosthetic Dentistry, with the title Assistant Professor Emeritus, effective January 1, 1989.

PERSONNEL ACTIONS (contd)

Emeritus Titles (contd)

JAMES E. HENRY, Department of Agricultural Engineering, with the title Assistant Professor Emeritus, effective January 1, 1989.

PAUL R. HOTHAM, Cooperative Extension Service, with the title Assistant Professor Emeritus, effective January 1, 1989.

M. ELIZABETH LLOYD, Department of Art Education (Lima Campus), with the title Assistant Professor Emeritus, effective January 1, 1989.

THEODORE L. MOOR, College of Dentistry - Restorative and Prosthetic Dentistry, with the title Assistant Professor Emeritus, effective January 1, 1989.

JOAN L. SHARP, School of Allied Medical Professions, with the title Assistant Professor Emeritus, effective January 1, 1989.

LIDA E. WENZEL, Department of Romance Languages and Literatures (Mansfield Campus), with the title Assistant Professor Emeritus, effective January 1, 1989.

IONIA J. ZELENKA, Department of Theatre, with the title Assistant Professor Emeritus, effective January 1, 1989.

FRED B. BOMBACH, College of Dentistry - Diagnostic Services, with the title Clinical Assistant Professor Emeritus, effective January 1, 1989.

JOHN P. STARKS, School of Allied Medical Professions, with the title Clinical Instructor Emeritus, effective January 1, 1989.

FRANCES A. MCNEW, Department of Life Span Process, with the title Instructor Emeritus, effective March 1, 1988.

SHIRLEY A. BROOKS, College of Agriculture - Administration, with the title Assistant to the Vice President Emeritus, effective January 1, 1989.

DICKSON H. CALL, Instruction and Research Computer Center, with the title Associate Director Emeritus, effective January 1, 1989.

ALBERT A. FERDI, School of Journalism, with the title Manager Emeritus, effective January 1, 1989.

MERY L. GONG, Instruction and Research Computer Center, with the title Associate Director Emeritus, effective January 1, 1989.

STEVEN J. GYURO, National Center for Research in Vocational Education, with the title Associate Director Emeritus, effective January 1, 1989.

WILLIAM K. HARRIS, School of Architecture, with the title Administrative Associate Emeritus, effective January 1, 1989.

JAMES T. RUSSELL, Office of Student and Community Services (Newark Campus), with the title Assistant Director Emeritus, effective January 1, 1989.

JOSEPH F. STRANGES, JR., Office of Minority Affairs, with the title Program Director Emeritus, effective January 1, 1989.

PERSONNEL ACTIONS (contd)

Emeritus Titles (contd)

JAMES D. WAGNER, Instruction and Research Computer Center, with the title Manager Data Processing 2 Emeritus, effective January 1, 1989.

RICHARD L. WILLIAMS, Cooperative Extension Service, with the title Business Manager Emeritus, effective April 1, 1988.

Medical Staff--Appointments

DAVID A. PERDZOCK, M.D., Limited Staff, Anesthesiology.

MICHALEEN A. GRECULA, M.D., Attending Staff, Internal Medicine.

DANA J. SCHULTZ, M.D., Courtesy Staff, Pediatrics.

LARRY M. SHEPHERD, M.D., Courtesy Staff, Pediatrics.

YOUNG-MEE LEE, M.D., Courtesy Staff, Division of Emergency Medicine.

DANIEL M. DALUGA, M.D., Limited Staff, Division of Orthopedic Surgery.

AMAL K. DAS, M.D., Limited Staff, Division of Orthopedic Surgery.

SCOTT T. GHERINI, M.D., Limited Staff, Division of Orthopedic Surgery.

ANDREW P. HARAKAS, M.D., Limited Staff, Division of Orthopedic Surgery.

JOSEPH R. DURHAM, M.D., Attending Staff, Division of Vascular Surgery.

Medical Staff--Reappointments

THOMAS H. COLEMAN, M.D., Courtesy Staff, Internal Medicine.

ROBERT P. MYERS, D.O., Courtesy Staff, Pediatrics.

J. BRADFORD JOHNSON, M.D., Limited Staff, Radiology.

CHRISTOPHER S. MORRIS, M.D., Limited Staff, Radiology.

JOHN W. MOORE, M.D., transferred from Limited to Courtesy Staff, Family Medicine.

STEVEN C. HIRSCH, M.D., transferred from Limited to Attending Staff, Division of Cardiology.

JERRY T. GUY, M.D., transferred from Attending to Courtesy Staff, Division of General Medicine.

DAVID C. BELL, M.D., transferred from Courtesy to Attending Staff, Obstetrics/Gynecology.

PATRICIA WONGSAM, M.D., transferred from Courtesy to Attending Staff, Physical Medicine and Rehabilitation.

Upon motion of Mr. Teaford, seconded by Mr. Berry, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

RESOLUTIONS IN MEMORIAM

Resolution No. 89-76

Synopsis: The Academic Affairs Committee recommends the approval of the following Resolutions in Memoriam.

RESOLVED, That the Board adopt the following Resolutions in Memoriam and that the President be requested to convey a copy to the families of the deceased.

Roland Francis Bleiholder

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on November 3, 1988, of Dr. Roland Francis Bleiholder, Assistant Professor in the College of Dentistry - Restorative and Prosthetic Dentistry.

Roland F. Bleiholder was born on June 12, 1937, in Brooklyn, New York. He received his B.S. (Magna Cum Laude) from St. John's College, New York, in 1959, and his Ph.D. in Chemistry from The Ohio State University in 1965.

Dr. Bleiholder began his dental materials experience at the S. S. White Dental Products International Division of Pennwalt Corporation in 1970. He was Director of Research and Development there from 1974 until the time he joined the faculty of Restorative and Prosthetic Dentistry in the College of Dentistry in 1987. Dr. Bleiholder served as a consultant for Johnson & Johnson Dental Division, as well as Battelle Laboratories, Pennwalt Corporation and Deposito Dental Latorre in Bogota, Columbia.

Dr. Bleiholder's contributions to dentistry have earned him international respect and admiration from both dentists and dental researchers as well as from his many co-workers in the College of Dentistry.

On behalf of the University, the Board of Trustees of expresses to the family its deep sympathy and sense of understanding in its loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Roald Fay Campbell

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on September 19, 1988, of Roald Fay Campbell, Professor Emeritus in the Department of Educational Policy and Leadership.

Dr. Campbell was active in the education community for more than 60 years, specializing in administrative behavior, policy making, national influences in education and urban education. He wrote numerous books and articles on his areas of expertise as well as a family biography and an autobiography.

He was born December 4, 1905, in North Ogden, Utah, to Ulysses Fay Campbell and Pearl Ellen Wilson. He was raised in Ogden and Aberdeen, Idaho, and received a teaching certificate from the Idaho Technical Institute. Following a year of teaching and a 30 month mission from the Church of Jesus Christ of Latter-Day Saints, Dr. Campbell obtained B.S. and M.S. degrees from Brigham Young University. He later received a Doctorate of Education from Stanford University.

Dr. Campbell was Chairman of the University of Utah Elementary Education Department from 1942 to 1951, as well as Director of the University's William M. Stewart School, an institution for teaching elementary and high school teachers. Dr. Campbell was also a public school administrator in Idaho

February 3, 1989 meeting, Board of Trustees

RESOLUTIONS IN MEMORIAM (contd)

Roald Fay Campbell (contd)

and Texas. In a 13-year tenure at the University of Chicago, he was Chairman of the Department of Education, Dean of the Graduate School of Education and Director of the Midwest Administrative Center.

He joined The Ohio State University in the College of Education in 1952, and was the first Novice G. Fawcett Professor of Educational Administration. Upon his retirement in 1974, he was named Professor Emeritus. Following his retirement, he returned to Salt Lake City where he has been an Adjunct Professor at the University of Utah since 1975.

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in its loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Laurence R. Connor

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on November 17, 1988, of Laurence R. Connor, Instructor Emeritus in the Department of English.

Professor Connor was born December 19, 1901. He received his B.A. in Journalism in 1927 and his M.A. in English in 1961, both from The Ohio State University. He joined the faculty in 1960 as Assistant Instructor and was promoted to Instructor in 1966. He retired in 1972.

Before returning to graduate school, Professor Connor was Associate Editor of "The Richmond New Letter," a chief Editorial Writer for the "Columbus Dispatch," and the "Ohio State Journal," and an employee of WBNS Radio.

In his career as a teacher he was liked by his students and respected by his colleagues.

On behalf of the University community, the Board of Trustees expresses to the family its deepest sympathy. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Wilfrid Raymond Foster

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on December 17, 1988, of Wilfrid Raymond Foster, Professor Emeritus in the Department of Geology and Mineralogy.

"Ray" Foster was born in Fredericton, New Brunswick, Canada, February 14, 1913. He received a B.S. degree in Chemistry at the University of New Brunswick in 1934, his M.S. degree in Chemistry from the Catholic University of America in 1936, and the Ph.D. degree in Geology from the University of Chicago in 1940. He was an Instructor in Geology at the Catholic University in 1940-1941, and Instructor in Mining and Ceramics at Pennsylvania State University in 1941-1942, and a petrographer at the Champion Spark Plug Company in Michigan from 1942-1952. He became Associate Professor at The Ohio State University in 1952 and was named Professor and Chairman of the Department of Mineralogy in 1957. He served in this capacity until 1972 when the departments of Geology and Mineralogy were merged. He continued as a professor in the combined departments until his retirement in 1979.

RESOLUTIONS IN MEMORIAM (contd)

Wilfrid Raymond Foster (contd)

Dr. Foster was a member of and elected to fellowship in the American Ceramic Society, the Mineralogical Society of America, the Geological Association of Canada, the Ohio Academy of Science, and the American Association for the Advancement of Science. He was elected and served as a Councillor of the Mineralogical Society of America from 1959 to 1961. He was a member of Sigma Hi, Phi Lambda Upsilon, Sigma Gamma Epsilon, and the Knights of Columbus, named in Who's Who's in America and American Men of Science, and was an honorary member of Keramos.

Professor Foster's teaching and research interests were in high-temperature phase-equilibrium studies in relation to petrology and technology but his expertise was broad enough so that he also taught a course on meteorites. Fourteen Ph.D. and 3 Masters students received their degrees under his supervision. He authored or coauthored nearly 50 specific papers and articles and was the recipient of NSF and other grants to support his research.

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in its loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Devon W. Meek

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on December 7, 1988, of Devon W. Meek, Professor Emeritus and former Chairperson in the Department of Chemistry.

Professor Meek was born on February 24, 1936, in River, Kentucky. His undergraduate training was received at Berea College where he completed a Bachelor of Arts degree in Chemistry in 1958. Subsequently, at the University of Illinois he received graduate training in Chemistry and completed the M.S. degree in 1960 and the Ph.D. degree in 1961. Upon graduation from Illinois, he joined The Ohio State University as an Assistant Professor of Chemistry, was promoted to Associate Professor and full Professor in 1966 and 1969, respectively. He assumed the Chairmanship of the Department in 1977 and then again in 1986. Upon his retirement in 1988, he was named Professor Emeritus.

Professor Meek became well known in the scientific community for his studies in the area of Inorganic Chemistry which focused on transition metal complexes with unusual coordination numbers. These included studies of phosphine ligands of the transition metal complexes as catalysts, their spectral properties, and their structural characteristics. During the course of his career, he trained 45 graduate students and 10 postdoctoral associates. His studies have resulted in over 160 publications in the chemical literature.

Professor Meek was recognized for his work with appointments as a Visiting Scholar at Northwestern University, as a Senior Research Fellow at the University of Sussex, and as a Guggenheim Fellow at Cambridge University and the University of California at Berkeley. He served as a consultant for Procter and Gamble Company, Shepherd Chemical Company, Argonne National Laboratories, and Harper and Row Publishing Company. He was also an active member of the American Chemical Society where he was elected as the Secretary of the Inorganic Division.

During his years of service as Chairperson of the Department of Chemistry, he was responsible for a major expansion of the faculty and the construction of the new chemistry building. He devoted significant effort to foster close ties between the Department and industrial corporations and established the successful Industrial Associates Chemistry Program.

February 3, 1989 meeting, Board of Trustees

RESOLUTIONS IN MEMORIAM (contd)

Devon W. Meek (contd)

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in its loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Everett John Nelson

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on September 29, 1988, of Everett John Nelson, Professor Emeritus in the Department of Philosophy.

Dr. Nelson was born on October 18, 1900, in Castle Rock, Washington. He received his A.B. degree (1923) and an A.M. degree (1925) in philosophy from the University of Washington. He also earned an A.M. degree (1928) and his Ph.D. (1929) from Harvard University. The next year he studied at Göttingen, Freiburg, and the Sorbonne as a Sheldon Traveling Fellow from Harvard.

Dr. Nelson then started his academic career in 1930 at the University of Washington, serving as Professor (1941-52) and as Chairman (1947-52). He joined The Ohio State University as Professor and Chairperson in 1952, serving as Chair until 1968. Upon his retirement in 1971, Dr. Nelson was named Professor Emeritus.

During his career, Professor Nelson was a visiting professor at several universities, including Chicago, Columbia, Harvard, and Washington, and he was a Guggenheim Fellow (1939-40). He was a member of professional and honorary organizations, including the AAUP; the Association for Symbolic Logic (serving as consulting editor of the Journal of Symbolic Logic from its inception in 1936 until 1950); the Metaphysical Society of America; and the American Philosophical Association. For the latter, he served as National Chairman of the Board of Officers and as President of the Pacific Division (1946-47), and as President of the Western Division (1966-67). He also served as Lieutenant, USNR (1943-44), retiring as Lt. Commander.

Bringing to Ohio State an international reputation as a logician and metaphysician, Dr. Nelson initiated the period of the Department's recognition as a major graduate center. During his tenure as Chair, the number of graduate students increased to about sixty, and the faculty grew from nine to eighteen. A number of philosophers who either were or became well-known in the profession were brought to Ohio State during this period. In every respect, Professor Nelson was a vibrant and upright leader who, as one of his colleagues attested, possessed "purity of intellect... coupled with an incredible generosity of emotion."

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in its loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Walter Cade Reckless

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on September 20, 1988, of Walter Cade Reckless, Professor Emeritus in the Department of Sociology.

Walter Reckless was born on January 19, 1899, in Philadelphia, Pennsylvania. He received a Ph.B. in the Social Sciences from the University of Chicago in 1921, where he also completed the Ph.D. in Sociology in 1925.

RESOLUTIONS IN MEMORIAM (contd)

Walter Cade Reckless (contd)

After receiving the doctorate, Professor Reckless joined the faculty of Vanderbilt University (1924-1940). He came to The Ohio State University in 1940 where he joined the Emeriti ranks after nearly thirty years (1969). He was a Visiting Professor at numerous major institutions in the U.S. and abroad such as the University of Michigan, Florida State, University of Ottawa, University of Munster in Germany, and the Tata Institute of Applied Social Science in India.

A pioneer in American Criminology and corrections, Dr. Reckless amassed a gigantic record of scholarship, instruction, and service. His numerous books and other publications were ground breaking and continue to be valuable sources of learning. The graduate and undergraduate programs he developed and nurtured made Ohio State a premier place that attracted students from the many corners of the country and the globe. His students are well-placed in academia, in Federal criminal justice agencies, and at the state and local levels. Following his footsteps, several of his students occupied positions of leadership in important scientific and professional organizations. Professor Reckless contributed heavily to the professionalization of probation and parole and the juvenile court system. He attended endless meetings and testified before the Legislature on these and other matters affecting correctional policies, programs, and budgets. He served as consultant to many agencies both in the U.S. and other countries and to the United Nations' Social Defense Section (Crime Prevention).

Professor Reckless' voluminous contributions and tireless efforts in instruction and service have earned him many awards and recognitions. Important among these is President of the American Society of Criminology for three terms, Chairperson of the Criminology Section of the American Sociological Association, and an early recipient of The Ohio State University Distinguished Service Award in 1981.

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in its loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

John W. Vaughn

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on November 2, 1988, of John W. Vaughn, Associate Professor in the Department of Classics.

Professor Vaughn was born January 11, 1947. He received his B.A. from St. Peter's College in 1969, and his Ph.D. from Johns Hopkins University in 1973. He joined the faculty at The Ohio State University in the Department of Classics in 1974.

Winner of the Rome Prize Fellowship in 1973-1974, Professor Vaughn published studies in Hellenistic poetry, Cicero, and Roman law. In 1981 he received The Ohio State University Alumni Award for Distinguished Teaching, and at the time of his death he was serving as Director of Graduate studies in the Department of Classics.

Professor Vaughn, who had received support from the American Council of Learned Societies for his work on Theocritus, was a founding member of the Roman Law Society of America.

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in its loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

RESOLUTIONS IN MEMORIAM (contd)

Upon motion of Mr. Berry, seconded by Mr. Barone, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

STUDENT AFFAIRS COMMITTEE REPORT

Amb. Wolf:

Mr. Chairman, the Student Affairs Committee met this morning and heard a report from Mr. William Hall, who is the Director of Dormitories and Dining Facilities. He focused mainly on the financial aspects and the statistics and it was a very interesting report. It is nice to know that we are operating that department in the black. The budget is about \$36.5 million. We have about 11,000 students that we are housing and we are serving about 3.5 million meals a year. It seems, and everyone felt, that the Department is very well handled and we were all satisfied with the overview presented to us by Mr. Hall. That is a brief summary of what took place. Are there any questions?

I would like to call on Roger Musgrave for the report on CGS.

Mr. Roger Musgrave:

Good afternoon. We are in the middle of a lot of plans which will be worthy of reporting by your next meeting. So I will put off the activities report and ask you to bare with me for about five minutes on a discussion of some graduate associate issues that have been raised at the most recent Council of Graduate Students meeting. Some are positive, some are less so, and one has relatively broad implications.

Within that framework I will start off as positive as possible. We would like to express appreciation on behalf of all graduate students holding Graduate Associateships to those who worked to eliminate the necessity for us to file city income tax returns to get the tax back we're owed from last year while fee authorizations were considered taxable income by the federal government. We want to publicly offer special thanks to Helen DeSantis in Personnel Services; Controller Janet Achterman; those with whom they worked in University Systems; all the staff members in those offices who actually cut the checks and did the recalculations; Dean Koenigsnecht and his staff; and the nameless and often faceless people in the city administration that made it possible for this to happen this year.

Mr. Teaford:

I don't know if the Board -- all of the Board, especially those from outside Columbus, realize what happened. As I understand it, the City sent one check to the University for those refunds and then the money was passed out and nobody had to file a city income tax return to get their refund.

Mr. Musgrave:

Correct.

President Jennings:

The City has done that and it was a very nice gesture on the part of the City in order to do that. And we were able to do that because of course the withholding tax and the total

STUDENT AFFAIRS COMMITTEE REPORT (contd)

President Jennings: (contd)

city income tax are the same, so that whatever the students' other income might be, the taxes are not affected by that.

Mr. Musgrave:

We just want to make sure folks realize the graduate associates, in general, appreciate the professional staff here for going above and beyond the call of duty in doing the extra work to get that to us.

Graduate Associates found this past Tuesday an even more comfortable and happier kind of day, because they also found stipend increases in their paychecks. While any increase is most welcome to all Grad Associates the Council does wish several points to be made in the public setting. The minimum stipend level increase this year reflects an increase of 3.76%, which is good. And while the figure will vary depending on where you look, last year's national inflation rate is quoted at around 4.5%, and it may be higher than that in an area with a hot economy like Columbus. So the minimum stipend increase looks a little less good. And when you consider how little of a stipend is discretionary income for graduate students subsisting on that income alone and the disproportionate effect felt by such people when faced with increases in the costs of things such as housing, clothing, food, not to mention telephones, textbooks, journal subscriptions and even student health insurance, things don't really look all that good for minimum stipend increases.

One of our concerns is that there seems to be a common conception, even among many of the faculty we speak with that there are ample guaranteed student loan funds available to supplement the income of graduate students that can't quite make it on the stipend. After all, a lot of them say, "look at the millions in the federal budget for those programs." And that is just flat not the case. Our financial aids folks have to live within federal guidelines in determining local eligibility for guaranteed student loans. A lot of our graduate students find themselves eligible for a few hundred dollars a year which might pay for their books and lab fees, but which won't go far towards the kid's orthopedic shoes or their braces or a lot of other things that these people who are students happen to face.

When broaching this subject with department chairs, graduate studies committee chairs and a lot of other administrators, grad associate representatives are often told that Ohio State has stipend levels that are very comparable to other major research universities in the country. This may be so, but there are two points that the Council wishes to make with regard to that response. First, on very few other levels do we encounter rhetoric which says this University is average, we are going to site that and that is right where we want to stay. We hope that those who create the budget policy and the details therein will realize that stipend salaries have at least as much and perhaps even more impact on attracting quality graduate students as they do on attracting quality faculty and quality nursing staff, etc., right on down the line. And we certainly recognize the challenges posed by the budget, but we also ask that that side of this issue be considered.

Our final problem with the logic behind statements that are essentially premised on the argument that everyone else does it, is that such logic is identical to that which was offered for so many years to minorities and females when they would ask for more reasonable compensation for the services they performed. That alone invalidates the logic for some, but we would also like to ask that all involved recognize the danger of reserving graduate education for those from mid to upper level socio-economic groups, those with outside resources to fall back on as they devote 2-6 years of their lives to

STUDENT AFFAIRS COMMITTEE REPORT (contd)

Mr. Musgrave: (contd)

graduate research and study in which there is really only time to work those 20 hours a week as a G.A. And you really can't go out and wait tables on the side and still do a graduate education.

To the extent that this occurs, we are exacerbating problems faced by search committees nationwide as they seek to perform affirmative action work to try to break down some of the white male homogeneity that existed for so long in academia. With no intention of taking a condemnatory stance at all, we ask that our institution consider whether its actions aimed at helping to improve the pool of minority and female faculty members, are as affirmative as they should be and if they take enough factors in to account. Again, we appreciate the effort made this year to increase stipend levels, but we ask that consideration always be given to increases beyond what seems minimally acceptable.

And to close I have been asked to read the text of a very short resolution adopted by the Council at its most recent meeting:

"We are very glad to hear that the discussion of the whole pedestrian campus concept and other space issues is to be reopened and we are heartened by the existence and work of Vice President Marsh's mid and long-range planning committee.

"At the January 8 meeting, our Council adopted the following reaffirmation of the resolution of May 31, 1987. The Council of Graduate Students urges that if the pedestrian campus concept is approved by the administration, that the inner campus areas be accessible to cars at night. Among our concerns are the following: graduate students and faculty often must teach and attend classes in this area at night; many graduate students find it necessary to do other work which can only be performed within the buildings in this area during the evening and late night hours; access requirements will increase even more as graduate students and faculty seek to use the new library plan for 18th Avenue; and both access and safety issues are very important to those with physical disabilities who rely on parking in this area. It is important to maintain the current level of safety for those working on campus by continuing to provide the current level of access to parking in close proximity to all buildings."

We understand that there have been a number of new public hearings scheduled on the whole issue and we will do everything we can to enhance turnout at those hearings.

And finally we are looking forward -- we were also real happy with the slate of potential new Student Board Members sent to Governor Celeste. We are looking forward to working with these folks who are going to work with you. And we very much appreciate what we perceive as your acceptance and enthusiasm about having student members on the Board. Thank you.

Amb. Wolf:

Thank you. Ms. Athena Yiamouyiannis, President of the Undergraduate Student Government --

STUDENT AFFAIRS COMMITTEE REPORT (contd)

Ms. Yiamouyiannis:

Mr. Chairman, President Jennings, Members of the Board of Trustees, good afternoon. The Undergraduate Student Government has been very active this quarter finishing up projects, starting new projects, and dealing with very important student issues.

To start with I would like to discuss the tuition increase the students will be faced with next year. A 23% - 40% tuition increase is before us and the students at OSU are very concerned. It is my belief that Ohioans should have the opportunity to attend college. Affordable tuition is the principle behind public institutions and that opportunity for education. The move away from the focus of higher education will only hurt current students, potential students, and the entire state in general. USG is actively involved in pursuing this issue. The Undergraduate Student Government Vice President, Scott Mounts, is heading a letter writing campaign. We have sent out letters to all student organization leaders with a fact sheet and a sample letter encouraging everyone in their group and their affiliates to write to their legislatures and to voice their concerns on the biennium budget and the proposed tuition increase. Also, Scott Mounts and legislative affairs cabinet member, Carrie Zeigel, are members of the executive board of the Ohio Students Association. This association is an organization comprised of the 13 public institutions' leaders from the student governments. They are working statewide to continue this effort flooding legislators with mail about students' concerns regarding affordable tuition. USG assembly is also actively involved in this, reaching out to their constituency for support. Assembly member Tom Heading wrote a petition addressed to Governor Celeste describing the impact of the tuition increase on students if action isn't taken. A 23%-40% increase in tuition is quite substantial and we are looking to try to stop it if we can.

Going on to other USG matters -- at the last Senate meeting, Amy Riemen-schneider from the Committee of Women and Minorities presented the committee report to the Senate. As the report states, of the 30 professors that were appointed last year, only one was a female and only one was a minority. As I said at the last meeting, over half the OSU students are female and again this year we only have 7% at the full professor level being female. USG assembly discussed the issue and passed a resolution in support of the recommendations made by the Committee on Women and Minorities. We recommend that OSU take immediate action to improve the gender imbalance at the upper faculty levels.

I would like to now go into some other activities that USG is involved in. I think everyone received a report on financial aid that USG cabinet member Jennifer Murray compiled. The USG Financial Aid Forum was held on Monday, January 30. Students were given information on how to fill out the financial aid form correctly and they had an opportunity to have questions answered on financial aid concerns.

Student concern has been brought up about the world wide destruction of the rain forests. USG sponsored Dr. Mark Bush, an OSU professor in Zoology and Ecology to speak to the public on this topic of "Rain Forest Destruction -- Is it our Concern?" We had a very good turnout. This was held last night at the Ohio Union conference theatre. About 150 students and faculty members showed up for the presentation.

Another project that USG is working on is the USG AIDS Awareness project in conjunction with the Gay and Lesbian Alliance. We are distributing 10,000 AIDS pamphlets to undergraduate students. The pamphlets were compiled by the Department of Health and Human Services and are a type of educational support from the student government.

STUDENT AFFAIRS COMMITTEE REPORT (contd)

Ms. Yiamouyiannis: (contd)

In honor of United Black World Week, which is February 11 - 18, USG has planned an event for the students -- the USG Minority Affairs Reception to celebrate students' sensitivity to diversity. USG Minority Affairs cabinet member Tyron Alexander conferred with many University faculty members, students and administrators during Fall Quarter. He will be speaking on the report that he compiled and will be making statements about his observations and suggesting ways for student affirmative action. He is going to be working to establish equality and better interaction between different ethnic groups. In addition, we are trying to have two other student leaders come and speak -- the co-chairs of the Student Involvement On Racism Task Force. All OSU students are invited to attend the celebration and it is going to take place on the third floor of the Ohio Union, Stecker Lounge from 5:00 - 6:30 p.m. on February 16. Members of the Board, you are also invited to attend.

To conclude, I would like to say that I am very pleased that Governor Celeste has made a selection for the two student members to the Board. Laurel Davis and Sophia Paige will be an excellent addition to the current Board. That ends my report.

Mr. Immke:

Athena, I don't believe we received that financial report you spoke about. Would you please send a copy to Mr. Scott for distribution.

Athena Yiamouyiannis:

Yes, of course.

Mr. Wolf:

That concludes our report.

(See Appendix XVIII for complete text of The Ohio State University, Division of Student Affairs, Office of Residence and Dining Halls, page 75f.)

--0--

AGRICULTURAL AFFAIRS COMMITTEE REPORT

Mr. Teaford:

I know I will disappoint the Board by making a brief report, but I shall do that anyway. We did have a report on what OARDC and Cooperative Extension are doing with regard to their budget efforts, which as you know are a separate line-item from the rest of the University. The most encouraging thing heard is that they have gotten all of the agri-business people together in this State to lobby as one, beginning at the grass roots. I think that there could not be a better way to ensure a good appropriation in that regard.

We also heard a report on the Development Fund campaign in the College of Agriculture. And I suspect if the rest of the University were doing as well, we would probably be at around \$700 million right now. But I thought the most encouraging thing about the agriculture fund raising was how much they were able to fulfill their wish list -- how much of the money is going for the projects which they had hoped it would go for in the beginning. It is certainly well above the University average. That concludes my report, Mr. Chairman.

AGRICULTURAL AFFAIRS COMMITTEE (contd)

President Jennings:

I think it is important for the Board to recognize that while the tuition issues associated with the Governor's budget are certainly extraordinarily important, it should not be forgotten that in the tax proposals there are no recommendations for agriculture, medicine, or the health sciences in the income tax proposal. We should all recognize that when we are talking about these appropriations, it is not just tuition for Ohio State and higher education that is being shorted, agriculture and medicine are also being shorted in these recommendations.

(See Appendix XX for complete text of The Ohio State University, College of Agriculture Development Update, January 1989, page 767.)

--0--

President Jennings:

You had before you earlier this morning the contract for the \$20 million project on PCBs. You heard an objection from the Westinghouse people to the General Electric bid. We have received an opinion from counsel -- counsel is incidentally the Vorys firm in this -- that the General Electric bid is in conformity with State statute. Therefore, I recommend that we award that contract to General Electric this afternoon. We would seek your approval for that.

**AWARD OF CONTRACTS
PCB ELIMINATION AND ELECTRICAL SYSTEM UPGRADE**

Resolution No. 89-77

Synopsis: Adoption of a plan and the award of a contract for the disposal of all Polychlorinated Biphenyl (PCB) contaminated fluids in all University Electrical equipment and the upgrading of certain electrical distribution equipment on the Columbus Campus is recommended.

WHEREAS the U.S. Environmental Protection Agency has promulgated regulations requiring that PCB compounds in certain electrical equipment be properly disposed of by October 1, 1990; and

WHEREAS the University wishes to eliminate the use of PCB contaminated electrical equipment on the Columbus and regional campuses to remove any health and safety risk to faculty, staff, students, and the general public caused by the present use of PCB materials; and

WHEREAS the University deems it prudent to upgrade and modernize certain sections of the Columbus Campus electrical distribution system to correct distribution deficiencies and improve the general reliability of the system; and

WHEREAS this PCB Elimination and Electrical System Upgrade Project will take two years to complete and the estimated capital cost of the project will be approximately \$20 million, to be financed through long-term debt, with the debt service being financed through higher campus electrical energy rates; and

WHEREAS to implement this PCB Elimination and Electrical System Upgrade Project, the University prepared specifications and solicited competitive bids; and

WHEREAS bids were received from Westinghouse Electric and General Electric, and General Electric submitted the lowest responsive and responsible bid:

**AWARD OF CONTRACTS
PCB ELIMINATION AND ELECTRICAL SYSTEM UPGRADE (contd)**

NOW THEREFORE

BE IT RESOLVED, That the Board of Trustees of The Ohio State University hereby accepts the report on "The Polychlorinated Biphenyl (PCB) Elimination and Electrical System Upgrade Project" and adopts the recommendations contained in this report; and

BE IT FURTHER RESOLVED, That the Board of Trustees of The Ohio State University hereby awards the contract for the PCB Elimination and Electric System Upgrade Project to GE-Industry Services Engineering and directs the President and/or Vice President for Business and Administration to take all necessary and appropriate actions to implement the award.

Upon motion of Mr. Teaford, seconded by Mr. Berry, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix XXI for complete text of The Ohio State University PCB Elimination and Electrical System Upgrade, page 771.)

--0--

FISCAL AFFAIRS COMMITTEE REPORT

Mr. Kessler:

Fiscal Affairs met as a full Board committee meeting this morning. Jim Jones, Director, presented a report on the fiscal situation of the Department of Athletics, and summarized that Department's priorities in facility needs. The emphasis is on generating resources to upgrade and modernize existing facilities prior to selective development of new facilities. (See Appendix XXII for complete text of The Ohio State Athletic Department Approved Budget 1988-89, page 779.)

Janet Achterman, University Controller, reviewed the University's Annual Financial Report for the fiscal year ending June 30, 1988. The external auditors, Touche Ross & Company certified that the statements fairly represented the University's financial position. With the recognition of the expense of the early retirements of faculty and staff being totally recognized during the fiscal year and the use of prior balances by various units of the University. The current funds equity declined by \$40 million over the fiscal year. This decline is expected to occur again in the current fiscal year due to additional early retirements in June through December plus the continued emphasis on reallocations due to limited levels of State support. (See Appendix XXIII for complete text of the University Financial Report for the Fiscal Year ending June 30, 1988, page 786.)

The 1988-89 Second Quarter Current Funds Budget Report showed adjustments from the budget this Board approved in June of \$6.8 million. These adjustments were primarily due to changes in the amounts of state funding and tuitions based upon actual Autumn Quarter enrollments as well as increased performance in sponsored research. (See Appendix XXIV for complete text of The Ohio State University, 1988-89 Current Funds Budget - 2nd Quarter Report, page 791.)

The Governor's budget request for the next biennium was summarized, which with annual increases of 3.3% and 3.5% over the next two years without new tax revenues, leaves this University in a difficult financial situation. If this budget is the final result,

FISCAL AFFAIRS COMMITTEE REPORT (contd)

Mr. Kessler: (contd)

without recognition of Ohio State's prior actions to hold down tuitions, it will force extraordinary tuition increases as well as internal expenditure limitations over the next two years.

The Waiver of Competitive Bidding over the past three months were reviewed and approved as summarized by Mr. Jackson. These 30 waivers totalling \$841,700, were primarily emergency and/or unique purchases which did not warrant competitive bidding. (See Appendix XXV for complete text of Waivers of Competitive Bidding Requirements - October - December 1988, page 797.)

In addition, to this report the Committee is recommending the following resolutions:

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS

Resolution No. 89-78

Synopsis: The Fiscal Affairs Committee recommends the approval of the following reports on contracts, grants, and gifts and the summaries for November and December 1988.

WHEREAS monies are solicited and received on behalf of the University from governmental, industrial, other agencies, alumni, and various individuals in support of research, instructional activities, and service; and

WHEREAS such gifts and grants are received through The Ohio State University Research Foundation, the Engineering Experiment Station of The Ohio State University, and The Ohio State University Development Fund:

NOW THEREFORE

BE IT RESOLVED, That the research agreement between The Ohio State University and The Ohio State University Research Foundation for the contracts and grants reported herein, and the acceptance of the reports from the Engineering Experiment Station and The Ohio State University Development Fund during the months of November and December 1988 be approved.

Upon motion of Mr. Teaford, seconded by Mr. Barone, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

SUMMARY FOR NOVEMBER 1988

Background

Source	No. of Projects	Support Level
The Ohio State University Research Foundation	84	\$6,931,304.50
Engineering Experiment Station	32	\$ 160,993.00
Total	116	\$7,092,297.50
The Ohio State University Development Fund		
Establishment of Named Funds		
The Janice Carson Beatley Herbarium Fund (Field Research in plant systematics and ecology)		\$ 50,000.00
The John A. Prior Professorship Fund (Establishment of a full professorship)		\$ 34,997.83
The Suzanne Kolarik Underwood Scholarship Fund (Scholarship - architectural design)		\$ 30,600.00
The GAR Foundation Scholarship Fund (Financial assistance for students enrolled in the College of Law)		\$ 25,000.00
The R.M. Harpham, Moody/Nolan, Ltd., Spencer & Spencer Inc. Minority Scholarship Fund (Scholarships - School of Architecture)		\$ 21,000.00
The All American Youth Horse Show Endowment Fund (Scholarships - members of the 4-H horse program)		\$ 15,000.00
The Martha Miller Lotman Memorial Scholarship Fund (Scholarships - Marion Campus)		\$ 15,000.00
The Sigmund & Rita Munster and Family Athletic Endowment Fund (Grant-in-Aid costs of a student-athlete who is a member of the football squad)		\$ 15,000.00
Change in Description of Named Fund		
The Optometry Class of 1953 Endowed Scholarship Fund		

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

SUMMARY FOR DECEMBER 1988

Background

Source	No. of Projects	Support Level
The Ohio State University Research Foundation	93	\$11,102,535.08
Engineering Experiment Station	60	\$ 36,918.00
Total	153	\$11,139,453.08

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION

Federal Research Contracts/Grants

\$1,275,000.00 - National Aeronautics and Space Administration, Washington, DC, A Center for Commercial Development of Space: Real-Time Satellite Mapping, Center for Mapping (J. D. Bossler), Department of Electrical Engineering (K. L. Boyer), Department of Geodetic Science (G. C. Dedes, C. C. Goad, and A. F. Schenk), Department of Civil Engineering (D. Eckert, J. G. Lyon, M. R. McCord, and T. H. Wu), Department of City and Regional Planning (S. I. Gordon), Department of Agronomy (T. J. Logan), Department of Geography (H. J. Moellering), Department of Agricultural Engineering (J. C. Papritan and A. D. Ward), Department of Landscape Architecture (J. W. Simpson), Department of Geology and Mineralogy (R. R. Von Frese), 1 September 1988 through 31 August 1989. (Project 765707 - Continuation)

\$360,000.00 - Department of the Navy, Office of Naval Research, Arlington, VA, Joint Services Electronics Program, Department of Electrical Engineering, ElectroScience Laboratory (L. Peters, Jr., P. H. Pathak, E. H. Newman, R. T. Compton, and R. C. Chou), 1 October 1988 through 30 September 1991. (Project 767124 - Continuation)

\$299,947.00 - National Science Foundation, Washington, DC, Mathematics through Technology: Establish Concepts and Skills of Graphing and Functions in Grades 9 through 12, Department of Educational Theory and Practice (A. Osborne and G. Foley) and Department of Mathematics (F. Demana and B. Waits), 1 November 1988 through 31 October 1989. (Project 766335 - Continuation)

\$199,967.00 - Department of Health and Human Services, Public Health Service, National Center for Health Services, Research and Health Care Technology Assessment, Rockville, MD, Heart Health for Southeast Asians in Franklin County, Ohio, School of Health, Physical Education and Recreation (M. S. C. Chen), Department of Family Medicine (R. M. Guthrie) and Department of Sociology (W. Li), 1 November 1988 through 31 October 1990. (Project 767139 - New)

\$196,595.00 - Department of Education, Office of Postsecondary Education, Washington, DC, Title III -- Development and Improvement of Academic Programs, Agricultural Technical Institute - Administrative Support (D. D. Garrison), 1 October 1988 through 30 September 1989. (Project 766437 - Continuation)

\$190,000.00 - Department of the Army, Army Corps of Engineers, Vicksburg, MS, ARMS -- An Acoustics-Based Resuspension Measurement System for In-Place Estimates of Entrainment and Erosion from Dredged Material Disposal Sites, Department of Civil Engineering (K. W. Bedford), 1 October 1988 through 30 September 1989. (Project 766710 - Continuation)

\$143,189.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, MD, Redox and Electron-Transfer Properties of Flavodoxins, Department of Biochemistry (R. P. Swenson), 1 December 1988 through 30 November 1989. (Project 767166 - New)

\$140,883.50 - Department of Health and Human Services, Public Health Service, Center for Disease Control, Atlanta, GA, Study to Evaluate the Impact Strategies to Improve Prevention Behaviors and Reduce the Risk for Lower Extremity Amputation in Persons with Diabetes Mellitus, Department of Internal Medicine (S. Cataland), 30 September 1988 through 29 September 1990. (Project 767120 - New)

\$134,104.00 - Department of the Interior, Geological Survey, Reston, VA, Digital Line Graph Hypsography Enhancement, Center for Mapping (J. D. Bossler), 1 October 1988 through 30 September 1989. (Project 767156 - New)

February 3, 1989 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$116,000.00 - Department of the Army, Army Material Command, Fort Monmouth, NJ, Computer-Communication Protocols for ISDNs (Integrated Services Digital Networks), Department of Computer and Information Science (M. T. Liu), 1 March 1988 through 30 November 1989. (Project 766613 - Continuation)

\$100,000.00 - National Aeronautics and Space Administration, Lewis Research Center, Cleveland, OH, Effects of Ice Formation on 2-D Aerodynamic Shapes, Department of Aeronautical and Astronautical Engineering (M. B. Bragg and G. M. Gregorek), 1 November 1988 through 31 October 1989. (Project 762009 - Continuation)

\$97,259.00 - Department of the Navy, Office of Naval Research, Arlington, VA, Pack Cementation Coating of Ni-Base and Co-Base Alloys to Combat Low Temperature Hot Corrosion, Department of Materials Science and Engineering (R. A. Rapp), 1 November 1987 through 31 October 1989. (Project 765839 - Continuation)

\$92,000.00 - National Science Foundation, Washington, DC, Physical Studies of Xanthine Oxidase and Arsenite Oxidase, Department of Physiological Chemistry (C. R. Hille), 1 November 1988 through 31 October 1989. (Project 767140 - New)

\$88,430.00 - Department of the Air Force, Air Force Systems Command, Bolling Air Force Base, DC, Laser Diagnostics of Plasma Thrusters, Department of Aeronautical and Astronautical Engineering (T. M. York), 1 December 1988 through 30 November 1989. (Project 767158 - New)

\$86,760.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, MD, Preclinical Pharmacology Investigations of Antitumor Agents, College of Pharmacy (L. Malspeis), 1 November 1988 through 13 April 1989. (Project 765385 - Continuation)

\$86,540.00 - Department of the Navy, Office of Naval Research, Arlington, VA, High-Level Connectionist Models, Department of Computer and Information Science (J. B. Pollack), 1 January 1989 through 30 September 1989. (Project 767172 - New)

\$85,505.00 - Department of Agriculture, Animal and Plant Health Inspection Service, Fort Collins, CO, Evaluation of Economics and Epidemiologic Data from the National Animal Health Monitoring System (NAHMS): Identifying Bacterial Agents Associated with Bovine Mastitis and Special Studies with the NAHMS Core for Mastitis in Dairy Cattle, Department of Veterinary Preventive Medicine (G. Y. Miller), 1 October 1988 through 30 September 1989. (Project 766673 - Continuation)

\$83,181.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, MD, A Study of DNA Intercalating Aromatic Amino Azides, Department of Chemistry (M. S. Platz), 1 December 1988 through 30 November 1989. (Project 765804 - Continuation)

\$75,000.00 - National Science Foundation, Washington, DC, Superconductive Glass State and Other Properties of Granular Materials, Department of Physics (D. G. Stroud), 1 April 1989 through 31 March 1990. (Project 766614 - Continuation)

\$75,000.00 - Department of Energy, Argonne, IL, Strongly Interacting Fermion Systems, Department of Physics (J. W. Wilkins), 15 November 1988 through 14 May 1989. (Project 766783 - Continuation)

February 3, 1989 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$72,936.00 - National Science Foundation, Washington, DC, Manipulation of Objects by Means of Phased Movements of Multiple Fingers, Department of Mechanical Engineering (K. J. Waldron), 1 December 1988 through 31 March 1990. (Project 766443 - Continuation)

\$69,655.00 - National Aeronautics and Space Administration, Lewis Research Center, Cleveland, OH, Modeling of Gear Dynamics, Housing Noise and Transmissibility of a NASA Spur Gear Test Facility, Department of Mechanical Engineering (D. R. Houser and R. Singh), 9 January 1989 through 8 January 1990. (Project 765863 - Continuation)

\$64,175.00 - Department of the Air Force, Air Force Systems Command, Griffis Air Force Base, NY, Explanation in Problem-Solving and Planning Systems, Department of Computer and Information Science (B. Chandrasekaran), 1 October 1988 through 15 1989. (Project 764562 - Continuation)

\$56,233.00 - National Science Foundation, Washington, DC, Cretaceous and Tertiary Strata of the James Ross Basin and the Evolution of the Antarctic Peninsula, Byrd Polar Research Center and Department of Geology and Mineralogy (D. H. Elliot), 15 October 1988 through 14 October 1989. (Project 767154 - New)

\$50,000.00 - Department of the Army, Army Materiel Command, Dover, NJ, Synthesis of Polynitro Cage Molecules, Department of Chemistry (L. A. Paquette), 1 May 1988 through 29 April 1990. (Project 765379 - Continuation)

\$48,890.00 - Department of the Air Force, Air Force Systems Command, Bolling Air Force Base, DC, Stability of Boundary Layers at High Supersonic and Hypersonic Speeds, Department of Mechanical Engineering (T. Herbert), 1 October 1988 through 31 March 1989. (Project 766854 - Continuation)

\$48,144.00 - National Science Foundation, Washington, DC, Presidential Young Investigator Award, Department of Civil Engineering (M. R. McCord), 1 January 1989 through 31 December 1989. (Project 766242 - Continuation)

\$45,139.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, MD, Comparative Aspects of Peripheral Lung Mechanics, Department of Veterinary Physiology and Pharmacology (L. E. Olson), 1 December 1988 through 30 November 1989. (Project 765821 - Continuation)

\$41,600.00 - National Science Foundation, Washington, DC, Cenozoic Sea-Level and Glacial Variation in the Western Ross Sea, Antarctica, Through Diatom Paleocology and Stratigraphy, Byrd Polar Research Center (D. H. Elliot and D. M. Harwood), 1 February 1989 through 31 January 1990. (Project 767155 - New)

\$37,000.00 - National Science Foundation, Washington, DC, Molecular Beam Reactions Involving Metal Hydroxides and Hydrides, Department of Chemistry (J. M. Parson), 1 June 1989 through 31 May 1990. (Project 765988 - Continuation)

\$36,229.00 - National Science Foundation, Washington, DC, Secular Climate and Atmospheric Circulation Fluctuations over the Atlantic Area, Department of Geography (J. C. Rogers), 1 November 1988 through 31 October 1989. (Project 767077 - New)

February 3, 1989 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$27,000.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, MD, Campylobacter pylori in the Gnotobiotic Piglet, Department of Veterinary Pathobiology (S. G. Krakowka and K. A. Eaton), 1 January 1989 through 31 December 1989. (Project 767150 - New)

\$25,000.00 - National Aeronautics and Space Administration, Lewis Research Center, Cleveland, OH, Adaptive Arrays for Satellite Communication, Department of Electrical Engineering, ElectroScience Laboratory (I. J. Gupta and E. K. Walton), 20 October 1988 through 28 February 1989. (Project 764040 - Continuation)

\$20,838.00 - National Science Foundation, Washington, DC, Computer-Aided Design and Measurement Microwave Workstation for Undergraduate Instruction, Department of Electrical Engineering (P. Roblin and G. J. Valco), 15 November 1988 through 31 October 1990. (Project 767171 - New)

\$20,004.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, MD, Fc Receptor Signal Transduction in the Human Platelet, Department of Internal Medicine (C. L. Anderson and G. P. Anderson), 1 November 1988 through 31 October 1989. (Project 767145 - New)

\$18,000.00 - National Aeronautics and Space Administration, Washington, DC, Rapid Prototyping with Centaurs, Department of Industrial and Systems Engineering (P. J. Smith), 30 September 1988 through 30 September 1989. (Project 765706 - Continuation)

\$15,444.00 - National Aeronautics and Space Administration, Goddard Space Flight Center, Greenbelt, MD, Ultraviolet Spectroscopy of Planetary Nebulae: Cosmological Implications, Department of Astronomy (G. J. Ferland, B. M. Peterson and E. R. Capriotti), 15 December 1988 through 14 December 1989. (Project 766473 - Continuation)

\$7,382.00 - National Science Foundation, Washington, DC, Structural Influence of Zeolites on Metals and Metal Complexes Within Its Cavities -- A Raman Spectroscopy Study, Department of Chemistry (P. K. Dutta), 1 July 1988 through 30 June 1989. (Project 764936 - Continuation)

\$6,260.00 - National Science Foundation, Washington, DC, Exploring Mechanisms of a Species Replacement in a Benthic Stream Community, Department of Zoology (R. A. Stein), 15 October 1988 through 30 September 1989. (Project 767135 - New)

\$6,221.00 - National Science Foundation, Washington, DC, Systematics of the Genus *Mulinum* Pers. (Apiaceae), Department of Botany (T. F. Stuessy), 1 December 1988 through 30 November 1990. (Project 767167 - New)

TOTAL - FEDERAL AWARDS

\$4,641,510.50

State of Ohio Research Contracts/Grants

\$47,855.00 - State of Ohio, Department of Development, Columbus, OH, Commercialization of High Temperature Ceramic Superconductors, Department of Physics (D. L. Cox), 24 October 1988 through 24 April 1989. (Project 767132 - New)

February 3, 1989 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

State of Ohio Research Contracts/Grants (contd)

\$17,875.00 - State of Ohio, Department of Transportation, Columbus, OH, Geodetic Advisor for the State of Ohio, Center for Mapping (J. D. Bossler), 1 July 1988 through 30 June 1989. (Project 766352 - Continuation)

\$8,370.00 - State of Ohio, Ohio Arts Council, Columbus, OH, We are All the People with AIDS, Department of Theatre (R. T. Wharton III), 1 July 1988 through 30 March 1989. (Project 767121 - New)

TOTAL - STATE OF OHIO AWARDS \$ 74,100.00

Industrial Research Contracts/Grants

\$525,243.00 - Cray Research, Inc., Mendota Heights, MN, Research and Development Agreement with Cray Research, Inc., Ohio Supercomputer Center (C. F. Bender), 1 November 1988 through 31 October 1989. (Project 766446 - Continuation)

\$197,939.00 - General Electric Company, Cincinnati, OH, Electromagnetic Characterization of Design Features for Propulsion Systems, Department of Electrical Engineering, ElectroScience Laboratory (P. H. Pathak and L. Peters, Jr.), 1 November 1988 through 31 January 1990. (Project 767136 - New)

\$178,200.00 - Pfizer, Inc., Groton, CT, Phase I Double-Blind, Placebo-Controlled, Safety Toleration and Pharmacokinetic Study of Multiple Doses of Intravenous Fluconazole, Department of Pharmacology (N. Gerber), 9 January 1988 through 8 November 1988. (Project 765696 - Continuation)

\$100,000.00 - Pacific Applied Research, Rancho Palos Verdes, CA, Short Wavelength Chemical Laser Fluid Dynamics, Department of Mechanical Engineering (J. W. Rich and Department of Aeronautical and Astronautical Engineering (J. D. Lee), 15 October 1988 through 14 October 1989. (Project 766600 - Continuation)

\$88,039.00 - Pfizer, Inc., Groton, CT, Phase I Study to Assess the Potential of Amlodipine to Alter the Pharmacodynamics of Warfarin, Department of Pharmacology (N. Gerber), 11 September 1988 through 10 March 1989. (Project 765696 - Continuation)

\$83,000.00 - Mission Research Corporation, Santa Barbara, CA, Advanced Radar Cross Section Measurement Range, Department of Electrical Engineering, ElectroScience Laboratory (W. D. Burnside and J. D. Young), 1 September 1988 through 31 December 1988. (Project 766973 - Continuation)

\$62,650.00 - General Electric Company, Cincinnati, OH, Plasma Arc Tunnel Test Program, Department of Aeronautical and Astronautical Engineering (J. D. Lee and G. M. Gregorek), 13 October 1988 through 12 October 1989. (Project 767130 - New)

\$30,000.00 - Borg-Warner Chemicals, Inc., Parkersburg, WV, Research and Development of an Advanced Class-8 Truck Cab, Department of Industrial Design (R. F. Butter and H. Goeller), 19 September 1988 through 18 September 1989. (Project 767123 - New)

\$28,600.00 - Syntex (USA), Palo Alto, CA, Ketorolac Tromethamine Solution 0.5% in the Maintenance of Intraoperative Pupillary Mydriasis During Cataract Extraction: Double-Masked Parallel

February 3, 1989 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Industrial Research Contracts/Grants (contd)

Comparison with Vehicle, Department of Ophthalmology (R. H. Keates), 1 October 1988 through 1 June 1989. (Project 767143 - New)

\$15,000.00 - Bio-Metric Systems, Inc., Eden Prairie, MN, A Comparison of Intraocular Lens Toxicity Within the Rabbit Eye, Department of Ophthalmology (R. H. Keates), 12 September 1988 through 31 March 1989. (Project 767142 - New)

\$12,500.00 and Personnel Services - Oceanroutes, Inc., Sunnysvale, CA, Center for Commercialization of Space Membership Agreement, Center for Mapping (J. D. Bossler), 1 November 1988 through 31 October 1989. (Project 766219 - Continuation)

\$7,722.00 - Bausch and Lomb, Rochester, NY, An Investigation to Determine if Specular Photomicroscopic Analysis of the Cornea Epithelium is a Viable Test of Contact Lens Performance, College of Optometry (J. T. Barr), 1 September 1988 through 31 December 1988. (Project 767141 - New)

\$5,434.00 - The Andersons, Maumee, OH, The Economic Viability of Formulating Agricultural Chemicals Using Liposome Technology, Department of Horticulture - OARDC and Department of Horticulture (S. F. Gorski) and Department of Agronomy and Cooperative Extension State Operations (J. R. Street), 22 April 1988 through 31 October 1988. (Project 766778 - New)

\$5,315.00 - CIBA-GEIGY Corporation, Greensboro, NC, Product Palatability Study, Department of Veterinary Clinical Sciences (C. A. Buffington), 1 October 1988 through 31 March 1989. (Project 767153 - New)

\$3,000.00 - Agway, Inc., Syracuse, NY, Effects of Protein, Carbohydrate and Fat Source on Bacterial Colonization and Degradation of Fiber In Vitro, Department of Dairy Science - OARDC and Department of Dairy Science (J. L. Firkins), 1 November 1988 through 31 October 1989. (Project 767138 - New)

\$2,145.00 - Omega Biologicals, Inc., Woodland Hills, CA, Various Monoclonal Antibodies Consumers, Department of Microbiology (B. S. Zwilling), 1 October 1988 through 31 August 1989. (Project 766485 - New)

TOTAL - INDUSTRIAL AWARDS

\$1,344,787.00

Other Non-Federal Research Contracts/Grants

\$114,680.00 - University of Chicago, Argonne, IL, Interfacial Phenomena and Dynamics of Bubbles in Gas-Liquid-Solid Fluidization, Department of Chemical Engineering (L. S. Fan and R. S. Brodkey), 4 November 1988 through 3 November 1989. (Project 767131 - New)

\$112,023.00 - Midwest Universities Consortium for International Activities, Inc., Columbus, OH, Agribusiness Training Project in the Dominican Republic, Office of International Programs in Agriculture (D. O. Hansen), 1 October 1988 through 31 January 1989. (Project 767137 - New)

\$100,000.00 - Gas Research Institute, Chicago, IL, Center for Commercialization of Space Membership Agreement, Center for Mapping (J. D. Bossler), 1 January 1988 through 31 December 1988. (Project 766219 - Continuation)

February 3, 1989 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Other Non-Federal Research Contracts/Grants (contd)

\$80,000.00 - American Cancer Society, Atlanta, GA, Function of the Herpes Simplex Virus Deoxyribonuclease, Department of Microbiology and Immunology (D. S. Parris), 1 January 1989 through 31 December 1989. (Project 765525 - Continuation)

\$70,400.00 - Harold Wetterberg Foundation, Roseland, NJ, A Role of Prolactin and Growth Hormone Phosphorylation and Glycosylation in the Metabolism of the Cow, Department of Veterinary Pathobiology (C. L. Brooks), 1 June 1988 through 31 May 1991. (Project 767163 - New)

\$70,200.00 - Medical College of Ohio, Toledo, OH, Health Promotion, Disease Prevention for Poor, Underserved, and Minority Older Women, College of Medicine - Administration (G. L. Trzebiatowski), 1 October 1988 through 30 September 1989. (Project 767114 - New)

\$42,360.00 - United Nations, Rome, Italy, Identification of Genomic Alterations in Plant Tissue After Long-Term Storage of Seed, Department of Agronomy - OARDC and Department of Agronomy (J. C. Kamalay), 1 December 1988 through 30 November 1989. (Project 766128 - Continuation)

\$38,000.00 - University of Nebraska, Lincoln, NE, A Research/Extension Awareness Program for Low-Input Agriculture in Ohio, Department of Agronomy - OARDC and Department of Agronomy (D. J. Ecker and R. Lal), 1 June 1988 through 30 September 1989. (Project 767127 - New)

\$31,050.00 - People's Republic of China, Beijing, China, Training in American Enterprise, Trade, and Technology Transfer in the 21st Century for Representatives of the People's Republic of China, Department of Mechanical Engineering (R. E. Bailey), 1 June 1988 through 31 December 1988. (Project 766956 - Continuation)

\$29,575.00 - Hildegard Doerenkamp-Gerhard Zbinden Foundation 1, Chur, Switzerland, Cell Culture Model for Spinal Cord Injury, Department of Physiological Chemistry (L. A. Horrocks), 1 November 1988 through 31 October 1989. (Project 767162 - New)

\$26,299.00 - Children's Hospital, Columbus, OH, Intestinal Transplantation in Inbred Rats, Department of Surgery (C. G. Orosz), 1 August 1988 through 31 July 1989. (Project 767161 - New)

\$22,484.00 - University Space Research Association, Houston, TX, USRA Aeronautics Pilot Program, Department of Aeronautical and Astronautical Engineering (G. M. Gregorek), 15 August 1988 through 15 June 1989. (Project 767119 - Continuation)

\$20,427.00 - North Central Regional Center for Rural Development, Ames, IA, Regional Survey of Operators and Their Farming Partners, Department of Agricultural Economics and Rural Sociology - OARDC and Department of Agricultural Economics and Rural Sociology (L. L. Reif) and Department of Sociology (M. K. Meyer), 1 October 1988 through 31 December 1989. (Project 767159 - New)

\$16,643.00 - Central Ohio Diabetes Association, Columbus, OH, The Effect of Exercise Training on the Metabolic and Microvascular Complications Associated with Non-Insulin Dependent Diabetes Mellitus, School of Health, Physical Education and Recreation (W. M. Sherman), Department of Internal Medicine (K. Osei), Department of Veterinary Physiology and Pharmacology (R. Hamlin), and School of Allied Medical Professions (K. Ward), 1 October 1988 through 30 September 1989. (Project 767152 - New)

\$16,166.00 - American Quarter Horse Association, Amarillo, TX, Effect of Exercise on Articular Cartilage Repair in the Horse, Department of Veterinary Clinical Sciences (L. R. Bramlage), 1 October 1988 through 30 September 1989. (Project 767151 - New)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND

Establishment of Named Funds

The Janice Carson Beatley Herbarium Fund

The Janice Carson Beatley Herbarium Fund was established February 3, 1989, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from Charles E. Beatley, Jr. (B.A. '38, M.A. '47) of Alexandria, Virginia, and Mary Beatley Jordan (B.A. '44) of Sunland, California.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used for field research for graduate students in plant systematics and ecology within the College of Biological Sciences.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

The John A. Prior Professorship Fund

The John A. Prior Professorship Fund was established February 3, 1989, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from John A. Prior (B.A. '35, M.D. '38), Columbus, Ohio, former Dean of the College of Medicine, his family and friends.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Named Funds (contd)

The John A. Prior Professorship Fund (contd)

The intent of this endowment fund is to lead to the establishment of a full professorship to be known as The John A. Prior Professorship in the College of Medicine. All interest earned and additional gifts shall be added to the principal until such time as sufficient funding is available to fully establish the Professorship. The Professorship will be used to support teaching and research in pulmonary diseases through the Department of Internal Medicine, Division of Pulmonary Diseases, with the primary emphasis on research activities.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

The Suzanne Kolarik Underwood Scholarship Fund

The Suzanne Kolarik Underwood Scholarship Fund was established February 3, 1989, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from William Michael Kolarik (B.S.M.E. '79), Sparks, Nevada; William James and Helen Marie Kolarik, Palm Harbor, Florida; Max Underwood, Tempe, Arizona; and the family and friends of the late Suzanne Kolarik Underwood (B.S.Arch. '77).

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide an annual scholarship award to a student entering his/her fourth year architectural design studio, who has demonstrated superior ability and talent in his/her third year architectural design studio. Should the endowment principal generate funds more than the tuition needed for one academic year, the excess shall be used to award a scholarship to a student entering the third year architectural design studio who has completed and demonstrated superior ability and talent in his/her second year design studio work. Should the endowment earnings exceed funds necessary to support both scholarships for three full quarters of tuition, earnings over that amount shall be used for the School of Architecture's general scholarship fund. The scholarship award(s) shall be based not on financial need, but rather on demonstrated academic excellence in architectural design. The selection will be made jointly by the chairperson and the appropriate architectural design professors of the Department of Architecture in consultation with the University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund it should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the director of the School of Architecture, the chairperson of the Department of Architecture, or the appropriate program administrative officer in order to carry out the desire of the donors.

February 3, 1989 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Named Funds (contd)

The GAR Foundation Scholarship Fund

The GAR Foundation Scholarship Fund was established February 3, 1989, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from The GAR Foundation of Akron, Ohio.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide financial assistance to one or more students with demonstrated financial need who are enrolled in the College of Law, with first preference being given to law students who are from Summit County.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with The GAR Foundation and with preference being given to the recommendations from the appropriate administrative official of the University who is then directly responsible for the law education in order to carry out the desire of the donor.

**The R. M. Harpham, Moody/Nolan, Ltd.,
Spencer & Spencer Inc. Minority Scholarship Fund**

The R. M. Harpham, Moody/Nolan, Ltd., Spencer & Spencer Inc. Minority Scholarship Fund was established February 3, 1989, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from the firms R. M. Harpham, Moody/Nolan, Ltd., and Spencer & Spencer Inc., of Columbus, Ohio.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide scholarship awards for Black American students entering their first year of study in the School of Architecture who plan to major in architecture at The Ohio State University. The recipient will be chosen based on financial need and the likelihood that the candidate will complete course work in architecture and enter the profession. The scholarship's intent is to encourage Black students to enter architecture. Selection will be made by the Department of Architecture Scholarship Committee in coordination with the University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Named Funds (contd)

The All American Youth Horse Show Endowment Fund

The All American Youth Horse Show Endowment Fund was established February 3, 1989, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from the All American Youth Horse Show Foundation, Columbus, Ohio.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide an academic scholarship to one or more twelfth-grade students who are members of the 4-H horse program, planning to enroll each autumn quarter at The Ohio State University or other accredited post-secondary institution in any course of study. Applicants for this award shall be judged on their level of 4-H involvement (40%), experiences in other youth organizations (20%), future plans and potential for success (20%) and need for the scholarship (20%). Awarding of this scholarship shall be made in accordance with the rules and procedures set forth by the State 4-H Office and in consultation with the All American Youth Horse Show Foundation and The Ohio State University Committee on Student Financial Aid. Any income not used in a given year will be added to the principal at the end of that fiscal year.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

The Martha Miller Lotman Memorial Scholarship Fund

The Martha Miller Lotman Memorial Scholarship Fund was established February 3, 1989, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from family members, in honor of Martha Miller Lotman, formerly of Marion, Ohio.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

Fifteen percent (15%) of the annual income distributed shall be added to the fund's principal. The remaining eighty-five (85%) shall be used for one or more scholarships to deserving students who are qualified to enroll at The Ohio State University, Marion Campus. Preference for scholarship awards shall be given to those students majoring in journalism, communication or English. The selection of the recipient(s) will be made by a committee consisting of a designated member of the family, and the University Committee on Financial Aid at the Marion Campus. The University shall make all reasonable attempts to contact a family member to have a representative present during the selection process. The successor to the above committee will be The Ohio State University Committee on Student Financial Aid in consultation with the Dean of The Ohio State University at Marion. Unused income in any given year shall be added to the principal of the fund.

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Named Funds (contd)

The Martha Miller Lotman Memorial Scholarship Fund

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate administrative official of the University then responsible for student scholarship awards to students of the Marion, Ohio, area in order to carry out the desire of the donors.

**The Sigmund & Rita Munster and Family
Athletic Endowment Fund (contd)**

The Sigmund & Rita Munster and Family Athletic Endowment Fund was established February 3, 1989, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from the Sigmund Munster family of Columbus, Ohio.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide funds for the grant-in-aid (scholarship) costs of a student-athlete who is a member of the football squad. Selection of the recipients is to be made by the Director of Athletics in cooperation with the University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees with preference being given to the recommendations from the appropriate administrative official of the University then responsible for the intercollegiate athletic program in order to carry out the desire of the donors.

Change in Description of Named Fund

The Optometry Class of 1953 Endowed Scholarship Fund

The Optometry Class of 1953 Endowed Scholarship Fund was established November 30, 1979, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from members of the College of Optometry Class of 1953. The description was changed February 3, 1989.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide one or more scholarships to students in the College of Optometry and/or graduate students in physiological optics, with first preference going to a junior-year student who has shown extreme proficiency in the clinical application of optometry. Selection of the recipient(s) is to be made by the University Committee on Student Financial Aid with recommendations from the approved advisors of the Optometry Class of 1953, so long as they survive, with assistance from the Director of the Clinic. Upon the demise of all members of the

\$280,000.00 - Department of Energy, Argonne, Illinois, High Energy Physics, Department of Physics (High Energy Physics Group: S. Durkin, H. P. Kagan, R. D. Kass, K. D. Lane, T. Y. Ling, A. J. Niemi, W. F. Palmer, S. S. Pinsky, N. W. Reay, K. Reibel, T. A. Romanowski, J. Shigemitsu, R. A. Sidwell, N. R. Stanton, G. Steigman, K. Tanaka, and W. W. Wada), 16 November 1988 through 31 December 1988. (Project 762116 - Continuation)

\$218,440.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, NLS Resurvey: Older Male Survivors and Decedents' Widows, Center for Human Resource Research (H. S. Parnes), 1 December 1988 through 30 November 1989. (Project 767203 - New)

\$194,444.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Function and Assembly of Carbon Dioxide Assimilatory Enzymes, Department of Microbiology (F. R. Tabita), 1 January 1989 through 31 December 1989. (Project 767196 - New)

February 3, 1989 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$181,717.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Regulation of the Gene Expression in Neurospora, Department of Biochemistry (G. A. Marzluf), 1 January 1989 through 31 December 1989. (Project 760578 - Continuation)

\$180,469.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Novel Antineoplastic Agents from Higher Plants, College of Pharmacy (J. M. Cassidy and R. W. Doskotch) and Department of Pathology (R. E. Stephens), 1 December 1988 through 30 November 1989. (Project 767168 - New)

\$176,446.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Genetic and Molecular Studies of RNA Splicing, Department of Molecular Genetics (P. S. Perlman), 1 December 1988 through 30 November 1989. (Project 763452 - Continuation)

\$160,926.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Phase I and Clinical Pharmacokinetic Studies of Anticancer Agents, Comprehensive Cancer Center and Department of Internal Medicine (M. R. Grever) and College of Pharmacy (L. Malspeis), 1 December 1988 through 31 May 1989. (Project 764860 - Continuation)

\$150,000.00 - Department of the Navy, Office of Naval Research, Arlington, Virginia, The Physics of Submicron Systems, Department of Physics (J. W. Wilkins), 1 October 1988 through 30 September 1989. (Project 767184 - New)

\$150,000.00 - National Science Foundation, Washington, D.C., Catalytic Site of Calmodulin-Dependent Protein Kinases, Department of Chemistry (M. M. King), 1 February 1989 through 31 January 1991. (Project 767220 - New)

\$147,983.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Research Triangle Park, North Carolina, DNA Damage Following Exposure to Genotoxin, Department of Radiology (A. A. Wani, S. M. D'Ambrosio and R. M. Snapka), 1 December 1988 through 30 November 1989. (Project 762787 - Continuation)

\$139,250.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Stereochemistry of Enzyme Reactions to Phosphorus, Department of Chemistry (M. D. Tsai), 1 December 1988 through 30 November 1989. (Project 762722 - Continuation)

\$127,316.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Linking Maternal Employment and Child Care Arrangements to Child Development, Department of Sociology (T. L. Parcel), 12 December 1988 through 30 November 1989. (Project 767226 - New)

\$119,000.00 - Department of the Navy, Office of Naval Research, Arlington, Virginia, Identification of Airborne Radar Targets, ElectroScience Laboratory, Department of Electrical Engineering (E. K. Walton, F. D. Garber and R. L. Moses), 11 January 1989 through 30 April 1989. (Project 765216 - Continuation)

\$100,000.00 - Department of the Air Force, Air Force Systems Command, Wright- Patterson Air Force Base, Ohio, Scatterer Modeling/Calibration Study, ElectroScience Laboratory, Department of

February 3, 1989 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

Electrical Engineering (R. J. Marhefka), 1 October 1988 through 30 September 1989. (Project 766957 - Continuation)

\$98,551.00 - Department of the Army, Army Research Office, Research Triangle Park, North Carolina, A Fundamental Investigation into the Joining of Advanced Light Materials, Department of Welding Engineering (W. A. Baeslack, III), 1 April 1989 through 31 March 1990. (Project 766676 - Continuation)

\$88,774.00 - National Science Foundation, Washington, D.C., Development of a Computer-Aided Drafting/Computer-Aided Manufacturing (CAD/CAM) Laboratory Based on Workstations and Computer-Aided Modeling Machines, Department of Mechanical Engineering (G. L. Kinzel), 15 November 1988 through 31 October 1990. (Project 767214 - New)

\$84,778.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Bone-Cement Interface Biomechanics, Department of Surgery (A. S. Litsky), 1 December 1988 through 30 November 1989. (Project 767202 - New)

\$83,202.00 - Department of Transportation, National Highway Traffic Safety Administration, East Liberty, Ohio, Free Flight Composite Head Development, Department of Mechanical Engineering (J. A. Collins), 1 January 1989 through 31 December 1989. (Project 765776 - Continuation)

\$80,784.00 - Department of Agriculture, Forest Service, Broomall, Pennsylvania, Measurement of Forest Condition and Response Along an Atmospheric Deposition Gradient, Laboratory for Environmental Science - OARDC (J. R. McClenahan), 1 October 1988 through 31 December 1989. (Project 767211 - New)

\$78,221.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Recombinant Pharmaceutical Protein Production in Eggs, Department of Dairy Science - OARDC (C. P. Hodgson), 1 January 1989 through 31 December 1989. (Project 767179 - New)

\$77,848.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Intestinal Function in a Hibernator: Adaptive Changes, Department of Physiology (H. V. Carey), 1 January 1989 through 31 December 1989. (Project 766634 - Continuation)

\$75,000.00 - National Aeronautics and Space Administration, Lewis Research Center, Cleveland, Ohio, The Effects of Magnetic Nozzle Configurations on Plasma Thrusters, Department of Aeronautical and Astronautical Engineering (T. M. York), 1 January 1989 through 31 December 1989. (Project 766488 - Continuation)

\$60,961.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Oxidate PMN/Periodontium Interaction in Oral Disease, Diagnostic Services (S. R. Mallery and C. M. Allen) and Department of Physiological Chemistry (A. J. Merola), 1 December 1988 through 30 November 1989. (Project 765142 - Continuation)

February 3, 1989 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$60,100.00 - National Science Foundation, Washington, D.C., Presidential Young Investigator Award, Department of Physics (C. Jayaprakash), 1 January 1989 through 31 December 1989. (Project 764850 - Continuation)

\$58,216.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Hypothalamic Neuronal Sensitivity in Pregnant WKY/SHR Rats, Department of Physiology (J. A. Boulant and D. Christenson), 1 December 1988 through 30 November 1989. (Project 765130 - Continuation)

\$50,000.00 - National Science Foundation, Washington, D.C., Theoretical Studies of Equilibrium and Non-Equilibrium Multi-Layer Films, Department of Physics (W. F. Saam and C. A. Ebner), 1 May 1989 through 30 April 1990. (Project 766478 - Continuation)

\$48,658.00 - Department of Education, Office of Postsecondary Education, Washington, D.C., Supplemental Funds to Initiate, Improve, or Expand a Program of Cooperative Education, Arts and Sciences Administration, Business Administration and Engineering Administration (R. Arkin), Agricultural Technical Institute-Administrative Support (D. D. Garrison), School of Health, Physical Education and Recreation (W. A. Sutton), and Education Administration (J. J. Buffer), 1 October 1988 through 30 September 1989. (Project 767117 - Continuation)

\$45,939.00 - Department of the Navy, Office of Naval Research, Arlington, Virginia, Ultrasonic Near-Subbottom Characterization and Correlation with Time Variations in Entrainment and Deposition, Department of Civil Engineering (K. W. Bedford and C. M. Libicki), 1 January 1989 through 31 December 1989. (Project 766605 - Continuation)

\$45,000.00 - National Aeronautics and Space Administration, Washington, D.C., Cellular Polarity and Interactions in Plant Gravisperception, Department of Botany (F. D. Sack), 15 December 1988 through 14 December 1989. (Project 764883 - Continuation)

\$39,923.00 - National Aeronautics and Space Administration, Ames Research Center, Moffett Field, California, Target Signature Modeling and Bistatic Scattering Measurement Studies, ElectroScience Laboratory, Department of Electrical Engineering (R. J. Marhefka), 1 December 1988 through 31 August 1989. (Project 767063 - Continuation)

\$29,447.00 - Department of Agriculture, Science and Education, Washington, D.C., Institutional Support from the Animal Health and Disease Research Act of 1977, Veterinary Medicine Administration (R. A. Wright), 1 October 1988 through 30 September 1989. (Project 762621 - Continuation)

\$28,396.00 - Department of the Air Force, Air Force Systems Command, Wright-Patterson Air Force Base, Ohio, Robust Stability and Performance for Linear Systems with Combined Structured and Unstructured Uncertainty, Department of Aeronautical and Astronautical Engineering (R. K. Yadavalli), 1 October 1988 through 15 September 1989. (Project 766964 - Continuation)

\$24,932.00 - Department of Health and Human Services, Public Health Service, Health Resources and Services Administration, Rockville, Maryland, Case Management of Adolescents with Chronic Diseases, Center on Education and Training for Employment (R. D. Ryan), 1 October 1988 through 30 June 1989. (Project 767195 - New)

February 3, 1989 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$20,115.00 - Department of Education, Office of Educational Research and Improvements, Washington, D.C., A Multifaceted Mentoring Program for Minority Students on a Regional Campus, Mansfield Campus (J. O. Riedl), 1 September 1988 through 31 August 1989. (Project 766434 - Continuation)

\$20,000.00 - National Science Foundation, Washington, D.C., Interdisciplinary Conference on Axiomatic Systems, Department of Mathematics (H. Friedman), 1 November 1988 through 31 October 1989. (Project 767183 - New)

\$20,000.00 - Department of the Air Force, Air Force Systems Command, Wright- Patterson Air Force Base, Ohio, Controller Design Approaches and Evaluations, Department of Electrical Engineering (U. Ozguner and S. Yurkovich), 1 October 1988 through 30 November 1988. (Project 766464 - Continuation)

\$19,871.00 - National Aeronautics and Space Administration, Langley Research Center, Hampton, Virginia, Decentralized Control and Identification Experiments for the NASA Langley Research Center SCOLE (Spacecraft Control Laboratory Experiment Program), Department of Electrical Engineering (U. Ozguner and S. Yurkovich), 1 January 1989 through 31 August 1989. (Project 765807 - Continuation)

\$15,000.00 - National Science Foundation, Washington, D.C., Conference on Orthogonal Polynomials and Their Applications, Department of Mathematics (P. Nevai), 1 December 1988 through 30 November 1989. (Project 767193 - New)

\$5,855.00 - National Science Foundation, Washington, D.C., Systematics of Arali (Araliaceae), Department of Botany (T. F. Stuessy), 15 November 1988 through 30 November 1990. (Project 767178 - New)

TOTAL - FEDERAL AWARDS \$6,439,037.00

State of Ohio Research Contracts/Grants

\$229,899.00 - State of Ohio, Department of Development, Columbus, Ohio, Ohio State University Institute for Japanese Studies, Department of Political Science (B. M. Richardson), 1 July 1988 through 30 June 1990. (Project 767209 - Continuation)

\$100,640.00 - State of Ohio, Department of Education, Columbus, Ohio, Reading Recovery Project, Department of Educational Theory and Practice (G. S. Pinnell), 1 July 1988 through 30 September 1989. (Project 767218 - Continuation)

\$35,880.00 - State of Ohio, Board of Regents, Columbus, Ohio, Enhancing Mathematics Through Technology, Department of Mathematics (F. Demana), 15 July 1988 through 31 December 1989. (Project 767194 - New)

\$28,328.00 - State of Ohio, Department of Development, Columbus, Ohio, Foot Force Monitoring Device, Department of Surgery (A. S. Litsky), 1 November 1988 through 31 October 1989. (Project 767190 - New)

\$26,900.00 - State of Ohio, Department of Development, Columbus, Ohio, Support for the Ohio Technology Transfer Organization (OTTO), Academic Affairs Administration (R. E. Bailey), 1 July 1986 through 30 June 1987. (Project 765536 - Continuation)

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$4,411.76 - State of Ohio, Department of Education, Columbus, Ohio, TRIO Subsidy Program, Office of Minority Affairs (L. G. Morrow), 1 July 1988 through 30 June 1989. (Project 766723 - Continuation)

\$500.00 - State of Ohio, Department of Development, Columbus, Ohio, Youth Correction and Population Management in Ohio: A Policy Development Project, School of Public Policy and Management (C. R. Huff), 1 June 1988 through 31 December 1988. (Project 766240 - Continuation)

\$133.34 - State of Ohio, Department of Development, Columbus, Ohio, Retention and Expansion of Existing Businesses, Department of Agricultural Economics and Rural Sociology - OARDC and Cooperative Extension State Operations (G. W. Morse), 1 June 1987 through 30 September 1988. (Project 765667 - Continuation)

TOTAL - STATE OF OHIO AWARDS \$ 426,692.10

Industrial Research Contracts/Grants

\$2,224,757.00 - Cray Research, Inc., Mendota Heights, Minnesota, Research and Development Agreement with Cray Research, Inc., Ohio Supercomputer Center (C. F. Bender), 1 November 1989 through 31 October 1992. (Project 766446 - Continuation)

\$355,463.00 - Pfizer, Inc., Groton, Connecticut, A Multiple Dose, Double- Blind, Placebo-Controlled Study of the Safety, Toleration and Pharmacokinetics of CP-72,467 in Healthy Male Volunteers, Department of Pharmacology (N. Gerber), 6 September 1988 through 5 March 1989. (Project 765696 - Continuation)

\$90,000.00 - Roerig/Pfizer, New York, New York, A Prospective, Open, Non- Comparative Study of Cefoperazone-Sulbactam in the Treatment of Patients with Serious Infections, Department of Internal Medicine (R. J. Fass), 1 October 1988 through 30 September 1989. (Project 767181 - New)

\$80,589.00 - Pfizer, Inc., Groton, Connecticut, Phase I Study to Assess the Potential of Sertraline to Alter Steady State Serum Lithium Levels and Renal Clearance of Lithium in Healthy Volunteers, Department of Pharmacology (N. Gerber), 6 October 1988 through 5 April 1989. (Project 765696 - Continuation)

\$76,881.00 - Pfizer, Inc., Groton, Connecticut, Evaluation of the Safety, Clinical Activity, Toleration and Pharmacokinetics of CP-80,794 -- A Single Escalating Dose Study in Normotensive Healthy Volunteers, Department of Pharmacology (N. Gerber), 18 October 1988 through 17 April 1989. (Project 765696 - Continuation)

\$49,900.00 - Teledyne CAE, Toledo, Ohio, Propfan Characterization Study, ElectroScience Laboratory, Department of Electrical Engineering (L. Peters, Jr.), 1 January 1989 through 31 December 1989. (Project 766312 - Continuation)

\$39,851.00 - Boeing Aerospace Company, Seattle, Washington, Frequency Selective Surfaces, ElectroScience Laboratory, Department of Electrical Engineering (B. A. Munk and L. W. Henderson), 1 December 1988 through 30 November 1989. (Project 767222 - New)

\$39,150.00 - Pfizer, Inc., Groton, Connecticut, Azithromycin in the Treatment of Streptococcal Pharyngitis in Outpatients -- A Multicenter, Third Party, Blinded Trial Employing Penicillin V as a Comparative Agent, University Health Service (D. I. Charles), 1 October 1988 through 30 September 1989. (Project 767199 - New)

February 3, 1989 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Industrial Research Contracts/Grants (contd)

\$38,000.00 - PepsiCo, Inc., Valhalla, New York, Isolation and Characterization of the Protein Fraction of Gum Arabic, Department of Food Science and Nutrition - OARDC and Department of Food Science and Nutrition (M. E. Mangino), 1 January 1989 through 31 December 1989. (Project 766532 - Continuation)

\$37,852.00 - Pfizer, Inc., Groton, Connecticut, Phase I Study of the Effect of Concomitant Cimetidine Administration on the Absorption of Azithromycin, Department of Pharmacology (N. Gerber), 26 October 1988 through 25 April 1989. (Project 765696 - Continuation)

\$37,307.27 - Merck and Company, Iselin, New Jersey, Determination of the Efficacy of Norfloxacin for the Treatment of Bacterial Skin Infections in Dogs, Department of Veterinary Clinical Sciences (J. J. Kowalski, K. W. Kwochka and D. J. Chew), 1 November 1988 through 31 January 1989. (Project 767204 - New)

\$30,309.71 - Merck and Company, Iselin, New Jersey, Determination of the Efficacy of Norfloxacin for the Treatment of Bacterial Urinary Tract Infections in Dogs, Department of Veterinary Clinical Sciences (J. J. Kowalski, D. J. Chew and K. W. Kwochka), 1 November 1988 through 31 January 1989. (Project 767205 - New)

\$24,964.00 - General Electric Company, Cincinnati, Ohio, Electromagnetic Characterization of Detailed Design Features of Aircraft/Engine Exhaust Systems, ElectroScience Laboratory, Department of Electrical Engineering (P. H. Pathak, L. Peters, Jr. and R. C. Chou), 15 July 1988 through 14 July 1989.

\$14,684.00 - Danninger Medical Technologies, Inc., Columbus, Ohio, Foot Force Monitoring Device, Department of Surgery (A. S. Litsky), 1 November 1988 through 31 October 1989. (Project 767227 - New)

\$10,000.00 - Stuart Pharmaceuticals, Wilmington, Delaware, A Multicenter Comparison of Zoladex Depot and Surgical Castration in Metastatic Prostate Carcinoma, Department of Surgery (J. R. Drago), 1 September 1985 through 30 June 1989. (Project 765067 - Continuation)

\$7,975.00 - Triton Biosciences, Inc., Alameda, California, Open-Label Phase II Study to Evaluate the Safety and Efficacy of High Dose IFN-Beta in Patients with Renal Cell Carcinoma, Department of Internal Medicine (J. J. Rinehart), 31 March 1986 through 31 March 1989. (Project 765338 - Continuation)

\$7,815.00 - AT&T Bell Laboratories, Columbus, Ohio, Improving the Written Communication Skills of Non-Native Speakers of English in the Work Setting Through Group Work and Individualized Tutorial, English as a Second Language Program (R. N. Kantor), 1 January 1989 through 31 May 1989. (Project 767207 - Continuation)

\$3,807.00 - AT&T Bell Laboratories, Columbus, Ohio, Improving the Written Communication Skills of Non-Native Speakers of English in the Work Setting Through Individualized Tutorial, English as a Second Language Program (R. N. Kantor), 1 October 1988 through 30 June 1989. (Project 767206 - Continuation)

\$3,504.00 - Pet-Ag, Inc., Elgin, Illinois, Evaluation of Liquid Food Supplements in Cat Diets, Department of Veterinary Clinical Sciences (C. A. Buffington), 21 November 1988 through 30 May 1989. (Project 767180 - New)

February 3, 1989 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Industrial Research Contracts/Grants (contd)

\$3,451.00 - Astra Alab AB, Sodertalje, Sweden, Novel Drug Delivery Systems, College of Pharmacy (S. G. Frank), 1 January 1988 through 31 December 1988. (Project 762165 - Continuation)

TOTAL - INDUSTRIAL AWARDS \$ 3,176,259.98

Other Non-Federal Research Contracts/Grants

\$434,183.00 - Indonesian Government, Jakarta, Indonesia, Refresher C Programs for Faculties of the Institutes for Teacher Training and Education and for the Faculties of Teacher Training and Education of Indonesia, Education Administration (J. J. Buffer), 1 October 1988 through 31 July 1989. (Project 767165 - Continuation)

\$142,818.00 - National Training Fund for the Sheet Metal and Air-Conditioning Industry, Washington, D.C., National Training Fund University Center for the Sheet Metal and Air-Conditioning Industry, 1989-91, Center on Education and Training for Employment (R. D. Ryan), 1 January 1989 through 31 December 1989. (Project 767175 - Continuation)

\$90,500.00 - American Cancer Society, Atlanta, Georgia, Genetic Characterization of Novel Elements in Protein Membrane Assembly, Department of Chemistry (R. E. Dalbey), 1 January 1989 through 31 December 1991. (Project 767189 - New)

\$69,000.00 - American Cancer Society, New York, New York, Characterization of Mouse I Region Recombination Hot Spots, Department of Microbiology and Immunology (W. P. Lafuse), 1 January 1989 through 31 December 1989. (Project 765788 - Continuation)

\$68,738.00 - University of Texas, Galveston, Texas, Studies of Mechanism and Therapy of Human Immunodeficiency Virus Cytotoxicity, Department of Veterinary Pathobiology (J. L. Rojko), 1 September 1988 through 31 August 1989. (Project 766650 - Continuation)

\$58,445.00 - The University of Iowa, Iowa City, Iowa, Cystic Fibrosis Research Center: Membrane Biology of Cystic Fibrosis, Department of Zoology (D. L. Stetson), 30 September 1988 through 29 September 1989. (Project 767188 - New)

\$41,602.00 - Dade County Public Schools, Miami, Florida, Dropout Prevention for At-Risk, Limited English Proficient Students, Center on Education and Training for Employment (R. D. Ryan), 1 October 1988 through 30 September 1989. (Project 767174 - New)

\$30,000.00 - Pew Memorial Trust, Philadelphia, Pennsylvania, Pew National Veterinary Education Program -- Phase III, Veterinary Medicine Administration (R. A. Wright), 14 September 1988 through 31 October 1989. (Project 767173 - New)

\$20,000.00 - Canadian Government, Quebec, Canada, Canadian Radio-Television and Telecommunications Commission Contract, National Regulatory Research Institute (D. N. Jones), 15 November 1988 through 31 March 1989. (Project 767197 - New)

\$15,000.00 - Deafness Research Foundation, New York, New York, Role of Fimbriae in the Adherence of Nontypable Hemophilus influenzae to Nasopharyngeal and Middle Ear Mucosa, Department of Otolaryngology (L. A. Bakaletz), 1 January 1989 through 31 December 1989. (Project 765827 - Continuation)

February 3, 1989 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Other Non-Federal Research Contracts/Grants (contd)

\$15,000.00 - Deafness Research Foundation, New York, New York, Antibody Levels Directed Against the Outer Membrane Proteins of Hemophilus influenzae from Patients with Chronic Otitis Media with Effusion, Department of Otolaryngology (T. DeMaria), 1 January 1989 through 31 December 1989. (Project 765840 - Continuation)

\$14,768.00 - Cornell University, Ithaca, New York, Design, Prototype, and Debug Mixer-Shaper Boards for CLEO, Department of Physics (H. P. Kagan and R. D. Kass), 1 January 1988 through 30 June 1989. (Project 766574 - Continuation)

\$12,000.00 - Research Corporation, Tucson, Arizona, Metal Ion Catalysis in Phosphoryl Transfer from Polyphosphates, Department of Chemistry (D. L. Leussing), 1 January 1989 through 31 December 1990. (Project 767221 - New)

\$9,968.00 - Indiana University, Bloomington, Indiana, Malaysia Cooperative Program, English as a Second Language Program (T. T. Diemer), 1 January 1989 through 31 March 1989. (Project 764972 - Continuation)

\$7,874.00 - University of Washington, Seattle, Washington, Gonadotropin Patterns and Ovarian Function, Department of Obstetrics and Gynecology (C. I. Friedman and M. H. Kim), 1 September 1988 through 31 August 1989. (Project 767217 - New)

\$7,150.00 - Cornell University, Ithaca, New York, Design, Prototype, and Debug Mixer-Shaper Boards for CLEO, Department of Physics (H. P. Kagan and R. D. Kass), 1 January 1988 through 31 December 1988. (Project 766574 - Continuation)

\$5,000.00 - Sigma Kappa Sorority Foundation, North Little Rock, Arkansas, An Improved Animal Model for Alzheimer's Disease: The Effect of Long-Term Nucleus Basalis Lesions on Dendritic Morphology in Golgi-Impregnated Neurons of Young and Old Rats, Department of Pathology (R. F. Mervis), 15 September 1988 through 14 September 1989. (Project 767198 - New)

\$5,000.00 - Cancer Therapy and Research Foundation of South Texas, San Antonio, Texas, Central Office for the Developmental Biologics Activities of the Southwest Oncology Group, Department of Internal Medicine (J. J. Rinehart), 1 January 1988 through 31 December 1988. (Project 767147 - Continuation)

\$4,000.00 - University of Nebraska, Lincoln, Nebraska, Sustainable Agriculture Educational Displays, Department of Entomology (C. A. Edwards), 1 June 1988 through 30 September 1989. (Project 767191 - New)

\$4,000.00 - National Geographic Society, Washington, D.C., Planning Grant for a Geographic Alliance Network, Department of Geography (W. R. Smith) and Mershon Center for Education (R. C. Remy), 1 October 1988 through 30 November 1989 (Project 767215 - New)

\$3,000.00 - University of Alabama at Birmingham, Birmingham, Alabama, Intergroup Melanoma Study, Department of Surgery (W. B. Farrar), 1 July 1988 through 30 June 1989. (Project 767201 - New)

February 3, 1989 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Other Non-Federal Research Contracts/Grants (contd)

\$2,500.00 - Egyptian Government, Washington, D.C., Cultural and Educational Bureau -- Peace Fellowship Program, Department of Biochemistry (D. H. Dean), 30 October 1988 through 29 March 1989. (Project 767216 - New)

TOTAL - OTHER NON-FEDERAL AWARDS \$1,060,546.00

ENGINEERING EXPERIMENT STATION

Industrial and Other Sponsored Research and Development

\$36,918.00 - from 48 sponsors of 60 development projects in two departments/research areas of the College.

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Named Funds (contd)

The E. F. Wildermuth Foundation
Professorship Fund in Optometry

The E. F. Wildermuth Foundation Professorship Fund in Optometry was established February 3, 1989, by the Board of Trustees of The Ohio State University with an initial gift of \$50,000 and a five-year pledge and agreement with The Ohio State University Development Fund from the E. F. Wildermuth Foundation of Columbus, Ohio.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income for the first five years (pledge period) shall be used at the discretion of the Dean of the College of Optometry, with the understanding that priority consideration be given to scholarship support for one or more students enrolled in the College of Optometry at The Ohio State University. Accordingly, selection of scholarship recipient(s) shall be made by the University Committee on Student Financial Aid.

After the University receives the full amount of the cash pledge by the E. F. Wildermuth Foundation (\$250,000), the University will transfer up to \$250,000 funds from the existing E. F. and Kathryn M. Wildermuth Memorial Endowment - Optometry Fund, to bring the E. F. Wildermuth Foundation Professorship Fund in Optometry up to the minimum of \$500,000. Once the endowment reaches \$500,000, a minimum of ten percent of the annual earnings from the total accumulated principal shall be returned to principal each year in perpetuity. The remaining ninety percent (90%) of annual income shall be used to provide compensation and/or program support for truly distinguished scholars in Optometry. Appointment of the Professorship will be recommended by the Dean of the College of Optometry after consultation with the appropriate academic selection committees. Final approval will be made by the Provost, the President, and the Board of Trustees.

It is the desire of the donor that this fund should benefit the University in perpetuity. The trustees of the E. F. Wildermuth Foundation shall retain input on the uses and direction of the professorship, through access and relations with the Dean of the College of Optometry. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in order to carry out the desire of the donors.

February 3, 1989 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Named Funds (contd)

The Edward M. Alkire Scholarship Fund

The Edward M. Alkire Scholarship Fund was established February 3, 1989, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from Edward M. Alkire (B.A. Arts & Sciences '29, M.A. '30) of Laguna Hills, California.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide one or more academic scholarships for junior, senior, and/or graduate students enrolled full-time in the College of Social and Behavioral Sciences with a major course of study in mental health. The selection of the recipient(s) of the award(s) will be made by a committee from the Department of Psychology in coordination with the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

The Derek H. Busch Memorial Award Fund

The Derek H. Busch Memorial Award Fund was established February 3, 1989, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from Dr. and Mrs. Daryle Busch of Columbus, Ohio, in memory of Derek H. Busch.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to fund a yearly scholarship or award for graduate or undergraduate students enrolled in the School of Music with a major in piano. Award or scholarship recipients shall be selected by the Dean of the College of The Arts, or his/her designee, in consultation with the University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, School of Music director, or program administrative officer in order to carry out the desire of the donors.

The W. Chaney and Jane S. Vance Family 4-H Fund

The W. Chaney and Jane S. Vance Family 4-H Fund was established February 3, 1989, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from W. Chaney and Jane S. Vance (B.S.H.E. '41), of Pickaway County, Ohio, and by their children: Wm. Gerald (B.S.Agr. '66) of Columbus, Ohio; Lawrence G. (B.S.Agr. '66) of Dublin, OH; Barbara J. (M.S., Home Economics, '88) of Mount Sterling, Ohio; and Linda S. (B.S.Agr. '71) of New York, New York.

February 3, 1989 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Named Funds (contd)

The W. Chaney and Jane S. Vance Family 4-H Fund (contd)

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to grant one or more scholarships to current or former 4-H members from the State of Ohio who are entering with intention to enroll or are currently enrolled in the College of Agriculture or the College of Home Economics at any of the campuses of The Ohio State University. Scholarship awards shall be based on merit (scholarship, leadership, and community service). Student recipients shall also exemplify the ideals of 4-H. Award recipients shall be selected by the 4-H Awards Selection Committee in consultation with the scholarship coordinators of the College of Agriculture and the College of Home Economics and the University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

Change in Name and Description of Named Fund

**The Steve R. and Sarah E. O'Donnell
Professorship in Philosophy**

The Department of Philosophy Faculty Support Fund was established June 5, 1987, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from Steve R. O'Donnell (B.E.E. '62, M.S. '63) and Sarah E. O'Donnell of Westerville, Ohio. The name and description were changed February 3, 1989.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide compensation and/or program support for truly distinguished scholars in philosophy. Appointment of the O'Donnell Professorship will be recommended by the Dean of the College of Humanities after consultation with the appropriate academic selection committees. Final approval will be made by the Provost, the President, and the Board of Trustees.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

**EASEMENT
BUCKEYE RURAL ELECTRIC CO-OPERATIVE, INC.**

Resolution No. 89-79

Synopsis: Authorization to grant an easement to the Buckeye Rural Electric Co-operative, Inc., for relocation of electric service pole lines is requested.

WHEREAS The Buckeye Rural Electric Co-operative, Inc. has requested a 15-year easement consisting of a strip of land five feet in width and approximately 1,639 feet in length for the installation of electric pole lines along State Route 93 in Jackson County, Ohio; and

WHEREAS the University has granted a right of entry to Buckeye Rural Electric Co-operative, Inc. for the work that has been performed; and

WHEREAS the electric service will serve University property and private property; and

WHEREAS the Buckeye Rural Electric Co-operative, Inc. agrees to compensate the University with a lump sum payment of \$500.00 in consideration of the granting of this easement; and

WHEREAS the appropriate University offices have recommended that this easement be granted:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to request the Deputy Director of Public Works of the Department of Administrative Services, pursuant to his statutory duties, to act for and on behalf of the University in developing the necessary legal instruments to provide for this easement.

Upon motion of Mr. Kessler, seconded by Mr. Berry, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix XXVI for map of Buckeye Rural Electric Co-Operative, Inc. Easement at the Jackson County Branch of the Ohio Agricultural Research and Development Center, page 799.)

--0--

Mr. Scott

Mr. Chairman, just one brief announcement -- it looks like we have a number of schedule conflicts for March -- people being out of town and not being available. There is a real likelihood that we will not schedule the regular Board meeting for March. As soon as we know, we will try to let you know. In the event that we don't have a March Board meeting then the next regular Board meeting will be April 7, 1989.

--0--

Thereupon the Board adjourned.

Attest:

Madison H. Scott
Secretary

Leonard J. Immke
Chairman

MEMORANDUM

Subject: Proxy Voting
Date: January 31, 1989
From: Alvin C. Rodack, Associate Treasurer *Alvin C. Rodack*
To: Board of Trustees, The Ohio State University

During the months of December 1988 and January 1989, the University voted sixteen proxies.

Management proposals were as follows:

- 1) Election of the Board of Directors;
- 2) Amendment to fix the number of directors at eleven;
- 3) Ratification of independent auditors;
- 4) Approval of a name change for a mutual fund;
- 5) Approval of a change in investment policy for a mutual fund;
- 6) Amendment to limit the liability of the directors and officers;
- 7) Approval of a merger agreement between three entities into one new entity;
- 8) Approval of a new capitalization plan with regard to a merger;
- 9) Amendment allowing for stockholder actions to be taken only during scheduled stockholder meetings;
- 10) Amendment allowing the Board of Directors to issue preferred stock with voting rights;
- 11) Approval allowing the Board of Directors to issue non-convertible preferred stock;
- 12) Amendment to increase common stock shares available for a 1981 stock option plan and an employee stock purchase plan;
- 13) Adoption of a 1989 stock option plan; amendment to a 1986 United Kingdom option program to increase common stock shares available for the plan;
- 14) Ratification of a plan that would eliminate any limitations on the number of shares of common stock for which directors may be granted options.

Shareholder proposals were as follows:

- 1) Require the audit committee to meet a minimum of three times a year;
- 2) Amendment that would bar one individual from holding the position of Chairman, President and Corporate Secretary, concurrently;
- 3) Resolution requiring elimination of business activity, in the Republic of South Africa.

The University voted for all management proposals, for shareholder proposal number three and against shareholder proposals one and two. Management was opposed to all shareholder proposals.

The sixteen corporations were:

- 1) Alberto-Culver Company
- 2) Apple Computer Incorporated
- 3) Black and Decker Corporation
- 4) Cardinal Government Securities Trust
- 5) Cardinal Tax-Exempt Money Trust
- 6) Comdisco Incorporated
- 7) Emerson Electric Company
- 8) Energy Fund Incorporated
- 9) Federal Land Bank Association, Fourth District
- 10) Lubys Cafeterias Incorporated
- 11) National Service Industries Incorporated
- 12) Products Research and Chemical Corporation
- 13) Ralston Purina Company
- 14) Varian Associates Incorporated
- 15) Walgreen Company
- 16) The Walt Disney Company

APPENDIX XVI

RECOMMENDATIONS FROM THE OFFICE OF THE TREASURER
REGARDING THE ENNIS KNUPP REPORT AND THE INVESTMENT
POLICY FOR THE OHIO STATE UNIVERSITY ENDOWMENT FUND

Presented to the Investments Committee and
Adopted by the Board of Trustees February 3, 1989
(See page 671)

Office of the Treasurer

Riverwatch Tower - Suite B
364 West Lane Avenue
Columbus, OH 43201-1002

Phone 614-292-6261
Telex: 205261
Telecopier: 614-292-8643
Cable: OSU TRES UD

RECOMMENDATIONS FROM THE OFFICE OF THE TREASURER
REGARDING THE ENNIS KNUPP REPORT AND THE
INVESTMENT POLICY FOR THE OHIO STATE UNIVERSITY ENDOWMENT FUND

RECOMMENDATION: OSU'S INVESTMENT PHILOSOPHY GOALS

We believe that the Trustees have done well to establish as a goal to preserve the purchasing power of the endowment. But the University's secondary endowment goal -- to produce a certain level of income yield -- seems incongruous with the University's total-return orientation. In fact, it might cause an inappropriate emphasis of fixed-income securities. We recommend against an emphasis of current income in the policy statement.

COMMENTS: We agree with this recommendation. Total return in order to maintain purchasing power should be emphasized as the goal of the endowment while current income should be a goal of University investments. Modification is needed in the investment policy statement.

RECOMMENDATION: INVESTMENT POLICY AFFECTING THE OVERALL RISK LEVEL

We recommend that the University have an investment policy calling for the following allocation to stocks, bonds, and real estate:

Common stock	60%
Fixed-income	25
Real estate	<u>15</u>
	100%

We believe that this policy will likely provide a long-term return great enough to allow the University to meet its goal of preserving the purchasing power of the endowment given the current spending policy.

COMMENTS: The Office of the Treasurer disagrees that a specific allocation should be made to stocks, bonds, and real estate since this specific allocation could be too restrictive during wide market swings. We would support a narrowing of the current ranges as follows:

Equities	50-75%
Fixed-Income	25-50%
Real Estate	5-20%
Cash	0-20%

RECOMMENDATION: THE UNIVERSITY'S REAL ESTATE INVESTMENTS

Real estate investments can play an important role in the endowment, providing diversification, consistent and competitive returns, and inflation protection. The University's current endowment real estate investments are highly concentrated. This concentration creates greater uncertainty concerning whether the University will achieve the benefits listed above, but we do not believe that the amount of concentrated real estate investments is imprudent.

We recommend that the University refrain from adding related properties to its concentrated endowment real estate holdings. But, as gift additions and perhaps real estate sales reduce the significance of the concentrated real estate in the endowment, we recommend that the University invest in diversified real estate funds to maintain the 15% policy allocation to real estate.

COMMENTS: The Office of the Treasurer agrees that the current percentage is appropriate. We feel geographic diversification is appropriate including the usage of pooled real estate funds. All local real estate holdings are now examined based on their investment merit. We feel if attractive real estate investments arise locally, they should still be considered as a viable endowment investment.

RECOMMENDATION: FURTHERING DIVERSIFICATION

We recommend that the Trustees further the diversification of the endowment portfolio by adding investments in small-capitalization stocks and foreign stocks.

Small-capitalization stocks represent approximately 30% of the U.S. stock market and have provided greater long-term returns than stocks of larger companies. Foreign stocks represent approximately two-thirds of the world stock market and thus are an important investment opportunity. The returns of both small-capitalization stocks and foreign stocks are imperfectly correlated with large-capitalization stock returns, and could thus provide important diversification benefits to the total endowment.

COMMENTS: The Office of the Treasurer feels that investment in foreign equities or fixed income would be appropriate. However, this should be done via a mutual or index fund. The type of domestic equities purchased should be left to the discretion of our advisors.

RECOMMENDATION: ASSET ALLOCATION POLICY

We recommend the following overall asset allocation policy for the OSU endowment:

Large-capitalization stock	35%
Small-capitalization stock	15
Foreign stock	<u>10</u>
Total stocks	60%
Bonds	25%
Real estate	<u>15%</u>
Total	100%

This allocation is superior to the current allocation of the endowment of 60% in domestic, large capitalization stocks in that it can be expected to provide a greater rate of return per unit of risk incurred.

COMMENTS: The Office of the Treasurer is opposed to specific allocations. We feel that suggested equity, fixed income, real estate ranges are appropriate. However, breaking these groupings down further (such as small capitalization and foreign equities) is unnecessary. If the trustees feel that a specific sector of the market is desirable in the portfolio, then they can direct the selection of investment advisors, index or mutual funds toward that specific area.

RECOMMENDATION: MAINTAINING THE ASSET ALLOCATION

The University's current policy statement allows common stock to vary within a range of 30% to 70% of the endowment. We recommend that the University re-allocate assets as needed to maintain the approximate allocation called for by our policy recommendation. If the level of common stock exposure is allowed to wander within a large range, there can be no assurance of meeting the Trustee's objective of preserving the purchasing power of the endowment.

COMMENTS: As stated previously, the Office of the Treasurer is opposed to specific asset allocation. However, we should support a narrowing of the ranges as they are currently written. The current practice of holding new funds in cash equivalents until annual advisor allocations are made should be revised. Direction should be given to the Treasurer toward the investing of new funds until permanent allocations are made.

RECOMMENDATION: USE OF INDEX FUNDS

We believe that the University would benefit by investing a portion of the endowment in Index Funds that match the returns and risk level of various market indices. Index Funds provide broad diversification at a very low cost, provide for the efficient transfer of funds between asset types, require minimal review on the part of the Trustees, and earn consistent, market-like returns.

We recommend that the University use Index Funds for the foreign stock and small-capitalization stock investments, should the Trustees decide to add these asset classes to the endowment. We also recommend that some portion of the large-capitalization stocks and bonds be invested in Index Funds, the amount depending on the Trustees' confidence in the current active investment managers.

COMMENTS: The Office of the Treasurer agrees that indexing would be an appropriate strategy. We agree that indexing should be done for both equities and fixed income, however, we do not necessarily agree that they be used for small capitalization stocks. We believe indexing should be done at a broad level and advisors should be used for more specialized areas. If the purchase of foreign equities is allowed, then we would recommend consideration of an index fund for that purpose. We would also recommend that if indexing is to be utilized, that no less than ten percent of the endowment be indexed.

RECOMMENDATION: THE MULTIPLE-MANAGER APPROACH

We are advocates of simplicity where possible in investment programs. The University's endowment has six fixed-income portfolios (including those internally managed) and five common stock portfolios (including the internally managed one and counting the three mutual funds as one). Our recommendations call for the addition of index funds and two new asset classes. At some point the program could become too unwieldy, requiring the Trustees to spend too much time monitoring investment management firms and allowing too little time for policy issues.

There is no optimal number of managers, but the endowment's current arrangement is at the high end of what we believe would make sense for the University.

COMMENTS: The Office of the Treasurer is comfortable with the number of managers currently being used. If indexing is utilized, consideration should be given to hiring additional advisors only for specialized areas.

RECOMMENDATION: INTERNALLY MANAGED PORTFOLIOS

As of mid-October, the internally managed stock portfolio represented 31% of the common stock allocation of the endowment. The portfolio is regionally-biased toward Ohio-based firms, and its size, level of risk, concentration, etc., are partially determined by chance, i.e., by the securities the donors choose to give over time.

We recommend that the Trustees ask one or more of the endowment's active managers to periodically review the list, that the Trustees set an upper limit on the internally managed stock of 25% of total stock, and that the University begin to cultivate an understanding with donors that it may hold donated stock for a short time only. We also recommend that the Trustees monitor the performance of the internally managed portfolio as they would any other portfolio.

The internally managed bond portfolio appears to have an important role as a holding place for monies to be redistributed. As long as the University maintains this portfolio at a relatively low level, we believe it serves a useful purpose.

We believe that in establishing the endowment's GNMA portfolio, the Trustees have likely gotten involved in the investment process to a greater degree than is desirable. We recommend that the University rely on its external investment managers to select and monitor specific securities. We favor the elimination of this portfolio and the distribution of its assets among other fixed-income portfolios.

COMMENTS: The Office of the Treasurer disagrees with a limit on any manager including OSU. The key to effective management is diversification of the portfolio as a whole, but not necessarily at the manager level. We agree that providing donors with an understanding that donated stocks may only be held for a short time is appropriate. We feel the Office of the Treasurer should take a more active role in managing the internal stock portfolio and gifts of securities donated to the University. The Trustees are already monitoring the performance of the internally managed portfolio as they would any other portfolio.

We believe a GNMA portfolio adds to the portfolio diversification and that the Office of the Treasurer has the expertise to manage this portfolio.

RECOMMENDATION: A STATEMENT OF INVESTMENT POLICY

In Appendix 2 we provide a statement of investment policy that reflects our principal policy recommendations. It excludes references to maximum industry concentrations, position sizes, etc., as we believe that the Trustees can fulfill their duties with respect to diversification through the use of index funds and by requiring the multiple active managers to diversify to the extent they deem appropriate given their roles in the endowment investment program.

COMMENTS: The Office of the Treasurer believes that the current investment policy which has been in place since 1981 needs to be revised and updated. Based on what actions are taken regarding the previous recommendations, the Office of the Treasurer is prepared to draft a revised investment policy and present it to the Investment Committee for their review. This policy revision should also include the policy on University Investments.

APPENDIX XVIII

REPORT ON CURRICULUM REVIEW

Presented to the Academic Affairs Committee and
Adopted by the Board of Trustees February 3, 1989
(See page 672)

REPORT TO THE BOARD OF TRUSTEES
FROM THE SUBCOMMITTEE ON ACADEMIC AFFAIRS

The goals and the framework of the University's review of undergraduate education were described by the Special Committee on Undergraduate Curriculum Review in its Interim Report of January 1987. A special sub-committee in Arts and Sciences developed a curricular model to address the general education goals set forth by the University Committee. This model was approved by the Arts and Sciences faculty last June.

The Arts and Sciences model includes a strong emphasis on the development of basic skills in writing, data analysis, and foreign languages. It includes a strong science requirement for non-science students. Students will be required to take courses that focus on the United States and Europe, as well as courses that focus on areas other than Europe and the United States. There are new requirements in the areas of social diversity, the arts, and international affairs. The new general education curriculum is spread across a student's total undergraduate program rather than being contained in the first two years, and includes in the senior year a "Contemporary Issues" Capstone course. The requirements are designed to provide a structured, cohesive liberal arts experience for all students.

General education curricular models are now being developed and proposed by the professional colleges. These proposals show strong liberal education being integrated into professional programs. Although alternative ways of meeting general education goals are sometimes proposed, the requirements in the professional colleges are expected to address the same goals of general education that were established by the University Committee.

Having completed the review of general education, departments in Arts and Sciences have moved on to the review of majors and minors. A primary purpose of these reviews is to establish a careful articulation between the requirements of the major and the requirements of general education. It is expected that these reviews in Arts and Sciences will be finished by June. As each professional college finishes its general education review, the college will move on to a review of its major programs.

Curriculum review committees have already begun to receive and review course proposals to meet the new requirements. Special funds have been designated within the Office of Academic Affairs to support new course development, and proposals are being received from the departments. Some new courses are being piloted this year. Full implementation of the new curriculum is expected in the 1990-91 academic year.

APPENDIX XX

THE OHIO STATE UNIVERSITY
COLLEGE OF AGRICULTURE - DEVELOPMENT UPDATE
January 1989

Presented to the Agricultural Affairs Committee and
Adopted by the Board of Trustees February 3, 1989
(See page 694)

The Ohio State University
College of Agriculture
Development Update
January 1989

Historical

Since the beginning of The Ohio State University College of Agriculture's Campaign in May of 1985, many factors have undergone change, and they continue to change as new leadership exerts its diverse interest and new priorities upon the many facets of the College of Agriculture's programs.

Since planning for the Campaign began in 1983, the College of Agriculture has experienced a leadership change -- from Max Lennon to Acting Dean Francille Firebaugh and now Fred Hutchinson. Every department chair has changed in the past four years. Also, the development officer, Clancy Biegler, replaced Bob Groves just two years ago.

Donor Sources

Each year our dollar goal has been exceeded and substantial progress has been made in developing a solid growing donor base, an important long-range ingredient. The alumni donor base has grown from 3,000 to 4,500. Corporate and foundation donors have increased from 390 to 515 and other organizations and associations have increased from 300 to 370. Substantial activity in the wills and bequests area has uncovered a number of wills. Efforts continue to convert wills to irrevocable trusts through donor cultivation and education.

Types of Gifts

During the Campaign we have received cash and securities in the amount of \$12.6 million, gifts-in-kind (i.e., equipment, animals, supplies, etc.) counted at \$2.3 million and irrevocable deferred gifts of over \$601,000. Expectancies or pledges amounting to \$1.7 million brings our total to over \$17.2 million. Private gifts from Ohio State Research Foundation sources totaling over \$1 million, added to the above gives us a total of \$18.2 million exceeding our \$18 million goal.

College of Agriculture Priorities

Changes in executive leadership, departmental chairs, the changing agricultural picture economically, and environmentally, all have had effects upon the interests and needs of faculty, researchers and donors. Much of our funding efforts either have been or are currently focused upon the following programs or chairs. Other funding efforts and excellent results have been directed toward departmental needs for equipment, supplies and program support. Thousands of dollars, mostly from organizations representing agri-industries who depend upon the College of Agriculture for research,

employee recruitment, and training have been given for faculty, researchers and advisors in laboratories and extension offices statewide.

The following is a list of our major chairs and endowments and their current status. Each will make a large difference to a department. Together, they will make a remarkable change to the College of Agriculture:

1. **Chair in Agricultural Economics** (original goal \$1.25 million)
 - (a) **The Anderson Chair in Agriculture Marketing/Trade Policy** currently funded at \$980,000
 - (b) **The Farm Income Enhancement Program**
goal: \$2 million endowment
\$1 million operating and interest growth
\$3 million Total

Total pledged and received: \$1,605,141
USDA funds received: 126,000
\$1,731,141
2. **The Food Industries Center** (original goal \$3.2 million, to be revised). Change to departmental status and expansion of current facility requires new research efforts already underway with private industry as well as possible state and federal assistance.
3. **Chair in Food Industries Center** (original goal, \$1.25 million)
 - (a) **The Haas Chair**, total raised, \$980,000
 - (b) **The Dairy Foods Chair** (goal, \$1.25 million)
Total received \$133,733
Total pledged 788,210
TOTAL \$921,943
4. **Chair in Turfgrass Research** (goal, \$1.25 million)
This program emerged as a priority for the Turfgrass Industry as chemical application problems require research, particularly with current drought conditions. We have a verbal commitment for the entire \$1.25 million with all indications that it will be consummated by the end of March. Donor anonymous at this time.
5. **Chair in Biotechnology (Plant)** (goal, \$1.25 million)
55% Microbiology in the College of Biological Science
45% Plant Pathology in the College of Agriculture
Major donor source is the DNAP Corporation, funded with expected growth stock in the amount of approximately \$300,000.

6. **Endowment for Undergraduate Scholarships and Graduate Fellowships** (original goal, \$2 million)
Received bequest of \$1.2 million.
We have received a number of \$15-25,000 endowed scholarships that have not been collectively credited to this fund. In addition, we are currently underwriting efforts to generate major funding for OARDC graduate fellowships.

7. **The Chadwick Arboretum** (tentative goal, \$3 million)
Board and Steering Committee is in the advanced funding phase under the direction of a part-time development consultant.

8. **The Ohio 4-H Campaign for Excellence** (goal, \$25 million)
See attached 4-H campaign brochure. John Mount is the Steering Committee Chairman. The campaign is nearing pre-campaign major donor solicitation.

APPENDIX XXI

**THE OHIO STATE UNIVERSITY
PCB ELIMINATION AND ELECTRICAL SYSTEM UPGRADE**

**Presented to the Fiscal Affairs Committee and
Adopted by the Board of Trustees February 3, 1989
(See page 695)**

THE OHIO STATE UNIVERSITY PCB ELIMINATION AND ELECTRICAL SYSTEM UPGRADE

This proposal discusses a \$22.9 million bond issue which will enable The Ohio State University to comply with Federally mandated regulations requiring the proper disposal of all cooling oils containing Polychlorinated Biphenyl (PCB) materials. PCB cooling oils are used in most of the electrical distribution equipment installed before the early 1970's at The Ohio State University.

Proceeds from this bond issue will enable the University to:

- o Replace 202 distribution class PCB building transformers and 271 power capacitors with environmentally safe units on all campuses. Removal and replacement of the transformers and capacitors will cost \$9.7 million or approximately 49% of the project cost.
- o Certain electrical distribution system improvements related to, but not directly involving PCB fluids, must be undertaken in order to accommodate the new electrical equipment. This portion of the work is estimated to cost \$7.3 million or approximately 37% of the project cost
- o Upgrade or install new major high voltage circuits from the Buckeye Electrical Substation to redistribute campus electrical loads and allow for future system-wide growth. The system upgrade work will cost \$3.0 million or approximately 14% of the project cost.

The project will produce two desirable outcomes. The first is that it will permit the University to remain in compliance with Federal environmental regulations by eliminating the use of PCB materials on the Columbus and regional campuses. The second will be to correct certain electrical distribution deficiencies on the Columbus campus, including undersized equipment and cabling, system age, changes in electrical codes and standards, and general electrical system reliability.

University Electrical Distribution System

The Ohio State University owns and operates an underground electrical power distribution system on the Columbus campus which serves approximately 92% of its buildings. Buildings which are not on the University's system (approximately 8%) receive electrical power directly from the utility company.

Electrical energy is fed into the University's distribution system at two locations. The main service point is the Buckeye Substation located on Cannon Drive directly west of Parks Hall. The utility company delivers power at 138,000 volts to this location, transforms it to 13,800 volts through two utility-owned transformers and delivers it to a common electrical bus system for utilization. In FY 1987-88 the University purchased 250,257 megawatt-hours, or approximately 87.7% of its power through this point.

The University has purchased electrical power at the Buckeye Substation since April 29, 1974, under a 25-year contract dated September 22, 1972, as amended October 31, 1979, with the Columbus and Southern Ohio Electric Company (now Columbus Southern Power Company). Provisions are made in the contract which allow for 5-year successive service periods after the

initial 25 years if desirable to both parties. There are also provisions for cancelling the contract while in force. However, neither party has indicated a desire to do so during its first seventeen years of existence.

The electrical rate structure has remained static since the October 31, 1979, amendment. The only changes in the unit price of power has been in the fuel cost adjustment portion of the bill. Fuel cost adjustments are standard provisions in utility contracts which are used by utility companies for passing on basic fuel cost changes that are beyond the company's control. Fuel cost adjustments are usually applicable to all customers regardless of specific contracts or rate classes. The fuel cost adjustment charges have decreased slightly over the past five years and indications are that this component of the unit cost will continue to remain stable for some time barring any unforeseen curtailment of basic fuel supplies.

The McCracken Heating Plant is the other power source for the Columbus campus. Initially this facility served as both the electrical and heating plant for the University community. Beginning sometime during the early to mid 1960's the electrical demands on campus dictated the need for an additional source of power. The role of the McCracken facility naturally shifted from a primary to a standby electrical production center for the campus as electrical loads grew. In FY 1987-88 the McCracken Power Plant produced only 4.7% of the power used on campus. Electricity is produced and distributed at a 4,160 volt level from this location.

Recently a 3,125 KW, 13,800 Volt, back-pressure steam turbine-generator was installed in the McCracken facility under the Coal-Fired Boiler project. The purpose of installing the turbine-generator was that, because of the back-pressure configuration and other operating conditions, electrical power can be produced at less cost than purchasing it through the Buckeye Substation. Under the present costs of fuel and purchased electricity, the University will recover its project cost in approximately 4.5 years in fuel and purchased electricity savings.

Electrical power is distributed to all buildings at either the 13,800 volt (Buckeye) or 4,160/13,800 volt (McCracken) level. Individual building transformers receive the incoming power and reduce it to either a 120/208 volt (normally electrical outlets and lights) or a 277/480 volt (normally large pump or fan motors) service level for use within the building. Many of the building transformers installed before the early 1970's contain PCB cooling fluids.

All of the day-to-day operation/maintenance work and capital repairs/improvements of the high and low voltage systems are the responsibility of the Physical Facilities Department. Every effort has been made to identify all known PCB installations and include them in the \$20.0 million project scope of work. In the event that additional PCB materials are identified during the course of this project, every effort will be made to include them in this work.

During FY 1987-88 the cost of purchasing power through the Buckeye Substation was 37.70 Mills (1 Mill = \$0.001) per KWH. The annual cost of operating and maintaining the University's distribution system during the same period increased the overall cost of the power by 2.65 Mills/KWH producing an aggregate distributed cost of 40.35 Mills/KWH.

During the same period the cost of buying electrical power from the utility company at each building under the "small user" Commercial and Industrial GS-1, GS-2 and GS-3 rates was 55.23 Mills/KWH. And this has been limited to only those buildings on the Columbus campus which are isolated from the University's distribution system. If it were the case that all of The Ohio State University Buildings were to pay the small user rate the University's electrical bill during FY 1987-88 would be roughly \$4.0 million higher. Clearly, the University benefits from the use of the Buckeye Substation and its associated electrical contract.

PCB Background

Polychlorinated Biphenyl (PCB) compounds were first developed in 1929, as a fire retardant additive for cooling fluids used in transformers, capacitors, switches, and other electrical equipment. PCB's are inherently stable compounds which have extremely high ignition points and will not decompose under ordinary conditions. At the time they were considered by most as the "perfect" answer to a fire hazard problem in the electrical power industry.

In the early 1970's, research indicated that a combination of the compound's inherent stability and its heavily chlorinated makeup caused serious and potentially devastating side effects in animals and humans. In addition, there have been some significant PCB related accidents which have resulted in costly clean-up operations. Perhaps the most widely known accident involves the State Office Building in Binghamton, New York. In 1981, an electrical fire involving PCB transformers contaminated the 20-story office building, rendering it unfit for occupation. Since then the State of New York has spent approximately \$33 million for its decontamination. It is reported that this process should be completed within one to two years.

In 1976, Congress ordered that all electrical apparatus containing PCB materials be refilled with a non-toxic cooling fluid. Since then the U.S. Environmental Protection Agency has promulgated a series of regulations to meet this mandate.

The latest regulation was issued on July 17, 1985. This regulation, known as the EPA Fire Rule Amendment, states that the use of PCB filled transformers in buildings which have food service outlets or house foodstuffs must undergo extensive and costly modifications or be eliminated by October 1, 1990. The USEPA generally considers any of the following as having food present in a building:

- o A cafeteria
- o A canteen
- o A vending machine area
- o A storage area for foodstuffs
- o Personal carry-in foodstuffs

Clearly, all buildings owned by The Ohio State University would satisfy one or more of the above conditions.

COMPLIANCE OPTIONS

Presently, there are only two viable options available for compliance with the Fire Rule Amendment regulation. These options include:

- o Retrofit each transformer with non-toxic cooling fluids.
- o Replace all transformers with new non-toxic units.

Retrofit

One method of retrofitting involves a fairly lengthy process of gradually removing the PCB coolant, filtering out the unwanted PCB material, and returning the coolant to the unit. Additional non-PCB coolant is added to restore the original amount of liquid.

After the filtering process, coolant samples are drawn for laboratory analysis. If the analysis proves the PCB levels to be less than 50 PPM, the unit would be considered safe for continued use. If the analysis was greater than 50 PPM, the filtering process would be completed once again.

A second method of refilling replaces the entire amount of PCB material with new, non-toxic material. This option is selected when the cooling fluid is almost pure PCB material. The transformer has to be removed from service while this is being done. Normally several fill and drain operations are required in order to flush enough of the PCB material from the unit so that it can meet the 50 PPM standard.

There are at least three drawbacks to the refill option. The first is that it is quite difficult to keep a refilled unit below some target PCB level. Power transformers consist of a fairly large ferromagnetic core. The core usually is constructed from a series of fairly thin (1/16" thick) iron sheets which are piled on top of one another.

At least two separate copper coils are tightly wound around the ferromagnetic core to form the primary and secondary voltage circuits. The remaining materials in a transformer are basically insulating and supporting materials. These materials are usually insulating paper and maple or oak braces. The entire assembly is then placed in an oil bath container which serves to dissipate unwanted heat buildup during the unit's operation. The container also forms a weather tight seal to protect the assembly from corrosion.

Over a period of time the PCB oil will seep into the inter-lamination spacings of the core. PCB oil will naturally be drawn into these paper and wooden materials as well. Both actions tend to temporarily "lock up" the oil so that it cannot be drained completely from the unit.

During a refill operation it is unlikely that these "hidden" pockets will be flushed out. The result is that even though a laboratory test may show compliance with the 50 PPM standard at the time the refill operation is completed, it may be the case that small amounts of oil temporarily locked into these pockets could leach out and re-contaminate the unit some months or even years later.

The second drawback to refill is that if the University never entirely rids itself of PCB materials and faces the possibility of needing further work to comply with future environmental standards. Most of the evidence to date shows that PCB's are probably dangerous at any level. If that is proven to be the case, it is likely that the present standard of 50 PPM could be cut to 5 PPM, or perhaps lower in the future. If The Ohio State University were to lay plans today for attaining 50 PPM and later finds the standard lowered, a second PCB removal project would have to be initiated. Refill costs can run as high as 60% to 70% of the replacement costs.

The third major drawback to the refill option is that it would not allow The Ohio State University to renew and/or reconfigure its electrical distribution system on the Columbus campus. Most of the PCB electrical components are at least twenty years old. Some date back to the early post World War II period.

The refilling option would not address the problems of age, electrical code compliance, and system reliability, which are becoming major factors in some areas of the Columbus campus. Wholesale replacement, on the other hand, would afford the opportunity to renew much of our electrical system and place The Ohio State University in a good position to support our educational and research activities over the next twenty or more years.

Replacement

The replacement option is the only feasible alternative for addressing the PCB problem. As indicated earlier, this option is more costly than the retrofit option. However, the safety and environmental advantages of attaining PCB-free campuses coupled with the renewing and upgrading of the electrical distribution system at the Columbus campus far outweigh the cost differential implications.

One significant drawback with the replacement option is that each of the affected facilities must be without electrical power for some period of time while old transformers are being removed and the new ones installed. This period of time could be as short as one to two hours to as long as 48 hours depending upon the complexity of the installation.

In most cases, this outage will have only a minor impact on building operations as it will be scheduled during times of very low occupancy. However, there are some cases (continuous research, hospital occupancy, etc.) where lengthy power interruptions will not be tolerated very well. Significant efforts will be made to minimize the impact of this project on those activities through a program of information dissemination throughout all phases of the work and appropriate scheduling of the construction work based on consultation with each of the groups within the targeted buildings. A portion of the proposed bond proceeds have been earmarked for incidental work such as temporary electrical power units, relocation of functions and so forth.

Replacement units will be entirely free of PCB materials. This action precludes any future need for additional PCB programs should the Federal government decide that lower PCB levels are warranted. The replacement option also allows the design engineers an opportunity to review transformer and distribution cabling sizes so that they can be selected to match the present and future electrical needs more closely.

COMPLIANCE AND ENFORCEMENT

The Ohio State University must complete its PCB work no later than October 1, 1990.

Failure to comply with the Federal Fire Rule Amendment order could result in serious civil and/or criminal penalties. Under Section 16 of the Toxic Substance Control Act (TSCA) penalties for non-compliance with the PCB requirements could result in up to \$25,000 per day for Civil Violations. TSCA also has provisions for imprisonment of up to one year if a Criminal Violation can be proven.

ECONOMIC ANALYSIS

The PCB Elimination and Electrical System Upgrade Project is a \$20.0 million project which covers work at the Columbus and regional campuses. It is proposed that this project be bid as a "turn key" project which would include detailed design engineering, selection of equipment, and new construction.

Generally there is little reduction in operating costs by replacing older electrical equipment with new equipment. Electrical transformation efficiencies will tend to improve somewhat, but the improvement which produces lower operating costs is not expected to be enough to offset the project costs within a reasonable period of time.

All operating units of The Ohio State University including the general fund will experience an

increase in annual expenditures for the debt service of a bond issue in order to comply with the federally mandated PCB regulations and make the proposed upgrades in service.

Financing

As stated earlier, approximately 92% of The Ohio State University's electrical power on the Columbus campus flows through the 138 KV Buckeye Electrical Substation located near Parks Hall or is generated locally in the McCracken Power Plant. The balance of the power is purchased through individual meters at building entrances in much the same way as a homeowner purchases his or her power.

Electrical power which is purchased by The Ohio State University is regulated by Public Utilities Commission of Ohio. In general, it is cheaper for the University to buy electrical power under an approved large user contract through a single point rather than in smaller quantities at multiple points.

As indicated earlier, the aggregate unit cost for electrical power purchased at the Buckeye Substation and distributed over University-owned facilities is 40.35 Mills/KWH. The unit cost for electrical power purchased at the outlying facilities under the "small user" Commercial and Industrial GS-1, GS-2 and GS-3 rates is 55.23 Mills/KWH.

The Ohio State University is proposing to issue fixed rate bonds to fund this project. At the current rate of interest, the annual debt service for a 15 year, 7.1068% average annual interest rate bond would be approximately \$2,467,000.

Under that scenario, fixed rate bonds would be issued with serial maturities of from 1 to 15 years with the average life being approximately 9.1 years. The total amount of the bonds to be issued would be \$22,918,494. Of that amount, \$20,000,000 would be deposited to the construction fund and used to fund the project, \$2,466,798 would be deposited in a Bond Debt Service Reserve Account to insure the annual debt service requirements are met. The remaining \$451,696 represents the estimated associated Discount, Legal and Issuing expenses. Total interest expenses would be \$14,869,526 for a total bond cost of \$35,321,222.

As interest rates fluctuate, the above scenario would be impacted. For example, a 25-50 basis point increase in interest rates would equate to an additional cost of \$1.2 million to \$2.3 million over the life of the bonds.

The Ohio State University is further proposing a program of retiring the bond issue by placing a self-imposed surcharge on the Buckeye Substation unit cost. The surcharge will be phased in over three years. It will effectively represent a 26% increase in the cost of electrical power on the Columbus campus. This increase translates into an equivalent uniform unit cost of 47 to 48 Mills/KWH for electrical power, which is clearly less than the 55.23 Mills/KWH price available to small users.

Although this is a substantial increase, the aggregate (base charge plus surcharge) unit cost is not expected to increase to the point where The Ohio State University would be better served through individual utility company meters located in each facility. On the contrary, the University could continue to enjoy the financial benefits of owning its own power distribution system even with an additional surcharge. An added benefit upon project completion is that a considerable number of transformers (202 out of 270 installations) within the system will be new and more reliable.

A unit cost surcharge based on the electrical usage has been selected for three reasons. First, a consumption-based surcharge more closely resembles a capital recovery fund normally used by regulated utility companies for repairs and improvements. Secondly, the uniform or across-the-board rate would be easy to administer in the University's business operations. The third reason is that the PCB elimination problem is a University-wide problem and, as such, should be treated in that manner.

APPENDIX XXII

THE OHIO STATE UNIVERSITY
ATHLETIC DEPARTMENT

Presented to the Fiscal Affairs Committee and
Adopted by the Board of Trustees February 3, 1989

APPENDIX XXIII

UNIVERSITY'S FINANCIAL REPORT

**Presented to the Fiscal Affairs Committee and
Adopted by the Board of Trustees February 3, 1989
(See page 696)**

INTRODUCTION

Good morning President Jennings, Chairman Kessler, and members of the Finance Committee and Board of Trustees. It is my pleasure to present to you the University's financial report for the fiscal year ended June 30, 1988. It is also a challenge to summarize the financial results of the activity of this complex billion dollar organization in this brief format. Therefore, my comments are limited to the highlights which appear within these financial statements.

OVERVIEW

The 1988 financial statements reflect the results of investing in the future of the University, its faculty, staff and students.

The University's fiscal and human resources were called into action as we completed the Undergraduate Curriculum Review for the Arts and Sciences Colleges, implemented the University-wide Affirmative Action Plan, competed for more research dollars, funded the Early Retirement Incentive Program and weathered the weakened financial market.

While we achieved record growth in private support, minimal increases in State support forced undesirable tuition and fee increases upon our students.

To see the financial impact of these and other factors, we need to review two basic financial statements: The Balance Sheet and the Statement of Changes in Revenues, Expenditures and Fund Equities.

First we will look at a few key highlights of each financial statement. Then we'll look more closely at each fund group on both statements.

The Balance Sheet (page 2 of the Auditor's Report) reflects the financial results of all University activities. On an All-Funds basis:

Assets total \$1.9 billion. This represents a \$94.5 million, 5.3 percent, net increase over 1987. Major components of the increase include a \$119.5 million, 10.9 percent growth in the Investment in Plant, offset by a \$17.6 million, 3.3 percent decline in total Cash and Investments.

Liabilities total \$385.2 million, representing a \$33.2 million, 9.4 percent increase over 1987. The major increase was in Current Funds, where Accounts Payable and Accrued Liabilities increased \$27.2 Million, 23.2 percent.

Equity totals \$1.5 billion, a \$61.3 million, 4.3 percent increase over 1987. The major components of the increase include \$90.6 million in Plant Funds, and \$21.3 million in Endowment and Annuity Funds, offset by a \$52.0 million decrease in Current Funds.

Now, lets review the Statement of Revenues, Expenditures and Changes in

Fund Equities (page 3 of the Auditor's Report). On an All-Funds basis:

Revenues and other additions total \$1.2 billion. This represents an increase of \$17.6 million, or 1.5 percent over 1987.

Expenditures and Other Deductions total \$1.1 billion. This represents a \$41.9 million, or 4.0 percent increase over 1987.

To understand the details behind these revenues and expenditures, and their impact on the bottom-line, it is best to review each fund group separately.

CURRENT FUNDS

For the first time since fiscal year 1982, the cost of current operations exceeded current revenues. The University was forced to rely heavily on existing fund equity to meet current demands, resulting in a \$52.0 million decline in Current Funds Equity. Three major factors contributed to the decrease:

1. The Early Retirement Incentive Programs added \$20.8 million, 2.1 percent, to expenditures. Nearly 1,400 faculty and staff have participated in these programs to date, at a total one-time cost of approximately \$64.2 million. Compared to annual salary costs of \$50.1 million for these retirees, the plans appear to be cost-effective.
2. \$23.5 million allocated for debt service payments was transferred from Current Unrestricted Funds to Plant Funds Debt Service. This reflects an adjustment from prior years.
3. To help offset minimal increases in State support, colleges and administrative support areas were required to enhance resource management of all resources, and make use of contingency funds, for one-time needs.

Now, to review the other sources and uses of Current Funds:

There are three major fund groups within this category: Educational & General, Auxiliary Enterprises, and Hospitals.

Current Funds Revenues and Other Additions total \$989.3 million, an increase of \$51.4 million, 5.5 percent, over 1987. Major increases include:

Educational and General, which total \$705.1 million, an increase of \$48.4 million, 7.4 percent over 1987. This is comprised of:

Tuition, fees and other student charges, increased \$14.8 million, 11.4 percent;

Private support, increased \$14.9 million, 27.3 percent;

Investment income and realized gains, increased \$2.3 million, 10.2 percent.

Auxiliary Enterprises, where Revenues and Other Additions total \$82.2 million, increased \$3.5 million, 4.4 percent over 1987.

Hospitals, where Revenues and Other Additions total \$202.1 million, reflect a \$0.5 million, 0.2 percent decrease from 1987.

Current Funds, Expenditures and Other Deductions total \$979.6 million, an increase of \$62.9 million, 6.9 percent, over 1987. Major increases include:

Separately budgeted research expenditures, total \$120.5 million, increased \$21.3 million, 21.5 percent, resulting from increased competitiveness of faculty in attracting sponsored research support;

Scholarship and fellowship expenditures, total \$30.1 million, increased \$3.6 million, 13.7 percent, reflecting the increased use of financial aid due to the 10.9 percent resident tuition increase necessitated by low State support

Instruction and departmental research, total \$309.3 million, increased \$21.7 million, 7.5 percent;

Academic support totals \$66.6 million, increased \$3.5 million, 5.6 percent.

Auxiliary Enterprises, where Expenditures and Other Deductions total \$73.7 million, increased \$1.3 million, 1.9 percent over 1987.

Hospitals, where Expenditures and Other Deductions total \$198.6 million, and increased \$4.3 million, 2.2 percent.

The final component to impact Current Funds is Transfers. The Mandatory Transfers reflect funds set aside by the University and Auxiliary Enterprises for principal and interest payments on long-term debt.

The Non-mandatory Transfers include various transfers to fund capital improvements (\$17.9 million), as well as the \$23.5 million transfer mentioned earlier, to move funds allocated for debt service out of Current Funds and into debt service reserve accounts. The end result is a \$50.2 million decline in Current Funds Equity.

This concludes the discussion of Current Funds.

LOAN FUNDS

The balance sheet for Loan Funds remained essentially at 1987 levels, and includes \$38.1 million of loans outstanding, supported by \$41.8 million of U.S. government grants. The student loan default rate continues to be well below the national average. This reflects only a small part of the total financial aid provided to our students. During fiscal year 1988, 38,200 students received one or more forms of financial aid from Federal, State, University and local sources. The aid, totalling \$141.8 million includes student loans, grants, scholarships, and on-campus employment.

ENDOWMENT AND ANNUITY FUNDS

The market value of the endowment increased \$6.4 million. Total new additions to Endowments were \$19.4 million. Total return on the endowment was 0.4 percent as compared to -7.0 percent for the S&P 500. Gross Endowment income earned was \$12.6 million as compared to \$9.6 million in 1987.

PLANT FUNDS

Investment in Plant continues to grow. A net \$119.5 million was added to the book value, including: \$50.8 million in buildings; \$40.7 million in moveable equipment and furniture; \$4.6 million in library books; \$3.3 million in land and improvements; \$20.1 million in construction in progress. Plant-related debt of \$10.6 million was retired, leaving a balance of \$181.8 million.

CONCLUSION

Both Moody's and Standard & Poor's have taken the opportunity to review this financial information. To date, our bond ratings remain unchanged (AA-- and A1). We believe this is a recognition by the financial community of the continued overall strength of the University.

In terms of the current fiscal year, the Early Retirement Incentive Program, minimal increases in State support, the commitment to minimize tuition increases, and lean operating budgets for Auxiliary Enterprises and the Hospital continue. The financial results will be similar to this past year as the University continues to utilize Current Funds Equities to bridge the gap between Current Funds Revenues and Expenditures. The opportunity to reverse this trend lies in the passage, by the State, of a 1990-1991 biennial operating budget for higher education that recognizes the current and future cost of a quality education and educational system for Ohio.

APPENDIX XXIV

1988-89 SECOND QUARTER CURRENT
FUNDS BUDGET REPORT

Presented to the Fiscal Affairs Committee and
Adopted by the Board of Trustees February 3, 1989

APPENDIX XXV

**WAIVERS OF COMPETITIVE BIDDING REQUIREMENTS
OCTOBER-DECEMBER 1988**

**Presented to the Fiscal Affairs Committee and
Adopted by the Board of Trustees February 3, 1989
(See page 697)**

Report to the Fiscal Affairs Committee
Waivers of Competitive Bidding Requirements
October-December, 1988

During the period covered, the Vice President for Business and Administration, at the requests of the departments making the purchases and upon the recommendation of the Purchasing Department, granted 30 waivers of competitive bidding requirements. The annual purchases authorized by the waivers total approximately \$841,700.00. The purchases included:

Instructional and Research Equipment	\$258,893	(7 waivers)
Instructional and Research Services	147,700	(8 waivers)
Hospital Equipment and Services	252,600	(6 waivers)
Travel, Accommodations, and Catering	119,988	(6 waivers)
Artists' Services	38,500	(2 waivers)
Research Park Construction Drawings	24,000	(1 waiver)

Commencement Speaker

P. David Myerowitz, M.D.

P. David Myerowitz, an internationally known cardiac surgeon, is the Karl P. Klassen Professor and chief of thoracic and cardiovascular surgery at The Ohio State University. He established the University Hospitals' heart transplant program in 1986 after coming to Ohio State from the University of Wisconsin, where he founded and headed a similar program.

Also an associate professor of surgery and of internal medicine, Myerowitz performed the first heart transplant in central Ohio in July 1986. Since that time, more than three dozen additional patients have undergone heart transplant surgery at Ohio State.

He holds bachelor's and medical degrees from the University of Maryland and a master's degree in surgery from the University of Minnesota. After completing his residency program at Minnesota, he was awarded a two-year fellowship in cardiothoracic surgery at the University of Chicago Hospital. Myerowitz also served in the military for two years as a clinical associate for the United States Public Health Service.

At Ohio State, he is presently chair of the Transplant Patient Selection Committee, as well as a member of the Critical Care Policy and SKYMED Medical Advisory committees. He is on the board of directors of several organizations, including Lifeline of Ohio Organ Procurement and the Heart Transplant Foundation.

More than fifty of his research papers have been published, and he has contributed chapters to numerous text-

books. Myerowitz shared his administrative expertise in the book *Heart Transplantation*, which was published in 1987 and was the first guide to organizing a heart transplant program. He was co-editor of the 1985 book *Surgical Clinics of North America: Latest Advances in Cardiac Surgery*. His work has been presented at conferences, seminars, and symposia across the country and throughout Europe. We are delighted to welcome this distinguished member of the medical community as speaker for the University's 307th commencement.

Recipient of Honors

Andrew W. Marshall Doctor of Science

Andrew W. Marshall has shaped American defense policy for almost forty years. The founder of Net Assessment in the Office of the Secretary of Defense, he and his staff evaluate American military resources in comparison to the capabilities of potential adversaries. He has served as director of Net Assessment for fifteen years.

Marshall received his bachelor's degree from Wayne University and his master's degree from the University of Chicago. He began his career with the RAND Corporation in Santa Monica, California. During his twenty-three years there, he rose to the position of director of strategic studies and laid the intellectual foundation of the United States' strategic policy of deterrence.

In 1972, Henry Kissinger recruited him onto the National Security Council staff, and in 1973, Marshall moved to the Department of Defense to establish the Office of Net Assessment. Since that time, he has served five secretaries of defense, four presidents, and both political parties with non-partisan professionalism.

While the content of much of his work is classified, the quality of his contributions is widely known. The hallmark of Marshall's work has been his insistence in using the widest possible approach to his investigation. He is a vigorous proponent of studying the past to shed light on the future. In the last decade, Marshall has pioneered the application of historical analysis to contemporary defense problems. He also has served as a liaison between academia and the military, as he draws from

academic disciplines and traditions to clarify public policy. His scholarly approach to defense policy—an approach based on evidence and logic instead of politics and ideologies—has provided objectivity in an often emotional arena. The Ohio State University is proud to honor him for his vision, his wisdom, and his decades of accomplishment that will guide our nation for generations to come.

Dr. Marion L. Cremer
- Thomas Leslie Prince**, Dover; B.S.Agr., M.S.; *Horticulture*
Dr. Harry Tayama, Dr. John Grabner
- William Francis Punch III**, Westchester; B.S., M.S.; *Computer and Information Science*
Dr. B. Chandrasekaran
- Yingyong Qi**, Tianjin, P.R.C.; B.S. (University of Science and Technology of China); M.S. (Institute of Acoustics); *Speech and Hearing Science*
Dr. Robert A. Fox
- Brian Walter Randolph**, Greenville; B.S., M.S. (University of Cincinnati); *Civil Engineering*
Dr. Tien Hsing Wu
- Mohammed Saleh Resayes**, Riyadh, Saudi Arabia; Diploma (Art Education Institute); B.A. (Helwan University); M.A.; *Art Education*
Dr. Kenneth Marantz
- John Walter Reveley**, Reynoldsburg; B.S. (Rutgers University); M.S.; *Physiology*
Dr. Jack Boulant
- Mark Alan Rush**, Columbus; B.A., B.Mus., M.Mus.; *Music*
Dr. David Butler
- Chih Hao Shen**, Taiwan, R.O.C.; B.S. (National Cheng Kung University); M.S.; *Metallurgical Engineering*
Dr. Paul Shewmon
- Wunjang K. Shieh**, Taiwan, R.O.C.; B.S.E.E. (Chung-Yuan University); M.S.E.E. (National Taiwan University); *Electrical Engineering*
Dr. Jogikal M. Jagadeesh
- Gideon Ngaka Shongwe**, Swaziland; B.S. (Western Illinois University); M.S. (University of Guelph); *Agronomy*
Dr. Samuel Traina, Dr. Terry Logan
- Gyung-Ho Song**, Seoul, South Korea; B.S. (Seoul National University); M.S.; *Chemical Engineering*
Dr. Liang-Shih Fan
- Sandhya Balakunthala Sridhar**, Bombay, India; B.A., M.A. (The University of Bombay); *Business Administration*
Dr. Janina C. Latack
- Jill Annette Strawbridge**, Los Angeles, CA; B.A. (University of California at Los Angeles); M.A. (California State University); *Industrial and Systems Engineering*
Dr. George Smith
- Carolyn Supplee**, Mantua, NJ; B.A. (Goucher College); M.S.; *Chemistry*
Dr. Andrew Wojcicki, Dr. Devon W. Meek
- James Tazewell Talley**, Columbus; B.M.Ed., M.M. (University of Montevallo); *Music*
Dr. David M. Butler

Michael Clay Tanner, Columbus; B.S.Ed., M.S.; *Computer and Information Science*
Dr. B. Chandrasekaran

Wilson Anthony Taylor, Indiana, PA; B.S. (Indiana University of Pennsylvania); M.S.; *Botany*
Dr. Thomas N. Taylor

Gaochao Tian, Lanzhou, Gansu; B.S. (Lanzhou University); *OSU Biochemistry Program*
Dr. M. D. Tsai

Deborah Ann Todhunter, Ebensburg, PA; B.S., M.S. (Pennsylvania State University); *Dairy Science*
Dr. K. Larry Smith

Linda Vespa, Boardman; B.S. (Grove City College); M.S.; *Microbiology*
Dr. Bruce S. Zwilling

Olegario Guerrero Villoria, Jr., Lipa City, Philippines; B.S. (The University of the Philippines); M.S.; *Civil Engineering*
Dr. Zoltan Nemeth, Dr. Mark McCord

Xiaoming Wan, Wuhan, Hubei, P.R.C.; B.S. (Wuhan University); *Chemistry*
Dr. Laurence J. Berliner

David Alan Wright, Frazeysburg; B.S.; *Health, Physical Education and Recreation*
Dr. William M. Sherman

Simon H. Yen, Taipei, Taiwan, R.O.C.; B.B.A., M.S. (National Cheng-Kung University); M.B.A. (Saint Louis University); M.A.; *Business Administration*
Dr. Rene M. Stulz

Jeffrey Allan Yost, Barberton; B.S.B.A. (Miami University); M.B.A. (University of Akron); *Accounting and Management Information Systems*
Dr. Thomas J. Burns

Master of Applied Statistics

Li-Peng Ho, Taipei, Taiwan, R.O.C.; B.S. (National Chung-Hsing University); *Statistics*

Hweichy Lin, Taipei, Taiwan, R.O.C.; B.Arch. (Tunghai University); *Statistics*

Peter Bradford Shaw, Cincinnati; B.A. (Yale University); M.A. (The University of California at Los Angeles); Ph.D. (The University of California at Davis); *Statistics*

Wen-Dih Yao, Taipei, Taiwan, R.O.C.; B.S. (National Taiwan College of Marine Science and Technology); *Statistics*

Master of Architecture

James Richardson Deane, Killeen, TX; B.S. (The University of Texas at Arlington); *Architecture*

Dimitris A. Farmakis, Thessaloniki, Greece; B.Arch. (Aristotle University of Thessaloniki); *Architecture*

Lora Ellen Sebald, Dayton; B.S.Arch.; *Architecture*

David Allen Youse, Worthington; B.S.Arch.; *Architecture*

Master of Arts

Linda Marie Aldrich, Ypsilanti, MI; B.A. (Hope College); *Psychology*

Spencer A. Alexander, Columbus; B.A. (The College of the City of New York); *English*

Paul William Almonte, Brooklyn, NY; B.A. (Southern University of New York at Binghamton); *English*

Susan Amkraut, Palo Alto, CA; B.A., B.S. (The University of California at Santa Cruz); *Art Education*

Panida Aue-Apaikul, Bangkok, Thailand; B.A.; M.A. (Chulalongkorn University); *Education*

Neil James Bardon, Bexley; B.S.Ed.; *Education*

June Reeder Bargar, Delaware; B.S.Soc. Adm.; *Education*

Suzanne Marie Beaumont, Reading, PA; B.A. (College of William and Mary); *Health, Physical Education and Recreation*

John Michael Beery, Porterville, CA; B.A. (California State University at Sacramento); *Psychology*

Marjorie Bennett, Columbus; B.Mus.Ed., B.Mus.; *Music*

Erick Noble Berquist, Massillon; B.A.; *Public Administration*

Carole Paris Bickel, Blacklick; B.S.Ed.; *Mathematics*

Nancy Andrew Brunner, Columbus; *Business Administration*

Stephen William Busonik, Columbus; B.Mus.; *English*

Joanna Lawyer Cavendish, Columbus; B.A.; *Education*

Holly Vanmeter Chakeres, Sugar Grove; B.S. (Ohio University); *Education*

Wei-Chun Chiu, Taipei, Taiwan, R.O.C.; B.A. (National Taiwan University); *History*

Mary Ellen Clark, Newton Square, PA; B.S. (Pennsylvania State University); *Health, Physical Education and Recreation*

Lynne Michele Cope, Wadsworth; B.A. (Baldwin-Wallace College); *Journalism*

Beth Nelson Crow, Terre Haute, IN; B.A., B.A. (Hanover College); *Communication*

Anita Marie Davena, Waverly; B.A.; *Psychology*

Theresa Marie deGuzman, Potomac, MD; B.A. (The College of Wooster); *Education*

Eileen Patricia Delaney, Columbus; B.S. (State University of New York at Buffalo); *Journalism*

Theresa Marie Desmond, Reno, NV; B.A. (The University of Nevada); *English*

Diana N. Dicks, Grove City; B.A. (The University of Nebraska at Omaha); *Education*

Florence Doman, San-Fernando, Trinidad & Tobago; B.S. (Howard University); *Health, Physical Education and Recreation*

Keith Robert Donnelly, Indianapolis, IN; B.S. (United States Military Academy); *Political Science*

Nancy Geiser Eckert, Bellevue, MI; B.S.Ed.; *Education*

Mary C. Ewing, Ada; B.S.Ed. (Ohio Northern University); *Education*

Leslie Joan Farley Sheets, Gallipolis; B.A.; *Communication*

Patricia Bibko Forward, Columbus; B.A.; *Education*

William Jeffrey Gaetz, Toledo, B.S. (Bowling Green State University); *Journalism*

John Thomas Gardner, University Heights; B.S., M.B.A. (East Carolina University); *Business Administration*

Felicia Marie Gersi, Dublin; B.S. (Miami University); *Journalism*

William Paul Getzey, Jr., Johnstown, PA; B.F.A. (Edinboro University); *Photography and Cinema*

Janet Sue Gibson, Pickerington; B.S. (Miami University); *Education*

Melisa Hill Graham, Zanesville; B.S.Ed.; *Education*

Jose Filipe Garcia Correia Guedes, Lisbon, Portugal; Bachelors; *Economics*

Michael Bryan Guess, Dublin; B.S., D.D.S. (The University of California at San Francisco); M.S.; *Education*

Mahmood Mohammad Hajjat, Columbus; B.A. (Yarmouk University); *Business Administration*

Deborah Anne Hall, Columbus; B.S. (Trenton State College); *Speech and Hearing Science*

Sharon H. Hanover, Columbus; B.S.Ed.; *Psychology*

Jaqueline Mary Hazlett, Columbus; B.S. Al.Hth.Prof.; *Education*

Pamela Sue Heilman, Havre, MT; B.A. (Rocky Mountain College); *Theatre*

- James Robert Herd**, Fairborn; B.S.Ed.; *Education*
- Evelyn Chiyoko Hirata**, Lake Bluff, IL; B.F.A. (Philadelphia College of Art); *Art Education*
- Tan-Hsi Ho**, Taipei, Taiwan, R.O.C.; B.A. (National Chengchi University); *Journalism*
- Steven Robert Houser**, Columbus; B.A.; *English*
- Clark Eric Hultquist**, Columbus; B.A. (University of Cincinnati); *History*
- Allan Eugene Johnson**, San Pedro, CA; B.A., M.S. (California State University at Long Beach); *Education*
- William Allan Jones, Jr.**, Columbus; B.S. (University of North Carolina); M.S. (Montana State University); *History*
- James Richard Karpac**, Columbus; B.A., D.D.S.; *Education*
- Deborah Ann Katz**, Cleveland; B.A. (The University of Pennsylvania); *Health, Physical Education and Recreation*
- Laura Suzanne Keating**, Traverse City, MI; B.A. (Michigan State University); *Philosophy*
- Bradford Lee Kess**, Beachwood; B.S.Food Sc., B.S.Food Tech., D.D.S.; *Education*
- Mark Louis Kilwein**, Pittsburgh, PA; B.S. (The University of Pittsburgh); *Psychology*
- YoungHwan Kim**, Pusan, South Korea; B.A. (Pusan National University); *Education*
- Scott Robert Kirkman**, Columbus; B.A., M.A. (Miami University at Oxford); *History*
- Midori Kitagawa**, Kobe, Hyougo, Japan; B.A. (Women's College of Fine Arts); *Art Education*
- Judith Lee Kitchen**, Columbus; B.Arch, M.Arch. (University of Virginia); *Business Administration*
- Kathryn Alison Kost**, Columbus; B.S. (The University of Wisconsin at Whitewater); *Psychology*
- Linda Catherine Kuhn**, Logan; B.A., B.S.Ed.; *Education*
- Annette Mealy Kuss**, Springfield; B.S.Ed. (Miami University); *Education*
- In-Sub Kwak**, Anyang, Gyeong-Gi, South Korea; B.A. (Pusan National University); *Economics*
- Tracey Weissfeld Lechner**, Cuyahoga Falls; B.S.Ed. (Bowling Green State University); *Speech and Hearing Science*
- Shu-Lan Li**, Nol, Taipei, Taiwan, R.O.C.; B.A. (National Taiwan University); *Journalism*
- Neng-Pai Lin**, Taipei, Taiwan, R.O.C.; B.A. (National Taiwan University); *Business Administration*
- Thomas Hamilton Little**, Claremont, NC; B.A. (The University of North Carolina at Greensboro); *Political Science*
- Willie Ladale Lloyd**, Anniston, AL; B.A. (Alabama State University); *Journalism*
- Kathleen Jonita Lynch**, Columbus; B.S. (Miami University); M.S.W.; *Public Administration*
- Lucy Eleonore Lyons**, San Diego, CA; A.B. (San Diego State); *Political Science*
- Wolfgang Mansky**, Hanover, West Germany; Diploma (Fachhochschule); *Industrial Design*
- Michael Hughes Mathison**, Cincinnati; B.A. (The University of Cincinnati); *Education*
- Jane Ellen Maul**, New Washington; B.M.Ed. (The University of Akron); *Music Education*
- Gary Brian Mayton**, Hudson; B.S.Ed.; *Education*
- Molly Ann McCarrick**, Columbus; B.A. (Capital University); *Education*
- Brenda K. Miller**, Van Wert; B.A.; *Public Administration*
- Mark Carlton Miller**, Marysville; B.A. (Ohio Northern University); J.D. (George Washington University); *Political Science*
- Gayle Maree Millsaps**, Westerville; B.A. (The University of Tennessee); *Mathematics*
- Michael Scott Molasky**, St. Louis, MO; B.A. (Johnston College); *East Asian Languages and Literatures*
- Norman Arthur Mooradin**, Glenboro, CA; B.A. (Pitzer College); *Philosophy*
- Kevin Eugene Mullet**, Berlin; B.S.Ind.Des.; *Industrial Design*
- Alice W. Noll**, Gahanna; B.S.Nurs., M.S.; *Education*
- Jeri Lee Ott**, Coshocton; B.A.; *Health, Physical Education and Recreation*
- Gloria Elsa Pados**, Columbus; B.S.Ed.; *Education*
- Elizabeth Veronica Pastore**, Worthington; B.S. (Mercy College); *Education*
- Susan Sharp Peck**, Worthington; B.S. (Indiana University); *Business Administration*
- Trent Anthony Petrie**, Champaign, IL; B.S.; *Psychology*
- Connie Diane Phillips**, Eaton; B.S.Ed.; *Education*
- Jennifer Kay Pierce**, Franklin, VT; B.F.A. (Johnson State College); *Journalism*
- Denise Diane Porter**, Loudonville; B.S. (Kent State University); *Education*
- Frederick Carl Prohl**, Delaware; B.S. (Purdue University); *Education*
- Ernesto E. Ramos**, Maracaibo, Venezuela; B.Ed.Tesol (Instituto Universitario Pedagógico de Boto); *Education*
- James Arnold Rash**, Zanesfield; B.A. (Bowling Green State University); M.A. (Central Michigan University); *Philosophy*
- Edward Durell Ray**, Columbus; B.A. (The University of Utah); *East Asian Languages and Literatures*
- Gregory Ferral Robinson**, Fairlawn; B.S.; *Psychology*
- Scott William Robinson**, Berlin, CT; B.A. (Eastern Connecticut State College); *Health, Physical Education and Recreation*
- Lisa Ann Scherer**, Snyder, NY; B.S. (State University of New York at Cortland); *Health, Physical Education and Recreation*
- Corinne Kay Severance**, Sterling Heights, MI; B.S. (Michigan State University); *Education*
- Todd David Sevig**, Columbus; B.S. (Iowa State University); *Psychology*
- Nancy Lynn Shapiro**, Columbus; B.S.N. (William Paterson College); *Public Administration*
- Liwei She**, P.R.C.; B.A. (Tianjin Foreign Languages Institute); *East Asian Languages and Literatures*
- Nicasio Silverio**, Madrid, Spain; B.A.; *Romance Languages and Literatures*
- Paul Bradley Slane**, Westerville; B.S.Ed.; *Health, Physical Education and Recreation*
- Richard Charles Spielman**, Massillon; B.S. (Southern Illinois University); *Health, Physical Education and Recreation*
- Richard Peter Squire**, Woking, Surrey, England; B.A. (Leicester University); *Geography*
- Joan Irene Staveley**, Columbus; B.A. (University of California at San Diego); *Art Education*
- In Sook Suh**, Seoul, South Korea; B.A. (Hanyang University); *Photography and Cinema*
- Lynn Ellis Swisher**, Columbus; *Education*
- Tierney Ellen Thomas**, Columbus; B.S.Ed.; *Education*
- Janet Gail Underwood**, Dayton; B.G.S. (The University of Dayton); *Journalism*
- Pei-Ling Wang**, Taiwan, Taiwan, R.O.C.; B.A. (Tamkang University); *Education*
- Brent Alan Watson**, Cambridge; B.S.Nat.Res.; *Public Administration*

Jill Marie Weiler, Columbus; B.A. (Brown University); *Education*

Cassandra Jarvis White, Columbus; B.S.; *Speech and Hearing Science*

Colleen Griffin White, Columbus; B.S. (Wheeling College); *Education*

Nora Elizabeth White, West Jefferson; B.A. (Urbana University); *Education*

David James Willcox, Hamilton; B.S. (The University of Otago); *Health, Physical Education and Recreation*

Susan Jane Williams, Fort Wayne, IN; B.A. (Saint Francis College); *History of Art*

Deborah Hunton Wiseman, Galion; B.S.Ed.; *Education*

Deanne Beth Witiak, Mt. Vernon; B.S.Ed.; *Education*

Chaweewon Wongwarangkul, Bangkok, Thailand; B.A. (Chulalongkorn University); *Education*

Kymme Denice Wright, Columbus; B.S.Ed.; *Education*

Ya-Ting Wu, Taichung, Taiwan, R.O.C.; B.A. (Tunghai University); *Music*

Yao Wu, Taipei, Taiwan, R.O.C.; B.Mus.Ed.; *Music*

Ke Zou, Nanchang, Jiangxi, P.R.C.; B.A. (Jiangxi Normal University); M.A. (Guangzhou Foreign Language Institute); *Linguistics*

Master of City and Regional Planning

Marilyn June Roberson, Massillon; B.A. (Kent State University); M.C.R.P.; *City and Regional Planning*

Xiaofeng Xu, Beijing, P.R.C.; B.A. (People's University of China); *City and Regional Planning*

Master of Fine Arts

Scott Alan Bennett, Columbus; B.S. (West Liberty State College); M.A. (Morehead State University); *Art*

Peter Allen Manning, Columbus; B.F.A. (State University of New York at Buffalo); *Art*

Krista Kay Tucker, Brockport, NY; B.S. (Ball State University); M.A. (Kent State University); *Dance*

Master of Health Administration

Rebecca Lower German, Columbus; B.S.Al.Hth.Prof.; *Hospital and Health Services Administration*

Joyce Marie Rosenberger, Columbus; B.A. (Juniaata College); M.O.T. (Western Michigan University); *Hospital and Health Services Administration*

Master of Labor and Human Resources

Jill Ann Hannah, Columbus; B.S. (Bowling Green State University); *Labor and Human Resources*

Linda Jo Labate-Ackley, Youngstown; B.A.; *Labor and Human Resources*

Milan D. Lint, Dennison; B.S.Bus.Ad.; *Labor and Human Resources*

David Christian Rehkopf, Powell, B.A. (State University of New York at Buffalo); *Labor and Human Resources*

Ora Spann, Rembert, SC; B.S. (Wilberforce University); B.S. (University of Dayton); *Labor and Human Resources*

Master of Landscape Architecture

Kathy Jane Florence, Columbus; B.S. Nursing (Harding College); *Landscape Architecture*

Hiroki Izumi, Akita, Japan; B.A. (Musashino Art University); *Landscape Architecture*

Gregory Robert Krobot, St. Louis, MO; B.S. (University of Missouri at Columbia); *Landscape Architecture*

Huan Rong, Beijing, P.R.C.; B.L.A. (Beijing Forestry University); *Landscape Architecture*

Master of Music

Marjorie Bennett, Columbus; B.Mus.Ed., B.Mus.; *Music*

Master of Science

Jinmy Eduardo Adjunta, Maracaibo, Venezuela; B.S.Mech.Eng. (The University of Missouri at Rolla); *Mechanical Engineering*

Mohamed Tahsin Alchorbaji Mzaik, Syrian Arab Republic; B.S.E.E.; *Electrical Engineering*

Perry David Allen, Marysville, B.S.; *Natural Resources*

Paula S. Allton, Columbus; B.S.Med.Tech.; *Allied Medical Professions*

Marie June Anderson, Wausau, WI; B.S. (The University of Wisconsin at Platteville); *Plant Pathology*

V. Babu, Trichy, Tamilnadu, India; B.E. (The University of Madras); *Mechanical Engineering*

Theresa Lewis Baker, Bethesda, MD; B.S. (The University of Maryland); *Ceramic Engineering*

Ayge Bayazitoglu, Istanbul, Turkey; B.S. (Bogazici University); *Computer and Information Science*

Barbara Deborah Becker, Columbus; B.A., M.S. (State University of New York at Albany); *Computer and Information Science*

Bryan Jerome Bickimer, Mansfield; B.M.E. (Cleveland State University); *Welding Engineering*

Bryan Robert Bonke, El Paso, CO; B.S. (Valparaiso University); *Chemistry*

Gregory Ray Booher, New Concord; A.A.S., B.S.Agr.; *Agricultural Education*

David Stuart Bradin, Willingboro, NJ; B.A. (Wittenberg University); *Chemistry*

Kay Jontz Brown, Carmel, IN; B.S.N. (Indiana University); *Nursing*

Kathleen Ann Bruner, Columbus; B.S.; B.A. (Miami University); *Zoology*

Aaron Lee Bush, Grain Valley, MO; B.S. (Northwest Missouri State University); *Mathematics*

Anne Marie Cagle, Kettering; B.S.C.I.S.; *Electrical Engineering*

Kevin Michael Cawthern, Elysburg, PA; B.S. (Carnegie-Mellon University); *Chemistry*

James Harry Chakeres, Washington Court House; B.S.Agr.; *Animal Science*

Vijay Prem Chandnani, Columbus; B.A. (The University of Chicago); M.D.; *Radiology*

Wen-Wen Chen, Tainan, Taiwan, R.O.C.; B.S. (Tzungshai University); *Pathology*

Gorky Chin, Cleveland Heights; B.S.E.E.; *Electrical Engineering*

David Harold Chinery, Flagtown, NJ; B.S. (Rutgers University); *Horticulture*

Anant Chinnabootr, Bangkok, Thailand; B.S. (The Royal Thai Military Academy); *Geodetic Science and Surveying*

Tahar Chouikh, El-Alia, Tunisia; B.S.M.E.; *Mechanical Engineering*

Scott J. Coe, Worthington; B.S. (Texas A & M University); *Mechanical Engineering*

Brenda L. Coles, Columbus; B.S. (Youngstown State University); *Allied Medical Professions*

Peter Kwame Condobery, Hohoe, Ghana; B.S. (Bombay Veterinary College); *Poultry Science*

- Timothy M. Copelin**, Shawnee, OK; A.B. (Saint Anselm's College); *Zoology*
- Keith Richard Cromack**, Land O' Lakes, FL; B.S. (The University of Florida); *Physics*
- Paul Kevin Cunningham**, Detroit Lakes, MN; B.S. (University of Wisconsin at Stevens Point); *Zoology*
- Carlos Fernando Diaz Suarez**, Colombia; Diploma (Universidad Ind de Santander); *Civil Engineering*
- Jerome William Donovan, Jr.**, Delaware; B.S.Agr.; *Agricultural Education*
- Bertha Ann Ford**, Huntsburg; B.S.Nurs.; *Nursing*
- Thomas Robert Foster**, Westerville; B.S. (The University of Southern California); M.D.; *Radiology*
- Kevin Fairbairn Fowler**, Painesville; B.S.Agr.; *Agricultural Economics and Rural Sociology*
- Roger Allan Fulton**, Strongtown, PA; B.S. (Indiana University of Pennsylvania); *Physics*
- Jeffrey Owen Gerberick**, Cincinnati; B.S.Bus.Adm. B.S.Agr.; *Horticulture*
- Steven Joseph Giust**, Columbus; B.S.; *Mathematics*
- Susan Rebecca Gresham**, Columbus; B.S.N. (Otterbein College); *Nursing*
- James Allen Hall**, Dublin; B.S.C.E.; *Civil Engineering*
- Suzanne Hanes**, Columbus; B.A. (Capital University); *Natural Resources*
- Fugui He**, Chongqing, Sichuan, P.R.C.; B.S. (Sichuan University); M.S. (Chongqing University); *Welding Engineering*
- Craig Francis Hemann**, Brooklyn; B.S. (Case Western Reserve University); *Bio-Medical Engineering*
- Gregory Eugene Hilmas**, Worthington; B.S. (University of Minnesota); *Ceramic Engineering*
- Robert Lee Hoffman**, Bellevue; B.S.Agr.; *Agricultural Education*
- Keethwan Hong**, Taegu, South Korea; B.S. M.S. (Seoul National University); *Geodetic Science and Surveying*
- Yunkui Hou**, P.R.C.; B.S. (Wuhan Technique University); M.S.; *Statistics*
- Goang-Tay Hou**, Huwei, Taiwan, R.O.C.; B.S. (National Taiwan University); *Computer and Information Science*
- Shih-ying Hwang**, Taipei, Taiwan, R.O.C.; B.S. (National Taiwan University); *Agronomy*
- Jeong Sik Hyun**, Seoul, South Korea; B.A. (Hanyang University); *Industrial and Systems Engineering*
- Thomas M. Insalaco**, Oak Ridge, TN; B.A. (State University of New York at Potsdam); *Industrial and Systems Engineering*
- Muhammad Iqbal**, Punjab, Pakistan; B.A. (Punjab University); M.S. (Quaid-I-Azam University); *Agricultural Economics and Rural Sociology*
- Debra K. Bostwick Jackson**, Radnor; B.S.N. (Franklin University); *Nursing*
- Julie Louise Johnson**, Cambridge; *Home Economics*
- Brian Douglas Jones**, Sunbury; B.S.Ch.E.; *Mathematics*
- Akiyoshi Kabe**, Moriyama-ku, Japan; B.S. (The University Tokyo); *Welding Engineering*
- Kathleen Jane Kingma**, Columbus; B.S. (Marietta College); *Geology and Mineralogy*
- Kevin Daniel Klingler**, Kenton; B.S.Nat.Res.; *Natural Resources*
- Sudhakar Kollli**, India; B.M.E. (Andhra University); M.S. (Indian Institute of Technology); *Welding Engineering*
- Timothy John Kropf**, Cincinnati; B.S. (Rose-Hulman Institute of Technology); *Electrical Engineering*
- Dale Alan Krummen**, Pickerington; B.S. (Purdue University); *Electrical Engineering*
- Larry Edward Kunz**, Lebanon, IL; B.A. (McKendree College); *Geodetic Science and Surveying*
- Cori Ann Kurtz**, South Amboy, NJ; B.S.C.E.; *Civil Engineering*
- Colleen Marie Lang**, North Olmsted; B.S.N. (Ohio Wesleyan University); *Nursing*
- Chad Eugene Law**, Huron; B.S.M.E.; *Mechanical Engineering*
- Samuel F. Lebowitz**, Columbus; B.S. (Pennsylvania State University); *Food Science and Nutrition*
- Dong-Eun Lee**, Taegu, South Korea; B.S. (Seoul National University); *Home Economics*
- Susan Kay Lee**, Bloomington, IN; B.S.Nurs.; *Nursing*
- Carolyn Jean Leroux**, Toledo; B.S. (University of Notre Dame); *OSU Biochemistry Program*
- Laura Roxanne Letcher**, Ramsey, NJ; B.S. (The University of Delaware); *Animal Science*
- Xia Li**, Columbus; B.S. (Nankai University); M.S.; *Computer and Information Science*
- Deron Craig Littlejohn**, Troy; B.S.E.E.; *Electrical Engineering*
- Hung Cam Ly**, Columbus; B.S.E.E.; *Electrical Engineering*
- Harry N. Malone**, Hilliards; B.S. (University of Pittsburgh); *Natural Resources*
- David Marshall, Jr.**, Painesville, O.D.; *Physiological Optics*
- Philip Brian McCorkle**, Dublin; B.S.E.E. (University of Dayton); *Bio-Medical Engineering*
- Robert Sherman McIntyre**, Columbus; B.S.Bus.Adm.; *Geodetic Science and Surveying*
- Mark Stephen Merry**, Edinboro, PA; B.S.C.I.S. (Edinboro University); *Computer and Information Science*
- Stephen Gerald Miller**, Centerville; B.S.E.E.; *Electrical Engineering*
- Gareth Allen Moore**, Pembroke, VA, Canada; B.A. (Dartmouth College); D.V.M. (University of Guelph); *Veterinary Physiology and Pharmacology*
- John Barteau Morley**, Milwaukee, WI; B.S. (The University of Wisconsin); *Engineering Mechanics*
- James Charles Mosure**, Canfield; B.S. (University of Cincinnati); M.D. (Northeastern Ohio College of Medicine); *Radiology*
- Kathleen Annette Mullaney**, Edwards, NY; B.S. (Saint Lawrence University); *Geology and Mineralogy*
- Paul Joseph Murphy**, Columbus; B.S. (Fairfield University); *Physics*
- Rajesh Naggal**, Rajasthan, India; B.Tech. (Indian Institute of Technology); *Mechanical Engineering*
- George William Nasinyama**, Busia, Uganda; B.V.M. (Makerere University); *Veterinary Preventive Medicine*
- James Jerome Obloza**, Toledo; B.S. (The University of Toledo); *Mechanical Engineering*
- Jeanne Marie Osborne**, Kettering; B.S.Agr.; *Animal Science*
- Hilmi Bin Othman**, Selangor, Malaysia; B.S. (Ferris State College); *Geodetic Science and Surveying*
- Mohamed Ouslim**, Oran, Algeria; B.S.E.E. (The University of Science Technology at Oran); *Electrical Engineering*
- Kim Allyn Palmer**, Reynoldsburg; B.A. (Michigan State University); *Music*

- Tingfan Pang**, Yili, Xinjiang, P.R.C.; B.S. (Shihezi Agricultural College); *Agricultural Engineering*
- Mary Elizabeth Paranto**, Columbus; B.S. (Villa Maria College); *Pathology*
- Amy Sue Park**, Maple Heights; B.S.; B.S.; *Computer and Information Science*
- *Chulwoo Park**, Seoul, South Korea; Bach.Econ., Master Econ. (Yonsei University); *Statistics*
- John Vann Parker**, Canal Winchester; B.S.; *Anatomy*
- Georgia Maurer Peet**, Westerville; B.S.Ed.; *Environmental Biology*
- Cathy Ann Pickrel**, Centerville; B.A. (Northwestern University); *Preventive Medicine*
- Mary Elizabeth Plummer**, Columbus; B.S. (Wright State University); *Preventive Medicine*
- Carl Frank Popelar**, Worthington; B.S.Met.E.; *Engineering Mechanics*
- Brian Gibson Powers**, Columbus; B.S. (Saint Lawrence University); *Geology and Mineralogy*
- Tanxia Qu**, Wuhan, P.R.C.; B.S. (Peking University); *Nuclear Engineering*
- Carol Lee Rachfal**, Worthington; B.S.Nurs.; *Nursing*
- John Leonard Readey**, Saint Louis, MO; B.S. (The University of Missouri at St. Louis); M.S.; *Computer and Information Science*
- John Ryves Redmond**, Columbus; B.S.C.E.; *Computer and Information Science*
- Kevin M. Rodgers**, Youngstown; B.S. (Case Western Reserve University); *Computer and Information Science*
- Robin Earl Roth**, Columbus; B.S.; *Natural Resources*
- Janet Marie Runner**, Milan; B.S.N. (Bowling Green State University); *Nursing*
- Moeljadi Santoso**, Malang, Indonesia; B.S.M.E.; *Mechanical Engineering*
- Babou Modou Sarr**, Banjul, The Gambia, Gambia; Diploma (National Agricultural Technical College); *Agricultural Economics and Rural Sociology*
- Richard Joseph Scheuerle, Jr.**, Cincinnati; B.S. (University of Notre Dame); *Computer and Information Science*
- Theresa Maria Schwartz**, Columbus; B.S. (The University of Michigan); *Chemistry*
- Joyce Carol Scibilia**, Brunswick; B.S.Nurs.; *Nursing*
- Tracy Lynn Shelley**, Columbus; B.A. (Wittenberg University); *Environmental Biology*
- Rebecca Sue Shie**, Sidney; B.S.Nurs.; *Nursing*
- Parlindungan Simanjuntak**, Indonesia; B.S.C.E. (Institute of Technology); *Civil Engineering*
- Mulya Effendi Siregar**, Jakarta, Indonesia; B. E. (Bogor Agricultural University); *Agricultural Economics and Rural Sociology*
- Roesdiman Soegiarso**, Jakarta, Indonesia; B.S.C.E. (Parahyangan Catholic University); *Civil Engineering*
- Jeanne Marie Soehnlen**, Canton; B.S.Food Sc.; *Food Science and Nutrition*
- Carolyn Marie Sommerich**, Columbus; B.S.M.E. (The University of Cincinnati); *Industrial and Systems Engineering*
- Raman Venkata Srinivasan**, Madras, India; B.Tech. (Indian Institute of Technology); *Mechanical Engineering*
- Catherine Steinger**, Kettering; B.S. (Miami University); *Nursing*
- David John Stucki**, Columbus; B.S. B.S. (Wheaton College); *Computer and Information Science*
- Marianne Sturr**, Dayton; B.S.Al.Hth.Prof.; *Anatomy*
- Emi Elisa Sugimoto**, Lancaster; B.S. (Ohio University); *Microbiology*
- Weiguo Sun**, Chengdu, Sichuan, P.R.C.; B.S. (Nanchong Teacher's College); M.S. (Jilin University); *Chemistry*
- Loretta Jane Sunday**, Reynoldsburg; B.S.Nurs.; *Nursing*
- Jonathan Nelson Tinker**, Alliance; B.S.Agr.; *Agricultural Economics and Rural Sociology*
- Lynda Carol Titterington**, Bedford; B.S.; *Pathology*
- Hong Tsai**, Wuhan, Hubei, P.R.C.; B.S.E.E.; *Electrical Engineering*
- Polly Ann Tsiliacos-Henley**, Columbus; B.S.H.E.; *Home Economics*
- Hsiaohan Tu**, Taiwan, R.O.C.; B.A. (University of Iowa); *Home Economics*
- Janice Lynne Varda**, Dayton; B.S. (Indiana State University); *Nursing*
- Patricia De Arbeloa Villasmil**, Columbus; Medical Surgeon (University of Zulia); *Obstetrics and Gynecology*
- Frederick Werner Vook**, Syracuse, NY; B.S. (Syracuse University); *Electrical Engineering*
- Zhaohui Wang**, Chengdu, Sichuan, P.R.C.; B.Sc. (Peking University); *Physics*
- Vera Fosnot Wehrli**, Columbus; B.S.E.E. (Case Western Reserve University); *Electrical Engineering*
- Juliana Whitmore**, St. Louis, MO; B.A. (Cornell University); *Physics*
- David Andrew Wilkie**, Toronto, Ontario, Canada; D.V.M. (The University of Guelph); *Veterinary Clinical Sciences*
- Stephen William Wonderly**, Columbus; B.S. (Wright State University); *Computer and Information Science*
- Li-Fen Wu**, Taipei, Taiwan, R.O.C.; B.E. (National Taiwan University); *Computer and Information Science*
- Mingming Wu**, Qin Yang, Jing Su, P.R.C.; B.S. (Nanjing University); *Physics*
- Yuping Yang**, Westerville; B.S. (Fudan University); M.S.; *Computer and Information Science*
- Seung Jong Yi**, Seoul, South Korea; B.E. (Hanyang University); M.S. (Oregon State University); *Engineering Mechanics*
- Lawrence Go Yu**, Quezon City, Philippines; B.S.I.E. (The University of the Philippines); *Industrial and Systems Engineering*
- Andrew Charles Zeik**, St. Clairsville; B.S.E.E.; *Electrical Engineering*
- Dewei Zhu**, P.R.C.; B.Sc. (Northeast Institute of Technology); *Metallurgical Engineering*

Certificate of Specialist in Russian Area Studies

Gordon LeCompte Bolmer, Findlay; B.A. (Ohio University); M.A.; *Slavic and East European Studies*

*awarded posthumously

Colleges of the Arts and Sciences

Chairman, Coordinating Council of Deans: Joan Huber

Associate Dean for Undergraduate Studies in Arts and Sciences: Robert M. Arkin

The Colleges of the Arts and Sciences, a federation of five colleges, includes:

College of the Arts
College of Biological Sciences
College of Humanities
College of Mathematical and Physical Sciences
College of Social and Behavioral Sciences

College of the Arts

Dean: Donald Harris

Bachelor of Arts

Janice Marie Adams, Fairborn
Kevin Patrick Boyd, Cincinnati
Pandel Lee Collaros, Steubenville
Marcine Gail Harenberg, Mansfield
Thomas Howard Kenison II, Columbus
Lowell M. Lutman, Reynoldsburg
Sarah Helen Meirson, University Heights
Paul Allen Pepper, Carroll
Carlos Ricardo Rivero, Guadalajara, Mexico
Jerry C. Rockwell, Carle Place, NY
Robin Rose Tettenhorst, Worthington
Deborah Kay Weiss, Salem

Bachelor of Fine Arts

Laura Louise Biddle, Columbus
Maria Teresa Dicitio, Akron
Michelle Althea Duhaney, Reynoldsburg
Cynthia Ann Hassil, Knoxville, TN
Miriam Esther Herzenstein, Cleveland
Rebecca Helene Ley, Cambridge
Randy Scott Mowrer, Wooster
Yun-Dong Nam, Seoul, South Korea
Margaret Jane Senn, Granville
Steven Edward Williams, Wilmington

Bachelor of Music

Christopher Allen Bergsman, Birmingham, MI
Pandora Aey Elmore, Youngstown
Julie Anne Hearson, Cumberland, MD
Theodore L. Potts, Hamilton
Jeanne Staton Snedeker, Columbus

Bachelor of Art Education¹

Melissa Jane Rowlands, Delaware

Bachelor of Art Education²

Beth Ann Antonosanti, Columbus
Deana Michelle England, Columbus
Susan Pauline Genter, Brecksville
Peter John Hering, Burton
Elizabeth Sue Klapholz, University Heights
Jill M. Rable, Lima
Forest Edward Wilson, Jr., Caledonia

Bachelor of Music Education¹

Doris A. Browning Adair, Williamson, WV
Ellen Elizabeth Edgar, Danville
Julie Anne Hearson, Cumberland, MD
Richard Lee Pearson, Foxboro, MA

Bachelor of Science in Industrial Design

Mark Steven Schultz, Parma

College of Biological Sciences

Dean: William A. Jensen

Bachelor of Arts

David Christopher Calco, Olmsted Falls

Bachelor of Science

Jane Ellen Blight, Delaware
Lisa Marie Bohman, Minster
Karen Ann Cook, Berea
Gary William DeVoe, Cincinnati
Phillip Dale Farnlacher, Johnstown
Elizabeth Anne Firchau, Newark
Grant Lafayette Franklin, Jr., Cleveland Heights
Janet Ann Gianelos, Lyndhurst
Ann Catherine Grimm, Columbus
Donald Lee Hagemaster, Jr., Homewood, IL
Bonita Matthews Hamilton, Columbus
Donna Paige Harrison, Columbus
Melissa Lynn Heath, St. Clairsville
Kenneth James Helal, Ashland
Lisa Ann Joseph, Zanesville
Jerry Floyd Kidwell, Columbus
Alan Steven Levy, Tarzana, CA
Daniel Patrick Lorch, Seven Hills
Troy William McKelvey, Edgerton

¹Offered by the College of the Arts

²Offered by the College of the Arts and the College of Education

Howard Steven Nathan, Beachwood
James Rains Nusken, Columbus
Laura Lee Paul, Mansfield
Amy Jo Peters, Circleville
Jennifer Anne Schweitzer, Defiance
Kirk Alan Staschke, New London
Catherine Ambler Ticer, Beaver Creek
Paula Lea Willett, Columbus

College of Humanities

Dean: G. Micheal Riley

Bachelor of Arts

Alyson Kay Beem, Pataskala
Shane Patrick Carter, Sullivan
Michelle Ann Colter, Columbus
Walter Michael Duzzny, Youngstown
Dana Ann Elliott, Worthington
Donald Robert Emmerling, Westerville
Patrick William Foley, Sagamore Hills
Holly Anne Foster, Troy
Karen Lynn Frank, Columbus
Mary Louise Gallagher, Columbus
David Everett Gilmore, Wapakoneta
Peggy Bedell Halley, Grove City
Jane Irene Henry, Columbus
Nancy Lee Jansen, Columbus
Melinda Jill Johnson, Gahanna
Curtis Lee Kovach, Seven Hills
Carol Alexis Krentzman, Columbus
Cynthia M. Kristof, Marion
Diana Lynn Krupp, Columbus
Kimberly Dawn Landis, Columbus
Maria Diane Magisano, Canton
Dale Dwayne Masten, Vermilion
William Joseph McGinnis, Columbus
Rita Kay Price, Columbus
Sophia Stacy Psychogios, Upper Arlington
Scott Lee Rawdon, Granville
Catherine Elizabeth Renspie, Columbus
Bonnie Jean Reyher, Strafford, PA
Mark Richard Ronckovsky, Gahanna
Charles Glen Ross, Columbus
Christopher Thomas Ryan, Dublin
Joel Sams, Columbus
Susan Messenger Tabacca, Hilliard
Jon Derek Taylor, Lisbon
Terese Marie Tiburzio, Columbus
Mark Lawrence Tucker, Columbus
Michael F. Tussey, Columbus
Edward Walter Twynham, Port Clinton
Neal Bradley Vickers, Dresden
Peter John Vogel, Columbus
Renee Sherri Wilson, Warren
Gregory Allen Young, Hilliard
Donna Jean Zaczini, Bellaire

College of Mathematical and Physical Sciences

Dean: C. William Kern

Bachelor of Arts

Tahira Aquila Abdul-Malik, Washington, DC
Karen C. Carandang, Elyria
Russell Shetler Fillmore, Cuyahoga Falls
David Robert Pope, Longmeadow, MA
Daniel Michael Schauer, Euclid

Bachelor of Science

Michelle Ann Adams, Kettering
Todd James Aebie, Port Clinton
Meir Avitan, Columbus
Roger Franklin Barribeau, Dayton
Cecelia Marie Bishel, Columbus
Stephen Joseph Champa, Worthington
George Robert Chatfield, Grove City
Zino Chendra, Jakarta, Indonesia
Mike Anthony Cnider, Mansfield
Adre L. Danish, Fairborn
Christos Gegas, Columbus
Kelly Lynn Gordon, Orient
Richard Fenn Graham, Kent
Colleen Dawn Hall, Loveland
Jonathan Glen Hardbarger, Columbus
Brian Frank Hayes, Akron
Michael James Kirschenbaum, Marysville
Kyle Bryan Klingler, Kenton
Demetrius Xenophontos Koulas, Larnaca, Cyprus
Daniel Ray Lane, Marietta
Joseph Louis Layko, Raleigh, NC
Douglas Eugene Lyle, Columbus
Pamela Marie McDowell, Spottsville, KY
Alice Laurene Payne, Willoughby
Michael Ray Phelps, Troy
Willis Martin Ray III, Springfield
Brian David Rehard, Perrysburg
David Michael Roush, Gahanna
Nancy M. Smathers, Kittanning, PA
Douglas Brent Swayne, Westerville

College of Social and Behavioral Sciences

Dean: Joan Huber

Bachelor of Arts

Michelle Marie Abbott, Cuyahoga Falls
Timothy Robert Adams, Lucas
Dara Lynn Albanese, Shadyside
Mark Douglas Albright, Bucyrus
Terry Derrell Anderson, Whitehall
Colleen Caldwell Atkinson, Sandusky
M. Stephanie Auer, Bay Village
Steven Lee August, Cleveland

John Patrick Bailey, Medina
Bruno Baldo, Westerville
Debra Kaye Barnes, Lima
Rebecca Sue Barr, Worthington
Alvaro Gonzalo Barriga, Columbus
Victor Anthony Bartel, Jr., Columbus
Michael Charles Beebe, Plymouth
Deborah Ann Belskie, Worthington
Bernard Allen Benecke, Columbus
Leif Phillip Bickel, Columbus
Darrell Lawrence Browning, Cincinnati
Kim Eileen Bulinski, Broadview Heights
Jennifer Lynn Burnham, Berlin Heights
Beverly Ann Caley, Ashland
Carl Russell Canestraro, Urbana
Julie Ann Cawley, Urbana
Anna Marie Chase, Atlanta, GA
Tamala Roxanne Clark, Toledo
Charles Francis Coen, Annandale, VA
Lynda Michelle Cohen, Cincinnati
Rhonda Ranae Cole, Springfield
Carolyn Anne Conlon, Columbus
Darrell Paul Cousino, Sylvania
Richard Douglas Cummings, Carrollton
Gregory Keith DeLong, Toledo
Jonathan Andrew Deshler, Columbus
James Alan Deskins, Westerville
Robert Frederick Deuber, Barberton
Susan Mary Dieckman, Hayward, WI
Michael Duane Dillon, Cincinnati
David Edgar Dixon, Mt. Dora, FL
Karmon Michelle Elliott, Marion
Leonard Stanley Erskine, Jr., Columbus
Newman John Evans, Tipp City
Scott Douglas Fehr, St. Clairsville
Kyra Marie Fleming, Youngstown
Daniel Edward Ford, Chillicothe
Suzanne Marie Francati, Bay Village
Ronald Anthony Fresco, Columbus
Michela Diane Gray, Beavercreek
Kathleen Lynn Greene, Westerville
Maria Angela Griffith, Lima
Melissa June Gutridge, Newark
Jennifer Ruth Haenicke, Kalamazoo, MI
John Benton Hall, Columbus
Nathan Kurt Hall, Newcomerstown
Linda L. Harrison, London
Lorri Ruth Haskell, Auburn, ME
Todd Ellis Hassinger, Ashland
James Andrew Hillmuth, Vermilion
Jon Christopher Hockman, Upper Arlington
Margaret Katherine Holtslander, Sidney
Steven M. Hostetter, Hamburg, NY
Scott Edward Hoy, Grove City
Scott Ann Jacobs, Columbus
Cynthia Ann Jeffrey, Chesterland
Mark James Jeffreys, Gahanna
Lars Christopher Johnson, Worthington
Tracey Anne Judy, Dover
Rhonda Sue Kamins, Pepper Pike
Michael Aaron Kane, Shaker Heights
Douglas John Kay, Erie, PA
Catherine Jean Kessler, Galloway
Michael Sotire Kidididis, Columbus
Soonhyung Kim, Columbus
Steven Ross Klein, Cleveland Heights
Lawrence Alan Kohn, Beachwood
Kimberly Sue Kolacz, Newton Falls
Christopher Kotting, Chagrin Falls
Robert Swarup Kunchal, Aurora
Maureen Ann Lach, New Castle, PA
Michael James Lane, Kirtland
David Leslie LaRosa, Columbus
Ann Ridgway Ledman, Lancaster
Gui-Ah Jennie Lee, Worthington
John Curtis LeVally, Grove City
Florence Elisabeth Lewis, Columbus
Patrick Lachlan Livingston, West Palm Beach, FL
Richard David Lloyd, Columbus
Deborah Joy Loveman, Cleveland
Roger Mason, Columbus
Richard Jeffrey Mathews, Medina
David Wayne McCoy, Columbus
Michael Jay McCreight, Westerville
Julie Ann McQuaide, Worthington
Jeffrey Lynn Mengerink, Napoleon
Nancy Ann Messaros, Elyria
Liz Fazela Mohammed, Columbus
Jennifer Ann Moody, Centerville
April L. Morris, Columbus
Andrea Jeanne Mustard, Columbus
Nan April Navarro, Worthington
Elizabeth J. Norris, Massillon
Patricia Anne O'Carroll, Columbus
Tom Robert Palsgrove, Canal Winchester
James J. Pardi II, Columbus
Daniel Allen Peare, Springfield
Ted Carlton Phillips, Columbus
Jahnee Ranie Prince, Centerville
Mia Angela Prince, Columbus
Lisa Ann Purvis, Hamilton
Nicole Rencher, Groveport
Matthew Charles Roberts, Columbus
Cynthia Ann Rundag, Columbus
Dianna Lynn Russell, Columbus
Michael Roger Serra, Chardon
Charles Cyril Shuey, Massillon
Andrew Keith Smith, Norwalk
Steven Scott Smith, Mansfield
Thomas Turner Smith, Columbus
John Michael Snider, Lima
Tara Lynn Steepleton, Alliance
Kimberly Marie Stetz, Medina
Fred W. Strahorn, Cincinnati
John Stringer, Lakewood
Diane Marie Sullivan, Hicksville, NY
Holly Chrysal Sutro, Upper Arlington
Kathy Loren Tarrier, Columbus
Timothy Newton Taylor, Columbus
Jacqueline Tonie Tregellis, Portsmouth, England
Amy Elizabeth Triska, Cleveland
Steven Allen Upp, Swanton
Vincent Lucas Vaccaro, Worthington
Neal Bradley Vickers, Dresden
Kimberly Anne Villacres, Allentown, PA
Elizabeth Ann Voisard, Columbus
Suzanne Wagner, Adamsville
Vera Clarice Walker, Columbus
Hilary Beth Wallach, Columbus
Richard Alan Williams, Lima
G. Eric Woodland, Columbus
Richard Harris Wurst, Morristown, NJ
Cynthia Ann Zeck, Columbus
Mark Daniel Zura, Fremont

Bachelor of Science

Angela Kay Chesbrough, Columbus
James Clinton Copeland, Jr., Ashland
Ellen Phillips Cullman, Mansfield
Magda Farid Mansour, Columbus
Douglas D. Meyer, Columbus
Wayne Alan Nicol, Homeworth
Michael Douglas Parr, Springfield
Amy Jo Phillips, Lancaster
David William Pond, Dublin
Lee Anthony Regensburger, Milford
Michael Roger Serra, Chardon
Curt Bernard Shaffner, West Chester
Laura M. Wiese, Columbus

School of Journalism

Bachelor of Arts in Journalism

Dara Lynn Albanese, Shadyside
Jodie Lynn Arnett, Monroe
Darrell Lawrence Browning, Cincinnati
Katherine Ann Burnes, Columbus
John Frederick Canaday, Columbus
Anthony Donald Cancelliere, Brecksville
Carol Lynn Crutchfield, Centerville

Jennifer Wagner York, Centerville

College of Agriculture

Dean: Frederick E. Hutchinson

Bachelor of Science in Agriculture

Simon Aivodji, Niamey, Republic of
Niger
Linda Marie Barger, Springfield
Steven Allen Bauer, Willard
Bruce Leland Brainard, Medina
Jeffrey Nick Brookhart, Tipp City
Benjamin Marvin Carpenter, Glenford
Matthew James Cessa, Cynnet
James Allen Chambers, Mansfield
Ann M. Champney, Columbus
Ann Marie Chanon, Maple Heights
G. Joseph Colucci, Ashtabula
Christopher John Corcoran, Chillicothe
Joseph Lee Daubenmier, Mt. Vernon
Michael Richard Daye, Wooster
Daniel Alan Dickerhoof, Paris
David Norbert Duling, Toledo
Tony Barton Dyer, Harrod
Donald Allen Evers, St. Henry
Amy Lynn Fehrman, Dayton
Jeffrey Alan Flenniken, Alliance
Bryan Jeffrey Frisch, Avon Lake
Brian Wayne Garrett, Winchester
Michael Andrew Geiger, Creston
Karen Lea Goltz, Hilliard
Elaine Mary Grassbaugh, London
Don David Hedges, Radnor
Monty Dale Heiby, Celina
Gregory Scott Heisler, Norwalk
Matthew Todd Hoffman, Richwood
Robert P. Huerkamp, Cincinnati
Steven Wade Huffman, Columbus
William Keith Humbert, Jr., Fayette
Cheryl Lynn Hutchins, Canal Winchester
Christopher Eugene Keller, Somerville
David J. Koch, Columbus Grove
Jeffrey Todd Leeman, Brewster
Michael Wayne Lehman, Grover Hill
James Hans Lenzer, Jr., Grafton
Souley Mahamadou, Niamey, Republic of
Niger
Mary Elizabeth Mahne, Columbus
Craig Matthew Marshall, Columbus
Anthony Joseph Martin, Columbus
Michael Joseph McBride, Zanesville

Jamie Delores McKenzie, Wheelersburg
James Ernest McLaughlin, Mt. Vernon
Vincent Edward Metzcar, Greenville
Mary Victoria Millhon, Westerville
William Harold Moellenkamp,
Wapakoneta
Richard Martin Morgan, Waynesville
David James Pease, Maumee
Holly Ann Perkins, Columbus
Richard Martin Petersen, Oak Harbor
Frank W. Pharazyn, Jr., Plain City
Laura Marie Pisciotta, Columbus
Cynthia Ann Pomeroy, Columbus
Susan Michele Potts, Sunbury
Kristina Marie Richards, Gahanna
Lynn M. Riepenhoff, Lima
Amy Jo Roberts, Malta
Timothy Alan Sarko, Cleveland
Mark Aaron Sayers, Grafton

Michael Carl Schneider, Chagrin Falls
Mary Elizabeth Smolko-Will, Zanesville
Sherril Ellen Speziale, Columbus
Ronald Russell Strader, Springfield
Steven Joseph Torma, Richfield
Edward Joseph Tuhela, Solon
William Richard VanNostran, Columbus
Michele Renee Vogt, Hamilton
Sandra Ann Wallace, Burgoon
Alex M. Woods, Whitehouse

Bachelor of Science in Food Science

Patricia A. Zullo, North Olmsted

School of Natural Resources

Bachelor of Science in Natural Resources

Jennifer Lynn Cofer, Monclova
Jay Michael DeLong, Liverpool, England
Craig Charles Falkner, Canton
Wendy C. Ostlund, Pittsburgh, PA
Susan Paige Rouse, Fort Walton
Beach, FL
Kristie Marie Simpson, Springfield
Stephanie Elaine Wilburn, Ashville
Gregory Franklin Yates, Columbus

Agricultural Technical Institute – Wooster

Associate in Applied Science

Michael John Babet, Avon Lake
Scott Alan Beck, Perrysville
Thomas Ronald Bender, Loudonville
Karianne Marie Cermak, Dillionville
Ronald Joseph Dues, St. Henry
Evelyn Ruth Eisenbraun, Struthers
Bradley David Frantz, New Holland
Brett Joseph Gough, Barberton

Lydia Greer Harlamert, Wooster
Melissa Sue Horman, Milan
Jeffrey William Hornsby, Cincinnati
Gregory Martin Kehres, New Washington
Jeffrey Alan Lefever, Polk
Michael Patrick Maloney, Wickliffe
Jacqueline Gail Painter, Charleston, WV
Jamey Edward Rauch, Little Hocking
Dick Christian Reichenbach, Wooster
Lynn Marie Robinette, Wooster
Anthony Robert Stopar, Akron
Leann M. Tussing, Findlay
Joseph Patrick Zusack, St. Clairsville

College of Business

Dean: H. Justin Davidson

Bachelor of Science in Business Administration

Robert A. Ackerman, Worthington
Daniel Paul Ackert, Westerville
Raymond Francis Albertini, Olmsted Township
Debra Jean Allen, Garrison, KY
James Douglas Allen, Worthington
Michael Lee Andrews, Springfield
Tomoyuki Arai, Fairfax, VA

Bachelor of Art Education and Bachelor of Music Education degrees are offered jointly by the College of the Arts and the College of Education. Candidates are listed under the College of the Arts.

College of Engineering

Dean: Donald D. Glowler

Bachelor of Science in Aeronautical and Astronautical Engineering

Ronald John Bayless, Fremont
Gregg Kelly Fenton, Columbus
Dewayne Charles Kendall, Dayton
Robyn Lynn Reuss, Ashland
Lawrence Christopher Rogers, Fairborn
Kevin Allen Stockard, Toledo

Bachelor of Science in Agricultural Engineering

Nancy Lee Anderson, Lakewood
Troy Lee Brunn, Springfield
Eric Willson Clausen, Wauseon
Karen Martha Grenus, Fairlawn

Bachelor of Science in Aviation

Barry Alan Gloth, Erie, PA
Daniel Martin Johnson, Fostoria
Michael James Rosing, Ingleside, IL
Dana Jean Sessanna, Parma Heights
Andrew Edward Shillington, Columbus
Kenneth Randall Souder, Columbus
Greg W. Thorne, Mentor

Bachelor of Science in Ceramic Engineering

William Eldon Endres, Centerville
Marla Jane Gilkison, Columbus
Joel Coburn Preston, Radnor

Bachelor of Science in Chemical Engineering

David John Bartolec, West Lafayette
Stuart Franklin Doty, Findlay
Mario Anthony Formica, Cleveland
Dimitrios Slioupkidis, Thessaloniki, Greece
Michele Rae Young, Westerville

Bachelor of Science in Civil Engineering

Joseph Anthony Arezone, Cleveland
Michael William Bender, Rochester, NY
Steve Robert Burger, Willoughby Hills
Virginia Lee Clarke, Avon Lake
Fawaz Hamoui, Damascus, Syria

Graduates with Honors

Criteria for graduating with honors are as follows:

Summa Cum Laude designates those graduating in the top 3% of the class.

Cum Laude designates those graduating in the top 10% of the class.

With Distinction requires successful completion of a Senior Honors Thesis, oral examination, and graduation in the top 25% of the class.

With Honors in the Liberal Arts requires successful completion of the Arts and Sciences Honors Contract and graduation in the top 25% of the class.

With University Honors designates those graduating with circricular distinction and dedication to high educational goals.

Summa Cum Laude with Honors in the Liberal Arts and with Distinction in Molecular Genetics

Janet Ann Gianelos

Summa Cum Laude with Distinction in Biology

Kenneth James Helal

Summa Cum Laude with Honors in the Liberal Arts

Lisa Marie Bohman
 Curtis Lee Kovach
 Maria Diane Magisano
 Howard Steven Nathan
 Terese Marie Tiburzio
 Jacqueline Tonie Tregellis

THE OHIO STATE UNIVERSITY
OFFICIAL PROCEEDINGS OF THE
ONE THOUSAND TWO HUNDRED AND FORTY-NINTH MEETING
OF THE BOARD OF TRUSTEES

Columbus, Ohio, April 7, 1989

The Board of Trustees met at its regular monthly meeting on Friday, April 7, 1989, at The Ohio State University Fawcett Center for Tomorrow, Columbus, Ohio, pursuant to adjournment.

..

Minutes of the last meeting were approved.

..

April 7, 1989 meeting, Board of Trustees

The Chairman, Mr. Immke, called the meeting of the Board of Trustees to order on April 7, 1989, at 1:30 p.m. He requested the Secretary to call the roll.

Present: Leonard J. Immke, Chairman, John W. Berry, Shirley D. Bowser, Hamilton J. Teaford, Deborah E. Casto, John W. Kessler, Milton A. Wolf, Sophia L. Paige, and Laurel A. Davis.

--0--

Mr. Immke announced the appointment of the following persons to the Nominating Committee:

Shirley D. Bowser, Chairperson
Hamilton J. Teaford
John J. Barone

--0--

President Jennings:

I would like to note a couple of personnel matters. As you probably have seen, Jack Hollander, the Vice President for Research and Graduate Studies, has announced his retirement, Jack Hollander, effective at the end of August. We will be reviewing that position and starting a search committee shortly. Jack has been of great service to the institution and we will be sorry to see him go. But he is age 62, and has been expecting to retire at this stage for quite some time.

I would also like to introduce to you the new Director of the University Hospitals, who is with us this afternoon, Reed Fraley. He comes to us by way of Dallas, but is an Ohio State alumni and used to work in our Hospitals. Reed, thank you for coming and we appreciate your being here.

--0--

PERSPECTIVE ON LAND-GRANT UNIVERSITIES IN THE 1990'S AND BEYOND

President Jennings:

We talked about demographics last time, and I thought it perhaps important that we also chat about what the land-grant mission of the University means. I sent you just a rough draft of a paper I've done on the perspective of the land-grant with a little historical outline on it. I don't want to make this a long conversation but just highlight a few points.

I think the important issues here are that it was the land-grant act which established the fact that government has a responsibility for education. That was a radical idea. It started really with the Northwest Ordinance then got dropped for a while. This ordinance was the first document to assign to government the responsibility for education and particularly higher education. This was basically in recognition that education is what economists call a public good with externalities. That is to say that we, as members of society, benefit from other youngsters and other people receiving an education. We benefit economically but we also benefit in a context that we live in a democracy and a fundamental ingredient of a democratic society is an educated and informed voting populace. Thomas Jefferson started the University of Virginia. Now, Jefferson's definition of people is a little different than what we would have today, but nevertheless that thought got started and incorporated into

**PERSPECTIVE ON LAND-GRANT UNIVERSITIES IN THE 1990'S
AND BEYOND (contd)**

President Jennings: (contd)

the land-grant. And, I note, that that was not really an idea that was without controversy. We think of it today as something normal and ordinary -- government taking responsibility, but we should note that the land-grant act was originally put forth in the 1850's and originally vetoed by President Buchanan. Public education had been incorporated into the Northwest Ordinance but had floundered a great deal after that.

The second thing that came with the land-grant was this idea that education should be for the masses, independent of one's social standing and one's financial standing. That it was not just for the elite, but it was for everybody. And again, this was not a model that was accepted in the United States nor in Europe, and to some extent not accepted today. Some of our problems are dealing with a portion of the community who would claim that we don't have a responsibility for certain elements of society. But more on that later.

Evolving out of that came this notion that you should make higher education financially available in three ways. One with low tuition; one with some sort of financial aid; and a third-leg of this accessibility stool being work opportunities. That developed in the late 19th Century and is still true today. It is very interesting also, that even today the most expensive institutions will have some sort of financial aid so that they can make the claim that their institution is affordable by anybody qualified. Even the most expensive institutions today make that claim. I would challenge those statements, but there is an awful lot of financial aid in institutions now that are either private or very high priced.

The third concept that the land-grant introduced was what I and a lot of people would call "local control." Again, a fairly radical notion by world standards. Most of the major universities of the world are national universities with a mission designed to deal with national issues. Whereas in the United States we have no national universities. We have some who will address national issues and Ohio State will address nation/international issues, but the control and the mission is local. In our case, our responsibility is to the State of Ohio. And insofar as that has effects on the nation or the rest of the world, that is a byproduct of our responsibility, but our responsibility nevertheless is to the State of Ohio.

The fourth concept that the land-grant introduced was this mixing of professional and liberal education. Most of the conflicts that you see in a university, most of the tensions you see, most of the problem areas you see, most of the budget issues are this inevitable trade-off between professional training and liberal education. We consistently have that, but that is a very new notion to the world of higher education. Professional education historically was an apprenticeship system that wasn't necessarily involved with a college education. Indeed, most of your early attorneys, early physicians were not college educated people. They were people who were apprenticed to another professional. Indeed, a lot of the teaching techniques you see going on today in the professional schools, particularly at the graduate-level, deal with that apprentice point of view. Sophia is going through some of that right now in the College of Medicine, where she is really not going to class, but is making rounds with a group of doctors. This is very similar to the old fashioned apprenticeship system. We, for the first time in the land-grant, mixed those two issues.

**PERSPECTIVE ON LAND-GRANT UNIVERSITIES IN THE 1990'S
AND BEYOND (contd)**

President Jennings: (contd)

Another aspect that got slowly introduced was the issue of basic research in science and technology. In a free enterprise market economy, particularly, the private sector could not accept the risks involved in delving into some basic research activities where the chances of it being profitable are very, very slim, or if they are profitable, the profitability is very, very long-term. It became ever more clear as society evolved that that basic research should go on in universities so that the individual and the institution could take those risks without affecting society. And of course, in the land-grant that research originally took the form of agricultural research, because agriculture was 80% of our economy at that time. But that, of course, is now expanded out way beyond agriculture in recognition that basic research becomes part of the institution. As that evolved, it became also a tenet that it was not only the risk taking, but research was a necessary ingredient not only to provide the economy with research results, but to stimulate the improvement of teaching. The teaching and research became an integrated and integral set of activities. Good classroom teaching required individuals who were up to date on their field, who were excited about their field, and who were looking at the very frontiers of a particular subject matter that they were teaching. In other words, teaching and research were recognized, were synergistic and accomplished the same thing.

One of the amusing things, although not quite so amusing, is to look at Ohio State's Board Minutes in the '30's -- when we think we have budget problems today, our budget issues are minor. One of the great debates then was that we really ought to get rid of agricultural research, because look at all of the money we are spending and we really don't need any more. After all, it did appear that agricultural advances of the early 20th Century were so great that little was left to do! But, of course, basic research was going on and a great deal more has happened in that. Field after field can be described in that way.

Associated with this came this service-mission that we recognize today and recognize in virtually every industry, where one of our missions becomes that of taking our research results to the public, to the community-at-large and implementing those research results so that the public benefits directly from the research activity we are doing. Again, that got started with the agriculture community and cooperative extension, but today it has spread to virtually every activity we do. I might add though, I think it is fair to say that still the most successful service element of the institution, of any institution, is the agricultural activity. We are doing a better and better job in business and government and so forth, but still today that service is an important element.

Now these concepts have evolved into a system of higher education that has some great similarities from state to state. There are different governing bodies in every state. And there is anywhere from a governing body in higher education covering all the institutions in the state, to individual independent institutions. But what has developed in our country now is that virtually every state has three levels of higher education, the community colleges, the four-year institutions, and the comprehensive research institutions. And while there are differences across states, that general breakdown is pretty clear, and pretty well developed right now. Community colleges are strictly local, I mean local to the city or county. It is two-years, it is has the dual mission of technical education for a particular occupation or the first two-years of liberal education that would transfer to a baccalaureate degree.

**PERSPECTIVE ON LAND-GRANT UNIVERSITIES IN THE 1990'S
AND BEYOND (contd)**

President Jennings: (contd)

The four-year institutions take the form of a baccalaureate program with virtually no graduate activity and virtually no professional activity. And then the comprehensive institution is the institution with undergraduate, graduate, and all professional activity.

In our Ohio system those three categories are there, but they are a little more blurred, particularly between the four-year and the comprehensive. The community colleges are a little bit blurred as well, because the technical schools are often separate institutions from the liberal arts institutions. They are blurred between the four-year and the research, because many of the four-years have graduate programs and professional programs. It is also blurred because this State has only one comprehensive institution, where as most other states have two or several -- Michigan and Michigan State; Texas and Texas A & M; Georgia and Georgia Tech; Cal-Burkeley, Cal-Davis, and Cal-UCLA; Washington and Washington State; and so forth. Whereas we have only one. In most states that dual flagship of comprehensive institutions -- one is the land-grant which is primarily agriculture, engineering; whereas the other traditional liberal arts is the heavy in liberal arts, medicine, and usually law. Business flops back and forth between the two. That, incidentally, is why Ohio State is the biggest institution in the country, not because our departments are particularly large, most of departments are small by big institution standards. The reason we are big is that virtually everything is here at Ohio State University. All of these activities are separate in most other states. Minnesota, of course, is the other big institution, but it is also the other large state that sums up their entire flagship activity into one institution.

Finally, the debate we are going through on the budget in this State is fairly typical of all states. This state historically has chosen to be a high tuition state. Our tuition at Ohio State is moderate by Big Ten standards, but the state is a high tuition state and has been historically. We are today, for example, 41st in the nation per capita support for higher education. We are 7th in the nation in terms of tuition on average at the institution, and relied mostly on financial aid, but also relied on a low college going rate. We have also been in the 40's and 30's in the terms of the percentage of high school graduates going on to college. I think the conventional wisdom is that the reason is is that there have been so many job opportunities in the heavy industry that are high paying and offer career opportunities, 30 or 40 years with the auto industry, or 30 or 40 years with the steel industry. That probably isn't the case today. Of course we see, as we saw last time, our college going rate increasing. We need not shut that off with high tuition as has been the case in relative times gone by. That is of course the debate that we are trying to get the General Assembly to recognize.

(See Appendix XXVIII for complete text on "Perspective on Land-Grant Universities," March 31, 1989, page 913.)

--0--

HOSPITALS BOARD COMMITTEE REPORT

Mr. Teaford:

The Hospitals Board and two of its standing committees met on March 16. We got our usual fine report on the medical staff activities from Dr. Clausen, Chief of Staff. Mr. Holder, who is an attorney on Dr. Tzagournis's staff, informed us that the Hospitals experienced a remarkable year with regard to malpractice claims. Indeed, the Hospitals paid only \$36,000.00 in malpractice claims for the entire year. While I would like to claim that that is because they had outstanding lawyers, I would suggest to you that is not the reason. The reason is because they had outstanding and careful doctors and staff. Indeed, there was no basis for malpractice claims.

We received a report on quality assurance activities from the Department of Anesthesiology which then resulted in a very lengthy debate on who controls operating room temperatures. I think, as we expected, surgeons do by the way. During the course of that report, Mr. Lazarus raised a broader issue of a sort of hospitals standard way to handle problems. Mr. Fraley should note that whenever there is a problem, we form a committee to handle it. Dr. Tzagournis has agreed to study this issue and bring us a recommendation on that to our next meeting.

Dr. Cornwell presented a summary of the research programs in the College of Medicine and the Hospitals, which indicated that we are making some substantial progress in increasing the amount of research to the appropriate level for a hospital our size. We are not there yet, but we have made very significant progress.

We received the financial report and reviewed and accepted the Touche Ross Audit Report, which as you know, did not disclose any material weaknesses. Mr. Percel produced a report on our Accounts Receivable problems. Currently, Accounts Receivable at the Hospitals are in an excess of 100 days and that number has been increasing. Compared to our performances with other hospitals, with inside and outside of the Big Ten, while we did compare favorably with some of those hospitals, it was clear that significant improvement is possible in that regard. The administration was asked to determine whether our slow collection was due to state policies or to the practices of local third party payers and to what extent, we at Ohio State, could improve that simply by having a better system.

We also heard a comprehensive report from Dr. Gabbe of the Department of Obstetrics and Gynecology about that Department since he joined it less than 2 years ago. He also showed us clear progress, particularly in the area of increased research. The most remarkable thing that happened at the meeting, however, was that Mr. Nichols introduced three hospital employees who had achieved perfect attendance, one for 11 years, one for 16 years, and one for 17 years. I still do not believe that, but there they were. We also officially expressed our thanks to Mr. Nichols for the outstanding job he did as the interim director. That completes my report, Mr. Chairman.

--0--

April 7, 1989 meeting, Board of Trustees

President Jennings:

Mr. Chairman, one item on the Hospitals Board while we are there. With your permission, I would like to recommend to you the Appointment of Judge James L. Graham to be appointed as a general public member of the University Hospitals Board for a term of three years effective May 1, 1989.

Background

Honorable James L. Graham

The Honorable James L. Graham is a United States District Judge in the Southern District of Ohio, Eastern Division. Judge Graham received his B.A. and J.D., summa cum laude, from The Ohio State University.

Judge Graham was engaged in the private practice of law, specializing in litigation. He was appointed to the United States District Court for the Southern District of Ohio in 1986.

UNIVERSITY HOSPITALS BOARD APPOINTMENT

Resolution No. 89-80

Synopsis: The Academic Affairs Committee recommended the confirmation and approval of an individual to the University Hospitals Board.

WHEREAS the Board of Trustees on November 30, 1979, approved the establishment of a University Hospitals Board; and

WHEREAS the membership of the Hospitals Board was approved on April 4, 1980, and has been subsequently amended; and

WHEREAS Judge Graham has been highly recommended for appointment as a Hospitals Board Member:

NOW THEREFORE

BE IT RESOLVED, That Judge James L. Graham be appointed as a general public member of the University Hospitals Board for a term of three years, effective May 1, 1989.

Upon motion of Mrs. Bowser, seconded by Mr. Berry, with an abstention by Mr. Teaford, the Board of Trustees adopted the foregoing resolution by voice vote.

--0--

INVESTMENTS COMMITTEE REPORT

Mr. Kessler:

The Investment Committee heard the Endowment Investment Report which showed a market value of \$ 263,182,760 as of March 17.

We also reviewed and accepted the recommendation of the University Treasurer for changes in the Asset Allocation of the Endowment Funds Investments. The changes which are summarized in the Board resolution we are recommending

INVESTMENTS COMMITTEE REPORT (contd)

Mr. Kessler: (contd)

represent a shift in policy to having index funds as a central core of both the equity and fixed income assets, with investment managers selected to provide value added beyond the index funds. In addition to placing \$10 million in the broad domestic index fixed income fund, we are recommending placing \$30 million in an S & P 500 index fund, \$15 million in a small capitalization index fund, and \$10 million in an international equity index fund. The committee is also recommending that the Treasurer bring back to this Board provisions to the University's Investment Policy which will incorporate these new asset allocations as well as authorize the Treasurer to allocate new monies received by the Endowment as 60% equity index fund, 20% bond funds, and 15% cash and equivalents. We are recommending this resolution to change the Endowment asset allocation and Investment Policy for your approval.

Mr. Berry:

Jack, I heard you to say 20% bond index fund, you met 25%, didn't you?

Mr. Kessler:

I do mean 25%.

Mr. Teaford:

I just have one question. There is at least one area in which that violates the policy of the Board. I agree with this recommendation but do we need to somehow amend the policy with regard to international investment?

Mr. Ihrig:

Mr. Teaford, the second resolve, it is on the second page, is directed to bring back a revision to the investments policies to so amend. That will be done in a timely manner before the actual investments are made.

Mr. Teaford:

Okay, fine.

Mr. Nichols:

There is also a provision, Mr. Teaford, in the existing Board policy that allows the Board to make expectations by Resolution. So this would also fit into that section.

Mr. Kessler:

The Investments Committee also reviewed the report of the University audits for 1987-88 with representatives of Touche Ross, the auditors, as well as Parnes Company, the external auditors. The University has received unqualified opinion for 1987-88 from Touche Ross. This review covered compliance as well as control issues noted in the audit with the responses from appropriate University staff. The audit was thorough and the issues are being appropriately addressed by the staff. We found no issues of unusual concern to bring to the Board's attention, and we

INVESTMENTS COMMITTEE REPORT (contd)

recommend the Board approve the resolution accepting the report of audit recommendations and responses for 1987-88.

(See Appendix XXVIII for complete text of The Ohio State University Endowment Summary, March 17, 1989, page 923.)

--0--

Mr. Kessler:

The Investments Committee is recommending the following resolutions for approval:

ASSET ALLOCATION ADJUSTMENTS TO THE ENDOWMENT FUND

Resolution No. 89-81

Synopsis: The Investments Committee recommended the approval to make asset allocation adjustments to the Endowment Fund.

WHEREAS the Board of Trustees enlisted the services of Ennis Knupp & Associates to analyze the University's current Endowment investment policies; and

WHEREAS Ennis Knupp & Associates made several recommendations regarding the level of investment risk incurred, how risk is controlled and diversification of the Endowment portfolio; and

WHEREAS it is the belief of the Investments Committee and the Treasurer that the Endowment should continue to follow its goal of preserving the purchasing power of the Endowment and to achieve this by following a strategy emphasizing total return with an orientation towards achieving this goal over the long term; and

WHEREAS it is important that the orientation towards achieving this goal be a long-term one; and

WHEREAS the Endowment should further diversify into sectors of the market not currently being utilized; and

WHEREAS it is recommended that the Endowment move towards establishing a core position in index funds as a way of tracking the general market place while utilizing the talents of investment managers as a method of enhancing returns around the core; and

WHEREAS it is desirable that a method of allocating new cash coming into the Endowment be utilized to maintain the desired asset distribution of the Endowment:

NOW THEREFORE

BE IT RESOLVED, That upon recommendation of the Investment Committee of the Board of Trustees that the Treasurer be empowered to make the following changes to the Endowment:

- A. Equities
 - Sell all shares of the Neuberger and Berman Energy Mutual Fund.
 - Reduce allocation to the Chicago Corporation and Siebel Capital Management, Incorporated by \$7.5 million each.
 - Place \$30 million in a S & P 500 index mutual or co-mingled fund.

ASSET ALLOCATION ADJUSTMENTS TO THE ENDOWMENT FUND (contd)

Place \$15 million in a small capitalization index mutual or co-mingled fund.
Place \$10 million in an international equity index mutual or co-mingled fund.

- B. Fixed Income
Place \$10 million in a broad domestic index mutual or a co-mingled fund.
- C. Allocation of New Money
As new money enters the Endowment, it will be allocated in approximately the following manner:
 - 60% equity index funds
 - 25% bond index fund
 - 15% cash and equivalents

BE IT FURTHER RESOLVED, That the Investments Policy be revised to permit investments in an international equity index mutual or co-mingled fund and that the Treasurer be directed to bring to this Board specific revisions to incorporate this change, and any other appropriate changes to the Investments Policy.

Upon motion of Mr. Kessler, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

**ACCEPTANCE OF THE REPORT OF AUDIT
RECOMMENDATIONS AND RESPONSES FOR 1987-88**

Resolution No. 89-82

Synopsis: The Investments Committee recommended the acceptance of the report of audit recommendations and responses for 1987-88.

WHEREAS in August 1985, with the approval of the Auditor of State, The Ohio State University entered into a four-year agreement with Touche Ross and Company for an annual audit of the University for fiscal years 1985-86 through 1988-89; and

WHEREAS the Touche Ross audit of the University for 1987-88, meeting the requirements of the Auditor of State, has been received and the accounts, records, files, and reports of the University have been found to be in satisfactory condition, but certain recommendations have been included in the audit report; and

WHEREAS the auditors' recommendations have been studied by the appropriate University offices, and procedures and responses have been developed as a result of the recommendations:

NOW THEREFORE

BE IT RESOLVED, That the report of the Touche Ross and Company audit recommendations for The Ohio State University for 1987-88 (including separate sections for the University Hospitals, the Development Fund, the Dormitory Revenue Bond Funds, the University Housing Commission, and the WOSU Stations and including the Ohio Revised Code compliance letter) and the management responses to the recommendations be accepted.

Upon motion of Mr. Kessler, seconded by Mrs. Bowser, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

**ACCEPTANCE OF THE REPORT OF AUDIT
RECOMMENDATIONS AND RESPONSES FOR 1987-88 (contd)**

(See Appendix XXX for complete text of Touche Ross Auditors Report, for the year ending June 30, 1988, page 933)

--0--

ACADEMIC AFFAIRS COMMITTEE REPORT

Ms. Casto:

This morning in the Academic Affairs Committee we meant with Barbara Newman who gave us a report on the Action Plan. Which was the recruitment and retention of black students here at Ohio State University.

We also heard from James Bishop and his comments on the Young Scholars Program. It was really interesting the amount of students that they are getting involved in and really trying to keep their interest.

We also heard from Sue Blanshan on the University Senate Committee for Women and Minorities. I think that all of these programs are benefitting Ohio State.

(See Appendix XXXI for complete text on the Summary of Report on Affirmative Action, page 1019.)

--0--

Ms. Casto:

The Academic Affairs Committee is recommending for approval the following resolutions:

AMENDMENTS TO THE RULES OF THE UNIVERSITY FACULTY

Resolution No. 89-83

Synopsis: The Academic Affairs Committee recommended the approval of the following amendments to the Rules of the University Faculty.

WHEREAS the University Senate pursuant to rule 3335-1-09 of the Administrative Code is authorized to recommend through the President to the Board of Trustees the adoption of amendments to the Rules of the University Faculty as approved by the University Senate; and

WHEREAS the proposed changes in the Rules of the University Faculty were approved by the University Senate on January 28, 1989, and March 4, 1989, as follows:

AMENDED RULES

3335-5-19 Faculty.

As used in these rules the term "faculty" shall include persons appointed by the board of trustees with regular, regular clinical, auxiliary, and emeritus faculty titles on full- or part-time appointments, with or without salary.

(A) unchanged.

AMENDMENTS TO THE RULES OF THE UNIVERSITY FACULTY (contd)

- (B) "Regular clinical faculty": persons with the titles of professor of clinical (department), associate professor of clinical (department), assistant professor of clinical (department), and instructor of clinical (department), who serve on appointments totaling fifty per cent or more service to the university. Regular clinical faculty appointments are made only in the following departments of the college of medicine: anesthesiology, family medicine, internal medicine, neurology, obstetrics and gynecology, ophthalmology, otolaryngology, pathology, pediatrics, physical medicine, preventive medicine, psychiatry, radiology, and surgery.

The number of persons holding regular clinical faculty titles in each department cannot be greater than one-third the number of persons holding regular faculty titles in that department. Individuals appointed to the regular clinical faculty are limited to participating in governance at the departmental and college levels, but may not participate in promotion and tenure matters of regular faculty.

Balance unchanged.

3335-5-471 Steering committee.

(A) Membership

The steering committee shall consist of fourteen members.

- (1) unchanged.
- (2) Four students.
 - (a) The president of the council of graduate students. The vice president of the council of graduate students may attend steering committee meetings with full voting privileges if the president cannot attend.
 - (b) The president of the inter-professional council. The vice president of the inter-professional council of graduate students may attend steering committee meetings with full voting privileges if the president cannot attend.
 - (c) The president of the undergraduate student government. The vice president of the undergraduate student government may attend steering committee meetings with full voting privileges if the president cannot attend.
 - (d) One appointed by the undergraduate student government from the undergraduate student membership of the senate. The term of service is one year. The vice president of the undergraduate student government may attend steering committee meetings with full voting privileges if the appointed member cannot attend.

3335-5-488 Committee on honorary degrees.

(A) Unchanged.

(B) Duties and responsibilities.

AMENDMENTS TO THE RULES OF THE UNIVERSITY FACULTY (contd)

- (1) Establish definite standards of scholarly attainment or of the distinctive applications of such attainment in the service of society by which to judge the qualifications for this honor.
- (2) Establish procedures for the nomination of potential candidates for honorary degrees.
- (3) Receive nominations concerning persons who might be considered for an honorary degree.
- (4) Review thoroughly the achievements and qualifications of all persons nominated.
- (5) Report to the university senate for its consideration and action such persons as have received no fewer than four affirmative votes from the committee membership.
- (6) Keep all deliberations and votes confidential except where publication is necessary for official purposes.
- (7) Deliver the full dossier of each candidate and the nomination report of the committee on honorary degrees to the secretary of the university senate who shall distribute the nomination report to all members of the university senate.

Balance unchanged.

3335-47-11 Regular clinical faculty ranks.

The titles of regular clinical faculty are professor of clinical (department), associate professor of clinical (department), assistant professor of clinical (department), and instructor of clinical (department). Individuals in this track may have a full range of responsibilities to appropriate academic units with emphasis on patient care and clinical teaching activities. Clinical activities for faculty members in this category are to be included in approved practice plans.

(A) Appointment criteria

Initial appointments, or transfer, to the regular clinical faculty will be made for individuals with the following experience or credentials:

- (1) They are strict or geographic full-time faculty members in clinical departments in the college of medicine, as defined by the college of medicine.
- (2) They engage in activities which consist primarily of patient care and clinical teaching and supervision.
- (3) They have the appropriate educational background and credentials to engage in the activities outlined in paragraph (A)(2) of this rule. Formal requisite: M.D. degree or equivalent qualification.
- (4) They are essential to the continuing mission of the college of medicine as determined by the appropriate clinical department chairperson, dean of the college of medicine, and vice president for academic affairs and provost.

(B) Term of appointment.

AMENDMENTS TO THE RULES OF THE UNIVERSITY FACULTY (contd)

- (1) In the first term of appointment to the regular clinical faculty, appointees will be reviewed annually. During the fourth year, a formal review will be conducted. The faculty member will be informed if the appointment is to be renewed after the fifth year.
- (2) Subsequent appointments will be for periods of five years in lieu of tenure. A formal review will be conducted in the fourth year and the faculty member will be informed if the appointment is to be renewed after the fifth year for another five-year term.
- (3) All appointments will be based upon criteria established by the clinical departments, approved by the dean of the college of medicine, and vice president for academic affairs and provost.
- (4) If the appointment is not renewed, standards of notice must be in accord with rule 3335-47-09 of the Administrative Code.

(C) Transfers

It is generally expected that the needs of the academic unit and the career goals of the prospective faculty member will result in A meshing of need, expectation, responsibility, and expertise to allow a long-term appointment to either the regular faculty or regular clinical faculty. Should a transfer be considered appropriate, the following must be accomplished:

- (1) The process of transfer from the regular faculty to the regular clinical faculty or from the regular clinical faculty to the regular faculty is initiated only upon the written request of the faculty member. A recommendation for transfer must indicate clear evidence of a change in the individual's career goals and expectations, duties, and activities.
- (2) An individual appointed to a tenure-eligible position as an instructor or assistant professor requesting transfer to the regular clinical faculty must do so no later than the beginning of the fourth year of service, or after tenure has been granted. Transfer of a tenured faculty member to the regular clinical faculty requires resignation of the tenured position.

An individual from outside the university appointed to a tenure-eligible position as an associate professor requesting transfer to the regular clinical faculty must do so no later than the beginning of the second year of service, or after tenure has been granted.

Balance unchanged.

NOW THEREFORE

BE IT RESOLVED, That the foregoing amendments to the Rules of the University Faculty be adopted as recommended by the University Senate.

Upon motion of Amb. Wolf, seconded by Mr. Berry, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

DISTINGUISHED SERVICE AWARDS

Resolution No. 89-84

Synopsis: The Academic Affairs Committee recommended the approval for eight individuals to receive Distinguished Service Awards.

WHEREAS the President's Staff, serving as a Committee on Distinguished Service Awards, has nominated and recommended eight individuals for approval by the Board of Trustees to receive the Distinguished Service Award at a time convenient to the University and the recipients:

Dale T. Friday

Although he retired in 1981, Professor Emeritus Dale T. Friday continues to provide service to The Ohio State University as an advocate for agricultural research and education and in support of the University.

As the first General Manager of the Ohio State Farm Science Review, Professor Friday directed all facets of the review. During his 18 years as manager, the number of exhibitors grew from fewer than 100 to more than 500, and the review became internationally recognized as the premier showcase of the best in agricultural automation, farming practices, farm crop varieties, and livestock breeds.

Professor Friday is a noted agronomist who pioneered research on forestry fertilization by airplane and originated the first aerial application of dry fertilizer. He served as Project Supervisor for the application of the first two carloads of liquid nitrogen fertilizer to be applied in the United States.

As one of the founders and organizers of the North American Farm Show Council, Professor Friday has served as President of that organization and presently serves as Executive Coordinator. As a representative of the Allied Chemical Company, he administered 17 grant-in-aid programs at 15 of the nation's land-grant universities. He has been awarded the Ohio FFA Honorary State Farmer Degree, and has received the Distinguished Alumni Award from The Ohio State University's College of Agriculture.

Because of this active service for the benefit of his alma mater, Professor Friday is exceptionally qualified to receive the Distinguished Service Award.

Noel F. George

Noel F. George, a graduate of The Ohio State University's College of Law, has made significant contributions both to the practice of law and to legal education. As one of the College's most outstanding graduates, he has distinguished himself in the area of transportation law, and his achievements have been notable in the field of interstate commerce.

Mr. George has quietly and effectively served his alma mater. He has been extraordinarily supportive of the College of Law. He is open to and concerned with the needs of the College, and his contributions have enabled the College of Law to undertake the expansion of its library and attract top faculty. Because of his leadership and support of his colleagues at his law firm, Baker and Hosteller, a major capital campaign has become viable for the College.

DISTINGUISHED SERVICE AWARDS (contd)

Noel F. George (contd)

A successful lawyer and a committed alumnus, Mr. George has amply shown that he values his Ohio State education. His significant and timely gifts have enabled the College of Law to proceed with its initiatives. Mr. George has been a leader in promoting the interests of The Ohio State University and its distinguished College of Law.

Robert E. Georges

As Associate Dean Emeritus of the College of Business, Robert E. Georges has been active in his support of and service to The Ohio State University. Dean Georges' primary concern was for students, and he promoted the expansion and support of accounting and business education opportunities, especially for minorities. He has been a friend and counselor for generations of business students in over two decades of service.

Dean Georges was responsible for a variety of policies and programs designed to increase minority student opportunity. The New Careers Program in the 1970's sought to prepare minority students for management careers. It actively recruited students and prepared them through special counseling, tutoring, and tuition reimbursement, and in addition guaranteed them jobs on completion of the program.

Dean Georges was instrumental in the development and administration of the Minority Assistance Program in 1975. The goals of the program include minority recruitment, financial assistance, special counseling, intern experience for the participants, and the enhancement of the students' educational life.

Dean Georges' dedication to these programs and his own prodigious efforts have resulted in high success rates. His personal touch has encouraged many students to continue their education. In recognition of his efforts towards these goals, Dean Georges received the 1985 Distinguished Affirmative Action Award. A member of many important University committees, Dean Georges was an active University citizen.

Frederick G. Ruffner

A 1950 graduate of The Ohio State University's College of Business, Frederick G. Ruffner has continued to serve the University in a number of capacities.

Mr. Ruffner demonstrates a clear pride in his alma mater. A loyal and dedicated alumnus, he has supported The Ohio State University, most especially its libraries. Through his publishing company, Gale Research, he has provided the libraries with a large number of reference materials. In addition, his generosity has bolstered the general emergencies priority fund and many other preservation and instructional advancement funds in the libraries.

Most recently, Mr. Ruffner has served as chair of the National Campaign Steering Committee. His unstinting dedication to this effort has carried it through its first three years with enormous success. He has been influential in the initial planning, strategy, and progress of The Ohio State University's five-year campaign.

During his 40 years' affiliation with the University, Mr. Ruffner has been a member of the President's Club, the Alumni Association, and the Friends of the Libraries. Beyond the University, he is president of Friends of the Libraries U.S.A. and is very much involved in the preparation of

DISTINGUISHED SERVICE AWARDS (contd)

Frederick G. Ruffner (contd)

several projects for the 1992 Quincentenary Celebration as president of the Phileas Society. He has been recognized for his contributions to Ohio with the 1988 Ohioana Career Medal. In 1970, he received The Ohio State University Centennial Award.

Because of his leadership, generosity, and service to The Ohio State University, Mr. Ruffner is indeed worthy of a Distinguished Service Award.

Thomas B. Smith

Thomas B. Smith, Associate Vice President Emeritus for Physical Facilities, dedicated his 39 years at The Ohio State University to service. During his tenure here, he served as an engineer in the Office of the University Architect, as Assistant and Associate Director of the Physical Plant, and as Associate Vice President of Physical Facilities.

Mr. Smith has been at the forefront of the significant growth in facilities that has taken place at the University since 1956. In his capacity as Assistant and later Associate Director of the Physical Plant, he oversaw the planning and the construction of more than 300 major projects, including new academic facilities, St. John Arena, and the entire North Campus residential and dining complex. In addition, he managed the operation and maintenance of the air conditioning and electrical systems, utility usage forecasting, and other important management functions.

Continuing his pattern of excellent management and service, Mr. Smith supervised the expansion of the Health Science facilities, the completion of West Campus and the regional campuses, and the reconstruction of University Hall. During this period approximately 78 percent of the University's buildings were constructed.

Of special note is Mr. Smith's commitment to energy conservation. His innovative ideas and management enabled the University to meet the rising costs of energy sources successfully. From 1973 to 1986, energy management measures saved the University over \$100 million, and will continue to provide savings for years to come.

Mr. Smith received the Meritorious Service Award from the Association of Physical Plant Administrators. His management of construction, renovation, and service helped to make The Ohio State University's physical plant a model for university facilities management.

Mary Anne Southard

After thirty years as a key member of the Office of Communications and Development, Mary Anne Southard retired in 1987. During her sixteen years as Associate Director for the Gift Processing Department, she never forgot the importance of the personal touch in dealing with staff members, faculty, students, and the many friends of The Ohio State University.

During her tenure in the development area, the number of gifts increased dramatically, as did the technology within the office. Although her department handled an increasingly complex load, Ms. Southard continued to insure that each donor's wishes for the disposition of gifts were followed. Her attention to this detail and her professional attitude set standards for the entire department. Many longtime donors came to know her by name and thus felt comfortable about trusting her with their wishes.

April 7, 1989 meeting, Board of Trustees

DISTINGUISHED SERVICE AWARDS (contd)

Mary Anne Southard (contd)

Because of her knowledge, experience and expertise, Ms. Southard has been able not only to keep up with the growing volume of gifts to the University, but she has also improved the speed and quality of processing. Her dedicated management has inspired a confidence in this department that is still very much in evidence.

Ms. Southard exemplifies the professionalism and achievement that is the goal of the Office of University Communications and Development and, indeed, all of the University. Because of her dedicated service and willing attitude, Ms. Southard is a very worthy candidate for a Distinguished Service Award.

Stuart A. Summit

Stuart A. Summit is numbered among the most distinguished graduates of The Ohio State University College of Law. Mr. Summit is a principal partner and head of litigation of the New York firm of Summit, Rovins and Feldesman. His contributions to The Ohio State University can best be characterized as unselfish service.

This loyalty to Ohio State began while Mr. Summit was an undergraduate student. He was a member of Romophos, Bucket and Dipper, and Sphinx honor societies, the Student Senate, and served as a Chief Justice on the Student Court.

As an alumnus, Mr. Summit has continued to give exceptional leadership to his alma mater. He has served the Alumni Association extensively as an alumni club officer, president of the College of Law Alumni Association, and member of the Alumni Advisory Council. He serves on the Development Fund Board of Directors and is a member of the National Campaign Committee. In recognition of his outstanding contributions, Mr. Summit has received the Alumni Association's Mershon Award.

Always giving to his community, his profession, and his university, Mr. Summit has been a national associate for the Boys Clubs of America, and is active in professional associations.

Leon I. Twarog

Leon I. Twarog, Professor Emeritus of Slavic and East European Languages and Literatures, has had a long and distinguished career at The Ohio State University as the founder and developer of the Slavic Program and as a leader in developing international programs for the University and its students.

Coming to The Ohio State University in 1962 from Boston University, where he taught Russian, Professor Twarog faced the challenge of building a program focusing on Slavic languages and literatures. His great determination and dedication soon began to attract able faculty, but it was his foundation of a comprehensive Slavic studies library that solidified the new program. Supported with a grant from the University, he traveled to the Soviet Union and collected a sizable portion of valuable works, including complete editions of the major writers. The notable Hilander Collection in Medieval Slavic Studies is an outgrowth of Professor Twarog's foresight in gathering materials.

April 7, 1989 meeting, Board of Trustees

DISTINGUISHED SERVICE AWARDS (contd)

Leon I. Twarog (contd)

In 1963, Professor Twarog was instrumental in the formation of a language study program to the USSR. Now operating as the Ohio State-Purdue Pushkin Institute exchange program, it has become an important link between our two academic worlds. In 1965, he established the Ohio State Center for Slavic and East European Studies, considered the leading program in the area. In his capacity as Associate Dean of Faculties for International Programs, he developed plans and structures for many of the international programs that are now in operation at Ohio State.

Professor Twarog has served as president of the American Association of Teachers of Slavic and East European Languages and as executive secretary of the American Association for the Advancement of Slavic Studies. A world leader in this field, he has worked to spread the study of Slavic languages to high schools, and instituted the annual Slavic Day, which continues to bring 300 to 400 high school students to campus each year.

Largely due to his dedicated service and enthusiastic attitude, The Ohio State University's Department of Slavic and East European Languages and Literatures today enjoys a prominent reputation in its field. Professor Twarog truly exemplifies the standard of excellence to which this University holds.

and

WHEREAS these awards are given in recognition of distinguished service to The Ohio State University and the awards are in accordance with action taken by the Board of Trustees in 1952:

NOW THEREFORE

BE IT RESOLVED, That the Distinguished Service Awards be approved for awarding as designated above.

Upon motion of Mrs. Bowser, seconded by Amb. Wolf, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

HONORARY DEGREE

Resoluton No. 89-85

Synopsis: The Academic Affairs Committee recommended the approval for awarding an honorary degree.

WHEREAS the Committee on Honorary Degrees and the University Senate, pursuant to rule 3335-5-488 of the Administrative Code, have approved for recommendation to the Board of Trustees awarding of an honorary degree as listed below:

April 7, 1989 meeting, Board of Trustees

HONORARY DEGREE (contd)

Julian B. Rotter

Professor Rotter is widely recognized as one of the most eminent psychologists of his generation. He has had a distinguished career of original research and outstanding service. His unique contributions to psychology include the formulation of a comprehensive theory of social learning, the assessment of theoretically relevant measures of individual differences and personality.

Professor Julian B. Rotter served as a member of The Ohio State University faculty from 1946-63 and for eleven years was the Director of the Psychological Clinic. He received his A.B. in Chemistry from Brooklyn College, and his M.A. and Ph.D. degrees in Psychology from State University of Iowa and Indiana University, respectively.

Professor Rotter's most impressive contribution to psychology was the combining of two important theoretical traditions, namely cognitive and reinforcement theory. In 1954, Professor Rotter published his book, Social Learning in Clinical Psychology, in which he presented a theory that gave importance both to cognitive as well as the reinforcement value that specific events could hold for an individual. He was one of the first major theorists to emphasize the critical importance of the interaction between social situations and individual differences in personality. This theoretical framework set the stage for the development of a number of expectancy variables that helped predict how people behave. The best known of these is his creative contributions in conceptualizing and measuring internal versus external locus of control of reinforcement expectancy (IE) that became one of the most predominant expectancy variables used in personality and social psychology research over the last 25 years.

In addition to his creativity as a scholar, Professor Rotter has been a leader in the field of psychology. Recognition of his outstanding contributions is reflected in his receiving the American Psychological Association Award for Distinguished Contributions to the Science and Profession of Clinical Psychology. He is one of the outstanding contemporary psychologists of our time. His theory, concepts, insights, and empirical research have changed the field of psychology. Few people have been able to bring the innovative theoretical and applied understandings of human behavior to psychology in the way that Professor Rotter has. Much of this work was accomplished while he was on the faculty of The Ohio State University.

NOW THEREFORE

BE IT RESOLVED, That an honorary Doctor of Science degree be awarded to Julian B. Rotter in accordance with the recommendation at a time convenient to the University and the recipients.

Upon motion of Amb. Wolf, seconded by Mr. Teaford, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

WAIVER

Resolution No. 89-86

Synopsis: The Academic Affairs Committee recommends the approval of a waiver.

WHEREAS pursuant to the Board's acceptance of the Report of the Committee on Retirement and Insurance on February 6, 1959, and Resolution 77-92, "Principal Administrative Officials" of The Ohio State University are to be relieved of their administrative assignments at age 65; and

WAIVER (contd)

WHEREAS the University's proposed appointment of Joan N. Huber as Coordinating Dean for Arts and Sciences and as Dean of the College of Social and Behavioral Sciences would be restricted by the age 65 exclusion; and

WHEREAS Joan N. Huber has demonstrated outstanding service to the University in her capacity as Dean of the College of Social and Behavioral Sciences and her appointment is within the purview of the affirmative action goals of The Ohio State University; and

WHEREAS the University wishes to appoint Joan N. Huber to these administrative posts beyond her sixty-fifth birthday:

NOW THEREFORE

BE IT RESOLVED, That Resolution 77-92 and the provisions of the February 6, 1959, Report of the Committee on Retirement and Insurance be waived to allow the appointment of Joan N. Huber as Coordinating Dean for Arts and Sciences from January 1, 1989 to December 31, 1991, and Dean of the College of Social and Behavioral Sciences from July 1, 1989 to June 30, 1994.

Mrs. Bowser:

I cannot not vote to waive Resolution 77-92. I think it is a good rule and a fair rule, and a rule that Ohio State has used in a nondiscriminatory manner for forty years. While I admire Dr. Huber's accomplishments, I cannot vote to waive this rule. I vote no.

Upon motion of Amb. Wolf, seconded by Mr. Teaford, the Board of Trustees adopted the foregoing resolution with six affirmative votes cast by Messrs. Immke, Berry, Teaford, Kessler, Wolf, and Ms. Casto, and a negative vote cast by Mrs. Bowser.

--0--

REAPPOINTMENT OF JOAN N. HUBER

Resolution No. 89-87

RESOLVED, That the appointment of Joan N. Huber as Coordinating Dean for Arts and Sciences, effective January 1, 1989, through December 31, 1991; and Dean of the College of Social and Behavioral Sciences, effective July 1, 1989, through June 30, 1994, pursuant to rule 3335-3-17 of the Administrative Code and permitted as a result of this Board's waiver today of the age 65 exclusion for "Principal Administrative Officials" for Dean Huber.

Mrs. Bowser:

Since the rule has been waived, I can happily vote for Dr. Huber.

Upon motion of Mr. Kessler, seconded by Mr. Teaford, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

PERSONNEL ACTIONS

Resolution No. 89-88

RESOLVED, That the personnel actions as recorded in the Personnel Budget Records of the University since the February 3, 1989 meeting of the Board, including the following Change in Title, Reappointment of Principal Administrative Official, Appointment of Chairpersons and Director of Departments and Program, Leaves of Absence Without Salary, Leave of Absence Without Salary--Continuation, Professional Improvement Leaves, Professional Improvement Leaves--Change in Dates, Emeritus Titles, Emeritus Title--Cancellation, and Emeritus Title--Change in Title, as detailed in the University Budget be approved and the Medical Staff Appointments/Reappointments approved January 26, 1989, and March 16, 1989, by the Hospitals Board be ratified.

Change in Title

NAME: RICHARD A. HOLLINGSWORTH
Title: Dean of Student Life
Office: Student Life
Effective: March 1, 1989
Salary: \$55,080.00
Present Position: Acting Dean of Student Life

Reappointment of Principal Administrative Official

RUSSELL J. SPILLMAN, Vice Provost for Student Affairs, effective February 3, 1989, through June 30, 1994, pursuant to rule 3335-3-17 of the Administrative Code.

Appointment of Chairpersons and Director of Departments and Program

January 15, 1989 through September 30, 1989

Educational Policy and Leadership Elsie J. Alberty*

February 1, 1989 through September 30, 1990

Chemistry Russell M. Pitzer

October 1, 1989 through June 30, 1994

Cognitive Science Program Peter W. Culicover

*Acting Chair

Leaves of Absence Without Salary

GARY K. NUGENT, Professor, Cooperative Extension Service, effective February 1, 1989, through January 31, 1990, for medical reasons.

WILLIAM J. TYZNIK, Professor, Department of Animal Science, effective April 17, 1989, through June 18, 1989, for personal reasons.

ATTILA A. BRUCKNER, Assistant Professor, Department of Industrial Design, effective Spring Quarter 1989, for personal reasons.

PERSONNEL ACTIONS (contd)

Leaves of Absence Without Salary (contd)

YONG-TAEK IM, Assistant Professor, Department of Industrial and Systems Engineering, effective Spring Quarter 1989, for personal reasons.

SUSAN P. VAN PELT, Assistant Professor, effective Spring Quarter 1989, for personal reasons.

Leave of Absence Without Salary--Continuation

JO MARLENE JONES, Assistant Professor, Cooperative Extension Service, effective February 1, 1989, through May 30, 1989, to continue to work on her Ph.D. degree at North Carolina State University.

Professional Improvement Leaves

KATHERINE H. BURKMAN, Professor, Department of English, effective Autumn Quarter 1989, Winter Quarter and Spring Quarter 1990.

KENNETH A. MARANTZ, Professor, Department of Art Education, effective Autumn Quarter 1989, Winter Quarter and Spring Quarter 1990.

LEE B. BROWN, Associate Professor, Department of Philosophy, effective Autumn Quarter 1989, Winter Quarter and Spring Quarter 1990.

E. REID GILBERT, Associate Professor, Department of Theatre, effective Autumn Quarter 1989 and Winter Quarter 1990.

CHARLES D. KLOPP, Associate Professor, Department of Romance Languages and Literatures, effective Autumn Quarter 1989, Winter Quarter and Spring Quarter 1990.

HOWARD J. MARCUM, Associate Professor, Department of Mathematics (Newark Campus), effective Winter Quarter and Spring Quarter 1990.

DAVID N. MILLER, Associate Professor, Department of Judaic and Near Eastern Languages and Literatures, effective Autumn Quarter 1989, Winter Quarter and Spring Quarter 1990.

SHIGERU MIYAGAWA, Associate Professor, Department of East Asian Languages and Literatures, effective Autumn Quarter 1989, Winter Quarter and Spring Quarter 1990.

JAMES P. PHELAN, Associate Professor, Department of English, effective Winter Quarter and Spring Quarter 1990.

AMY E. SHUMAN, Associate Professor, Department of English, effective Autumn Quarter 1989, Winter Quarter and Spring Quarter 1990.

MING-DAW TSAI, Associate Professor, Department of Chemistry, effective Autumn Quarter 1989, Winter Quarter and Spring Quarter 1990.

HARRY VREDEVELD, Associate Professor, Department of German, effective Autumn Quarter 1989, Winter Quarter and Spring Quarter 1990.

CHARLES G. S. WILLIAMS, Associate Professor, Department of Romance Languages and Literatures, effective Autumn Quarter 1989 and Winter Quarter 1990.

PERSONNEL ACTIONS (contd)

Professional Improvement Leaves (contd)

S. M. TARIQ RIZVI, Assistant Professor, Department of Mathematics (Lima Campus), effective Autumn Quarter 1989, Winter Quarter and Spring Quarter 1990.

Professional Improvement Leaves--Change in Dates

ALEXANDER DYNIN, Associate Professor, Department of Mathematics, change leave from Winter Quarter, Spring Quarter and Autumn Quarter 1989, to Winter Quarter and Spring Quarter 1989.

KAMBIZ VAFAI, Associate Professor, Department of Mechanical Engineering, change leave from Autumn Quarter 1988, Winter Quarter and Spring Quarter 1989, to Autumn Quarter 1989, Winter Quarter and Spring Quarter 1990.

Emeritus Titles

CONSTANTINE J. CAVALARIS, College of Dentistry - Diagnostic Services, with the title Professor Emeritus, effective January 1, 1989.

MATEJA MATEJIC, Department of Slavic and East European Languages and Literatures, with the title Professor Emeritus, effective April 1, 1989.

WILLIAM A. NEWTON, Department of Pediatrics, with the title Professor Emeritus, effective January 1, 1989.

RICHARD G. OLSEN, Department of Veterinary Pathobiology, with the title Professor Emeritus, effective January 1, 1989.

MARIE E. BRITTIN, Division of Speech and Hearing Science, with the title Associate Professor Emeritus, effective January 1, 1989.

THOMAS A. WITTICH, Department of Veterinary Preventive Medicine, with the title Clinical Associate Professor Emeritus, effective April 1, 1989.

MCIVER W. WOODY, Sponsored Programs Development, with the title Associate Director Emeritus - Sponsored Programs Development, effective April 1, 1989.

ROSS CALDECOTT, Department of Electrical Engineering, with the title Research Scientist Emeritus, effective January 1, 1989.

Emeritus Title--Cancellation

WILLIAM W. WAYSON, Department of Educational Policy and Leadership, with the title Professor Emeritus, effective January 1, 1989.

Emeritus Title--Change in Title

THOMAS E. POWERS, Department of Veterinary Physiology and Pharmacology, with the title Chairperson and Professor Emeritus, effective January 1, 1989.

PERSONNEL ACTIONS (contd)

Medical Staff--Appointments

OLIVE C. WILKIN, M.D., Attending Staff, Anesthesiology

JONATHAN K. WILKIN, M.D., Attending Staff, Division of Dermatology

MARYLYNN B. HERCHLINE, M.D., Courtesy Staff, Division of General Pediatrics

MELVIN W. THOMAS, M.D., Courtesy Staff, Division of Emergency Medicine

ERNEST L. DABREO, D.D.S., Attending Staff, Division of General Dentistry

JAY JACOBY, M.D., Attending Staff, Anesthesiology

ALAN R. SACOLICK, M.D., Courtesy Staff, Obstetrics and Gynecology

FRED M. ABRAMOVITZ, M.D., Courtesy Staff, Obstetrics and Gynecology

RICHARD S. JAECKLE, M.D., Attending Staff, Psychiatry

Medical Staff--Reappointments

JAMES W. SIMON, M.D., Courtesy Staff, Division of Urology

JOHN D. MAHAN, JR., M.D., Attending Staff, Pediatrics

LORNA F. DONOVAN, transferred from Limited Staff to Courtesy, Pediatrics

MARGARET S. HARNISH, M.D., Courtesy Staff, Obstetrics and Gynecology

Upon motion of Mr. Teaford, seconded by Amb. Wolf, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

RESOLUTIONS IN MEMORIAM

Resolution No. 89-89

Synopsis: The Academic Affairs Committee recommended the approval of the following Resolutions in Memoriam.

RESOLVED, That the Board adopt the following Resolutions in Memoriam and that the President be requested to convey a copy to the families of the deceased.

John F. Cuber

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on December 26, 1988, of John F. Cuber, Professor Emeritus in the Department of Sociology.

RESOLUTIONS IN MEMORIAM (contd)

John F. Cuber (contd)

John Cuber was born in Chicago, Illinois, on August 31, 1911. He received the A.B. degree from Western Michigan University in 1932 and the Ph.D. from the University of Michigan in 1937. He held faculty appointments at Sioux Falls College, Marietta College, and Kent State University, before coming to The Ohio State University as an Associate Professor of Sociology in 1944. Upon his retirement in 1973 he was named Professor Emeritus. Over the years he also served as Visiting Professor to the University of Kentucky, University of Michigan and the University of California at Berkeley.

Professor Cuber authored five textbooks. *Sociology: A Synopsis of Principals* (1947) was one of the most widely used in the field of Sociology for many years. *Marriage Counseling Practice* (1948) was the first book in the field. For many years he served as Editor for the Appleton-Century-Crofts Sociology Series. He was recognized in *Who's Who in America* and other similar publications and held a range of offices in state and national organizations concerned with advancement of scholarship, including the national vice presidency of Alpha Kappa Delta. He engaged in important research, trained a generation of specialists in the family field, and was one of the best lecturers the Department of Sociology has ever had.

The Department of Sociology pays tribute to the memory of John Cuber, his keen analytical abilities, his special gift as a speaker, and his concern for scholarship.

On behalf of the University community, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in their loss. It was directed that this resolution be inscribed in the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Ralph H. Davidson

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on January 13, 1989, of Ralph H. Davidson, Professor Emeritus in the Department of Entomology.

Professor Davidson was born January 19, 1908, in Vandalia, Ohio. He graduated from Butler Township High School in Vandalia, Ohio, in 1926. He then enrolled at The Ohio State University where he received the B.S. degree in June 1930, majoring in Agricultural Entomology; the M.S. degree in 1931 and the Ph.D. degree in June 1935, both in Entomology.

Dr. Davidson spent his entire professional career teaching and conducting research at The Ohio State University. He was a graduate assistant from 1930-1935; Instructor from 1935-36; Assistant Professor from 1936-43; Research Associate, Research Foundation from 1943-46; Associate Professor from 1946-58; and Professor from 1958 until his retirement in 1971. Upon his retirement he was named Professor Emeritus.

Besides teaching, Ralph had a nearly continuous record of research and field experience beginning with the summer of 1930. He worked with the USDA, the Agricultural Extension Service, OSRD and as supervisor of industrial and government research grants through The Ohio State University Research Foundation. His interests in leafhopper taxonomy, field entomology, insect biology and control and insecticide development are represented in more than 75 publications, including the outstanding textbook, *Insect Pests of Farm, Garden and Orchard*, 6th Edition.

RESOLUTIONS IN MEMORIAM (contd)

Ralph H. Davidson (contd)

Dr. Davidson was active in Gamma Alpha and Gamma Sigma Delta fraternities and Sigma Xi. He joined the Entomological Society of America and the Ohio Academy of Science in 1931 and served both in a number of capacities. He was also a member of the Entomological Society of Washington, a Fellow of the AAAS and is listed in American Men of Science and Who's Who in the Midwest. He also served a term as President of The Ohio State University Faculty Club.

On behalf of the University community, the Board of Trustees expresses to the family of Dr. Davidson its deepest sympathy in its loss. It was directed that this resolution be inscribed in the minutes of the Board of Trustees and that a copy be tendered to the family as sincere appreciation of the Board's realization of the loss that the family, the University and his many friends and associates have sustained.

Wilbur H. Ford

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on December 19, 1988, of Wilbur H. Ford, County Agent Emeritus in the Cooperative Extension Service.

Mr. Ford was born October 20, 1895, in Adario, Ohio (Richland County). He served as a Second Lieutenant in France with the Pioneer-Infantry Division in World War I. He received his B.S. in Agriculture from The Ohio State University in 1920, his M.S. in Animal Nutrition from the University of California in 1931, and other graduate work at the University of Colorado in 1941.

Upon graduation from The Ohio State University, Wilbur Ford became agriculture manager of the Lucas County Children's Home in Maumee, Ohio. In October 1922 he began his Extension experience when he joined the faculty at The Ohio State University as a County Extension Agent, Agriculture in Highland County. Mr. Ford continued in this position until November 1947. In March 1948 he became the County Extension Agent, Agriculture in Perry County and remained in this position until his retirement in December 1951. Upon his retirement he was named County Agent Emeritus.

Mr. Ford was instrumental in organizing the first Soil Conservation District in the State of Ohio. He not only was active in agricultural endeavors but also was a promoter of the 4-H program by originating tours to various Ohio industries for 4-H club members and their families. He developed 4-H camping programs and built two camp sites in Highland County and originated one of the first 4-H bands in the state. He and his wife supervised the Ohio State Fair Youth Building for seven years.

Mr. Ford was a member of the National Association of County Extension Agents and the Ohio Retired Extension Agents Association. Wilbur Ford was the recipient of several peer awards sponsored by the Ohio County Agents Association and the National County Agents Association. Mr. Ford's career took him on travels throughout the United States, Great Britain, Scotland, and Ireland. He was highly respected by his associates throughout the world.

On behalf of the University community, the Board of Trustees expresses to the family of Mr. Ford its deepest sympathy. It was directed that this resolution be inscribed in the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's realization of the loss that the family, the University, and his many friends and associates have sustained.

RESOLUTIONS IN MEMORIAM (contd)

Leslie H. Miller

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on February 18, 1989, of Leslie H. Miller, Professor Emeritus in the Department of Mathematics.

Dr. Miller was born in Ironton, Ohio, on March 21, 1914, and graduated from Ironton High School in 1931. He attended Rio Grande College, and earned a B.S. in Mathematics Education from Ohio University in 1935. He taught in the Ironton Public Schools for two years before returning to Ohio University, where he received an M.A. in Mathematics in 1937. From then until 1940, Dr. Miller taught at Cedarville College. He then started graduate work at The Ohio State University, where he earned a Ph.D. in Mathematics in 1943.

Dr. Miller served in the United States Navy from August 1943 until he was discharged in December 1944. He returned to The Ohio State University Mathematics Department, and remained there until his retirement as Professor Emeritus in 1979.

Dr. Miller was the author of three college-level textbooks. He developed mathematical methods for computer art, and continued this activity after his retirement. He was a member of several professional societies, including the American Mathematical Society; the Mathematical Association of America; the American Association for the Advancement of Science; and the National Council of Teachers of Mathematics.

On behalf of the University community, the Board of Trustees expresses its sympathy and understanding to the family of Dr. Miller. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Donald W. Riley

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on February 17, 1989, of Donald W. Riley, Professor Emeritus in the Department of Communication.

Dr. Riley was born on May 17, 1901, in Hamilton, Ohio. He graduated from Miami University with a B.A., and received an M.A. and Ph.D. from The Ohio State University. He began his university teaching career in 1930 as an Instructor in the Department of English at The Ohio State University. He was one of the faculty members who founded the Department of Speech when it was established in 1936.

Dr. Riley taught at The Ohio State University throughout his career and received the title Professor Emeritus upon his retirement in 1971. In addition, he was a Visiting Professor at Mexico City College for several terms. He was interested in the development of radio drama and published several articles on this topic. In addition, he was interested in correct pronunciation. For most of his career he taught courses in Voice and Diction and Radio Production. For a number of years he was the Director of the Ohio High School Speech League.

He was very active in the English Speaking Union and twice was elected President of the Columbus Branch.

Dr. Riley will be remembered by his students and colleagues as a person who was a thorough and dedicated teacher. He made many important contributions to his students personal and professional development.

April 7, 1989 meeting, Board of Trustees

RESOLUTIONS IN MEMORIAM (contd)

Donald W. Riley (contd)

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

James I. Watters

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on January 20, 1989, of James I. Watters, Professor Emeritus in the Department of Chemistry.

Dr. Watters was born on April 4, 1908, in Broadus, Montana. He earned his B.Sc. at the University of Minnesota in 1931. In 1943, he received the Ph.D. from the University of Minnesota, having performed his research under the direction of Professor I.M. Kolthoff. During the World War II years 19543-45 he served his country as Chief of Analytical Chemistry in the Manhattan Project at the University of Chicago. Afterwards, he joined the faculty of the chemistry department at the University of Kentucky as an associate professor. He spent the summer of 1947 as a visiting professor at Northwestern University. In 1948, he joined the analytical division of the Chemistry Department at The Ohio State University as a professor. During his career he supervised the research of 14 Ph.D. and 15 M.Sc. candidates. Upon his retirement in 1978 he was named Professor Emeritus.

His research centered on the solution chemistry of metal ion complexes. Chief interests lay in the newly emerging areas of polarography and spectrophotometry. He became interested in the area of mixed ligand complex compositions and stabilities. He solved the difficult numerical problems that are encountered in analyzing these reaction systems before high speed computers were readily available. His work in this area stands as a landmark. Another subject he tackled was the interactions of polyphosphates with metal ions. Here again he achieved a high degree of success in unraveling the complicated chemical behavior of difficult systems.

Dr. Watters was a summer consultant for the USAID at the Punjab University, India, 1965; Annamalai University, India, 1966; and at the UJJAIN University, India, 1967. He as an editor of Analytical Chemistry of the Atomic Energy Project in 1951, and a contributor to The Treatise on Analytical Chemistry.

He was a member of the American Chemical Society, AAAS, Sigma Xi, Zeta Psi, and Phi Lambda Upsilon. He is recognized in Who's Who in the Midwest, Who's Who in American, Who's Who in the World, and American Men and Women of Science.

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Upon motion of Amb. Wolf, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

April 7, 1989 meeting, Board of Trustees

STUDENT AFFAIRS COMMITTEE REPORT

Amb. Wolf:

Mr. Chairman, the Student Affairs Committee met this morning and heard a report of and reviewed the Amendments to the Code of Student Conduct. These rules really updates based upon experience factors to the various sections of the Code. I move for the adoption of the suggested changes or amendments to the Code.

AMENDMENTS TO THE CODE OF STUDENT CONDUCT

Resolution No. 89-90

Synopsis: The Student Affairs Committee recommends the approval of the following amendments to the Code of Student Conduct.

WHEREAS the University Senate pursuant to rule 3335-1-09 of the Administrative Code is authorized to recommend through the President to the Board of Trustees the adoption of amendments to the Code of Student Conduct as approved by the University Senate; and

WHEREAS the proposed changes in the Code of Student Conduct were approved by the University Senate on January 28, 1989:

AMENDMENTS

3335-25-01 Prohibited conduct.

(A), (B), (C) unchanged.

(D) Dangerous weapons or devices.

Use, storage, or possession of dangerous weapons or devices including, but not limited to, firearms and fireworks unless authorized by an appropriate university official or permitted by a university policy.

Balance unchanged.

3335-25-03 Policies.

Established policies and rights exist to ensure an environment conducive to equal treatment and quality living for all members of the university community. Students violating university policy may be subject to disciplinary action.

(A) through (G) unchanged.

(H) Drug and alcohol policy.

The illegal use, possession, sale, manufacture, or distribution of drugs is prohibited by the Ohio state university. In addition, the misuse of substances which present physical or psychological hazards to individuals is prohibited.

Those choosing to provide, sell, or otherwise permit consumption of alcoholic beverages at their event shall comply with applicable state and local laws and university policies regulating alcoholic beverages.

AMENDMENTS TO THE CODE OF STUDENT CONDUCT (contd)

3335-27-03 Notice of proceedings.

If a hearing is to be held, written notification will be delivered to the last known address of the student, either by certified mail, first class mail, or by hand-delivery, no fewer than seven calendar days prior to the hearing. In residence hall cases, notification of hearings will be placed in student mailboxes or hand delivered no fewer than seven calendar days prior to the hearing. The notification will include the charge, and the date, time, and location of the hearing, the designated hearing officer or panel, a statement of the accused's rights, and information on the hearing procedures. The accused student may waive the notice period, request a postponement for reasonable cause, or request a hearing separate from other accused persons. Request for a postponement or separate hearing must be received by the person sending the notification at least one day before the scheduled hearing.

3335-27-04 Hearing procedures.

Students have a right to fair hearings. Although the procedural requirements are not as formal as those existing in the civil courts of law, to ensure fairness, the following procedures apply and will be included within hearing notices:

- (A) Hearings are restricted to those directly involved or those requested by the accused or hearing officer or panel to attend. The hearing officer may take reasonable measures to assure an orderly hearing, including removal of persons who impede or disrupt proceedings.
- (B) The accused student may have a person present to advise him or her. The adviser may only counsel the student and may not actively participate in the hearing, unless clarification is needed as determined by the hearing officer or panel.
- (C) The accused may submit a written statement, may invite witnesses to attend on the accused's behalf, may ask questions of witnesses called by others, and will be notified of witnesses to be called. The university may present witnesses as well as question those presented by the accused.
- (D) Written statements signed by a witness(es), and verified as being by that witness(es) by the designated hearing officer or coordinator of the panel, may be used if, for good reason, the witness(es) cannot attend the hearing.
- (E) University hearings, unlike proceedings of courts of law, do not require conclusive proof; instead, the greater weight of the evidence is sufficient for the hearing officer or panel to decide if a violation of the code has occurred and to impose a sanction.

3335-27-06 Record and nature of proceedings.

A record consisting of written notes, tape recording, or other method selected by the hearing panel or officer, will be made of all hearings. This record will be available to the accused during the appeal period and can be copied at his or her expense. A written notice of the decision and information regarding appeal procedures will be sent to the accused student. In general, materials relating to a disciplinary action are confidential and may be made available by the designated hearing officer or coordinator of the panel only to those who have a valid need to know, e.g., disciplinary officers, the vice president for academic affairs and provost, and other university officials who have a demonstrated need to know. The policy governing confidentiality and release of records is printed in the quarterly master schedule of classes and available from the office of student life.

AMENDMENTS TO THE CODE OF STUDENT CONDUCT (contd)

3335-27-07 Appeal.

A student found to have violated this code has the right to appeal the original decision. Appeals must be filed within fourteen calendar days from the date of the sanction decision letter. The following guidelines apply:

(A) through (C) unchanged.

(D) A student is allowed active representation by an advisor when making an appeal of proceedings which resulted in suspension or dismissal.

(E) Appeals proceed through the following channels:

(1) In residence halls, decisions of living unit commissions are appealed to the hall director; decisions of the hall directors are appealed to the area coordinator; decisions of area coordinators are appealed to the associate director of residence and dining halls for residence life.

(2) Decisions of hearing officers or panels appointed by the dean of student life are appealed to the dean of student life; decisions of cases heard by the dean of student life are appealed to the vice provost for student affairs.

(3) Decisions of the university court in disciplinary hearings are appealed to the dean of student life.

(4) Decisions of the committee on academic misconduct are appealed to the vice president for academic affairs and provost.

(F) A new hearing by a different hearing officer or panel shall result when the person designated to decide appeals determines that there are substantial new facts that were unavailable at the time of the hearing. The determination of this panel or officer shall in no way be influenced or bound by the result of the original hearing.

3335-29-04 Suspension and dismissal.

(A) Suspension.

Suspension is a sanction by which the student is involuntarily separated from the university for a period not to exceed three full academic quarters following the effective date specified in the sanction letter. Eligibility for reinstatement is restored upon expiration of suspension.

(B) Dismissal.

Dismissal is a sanction by which the student is involuntarily separated from the university for four full quarters or more following the effective date specified in the sanction letter. The dismissed student must apply for reinstatement. Reinstatement of the student at the university after dismissal is not guaranteed.

(C) Unchanged.

AMENDMENTS TO THE CODE OF STUDENT CONDUCT (contd)

3335-29-07 Other sanctions.

Other sanctions that the hearing officer or panel considers appropriate to the student and the conduct violation in question may be imposed. For example, research assignments, community service projects, special workshop participation and/or referral to medical resources or counseling personnel may be assigned as recommended sanctions or as conditions to another sanction. In cases of academic misconduct, a lowered or failing grade may be recommended for the academic coursework. In residence halls, other sanctions may include contract termination or reassignment to another room. Non-residence hall hearing officers or panels may recommend sanctions of this type to the office of residence life.

Failure to meet requirements of any sanction in the time allotted or a repetition of misconduct may result in an extension of the period of sanction or imposition of a more severe sanction.

3335-31-02 Committee on academic misconduct.

- (A) The committee shall investigate or establish procedures for investigation of all reported cases of student academic misconduct and decide upon suitable disciplinary action. However, the committee does not hear cases involving academic misconduct in professional colleges having a published honor code. These colleges shall follow their own codes and procedures which can be obtained in their respective central offices. The committee may, in its discretion, refer cases to the university judicial panel if it determines that the academic misconduct allegation is incidental to some other misconduct.
- (B) "Academic misconduct" is defined as any activity which tends to compromise the academic integrity of the institution, or subvert the educational process. Examples of academic misconduct include, but are not limited to:
- (1) Violation of course rules as contained in the course syllabus or other information provided the student; violation of program regulations as established by departmental committees;
 - (2) Providing or receiving information during quizzes and examinations such as course examinations and general examinations; or providing or using unauthorized assistance in the laboratory, at the computer terminal, or on field work;
 - (3) Submitting plagiarized work for an academic requirement. Plagiarism is the representation of another's work or ideas as one's own; it includes the unacknowledged word for word use and/or paraphrasing of another person's work, and/or the inappropriate, unacknowledged use of another person's ideas;
- (4) through (7) unchanged.
- (C) All cases of suspected misconduct shall be reported to the committee. The committee also shall investigate cases of lax or irregular examination methods and report findings to the vice president for academic affairs and provost. Students have the obligation to report suspected misconduct or irregular or lax examination methods. The committee may impose any code sanction. The committee consists of:
- (1) Fifteen regular faculty members elected by the faculty council for three-year terms; beginning with summer quarter, the election to be held annually so that

AMENDMENTS TO THE CODE OF STUDENT CONDUCT (contd)

five members will retire each year. No university faculty member shall serve more than two consecutive terms;

- (2) Five graduate student members appointed in the summer quarter by the president of the council of graduate students, with the approval of the council of graduate students, for a one-year term beginning with the autumn quarter;
 - (3) Five undergraduate student members appointed in the spring quarter by the president of the undergraduate student government, with the approval of the undergraduate student assembly, for a one-year term beginning with the summer quarter;
 - (4) The dean of student life or designee, without vote; and
 - (5) A coordinator, appointed by the vice president for academic affairs and provost, without vote, and charged with assisting the committee in administrative matters. The coordinator does not participate in the decisions of the committee.
- (D) The committee on academic misconduct establishes panels from its membership with student/faculty ratios at least as great as that of the full committee to conduct hearings and make decisions with the same authority as the full committee on academic misconduct.
- (E) The committee on academic misconduct establishes rules and procedures to conduct hearings, including the definition of a quorum.

(Details of rule 3335-5-487 of the Administrative Code, which defines the committee on academic misconduct, and committee procedures are available from the office of the vice president for academic affairs and provost.)

NOW THEREFORE

BE IT RESOLVED, That the foregoing amendments to the Code of Student Conduct be adopted as recommended by the University Senate.

Upon motion of Amb. Wolf, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

STUDENT AFFAIRS COMMITTEE REPORT

Amb. Wolf:

Mr. Chairman, usually at this moment we have asked the presidents of our student organizations to come forward and give us some observations if they have any that have developed in the last 30 days. Steve Dibert is President of the Interprofessional Council.

STUDENT AFFAIRS COMMITTEE REPORT (contd)

Mr. Steve Sloan:

You can tell I am not Steve Dibert. I am Steve Sloan. Steve is doing surgery this month and wasn't able to attend. I can remember the last time I spoke to you, I think I was more nervous than I am now. I am not going to say that I think things are different now that we have two students of the Board of Trustees. One of the whom is a good friend of mine, Sophia Paige. Sophia and I met last year in the first day of Medical School. We were anatomy partners and we spent many long frustrating and sometimes rewarding hours in the labs.

What I want to do today is to review some of the things that the IPC has done over the last year. Some of the things you know about and some of them I think might be new. First, what we are most happy about is that we were able to work successfully with the Undergraduate and the Graduate Student Governments to bring five student Trustee candidates' names to the Governor. We are very happy about the results, I am particularly happy. As an organization, we are happy to see that a very large percentage of the applicants were actually professional students. We would like to think that part of this was due to the fact that we were able to give an application to every single graduate student who was eligible to apply. We are very happy about that. Another role of IPC is to elect students to University-wide councils so that we can get outside of our professional schools. This year I think our representatives have been more active than they have been in the past in representing our interest, which is what we are particularly interested in. As you may know, one of our concerns has been the ticket priorities. As an undergraduate when you are a freshman you have a certain ranking. When you become a senior your ranking moves up higher. That is not the case for professional students. I don't believe that is the case for graduate students. We were wondering why. Deborah Katz, a law student, led a council that became active in this issue and she learned a lot more about the ticket priorities and situations than she really wanted to. I think we have a better understanding for exactly why professional students don't get priorities, and also why the ticket office really isn't particularly interested in giving us priority. It would mean changing the way things are done now. It would be fairly complicated, but we want it. We now understand the issues and what is involved. Now we want to see some action taken, even though it is going to cause them some hassles.

Another area of active interest, I think for most people, is traffic and parking. I think it is a never ending issue. A representative Naveed Ismail, who is a third year medical student, also learned a lot more about the traffic and parking situation. He recently told us each parking spot cost over \$10,000. We were a little surprised about that. Besides learning a lot, he was able to get some action done. There was one lot that was a "B" lot at one point, which is staff, and that lot was supposed to be a student lot. He was able to get that changed to a student lot. We are pretty happy about that.

The next issue is the proposed tuition increase. After we learned about that, Steve sat at the computer and whipped out a letter to all the professional students which we delivered to them. Basically, we outlined the situation and what the results would be. We asked them to write to the various elected officials to see if we could avoid those complications. I am happy to say that last night I was at a medical student council meeting, and I learned that signatures have been collected. It looks like we are going to be having some action on that, directly from professional students.

STUDENT AFFAIRS COMMITTEE REPORT (contd)

Mr. Steve Sloan: (contd)

Another thing that happened recently, the quilt that was brought here for the AIDS project. We were fortunate enough to have Steve Dibert represent us there and to read 30 names of the AIDS victims.

There are two other issues that we are currently interested in. The first one is the bookstore pricing. I think it is sort of a tradition that text books cost a lot of money and students complain about the money. In particular, the professional schools have a situation, at least in the Medical School, where there is only one source. The Medical School has a monopoly. If I was in their situation, I would do what they do. They charge a lot of money. What we want is to learn about the problems. We had our representative to the Bookstore Council--I don't know exactly what that is -- look into it. He has talked to them a little bit. Steve has talked to them. Unfortunately, we have had different stories given. Sometimes they would tell us, "Well, we just take the recommended price that the distributors tell us." Other times they say, "No, we just mark it up one third." We are not very happy with that situation. We don't feel we are getting a complete accounting of what is going on. Some of the things we are interested in doing are comparing the prices at other student bookstores across the country, and also to really find out what the policy is. At one point we believe the situation was that bookstores needed a certain profit. One of the easy ways to do that was to go to their monopoly source, which was the med school bookstore and just boost the prices. I recently paid \$120.00 for a textbook. The paper wasn't even good quality. It is upsetting. We are going to try to learn about that issue, and see if there really is a problem.

The last issue it is sort of our newest issue -- is student insurance. Recently, as a second-year medical student we had lectures on health care financing and insurance. Just in passing, one of our professors called our student insurance, non-insurance. Not knowing anything about insurance, I didn't know why he said that. I of course became concerned, and I want to know why he thinks it is non-insurance, and to find out if we really aren't covering our students adequately. I know our student insurance prices are very inexpensive, and if we raise those prices we may lose students applying for it. Do we really have adequate coverage for the things that are necessary? Right now I know a little bit about it. There is a \$20,000 stop off. If a student were to have a serious accident or illness, which would easily cost over \$25,000, they would not be covered. Twenty five thousand dollars, I think might be inadequate, although I am not sure. That is one of the things we will be looking into on the insurance.

Finally, the last topic is just the IPC itself. I have only been involved for about a year, and Steve has been involved for about 2 years. He continuously tells me that we were a very weak, unorganized organization. I can only believe him because I do not know. Now I know we have an office, we have a telephone, we have a budget, and we are very happy about that. At our last meeting, we had well over 80% attendance. Our elections are coming up, and I am hoping that Steve will stay on, and we will have some continued leadership. Thank you, very much. Also, about the insurance issue -- if any of you have advice or could tell me where to get more information, please let me know.

STUDENT AFFAIRS COMMITTEE REPORT (contd)

Mr. Scott:

You can stop in Archer House and make an appointment to see me.

Amb. Wolf:

The Council of Graduate Students.

Mr. Roger Musgrave:

The first thing CGS would like to accomplish with its report is to congratulate Ms. Davis, and Ms. Paige on their selections to serve with you folks, and assure them, in your presence, of our confidence in their ability and motivation to serve all of the students on campus.

The Council's primary spring activity is the Graduate Research Forum. It is scheduled a week from tomorrow, April 15 from 8:30 a.m. until 2:00 p.m. in the lower level of University Hall. It is intended primarily to provide a means for graduate students to have the experience of presenting their work in a setting that is much like the professional conferences they will attend down the road in their careers. We hope this is a kinder and gentler setting than they will face down the road. We are able to offer the paper and presenters chosen as outstanding in each of the ten graduate school areas a \$500.00 cash prize. We are sure that incentive helps us get a little bit better participation, but it is primarily intended to provide the opportunity to share research and gain that experience for our graduate students. We had primarily positive feedback. We know that some of the visiting faculty members we brought in as guest judges told us they intend to do everything they can to see something like this happen on their own campuses. We are relatively proud of it, and we appreciate the support the Graduate School and the University has given us in being able to do this every year.

Our elections will be held April 30. Just real briefly, in the past we have had non-contested elections for our officers' positions. We are very happy that this year both the President and Vice President offices have more than one candidate. We'd like to think that is an indication that folks are becoming more involved, which is not to say that we think we have got anywhere the problem of apathy that a lot of campuses have. But we think it can be nothing but good for the group. We would like to thank Dean Koenigsnecht for getting us a quick answer on whether or not the graduate school would fund the Vice President position next year with a graduate associateship. The answer was yes, and we appreciate it because we know his headaches with projecting his own budgets. It makes it a lot easier for us to know that we are not looking for a volunteer to put in the hours.

The teaching associate forum series is continuing. We just had one last night. It is a joint effort by the Center for Teaching Excellence, the Council of Graduate Students, the Graduate School, and the Undergraduate Student Government meant as a forum for folks to discuss problems that TA's face. They are kind of unique problems that they never have run into before, and they need to learn how to handle. Attendance continues to increase, we continue to get good press on it, and we think it helps both the graduate students that are trying to become better teachers, and the undergraduates who have to put up with the TA's who are trying to become better teachers.

STUDENT AFFAIRS COMMITTEE REPORT (contd)

Mr. Musgrave: (contd)

The National Association of Graduate and Professional Students, which has the interesting acronym of NAGS, which may become an even more interesting acronym if it continues to grow and become an advocacy group for graduate students. At any rate, we had the national conference in Miami, from March 2-5. Representing Ohio State were: our four officers -- myself, David Doerfert, Benetta Lucius, and Luke Evans; last year's NAGS regional political coordinator, Julie Franklin, who is a Ph.D student in physics; and Jeffery Leptak, a Ph.D student in Education, who was our regional conference coordinator. It wasn't just a conference, it was an adventure because we were booked on the conference airline, which happened to be Eastern, and we happened to be booked out of Miami the day the strike started. We learned a lot in Miami. For those of you who don't know, NAGS was founded in Columbus right here on this Campus in 1986 by five TA's from different schools including Ohio State who were here for a TA training conference. The organization was created at a table in the Varsity Club on Lane Avenue. What is fascinating about that is in those three years the group has grown from those five people to a group representing 89 universities, now representing 280,000 graduate students. That is incredible. I can't think of any professional organization in one of the disciplines that has ever had a growth like that. We are real confident that it is going to be a very real, very viable organization. We now have our bylaws and constitution in place which has allowed us to apply with the IRS for the non-profit status that we will need to generate decent funding to do some of the programming we want to do.

What we learned at this year's conference is that in many regards graduate students at Ohio State are relatively well off. We heard a lot of comment from people elsewhere about things we frankly take for granted. People don't have graduate student housing, evening classes that they can work around their full-time jobs, and access to a student comprehensive health center. While we have complaints about our health center, we have one. I guess what our delegation wants to say is thank you to this University for providing a lot of things, and for being sensitive in a lot of cases. We also discussed items that we find ourselves lacking, as are many other student groups. Adequate day care facilities and health insurance provisions are becoming emergent topics of discussions. Funding issues are also important everywhere. We talked with folks from Michigan where TA's have been unionized for years. We talked with folks from Michigan State where they just organized last year. In essence, the conference was primarily an information exchange. The last thing about the conference, there was a resolution past in reference to Senate Bill 3 and House resolution 660, which for those of you who don't know, would tie eligibility for educational assistance to, and how is this for a phase, "mandatory voluntary service." I will read the resolution to you. We will have more to say about it later.

WHEREAS the National Association of Graduate Professional Students firmly support the right of all people to an education;

WHEREAS NAGS supports the expansion of voluntary community service programs;

WHEREAS NAGS holds that education is a right and not a privilege;

WHEREAS all of these ideas are violated by SB 3 and HR 660 because such bills require civilian or military service in return for providing educational benefits:

STUDENT AFFAIRS COMMITTEE REPORT (contd)

Mr. Musgrave: (contd)

BE IT RESOLVED, That the National Association of Graduate Professional Students calls for the rejection of Senate Bill 3 and HR 660 and any other bills that would require civilian or military service in return for providing educational benefits.

To close let me say that one of the charges of the Council of Graduate Students is also to make efforts to improve the social environment for graduate students at Ohio State. We tend often to almost ignore that and focus on the professional and academic issues. We are going to make an attempt to have the first, perhaps annual, graduate spring picnic. The only details we have are May 21 on the south lawn and patio of Drake Union. You are certainly more than welcome and I will let you know if there will be free food. Are there any questions?

Amb. Wolf:

Thank you, Roger. Athena Yiamouyiannis is President of the Undergraduate Student Government.

Ms. Athena Yiamouyiannis:

Mr. President, Mr. Chairman, Members of the Board, good afternoon. First of all, USG would like to welcome our two new student Trustees. After years of hard work it has finally become a reality, and Laurel A. Davis and Sophia L. Paige, USG would like to present these flowers to each of you in recognition of your appointment. We look forward to working with you throughout your term as members of the Board.

I would like to begin my report of the Undergraduate Student Government activities by discussing the USG rally on the Oval which was at noon yesterday. The rally was to protest the proposed tuition increase. A mock funeral was held on the Oval.

The effigy was placed in a coffin and the funeral procession march went from the middle of the Oval to the William Oxley statue. At that time, the coffin was set down and Vice President Scott Mounts gave the Eulogy. The event symbolized the implication that higher tuition is the death of higher education. We had an excellent turnout and we had great media coverage. Channel 4, Channel 6, and Channel 10 were there, and we also got on the front page of the local section of the Columbus Dispatch. They had a picture of students carrying the coffin and also other students holding signs up protesting the proposed tuition increase.

In addition, we had a table set up on the Oval throughout the day where students could come up and sign letters to their senators protesting the tuition increase. In addition, we had a petition for Governor Celeste where students could also voice their opinion. And also, for you, as members of the Board of Trustees, these are the letters that the students wrote yesterday afternoon protesting the tuition increase.

I would hope that you will take this into consideration when you are making a decision on a tuition increase for next year. As students in student government and as students of the University, we have been trying our hardest to get the State Senators -- and before the State Representatives -- to listen to us and to help us in funding higher education.

STUDENT AFFAIRS COMMITTEE REPORT (contd)

Ms. Yiamouyiannis: (contd)

In conjunction with our lobbying efforts, USG is working with the Ohio Students Association. This is a group made up of student leaders from around the State. We are hosting a luncheon downtown on this coming Monday, and so far we have 25 State Senators or their aids that will be attending in addition to the University presidents and the OSA student leaders. What we are doing is appealing to the Senate for additional funds and stressing, again, the importance of more funding for higher education.

In other activities, USG has been involved with the Names Project Quilt. In conjunction with other student organizations, we made up buttons that said "Remember the Names Project Quilt." We distributed those to increase awareness and so that we could get more students and community members out to see the AIDS quilt. We also had volunteers that helped out at the project, as well.

In other USG activities, Matt Hecmanczuk, who is the USG Director of Elections, has been working with the student election committee to organize the USG elections. They have been working also on hosting the four debates, there is still one to come. Our elections will be held on April 11, 12, and 13. The new administration will be taking over during the third week of May. That concludes my report.

Amb. Wolf:

Thank you very much, Athena. Mr. Chairman, that concludes the presentation of the Student Affairs Committee.

(Several hundred signed letters were presented, the format of which is reproduced in Appendix XXXII, page 1023.)

--0--

AGRICULTURAL AFFAIRS COMMITTEE REPORT

Mr. Teaford:

As I think you know, the Director of Agriculture sits as a member on the Committee on Agriculture and his Assistant Director, Tony Logan, was with us today. He began the meeting by announcing that the Governor has directed a \$100,000 grant toward the Farm Enhancement Program. Which I might say is only one-fifth of what he owes us, but I think we will get that. This is coming out of a fund that is controlled by the department and Farmers Home Administration and the moneys will be used for low income farmers which Shirley assures me will not be a difficult task to find.

The bulk of our meeting was taken up with the report by David Hansen with regard to the international activities in the College of Agriculture. Those programs began at the time of land lease-back in the early '50's. And at that time, Ohio State concentrated almost all of their international efforts in Brazil and in India. Those programs nearly died out in the '60's and '70's. But in the '80's have been resumed, I think in large part for the same reason that they were started, because of requests by the United States Government to us.

AGRICULTURAL AFFAIRS COMMITTEE REPORT (contd)

Mr. Teaford: (contd)

Needless to say there are -- other than the obvious humanitarian reasons for being involved there, selfish reasons for the University to be involved in that kind of activity as well, because of the increased emphasis on international trade and general international enrollment. It is also interesting to -- we were also told that the Department of Agricultural Economics has in the past twenty-five years been involved in international finance work in some thirty-eight countries around the world.

Currently, there is some \$3 million in sponsored grants. They are principally concentrated in Uganda, Dominican Republic, and Burma (which I guess is temporarily suspended because of their current difficulties.) We also had a discussion on what motivates us to go for grants. And what does not do it is just simply chasing contract money. We will always seek grants in the areas where we are particularly strong. Because obviously that enhances the whole educational mission. Also, we like to stay with the same countries, over and over again. I think once you have learned the cultural biases and differences it is useful to continue that expertise.

We also briefly heard about an agricultural intern program which involves a great number of students particularly in European countries coming here and also our students going abroad. We also received a report that showed that there are some 61 countries represented among the students in the College of Agriculture. Less we think that is a small insular program.

Finally, a kind of interesting note, one of the reasons why these international programs have very greatly benefitted Ohio and our nation, has to do with the fact that most all of the crops that were raised in the United States are not indigenous to this country. From time to time it is necessary in order to get new species or new kinds of crops, we must get germ plasm from species abroad. It has been possible to do this because of the international nature of these programs. So it is a very important part of sustaining our own agriculture.

Mrs. Bowser:

I am so proud of my city friend. He is doing very well. You have learned a lot.

Mr. Teaford:

I have indeed learned a lot. Mr. Chairman, that completes my report.

(See Appendix XXXIII for complete text of The Ohio State University College of Agriculture International Programs Update, page 1025.)

--0--

FISCAL AFFAIRS COMMITTEE REPORT

Mr. Kessler:

The Fiscal Affairs Committee began by hearing a report on the capital project procedures from the program of requirements through design and construction. I'm certain that all of us will agree that while these state procedures are comprehensive, they require a significant amount of staff effort as well as patience on the part of our people at this University.

We also had a discussion of the various issues which will impact the budget guidelines and recommendations for Fiscal Year 1989-90 which are scheduled to be presented to this Board at our May meeting.

In addition to this report, the Committee is recommending the following resolutions:

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS

Resolution No. 89-91

Synopsis: The Fiscal Affairs Committee recommended the approval of the following reports on contracts, grants, and gifts and the summaries for January and February 1989.

WHEREAS monies are solicited and received on behalf of the University from governmental, industrial, other agencies, alumni, and various individuals in support of research, instructional activities, and service; and

WHEREAS such gifts and grants are received through The Ohio State University Research Foundation, the Engineering Experiment Station of The Ohio State University, The Ohio State University Development Fund, and The Ohio State University Foundation:

NOW THEREFORE

BE IT RESOLVED, That the research agreement between The Ohio State University and The Ohio State University Research Foundation for the contracts and grants reported herein, and the acceptance of the reports from the Engineering Experiment Station, The Ohio State University Development Fund, and The Ohio State University Foundation during the months of January and February 1989 be approved.

Upon motion of Mr. Kessler, seconded by Mr. Teaford, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

REPORT OF RESEARCH CONTRACTS, GRANTS AND GIFTS (contd)

SUMMARY FOR JANUARY 1989

Background

Source	No. of Projects	Support Level
The Ohio State University Research Foundation	116	\$10,524,497.61

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$164,319.00 - National Science Foundation, Washington, D.C., Finite Deformation Hygrothermomechanical Response Evaluation of Geologic Media, Department of Engineering Mechanics (S. H. Advani and J. K. Lee), 1 January 1989 through 31 December 1990. (Project 767266 - New)

\$164,000.00 - National Science Foundation, Washington, D.C., Kinetics, Spectroscopy and Mechanistic Studies of Carbenes, Biradicals and Radicals, Department of Chemistry (M. S. Platz), 1 February 1989 through 31 January 1990. (Project 767259 - New)

\$157,666.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Pre- and Post-Operative T-Cell Function, Department of Surgery (R. M. Ferguson and C. G. Orosz), 1 February 1989 through 31 January 1990. (Project 766505 - Continuation)

\$156,269.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Immunoprevention of Human T-Cell Leukemia Virus-1 Infection, Department of Veterinary Pathobiology (R. G. Olson and L. E. Mathes), 1 December 1988 through 30 November 1989. (Project 765057 - Continuation)

\$153,967.00 - Department of the Air Force, Air Force Systems Command, Wright-Patterson Air Force Base, Ohio, Thermodynamic and Diffusivity Measurements in Potential Ultra-High Temperature Composite Materials, Department of Materials Science and Engineering (J. D. Cawley and G. R. St. Pierre), 1 January 1989 through 30 September 1989. (Project 766346 - Continuation)

\$144,287.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, B[a]P-Metabolism and Modification of DNA in Human Skin Xenograft, Department of Physiological Chemistry and Comprehensive Cancer Center (G. E. Milo), 1 January 1989 through 31 December 1989. (Project 766549 - Continuation)

\$143,388.00 - Department of the Navy, Office of Naval Research, Arlington, Virginia, Interdisciplinary Research on Wear of Materials, Department of Materials Science and Engineering (D. A. Rigney), 1 October 1988 through 30 September 1989. (Project 767230 - New)

\$141,386.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Hypertension and Congestive Heart Failure: Genetic Model, Department of Food Science and Nutrition - OARDC and Department of Food Science and Nutrition (S. A. McCune), 1 December 1988 through 30 November 1989. (Project 766383 - Continuation)

\$125,000.00 - Department of the Air Force, Air Force Systems Command, Wright-Patterson Air Force Base, Ohio, Optical Scattering Studies, Electroscience Laboratory, Department of Electrical Engineering (S. A. Collins, Jr.), 1 October 1988 through 30 September 1989. (Project 764394 - Continuation)

\$115,000.00 - Department of Energy, Argonne, Illinois, Hydrological and Geochemical Response and Recovery in Disturbed Arctic Ecosystems, Byrd Polar Research Center and Department of Agronomy (K. R. Everett), 1 January 1989 through 31 December 1989. (Project 764231 - Continuation)

April 7, 1989 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$108,000.00 - National Science Foundation, Washington, D.C., Structure and Dynamic Behavior of Selected Organolithium Compounds, Department of Chemistry (G. A. Fraenkel), 1 January 1989 through 31 December 1989. (Project 767225 - New)

\$104,342.00 - Department of Health and Human Services, Public Health Service, Alcohol, Drug Abuse and Mental Health Administration, Rockville, Maryland, Ethanol Disturbance of Gastrointestinal Nervous System, Department of Physiology (J. D. Wood), 1 February 1989 through 31 January 1990. (Project 765885 - Continuation)

\$96,239.00 - National Aeronautics and Space Administration, Lewis Research Center, Cleveland, Ohio, Engineering Calculations for Communications Satellite Systems Planning, ElectroScience Laboratory, Department of Electrical Engineering (E. K. Walton) and Department of Industrial and Systems Engineering (C. H. Reilly and C. A. Mount-Campbell), 1 January 1989 through 30 September 1989. (Project 762552 - Continuation)

\$93,420.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Stromal Defects in Retrovirus-Induced Myelosuppression, Department of Veterinary Pathobiology (G. J. Kociba), 20 December 1988 through 30 November 1989. (Project 767232 - New)

\$92,000.00 - Department of the Air Force, Air Force Systems Command, Wright-Patterson Air Force Base, Ohio, Controller Design Approaches and Evaluations, Department of Electrical Engineering (U. Ozguner and S. Yurkovich), 1 December 1988 through 30 September 1989. (Project 766464 - Continuation)

\$88,375.00 - Department of the Air Force, Air Force Systems Command, Bolling Air Force Base, D.C., Demodulation Processes in Auditory Perception, Division of Speech and Hearing Science (L. Feth), 1 December 1988 through 30 November 1989. (Project 767249 - New)

\$85,061.00 - Department of Health and Human Services, Public Health Service, Alcohol, Drug Abuse and Mental Health Administration, Rockville, Maryland, Fentfluramine and Methylphenidate in Mental Retardation, Nisonger Center (M. G. Aman), 1 February 1989 through 31 January 1990. (Project 767185 - New)

\$80,080.00 - Department of Agriculture, Science and Education, Washington, D.C., Recovery of Nitrogenase from Oxygen Inactivation, Department of Microbiology (F. R. Tabita), 15 January 1989 through 31 August 1989. (Project 767274 - New)

\$78,921.00 - National Science Foundation, Washington, D.C., Computer Analysis and Simulation Laboratories for Physics Majors, Department of Physics (R. D. Knight), 1 January 1989 through 31 December 1989. (Project 767242 - New)

\$74,254.00 - National Science Foundation, Washington, D.C., Computer Graphics Laboratory for Teaching Geological Science, Department of Geology and Mineralogy (J. J. Daniels and T. J. Wilson), 15 January 1989 through 31 December 1990. (Project 767262 - New)

\$65,000.00 - Department of the Navy, Office of Naval Research, Arlington, Virginia, Studies of Nonlinear Dynamics of Fluid Systems, Department of Physics (C. D. Andereck), 1 December 1988 through 30 November 1989. (Project 767269 - Continuation)

April 7, 1989 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$64,709.00 - National Aeronautics and Space Administration, Lewis Research Center, Cleveland, Ohio, Penetration of Jets into a Turbulent Supersonic Airstream, Department of Aeronautical and Astronautical Engineering (J. D. Lee), 20 February 1989 through 19 February 1990. (Project 767276 - New)

\$64,396.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Intestinal Bypass Surgery in Hibernation, Department of Physiology (H. J. Cooke), 1 January 1989 through 31 December 1989. (Project 765844 - Continuation)

\$56,362.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Targeting of Organellar Protein Synthesis Factors, Department of Biochemistry (C. A. Breitenberger), 1 February 1989 through 31 January 1990. (Project 766576 - Continuation)

\$56,000.00 - National Science Foundation, Washington, D.C., Anodic Oxidation Studies and Their Applications to Organic Synthesis, Department of Chemistry (J. S. Swenton), 1 July 1989 through 30 June 1990. (Project 766494 - Continuation)

\$54,303.00 - National Science Foundation, Washington, D.C., Honey Bee Division of Labor: A Behavioral Genetic Analysis, Department of Entomology (R. E. Page, Jr.), 1 March 1989 through 28 February 1990. (Project 766637 - Continuation)

\$51,786.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Mechanisms of Mercury Toxicity and Carcinogenicity in Human Cells, Department of Microbiology and Immunology (M. V. Williams), 1 February 1989 through 31 January 1990. (Project 766606 - Continuation)

\$48,091.00 - National Aeronautics and Space Administration, Langley Research Center, Hampton, Virginia, Research on Analysis of Large Aperture Reflector Antennas, ElectroScience Laboratory, Department of Electrical Engineering (R. Rudduck), 1 November 1988 through 31 August 1989. (Project 763724 - Continuation)

\$47,595.00 - National Foundation of Arts and Humanities, National Endowment for the Humanities, Washington, D.C., "Columbus in America" -- An Art Exhibition, Office of International Affairs (C. Zacher), 1 January 1989 through 30 June 1989. (Project 767255 - New)

\$46,315.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Argon Laser Trabeculoplasty Glaucoma Trial, Department of Ophthalmology (P. A. Weber), 22 February 1989 through 21 February 1990. (Project 764587 - Continuation)

\$38,893.00 - Department of the Army, Army Corps of Engineers, Vicksburg, Mississippi, Determination of Residual Stress and Effects in Thick Section Weldments for Hydraulic Structures, Department of Welding Engineering (C. L. Tsai), 12 December 1988 through 11 December 1989. (Project 767229 - New)

April 7, 1989 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$33,248.00 - Department of Health and Human Services, Public Health Service, Centers for Disease Control, Atlanta, Georgia, Quantitative Measures of Wrist Motions, Department of Industrial and Systems Engineering (W. S. Marras), 1 January 1989 through 31 December 1989. (Project 767212 - New)

\$30,000.00 - National Aeronautics and Space Administration, Lewis Research Center, Cleveland, Ohio, Experimental Study of Organized Structures in a Supersonic Shear Layer, Department of Mechanical Engineering (M. Samimy), 23 February 1989 through 22 February 1990. (Project 765794 - Continuation)

\$28,800.00 - National Science Foundation, Washington, D.C., Application of Measure Theory to Probability and Banach Spaces, Department of Mathematics (M. Talagrand), 1 December 1989 through 30 November 1990. (Project 766743 - Continuation)

\$25,925.00 - Department of the Navy, Naval Material Command, Bethesda, Maryland, Vortex Motion Past a Cavity with Elastic Obstructions, Department of Mechanical Engineering (A. T. Conlisk), 1 May 1988 through 6 April 1989. (Project 765323 - Continuation)

\$25,000.00 - National Science Foundation, Washington, D.C., Presidential Young Investigator Award: Very Large Scale Integration Design of Electronic Circuits, Department of Electrical Engineering (M. I. El-Naggar), 1 July 1989 through 30 June 1990. (Project 766995 - Continuation)

\$22,267.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Biotin Enzymes in Sudden Infant Death Syndrome Tissue, Department of Food Science and Nutrition - OARDC and Department of Food Science and Nutrition (J. B. Allred), 1 February 1989 through 31 January 1990. (Project 766568 - Continuation)

\$21,262.00 - Department of the Air Force, Air Force Systems Command, Wright-Patterson Air Force Base, Ohio, Modeling Cumulative Damage Processes in Composite Laminates, Department of Civil Engineering (R. S. Sandhu), 1 October 1988 through 30 June 1989. (Project 764779 - Continuation)

\$21,000.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Regulation of Splicing of Drosophila MLC-ALK Pre-mRNA, Department of Molecular Genetics (S. Falkenthal and B. G. Leicht), 1 February 1989 through 31 January 1990. (Project 766565 - Continuation)

\$15,350.00 - Department of Health and Human Services, Public Health Service, National Institutes of Health, Bethesda, Maryland, Association Between Orthognathic Surgery and Sleep Apnea, Orthodontics (A. W. Walters), 1 January 1989 through 31 December 1989. (Project 767261 - New)

\$10,000.00 - Department of the Air Force, Air Force Systems Command, Hanscom Air Force Base, Massachusetts, Spectroscopy of Molecular Ions and Their Clusters, Department of Chemistry (T. A. Miller), 1 October 1988 through 11 January 1989. (Project 765285 - Continuation)

April 7, 1989 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Federal Research Contracts/Grants (contd)

\$10,000.00 - Department of Agriculture, Soil Conservation Service, Columbus, Ohio, Socio-Economic Factors Affecting the Adoption of Soil Erosion Control Practices, Department of Agricultural Economics and Rural Sociology - OARDC and Department of Agricultural Economics and Rural Sociology (T. L. Napier), 30 September 1987 through 29 September 1989. (Project 766387 - Continuation)

\$2,500.00 - National Science Foundation, Washington, D.C., Catalytic Site of Calmodulin-Dependent Protein Kinases, Department of Chemistry (M. M. King), 1 February 1989 through 31 January 1991. (Project 767220 - Continuation)

TOTAL - FEDERAL AWARDS \$6,592,275.00

State of Ohio Research Contracts/Grants

\$424,774.00 - State of Ohio, Department of Human Services, Columbus, Ohio, Ohio Adult Services Training Program, College of Social Work (R. E. Boettcher), 1 January 1989 through 30 June 1990. (Project 767200 - New)

\$53,000.00 - State of Ohio, Department of Development, Columbus, Ohio, Support for the Ohio Technology Transfer Organization (OTTO), Department of Mechanical Engineering and Academic Affairs Administration (R. E. Bailey), 1 July 1988 through 30 June 1989. (Project 766925 - Continuation)

\$11,600.00 - State of Ohio, Department of Education, Columbus, Ohio, Ohio Entrepreneurs Research Project -- Year II, Center on Education and Training for Employment (R. D. Ryan), 1 July 1988 through 30 June 1989. (Project 766953 - Continuation)

\$5,000.00 - State of Ohio, Department of Human Services, Columbus, Ohio, Positive Parenting, Cooperative Extension Field Operations (R. Culbertson), 1 April 1988 through 31 March 1989. (Project 767237 - New)

\$3,761.00 - Ohio Arts Council/Ohio Humanities Council Joint Program in the Arts and Humanities, Columbus, Ohio, Images of China: A Cultural Journey, Continuing Education Administration (J. L. Kramer), 1 January 1989 through 30 September 1989. (Project 767253 - New)

\$3,284.00 - State of Ohio, Ohio Humanities Council, Columbus, Ohio, Archaeology in a Greek Sanctuary: Isthmia Excavations, 1967-1989, Department of History (T. E. Gregory), 3 December 1988 through 30 April 1989. (Project 767263 - New)

\$2,000.00 - State of Ohio, Ohio Arts Council, Columbus, Ohio, Art and the Emperor: A Public Interdisciplinary Symposium on the Arts of China, Department of History of Art (J. Andrews and J. Huntington) and Office of International Affairs (C. M. Chen), 1 December 1988 through 30 June 1989. (Project 767270 - New)

\$1,000.00 - State of Ohio, Ohio Humanities Council, Columbus, Ohio, Art and the Emperor: A Public Interdisciplinary Symposium on the Arts of China, Department of History of Art (J. Andrews and J. Huntington) and Office of International Affairs (C. M. Chen), 3 December 1988 through 30 June 1989. (Project 767257 - New)

April 7, 1989 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

State of Ohio Research Contracts/Grants (contd)

\$962.00 - State of Ohio, Ohio Humanities Council, Columbus, Ohio, Adrienne Kennedy Workshops, Department of Theatre (A. L. Woods), 28 November 1988 through 15 February 1989. (Project 767224 - New)

TOTAL - STATE OF OHIO AWARDS \$ 505,381.00

Industrial Research Contracts/Grants

\$880,146.00 - Abt Associates, Inc., Cambridge, Massachusetts, Evaluation of Transitions to Independence, Center on Education and Training for Employment (R. D. Ryan), 13 October 1988 through 1 March 1993. (Project 767267 - New)

\$388,158.00 - General Electric Company, Louisville, Kentucky, Facilitating Training for the GE/MABE Leiser Plant in San Luis Potosi, Mexico, Center on Education and Training for Employment (R. D. Ryan), 1 January 1989 through 30 June 1990. (Project 767250 - New)

\$150,000.00 - Cargill, Inc., Minneapolis, Minnesota, New Carbohydrate-Based Polymers, Department of Chemistry (M. R. Callstrom), 1 February 1989 through 30 September 1991. (Project 767268 - New)

\$128,860.00 - Martin Marietta Corporation, Oak Ridge, Tennessee, Pack Cementation Coating of Iron-Based Alloys, Department of Materials Science and Engineering (R. A. Rapp), 1 December 1988 through 31 October 1989. (Project 766509 - Continuation)

\$123,000.00 - Martin Marietta Corporation, Oak Ridge, Tennessee, Weld Imaging System for Control of Laser and Electron Beam Welding, Department of Welding Engineering (R. W. Richardson), 1 October 1988 through 30 September 1989. (Project 766726 - Continuation)

\$105,000.00 - Ross Laboratories, Columbus, Ohio, Maximizing Yield of Specific Antibody in Mammary Secretion of Lactating Dairy Cows, Department of Dairy Science - OARDC (K. L. Smith), 1 January 1989 through 31 December 1989. (Project 765238 - Continuation)

\$96,000.00 - Pfizer, Inc., Groton, Connecticut, A Randomized Multicenter Study of the Efficacy, Safety and Toleration of Fluconazole or Clotrimazole Troches in the Treatment of Patients with Oropharyngeal Candidiasis in Association with Acquired Immunodeficiency Syndrome, Department of Internal Medicine (S. L. Koletar), 1 November 1988 through 31 October 1989. (Project 767239 - New)

\$91,569.00 - Calbiochem Corporation, La Jolla, California, Overproduction of Daunomycin, Department of Microbiology (W. R. Strohl), 1 January 1989 through 31 December 1989. (Project 767236 - New)

\$74,825.00 - TRW, San Diego, California, Multifunction Antenna Study, ElectroScience Laboratory, Department of Electrical Engineering (B. A. Munk), 2 July 1988 through 30 June 1989. (Project 765410 - Continuation)

\$66,516.00 - CIBA-GEIGY Corporation, Summit, New Jersey, Single Oral Dose Safety Study of CGS-13429A in Volunteers, Department of Pharmacology (N. Gerber), 15 October 1988 through 14 April 1989. (Project 765696 - Continuation)

April 7, 1989 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Industrial Research Contracts/Grants (contd)

\$59,197.00 - Pfizer, Inc., Groton, Connecticut, Phase I Study to Determine the Difference Between Urine Concentrations of CP-73,850 at Steady State and the Urine Solubility of CP-73,850 in Healthy Volunteers, Department of Pharmacology (N. Gerber), 1 August 1988 through 14 September 1988. (Project 765696 - Continuation)

\$53,687.00 - Marion Laboratories, Inc., Kansas City, Missouri, Therapeutic Trials of Campylobacter pylori Gastritis, Department of Veterinary Pathobiology (G. S. Krakowka), 1 May 1988 through 30 April 1990. (Project 766744 - Continuation)

\$50,662.00 - Riker Laboratories, Inc., St. Paul, Minnesota, Open-Label Safety and Efficacy Study of Flecainide Acetate in the Treatment of Supraventricular Arrhythmias, Department of Internal Medicine (S. F. Schaal, S. D. Nelson and C. Love), 1 January 1989 through 13 December 1989. (Project 767247 - New)

\$49,975.00 - Astra Alab AB, Sodertalje, Sweden, Novel Drug Delivery Systems, College of Pharmacy (S. G. Frank), 1 January 1989 through 31 December 1989. (Project 762165 - Continuation)

\$44,902.00 - Pfizer, Inc., Groton, Connecticut, Azithromycin in the Treatment of Acute Lower Respiratory Tract Infections -- A Multicenter, Third Party, Blinded Trial Employing Ceclor as a Comparative Agent, University Health Service (D. I. Charles), 1 October 1988 through 30 September 1989. (Project 767256 - New)

\$20,000.00 - Universal Energy Systems, Inc., Dayton, Ohio, Knowledge Development for the Rule-Based Process Automation of Resin Transfer Molding, Department of Chemical Engineering (L. J. Lee), 1 January 1989 through 15 December 1989. (Project 767240 - New)

\$19,966.00 - Universal Energy Systems, Inc., Dayton, Ohio, Modeling Low Velocity Impact of Composites Using a Discrete Laminate Theory, Department of Civil Engineering (W. E. Wolfe), 1 January 1989 through 31 December 1989. (Project 767235 - New)

\$15,128.00 - Honda of America Manufacturing, Inc., Marysville, Ohio, Enhancing the Japanese Children's Acculturation Process, Department of Educational Studies: Humanities, Science, Technological and Vocational (K. Samimy), 1 January 1989 through 31 December 1989. (Project 767264 - New)

\$15,015.00 - Ross Laboratories, Columbus, Ohio, Determination of the Mechanism of Deposit Formation During UHT Treatment of Milk-Based Infant Formula, Department of Food Science and Nutrition - OARDC and Department of Food Science and Nutrition (M. E. Mangino), 21 October 1988 through 31 December 1989. (Project 767246 - New)

\$15,000.00 - Freightliner Corporation, Charlotte, North Carolina, The Conduct of Focused Research and the Consequent Development of a Conceptual Cab Interior System for an Advanced Class 8 Truck, Department of Industrial Design (R. F. Butter), 1 July 1988 through 30 June 1989. (Project 766275 - Continuation)

\$8,623.00 - Honda of America Manufacturing, Inc., Marysville, Ohio, Basic Skill Requirements of Honda Production Associates, College of Education - Administration (J. J. Buffer), 5 December 1988 through 31 March 1989. (Project 767233 - New)

April 7, 1989 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY RESEARCH FOUNDATION (contd)

Industrial Research Contracts/Grants (contd)

\$8,274.00 - The Upjohn Company, Kalamazoo, Michigan, Evaluation of Insect Cell Lines for Gene Expression, Department of Entomology (W. F. Hink), 17 January 1989 through 16 January 1992. (Project 767254 - New)

\$4,876.30 - Bausch and Lomb, Rochester, New York, Silicone Lens Study, College of Optometry (J. T. Barr), 1 November 1988 through 28 February 1990. (Project 767245 - New)

\$2,420.00 - Abbott Laboratories, Abbott Park, Illinois, A Comparative Study of Polymer Coated Erythromycin Versus Doxycycline in the Treatment of *Chlamydia trachomatis* Genital Infections, College of Pharmacy (J. A. Visconti) and University Health Service (D. I. Charles), 27 January 1988 through 26 January 1990. (Project 766570 - Continuation)

\$900.00 - Ohio Ground Water Consultants, Inc., Columbus, Ohio, Pollen Analysis, Byrd Polar Research Center (D. H. Elliot), 7 December 1988 through 31 March 1989. (Project 767271 - New)

Equipment/Computer Software - Digital Equipment Corporation, Hudson, Massachusetts, External Research Program, Department of Linguistics (M. E. Beckman), 1 October 1988 through 30 September 1989. (Project 767231 - New) (Approximate Dollar Value - \$37,500)

Equipment - Motorola, Inc., Phoenix, Arizona, Development of a Fast Parallel Processing Function for the Scanning Laser Imaging System, College of Pharmacy (J. M. Jagadeesh) and Comprehensive Cancer Center (L. D. Tomei), 1 August 1988 through 30 June 1989. (Project 767252 - New) (Approximate Dollar Value - \$6,750)

TOTAL - INDUSTRIAL AWARDS **\$2,472,699.30**

Other Non-Federal Research Contracts/Grants

\$182,759.06 - Indonesian Government, Jakarta, Indonesia, Partial Management Support Plan, College of Education - Administration (J. J. Buffer), 1 May 1988 through 31 December 1990. (Project 767036 - New)
