Dr. Naylor was an assistant professor at the University of Pittsburgh from 1964 to 1966, when he moved to The Ohio State University. He was promoted to Associate Professor in 1969 and to Professor in 1975. He was a guest lecturer on linguistics in Poland in 1965 and a guest Professor at the Institute for South Slavic languages of the University of Novi Sad in the spring of 1982. At The Ohio State University, Dr. Naylor taught a wide variety of classes in Slavic linguistics, Serbo-Croatian and Macedonian language, and on the Slavic peoples and cultures. He was a frequent guest on the WOSU radio program, "The Soviet Union and Eastern Europe in Perspective," and often gave lectures on various topical questions. At the time of his death, Dr. Naylor was the Acting Director of

1142
May 1, 1992 meeting, Board of Trustees

the Center for Slavic and East European Studies at The Ohio State University.

Dr. Naylor was the recipient of awards, grants, and fellowships from many sources, including the countries of Yugoslavia and Bulgaria, the ACLS, the Fulbright program, and others. He was a founding member of the American Association for Southeast European Studies and served as its President in 1973. He was the founder and editor of the first six issues of the journal *Balkanistica*; he was also editor of two issues of the *American Bibliography of Slavic and East European Studies* and co-editor of eight volumes of the journal *Folia Slavica*. Especially noteworthy among his professional service, were his ten years as Secretary-Treasurer of the American Committee of Slavists. He served on numerous committees and advisory panels at all levels of The Ohio State University and rendered outstanding service. He will be sorely missed at The Ohio State University for his knowledge and perspectives in this work.

Professor Naylor's own research centered on the Serbo-Croatian language and Slavic linguistics in general. The overwhelming majority of his seventy articles were on Serbo-Croatian and Balkan linguistics; several were on the other Slavic languages and a number were bibliographical surveys. He also had a strong interest in and a deep knowledge of the politics, history, and culture of Yugoslavia. This knowledge showed in his presentations and classes, which inspired many students to take an active interest in the South Slavic languages. At the time of his death, he had four students writing dissertations in this area.

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Richard Carl Nelson

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on March 3, 1992, of Richard Carl Nelson, Professor Emeritus in the Department of Physics.

Richard C. Nelson was born in Stillwater, Minnesota, on May 1, 1915. He received his AB in 1935 and his Ph.D. in 1938 from the University of Minnesota, Department of Plant Physiology. After receiving his Ph.D. he held several different industrial positions, one as a chemist and one as a spectroscopist. Following three years as research associate at Northwestern University, he joined the faculty of The Ohio State University in 1949 to work in the area of biophysics as a member of the Physics Department. He remained in this position until his retirement in 1978. He continued to do some research for a few years after he became Professor Emeritus.

Professor Nelson was a scientist and researcher into the very complicated complex of phenomena involved in the behavior of electrons in organic solids, photoconductivity of dyes, and dye sensitization of photoprocesses. Spectral sensitization by dyes is of great importance in photography and in life processes such as photosynthesis. Although sensitization by dyes was discovered as long ago as 1873, the knowledge of electron behavior in solids at that time and for long after was totally inadequate for understanding the process. The problems Professor Nelson worked on have remained complex and difficult down to the present time. Instead of looking for easier problems that might more readily lead to publishable results, he persisted throughout his research career in seeking better understanding of the electron and photon processes taking place in organic solids and involved in dye sensitization. In approaching these complex questions, he and his students viewed them from many different directions and made many different kinds of observations in order to develop a coherent picture of the processes involved.
During his tenure at The Ohio State University, Professor Nelson continued to have significant industrial associations. His work was well recognized by industry; for one five-year period his salary at The Ohio State University was paid entirely by a grant from Eastman Kodak Company. His research results were reported in a substantial body of published papers. He was elected a Fellow of the American Physical Society.

Professor Nelson had a rather unusual combination of abilities, as plant physiologist, as chemist, as physicist, and he was a careful and persistent experimenter. These were almost uniquely appropriate qualifications for achieving significant progress in a lifetime of research that was dedicated to understanding the connections between our knowledge of the physical universe and the biological processes supporting life.

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Doris L. Snook

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on March 4, 1992, of Doris L. Snook, Assistant Professor Emeritus of the Cooperative Extension Service.

Professor Snook was born January 12, 1910, in Lebanon, Ohio. She completed her B.S. in Home Economics in 1931 at The Ohio State University and the M.S. in Home Economics in 1946 at Purdue University.

Doris L. Snook began her Extension Career in Ohio when she joined the faculty at The Ohio State University in 1936 as a Home Demonstration Agent in Training in Shelby County. She left this position in January of 1939 to accept the position of Home Demonstration Agent in Seneca County. On October 15, 1945, she resigned from the Extension Service to do her graduate work at Purdue. She returned in 1946 as the Home Demonstration Agent in Franklin County. She held this position until 1954 when she resigned to accept an Extension position at Penn State University. She returned to The Ohio State University in 1958 as an Extension Specialist in Housing and Furnishings. She held this position until her retirement on June 30, 1967.

Professor Snook's contributions in providing excellent Extension educational programs during her career earned her the respect and admiration of her co-workers.

On behalf of the University community, the Board of Trustees expresses its sympathy and sense of understanding in their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Lockwood Thompson

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on March 27, 1992, of Lockwood Thompson, former member of the Board of Trustees of The Ohio State University.

RESOLUTIONS IN MEMORIAM (contd)
Lockwood Thompson (contd)

Mr. Thompson was born in Cleveland, Ohio, in 1902, and was a graduate of Williams College and Harvard Law School. He established himself as a prominent member of the legal community, an outstanding citizen and devoted supporter of the Cleveland Public Library system. Mr. Thompson served on the Board of Trustees of The Ohio State University from 1938 through 1943 and again from 1946 through 1951.

Mr. Thompson's years of service to Ohio State was only one facet of his dedication to public learning. He served three terms, fourteen years, as a trustee of the Cleveland Public Library Board. He also served as the Library Board's President from 1964 to 1969. During his tenure, the library achieved national status as a model public library system. In 1968, Mr. Thompson established a library endowment fund in honor of his parents to support the library's purchase of materials on art. He began his third appointment to the Library Board in 1990 at the age of 88.

In addition to his lifelong support of the public library, Mr. Thompson was a member of the State's first liquor control board in 1933, served on the Cuyahoga County Board of Elections from 1938 to 1940, chaired the Committee for Fair Employment Legislation, which led to the Ohio Fair Employment Act of 1951, served as a Cuyahoga County appellate judge from 1951 through 1952, was general counsel to the Ohio Turnpike Commission in 1956, and served on the City of Cleveland's Board of Ethics from 1964 through 1975. He also earned five battle stars while serving in Africa and Europe during World War II.

On behalf of the University community, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's sympathy.

Joseph Treiterer

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on February 19, 1992, of Joseph Treiterer, Professor Emeritus in the Department of Civil Engineering.

Joseph Treiterer was born December 7, 1918, in Grafrath Obb, Germany. His career in Civil Engineering began in 1949 after completing his degree in civil engineering at the Technical University of Munich. He entered the industrial world serving as a consulting engineer in bridge construction, reconstruction of industrial plants, and housing projects. In addition to this role, he joined the Technical University of Munich as a research assistant and was at the forefront of the development of the City Traffic and Urban Transportation program. Upon receiving his Doctor of Engineering Degree, Professor Treiterer focused his interest in traffic engineering, becoming an expert in this area of civil engineering.

During the latter portion of his graduate studies, Dr. Treiterer accepted a position as City Engineer with the city of Windhoek in South West Africa. While employed by the city of Windhoek, Dr. Treiterer was responsible for various aspects of civil engineering: roads, water supply, sewage plants, airport, public transport system, and chief traffic police. In addition to these duties, in 1956, he served as head of the Traffic and Safety Division of the National Institute for Transportation and Road Research and became a part-time lecturer and extramural examiner at the University of Pretoria.
RESOLUTIONS IN MEMORIAM (contd)

Joseph Treiterer (contd)

In 1963, he joined the faculty of The Ohio State University, Department of Civil Engineering. During the next 23 years, Dr. Treiterer was honored with guest professor invitations at the London University College, the Technical Universities of Berlin, Karlsruhe, Munich, and the Eidgenoessische Technical University of Zuerich. He was also a consultant for the development of airports in Denmark and West Germany. His committee memberships included the freeway Operations Committee of the Transportation Research Board, and the Fellowship Program of the International Road Federation. His technical achievements include the development of a method for the use of a helicopter based camera system for aerial traffic surveys and measurements, a method and the equipment for weighing vehicles in motion, and a patent for an automatic traffic control and guidance system.

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Richard H. Zimmerman

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on March 15, 1992, of Richard H. Zimmerman, Professor Emeritus in the Department of Mechanical Engineering.

Richard Zimmerman was born November 6, 1922, in Smithville, Ohio. He attended Fenn College in Cleveland where he completed his Bachelor of Mechanical Engineering degree in 1943. From 1943 through 1945, he worked at NACA (now NASA) Lewis Research Center on gas turbines. He also served as a part-time instructor in the physics laboratory at Fenn College. In 1946 he joined The Ohio State University as an Instructor of Mechanical Engineering, and completed his Master of Science degree in 1948. From 1948 until his retirement, he served the Department and the University as an Assistant Professor, Associate Professor, and Professor. He became an authority on gas turbines, thermodynamics and energy conversion and was elected a Fellow of the American Society of Mechanical Engineering. His colleagues and students considered him an outstanding teacher capable of inspiring his students to seek more knowledge. He received the University's Alumni Award for Distinguished Teaching in 1960, the initial year of this award.

From 1962-65 he was part of the American team who went to India to help organize and teach in the Mechanical Engineering Department of the Indian Institute of Technology in Kanpur. In 1965 Professor Zimmerman was appointed the first Dean of the University College. He joined the Administration of the University in 1970, and served as an Executive Assistant to the President and Director of Budget and Resource Planning during 1972-75.

Professor Zimmerman returned to the Department of Mechanical Engineering in 1976, won the MacQuigg and Alumni Teaching Awards, and began a new career in Computer Aided Design (CAD). He rapidly became an expert in the field and after his retirement from the Department in 1979, took his expertise to the University of Puerto Rico, where with a grant from IBM he set up a laboratory for CAD.

He loved the authenticity of the local people, both in India and in Puerto Rico, and made lasting friendships in both places. Those who knew him well, appreciated his keen powers of observation, depth of his analysis, his untiring service to the University and were touched by his deep humanity.
RESOLUTIONS IN MEMORIAM (contd)

Richard H. Zimmerman (contd)

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in its loss. It is directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family an expression of the Board's heartfelt sympathy.

Ms. Casto:

I would especially like to pay tribute to Lockwood Thompson, who was a former member of the Board of Trustees of The Ohio State University.

Mr. Teaford:

I am forced to note that Lockwood Thompson was like me, a graduate of the Harvard Law School and did not go to Ohio State either, but he gave great service to this University. And, by the way, if I am around as many years after I was initially appointed as he was, the last year I would serve on this Board would be 2028.

Upon motion of Ms. Casto, seconded by Mr. Barone, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

Ms. Casto:

Mr. Chairman, I would like to say that it has been such a pleasure to serve with you. Your enthusiasm has carried over to my spirit of participation on this campus, and I have enjoyed your tenure very much.

--0--

STUDENT AFFAIRS COMMITTEE REPORT

Mr. Tonnies:

This morning we had a presentation over viewing the 1992 Honors Week which runs from May 1-8. The report was given by Brett Miller and Patty Lerch who are now new members of Sphinix Honors Society and they were linked today during our meeting.

Many outstanding people have been a part of the honors programs and the class honorary system at Ohio State. The objective of Honors Week 1992 is to spotlight the achievements and contributions of these people, both the contributions that they have made here on The Ohio State University campus and in the community beyond Ohio State. Coordinating "the most public ceremonies" of each of the seven class honoraries into a seven-day period, honors their tradition in history of each of these organizations.
Almost 200 students are linked or tapped into the six upper class honoraries each year and 400 attain membership into the freshman honorary. Members of each of these groups are represented in Association of Ohio State Class Honoraries. This group helps in conducting combined effort projects and acts as a means of communication between the honoraries. Some of these projects include the Leaders for the 21st Century Speakers Series, Mortar Board/Sphinx Faculty Appreciation Dinner, Romophos/Mirrors Bowling Tournament, and Leadership Ohio State.

We then heard reports from the student government leaders. We met John Hilbert earlier today during the meeting who is the new USG president. He highlighted several USG projects and events during the quarter and spoke of future events. He, as did Sean Tipton, President of the Council of Graduate Students, expressed concern over the financial concerns in the state budget and their impact upon students. President Gee alluded to that earlier in his comments.

Sophia Paige reviewed the recent proceedings at the College of Law regarding the concerns the Black Law Students Association has with the College's current academic climate. She stated that Judge Duncan and his office will investigate the allegations of inequity that have been brought forth by those students. The Board will be kept up to date with these proceedings.

The Committee is recommending an expression of appreciation for Matt Markling. Unfortunately he is not here today, so I will read this for him:

**EXPRESSION OF APPRECIATION**

Resolution No. 92-121

Synopsis: The Student Affairs Committee recommended an Expression of Appreciation to Matthew J. Markling.

WHEREAS Matthew J. Markling, a junior majoring in Political Science and Economics, has served as President of the Undergraduate Student Government during the past year; and

WHEREAS he has carried out his responsibilities with a high degree of integrity and professionalism; and

WHEREAS Matthew has worked tirelessly in various Undergraduate Student Government roles to represent the undergraduate students of this institution and in bringing their concerns to the attention of this Board; and

WHEREAS his commitment to furthering the missions and goals of The Ohio State University has been displayed in countless ways over the past year:

NOW THEREFORE

BE IT RESOLVED, That this Board expresses to Matthew J. Markling its thanks and appreciation for his dedicated leadership and service to The Ohio State University and wishes him happiness, good health, and success in his future endeavors.
May 1, 1992 meeting, Board of Trustees

Upon motion of Mr. Celeste, seconded by Mr. Colley, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

If there are no questions this completes my report.

Mr. Chairman, as this is my last meeting as a Student Trustee, I'd like to take this opportunity to thank everyone here for allowing me to participate in the growth and development of this University over the past eight years. I've been involved in various campus activities and organizations, but none as important or as time consuming as The Ohio State University Board of Trustees.

My two-year term as a Trustee has been an education in and of itself and an extraordinary way to finish my years of University service. It is going to be difficult to leave a place that has been so special to me -- a place where I was part of a close-knit family. However, I take with me a wealth of invaluable leadership experience, wonderful memories, and a tremendous education. Quite a bargain even at today's prices. I hope I have given back to Ohio State a fraction of what it has given me.

I will continue my medical career as a Resident of Orthopedic Surgery at Allegheny Hospital in Pittsburgh, Pennsylvania. Who knows, perhaps I will again don the scarlet and gray, after my training is complete, as a faculty member in the College of Medicine. I know Dr. Tzagournis' spine is shivering right now as I mention that.

In closing, I hope the old adage is true, "that old trustees never truly leave, they just keep calling for football tickets." I wish everyone the best and I'll see you at graduation.

Mr. Teaford:

I want to say on behalf of this Board, that David's service to this Board was extraordinary in every way. He was a very important contributing member to this Board, and we very much appreciate his service. On behalf of the Board I would like to present you, David, with a small token -- this plaque which reads: "David A. Tonnies, Student Member, The Ohio State University Board of Trustees, 1990-1992. In appreciation to David A. Tonnies for his dedication, commitment, and praiseworthy service to The Ohio State University."

--0--

INVESTMENTS COMMITTEE REPORT

Amb. Wolf:

The Investments Committee heard the monthly Endowment Summary Report for the period March 20, 1992 through April 17, 1992. The market value of the Endowment Fund on April 17 was $405.300 million. This total was about $2.9 million below the March 20, 1992 market value. The changes in asset allocations to the investment advisors that were approved by this Board in March have been carried out and now the market value of the equity portion of the Endowment Fund has increased to $265.7 million, while the fixed income portion has increased to $115.8 million. Conversely, as you might expect, the cash portion has decreased to $5.6 million. I am pleased to report that net new additions to the Endowment Fund for April total $709,000.00.
May 1, 1992 meeting, Board of Trustees

Since July 1, 1991, which is the beginning of the fiscal year, the Endowment Fund has increased over $54 million. Net new additions were just over $25.7 million which was a new one year high, and the net change in market value accounted for an additional $32.3 million. The current asset allocation for the Endowment Fund is 59 percent invested in equities, 24 percent in fixed income securities, 9 percent in real estate, and 8 percent in cash equivalents.

We also heard the Quarterly Endowment Report for March 31, 1992, which is located in the agenda book. It was indicated that the Endowment Fund earned a 6.8 percent total return for fiscal year ‘91, which put Ohio State in the 56 percentile of all university endowment funds. I will say that that 56 percentile comes about because of the inclusion of our real estate portfolio in there which dilutes the intensity of our activity in the fixed income and equity security markets.

However, and more significantly, the 10-year annual return of 14 percent for the Ohio State endowment outperformed the average public endowment, the average Big Ten endowment, and the average mid-sized endowment, and places us in the top 23 percent of all endowment funds in the country. It should also be noted that the endowments gift flow rate of 7.4 percent increased slightly in fiscal year ’91, while the overall trend of all endowment funds had a decrease of 1.5 percent.

Finally, with a market value of $351 million at June 30, 1991 -- recognizing it's $405 million now -- The Ohio State University had the 34th largest total endowment fund in the country and the 6th largest public university endowment fund. That concludes the first phase of this report.

The second phase of our report requires action by this Board, Mr. Chairman. It has to do with changes in the relationships between the University Foundation and the University Development Fund with the Board of Trustees and the Investments Committee.

As you will recall in July 1991, we adopted recommendations on ways to make more effective use of the University Foundation as the primary fund raising and gift receipt organization for the University, thereby assuring effective coordination of the Foundation's activities with the responsibilities of this Board. The recommended change is to the Foundation's Articles of Incorporations and regulations have been made and now have been formally adopted by the Foundation Board. The executive summary and detailed changes are included in our agenda book under the Investments Committee tab.

The resolution is, I think, the final piece in implementing these changes. It specifically provides that two members of the Foundation Board will become ex-officio members of our Investments Committee, with the right to vote on matters involving only the investment of the Foundation funds. The resolution and changes in the Foundation were discussed in our Investments Committee meeting this morning.

DESIGNATION OF THE UNIVERSITY FOUNDATION AS PRIMARY FUNDRAISING AND GIFT RECEIPT ORGANIZATION

Resolution No. 92-122

Synopsis: The Investments Committee recommended that The Ohio State University Foundation be designated the primary fundraising and gift receipt organization for the University in accordance with Resolution No. 92-5.

WHEREAS The Ohio State University Development Fund was created by the Board of Trustees of The Ohio State University in December 1937 to be the official agency for the solicitation and receipt of
May 1, 1992 meeting, Board of Trustees

gifts to The Ohio State University; and

WHEREAS over the last 55 years the Development Fund has greatly benefited the University and been instrumental in the growth and success of the institution, and the University has been particularly well served by the many dedicated men and women who, as members of the Board of Directors and volunteers of the Fund, have given their time, talent, and energy in support of the University; and

WHEREAS in December 1984, the Board of Trustees authorized the establishment of The Ohio State University Foundation as a nonprofit corporation to advance the interest of the University by conducting and supporting activities which benefit or carry out the purposes of the University; and

WHEREAS in July 1991, the Board of Trustees adopted recommendations for the reorganization and realignment of The Ohio State University Foundation to enhance the Foundation's effectiveness in promoting the best interest of the University and ensure the effective coordination between the Foundation and the Board of Trustees; and

WHEREAS appropriate changes to the Articles of Incorporation and Code of Regulations of the Foundation now have been adopted by the required votes of the Foundation's Board of Directors, to be effective immediately, to make the Foundation the primary fundraising and gift receipt organization for the University:

NOW THEREFORE

BE IT RESOLVED, That The Ohio State University Foundation is hereby designated as the primary fundraising and gift receipt organization for the University and will perform those functions in accordance with the revised Articles of Incorporation and Code of Regulations of the Foundation; and

BE IT FURTHER RESOLVED, That The Ohio State University Development Fund will continue as a gift receipt organization for gifts to The Ohio State University; and

BE IT FURTHER RESOLVED, That two members of the Foundation Board of Directors, appointed in accordance with the revised Regulations of the Foundation, shall be ex-officio members of the Board of Trustees Investments Committee, with full power to vote on any matter respecting the management and investment of Foundation funds; and

BE IT FURTHER RESOLVED, That the Articles of Incorporation and the Code of Regulations of the Foundation as amended and as set forth in Attachment A are hereby approved.

Upon motion of Amb. Wolf, seconded by Mr. Shumate, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix LXIX for background information, page 1163.)

--0--

FISCAL AFFAIRS COMMITTEE REPORT

Mr. Shumate:

The Fiscal Affairs Committee met this morning and Vice President Shkurti presented an update on the FY 1992 budget. Mr. Shkurti reported that the University has already absorbed a reduction of $18 million in state aid for this year. Mr. Shkurti also reported
May 1, 1992 meeting, Board of Trustees

on the status of state funding for the next year, FY 1993.

The University is preparing for a variety of scenarios for reduction in state aid. Scenarios ranging from 3 percent to 23 percent in possible reductions. The impact of these reductions would fall primarily on the University's work force. For example, a reduction of 15 percent in state support would cause the elimination of more than 1,000 jobs on the Columbus campus alone.

Mr. Shkurti, would you like to add anything to this report?

Mr. Shkurti:

Thank you, Mr. Shumate. I think it's important to point out that it has been the University's policy, through what now will begin the third year of budget cuts, to not embellish or otherwise exaggerate the impact of the budget cuts on the University or what the numbers mean. We will continue to be consistent with that as a public institution in Ohio.

On the other hand, I think it is vitally important that as officials of the University, we let you, the Board, and the public know exactly what is in store, as best we can, regarding the impact of possible budget cuts. Now the state had not made a decision yet on how it will deal with its budget problems for the fiscal year beginning July 1, 1992. There are a variety of scenarios out there and we are preparing for them.

One of the most common scenarios that the state is looking at would result in a 15 percent reduction in Ohio State University's state support from what was originally appropriated for the next fiscal year. That would cost the University $41 million, by our estimates. That translates to the loss of approximately 1,000 jobs. Now those are positions, not people. Some of those positions are vacant and that is how we would hope to manage these reductions. Layoffs would result from a job reduction of that size of an unknown amount, but they would result. That would be on top of the 360 positions that were eliminated from the round of budget cuts we took last year.

The impact on the University, in terms of our programs and services we offer our students and the community, would be severe. It is also important to realize that it would have an impact on the economy of Central Ohio and the State of Ohio. The Ohio State University is the second largest employer in Central Ohio. Our employees pay $28 million annually in state and local income taxes. If the 1,000 positions are abolished and not filled, that is 1,000 less people paying taxes, that is 1,000 people less shopping in area stores and supermarkets, and that is 1,000 less people looking for better apartments and homes.

The University will be prepared to do whatever it takes to meet our budget cut requirements as they come down from the state. We will protect the academic core in doing that, but I don't think there should be any illusions that what the state does will not be without cost to the University, to its mission and without cost to the State of Ohio.

Mr. Wexner:

I think -- maybe not with just the Trustee hat on, but as a resident of Central Ohio -- that we should reach out to the Central Ohio community, the Central Ohio Chamber of Commerce, and other organizations and institutions. There would be dancing in the
streets if an employer came to this city and created a 1,000 jobs of the caliber that we're talking about eliminating. Forget about the role of the University in the academic, intellectual stimulation to the State. I don't think the Mayor and Legislators in Central Ohio recognize the impact of 1,000 people unemployed and the leveraging -- there is a multiplying effect on Central Ohio. I think it's a potential disaster.

Mr. Teaford:

Thank you. Mr. Shumate, would you please continue.

Mr. Shumate:

Let me begin, on behalf of the Board, by welcoming our new Vice President for Business and Administration, Janet Pichette, to her first Board of Trustees meeting. The following resolutions are proposed:

**WAIVERS OF COMPETITIVE BIDDING REQUIREMENTS**

**JANUARY - MARCH 1992**

Resolution No. 92-123

Synopsis: Acceptance of the quarterly report on waivers of competitive bidding requirements is proposed.

WHEREAS the Purchasing Policy of The Ohio State University, adopted by the Board of Trustees on September 7, 1984, and revised on February 7, 1992, provides that the President and/or Vice President for Business and Administration may grant a waiver from competitive bidding in the event of an emergency, when a sufficient economic reason exists, or when the goods or services can be purchased from only a single source, with a report on such waivers to be made quarterly to this Board; and

WHEREAS the Vice President for Business and Administration has submitted a report on waivers of competitive bidding requirements granted for the period of January-March 1992:

NOW THEREFORE

BE IT RESOLVED, That the report on waivers of competitive bidding requirements for the period of January-March 1992 is hereby accepted.

Upon motion of Mr. Shumate, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

**SALE OF REAL PROPERTY**

Resolution No. 92-124

67.26 ACRES IN GALLIA COUNTY

Synopsis: The Fiscal Affairs Committee recommended the sale of approximately 67 acres of unimproved real property located in Morgan Township of Gallia County. WHEREAS in December 1986, the Board of Trustees acquired by gift from Vaughn and Frieda
May 1, 1992 meeting, Board of Trustees

Siegenthaler approximately 67.26 acres of unimproved real property located in Morgan Township of Gallia County, Ohio; and

WHEREAS under the terms of the gift, the property is to be sold, with the net proceeds used to support the College of Agriculture; and

WHEREAS the appraised value of this property is $17,000.00, and Richard E. and Alice M. Lytle of Toledo, Ohio, have offered to purchase the property, including mineral rights, for $18,000.00; and

WHEREAS the appropriate University offices have determined that this sale of property is in the best interest of the University, and it is the desire of this Board to accept this offer and sell all of the University's right, title, and interest in this property:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized, in the name of the Board of Trustees, to sell all of the University's right, title, and interest in this property to Richard E. and Alice M. Lytle at a price of $18,000.00 upon such terms and conditions as are deemed to be in the best interest of the University.

Upon motion of Mr. Shumate, seconded by Mr. Barone, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix LXX for background material and map, page 1199.)

--0--

LEASE OF LAND AND BUILDING SPACE TO
THE OHIO STATE UNIVERSITY ALUMNI ASSOCIATION
Resolution No. 92-125

Synopsis: The Fiscal Affairs Committee recommended the long-term lease of land and building space to The Ohio State University Alumni Association.

WHEREAS The Ohio State University is deeply appreciative of the support, dedication, loyalty, promotion, service, and advocacy provided to the University by The Ohio State University Alumni Association; and

WHEREAS in recognition of and to foster this special relationship between the University and the Association, the University has provided and desires to continue to provide space on the campus for the Association to carry out its business activities; and

WHEREAS the Association has outgrown its facilities in the Fawcett Center for Tomorrow and in December 1990 the Board of Trustees authorized the employment of architects and the request for construction bids for the design and construction of an addition to the Fawcett Center for Tomorrow and the renovation of the existing Alumni House in the east wing of the Fawcett Center to provide additional space and an integrated facility to meet the current and future needs of the Association; and

1154
WHEREAS the capital costs of this project will be funded by the Association, with the facilities to be owned by the University and occupied by the Association under a long-term lease as outlined in the accompanying background information; and

WHEREAS the appropriate University offices have determined that this long-term lease is in the best interest of the University:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized, in the name of the Board of Trustees, to negotiate and enter into a long-term lease to The Ohio State University Alumni Association of the existing space in the Fawcett Center occupied by the Association and land and building space for an addition, upon the terms as outlined in the accompanying background information and upon such other terms and conditions as are deemed to be in the best interest of the University.

Upon motion of Mr. Shumate, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix LXXI for background material, page 1203.)

EASEMENT

Resolution No. 92-126

THE OHIO POWER COMPANY
NEWARK CAMPUS

Synopsis: Authorization to grant an easement for electric service to the Ohio Power Company on University property located on the Newark Campus is proposed.

WHEREAS the Ohio Power Company has requested a 15-year easement consisting of a strip of land approximately 15 feet in width and 1,575 feet in length for the installation of underground electric service to the Central Ohio Technical College building at the Newark Campus; and

WHEREAS the appropriate University offices have recommended that this easement be granted:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to request the Deputy Director of Public Works of the Department of Administrative Services to act for and on behalf of the University in developing the necessary legal instruments to provide for this easement.

Upon motion of Mr. Shumate, seconded by Mr. Barone, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix LXXII for map, page 1205.)

May 1, 1992 meeting, Board of Trustees

EASEMENT

Resolution No. 92-127

YODER LANDS, INC. ACCESS TO LEACH FIELD
AT GWYNNE FARMS

Synopsis: Authorization to grant an easement to Yoder Lands, Inc. for access to the leach field at 1570 State Route 38 Northeast, London, Ohio, is proposed.

WHEREAS Yoder Lands, Inc. has requested the granting of a 25-year easement consisting of a strip of land approximately ten feet in width and 450 feet in length for access to the leach field located north of and adjacent to the Molly Caren Agricultural Center at the Gwynne Farms; and

WHEREAS this leach field serves Mr. Yoder's residence and the University will receive in-kind payment from Mr. Yoder by having access to and use of the lane to his residence, allowing the University convenient access to its fields in the area; and

WHEREAS the appropriate University offices have recommended the approval of this easement:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to request the Deputy Director of Public Works of the Department of Administrative Services, pursuant to his statutory duties, to act for and on behalf of the University in developing the necessary legal instruments to provide for this easement.

Upon motion of Mr. Shumate, seconded by Mr. Barone, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix LXXIII for map, page 1207.)

--0--

Ms. Pichette:

The picture that you see before you is what the work of art looks like. The action before you, again, today is the deaccession of the work of art known as Isolt and Erwin Frey was the sculptor.

The sculptor's widow was trying at the time of her death to reassemble all of his works of art and the estate now, in her name, has been continuing that work, and contacted the University when someone informed them that we had this work of art. Upon research, it was discovered that the University may not have had clear ownership of the sculpture. So we believe it is the proper thing at this time to return it to the estate.

Robert Stearns, Executive Director of the Wexner Center, is here and could give you any background. If you have don't have any questions, I will ask for your approval.

Mr. Shumate:

Robert, would you like to address the Committee on this subject?
Mr. Robert Stearns:

Thank you. I would like to address the Board, not because there is really any question in our mind that this is the appropriate thing to do, but because I believe this is the first time that the deaccessioning of a work of art has come before the Trustees. It is appropriate for the Trustees of the University to understand the relationship with objects in its collections, whether they are any where on campus or in the Wexner Center for the Arts, ultimately as guardians of those objects of art.

I would like just to briefly define the words that we are using. A museum may acquire a work of art by buying it, but it accessions the work to its collection when it identifies it with a particular catalogue number and determines that that work of art is thoroughly known and understood to be what it is understood to be. All research has been done, ownership is clear and understood, and the sale or transfer or gift of deed of the work to the museum is clearly outlined by documents.

Now the reason that this is important is more because when a museum proceeds to deaccession a work of art, equally or even more rigorous work must be done to determine that this action is being taken carefully. Deaccession is the removal of a work of art from the collection of a museum. Then once it is deaccessioned and the collection number is removed from it, it may then be disposed of, which is to say be given away or be sold. So the words like acquire, accession and deaccession, and dispose of have very specific meanings.

There are very particular guidelines which professional practices in museums prescribe to staffs and to boards of trustees, which I would like to submit more to the record of this Committee and to the Board of Trustees for further study on the subject of deaccessioning so that that is understood. In the future, we expect that we probably will deaccession works from the collection for the purpose of raising funds to purchase new works to focus the purposes of the collection for study and exhibition. So it will be important in the future to understand exactly what the details of this process are.

Mr. Shumate:

What is the actual size of this piece of art?

Mr. Stearns:

It is approximately 60 inches high, about 5 feet.

Mr. Shumate:

Out of curiosity, is there an estimated value?

Mr. Stearns:

The only estimated value that I have was given about 20 to 25 years ago, was approximately $3,000.00.

Mr. Shumate:

So you would be recommending to the Board through our Vice President any
May 1, 1992 meeting, Board of Trustees

procedures and policies that we should follow in this area?

Mr. Stearns:

What we need from the Board of Trustees is an agreement to allow the return of this work -- the deaccessioning of the work and the return of it to the family of the artist, who is the widow that we are speaking of.

Mr. Shumate:

Right, that is our specific action today. But looking prospectively, one of my questions is what would we have done differently or should we have done differently at the time of the original transaction for future action by the Board?

Mr. Stearns:

Exactly. What should happen is that a work would come into the collection through the recommendation of my professional staff and me to you, as a Board, and a transaction of sale, purchase, or gift is executed. This was not done in this particular case. It was considered to be abandoned property and no one knew who it belonged to. About 20 years ago someone gave it a number and accessioned it to the collection without sufficient research.

Mr. Shumate:

OK. Any other questions?

DEACCESSION OF THE SCULPTURE ISOLT

Resolution No. 92-128

Synopsis: The Fiscal Affairs Committee recommended the deaccession of the sculpture Isolt, by Erwin Frey, from the permanent collection of the Wexner Center for the Arts.

WHEREAS the sculpture Isolt (1933), created by Erwin Frey, has been in the possession of The Ohio State University since at least 1960, when it was catalogued and added to the University's permanent collection; and

WHEREAS before 1960 the sculpture had been on loan by the artist to the Ohio Historical Society and remained a part of the University's collection after the Ohio Historical Society relocated off campus; and

WHEREAS the University's acquisition of this work and the accession of the work as a part of the University's permanent collection were made without sufficient information and documentation; and

WHEREAS the Estate of Mrs. Erwin Frey has asserted ownership of the sculpture and requested its return; and

WHEREAS the appropriate University offices have determined that such deaccession is in the best interest of the University:
May 1, 1992 meeting, Board of Trustees

NOW THEREFORE

BE IT RESOLVED, That the sculpture Isolt (1933, Georgia marble, by Erwin Frey) be deaccessioned from the University's permanent collection; that the University is hereby authorized to relinquish and transfer to the Estate of Grace Frey all of the University's right, title, and interest in this work; and that the Vice President for Business and Administration, in consultation with the Director of the Wexner Center for the Arts, be authorized to negotiate and execute any agreements or other documents necessary to effect this deaccession and transfer.

Upon motion of Mr. Shumate, seconded by Mr. Barone, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

President Gee:

As all of you know, today is Joel's last day of service as Chairman of our Board and may well be his last day of service as a member of our Board, because his term is completed as of this month. As I indicated to you before, he has been a remarkable servant of the University, a truly dedicated Trustee of the institution, and has served it very well as its Chairman. I can say that having had the pleasure of serving with him over this past year.

Joel, on behalf of your colleagues and, certainly, on behalf of the whole University family that you have so entitled, so empowered, and so graced, we present to you a very small token of our appreciation -- a gavel made from wood that was part of the original University Hall, indicating your service on the Board and your chairmanship.

I would also like to say that I see Mrs. Teaford in the back, soon to be Dr. Teaford. Meg, we would like you to stand and also be recognized at this time.

Mr. Teaford:

Thank you, Mr. President. Of course, I cannot resist one last chance to say a few things. I very much want to express my appreciation to this Board. I have over these nine years seen this Board grow into a vital institution which is greatly, I think, serving this University. The broad support and involvement that I had from all of you this year was indeed appreciated by me and makes me leaving happy in the knowledge that this Board will continue to lead this University in a very great way.

I cannot resist one last admission as we have to deal with these awful budget cuts, which the President recently so well characterized. It is essential we protect the core of this University. But in 1992, in a land-grant institution it is also essential that we appreciate that part of the core which is affirmative action. We can look around the fringes of our table and see that there is a real commitment on the part of this University to affirmative action, as we look at our vice presidents. And I know that that is where the President's heart is, but we must remember that we cannot go forward without demonstrating that an educational institution holds as one of its highest obligations access for all of this country's citizens.

I also want to thank soon-to-be Dr. Teaford for her support to me in this job. And I thank you all for your friendship and your support. Thank you.

May 1, 1992 meeting, Board of Trustees

REPORT - UNIVERSITY'S INVESTMENT PORTFOLIO
Resolution No. 92-129

RESOLVED, That the report on the University's Investment Portfolio, dated April 17, 1992, as submitted to the Investments Committee of the Board of Trustees, be received and filed with the official records of the Board.

--0--

REPORT - UNIVERSITY'S ENDOWMENT FUND
QUARTERLY REPORT
Resolution No. 92-130

RESOLVED, That the quarterly report on the University's Endowment Fund, dated March 31, 1992, as submitted to the Investments Committee of the Board of Trustees, be received and filed with the official records of the Board.

--0--

THIRD QUARTER REPORT -
1991-92 CURRENT FUNDS BUDGET
Resolution No. 92-131

RESOLVED, That the third quarter report on the 1991-92 Current Funds Budget, dated May 1, 1992, as submitted to the Fiscal Affairs Committee of the Board of Trustees, be received and filed with the official records of the Board.

--0--

Thereupon the Board adjourned to meet Friday, June 5, 1992, at The Ohio State University Fawcett Center for Tomorrow, Columbus, Ohio.

Attest:

Madison H. Scott             Hamilton J. Teaford
Secretary                 Chairman
The Board of Trustees met at its regular monthly meeting on Friday, June 5, 1992, at The Ohio State University Fawcett Center for Tomorrow, Columbus, Ohio, pursuant to adjournment.

Minutes of the last meeting were approved.
The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on June 5, 1992, at 11:40 a.m. He requested the Secretary to call the roll.

Present: John J. Barone, Chairman, Deborah E. Casto, John W. Kessler, Milton A. Wolf, Alex Shumate, Theodore S. Celeste, Michael F. Colley, George A. Skestos, and Kristen Cusack.

--0--

INTRODUCTION OF NEW TRUSTEE

Mr. Barone:

I am very pleased to have the opportunity to officially welcome George Skestos as the newest member of The Ohio State University Board of Trustees. He is replacing Hamilton J. Teaford, for a term beginning May 14, 1992, and ending May 13, 2001.

Mr. Skestos is the founder and owner of the Homewood Corporation here in Columbus, Ohio. George has been very active in community and civic organizations over the years and he will be, I am sure, a tremendous asset to our Board.

Please join me in welcoming Mr. George Skestos. We look forward to working with you.

--0--

COMMITTEE APPOINTMENTS 1992-1993

Resolution No. 92-132

WHEREAS the appointments to Committees and representatives to the Research Foundation Board of Directors, the Inter-University Council, the University Hospitals Board, The Arthur G. James Cancer Hospital and Research Institute Trustee Liaison, the Ohio State University Affiliates, Inc., Board of Directors, the Ad Hoc Committee on Planning, and the University Foundation for 1992-93 are as follows:

Educational Affairs
John W. Kessler, Chair
Theodore S. Celeste, Vice Chair
Alex Shumate
George A. Skestos

Investments Committee
Milton A. Wolf, Chair
Theodore S. Celeste, Vice Chair
John W. Kessler
George A. Skestos

Standing Committee on Agricultural Affairs
Michael F. Colley, Chair
Fred L. Dailey, Vice Chair, Ex Officio
Alex Shumate
George A. Skestos

Student Affairs
Kristen Cusack, Chair
Deborah E. Casto, Vice Chair
New Student Trustee
COMMITTEE APPOINTMENTS 1992-1993 (contd)

Fiscal Affairs
Alex Shumate, Chair
Michael F. Colley, Vice Chair
Deborah E. Casto

Personnel Committee
John J. Barone, Chair
Deborah E. Casto, Vice Chair
John W. Kessler

Inter-University Council
George A. Skestos

Research Foundation
Theodore S. Celeste

Board of Directors

University Hospitals
Theodore S. Celeste
Milton A. Wolf

The Arthur G. James Cancer Hospital and Research Institute
John W. Kessler, Chair
John J. Barone

Ohio State University
Affiliates, Inc.
John J. Barone (term 1 year)
Deborah E. Casto (term 2 years)
John W. Kessler (term 3 years)

Ad Hoc Committee
Leslie H. Wexner, Chair
Deborah E. Casto, Vice Chair
Alex Shumate
Michael F. Colley

University Foundation
John J. Barone (term 1 year)
John W. Kessler (term 2 years)
Alex Shumate (term 3 years)

Ex Officio Class of Directors

*Serves as Board of Trustee's interface with the University's Planning Committee.

Upon motion of Ms. Casto, seconded by Mr. Shumate, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

Mr. Barone:
I would like to call Ms. Anita S. Ward, Vice Chairman of the Board of Regents, for a presentation concerning the Research Challenge Award.

Ms. Anita S. Ward:
Thank you, very much. I am delighted to be here with you today on this exciting occasion. Before handing over the check, you are going to be a captive audience for a few minutes -- I have a few remarks to make.

1269
June 5, 1992 meeting, Board of Trustees

Ms. Anita S. Ward: (contd)

I am sure as you all know, the Research Challenge Program is designed to strengthen the research infrastructure of Ohio's universities in a number of ways.

1. It increases the ability of Ohio universities to attract external research dollars.

2. It encourages the universities to conduct strategic research projects likely to have a direct impact on Ohio's economy.

3. It nurtures the development of multi-disciplinary team research efforts that often result in creative, innovative new approaches to investigations with the potential to produce breakthrough scientific discoveries.

The most recent university reports to the Board of Regents have demonstrated that Research Challenge is remarkably effective in achieving these objectives.

As a result of investments through Research Challenge, the amount of externally funded research coming to Ohio universities is increasing significantly. The universities have recently reported on sponsored research for the biennium (FY 1989-91). That funding, for basic and applied research only, totaled over $650.5 million of externally funded university research brought to Ohio. That's more than an 18 percent increase over the prior biennium, and an increase of over 69 percent since the inception of the Program.

Research Challenge has been highly effective in stimulating research at The Ohio State University. During the last biennium the University attracted over $200 million of external research. Over the four biennia of Research Challenge support, OSU has brought in almost $700 million in external funding for basic and applied research.

These numbers speak to the highly effective leveraging ability of the Research Challenge Program.

There is a direct link between expanded research activity and Ohio's quest to gain a "fair share" of federal funds returned to the states. The federal government is the single largest sponsor of university research. The Research Challenge Program has proven effective in increasing Ohio's share of federal research dollars.

In addition, the research performed is critically connected to economic growth for Ohio, through the development of new technology and the high quality jobs that result from these discoveries. Industry and business cannot thrive in the age of technology without the expertise and leading-edge knowledge created through university research. The research industry itself is providing high quality jobs for thousands of Ohioans, including a significant number in Central Ohio. The transfer of new technology into new "spin-off" business ventures also creates more high-quality jobs and contributes to Ohio's economic recovery and growth.

Especially now, research investments need to be sustained. These investments have demonstrated an immediate return rate of five to seven times the state investment and will continue to build even greater returns for Ohio over time.

It is my pleasure to present to you today a check in the amount of $566,104.00. For the biennium, your total share is $1,324,582.00. My congratulations.
President Gee:

You might have noticed that I leaped immediately to receive that check and it is going right in the bank as we speak. Given the rescissory nature with which we are dealing, we wanted to make sure that we cash the check as quickly as possible.

I would note to you and your colleagues on the Board of Regents that it is with deep personal pleasure that we accept this check. I would also note that those are truly figures of worth. This University alone has brought in well over $700 million of sponsored research from outside the State, which has created thousands of jobs and thousands of opportunities for young, and not so young, people in this State. And, indeed, we are a university that is nearly bringing in as much external funding as we receive in state-support now. A trend that we don't necessarily take pride in, but one that we take pride in from the point of view of the quality of our faculty and what they are accomplishing. Thank you, for coming and doing that today.

I joked with Anita, by the way, that I was going to quickly grab the check. I kept looking over her shoulder. The kid that won the "Gordon Gee Look-alike Contest" this year told a joke which was a little on the aside. Of course, I would never repeat this, but I will do it here among friends. He said, "What did the President of the University of Michigan get on his S.A.T.? Saliva!!" And in this instance, that is exactly what I was doing -- salivating over that check. We do appreciate it. Thank you, very much, Anita.

--0--

PRESIDENT'S REPORT

President Gee:

The close of the academic year, as you well know, is a time of recognition and reflection. This past month, we have gathered at receptions and banquets, luncheons and concerts, to celebrate the people of this university who have made significant contributions to its quality and character.

From the Distinguished Affirmative Action Awards in early May to the Graduate Teaching Awards being presented in classrooms yesterday and today, we have honored people for citizenship, for leadership, and for remarkable achievements. Allow me, therefore, to highlight a few of the recipients who are representative of our outstanding university colleagues.

Paula Hunter, a records management officer, received the Edith Cockins Award as the outstanding staff person in the Office of the Registrar, for her exceptional dedication in serving our students.

The Office for Disability Services honored 75 individuals and organizations for the time they have given to the Reader Services Program, reading textbooks on to tape, and giving assistance with testing and tutoring.

At a Celebration of University Leadership, nearly 275 students were recognized for their good work in organizations, activities, and programs. Among them is Leslie White, a sophomore in University College, who received the Wendell Ellenwood Scholarship for her work with the Student Events Committee, a Black Student Leadership Award for
June 5, 1992 meeting, Board of Trustees

Personal Achievement, and a Presidential Leadership Citation.

I might note also that Kristen Cusack, who sits on this Board, was recognized with a service award at the Greek Honors Banquet for her campus leadership, as well as her service to her sorority, Chi Omega. Kristen also invited me to have dinner and we both made it through.

David Tonnies received a Presidential Leadership Citation at the Celebration of University Leadership.

And, Trustee Leslie Wexner received the W. Arthur Cullman Executive Award at the 1992 Cullman Symposium. This year's symposium focused on new techniques for revitalizing American industry and was enormously successful.

The university community came together for a very different type of celebration in May, as 70,000 of my closest friends joined me -- and several of you -- for the Genesis concert in the stadium -- a happening of truly Biblical proportions. I do not know if Debbie Casto's hearing has fully returned, as she was "rocking and rolling" right in front of those mammoth speakers!

As the year draws to a close, I am reminded of the rhythm of an academic institution: next week, we will say goodbye to some 5,000 graduates; in two weeks, we will begin welcoming next year's freshmen and their parents for summer orientation; and today, this Board acts on two new leaders for our university family.

First, Professor Jerelyn B. Schultz will be with us in August as Dean of the College of Human Ecology. She comes to us from the University of Arizona and is a distinguished scholar and leader in family life education. Also on today's agenda for your approval is Professor William Anderson of the University of Minnesota who, I believe, will give very dynamic leadership to the Agricultural Technical Institute at Wooster.

Speaking of Wooster, I have just returned from another of my barn-storming tours which included a visit to Wooster High School and to the Rubbermaid Corporate Offices and Plant, also in Wooster. In only three days, I visited: one radio station, two farms and two high schools, three newspapers, four manufacturing plants, five alumni gatherings, six elected officials, nine Ohio counties -- and a partridge in a pear tree.

I met people on an organic farm, in the world's largest food manufacturing plant -- the Campbell's soup plant in Napoleon, Ohio -- over an Amish-style dinner in Holmes County, and at an alumni gathering held in a nursing home in Upper Sandusky! I spoke to audiences totaling more than one thousand people: prospective students and their parents, alumni and friends, chamber of commerce and community leaders, county extension staffs, secondary education administrators, and Hispanic community leaders. Visits such as this most recent one have proven very important and beneficial, as we listen to the concerns of Ohioans and as we tell them more about Ohio State.
Likewise, we have listened and learned from a group of African-Americans on the Columbus campus who raised questions about the progress -- or lack of progress -- of efforts to ensure equity and a quality experience for all at Ohio State University. As you are all aware, the university was presented with a series of demands claiming that the university had not kept faith with earlier promises.

I found that in some cases, they were right. I had an extraordinary meeting with a large group of African-Americans that proceeded late into the night. They had an opportunity to present their concerns to me, and I had an opportunity to respond. I feel that progress was made, and continues to be made.

Specifically, let me note that on the agenda today is the formal action changing the name of the Bradford Commons to the Frank W. Hale, Jr. Hall. Furthermore, the Office of Residence and Dining Halls is developing a proposal for an African-American Living Learning Center within the undergraduate residence halls on the Columbus campus. Based on the success of similar programs already in place that focus on women, the honors curriculum, agriculture, and cooperative living. This new program is being considered for a pilot effort as early as the coming academic year. Other issues are being examined by various university offices and officials.

We, as a university, have a responsibility to take claims of racism and inequity seriously, and to respond, I believe, appropriately. We must be clear in our objectives and firm in our determination to reach those objectives. We must be an institution of individuals who are sensitive to past wrongs, present aspirations, and future dreams. And we must ensure that each person has the opportunity to excel, advance, explore, and progress without the barriers of injustice, inequality, or intolerance.

I expect this university to be a leader in this regard. That continues to be both our aspiration and our effort.

Ohio State is able to assume such national and international leadership in a number of areas because of our very distinguished faculty.

I am delighted that this Board will today establish the Bank One Chair for Excellence in Corporate Strategy in our College of Business. Addressing multi-disciplinary issues in corporate strategic decisions, this Chair will help advance the growing reputation of the College of Business.

Finally -- and I might note in a somewhat lighter vein -- I was recently given some facts about this immense university that both amazed and amused me. I have been including some of these "fun facts" in my addresses as I have toured the state.

Consider this:

Ohio State each year burns nearly 33,000 tons of Ohio coal. We burn more than one million cubic feet of natural gas. We have the 43rd largest telephone company in the nation, placing 250,000 calls each day. We use more than 300,000 reams of white copy paper each year and empty 35,000 trash cans each day. There are 24,263 parking spaces on the Columbus campus -- but I can never find one when I
June 5, 1992 meeting, Board of Trustees

need it. And we use 33 tons of catsup, 53 tons of frozen potatoes, and more than one million boxes of cereal. By the way, the most preferred cereal is Captain Crunch.

On that important note, Mr. Chairman, I will close my report.

--0--

FISCAL AFFAIRS COMMITTEE REPORT

Mr. Shumate:

I would like to call your attention to the Tab marked Fiscal Affairs in our book. Note that this information was previously mailed to the members of the Board and fully considered this morning in the meeting of the Fiscal Affairs Committee. We began our committee meeting with a report from Vice President Pichette on the new travel office for the University. At this time, we would like to present the following resolutions:

REQUEST FOR CONSTRUCTION BIDS

Resolution No. 92-133

SOUTH RESIDENCE HALLS - WINDOW REPLACEMENT

Synopsis: The Fiscal Affairs Committee recommended authorization to request construction bids for the listed project.

WHEREAS the University desires to proceed with the replacement of windows, screens, and glass walls and associated trim and insulation in Baker Commons, Baker Hall, Bradford Commons, Bradley Hall, Canfield Hall, Kennedy Commons, Mack Hall, Morrison Tower, Park Hall, Paterson Hall, Siebert Hall, Smith Hall, Steeb Hall and Stradley Hall; and

WHEREAS the total estimated project cost is $4,000,000.00, and the total estimated construction cost is $3,600,000.00, with funding provided from University bond proceeds:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to request construction bids on this project in accordance with established University procedures, and if satisfactory bids are received, to award contracts, with all actions to be reported to this Board at the appropriate time.

Upon motion of Mr. Shumate, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--
Synopsis: The Fiscal Affairs Committee recommended authorization to employ architects/engineers and request construction bids for the listed projects.

WHEREAS the University desires to proceed with construction of the initial phase of the Olentangy River Experimental Wetlands project on University land at 350 Dodridge Road adjacent to the Olentangy River; and

WHEREAS the initial phase of the project will construct two ponds with all associated pumping and outflow, with subsequent phases being accomplished as additional funding becomes available; and

WHEREAS the total estimated project cost for the initial phase is $134,000.00, and the total estimated construction cost is $113,606.00 and the University has received private donations to cover both the capital cost of phase one and the operating costs for three years; and

WHEREAS University Hospitals desire to relocate the Histology Laboratory suite from the third floor of Starling Loving Hall to the third floor of Doan Hall with renovation of approximately 2,800 square feet in the north wing of Doan Hall required to accommodate this move; and

WHEREAS the total estimated project cost is $700,000.00, and the total estimated construction cost is $560,000.00, with funding provided from University Hospitals; and

WHEREAS University Hospitals desire to renovate and reorient the Emergency Department; and

WHEREAS the total estimated project cost is $1,250,000.00, and the total estimated construction cost is $1,025,000.00, with funding provided from University bond proceeds; and

WHEREAS University Hospitals desire to renovate the third floor west of Means Hall to change the emphasis from patient care to medical laboratories and offices; and

WHEREAS the total estimated project cost is $450,000.00, and the total estimated construction cost is $360,000.00, with funding provided from University Hospitals; and

WHEREAS University Hospitals desire to renovate space on the eighth floor in Doan Hall to house the relocation of the EEG facilities and Pulmonary Function/Bronchoscopy from Means Hall; and

WHEREAS the total estimated project cost is $450,000.00, and the total estimated construction cost is $360,000.00, with funding provided from University Hospitals; and

WHEREAS University Hospitals desire to renovate four existing passenger elevators in Doan Hall, replace electronic controls on the main elevator bank in Rhodes Hall, and install one new elevator in an empty shaft in Rhodes Hall; and
EMPLOYMENT OF ARCHITECTS/ENGINEERS AND REQUEST FOR CONSTRUCTION BIDS (contd)

OLENTANGY RIVER WETLANDS PROJECT
DOAN HALL - 3 NORTH
UNIVERSITY HOSPITALS EMERGENCY DEPARTMENT
MEANS HALL THREE WEST
DOAN HALL EIGHT EAST
RHODES AND DOAN HALLS - ELEVATOR REPLACEMENT (contd)

WHEREAS the total estimated project cost is $1,000,000.00, and the total estimated construction cost is $820,000.00, with funding provided from University bond proceeds:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to select qualified architectural/engineering firms as necessary for these projects and that the fees for these services be negotiated between the firms selected and The Ohio State University; and

BE IT FURTHER RESOLVED, That the President and/or Vice President for Business and Administration be authorized to request construction bids on these projects in accordance with established University procedures, and if satisfactory bids are received, to award contracts, with all actions to be reported to this Board at the appropriate time.

Upon motion of Mr. Shumate, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix LXXV for map, page 1323.)

EMPLOYMENT OF ARCHITECTS/ENGINEERS Resolution No. 92-135

OARDC - CENTRAL CAMPUS AND GOURLEY HALL ELECTRIC UPGRADE
MANSFIELD REGIONAL CAMPUS - UNIVERSITY DRIVE RESTORATION
MANSFIELD REGIONAL CAMPUS - EISENHOWER CENTER BOILER SYSTEM
MANSFIELD REGIONAL CAMPUS - PHYSICAL ACTIVITIES CENTER ROOF
BASEBALL STADIUM

Synopsis: The Fiscal Affairs Committee recommended authorization to employ architects/engineers for the listed projects.

WHEREAS the University desires to proceed with design of additional electrical capacity to meet current codes on the OARDC campus; and

WHEREAS the total estimated project cost is $165,000.00, and the total estimated construction cost is $138,000, with funding for design ($15,000.00) provided from House Bill 808 and funding for construction anticipated in the next capital appropriations bill; and
June 5, 1992 meeting, Board of Trustees

WHEREAS the University desires to proceed with design to restore the deteriorated University Drive on the Mansfield Regional Campus; and

WHEREAS the total estimated project cost is $139,940.00, and the total estimated construction cost is $122,200.00, with funding for design ($10,000.00) provided from House Bill 808 and funding for construction anticipated in the next capital appropriations bill; and

WHEREAS the University desires to proceed with design of the replacement of two failing boilers and associated pumps and recovery tanks in the Eisenhower Memorial Center on the Mansfield Regional Campus; and

WHEREAS the total estimated project cost is $96,000.00, and the total estimated construction cost is $83,190.00, with funding for design ($7,500.00) provided from House Bill 808 and funding for construction anticipated in the next capital appropriations bill; and

WHEREAS the University desires to proceed with design of replacement of the deteriorated roof on the Physical Activities Center on the Mansfield Regional Campus; and

WHEREAS the total estimated project cost is $31,000.00, and the total estimated construction cost is $28,200.00, with funding for design ($1,000.00) provided from House Bill 808 and funding for construction anticipated in the next capital appropriations bill; and

WHEREAS the Department of Athletics desires to proceed with design of a 2,500 seat baseball stadium, including pressbox, locker rooms, concession and vending areas, security, first aid areas, and dugouts, to be located at an existing baseball field south of the Woody Hayes Athletic Facility; and

WHEREAS the total estimated project cost is $3,000,000.00, and the total estimated construction cost is $2,200,000.00, with funding for design ($100,000.00) provided from the Department of Athletics and funding for construction to be provided from the Department of Athletics and private donations:

NOW THEREFORE BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to select qualified architectural/engineering firms as necessary for these projects and that the fees for these services be negotiated between the firms selected and The Ohio State University.

Upon motion of Mr. Shumate, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix LXXVI for maps, page 1325.)
REPORT OF AWARD OF CONTRACTS AND
ESTABLISHMENT OF CONTINGENCY FUNDS

Resolution No. 92-136

EXTERIOR LIGHTING
MCCRACKEN POWER PLANT - WATER TREATMENT FACILITIES
MECHANICAL IMPROVEMENTS (ORTON HALL LIBRARY)
AGRICULTURAL ADMINISTRATION BUILDING ASBESTOS ABATEMENT
NORTH STAR BUILDING ADDITION
MANSFIELD REGIONAL CAMPUS - CONCRETE REPLACEMENT (OVALWOOD HALL)
MANSFIELD REGIONAL CAMPUS - BROMFIELD HALL FACING
MIRROR LAKE HOLLOW RENOVATIONS
HERRICK DRIVE - ROAD RESURFACING
ANIMAL SCIENCE BUILDING - ROOFTOP CHILLER REPLACEMENT
OARDGC - NORTHWESTERN BRANCH OFFICE AND STORAGE IMPROVEMENTS
POSTLE HALL - ANIMAL FACILITY
NEWARK REGIONAL CAMPUS - GROUNDS IMPROVEMENTS

Synopsis: Approval of the Report of Award of Contracts and the Establishment of Contingency Funds for the listed projects is recommended.

WHEREAS resolutions adopted by the Board of Trustees on May 4, 1989, September 7, 1990, October 5, 1990, and October 3, 1991 authorized the President and/or Vice President for Business and Administration to request construction bids in accordance with established State of Ohio and University procedures, and if satisfactory bids were received to award contracts for the following projects: Exterior Lighting, McCracken Power Plant - Water Treatment Facilities, Mechanical Improvements (Orton Hall Library), Agricultural Administration Building Asbestos Abatement, North Star Building Addition, Mansfield Regional Campus - Concrete Replacement (Ovalwood Hall), Mansfield Regional Campus - Bromfield Hall Facing, Mirror Lake Hollow Renovations, Herrick Drive - Road Resurfacing, Animal Science Building - Rooftop Chiller Replacement, and OARDGC - Northwestern Branch Office and Storage Improvements; and

WHEREAS resolutions adopted by the Board of Trustees on October 5, 1990 authorized the President and/or Vice President for Business and Administration to request construction bids in accordance with established University and State of Ohio procedures, and if satisfactory bids were received to recommend the award of contracts for the following projects: Postle Hall - Animal Facility and Newark (Regional Campus) - Grounds Improvements.

NOW THEREFORE

BE IT RESOLVED, That pursuant to the actions previously authorized by this Board, the Report of Award of Contracts and Establishment of Contingency funds for these projects is hereby approved.

Upon motion of Mr. Celeste, seconded by Amb. Wolf, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix LXXVII for background material and maps, page 1329.)
June 5, 1992 meeting, Board of Trustees

EASEMENT
Resolution No. 92-137

UNITED TELEPHONE SYSTEM
MANSFIELD CAMPUS

Synopsis: Authorization to grant an easement to the United Telephone System for the installation of fiber optic cable on University property located on the Mansfield Regional Campus along State Route 39 and immediate vicinity is proposed.

WHEREAS the United Telephone System has requested a 15-year easement consisting of a strip of land approximately 16 1/2 feet in width and approximately 871 feet in length, a second strip of land approximately ten feet in width and 425 feet in length, and a third strip of land approximately 16 1/2 feet in width and 859 feet in length, all for the installation of underground fiber optic cable at the Mansfield Regional Campus along State Route 39 and the immediate vicinity; and

WHEREAS this easement will serve private property, but the University will have access to tap into the fiber optic cable if the Mansfield Regional Campus determine the need for a local area network; and

WHEREAS the approximate University offices have recommended that this easement be granted:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to request the Deputy Director of Public Works of the Department of Administrative Services to act for and on behalf of the University in developing the necessary legal instruments to provide for this easement.

Upon motion of Mr. Shumate, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix LXXVIII for map, page 1357.)

PURCHASE OF REAL PROPERTY
Resolution No. 92-138

206 WEST TENTH AVENUE
COLUMBUS, OHIO

Synopsis: The Fiscal Affairs Committee recommended the authorization to purchase the improved real property located at 206 West Tenth Avenue in Columbus, Ohio.

WHEREAS The Ohio State University has been presented with an opportunity to purchase the improved real property located at 206 West Tenth Avenue in Columbus, Ohio; and

WHEREAS this property has an appraised value of from $135,000.00 to $150,000.00 and the owner, Robert A. Smith of Columbus, has offered to sell the property to the University for $148,000.00; and

1279
PURCHASE OF REAL PROPERTY (contd)

206 WEST TENTH AVENUE
COLUMBUS, OHIO (contd)

WHEREAS this property is located within the south campus acquisition line of the University's Master Plan and the appropriate University offices have determined that the purchase of this property is in the best interest of the University; and

WHEREAS funds for the purchase will be provided from general University funds in the Land Acquisition Account:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to purchase, in the name of the State of Ohio for the use of The Ohio State University, the improved real property located at 206 West Tenth Avenue at a price not to exceed $148,000.00 upon such terms and conditions as are deemed to be in the best interest of the University, subject to the University receiving the necessary approvals from the Ohio Board of Regents and the State Controlling Board.

Upon motion of Mr. Shumate, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix LXXIX for background material and map, page 1359.)

--0--

Mr. Shumate:

I would like to call upon our Vice President for Finance, Mr. Shkurti, to provide some background information on the budget, as well as to provide background information on the 30-day continuation budget request.

Mr. Shkurti:

Thank you, Mr. Chairman. The first item I would like to address is a report to the Board on where Ohio State stands regarding fees and expenditures, which is some information the Board asked for at the last meeting. What I will do is walk you briefly through each of the charts. I will start with the first one which is the second page, but it is numbered one in the upper right hand corner. What this does is compare annual undergraduate resident fees at Ohio State with the rest of the public Big Ten. We call it the public Big Ten because we exclude Northwestern which is a private institution. If you look at those figures, it shows that Ohio State ranks sixth with an annual tuition of $2,568, which is 14 percent below the average for the Big Ten.

The second chart, which is numbered two in the upper right hand corner, compares fees for four categories of students and also compares how they have changed OSU's ranking in time over the last five years. So you will see that five years ago we were eighth in the Big Ten in residence and undergraduate fees and we are sixth now. We have also risen slightly in our relative rankings for non-resident undergraduate fees, resident graduate, and non-resident graduate. I believe that this
Mr. Shkurti: (contd)

is a pattern that is fairly similar for public institutions across the state of Ohio, because the state budget over the last 4 to 5 years has been somewhat constrained and the result has been to force tuition higher in Ohio than in other states. Although again, even though tuition has increased, we are still below average.

The third chart ranks The Ohio State University compared to other public assisted universities in the state of Ohio, both where it is currently and how it has grown over the last five years. You can see Ohio State currently ranks tenth among Ohio's thirteen public assisted institutions for undergraduate resident tuition. That is 8.5 percent below the average, and it is also below the average for tuition growth in the state over the last five years. So I think this shows in terms of tuition, Ohio State is a bargain compared to other public assisted institutions in the state of Ohio, and compared to other public institutions in the Big Ten.

The final chart gives you a comparison as to how much we actually spend and this is the average education in general expenditures per student for fiscal year '91, the latest year we have. The reason we use education in general is that that is a category that excludes some of the large auxiliary operations such as the Hospitals and the residence halls, so we are measuring only the actual classroom expenditures per student. You will see that Ohio State is seventh in the public Big Ten with $10,053, compared to Michigan who is first. They spend $18,719 per student. So again, in terms of expenditures, Ohio State is below the average at 13 percent below. So I think that what this shows very clearly is that Ohio State is a low cost, low expenditure institution. But even though our tuition is low and our expenditures are low, we offer a high quality education. That, I would argue, is better than a lot of these other Big Ten schools and certainly better than the Big Ten school over our northern border that spends $8,000 more per student.

Mr. Chairman, I would like to pause and see if there are any questions about the comparisons that I provided the Board. The other thing I would add is that it is my sense, and I think properly, that the Board would like to be updated annually on where Ohio State stands on a variety of indicators. This is our first step in doing that. We picked the Big Ten and other Ohio schools because that is the obvious thing to compare, but there are a lot of other institutions that Ohio State competes with and should be compared with that are public comprehensive research institutions. We hope in the months ahead to provide you with comparisons to those institutions as well.

Mr. Shumate:

As I mentioned during our Committee meeting, Academic Affairs also discussed that same process of comparison. We think that would be helpful. Are there any questions on this comparative data on fees and expenditures?

Mr. Shkurti:

Mr. Chairman, the next item is the resolution that you have in front of you regarding the University’s budget. We had hoped at this meeting to give you the budget for the Fiscal Year beginning July 1, 1992. However, the state has not yet decided how it will handle its budget problems for the year beginning July 1. And since they are our major source of income, we cannot give you an accurate projection. So what we are asking you to do is approve this resolution that extends the budget that expires on
June 5, 1992 meeting, Board of Trustees

Mr. Shkurti: (contd)

June 30 for another month, so we can continue to pay our employees and do other things while we are waiting for the state to make a determination.

I should also address at least what we think the state may do to give you a sense of the kinds of decisions we may be faced with at the next Board meeting. Again, the state has not made a final decision, but the Governor and his budget directors have made some public statements about what they think the size of the problem is that the state is facing next year, and what items will not be cut if the Governor implements cuts by executive order. Taking those two statements together it appears to me we are staring down the barrel of cuts that may range from 10 to 20 percent from what was originally appropriated for Ohio State for Fiscal Year ’93. Now remember, we are already a low tuition, low cost institution, so we don't have quite the flexibility to absorb cuts that say the University of Michigan does. In addition, the University has already absorbed $35 million in reductions from previous rounds of cuts over the last 18 months. And the impact of those has been the loss of 360 positions in the University, additional course closings that affect the ability of our students to graduate on time, longer lines, and an increase in deferred maintenance, which in the long run will cost the University money.

We have tried to manage those cuts as best we can. We know that the state is facing financial problems and we feel we should do our share, even though the cuts that we have suffered in the last 18 months have been disproportional compared to other parts of the budget. What I worry about, as difficult as those problems have been, is the potential impact of additional reductions in the order of magnitude that I have just discussed. If you take the midpoint between 10 and 20 percent, which is a 15 percent reduction -- you may recall at last month's Board meeting that I shared with you that if in fact we are faced with a reduction in funding of that amount, it would cost the University a 1,000 positions. Even for an institution this size that is a very serious problem. Not only does it create a problem for this institution, I believe it creates a serious problem for the community, Central Ohio, and for the state as a whole. Ohio State University is the second largest employer in Central Ohio, as I mentioned last month, so the loss of these positions, in terms of income and taxes that those people pay, would severely effect the city treasury. I think this could ripple into the state treasury which in turn would exacerbate the budget problem that we face.

The other problem that I think is important to recognize -- and Ms. Ward from the Board of Regents spoke very eloquently to that -- is the $700 million in research money that The Ohio State University has brought into the State of Ohio. By almost any comparison of us with other states of our size, Ohio is not bringing in as much research money from the federal government or other sources as it should compared to the size of its population, although we have improved over the last several years. The problem is that if this University, which is the state’s single largest research institution, is affected by the reductions in the magnitude of 10 to 20 percent the research positions of faculty and the people who help them do research would not be filled. Including some of our eminent scholars. It would also affect our ability to bring in that research money in the future. That, in turn, would affect the ability of the state of Ohio to attract those high-tech research jobs that we have been attracting over the last couple years.
June 5, 1992 meeting, Board of Trustees

Mr. Shkurti: (contd)

If research was not important, the horse and buggy would still be the dominant manufactured good in the country and it is not. My fear is that coupled with the loss in income from the jobs that we already have, and our inability then to compete with other states for the best minds to do the kind of research that is vital for the future of this state. A reduction in the order of 10 to 20 percent to Ohio State would mean the first step in the economic decline of Ohio. What would come out of it, eventually, are more expenditures for welfare, higher expenditure for corrections, and eventually because the economic base is not there to support these expenditures, higher taxes for everyone.

So we will be watching very closely what happens over the next month. We will be working closely with public officials to point out what we think the dire consequences of budget reductions of the range that we have heard speculated about. We will try to bring to you at the July meeting a budget that makes the best use of the amount of money that the state provides to us, and to make that money do everything it can in terms of this institution maintaining its viability and its role and in turn supporting the economic future of the state of Ohio. Mr. Chairman, I will be glad to attempt to respond to any questions that the Board may have.

Mr. Shumate:

Any questions?

Mr. Celeste:

You mentioned the 1,000 positions at the last meeting. Do you have any estimate of the dollar amount of economic impact to the Columbus and Central Ohio community?

Mr. Shkurti:

Mr. Celeste, the average payroll at Ohio State for a full-time equivalent position is about $30,000. Now some of these 1,000 positions include part-time, so I would not multiply it straight across, but you can see that is a substantial number. I guess the thing that I worry about more -- although the impact of losing those positions themselves is significant -- the larger impact and the larger danger is psychological. If you have been following the history of this recession, this is a national problem not unique to Ohio. One of the things driving it, particularly right now as it looks like we're on the edge of coming out of it, is a lack of confidence by consumers that their jobs are secure, their income is secure. As a result, they aren't spending. And since they are not spending or buying, people aren't at work producing what it is consumers buy.

My fear is that the impact of this will be much greater than just the impact of 1,000 positions. Every other person who is affiliated with Ohio State or other public institutions in Ohio, will worry if their job is to be eliminated next. So as a result, they aren't going to be buying as they normally would. If they don't buy, the tax revenues don't go into the state. The state wouldn't have the tax revenues to support higher education and other services, and so the state does more cuts. That's what's known in economic terms as the economic death cycle, because it's a spiral of fear and of worry that feeds on itself. So we may have the prospect of the rest of the country
June 5, 1992 meeting, Board of Trustees

Mr. Shkurti: (contd)

pulling out of the recession and Ohio lagging behind, and lagging further behind in terms of the resources it needs to keep up and compete.

So I think the effects can be dramatic. They exist beyond just the loss of payroll and jobs directly at Ohio State, they have an indirect effect as well. I think Ms. Ward made the point that research jobs here spin off 4 or 5 jobs elsewhere in the economy. So if you think about the implications of that statement, you can see it's a pretty far reaching problem.

EXPENDITURE AUTHORIZATION 1992-93
Resolution No. 92-139

Synopsis: The Fiscal Affairs Committee recommended the authorization to make expenditures in 1992-93.

WHEREAS the State of Ohio has identified an operating deficit for the next fiscal year and the Governor has yet to recommend a budget for consideration by the Legislature; and

WHEREAS it is necessary to defer decisions concerning salary levels, fee levels, and other University expenditures until State subsidy support has been determined in an appropriations bill and distributed by the Board of Regents; and

WHEREAS it is necessary to continue University expenditures, including payment of faculty and staff, prior to the time that a Current Funds Budget for 1992-93 is developed and adopted:

NOW THEREFORE

BE IT RESOLVED, That the University be authorized to make expenditures consistent with the level of resources contained in the Third Quarter Report of Fiscal Year 1991-92 until the Current Funds Budget for 1992-93 is adopted; and

BE IT FURTHER RESOLVED, That at the regularly scheduled meeting of the Board of Trustees following the revision of the state budget and projected distribution of subsidy from the Board of Regents, the President will present the Administration's recommendation for the Current Funds Budget for 1992-93.

Upon motion of Mr. Shumate, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

Mr. Shumate:

The next agenda item has to do with an intent to reimburse capital expenditures. I am going to call upon Mr. Nichols to provide us with some background for this issue.
June 5, 1992 meeting, Board of Trustees

Mr. Nichols:

Under the Miscellaneous Tab in your Board book are two resolutions. These are an outgrowth of a change in the regulations of the department of the treasury on behalf of the Internal Revenue Service as it concerns tax exempt bonds. Previously, each time that the Board has authorized the hiring of architects, engineers, and the permission to request construction bids there has been attached, as part of that resolution, the Board’s intent to ultimately go out for tax exempt bonds to fund the project. Over a period now of in excess of a decade, the Congress and the various federal regulatory agencies have been further restricting the issuance of tax exempt bonds. It has probably had the least amount of impact on public higher education, although it has had a very substantial impact on private higher education. This is frankly just another step in that particular process as they tighten up the regulations. So the first resolution deals specifically with those projects that have already started or else the construction is eminent, and it is the Board's certifications that those are appropriate projects under the treasury regulations for tax exempt bonds.

The second resolution is an administrative resolution which allows the Vice President of Finance, on behalf of the Board of Trustees, to designate those projects which will ultimately be funded by tax exempt bonds. It frankly is an administrative expediency; this does not preclude the involvement of the Board. The Board will still do all the approvals for architects and engineers, all the approval for construction bids, will still receive all of the reports of those construction bids, and, finally, will have to approve the actual issuance of the bonds themselves. Those are presented for your approval.

Mr. Shumate:

Thank you, Mr. Nichols. We did fully review these in the Fiscal Affairs Committee and legal counsel was present and made a presentation. Since these two resolutions are related I'm going to move both of them. Is that permissible?

INTENT TO REIMBURSE CAPITAL EXPENDITURES
Resolution No. 92-140

WHEREAS The Ohio State University (the “University”) is currently considering the construction, acquisition, installation and equipping of certain University facilities (the “Projects”) as more fully described on Exhibit A hereto; and

WHEREAS the University anticipates incurring certain Capital Expenditures (as hereinafter defined) with respect to the Projects; and

WHEREAS this Resolution is intended to be a declaration of official intent under Treasury Regulation Section 1.103-18 (the “Reimbursement Regulations”):

NOW THEREFORE

BE IT RESOLVED, That by the Board of Trustees of The Ohio State University as follows:

1. The University hereby declares that it reasonably expects to reimburse the Capital Expenditures (as defined below) incurred with respect to the Projects with the proceeds of debt incurred by the University (the “Reimbursement Obligations”).

1285
INTENT TO REIMBURSE CAPITAL EXPENDITURES (contd)

2. It is the intent of the University that a "reimbursement allocation," as defined in the Reimbursement Regulations for the Capital Expenditures shall occur not later than (i) one year after the date on which the Capital Expenditure is paid or (ii) the date on which the property which is the subject of the Capital Expenditure is placed in service, whichever is later.

3. For purposes of this Resolution, the term "Capital Expenditures" shall have the meaning given such term in the Reimbursement Regulations.

4. Exhibit A hereto sets forth a reasonably accurate, general functional description of the type and use of the property for which the Capital Expenditures to be reimbursed are to be paid or contains a description of the general functional purpose of the fund or account from which the Capital Expenditures to be reimbursed is to be paid, and the maximum amount of Reimbursement Obligations to be issued for the Projects.

5. A copy of this Resolution shall be made reasonably available for inspection by the general public at the main administrative office of the University and shall be continuously available during normal business hours of the University on every business day of the period beginning no later than thirty (30) days after the date hereof to and including the date of the issue of the Reimbursement Obligations, or such longer period as may be required by the laws of the State of Ohio.

6. The University finds that no funds from sources other than the Reimbursement Obligations are, or are reasonably expected to be, reserved, allocated on a long-term basis, or otherwise set aside by the University or by any member of the same controlled group as the University (as such term is defined in Treasury Regulation Section 1.150-1(f) pursuant to their budget or financial policies with respect to the Capital Expenditures to be reimbursed.

7. Nothing in this Resolution shall be construed to be a limitation on the ability of the University to reimburse itself for eligible preliminary expenditures (within the meaning of Section 1.103-18(h) of the Reimbursement Regulations). The proceeds of the Reimbursement Obligations will not be used directly or indirectly for any of the uses set forth in Section 1.103-18(k)(1) of the Reimbursement Regulations unless any such use is permitted by Section 1.103-18(k)(4) or (5) of the Reimbursement Regulations.

Upon motion of Mr. Shumate, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix LXXX for Exhibit A, page 1363.)

--0--

AUTHORIZATION FOR DESIGNATED OFFICIALS TO DECLARE INTENT TO REIMBURSE CAPITAL EXPENDITURES
Resolution No. 92-141

WHEREAS The Ohio State University (the "University") expects to consider from time to time the construction, acquisition, installation and equipping of certain University facilities; and

WHEREAS the University anticipates that it will incur certain capital expenditures in connection therewith; and
June 5, 1992 meeting, Board of Trustees

**AUTHORIZATION FOR DESIGNATED OFFICIALS TO DECLARE INTENT TO REIMBURSE CAPITAL EXPENDITURES (contd)**

WHEREAS Treasury Regulation Section 1.103-18 (the "Reimbursement Regulations") prescribes certain rules as to under what circumstances such expenditures may be incurred and subsequently reimbursed with the proceeds of a borrowing by entities such as the University in such a manner that the interest payable on such debt will be excludable from gross income for federal income tax purposes ("Tax Exempt Debt"); and

WHEREAS the University may from time to time find it to be in its best interests to fund the capital expenditures referred to above with the proceeds of Tax Exempt Debt and, therefore wishes to adopt procedures to assure compliance with the Reimbursement Regulations and thereby obtain the benefits of issuing Tax Exempt Debt at an interest cost savings to the University; and

WHEREAS the Reimbursement Regulations permit an entity such as the University to designate someone on its behalf to declare the intent of the entity to reimburse itself for capital expenditures:

NOW THEREFORE

BE IT RESOLVED, That by the Board of Trustees of The Ohio State University as follows:

1. This Board of Trustees hereby designates the Vice President of Finance of the University as the person who is authorized on behalf of the University to declare the official intent of the University within the meaning of the Reimbursement Regulations with respect to expenditures that the University may incur prior to the issuance of Tax Exempt Debt.

2. The Vice President of Finance of the University is authorized to make such findings, execute such instruments and take such actions as are reasonably necessary to enable the University to comply with the Reimbursement Regulations, with no further action or authorization from this Board of Trustees being necessary.

3. This Resolution shall be in full force and effect from the date of its adoption.

Upon motion of Mr. Shumate, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

**RESEARCH FOUNDATION REPORT**

Mr. Celeste:

I would like to start by adding a comment to what I had planned would be a very exciting report. With the cautions that we've just been given from Mr. Shkurti about the impact of potential budget cuts on research, I think we should be monitoring this very carefully. Today's report is pretty exciting and I hope that we would be able to continue it.
June 5, 1992 meeting, Board of Trustees

I'm particularly pleased to report that the increase in research funding received by The Ohio State Research Foundation continues to show real growth. You have the report in front of you. If you'd take a look at Tab 1, we see that the award level for the period July through April is 27.36 percent above the same period last year. The number of awards received for the current period has increased from 1172 to 1284.

This month there has been a significant increase in the awards received from the National Science Foundation and the Department of Education. At Tab 2 you will find expenditure summaries. It is noteworthy that expenditures from the National Science Foundation Projects are showing the greatest dollar increase, nearly $2 million. Some projects of special interest that were funded in the month of April are listed at Tab 3. You might be interested to know that our National Regulatory Research Institute is developing prototype regulatory procedures for use by the Public Utility Commission. The state of Ohio is funding the development of child birth educational materials for women with developmental disabilities. The National Science Foundation is supporting research on the existence of a black hole in the center of our galaxy. The Student Literacy Core Program will teach students at the Agricultural Technical Institute about important issues facing society.

At Tab 4 is the list of all projects funded in April. Tab 5 is an overview of the Office of Technology Transfer Activities, along with some comparisons of those activities with those at other Big Ten Universities. This year we expect about 60 invention disclosures and 20 new U.S. patents. Our royalty income in fiscal 1991 was $1.6 million.

At Tab 6 is a listing of the active projects in the Department of Computer and Information Science that have benefited from availability of the super computer facility. We had some information presented to us in the Academic Affairs Committee on the super-computer facility.

Tab 7 includes 2 press releases issued by University Communications highlighting recent research activity. This concludes my report.

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS
Resolution No. 92-142

Synopsis: Approval of the following reports on contracts, grants, and gifts and the summary for April 1992 is proposed.

WHEREAS monies are solicited and received on behalf of the University from governmental, industrial, other agencies, alumni, and various individuals in support of research, instructional activities, and service; and

WHEREAS such gifts and grants are received through The Ohio State University Research Foundation, the Engineering Experiment Station of The Ohio State University, The Ohio State University Development Fund, and The Ohio State University Foundation:

NOW THEREFORE

BE IT RESOLVED, That the research agreement between The Ohio State University and The Ohio State University Research Foundation for the contracts and grants reported herein, and the acceptance of the reports from the Engineering Experiment Station, The Ohio State University Development Fund, and The Ohio State University Foundation during the month of April 1992 be
June 5, 1992 meeting, Board of Trustees approved.
June 5, 1992 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

Upon motion of Mr. Celeste, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND

Establishment of Funds

The Jack N. Taylor, M.D. Urologic Cancer Research Endowment Fund

The Jack N. Taylor, M.D. Urologic Cancer Research Endowment Fund for The Arthur G. James Cancer Hospital and Research Institute was established June 5, 1992, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University Development Fund from Mr. and Mrs. Seward Schooler, Coshocton, Ohio.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to sponsor urologic cancer research as directed by the Chief of the Division of Urologic Surgery in The Arthur G. James Cancer Hospital and Research Institute as approved by the Director of The Arthur G. James Cancer Hospital and Research Institute and the Vice President for Health Services.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the Director of The Arthur G. James Cancer Hospital and Research Institute and the Vice President for Health Services in order to carry out the desire of the donors.

The Frederick P. Zuspan, M.D. Chair Fund in Obstetrics and Gynecology

The Frederick P. Zuspan, M.D. Chair Fund in Obstetrics and Gynecology was established June 5, 1992, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from Professor Emeritus Frederick P. Zuspan, M.D. (B.A., Biological Sciences, 1947; M.D., Medicine, 1951), his colleagues and friends and the Department of Obstetrics and Gynecology.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support a faculty chair position in the Department of Obstetrics and Gynecology as recommended by the Chairperson of the Department of Obstetrics and Gynecology and the Dean of the College of Medicine. Prior to reaching the funding level required for support of the chair and, at such time when the funding is equal to or greater than the funding level required for support of a professorship, the income can be used for a professorship position in the Department of Obstetrics and Gynecology as recommended by the Chairperson of the Department of Obstetrics and Gynecology and the Dean of the College of Medicine to the Provost and approved by the Board of Trustees. Any unused income shall be applied to the principal.

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Funds (contd)

The Frederick P. Zuspan, M.D. Chair Fund in Obstetrics and Gynecology (contd)

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the Dean of the College of Medicine, Chairperson of the Department of Obstetrics and Gynecology, or program administrative officer in order to carry out the desire of the donors.

The Dr. Elizabeth D. Gee Memorial Breast Cancer Research Endowment Fund

The Dr. Elizabeth D. Gee Memorial Breast Cancer Research Endowment Fund for The Arthur G. James Cancer Hospital and Research Institute was established June 5, 1992, by the Board of Trustees of The Ohio State University, with a gift to The Ohio State University Development Fund from Mr. and Mrs. Seward Schooler, Coshocton, Ohio, in memory of Dr. Elizabeth D. Gee.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to sponsor breast cancer research as directed by the Chief of the Division of Surgical Oncology in The Arthur G. James Cancer Hospital and Research Institute as approved by the Director of The Arthur G. James Cancer Hospital and Research Institute and the Vice President for Health Services.

It is the desire of the donors that this fund benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the Director of The Arthur G. James Cancer Hospital and Research Institute and the Vice President for Health Services in order to carry out the desire of the donors.

The George R. St. Pierre Scholarship Enhancement Fund in Materials Science and Engineering

The George R. St. Pierre Scholarship Enhancement Fund in Materials Science and Engineering was established June 5, 1992, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from Dr. St. Pierre, family members, colleagues, former students, and friends of George R. St. Pierre, Presidential Professor and Chairperson of the Department of Materials Science and Engineering.

All gifts are to be invested in the University’s Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.
Establishment of Funds (contd)

The George R. St. Pierre Scholarship Enhancement Fund in Materials Science and Engineering (contd)

The annual income shall be used to support scholarly, research, and professional activities of students and faculty in the Department of Materials Science and Engineering with particular emphasis on undergraduate programs, scholarships and laboratories. Selection of the award recipients shall be made by the Chairperson of the Department of Materials Science and Engineering in consultation with the faculty and the University Committee on Student Financial Aid, as appropriate.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

The Marcus J. and Lottie C. Lieberman Scholarship Fund

The Marcus J. and Lottie C. Lieberman Scholarship Fund in the Department of Geological Sciences was established June 5, 1992, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University Development Fund from Lottie C. Lieberman of Columbus, Ohio, in memory of her husband, Marcus J. Lieberman (B.A., Geology, 1931).

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used for undergraduate scholarships in the Department of Geological Sciences. Eligible students shall maintain a minimum 3.0 G.P.A. and be in good standing with the Department of Geological Sciences and The Ohio State University. Selection of the award recipients shall be made by the Scholarship Committee within the Department of Geological Sciences in consultation with the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

The Robert L. Muncie Music Scholarship Fund

The Robert L. Muncie Music Scholarship Fund was established June 5, 1992, by the Board of Trustees of The Ohio State University, with a gift to The Ohio State University Development Fund from the estate of Robert L. Muncie.
June 5, 1992 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Funds (contd)

    The Robert L. Muncie Music Scholarship Fund (contd)

All gifts are to be invested in the University’s Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide a scholarship for an incoming freshman, undergraduate, or graduate student who is or will be a music major. The selection of the recipient shall be made by the Director of the School of Music in consultation with faculty members and the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

    The Bill Newland Endowed Memorial Scholarship in Animal Science

The Bill Newland Endowed Memorial Scholarship in Animal Science was established June 5, 1992, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from friends to honor H. William Newland, Ph.D. For 17 years he was professor of animal science in the College of Agriculture and beef extension specialist for the Ohio Cooperative Extension Service.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide one or more scholarships to undergraduate students in the Department of Animal Science, the College of Agriculture. Criteria for selection shall include above average scholastic achievement and demonstrated leadership potential through extracurricular activities. Preference shall be given to those students with financial need. Selection shall be made by the scholarship committee in the Department of Animal Science in consultation with the Dean for Student Affairs in the College of Agriculture and the University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.
Change in Name of Fund

The Michael Shih-Yuan Chen, Ph.D. Memorial Scholarship Fund

The Shih-Yuan Michael Chen Scholarship Fund was established July 8, 1988, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from the Chen family in memory of Dr. Michael Shih-Yuan Chen (Ph.D., 1955). The name was changed April 6, 1990, to The Michael Shih-Yuan Chen Memorial Scholarship Fund and was again renamed June 5, 1992.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide one or more scholarships to students enrolled in the College of Engineering who are from Nanjing Institute of Technology, China. If there are no applicants from Nanjing Institute of Technology, then the scholarship(s) shall be awarded to engineering students from mainland China, or, if none apply, to Chinese-American students enrolled in the College of Engineering. Scholarship recipients shall be chosen by the Dean of the College of Engineering in consultation with the University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

Change in Name and Description of Fund

The Charles and Anita King Endowment Fund

The Ohio Biological Survey Endowment Fund was established June 9, 1983, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from friends and supporters of the Ohio Biological Survey. The name and description was revised June 5, 1992.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used for those purposes which will aid the publishing, research, and service programs and facilities of the Ohio Biological Survey. Expenditure of the annual income shall be made upon the authorization of the Executive Director of the Ohio Biological Survey in cooperation with the Advisory Board of the Ohio Biological Survey and with the approval of the Dean of the College of Biological Sciences of The Ohio State University. Invasion of the principal amount of the endowment, if necessary, shall be authorized only upon written approval of the Executive Director and the Chair of the Advisory Board of the Ohio Biological Survey and the Dean of the College of Biological Sciences of The Ohio State University.
June 5, 1992 meeting, Board of Trustees

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Change in Name and Description of Fund (contd)

The Charles and Anita King Endowment Fund

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be determined by the Foundation Board in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

Change in Description of Fund

American Playwrights Theatre Scholarship in Playwriting

The American Playwrights Theatre Scholarship in Playwriting was established December 9, 1982, by the Board of Trustees of The Ohio State University, with a gift to The Ohio State University Development Fund from American Playwrights Theatre, Inc. The description was revised June 5, 1992.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide one or more scholarships for students who have demonstrated exceptional talent and ability in dramatic writing. It may also, from time to time, provide funding for a guest playwright to be in residence at The Ohio State University to teach in the area of playwriting and to participate in the production program of the Department of Theatre. Selection of the recipient(s) shall be made upon the recommendation of the Chairperson of the Department of Theatre and the Dean of the College of the Arts and in consultation with the University Committee on Student Financial Aid, as appropriate.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

THE OHIO STATE UNIVERSITY FOUNDATION

Approval of Descriptions and Establishment of Funds

The Gertrude Parker Heer Chair Fund in Cancer Research

The Gertrude Parker Heer Chair Fund in Cancer Research was established June 5, 1992, by the Board of Trustees of The Ohio State University through funds received by the University from The Ohio State University Foundation with gifts designated for support of The Arthur G. James Cancer Hospital and Research Institute from the estate of Gertrude Parker Heer, Columbus, Ohio.
June 5, 1992 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY FOUNDATION (contd)

Approval of Descriptions and Establishment of Funds (contd)

The Gertrude Parker Heer Chair Fund in Cancer Research (contd)

Income provided by the Foundation shall be reinvested in the fund’s principal until such time as the fund shall have a value of $1,250,000, whereupon the annual income shall support the work of a distinguished faculty member involved in cancer research at The Arthur G. James Cancer Hospital and Research Institute. Appointment to the Chair will be recommended by the Director of The Arthur G. James Cancer Hospital and Research Institute and the Vice President for Health Services to the Provost, and approved by the Board of Trustees.

The Ruth Arnold Steva Auglaize County Cooperative Extension Service Endowment Fund

The Ruth Arnold Steva Auglaize County Cooperative Extension Service Endowment Fund was established June 5, 1992, by the Board of Trustees of The Ohio State University through funds received by the University from The Ohio State University Foundation with a gift designated for support of the Auglaize County Cooperative Extension Service from the late Ruth Arnold Steva.

Income provided by the Foundation shall be used to support the Auglaize County Cooperative Extension Service. Distribution and use of funds shall be determined by recommendations to the Auglaize County Cooperative Extension Service faculty from local advisory committees, with final approval for use of those funds by the official responsible for management of the Ohio Cooperative Extension Service. These funds shall be subject to review by the University's internal audit department.

Should the Auglaize County Cooperative Extension Service cease to exist, the principal Auglaize County Cooperative Extension Service Advisory Committee and/or its successor representatives shall recommend the future use and distribution of annual earnings from the fund by making appropriate suggestions to the University official who at the time holds responsibility for management of the Ohio Cooperative Extension Service. Additionally, the Auglaize County Cooperative Extension Service Advisory Committee shall have up to 12 months following any disbandment of the Auglaize County Extension Service offices to make its final recommendations to the director of the Ohio Cooperative Extension Service.

The Ronald L. Stuckey Herbarium Fund

The Ronald L. Stuckey Herbarium Fund was established June 5, 1992, by the Board of Trustees of The Ohio State University through funds received by the University from The Ohio State University Foundation with gifts designated for support of The Ohio State University Herbarium from Ronald L. Stuckey, Professor of Botany.

Income provided by the Foundation shall be distributed to the Herbarium to be used for purposes associated with the Herbarium and administered by the Director of the Herbarium in the College of Biological Sciences.
Initially, the income is to be used for expenditures by the Director of the Herbarium to support the botanical research and curatorial projects developed by Dr. Ronald L. Stuckey for the duration of his working life. Subsequently, the income is to be used by its Director to support the needs of the Herbarium, including projects related to the vascular plant flora of Ohio.

**The Ralph J. Stolle Academic Scholarship Fund**

The Ralph J. Stolle Academic Scholarship Fund was established June 5, 1992, by the Board of Trustees of The Ohio State University through funds received by the University from The Ohio State University Foundation, which has established an endowed fund with gifts designated for the support of the Office of Student Financial Aid from Ralph J. Stolle, Lebanon, Ohio, and from the Stolle Corporation, Sidney, Ohio.

Income provided by the Foundation shall be used to provide one or more academic merit scholarships to residents of Shelby County upon nomination by the Scholarship Committee of the Shelby County Alumni Club to the University Committee on Student Financial Aid. Preference shall be given to entering freshmen and scholarships are renewable for up to twelve (12) quarters of satisfactory academic performance.

**The Episcopal Diocese of Southern Ohio Endowment for Peace Studies Outreach**

The Episcopal Diocese of Southern Ohio Endowment for Peace Studies Outreach was established June 5, 1992, by the Board of Trustees of The Ohio State University through funds received by the University from The Ohio State University Foundation for support of The Ohio State University Mershon Center.

Income provided by the Foundation shall be distributed to The Ohio State University Mershon Center to be used to support off campus programs on Peace Studies administered by the Director of the Mershon Center in cooperation with the Endowed Faculty Chair in Peace Studies.

**Change in Repository of Fund**

**The David S. Nicolls Athletic Scholarship Fund**

The David S. Nicolls Athletic Scholarship Fund was established November 1, 1991, by the Board of Trustees of The Ohio State University, with gifts from John B. Gerlach, Sr. of Columbus, Ohio, in honor of David S. Nicolls (B.S.Bus.Adm. '49). The repository of the gift was changed to the Ohio State University Foundation to reflect the donor's intent and, thus, the fund was revised June 5, 1992.

Income provided by the Foundation shall be used to supplement the grant-in-aid scholarship costs of student athletes who are pursuing undergraduate degrees at The Ohio State University. Recipients shall be selected by the Director of Athletics in consultation with the University Committee on Student Financial Aid.
June 5, 1992 meeting, Board of Trustees

HOSPITALS BOARD REPORT

Mr. Celeste:

On May 14 the Administrative/Operations Committee held a special meeting for an in-depth review of the Hospitals’ 1992-93 fiscal budgets. Following their review, the Committee unanimously recommended approval of the budgets.

The full Hospitals Board met on May 28. After receiving the report of the Administrative/Operations Committee, Board members reviewed and ultimately approved the 1992-93 budgets. The operating budget will be forwarded to Mr. Shkurti’s office for incorporation into the University budget. It is important to note two things about the operating budget. First, in order to position the Hospitals favorably in the competitive marketplace, it includes a recommended very low average overall rate increase of 3 percent, which is expected to produce a slender operation margin of only 0.5 percent for the fiscal year. Second, Hospitals Administration has constructed its 1992-93 budgets so as to fully support the goals and objectives of the Medical Center’s strategic plan.

Also, at the May 28 meeting, the Hospitals Board reviewed combined patient activity statistics for University Hospitals and the James Cancer Hospital. We received the April financial summary and heard reports from the Medical Director and Chief of Staff-elect. Ms. Susan Insley commented on the Board’s recent self-evaluation survey, gave a status report on the review of the Hospitals Board Bylaws, announced committee appointments, and distributed a proposed meeting schedule. We received a Medical Center development report and an overview of the College of Medicine’s Distinguished Teaching Endowment Fund. Lastly, Mr. Fraley spoke about several capital projects to be funded through the bond issue.

UNIVERSITY HOSPITALS BOARD APPOINTMENT

Resolution No. 92-143

Synopsis: Approval of the appointment of a University Hospitals Board member is proposed.

WHEREAS the Board of Trustees on November 30, 1979, approved the establishment of a University Hospitals Board; and

WHEREAS the membership of the Hospitals Board was approved on April 4, 1980, and has been subsequently amended; and

WHEREAS the term of one general public member of the Hospitals Board has expired:

NOW THEREFORE

BE IT RESOLVED, That the following individual be appointed as a general public member of the University Hospitals Board, for a three-year term, effective May 1, 1992.

Shirley D. Bowser
June 5, 1992 meeting, Board of Trustees

Upon motion of Mr. Celeste, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

Mr. Barone:

I think this entire Board is very pleased with this appointment of one of our former and hard working Trustees.

--0--

ACADEMIC AFFAIRS COMMITTEE REPORT

Mr. Kessler:

The Academic Affairs Committee met this morning and heard two very interesting reports from: 1) Dr. Charles Bender on the Supercomputer; and 2) Dr. David Boyne on Tenure and Promotions. The Committee is recommending the following resolutions:

RENMING OF BUILDING

Resolution No. 92-144

Synopsis: The Academic Affairs Committee recommended the renaming of Bradford Commons at 153 West Twelfth Avenue to the "Frank W. Hale, Jr., Hall."

WHEREAS this Board has authority in naming of all buildings and structures at The Ohio State University, as set forth in paragraph (G) of rule 3335-1-08 of the Administrative Code; and

WHEREAS in 1988 the Black Cultural Center, which was then under construction in Bradford Commons, was named "The Frank W. Hale Black Cultural Center"; and

WHEREAS Bradford Commons is no longer utilized as a dining facility; and

WHEREAS the President recommends, with the concurrence of the President's Executive Committee, that the aforementioned Bradford Commons be renamed in honor of Frank W. Hale, Jr.:

NOW THEREFORE

BE IT RESOLVED, That hereafter the building at 153 West Twelfth Avenue be named the "Frank W. Hale, Jr., Hall," in honor of Frank W. Hale.

Upon motion of Mr. Kessler, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--
June 5, 1992 meeting, Board of Trustees

ESTABLISHMENT OF NAMED CHAIR
Resolution No. 92-145

Synopsis: The Academic Affairs Committee recommended the approval of the establishment of a named chair.

WHEREAS in accordance with the guidelines previously established by the Board, The Bank One Chair for Excellence Fund was established May 8, 1987, through funds received by the University from The Ohio State University Foundation which established an endowed fund with gifts from Bank One; and

WHEREAS the name and description are being revised; and

WHEREAS the funding has now reached the level required:

NOW THEREFORE

BE IT RESOLVED, That the Bank One Chair for Excellence Fund be changed to The Bank One Chair for Excellence in Corporate Strategy. The annual income provided by the Foundation shall be distributed to the College of Business to support The Bank One Chair for Excellence in Corporate Strategy. The chair shall be used to attract and/or retain an internationally recognized scholar in the field of corporate strategy. Appointment to the chair shall be made by the Dean of the College of Business with the approval of the Senior Vice President for Academic Affairs and Provost and The Ohio State University Board of Trustees.

Upon motion of Mr. Kessler, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

DESIGNATION OF APPOINTING AUTHORITY AND TRANSFER OF AUTHORITY FOR CLASSIFICATION ADMINISTRATION
Resolution No. 92-146

Synopsis: The Academic Affairs Committee recommended the approval of the designation of Appointing Authority for Classified Civil Service employees and transfer of authority for Classification Administration.

WHEREAS as a part of the restructuring of the University administration, it is necessary to designate a new Appointing Authority for Classified Civil Service employees and to transfer the authority for the Classification Administration:

NOW THEREFORE

BE IT RESOLVED, That upon the recommendation of the President, Linda Tom, Vice President for Human Resources and Relations, be designated as the Appointing Authority for the non-instructional (Classified Civil Service) employees of the University pursuant to Chapter 124 of the Ohio Revised Code, and be given authority for Classification Administration, effective immediately.

Upon motion of Mr. Kessler, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.
June 5, 1992 meeting, Board of Trustees

**HONORARY DEGREES**

Resolution No. 92-147

Synopsis: The Academic Affairs Committee recommended the approval of honorary degrees for Roald Hoffman and Kenneth Boulding.

WHEREAS the Committee on Honorary Degrees and the University Senate, pursuant to rule 3335-5-488 of the Administrative Code, have approved for recommendation to the Board of Trustees awarding of honorary degrees as listed below:

Roald Hoffmann     Doctor of Science
Kenneth Boulding     Doctor of Science

NOW THEREFORE

BE IT RESOLVED, That the honorary degrees be awarded in accordance with the recommendation at a time convenient to the University and the recipients.

Upon motion of Mr. Kessler, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

**PERSONNEL ACTIONS**

Resolution No. 92-148

RESOLVED, That the personnel actions as recorded in the Personnel Budget Records of the University since the May 1, 1992 meeting of the Board, including the following Appointments, Appointment of Chairpersons, Reappointment of Chairpersons, Professional Improvement Leaves, Professional Improvement Leave--Change in Dates, Promotions/Tenure, and Emeritus Titles, as detailed in the University Budget be approved and the Medical Staff Appointments (The Ohio State University Hospitals) approved February 12 and March 11, 1992, by the Hospitals Board be ratified.

- PATRIC H. HENDERSHOTT, Professor, Department of Finance, effective Winter Quarter 1993.
- HARRY C. HERSHEY, Professor, Department of Chemical Engineering, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993.
- JOHN C. HUNTINGTON, Professor, Department of History of Art, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993.
- SUSAN L. HUNTINGTON, Professor, Department of History of Art, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993.
June 5, 1992 meeting, Board of Trustees

PERSONNEL ACTIONS (contd)

Professional Improvement Leaves (contd)

L. JAMES LEE, Professor, Department of Chemical Engineering, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993.

ROY J. LEWICKI, Professor, Department of Management and Human Resources, effective Autumn Quarter 1992 and Winter Quarter 1993.

HAJIME MIYAZAKI, Professor, Department of Economics, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993.

RICHARD F. MORTENSEN, Professor, Department of Microbiology, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993.

DEV S. PATHAK, Professor, Division of Pharmaceutical Administration, effective January 4, 1993, through June 30, 1993.

G. NEIL ROBERTSON, Professor, Department of Mathematics, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993.

LEILA J. RUPP, Professor, Department of History, effective Winter Quarter, Spring Quarter and Autumn Quarter 1993.

WILLIAM F. SAAM, Professor, Department of Physics, effective Autumn Quarter 1992.

PAUL W. SCIULLI, Professor, Department of Anthropology, effective Winter Quarter and Spring Quarter 1993.

NEIL E. SMECK, Professor, Department of Agronomy, effective October 1, 1992, through September 30, 1993.

PHILIP C. SORENSEN, Professor, College of Law, effective Spring Semester 1993.

KRISHNASWAMY SRINIVASAN, Professor, Department of Mechanical Engineering, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993.

MICHEL P. TALAGRAND, Professor, Department of Mathematics, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993.

CHRIS I. YESSIONS, Professor, Department of Architecture, effective Autumn Quarter 1992 and Winter Quarter 1993.

DANIEL C. K. CHOW, Associate Professor, College of Law, effective Autumn Semester 1992 and Spring Semester 1993.

MYROSŁAVA M. CISZEKUWYCZ, Associate Professor, Department of History of Art, effective Autumn Quarter 1992 and Winter Quarter 1993.

PAMELA JEAN CREEDON, Associate Professor, School of Journalism, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993.
Professional Improvement Leaves (contd)

JOHN M. HELLMAN, JR., Associate Professor, Department of English (Lima Campus), effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993.

PAMELA SUE HIGHLEN, Associate Professor, Department of Psychology, effective Winter Quarter and Spring Quarter 1993.

(JASON) TIN-LUN HO, Associate Professor, Department of Physics, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993.

ROBERT L. KAUFMAN, Associate Professor, Department of Sociology, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993.

YUJI KODAMA, Associate Professor, Department of Mathematics, effective Winter Quarter, Spring Quarter and Autumn Quarter 1993.

LAUREN J. KRIVO, Associate Professor, Department of Sociology, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993.

DIK L. LEE, Associate Professor, Department of Computer and Information Science, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993.

VERA MALETIC, Associate Professor, Department of Dance, effective Winter Quarter and Spring Quarter 1993.

CHIA-HSIANG MENQ, Associate Professor, Department of Mechanical Engineering, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993.

JAMES L. MURPHY, Associate Professor, University Libraries, effective July 1, 1992, through June 30, 1993.

BARRY L. NELSON, Associate Professor, Department of Industrial and Systems Engineering, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993.

RUTH D. PETERSON, Associate Professor, Department of Sociology, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993.

GAY SU PINNELL, Associate Professor, Department of Educational Theory and Practice, effective Winter Quarter and Spring Quarter 1993.

BRIAN M. POLLINS, Associate Professor, Department of Political Science, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993.

CARY B. RADER, Associate Professor, Department of Mathematics (Newark Campus), effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993.

PATRICK ROBLIN, Associate Professor, Department of Electrical Engineering, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993.
June 5, 1992 meeting, Board of Trustees

**PERSONNEL ACTIONS (contd)**

**Professional Improvement Leaves (contd)**

MOHAMMAD SAMIMY, Associate Professor, Department of Mechanical Engineering, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993.

ELIZABETH A. STASNY, Associate Professor, Department of Statistics, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993.

JOSEPH S. VERDUCCI, Associate Professor, Department of Statistics, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993.

RAKESH V. VOHRA, Associate Professor, Department of Management Sciences, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993.

STEPHEN YURKOVICH, Associate Professor, Department of Electrical Engineering, effective Autumn Quarter 1992.

TERRY J. WILSON, Assistant Professor, Department of Geological Sciences, effective Winter Quarter, Spring Quarter and Summer Quarter 1993.

STUDENT AFFAIRS COMMITTEE REPORT

Ms. Cusack:

At the Student Affairs Committee meeting today we had a presentation on recognizing and funding student organizations by Jim Kane, Luke Evans, Dr. Russ Spillman. Approximately 500 student organizations register at Ohio State annually. Registration is not an endorsement or approval by the University of an organization's purposes or activities. Registration entitles an organization to a number of privileges, including use of university facilities, logos, and identifying marks, the use of internal order forms to arrange for university goods and services, and also various training and consultation services offered by student organization services.
June 5, 1992 meeting, Board of Trustees

STUDENT AFFAIRS COMMITTEE REPORT (contd)

Ms. Cusack: (contd)

Aside from fund raising, the primary funding source for student organizations is the Council of Student Affairs which is called CSA. You will each be receiving a copy of the registration form for student organizations for your review. It should give you a better idea of what it takes to become a student organization at Ohio State and how the whole process for student organizations works.

We also had reports from the student government presidents. Since this was Sean Tipton's last meeting, he began by introducing his successor Karen Duncan, as the new president of CGS. Sean informed us that the graduate students have been fairly quiet as they wrap up the year. However, there is some real concern about financial aid, primarily in terms of the Graduate Associateships. Many students have no idea whether they will be funded at all for next year in light of the current budget crisis. I just wanted to thank Sean for everything. He did a fantastic job this year as graduate student president and he was a great voice for graduate students.

We also had a report from John Hilbert who attended his first meeting as the official president of USG, the Undergraduate Student Government. He has already selected and conducted several meetings with his new cabinet. All members of USG and Crime Watch Escort Service will be participating in cultural sensitivity training as a new program in USG. USG will work this out with Ombud Services to facilitate the program.

Finally, the Committee is recommending an expression of appreciation for Sean Tipton for his services as president of the Council of Graduate Students, for Sophia L. Paige for her service this past year as president of the Inter-professional Council, and also for Christine Chen for her service as president of USG earlier this year.

EXPRESSION OF APPRECIATION

Resolution No. 92-149

Synopsis: The Student Affairs Committee recommended an Expression of Appreciation to Sean B. Tipton.

WHEREAS Sean B. Tipton, a doctoral candidate in Political Science, has served as President of the Council of Graduate Students during the past year; and

WHEREAS Sean has served the University in an exemplary manner, both in academic and leadership roles; and

WHEREAS he has carried out his duties with a high degree of integrity and professionalism; and

WHEREAS he has earned the respect and regard of faculty, staff and students with whom he has interacted:

NOW THEREFORE
June 5, 1992 meeting, Board of Trustees

**EXPRESSION OF APPRECIATION (contd)**

BE IT RESOLVED, That this Board expresses appreciation to Sean B. Tipton for his outstanding contributions of leadership and service to The Ohio State University and wishes him happiness, good health, and success in the future.

Upon motion of Ms. Casto, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

**EXPRESSION OF APPRECIATION**  
Resolution No. 92-150

Synopsis: The Student Affairs Committee recommended an Expression of Appreciation to Sophia L. Paige.

**WHEREAS** Sophia L. Paige, a student in The College of Medicine, has served as the first student member of The Ohio State University's Board of Trustees; and

**WHEREAS** Sophia has given generously of her time to serve as a role model for students in secondary schools to encourage them to pursue a college education; and

**WHEREAS** her academic endeavors extended into professional contributions of the highest standards; and

**WHEREAS** she has served as President of the Interprofessional Council during this past year and has earned the respect and regard of faculty, staff and students with whom she has interacted:

NOW THEREFORE

BE IT RESOLVED, That this Board expresses appreciation to Sophia L. Paige for her outstanding contributions of scholarship, leadership, and service to The Ohio State University and wishes her happiness, good health, and success in the future.

Upon motion of Ms. Casto, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

**EXPRESSION OF APPRECIATION**  
Resolution No. 92-151

Synopsis: The Student Affairs Committee recommended an Expression of Appreciation to Christine Chen.

**WHEREAS** Christine Chen is a senior majoring in Sociology, has served as President of the Undergraduate Student Government; and

**WHEREAS** she has served as vice president of the Student Alumni Council; and
EXPRESSION OF APPRECIATION (contd)

WHEREAS Christine has served in several leadership roles at the University; and

WHEREAS she has demonstrated her commitment to furthering the missions and goals of The Ohio State University:

NOW THEREFORE

BE IT RESOLVED, That this Board expresses its thank and appreciation to Christine Chen for her dedicated leadership and service to The Ohio State University and wishes her happiness, good health, and success in all her future endeavors.

Upon motion of Ms. Casto, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

INVESTMENTS COMMITTEE REPORT

Amb. Wolf:

The Investments Committee heard the monthly Endowment Summary Report for the period April 17, 1992 through May 15, 1992. The market value of the Endowment Fund on May 15, 1992 was $400.7 million. This total was approximately $4.5 million below the April 17, 1992 market value. The market value of the equity portion of the Endowment Fund decreased $6.6 million, while the Fixed Income portion increased $1.4 million during this reporting period. Net new additions to the Endowment Fund for May totalled $854,000.00.

Since July 1, 1991, the beginning of the fiscal year, the Endowment Fund has increased over $49 million. Net new additions are just over $26.5 million, a new one-year high. The net change in market value has accounted for an increase of $27.3 million. The current asset allocation for the Endowment is 58 percent invested in equities, 27 percent in fixed income, 9 percent in real estate, and 6 percent in cash equivalents. The total return for the Endowment Fund thus far in Fiscal Year 1992 is 10.9 percent.

The Investments Committee next heard the quarterly report on Total Cash and Investments for the University. It was reported that the total of cash and investments for all accounts as of March 31, 1992, was $730.9 million. This was an increase of $4.1 million from the quarter ended December 31, 1991. The primary reason for this increase came from a $7.7 million net increase in the University's Operating Funds. Total cash and investments since the beginning of the fiscal year has increased $71.3 million, primarily due to the increase in the University Endowment Fund.

Next, the Investments Committee heard reports on Endowment Fund Properties, the Busch Boulevard Centre, and the River Road Hotel Corporation. It was noted that the $34 million Endowment Real Estate Portfolio has a total annual return of 8.7 percent, which is not bad, in this particular market. And that concludes my report, Mr. Chairman.

June 5, 1992 meeting, Board of Trustees

AGRICULTURAL AFFAIRS COMMITTEE REPORT

Mr. Colley:

Mr. Chairman, the Agricultural Affairs Committee plans to meet on the following dates this year: July 17, in conjunction with the 100-year celebration and Centennial, at the Ohio Agricultural Research and Development Center in Wooster; August 14, at the State Fair; and September 22 at the Farm Science Review in London, Ohio. Plans for next year include two meetings: one at the southwest district office of the Ohio Cooperative Extension Service, and the second at the western branch of the Ohio Agricultural Research and Development Center in Vandellia, and South Charlestown, respectively.

Mr. Chairman, that concludes my report.

REPORT - UNIVERSITY’S CASH AND INVESTMENTS
QUARTERLY REPORT

Resolution No. 92-153

RESOLVED, That the quarterly report on the University's Endowment Fund, dated March 31, 1992, as submitted to the Investments Committee of the Board of Trustees, be received and filed with the official records of the Board.

--0--

Thereupon the Board adjourned to meet Friday, July 10, 1992, at The Ohio State University Fawcett Center for Tomorrow, Columbus, Ohio.

Attest:

Madison H. Scott     John J. Barone
Secretary            Chairman

1322
THE OHIO STATE UNIVERSITY
OFFICIAL PROCEEDINGS OF THE
ONE THOUSAND TWO HUNDRED AND EIGHTY-FOURTH MEETING
OF THE BOARD OF TRUSTEES

Columbus, Ohio, July 10, 1992

The Board of Trustees met at its regular monthly meeting on Friday, July 10, 1992, at The Ohio State University Fawcett Center for Tomorrow, Columbus, Ohio, pursuant to

**    **    **

Minutes of the last meeting were approved.

**    **    **
President Shumate, Theodore S. Celeste, Michael F. Colley, George A. Skestos and Kristen Cusack.

The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on July 10, 1992.

Present: John J. Barone, Chairman, Deborah E. Casto, John W. Kessler, Leslie H. Wexner, Alex Shumate, Theodore S. Celeste, Michael F. Colley, George A. Skestos, and Kristen Cusack. And, Mr. Patric Foley.

Mr. Barone:

The July 10, 1992 meeting of the Board of Trustees

The Board of Trustees are called to order by Mr. Barone, the Chairman.

Mr. Barone: The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on July 10, 1992.

Present: John J. Barone, Chairman, Deborah E. Casto, John W. Kessler, Leslie H. Wexner, Alex Shumate, Theodore S. Celeste, Michael F. Colley, George A. Skestos, and Kristen Cusack.

Mr. Barone: The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on July 10, 1992.

Mr. Barone: The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on July 10, 1992.

Mr. Barone: The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on July 10, 1992.

Mr. Barone: The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on July 10, 1992.

Mr. Barone: The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on July 10, 1992.

Mr. Barone: The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on July 10, 1992.

Mr. Barone: The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on July 10, 1992.

Mr. Barone: The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on July 10, 1992.

Mr. Barone: The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on July 10, 1992.

Mr. Barone: The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on July 10, 1992.

Mr. Barone: The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on July 10, 1992.

Mr. Barone: The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on July 10, 1992.

Mr. Barone: The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on July 10, 1992.

Mr. Barone: The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on July 10, 1992.

Mr. Barone: The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on July 10, 1992.

Mr. Barone: The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on July 10, 1992.

Mr. Barone: The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on July 10, 1992.

Mr. Barone: The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on July 10, 1992.

Mr. Barone: The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on July 10, 1992.

Mr. Barone: The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on July 10, 1992.

Mr. Barone: The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on July 10, 1992.

Mr. Barone: The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on July 10, 1992.

Mr. Barone: The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on July 10, 1992.

Mr. Barone: The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on July 10, 1992.

Mr. Barone: The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on July 10, 1992.

Mr. Barone: The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on July 10, 1992.

Mr. Dana Bruce:

I believe that I am an outstanding employee, and based on the work situation, and my work as Acquisitions Clerk, I think I should be reinstated.

I ask that you seriously review these documents with the intent of reinstating me to my position.

Are there any questions?

I want to thank you for the opportunity to present this information to you, and for your time in considering it.

Mr. Barone:

Mr. Foley, I believe Vice Chairperson Debbie Casto has a statement to make.

Ms. Casto:

I would like to thank you, Mr. Foley, for sharing your concerns with the Board. We can appreciate your thoughts about this matter. After we have reviewed all these documents we will inform you as to our decision.

Mr. Foley:

Okay, thanks a lot. Thank you.

Mr. Barone:

Thank you, Mr. Foley.

Mr. Dana Bruce:

Thank you, Mr. Chairman. As you are well aware, the members of A.C.T.I.O.N., an expanding group of African faculty, staff, and students at The Ohio State University, have worked tirelessly over the past ten weeks to address the enhancement of OSU's African constituency. To his credit, OSU President E. Gordon Gee has committed both time, administrative staff and future resources to the mutually-agreeable resolution of the issues of racism (white supremacy) which have led us to take the principled position that we will call for a boycott of OSU by potential African students, including student-athletes, unless the University makes it clear through demonstrated commitment to existing and future initiatives and programs that African people are a valued and nurtured constituency here.

In response to our May 4 document, listing 22 demands and concerns addressing some of our core problems, Dr. Gee has moved swiftly, meeting many of the issues by charging various senior-level administrators in his cabinet to join us in a committee-structure set up to flesh out the stated University commitment to our issues.

The first order of business is the University Black Action Plan Committee. It has become evident that this Committee, represented by Linda Tom, Vice President for Human Resources, has been given more responsibility than it has the authority to implement. More, in close association with the Provost's office, we have received a commitment to revitalizing and reining the University Black Action Plan, including the possible grouping of all protected group action plans under an "Oversight Board" with both incentive and penalty-issuing authority. This is consistent with our suggestion that all areas at the University currently concerned with the progress of "minority" groups be routed to an enhanced central Office of Minority Affairs. We have met twice and feel that progress has been fair.

The second order of business is the Capital Campaign/African Development Fund Committee. We have received the support, counsel, and experience of Campaign Director, Art Brodeur and the University Development office as we flesh out the details of a plan designed to produce $1 million per annum in a fund which will afford both creative new programs and augmentation of existing programs for African people. We have met twice and feel that progress, pending the presentation of the actual plan, has been good.

The third order of business is the African-American Living/Learning Center Committee. The plan of the pilot program for the living/learning center has been completed by Rebecca Parker, Office of Residence and Dining Halls, in conjunction with A.C.T.I.O.N. It should be at the Vice President for Student Affairs office. We are comfortable with the structure to date and wish to reiterate the non-discriminatory purpose of a project designed to create an environment of living and learning about African intellectual and social culture for African and non-African students. We encourage your support in helping us dispel the myth that this project is segregationist in nature. Once again, progress has been good.

The fourth order of business is the Black Studies Enhancement Committee. There has been some movement toward the articulation of our vision of the OSU Department of African World Studies as a preeminent nationally-acclaimed program with a fully-staffed and supported PhD. component; however, inertia from both the Provost's office and the department level has left us very cautious and in deep anticipation of the interim report to the President. We have only met once and feel that progress has been poor to fair.

The fifth order of business is the Frank W. Hale, Jr. Cultural Center Completion Committee. There have been solid and clearly defined time-tables established in accordance with the priority one funding request in the 1992 biennial budget submission to the Ohio Legislature. Vice Presidents Pichette and Shikursi, the University Architect's office, and the Office of Campus Planning have attacked this project with enthusiasm for our step-by-step input in the ongoing process of building planning, design, and program implementation. Your approval of the renaming of the former Board of Trustees and the Carroll Center has been given more responsibility than it has the authority to implement. More, in close association with the Provost's office, we have received a commitment to revitalizing and reining the University Black Action Plan, including the possible grouping of all protected group action plans under an "Oversight Board" with both incentive and penalty-issuing authority. This is consistent with our suggestion that all areas at the University currently concerned with the progress of "minority" groups be routed to an enhanced central Office of Minority Affairs. We have met twice and feel that progress has been fair.

The second order of business is the Capital Campaign/African Development Fund Committee. We have received the support, counsel, and experience of Campaign Director, Art Brodeur and the University Development office as we flesh out the details of a plan designed to produce $1 million per annum in a fund which will afford both creative new programs and augmentation of existing programs for African people. We have met twice and feel that progress, pending the presentation of the actual plan, has been good.

The third order of business is the African-American Living/Learning Center Committee. Mr. Barone:

Bradford Commons to Hale Hall has boosted the morale of the hundreds of students, staff, and faculty who frequent the Center weekly, even in its abbreviated summer hours of operation. Two meetings have left us with a sense that progress has been good.

These committees do not reflect all of our concerns raised in our May 4 document; however, they do trace the commitment flowing from the presidential level to best deal with our concerns in a manner consistent with the present administration's commitment to high quality education with the greatest possible degree of efficiency and moral compassion for all concerned.

In full agreement with the spirit of President Gee's push for excellence and efficiency, A.C.T.I.O.N. wishes to propose the consolidation of programs affecting minority people under an expanded and enhanced Office of Minority Affairs (OMA). Our concept of this new OMA would involve an umbrella oversight office with sub-offices which specifically address the concerns of each constituency, hence a Department of African Affairs, Department of Latino Affairs, Department of Asian Affairs, etc. This would accomplish many goals, including: 1) The reduction of duplication of effort between the Office of Student Life and OMA; 2) The granting of relative autonomy to those working directly with each group to allow for the creation of a constituent specific and university-wide retention philosophy.

As we close, we remind you that the clock is ticking on our decision to boycott OSU if we do not see substantial progress by the end of the summer. The letters to hundreds of blue-chip African athletes in all sports have been written and are awaiting mailing should our mutual efforts fail. Likewise, the parents of thousands of African children across the state and country will receive word of our failure to improve our lot, including the parents of OSU's Young Scholars Program.

We do not wish to convey that we are posturing or threatening any one or thing. We fully realize that we are all in this environment together and that we can only make it work together. We promise to keep you regularly updated on our progress and we await both the Interim reports and the final summer report, in anticipation of our September report to our larger constituency which will decide our course of action. Thank you for your time, continued patience, and support as we work to empower each other. May the ancestors guide you in your thoughts and in your hearts.

Mr. Barone:

Thank you, Mr. Bruce. At this time I'd like to call upon Vice Chairperson Caslo.

Ms. Caslo:

Thank you, Mr. Barone. We'd like to thank you for your comments, they've enlightened our sensitivity to these critical concerns. As a Board, we are committed to having effective affirmative action programs and specifically African-American issues that are facing our faculty, staff, and students. We fully support President Gee to rejuvenate the various programs so that they are effective and supportive. We are aware that the previous commitments fell short of their mission. We are confident that President Gee will implement changes to ensure appropriate goals and aspirations that can be realized by the entire university community.
FISCAL AFFAIRS COMMITTEE MEETING

Mr. Shumate:

The Fiscal Affairs Committee will be a committee of the whole this morning and the first item on the agenda is the discussion of the budget for 1992-93 -- the current funds budget. I would like to call upon Vice President Shihuri.

Mr. Shumur:

Thank you, Mr. Shumate. I guess it would be an understatement to describe this as a very challenging budget. Ten days ago we had no idea what our subsidy or tuition would be, and both of these account for 99 percent of the University's income.

The fact that there is a completed budget statement for you to review today is due to the hard work of a number of people throughout the University. Mr. Chairman, if you wouldn't mind, I would like to acknowledge these individuals.

Barb DeYoung, from University Budget Planning, is the person responsible for translating the subsidy numbers into what the reductions are for the University. Working with her is John Lowe and he is responsible for putting the budget book together. We were so proud of his effort that we let him out of the basement for the first time in 8 years to come to this meeting. Eric Kunz, Assistant Vice President for Budget Planning, is the newest supervisor in the finance area. Eric had the coincidence of good timing. He has been doing nothing but budget cuts since he arrived here a year and a half ago.

Liz Hart is chief of the Financial Management Section. Despite her youthful appearance she has been a University employee for 10 years, and assures me that this budget has been more fun than any she's done before. Liz had a great deal to do with putting together the fee and charge information and was also the only person that endured with me all the budget hearings with the vice presidents. Janet Achterman, Controller, is the person Liz reports to and is responsible for overseeing the University's accounting system. Her experience with the University and her counsel and advice to me were instrumental in getting this budget put together on time. To show you that University employees can do more than one thing at a time -- at the same time Janet was worrying about the budget, she also had to worry about getting the books closed for fiscal year 1992.

The final person I'd like to introduce does not work for the Office of Finance, but did play an important role in this budget -- Ed Ray, Associate Provost. Ed reports to Joan Huber and has inherited the budget responsibilities. He has been an extreme help to both Joan and myself in putting this budget together. So on behalf of this University, I would like to thank all of you for your efforts and the efforts of your co-workers in helping to get this document out on time.

Mr. Chairman, let me turn next to the substance of the budget. In a way the task before us is both simple and complex. It's simple in the sense that the President made it clear that the prime objective of this budget is to protect the academic core of this institution. That's why we are here and that is what we are about. The complexity is how we do that in a time when our resources are declining both in real and in relative terms. That is not an easy thing to do, but as you will see we have protected the academic core and in some cases enhanced it.

Mr. Shumate: (contd)

The way we've been able to do that despite declining resources is by recommending unfortunately -- although I think we have no alternative but to do this -- no salary increases for faculty and staff in the coming year, and the elimination of up to 1,000 jobs throughout the campus and its assorted branches in other parts of the University. Even with doing these two measures of no salary increases and eliminating up to 1,000 jobs, that in itself is still not enough to accomplish what we need to do. So in addition, we will have to ask you to recommend a tuition increase for our students.

Now let me explain what each of these mean and how they fit together in the budget recommendations you have before you. When we talk about the academic core, we recognize that the primary purpose of this institution is teaching and research. So the academic core includes faculty, libraries, honors programs, and all the core courses that serve large numbers of students from different disciplines. The President mentioned earlier in his remarks that we've set aside $1.5 million for 16,000 seats, to protect those seats in core courses, and to help deal with the course closing problem. That commitment remains no matter what happens to the budget over the next several months, even if we have further reductions and the power company turns out our lights that $1.5 million will still go to core courses even if they have to be conducted in candle light.

I think the final element of the academic core has to be our students and the services that are important for those students to be able to get the kind of education they need at this institution. That includes services such as academic computing and financial aid which are critical to protecting the academic core of the institution.

Now let me talk next about salary increases. As I mentioned, we will not be able to provide salary increases for most University employees. Let me explain what I mean by that. The University, to the best we can tell from people who have been here a long time, has been able to do some sort of salary increase for its employees every year since the Great Depression. This year will be the first year we are not able to do that.

We have about 20,000 full-time equivalent employees. The issue I just mentioned of no salary increases applies to about three-quarters of them. About one-quarter of our full-time employees are on long-term contracts that have been negotiated. We will honor those contracts and where they call for it pay increase in most cases.

In other parts of the University, to the best we can tell from people who have been here a long time, has been able to do some sort of salary increase for its employees every year since the Great Depression. This year will be the first year we are not able to do that.

We have about 20,000 full-time equivalent employees. The issue I just mentioned of no salary increases applies to about three-quarters of them. About one-quarter of our full-time employees are on long-term contracts that have been negotiated. We will honor those contracts and where they call for it pay increase in most cases.

In addition, we have a small number of faculty, about 100, that are up for merit promotion in this cycle. We will honor those merit promotion commitments. Again, those are faculty that are promoted on the basis of merit not simply because they have been here. This is the time in the cycle where they're up for their review and we felt it would be unfair to them, and would do damage to the academic core, to not recognize those promotions. But otherwise there will be no pay increases and, in fact, a decrease in take-home pay.

Next, let me elaborate on what I mean by mean by the loss of up to 1,000 jobs throughout this University. These jobs mean positions -- many of which are vacant -- because there are faculty that are promoted on the basis of merit not simply because they have been here. This is the time in the cycle where they're up for their review and we felt it would be unfair to them, and would do damage to the academic core, to not recognize those promotions. But otherwise there will be no pay increases and, in fact, a decrease in take-home pay.

July 10, 1992 meeting, Board of Trustees

Mr. Shihuri: (contd)

The whole of this morning and the first item on the agenda is the discussion of the budget for 1992-93 -- the current funds budget. I would like to call upon Vice President Shihuri.

Mr. Shihuri:

Thank you, Mr. Shumate. I guess it would be an understatement to describe this as a very challenging budget. Ten days ago we had no idea what our subsidy or tuition would be, and both of these account for 99 percent of the University's income.

The fact that there is a completed budget statement for you to review today is due to the hard work of a number of people throughout the University. Mr. Chairman, if you wouldn't mind, I would like to acknowledge these individuals.

Barb DeYoung, from University Budget Planning, is the person responsible for translating the subsidy numbers into what the reductions are for the University. He has been doing nothing but budget cuts since he arrived here a year and a half ago.

Liz Hart is chief of the Financial Management Section. Despite her youthful appearance she has been a University employee for 10 years, and assures me that this budget has been more fun than any she's done before. Liz had a great deal to do with putting together the fee and charge information and was also the only person that endured with me all the budget hearings with the vice presidents. Janet Achterman, Controller, is the person Liz reports to and is responsible for overseeing the University's accounting system. Her experience with the University and her counsel and advice to me were instrumental in getting this budget put together on time. To show you that University employees can do more than one thing at a time -- at the same time Janet was worrying about the budget, she also had to worry about getting the books closed for fiscal year 1992.

The final person I'd like to introduce does not work for the Office of Finance, but did play an important role in this budget -- Ed Ray, Associate Provost. Ed reports to Joan Huber and has inherited the budget responsibilities. He has been an extreme help to both Joan and myself in putting this budget together. So on behalf of this University, I would like to thank all of you for your efforts and the efforts of your co-workers in helping to get this document out on time.

Mr. Chairman, let me turn next to the substance of the budget. In a way the task before us is both simple and complex. It's simple in the sense that the President made it clear that the prime objective of this budget is to protect the academic core of this institution. That's why we are here and that is what we are about. The complexity is how we do that in a time when our resources are declining both in real and in relative terms. That is not an easy thing to do, but as you will see we have protected the academic core and in some cases enhanced it.
July 10, 1992 meeting, Board of Trustees

Mr. Shurtle: (contd)

books, the budget authority will leave, but it will not necessarily be a person in that position. However, because of the large number of positions that have to be eliminated over a fairly short period of time, there will be layoffs involved throughout the University over the next couple of months. We hope to avoid those as much as we can. Linda Tom's people are working to try and place people whose positions are being eliminated in other parts of the University. For people that are not regular faculty, some of this job loss will occur to filled positions and people will be laid off.

In addition, a substantial portion of these positions are students. Both graduate students who do teaching for us and undergraduate students who work in various functions throughout the University. Under state law and the way these positions are defined, they aren't really counted as layoffs. But if you're a graduate or undergraduate student who is working your way through college and you had a job last year and you don't have a job this year the effect is the same as a layoff because it makes it a lot harder to put together the income you need to continue.

The figure of up to 1,000 jobs -- I also want to clarify -- includes: both the main campus, the branch campuses, and our agricultural campuses both in Wooster and in other parts of the campuses. In some cases the cuts will be more severe in agriculture because of the reductions in the line-item than they will be to the main campus.

Now even with these steps of no salary increases and the loss of up to 1,000 positions, it will still not be enough to close the gap between available resources and protecting the academic core. So the third step of the budget plan is an increase in tuition. If we tried to make up the entire reduction in state subsidy that the University has suffered as a result of the July budget cuts, it would require a tuition increase of 20 percent. Let me say that again, if we were to make up the entire budget reduction we received in July by increasing tuition -- that's about $30 million -- that would require a tuition increase of 20 percent. We do not feel this would be fair to our students. We do need to come up with some additional income to close the gap and protect the academic core. So we are recommending to you a tuition increase of 7 percent, which is about $100 for an in-state undergraduate student. If the tuition cap is lifted, a tuition increase of up to 9 percent is possible. We do this reluctantly and would prefer not to raise tuition at all. But if the choice is between an increase in tuition or doing permanent damage to the academic core, which is why the students are here, our choice has to be to protect the academic core.

Let me make one other point. This is a somewhat unstable budget period. The State is finding a problem in projecting its resources and the University depends on state resources. Even if we go ahead and implement all the steps I mentioned -- the loss of jobs, the tuition increases, and the other steps -- it may still not be enough. It is possible we will have to come up with another $10 million in either revenue increases or spending reductions between now and the end of the year to have the budget balance for the University.

Now a lot of this depends on what happens in the final subsidy distribution by the Board of Regents which is our largest source of income. We won't know what that final subsidy distribution is until December. That will depend on the number of students enrolled at Ohio State and also throughout the system in Ohio. Until we know that, the number could change by at least plus or minus $5 million. So it leaves a certain amount of uncertainty in terms of dealing with our budget in the months ahead.

In addition, there still hasn't been a final decision on what the fee caps are for state universities. We also won't know until fall quarter what our fall enrollment is. That affects both subsidy and tuition. For those reasons we have stopped short of developing a plan for a full $33 million in cuts. The steps I mentioned earlier will save us $23 million. And, again, we could have to come up with another $10 million we hope as the maximum. We will know better as the year goes on, but we will have a plan to you no later than January 15, 1993, on how we plan to close the additional $10 million gap if that's necessary.

Now what I've covered so far is stressing our primary goal which is to protect the academic core and how we're protecting it with less resources. Let me talk just a minute about the process of how we got to this point. Planning for this budget began 6 months ago. The first step was a clear set of objectives on what it is we wanted to accomplish. That was stated in the President's letter to the campus community on January 13, 1992. He stated that the first priority was protecting the academic core. So I think we're at least being consistent with what our objectives are.

In the two months that followed detailed consultations began with the University Senate Fiscal Committee, which is part of our governing structure, with the deans, with the vice presidents, and with other elements of the campus community on how we would achieve those goals in what looked like a very unstable resource environment. During the month of March, criteria on how budget reductions would be applied to both academic and academic support units were shared with the appropriate University personnel and various scenarios were developed on how to deal with a variety of possible budget situations. You may recall those criteria and scenarios were reviewed with the Board at our April and May Board meetings. Once the Governor made his decision on how the budget would be dealt with in Fiscal Year 1993, we then took those numbers and tried to match them with the goals, applied the criteria we talked about, and are bringing forward to you the budget recommendation.

The resolution that we're asking you to vote on today simply asks you to give us the authority to take the next step then in implementing this budget. It sets the parameters on tuition, pay, fees, and budget expenditures, and sets forth the procedure for the second step to achieve up to $10 million in reductions. What I need to make clear is that the budget resolution you're being asked to vote upon today does not ask for you to vote on specific eliminations of any unit or any part of a unit, or any specific program. Those eliminations will be handled initially through administrative channels and then where University policy appropriately requires the Board will act on such eliminations. That will be brought forward to you at the appropriate time.

Let me summarize by again stressing that our single most important goal is to protect the academic core of this institution no matter what, even though resources are in a significant decline, by not giving out discretionary pay raises, by eliminating 1,000 positions, and by asking for an increase in tuition from 7 to 9 percent. I think the process we've used is a good one. We made the best of a difficult situation. I think making tough decisions and tough choices among various parts of the University, all of which are important functions, I think we can look toward moving forward and continuing to succeed even though the resources environment is less...
July 10, 1992 meeting, Board of Trustees

Mr. Shumate: (cont'd)

than what we would have liked. Mr. Chairman, that concludes my presentation. If you or any other members of the Board have any questions, I would be glad to respond.

Mr. Shumate:

Thank you, Mr. Shumate. I know the Board members have previously received written material and as you've pointed out we've discussed the process and the priorities at earlier meetings. But certainly if there are any questions, please feel free to raise them at this time. Any questions? Thank you. I'd also like to thank Mr. Shumate and his staff, on behalf of the Board, for the excellent job they have done in dealing with a very tough, difficult situation and for the timeliness of the information that you've given to the Board.

1992-93 CURRENT FUNDS BUDGET

Resolution No. 93-1

Synopsis: The budget for fiscal year 1992-93 is being submitted for adoption.

WHEREAS the levels of resources have been identified for the second year of the 1991-93 biennium and
WHEREAS appropriate planning and consultation within the University has been accomplished; and
WHEREAS the President is now prepared to present the 1992-93 budget.

NOW THEREFORE

BE IT RESOLVED, That the University's Current Funds Budget for fiscal year 1992-93, as described in the accompanying text and tables, be approved, with authorization for the President to make expenditures within the projected income levels; and

BE IT FURTHER RESOLVED, That the President, in consultation with the Provost and Vice President for Finance, provide to the Board prior to January 15, 1993 recommendations for further spending reductions or revenue increases up to $10 million to assure that General Funds expenditures do not exceed revenues for the fiscal year ending June 30, 1993; and

BE IT FURTHER RESOLVED, That tuition and fees be increased for all students beginning Autumn Quarter 1992 as specified in the Schedule of Student Fees incorporated in this resolution which is in compliance with current legislation and that the President be authorized to increase tuition and fees up to 9.5% over FY 1992 levels provided future legislation or Controlling Board action so permits; and

BE IT FURTHER RESOLVED, That the Secretary be instructed to incorporate all supporting documents into the minutes of this meeting, including Fees and Charges, and to file these materials with the official records of this University.

Upon motion of Mr. Shumate, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix I for charts, page 49.)

July 10, 1992 meeting, Board of Trustees

EMPLOYMENT OF ARCHITECTS/ENGINEERS AND REQUEST FOR CONSTRUCTION BIDS Resolution No. 93-2

LABORATORY ANIMAL CENTER BUILDING #2

Synopsis: Authorization to employ architects/engineers and request construction bids for the listed project is proposed.

WHEREAS the University desires to construct an addition to and remodel the Laboratory Animal Center Building #2 to house a monkey containment facility; and
WHEREAS this project will include the addition of approximately 12,000 square feet, and renovation of existing space, including cage washing equipment, automatic animal watering system, and large sterilizers; and
WHEREAS the total estimated project cost is $2,500,000.00, and total estimated construction cost is $2,000,000.00, with funding provided from University bond proceeds:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to select qualified architectural/engineering firms as necessary for this project and that the fees for these services be negotiated between the firms selected and The Ohio State University; and
BE IT FURTHER RESOLVED, That the President and/or Vice President for Business and Administration be authorized to request construction bids on this project in accordance with established University procedures, and if satisfactory bids are received, to award contracts, all actions to be reported to this Board at the appropriate time.

Upon motion of Mr. Shumate, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

REPORT OF AWARD OF CONTRACTS AND ESTABLISHMENT OF CONTINGENCY FUNDS Resolution No. 93-3

COMMUNICATIONS LAB DEMOLITION

BOTANY AND ZOOLOGY GREENHOUSE AND 12TH AVENUE PARKING GARAGE

HASKETT HALL - EXTERIOR MASONRY REPLACEMENT

MORRILL TOWER RESIDENCE HALLS UPGRADE TREATMENT, PHASE III

STARLING-LOVING - COMPUTER CENTER MACHINE ROOM EXPANSION

ODOC - WOOSTER CAMPUS ROAD RESURFACING

AGRICULTURE BUILDINGS LAB RENOVATIONS

Synopsis: Acceptance of the report of award of contracts and the establishment of contingency funds for the listed projects is recommended.
REPORT OF AWARD OF CONTRACTS AND
ESTABLISHMENT OF CONTINGENCY FUNDS (contd)

COMMUNICATIONS LAB DEMOLITION

BOTANY AND ZOOLOGY GREENHOUSE AND 12TH AVENUE PARKING GARAGE

HASKETT HALL - EXTERIOR MASONRY REPLACEMENT

MORRILL TOWER RESIDENCE HALLS UPGRADE TREATMENT, PHASE III

STARLING-LOVING - COMPUTER CENTER MACHINE ROOM EXPANSION

OARDC - WOOSTER CAMPUS ROAD RESURFACING

AGRICULTURE BUILDINGS LAB RENOVATIONS (contd)

WHEREAS resolutions adopted by the Board of Trustees on October 6, 1990, March 1, 1991, and September 6, 1991 authorized the President and/or Vice President for Business and Administration to request construction bids in accordance with established State of Ohio and University procedures, and if satisfactory bids were received to award contracts for the following projects: Communications Lab Demolition, Haskett Hall - Exterior Masonry Replacement, Morrill Tower Residence Halls Upgrade Treatment, Phase III, Starling-Loving - Computer Center Machine Room Expansion, OARDC - Wooster Campus Road Resurfacing, and Agriculture Building Lab Renovations; and

WHEREAS a resolution adopted by the Board of Trustees on July 12, 1991 authorized the President and/or Vice President for Business and Administration to request construction bids in accordance with established University and State of Ohio procedures, and if satisfactory bids were received to recommend the award of contracts for the following projects: Botany and Zoology Greenhouse and 12th Avenue Parking Garage.

NOW THEREFORE

BE IT RESOLVED, That pursuant to the actions previously authorized by this Board, the report of award of contracts and establishment of contingency funds for these projects is hereby approved.

Upon motion of Mr. Shumate, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

June 1, 1992 meeting, Board of Trustees

REPORT OF AWARD OF CONTRACTS AND
ESTABLISHMENT OF CONTINGENCY FUNDS (contd)

PERS EARLY RETIREMENT INCENTIVE PROGRAM

Resolution No. 93-4

WHEREAS the Ohio Revised Code Section 145.290 requires State entities to implement retirement incentive programs with the Public Employees Retirement System of Ohio (PERS) in designated employing units during periods when staffing reductions reach levels specified in the aforementioned code; and

WHEREAS the Ohio Revised Code Section 145.297 enables State agencies and institutions of higher education to establish voluntary retirement incentive plans for individuals at their respective institutions who are members of the Public Employees Retirement System (PERS); and

WHEREAS there exists significant uncertainty related to the staff reductions in the University's colleges and administrative areas; and

WHEREAS the University desires to both comply with the mandatory section of the aforementioned code and to provide more flexibility in its long term planning for its human resource needs;

NOW THEREFORE

BE IT RESOLVED, That effective August 1, 1992, and continuing for one year thereafter, the University will establish a voluntary plan under O.R.C. Section 145.297 and purchase service credit for eligible PERS members electing to retire under this plan, and further that the amount of service credit purchased shall not exceed the lesser of one year or twenty percent (20%) of the individual's total service credited by PERS as of the date the eligible PERS member elects to participate in this plan; and

BE IT FURTHER RESOLVED, That to be eligible, all participants must be members of PERS and be currently eligible to retire or eligible to retire after including service credit to be purchased under the plan; and

BE IT FURTHER RESOLVED, That the maximum number of eligible members under this plan will be limited to five percent (5%) of the total number of individuals at the University who are members of PERS as of August 1, 1992, and further that if the total number of persons applying for this program exceeds the five percent (5%) maximum, then approval for participation will be determined in accordance with O.R.C. Section 145.297(C); and

BE IT FURTHER RESOLVED, That the President and/or Vice President for Human Resources are hereby authorized to notify the Public Employees Retirement System on the official form approved by the agency of the Ohio State University's election to participate in the retirement incentive plan in accordance with O.R.C. Section 145.297 and the terms of this resolution; and

BE IT FURTHER RESOLVED, That Appendix LV of Board Resolution No. 92-76, pertaining to re-payment of retired individuals, will not apply to individuals who retire under this program and who are subsequently rehired by the University.

UPON MOTION OF MR. SHUMATE, SECONDED BY MR. SKESTOS, THE BOARD OF TRUSTEES ADOPTED THE FOREGOING RESOLUTION BY UNANIMOUS ROLL CALL VOTE.
RESEARCH FOUNDATION REPORT

Mr. Celeste:

You should all have a Research Foundation book in front of you and I will just make some brief comments on the highlights of that book. I am pleased to report that the increase in research funding received by The Ohio State University Research Foundation continues to show real growth. If you look under Tab 1, you will notice that the award level for the period July through May, is 23.48 percent above the same period last year. The number of awards received for the current period has increased from 1,260 to 1,401. This month there has been a significant increase in the awards received from the National Institutes of Health.

Under Tab 2 you will find the various expenditure summaries. It is particularly noteworthy that the expenditures for personnel, and in this case its graduate students and post doctorates, are approaching fifty percent of the total expenditures.

Some projects of special interest that were funded in the month of May are listed under Tab 5. I thought you might be interested that our Engineering faculty are participating in a multi-institutional effort to change the engineering curriculum from a focus on course content to a focus on development of human resources with broader experiences. In the second project, the National Cancer Institute is funding a project to identify analogs of sialic acid, a natural plant product, for their ability to inhibit cancer of the esophagus. In the third project, the George Gund Foundation is funding an on-the-farm education program where farmers, students, and researchers are learning partners. This project emphasizes self-reliance and environmental conservation, management of ecological processes, and an agriculture based on renewable resources while minimizing the use of petrochemicals.

Under Tab 4 is the list of all projects funded in May.

Listed under Tab 5 is a table of funding received from the various departments of the State of Ohio over the last five years. A portion of these awards represent pass-through funding from federal agencies.

Under Tab 6 is information on the Ohio Board of Regents Research Challenge Program. I would like to ask Vice President Ed Hayes to make a few comments about this important program.

Dr. Hayes:

Thank you, Mr. Celeste. The Research Challenge Program is a Board of Regents Program designed to stimulate new and expanded research efforts at The Ohio State University and its two independent research universities. In the six years that the program has been in existence the externally funded research programs at Ohio's research universities have increased by nearly 70 percent.

Here at The Ohio State University Research Challenge Funding has been essential to the formation and growth of many research programs including the Net Shape Manufacturing Center, the Biotechnology Center, and the Center for Materials Research. Each of these centers has competed successfully for major federal research funding for our students and for the modern instrumentation essential to the education and training of future generations of scientists and engineers. Unfortunately, the recent State of Ohio budget reductions have resulted in nearly

RESEARCH FOUNDATION REPORT (contd)

Dr. Hayes: (contd)

a 50 percent reduction in this program for the 1991-1993 biennium. Such a large reduction, about $4 million at Ohio State, will have serious negative implications for our plans to double external research funding for graduate students and research. Other details on this program are included under Tab 5. Thank you.

Mr. Celeste:

Finally, if you will look in the booklet under Tab 7 there are two recent press releases issued by University Communications highlighting recent research activity. That concludes my remarks.

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS

Resolution No. 93-5

Synopsis: The reports on contracts, grants, and gifts and the summary for May 1992 are presented for Board acceptance.

WHEREAS monies are solicited and received on behalf of the University from governmental, industrial, other agencies, alumni, and various individuals in support of research, instructional activities, and service; and

WHEREAS such gifts are received through The Ohio State University Research Foundation, the Engineering Experiment Station of The Ohio State University, The Ohio State University Development Fund, and The Ohio State University Foundation.

NOW THEREFORE

BE IT RESOLVED, That the research agreement between The Ohio State University and The Ohio State University Research Foundation for the contracts and grants reported herein, and the acceptance of the reports from the Engineering Experiment Station, The Ohio State University Development Fund, and The Ohio State University Foundation during the month of May 1992 be approved.

Upon motion of Mr. Celeste, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

July 10, 1992 meeting, Board of Trustees
Establishment of Named Funds

The L. Edwin Smart Lecture Series in Economics Fund was established July 10, 1992 by the Board of Trustees of The Ohio State University with a transfer of funds from The L. Edwin Smart Economics Symposium Fund which the Board of Trustees established on February 8, 1988, with gifts from L. Edwin Smart, Jr., New York City, as a memorial to his father, L. Edwin Smart Sr. (B.A. '16; M.A. '23; Ph.D. '30), Professor of Economics at The Ohio State University (1921-1962), and in appreciation of his own secondary education at the then University School of The Ohio State University (1935-1941).

All gifts are to be invested in the University's Permanent Endowment Fund under the rules and regulations adopted by the Board of Trustees of The Ohio State University with the right to reinvest and reapply as occasion dictates.

The annual income shall be used to fund the expenses for an annual series of lectures in Economics. The chairperson of the Department of Economics, or their designee, shall be responsible for the administration of the lecture series and selection of the participants.

It is the desire of the donor that this fund should benefit the University in perpetuity as a memorial to this father and that all proceeds from this fund shall be used in his honor. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

The Leadership, Education and Development Endowment Fund

The Leadership, Education and Development Endowment Fund was established July 10, 1992, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from members of the Ohio Agricultural Council, the Nationwide Insurance Foundation, and other organizations and friends of The Ohio State University's College of Agriculture LEBAC Program.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to reinvest and reapply as occasion dictates.

The annual income shall be used for programs to enhance and improve the leadership skills and abilities of men and women involved in farming, agri-business, and other related professions. The intent of a leadership program is to combine training, travel and instruction in those areas: (1) interpersonal relations and communication skills; (2) agricultural and economic trends; (3) international trade and relations; (4) local, state and national political processes; (5) development and welfare of local communities and neighborhoods; and (7) cultural awareness.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the dean of the College of Agriculture to carry out the desire of the donors with preference to the economic and leadership training of the College of Agriculture.

Establishment of Named Funds (contd)

The L. Edwin Smarl Teaching Awards In Economics Fund

The L. Edwin Smart Teaching Awards In Economics Fund was established July 10, 1992, by the Board of Trustees of The Ohio State University, with a transfer of funds from The L. Edwin Smart Economics Symposium Fund which the Board of Trustees established on February 6, 1989, with gifts from L. Edwin Smart, Jr., New York City, as a memorial to his father, L. Edwin Smarl, Sr. (B.A. '16; M.A. '23; Ph.D. '30), Professor of Economics at The Ohio State University (1921-1962), and in appreciation of his own secondary education at the then University School of The Ohio State University (1935-1941).

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide recognition to teaching assistants and faculty members for their teaching achievements. The awards shall acknowledge such areas of accomplishment as shall be determined by a teaching awards committee appointed by the officers of the Undergraduate Economics Society on a yearly basis.

It is the desire of the donor that this fund should benefit the University in perpetuity as a memorial to his father and that all proceeds from this fund shall be used in his honor. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

The Katherine Stuckey Grimm Scholarship Fund

The Katherine Stuckey Grimm Scholarship Fund was established July 10, 1992, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from the family and friends of Katherine S. Grimm.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used for scholarships for undergraduate students enrolled in the College of Human Ecology. Selection of the scholarship recipients shall be made by the Dean of the College of Human Ecology, or their designee, in consultation with the University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the Dean of the College of Human Ecology, department chairperson, or program administrative officer in order to carry out the desire of the donors.

The Philip R. Uhlin Innovation Fund In Business

The Philip R. Uhlin Innovation Fund in Business was established July 10, 1992, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from Mr. Philip R. Uhlin (B.S.Bus.Adm. '69; M.B.A. '70).

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used by the Dean of the College of Business to further advance the interests of the College.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

The Dr. Peter and Alice Lancione Endowment Fund In Family Medicine

The Dr. Peter and Alice Lancione Endowment Fund in Family Medicine was established July 10, 1992, by the Board of Trustees of The Ohio State University, with a gift to The Ohio State University Development Fund from J. Boyd and Penelope L. Binning in honor of Mrs. Binning's parents, Dr. Peter (B.A.; Anatomy, 1932) and Alice Lancione.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support scholarships and partial stipends with preference for the selection of the recipient given to those individuals who have expressed a commitment to practicing family medicine in a rural or small community in Ohio as determined by the Chairperson of the Department of Family Medicine and Dean for the College of Medicine in cooperation with the University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the Chairperson of the Department of Medicine, the Dean for the College of Medicine, or program administrative officer in order to carry out the desire of the donors.
July 10, 1992 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Change in Name of Named Fund

The Provincio, Inc. OARDC Faculty Research Awards Fund

The Provincio Big H OARDC Faculty Research Awards Fund was established July 6, 1990, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from Provincio, Inc., a large Ohio feed manufacturer serving seven states from their eleven branches and the headquarters office in Botkins, Ohio, and Bill Gauntt, longtime employee of Provincio. The name of the fund was revised July 10, 1992.

All gifts are to be invested by the University’s Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to recognize Ohio Agricultural Research and Development Center scientists who have made an outstanding contribution in the advancement of agriculture or an agricultural-related science and technology. The guiding philosophy in evaluation of nominees will be their nationally and internationally recognized contributions while an OARDC faculty member in basic applied and developmental research activities, and/or conceptual contributions to their respective disciplines. Nominees will be evaluated by an OARDC Awards Committee which shall include one employee from Provincio, Inc., and six faculty members appointed by the Director of OARDC.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

Change in Name and Description of Named Fund

The Francis W. Davis Fellowship for Photography and Cinema

The Francis W. Davis Fellowship for the Department of Photography and Cinema was established September 2, 1993, by the Board of Trustees of The Ohio State University, with a gift to The Ohio State University Development Fund from Agnes Turner Davis (B.S. ’30). The name and description were revised July 10, 1992.

All gifts are to be invested in the University’s Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used for a graduate fellowship in photography or cinema with preference being given to a qualified student whose major area is studio, laboratory, historical, or theoretical studies in photography. Should no such candidate be found in any given year, the fellowship may be given to a qualified student whose major area is studio, laboratory, historical, or theoretical studies in cinema or in video.
The Robert E. Goodsell Fund was established March 24, 1966, by the Board of Trustees of The Ohio State University, with a gift to The Ohio State University Development Fund from Robert E. Goodsell (Arts '24). The description was revised July 10, 1992.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide one or more merit scholarships for Goodsell Distinguished Scholars, Medallists and/or University Scholars. Students shall be selected based upon the criteria sanctioned by the Senior Vice President for Academic Affairs and Provost and administered by the University Honors Center in consultation with the University Committee on Student Financial Aid.

This merit scholarship initiative is the result of the recommendations from the 1990 University Task Force on Undergraduate Recruitment and the 1990-1991 Undergraduate Recruitment Implementation Steering Committee to the Senior Vice President for Academic Affairs and Provost.

The Robert E. Goodsell Fund was established March 24, 1966, by the Board of Trustees of The Ohio State University, with a gift to The Ohio State University Development Fund from Robert E. Goodsell (Arts '24). The description was revised July 10, 1992.

Dr. Schuller:

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then the income may be used for any purpose whatsoever as determined by the Board of Trustees, with preference being given to recommendations from the Director for the Ohio Cooperative Extension Service in consultation with a committee representing the local 4-H donors.

---

HOSPITALS BOARD COMMITTEE REPORT

Mr. Celeste:

The Hospital's Board's Professional Affairs/Education/Research Committee and Executive Committee met on Thursday, June 25.

The first part of the Professional Affairs meeting was devoted to an executive session review of confidential data related to the Hospitals' quality and resource management. Dr. Bay compared University Hospitals data from February through April 1991, with parallel data from the 490 hospitals participating in the Maryland Hospital Association Quality Indicator Project. Although the other hospitals include small and/or specialty hospitals, and are therefore not our true peers, we appear to compare quite well on the 15 indicators utilized. The Committee also reviewed and discussed current quality indicators specific to our own Hospitals. Mr. Fraley pointed out that the information provided to our Hospitals Board through the efforts of the quality and resource management staff and medical staff leadership is unique and quite well done.

The Executive Committee received the annual Service Board report presented by retiring president Sandy Sherrill. Dr. Paul Kaplan discussed the annual Program Evaluation for Dodd Hall, our rehabilitation hospital. The remainder of the meeting was devoted to an executive session for discussion of an ongoing medical staff credentialing issue.

That ends my report, Mr. Chairman.

---

CANCER HOSPITAL QUARTERLY REPORT

Mr. Barone:

Thank you, Dr. Schuller.

---

ACADEMIC AFFAIRS COMMITTEE REPORT

Mr. Keeler:

The Academic Affairs Committee received a report this morning from Dean Gary Floyd who reported to us on the progress and status of the general education curriculum (GEC) offerings in the College of Biological Sciences. He discussed the various courses offered to undergraduates and the increased demand for them.

Dr. Floyd also talked about the two biology courses that the College offers in the Young Scholars Program -- one for pre-seventh graders and one for pre-eleventh graders. The College recently received a NIH Grant for $610,000 to support the...
ACADEMIC AFFAIRS COMMITTEE REPORT (cont'd)

Mr. Kessler: (cont'd)

...eleventh grade program, and they have been told by NIH that their program is being studied as a possible model for the entire country.

In addition, the Committee is recommending the following resolutions:

RENAMEING OF DEPARTMENT

Resolution No. 93-6

Synopsis: The Academic Affairs Committee recommended the approval to rename the Department of German to the Department of Germanic Languages and Literatures.

WHEREAS the proposed name change of the Department of German to the Department of Germanic Languages and Literatures has been approved by the faculty of the Department, and by the College of Humanities Executive Committee; and

WHEREAS the proposed name change more accurately and fully describes the Department where language courses in Dutch, Scandinavian, and Swedish as well as German and older Germanic languages are taught; and

WHEREAS faculty members in the Department teach courses in literature and culture as well as in language; and

WHEREAS this proposed change has the approval of the Council on Academic Affairs, and was approved by the University Senate at its June 6, 1992 meeting:

NOW THEREFORE

BE IT RESOLVED, That the proposal to change the name of the Department of German to the Department of Germanic Languages and Literatures, effective July 1, 1992, is hereby approved.

Upon motion of Mr. Kessler, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

RENAMEING OF DEPARTMENT

Resolution No. 93-7

Synopsis: The Academic Affairs Committee recommended the approval to rename the Department of Physical Medicine to the Department of Physical Medicine and Rehabilitation.

WHEREAS the proposed name change of the Department of Physical Medicine to the Department of Physical Medicine and Rehabilitation has been approved by the faculty in the department, the College of Medicine Executive Committee, and the College of Education; and

WHEREAS the professional name of the discipline is known as Physical Medicine and Rehabilitation, as reflected in academic journals, textbooks, the American Board of Physical Medicine and Rehabilitation, and the three major national organizations in this field; and

WHEREAS the name change of the department is in line with the national trend which incorporates rehabilitation as part of the department name and better reflects what the department does; and

WHEREAS the Council for Research and Graduate Studies has approved the change of name for the graduate program in Physical Medicine; and

WHEREAS the proposed change has the approval of the Council on Academic Affairs, and was approved by the University Senate at its June 6, 1992 meeting:

NOW THEREFORE

BE IT RESOLVED, That the proposal to change the name of the Department of Physical Medicine to the Department of Physical Medicine and Rehabilitation, with concomitant name changes in the department's graduate program, effective July 1, 1992, is hereby approved.

Upon motion of Mr. Kessler, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

ESTABLISHMENT OF NAMED CHAIR

Resolution No. 93-8

Synopsis: The Academic Affairs Committee recommended the approval of the establishment of a named chair.

WHEREAS in accordance with the guidelines previously established by the Board, The Helen L. Kurtz Chair in Chemical Engineering Fund was established July 6, 1990, through funds received by the University from Helen L. Kurtz of Coshocton, Ohio and Tampa, Florida; and

WHEREAS the funding has now reached the level required to establish a named chair:

NOW THEREFORE

BE IT RESOLVED, That the annual income from The Helen L. Kurtz Chair in Chemical Engineering shall be used to attract and retain an internationally recognized scholar in the field of chemical engineering. This support shall provide supplemental salary, plus expenses for research, for professional travel, and graduate and undergraduate student assistants. Appointment to the chair shall be recommended by the Dean of the College of Engineering to the Provost and approved by the Ohio State University Board of Trustees.

Upon motion of Mr. Kessler, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.
ESTABLISHMENT OF NAMED CHAIR (contd)

WHEREAS in accordance with the guidelines previously established by the Board, the Ralph W. Kurtz Chair in Mechanical Engineering Fund was established July 6, 1990, through funds received by the University from Ralph W. Kurtz (B.M.E. '23) of Coshocton, Ohio and Tampa, Florida; and

WHEREAS the funding has now reached the level required to establish a named chair;

NOW THEREFORE

BE IT RESOLVED, That the annual income from the Ralph W. Kurtz Chair in Mechanical Engineering shall be used to attract and retain an internationally recognized scholar in the field of mechanical engineering. This support shall provide supplemental salary, plus expenses for research, for professional travel and graduate and undergraduate student assistants. Appointment to the chair shall be recommended by the Dean of the College of Engineering to the Provost and approved by The Ohio State University Board of Trustees.

Upon motion of Mr. Kessler, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

---0---

DEGREES AND CERTIFICATES - SUMMER QUARTER COMMENCEMENT

Resolution No. 93-10

Synopsis: The Academic Affairs Committee recommended the approval of Degrees and Certificates for Summer Quarter.

WHEREAS pursuant to paragraph (E) of rule 3335-1-06 of the Administrative Code, the Board has authority for the issuance of degrees and certificates; and

WHEREAS the faculties of the colleges and schools shall transmit, in accordance with rule 3335-9-20 of the Administrative Code, for approval by the Board of Trustees the names of persons who have completed degree and certificate requirements;

NOW THEREFORE

BE IT RESOLVED, That the degrees and certificates be conferred on September 3, 1992, to those persons who have completed the requirements for their respective degrees and certificates and are recommended by the colleges and schools, and that the names of those persons awarded degrees and certificates be included in the minutes of this meeting.

Upon motion of Mr. Kessler, seconded by Mr. Shumate, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

---0---

PERSONNEL ACTIONS

Resolution No. 93-11

RESOLVED, That the personnel actions as recorded in the Personnel Budget Records of the University since the June 5, 1992 meeting of the Board, including the following Appointments, Reappointment of Principal Administrative Officials, Appointment of Chairpersons and Director, Reappointment of Chairpersons and Director, Contract Extension, Leave of Absence Without Salary, Professional Improvement Leaves, Professional Improvement Leaves--Cancellations, Professional Improvement Leaves--Change in Dates, Promotions and Tenure, and Emeritus Titles, as detailed in the University Budget be approved.

Appointments

ALBERT L. CLOVIS
Professor (The Joseph S. Platt - Porter, Wright, Morris & Arthur Professorship in Law)
Law
August 16, 1992
$100,004.00
Professor, College of Law

TED A. GRACE, M.D.
Director
Student Health Service
August 1, 1992
$112,500.00
Director, Student Health Services, San Diego State University

TIMOTHY S. JOST
Professor (Newton D. Baker - Baker & Hostetler Chair in Law)
Law
August 16, 1992
$75,600.00
Professor, College of Law

LAWRENCE A. KENNEDY
Professor (The Ralph W. Kurtz Chair in Mechanical Engineering)
Mechanical Engineering
October 1, 1992 - September 30, 1997
$119,004.00
Chairperson and Professor, Department of Mechanical Engineering

VIOLET I. MEEK
Dean and Director
Lima Regional Campus
July 1, 1992
$84,046.00
Acting Dean and Director, The Ohio State University Lima Campus

SHELDON G. SHORE
Professor (Charles H. Kimberly Professorship in Chemistry)
Chemistry
April 1, 1992 - March 31, 1997
$52,524.00
Professor, Department of Chemistry

Emeritus Titles (contd)

BERNARD S. WEISS, College of Social Work, with the title Associate Professor Emeritus, effective June 1, 1992.

PELTON W. WHEELER, College of Dentistry (Orthodontics), with the title Clinical Associate Professor Emeritus, effective July 1, 1992.

Upon motion of Mr. Kessler, seconded by Ms. Caslo, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

RESOLUTIONS IN MEMORIAM

Resolution No. 03-1992

Synopsis: The Academic Affairs Committee recommended the approval of seven Resolutions in Memoriam.

RESOLVED, That the Board adopt the following Resolutions in Memoriam and that the President be requested to convey a copy to the families of the deceased.

Marion L. Alnsworth

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on April 14, 1992, of Marion L. Alnsworth, M.D., Clinical Professor Emeritus in the Department of Pediatrics, College of Medicine.

Dr. Alnsworth was born August 14, 1906, and received his medical degree from the University of Michigan in 1931. His internship in Pediatrics was served at Hurley Hospital in Flint, Michigan, at Detroit Children's Hospital from 1932-33, and his residency at William Parker Hospital in New York from 1933-34. He finished his training at Pittsburgh Children's Hospital where he was named chief pediatric resident from 1934-35.

Dr. Alnsworth joined the Department of Pediatrics as a Clinical Instructor in 1937 and subsequently was promoted to Clinical Assistant Professor (1943), Clinical Associate Professor (1955), Clinical Professor (1974) and Clinical Professor Emeritus upon his retirement in September 1972. During his career, Marion Alnsworth also served as a medical consultant for the Ohio Bureau of Children with Medical Handicaps and as Health Commissioner for the City of Dayton.

Over the years, he had been a staunch supporter of the Department of Pediatrics, giving unstinting of his time and effort in instructing the medical students and residents in his private office, and as attending physician on the wards and in the pediatric clinics. His devotion and love to the Department of Pediatrics and his exemplary care of children in Central Ohio have set an example for all upcoming pediatricians to follow.

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.
RESOLUTIONS IN MEMORIAM (contd)

Donald R. Glancy (contd)

He served as chairperson of the department's Graduate Studies Committee numerous times, contributing to the strength of the M.A., M.F.A., and Ph.D. degrees which the department offers. He also served as a member of the Research Committee and the Executive Committee of the Graduate School and as a member of the Graduate Council. His work as a member of the University Senate provided that body with additional insight into the arts.

On behalf of the University, the Board of Trustees expresses to the family its deepest sympathy and sense of understanding in their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Lorane C. Kruse

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on May 8, 1992, of Lorane C. Kruse, Associate Professor Emeritus in the College of Nursing.

Lorane C. Kruse was born April 10, 1914, in Miles, Iowa. She began her education in nursing at Good Samaritan Hospital School of Nursing, Cincinnati, Ohio, graduating in 1947. She continued her education at The Ohio State University, earning a Bachelor of Science in Education degree in 1956. She completed a Master of Arts in Nursing Education at the University of Chicago in 1959. Ms. Kruse was a nurse, teacher, and administrator.

Professor Kruse joined the faculty of The Ohio State University School of Nursing as an Instructor in 1961. She was promoted to the rank of Assistant Professor in 1966, and Associate Professor in 1969. She worked as a member of the teaching staff and served as Chairman of the Division of Leadership and Management. Lorane Kruse also served as the Assistant Director for Continuing Education and as Acting Director in the School of Nursing. From May 1973 until her retirement in 1975, Professor Kruse served as Assistant Director of the School of Nursing and assumed the additional role of School Secretary in 1975. She retired in 1975, and was named Associate Professor Emeritus.

As the Assistant Director for Continuing Education, Professor Kruse had several funded projects including a Family Nurse Practitioner Program funded by the Department of Health, Education and Welfare. Lorane Kruse was a strong supporter of nursing and was an active participant in the American Nurses' Association, the National League for Nursing, and Sigma Theta Tau. She held leadership positions in these organizations at the local, state, and national levels. Professor Kruse was a founding member of the Commission on Interprofessional Education and Practice and was an active participant with the Commission long after her retirement.

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

John N. Meagher

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on May 17, 1992, of Dr. John N. Meagher, Clinical Professor Emeritus in the Division of Neurosurgery of the Department of Surgery.

RESOLUTIONS IN MEMORIAM (contd)

John N. Meagher (contd)

Dr. Meagher was born on December 23, 1925, in Springfield, Ohio. He received his B.S. degree at Kenyon College in Gambier, Ohio, and his medical degree at the University of Cincinnati in Cincinnati, Ohio.

Dr. Meagher practiced neurosurgery for over 35 years. His internship was completed at White Cross Hospital in Columbus, Ohio, followed by a residency at White Cross Hospital with a fellowship in Neurological Surgery at the Barnes Hospital of Washington University in St. Louis, Missouri. He joined the faculty in the Department of Surgery in 1955, and upon his retirement in 1987 was named Clinical Professor Emeritus.

Dr. Meagher's professional affiliations included Columbus Academy of Medicine, Ohio State Medical Association, American Medical Association, Congress of Neurological Surgeons, American College of Surgeons, Ohio Society of Neurological Surgeons, Ohio State Neurosurgical Society, Neurosurgical Society of America, and the American Board of Neurological Surgeons.

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

John R. Wilson

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on May 26, 1992, of Dr. John Robert Wilson, Dean and Professor Emeritus in the College of Dentistry.

Dr. Wilson was born on Christmas Day, 1917, in Mt. Pleasant, Ohio. He graduated from Otterbein College in 1938 after which he taught and coached basketball at Centerville High School for two years. He then enrolled in the College of Dentistry and received his D.D.S. in 1943. Dr. Wilson served in the United States Army Dental Corps until 1946 when he returned to Ohio State to join the faculty of the College of Dentistry. During his tenure he served as Chairman of Periodontology, Director of Research and Advanced Studies, Associate Dean, and Dean of the College from 1955-1974.

During his term as dean, Dr. Wilson oversaw the enlargement of the dental school enrollment, a major addition to Piddle Hall, and the implementation of new pre-doctoral curriculum.

Dr. Wilson was a fellow of the American College of Dentists and of the International College of Dentists. He was a member of the American Academy of Periodontics, the American Association of Dental Schools, and the American Dental Association. He served as president of the Columbus Dental Society and of the Ohio Dental Association. He was a member of First Community Church, Columbus Rotary Club, Aldrich Temple A.A.O.N.M.S., Zeta Phi Fraternity, Delta Sigma Delta Dental Fraternity, and Omicron Kappa Upsilon Honorary Dental Society.

Following his retirement from the University, Dr. Wilson was engaged in the private practice of periodontics and served as a consultant for Physicians Health Plan.

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.
RESOLUTIONS IN MEMORIAM (contd)

Robert M. Zollinger

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on June 12, 1992, of Robert M. Zollinger, Professor Emeritus in the Department of Surgery.

Born on a Millersport, Ohio, farm in 1903, he received his medical degree at The Ohio State University in 1927. Dr. Zollinger did his surgical training under Elliot Cutler, M.D., in Cleveland and Boston, and in 1939 was appointed assistant professor of surgery at Harvard. With the outbreak of World War II, he joined the 5th General Hospital in Europe, and subsequently was awarded the U.S. Army's Legion of Merit and decorated Chevalier of the Legion de Honneur. During these years he established lifelong, deep friendships -- his prized "French connection."

Dr. Zollinger returned to Ohio State in 1946 as chairman of the Department of Surgery, and his work was instrumental in helping turn the University into a major medical center. In his research with the late Erwin H. Ellison, M.D., Robert Zollinger described the condition now known as Zollinger-Ellison syndrome. He published over 400 papers and was Editor-in-Chief of The American Journal of Surgery. Known for his masterful surgical technique and exacting standards as a teacher, he trained a generation of exemplary surgeons, researchers and educators. Four of his trainees became chairman of departments.

Robert Zollinger served as president of the American College of Surgeons, president of the American Surgical Association, and chairman of the American Board of Surgery. He was the recipient of many awards, including an honorary degree from Ohio State and the American Surgical Association Distinguished Achievement Award.

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Upon motion of Mr. Kesslor, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

STUDENT AFFAIRS COMMITTEE REPORT

Ms. Cusack:

Today Sonie Shuster and Dean Hollingsworth from the Office of Student Affairs gave us an overview of the proposed changes in the Code of Student Conduct and some of its major implications. The specifics of the changes are in your Board book and were sent to each of you earlier.

The most significant change that was discussed is in the section covering jurisdiction of the student code. Formerly, the student code did not cover student events occurring off campus, except in the instance of hazing. Now all events that are held on or off campus which are university sponsored or sponsored by a registered student organization are subject to the Student Code, i.e. Greek system parties or official bowl game events or something like that. Those were the major implications of the change and the other changes were to clarify the wording. If anyone has any questions, Dean Hollingsworth and Ms. Shuster are here.

AMENDMENTS TO THE CODE OF STUDENT CONDUCT

Resolution No. 93-13

Synopsis: The Student Affairs Committee recommended amendments to The Ohio State University Code of Student Conduct.

WHEREAS the Council on Student Affairs is charged to "recommend to University Senate any proposed changes in the Code of Student Conduct; and

WHEREAS the Council on Student Affairs, to ensure that the Code is current and in compliance with University policy, has completed its review and proposes changes; and

WHEREAS the Council on Student Affairs, the Office of the President, and the Office of Academic Affairs have reviewed the proposed changes; and

WHEREAS the University Senate approved the following changes, to The Ohio State University Code of Student Conduct on June 6, 1992, as follows:

Ammendments

3335-23-01 Introduction.

The code exists to foster and enhance the academic mission of the university. The code protects the students, staff and faculty of the university and their rights. In addition, the code protects the property of the university, and all property of faculty, staff and students, on university premises. The term "university premises" means all lands, buildings, and facilities owned, leased or operated by the university. The term "student" is defined for purposes of this code as an individual who has paid an acceptance fee, registered for classes, or otherwise entered into any contractual relationship with the university to take instruction, and stays until that individual graduates, formally withdraws, or is expelled. The code applies to the conduct of all students and registered student organizations (hereinafter "student"); while on university premises; while on professional practice assignment; or while engaged in any activity associated with academic course requirements, such as internships or student teaching; or while involved with a university related activity, or a registered student organization activity.

Balance unchanged.

3335-25-03 Policies.

Established policies and rights exist to ensure an environment conducive to equal treatment and opportunity for all members of the university community. Students violating university policy may be subject to disciplinary action.

Paragraphs (A) and (B) unchanged.

(C) Hazing.

Hazing is both a civil and criminal offense in Ohio, and is therefore prohibited at The Ohio State University, regardless of whether the event occurs on or off campus. Consistent with the law, the university defines hazing as doing any act, or requiring or encouraging any act of initiation into any student or other organization that causes, or creates a substantial risk of causing, mental or physical harm to any person (see section 2003.31 and 2007.44 of the Ohio Revised Code).
AMENDMENTS TO THE CODE OF STUDENT CONDUCT (contd)

Hazing also occurs if the continued association with or membership in any group, registered with or affiliated with the university, is directly or indirectly conditional upon performing any activity which would cause or create a substantial risk of causing mental or physical harm.

The negligence or consent of the victim or any assumption of the risk by the victim is not a defense. (See section 2307.44 of the Ohio Revised Code.)

Balance unchanged.

3335-27-01 Initiation and investigation of code violations.

(A) Initiation.

Person(s) witnessing or experiencing what they believe to be a possible code violation may provide an authorized university official with the information. Information about possible code violations occurring in residence halls should be provided to the residence hall director. Information about possible non-residence hall related code violations should be provided to the coordinator of judicial affairs. The university will review all information received and may conduct a preliminary investigation of the alleged violation.

(B) Investigation.

Residence hall directors, assistant hall directors, the coordinator of judicial affairs, and others appointed by the dean of student life are authorized to investigate alleged violations other than those involving academic misconduct. During preliminary investigation, the student allegedly involved in misconduct will be sent a letter describing the violation, what to contact for a preliminary interview, and that date by which the contact should occur. Any person believed to have information relevant to the investigation may be contacted and requested to make an appointment to discuss the matter. Upon completion of the preliminary investigation the investigator will decide whether to dismiss, change or affix the charges. Residence hall officials may refer cases involving possible suspension or dismissal to the dean of student life or the dean's designee.

3335-27-07 Appeal.

(A) Right to appeal.

A student found to have violated this code has the right to appeal the original decision. An appeal of a decision must be submitted in writing and postmarked or hand delivered to an appropriate appeal officer, as provided below, within fourteen calendar days of the receipt of the sanction decision letter. Upon receipt of the appeal, the appeal officer will provide the student written guidelines for the appeal procedure.

(B) Grounds for appeal.

An appeal may be based only upon one or more of the following grounds:

(1) Procedural error.

(2) Misapplication or misinterpretation of the rule alleged to have been violated.

(3) Findings of facts not supported by a greater weight of evidence.

(4) Discovery of substantial new facts that were unavailable at the time of the hearing.

(C) Appropriate appeal officers.

(1) Cases arising in the residence halls:

(a) Appeals from unit commissions in the residence halls will be submitted for decision to the area coordinator of the residence hall area in which the violation occurred.

(b) Appeals from the appropriate hearing bodies in graduate housing will be submitted for decision to the area coordinator to whom the hall director reports.

(c) Appeals from hall director's administrative decisions will be submitted for decision to the area coordinator to whom the hall director reports.

(d) Appeals from area coordinators will be submitted for decision to the associate director of residence and dining halls for residence life or that person's designee.

(2) Appeals involving administrative decisions or decisions of university judicial panels will be submitted for decision to the dean of student life.

(3) Appeals from decisions of the university court will be submitted for decision to the dean of student life.

(4) Appeals from decisions of the committee on academic misconduct will be submitted for decision to the senior vice president for academic affairs and provost.

(C) Possible dispositions by the appeal officer.

(1) The appeal officer shall dismiss the appeal if the appeal is not based upon one or more of the grounds set forth in section (B) above.

(2) The appeal officer may choose to decide the appeal based upon a review of the record.

(3) The appeal officer may request additional written information or an oral presentation and then decide the appeal based upon the enhanced record.

(4) The appeal officer may refer the case to a new hearing officer or panel to be reheard. If possible, a new hearing officer or panel shall be different than the one that originally decided the case.

(5) A decision by the appeal officer that there are substantial new facts that were unavailable at the time of the original hearing shall result in a new hearing as described in subsection (4) above.
AMENDMENTS TO THE CODE OF STUDENT CONDUCT (contd)

(E) Sanctions.

The appeal officer may, after review of the record, uphold the original sanction, dismiss the original sanction, or impose a lesser sanction. An appeal officer or panel hearing a remanded case cannot impose a more severe sanction than that originally imposed.

(F) Representation.

On appeal, where the sanction imposed by the hearing officer or panel was suspension or dismissal, a student may be actively represented by an advisor of the student's choice.

3335-29-04 Suspension and dismissal.

(A) Unchanged.

(B) Suspension in abeyance.

In cases of suspension, the hearing officer or panel may decide there are circumstances which mitigate against the separation of the student from the institution. Such circumstances may include, but are not limited to: student intent at the time of the incident; student attitude and/or behavior since the incident in question; if these, or other appropriate conditions exist, and the hearing officer or panel has reason to believe that the presence of the student in the university community does not put any other community member at risk, the hearing officer or panel may assign the student the sanction of suspension, held in abeyance. This sanction is for a specific period of time, not to exceed three academic quarters, following the effective date specified in the sanction letter.

Suspension in abeyance does not preclude the imposition of other appropriate sanctions. While the suspension in abeyance is in effect, the individual under suspension in abeyance is allowed to retain student status at the university. However, should the student be found in violation of any section of the code of student conduct by any authorized hearing body or individual during the period of abeyance, the abeyance will be automatically lifted and the suspension shall take effect immediately for the remainder of the original sanction.

During the remaining period, all conditions for suspension are in effect (see paragraph (C) of rule 3335-29-04 of the Administrative Code). Once the abeyance has been lifted and the suspension is in effect, the hearing officer or panel may impose a sanction appropriate to the additional violation(s) of the code.

(C) Dismissal.

The body of the text remains unchanged.

(D) Conditions of suspension and dismissal.

The body of the text remains unchanged.

3335-29-07 Other sanctions.

(A) Other sanctions that the hearing officer or panel considers appropriate to the student for the conduct violation in question may be imposed. For example, research assignments, community service projects, special workshop participation and/or referral to mental health, or counseling personnel may be assigned as recommended sanctions or conditions to another sanction. In cases of academic misconduct, a lowered or failing grade may be recommended for the academic coursework. In residence Halle

July 10, 1992 meeting, Board of Trustees

AMENDMENTS TO THE CODE OF STUDENT CONDUCT (contd)

sanctions may include contract termination or reassignment to another room. Non-residence hall hearing officers or panels may recommend sanctions of this type to the office of residence life.

(B) Failure to meet requirements of a sanction In the time allotted may result in the charge of failure to comply with university authority (see paragraph (G) of rule 3335-25-01 of the Administrative Code.)

(C) Repetition of misconduct by a student who has previously been found in violation of the code may result in imposition of harsher sanctions.

3335-31-03 University judicial panel.

The university judicial panel is responsible for cases of non-academic misconduct referred by the coordinator of judicial affairs, except for cases involving disruption or professional college codes. The panel is responsible for non-academic aspects of cases referred by the committee on academic misconduct. The panel is authorized to impose any code-authorized sanction. The panel consists of:

(A) Chairperson(s) (faculty or administrative staff member(s)) appointed by the dean of student life;

(B) Twelve regular faculty members recommended to the dean of student affairs for three-year terms which begin with the summer quarter; and

(C) Six undergraduate students, appointed by the president of the undergraduate student government; four graduate students, appointed by the president of the council of graduate students; and two professional students, appointed by the president of the inter-professional council. All student appointments shall be for one-year terms beginning with the autumn quarter.

(D) Hearings will be conducted by hearing bodies made up of university judicial panel members with the same authority as the full panel.

(E) The coordinator(s) of judicial affairs, as designated by the dean of student life, shall serve as panel coordinator(s) without a vote.

(F) In cases involving sexual harassment, discriminatory behaviors, or other problematic behaviors requiring special sensitivity or expertise, the dean of student life may appoint individuals with appropriate expertise to serve as consultants to the panel. The consultants may be present and provide information as called upon during the hearing, but will not vote.

(G) The university judicial panel establishes rules and procedures to conduct hearings, including the definition of a quorum.

NOW, THEREFORE

BE IT RESOLVED, That the foregoing amendments to The Ohio State University Code of Student Conduct are adopted as recommended by the University Senate.

Teller of the vote: Ms. Casso, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing by Unanimous voice vote.
July 10, 1992 meeting, Board of Trustees

STUDENT AFFAIRS COMMITTEE REPORT (contd)

Ms. Cusack:

We also heard a report from John Hilbert, President of the Undergraduate Student Government, who updated us on the work of the Crime Watch Escort Service which has increased in size and scope this past year and has done quite a bit to improve the safety of students on main campus and the surrounding area. He also expressed a concern that there shouldn’t be any further raise in tuition above the current cap.

Also, Karen Duncan, President of the Council of Graduate Students, voiced a concern about the loss of funded positions for graduate students. The Committee did agree that the University administration has made a significant commitment to protect students as much as possible during this current round of budget cuts.

Finally, Dr. Russ Spillman provided us with an update of the reorganization of Student Affairs which is currently underway. The changes include quite a bit of restructuring and reorganization, and appears to address the problems and provide appropriate solutions. If there aren’t any questions or comments that concludes my report.

AGRICULTURAL AFFAIRS COMMITTEE REPORT

Mr. Colley:

The Agricultural Affairs Committee will meet on July 17 in Wooster, Ohio, in conjunction with the 100th anniversary celebration of the Ohio Agricultural Research and Development Center. The Centennial Celebration will be a 3-day event. On Friday, July 17, they will celebrate Public Official’s Day, with a luncheon honoring public officials from across Ohio. President Gee and Vice President Moser will both speak at that luncheon and all Board members are invited.

INVESTMENTS COMMITTEE REPORT

Mr. Celeste:

The Investments Committee heard the monthly endowment summary report for the period May 15, 1992, through June 19, 1992. The market value of the endowment fund on June 19, 1992, was $21.0 million. This was an increase of $24.0 million compared to the May 15, 1992, market value. The market value of the endowment fund decreased $6 million, while the fixed income portion increased $10.6 million during this reporting period.

Net new additions to the Endowment Fund for June totaled $697.000.00. Since July 1, 1991, the beginning of the fiscal year, the Endowment Fund has increased over $24 million. Net change in market value has accounted for an increase of $8 million. Net new additions are over $24.0 million compared to $21.8 million in fiscal year 1991. The current asset allocation for the endowment is 57 percent invested in equities, 20 percent in fixed income, 9 percent in real estate, and 6 percent in cash equivalents. The total return for the endowment fund thus far in fiscal year 1992 is 10.7 percent. It is reported that there are now 1,053 separate endowment funds, including 75 new funds established during the fiscal year. The total income distribution to all those funds during the fiscal year 1992 was $10.6 million.

Finally, Mr. Chairman, the Committee is recommending the following resolution:

AUTHORIZATION FOR DESIGNATED OFFICIALS TO BUY, SELL, ASSIGN AND TRANSFER SECURITIES, TO DEPOSIT OR WITHDRAW FUNDS FROM BANK ACCOUNTS, AND TO DESIGNATE DEPOSITORIES

Resolution No. 93-14

Synopsis: The Investments Committee recommended reaffirmation of the Board of Trustees Resolution No. 91-143 (June 7, 1991), which authorized designated officials to buy, sell, assign, and transfer securities, to deposit or withdraw funds from bank accounts held in the name of The Ohio State University, and to designate depositories.

WHEREAS designated officials of the University buy, sell, assign, and transfer stocks, bonds, and other financial instruments owned by The Ohio State University; and

WHEREAS various financial institutions are designated as depositories for The Ohio State University; and

WHEREAS accounts at various financial institutions are opened and maintained in the name of The Ohio State University;

NOW THEREFORE

BE IT RESOLVED, That the Vice President for Finance and/or the Treasurer be authorized and empowered to buy, sell, assign, and transfer any and all stocks, bonds, evidences of interest and/or indebtedness, rights and options to acquire or to sell the same, and all other securities corporate or otherwise, standing in the name of or belonging to The Ohio State University in any capacity; and

BE IT FURTHER RESOLVED, That the Vice President for Finance and/or Treasurer be authorized and empowered to designate various financial institutions as depositories for The Ohio State University and open and maintain accounts at various financial institutions in the name of The Ohio State University;

RESOLVED, That the Vice President for Finance and/or Treasurer be authorized and empowered to buy, sell, assign, and transfer any and all stocks, bonds, evidences of interest and/or indebtedness, rights and options to acquire or to sell the same, and all other securities corporate or otherwise, standing in the name of or belonging to The Ohio State University in any capacity; and

RESOLVED, That the Vice President for Finance and/or Treasurer be authorized and empowered to designate various financial institutions as depositories for The Ohio State University and open and maintain accounts at various financial institutions in the name of The Ohio State University;

RESOLVED, That the Vice President for Finance and/or Treasurer be authorized and empowered to buy, sell, assign, and transfer any and all stocks, bonds, evidences of interest and/or indebtedness, rights and options to acquire or to sell the same, and all other securities corporate or otherwise, standing in the name of or belonging to The Ohio State University in any capacity; and

RESOLVED, That the Vice President for Finance and/or Treasurer be authorized and empowered to designate various financial institutions as depositories for The Ohio State University and open and maintain accounts at various financial institutions in the name of The Ohio State University;

RESOLVED, That the Vice President for Finance and/or Treasurer be authorized and empowered to buy, sell, assign, and transfer any and all stocks, bonds, evidences of interest and/or indebtedness, rights and options to acquire or to sell the same, and all other securities corporate or otherwise, standing in the name of or belonging to The Ohio State University in any capacity; and

RESOLVED, That the Vice President for Finance and/or Treasurer be authorized and empowered to designate various financial institutions as depositories for The Ohio State University and open and maintain accounts at various financial institutions in the name of The Ohio State University;

RESOLVED, That the Vice President for Finance and/or Treasurer be authorized and empowered to buy, sell, assign, and transfer any and all stocks, bonds, evidences of interest and/or indebtedness, rights and options to acquire or to sell the same, and all other securities corporate or otherwise, standing in the name of or belonging to The Ohio State University in any capacity; and

RESOLVED, That the Vice President for Finance and/or Treasurer be authorized and empowered to designate various financial institutions as depositories for The Ohio State University and open and maintain accounts at various financial institutions in the name of The Ohio State University;
RESOLVED, That the report on the University's Endowment Fund, dated June 19, 1992, as submitted to the Investments Committee of the Board of Trustees, be received and filed with the official records of the Board.

--0--

Thereupon the Board adjourned to meet Wednesday, September 2, 1992, at The Ohio State University Fawcett Center for Tomorrow, Columbus, Ohio.

Attest:

Madison H. Scott        John J. Barone
Secretary               Chairman
The Board of Trustees met at its regular monthly meeting on Wednesday, September 2, 1992, at The Ohio State University Fawcett Center for Tomorrow, Columbus, Ohio, pursuant to adjournment.

**          **          **

Minutes of the last meeting were approved.

**          **          **
September 2, 1992 meeting, Board of Trustees

The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on September 2, 1992, at 11:10 a.m. He requested the Secretary to call the roll.

Present: John J. Barone, Chairman, Deborah E. Casto, John W. Kessler, Milton A. Wolf, Alex Shumate, Theodore S. Celeste, Michael F. Colley, George A. Skestos, Kristen Cusack, and Hiawatha N. Francisco, Jr.

--0--

INTRODUCTION OF NEW STUDENT TRUSTEE

Mr. Barone:

At this time, I would like to introduce Hiawatha Francisco. Mr. Francisco is our new Student Trustee, appointed recently by Governor Voinovich for a two-year term. Mr. Francisco is a graduate student here at Ohio State majoring in higher education administration. He attended Notre Dame where he lettered in football and received his undergraduate degree. He received his master's degree at the University of Akron.

Will you all join me in welcoming Mr. Francisco to this Board.

--0--

PRESIDENT'S REPORT

President Gee:

I, too, want to add my congratulations to Hiawatha for his selection as a student trustee. Our student trustees carry a strong commitment and tradition. You are following in the footsteps of a very fine individual, David Tonnies. I might note though, that it will be a struggle for me to have a former Notre Dame alumnus as a trustee, but we will survive, I'm sure.

Inasmuch as we have not met, Ladies and Gentlemen, since early July, I want to bring you up-to-date on what has been happening during the summer months. It has not been leisurely, but in many ways, the pace of the institution does change in the summer. With a smaller enrollment and lighter teaching schedules, many faculty use the summer months to do field research, to prepare new courses, and to finish drafts of books and articles.

Among the research projects launched this summer is an important partnership between the College of Optometry and the Longaberger Company of Dresden, Ohio. We will be studying the visual skills necessary for the company's 3,000 employees to perform their duties safely and efficiently. This project will develop visual standards in the workplace, guidelines that may well become industry standards for others. I was delighted that Dean Hill and I were able to accept a generous check from Dave Longaberger for this project while visiting their facility in Muskingum County.

Another research effort that received considerable attention this summer was the report of an Ohio State study of the causes of health care cost increases. Dr. Stephen Loeb, associate professor and chair of the graduate program in hospital and health services administration, directed this study that included contributions from 28 Ohio State scholars from eight different disciplines.
PRESIDENT'S REPORT (contd)

President Gee: (contd)

As you will note at summer commencement tomorrow, a great many graduate students complete their degrees in the summer months. Undergraduates must often work during the summer — many in internships and co-op jobs that not only will help finance school for the coming year, but also will contribute to their educational experience. Some used the summer to travel and study abroad.

In July I took a brief detour from a vacation to drop by Ohio State's study program in Nantes, France. Over dinner with a very bright and energetic group of Ohio State students, I learned from them how much this educational opportunity is contributing to their personal development and education.

I sent, by the way, a letter to each of our graduate and undergraduate students last month outlining for them — as I did for all of you in July — the steps being taken and choices being made in response to our more limited resources from the state. Steven Savage, a graduate student from Perrysburg, Ohio, wrote to me to say, and I quote from his letter, "The recent budget cuts do worry me and my fellow students. ... It is not an easy time, in Ohio or in America, but every effort, from financial wizardry to comforting words, helps out. Raising spirits and raising money are equally important." Of course, I appreciated Steven's note. But I am reminded that what we are about at this university is, and will always be, that of raising quality and raising standards of achievement for this university and certainly the people it serves.

I spoke to this Board at our last meeting about the serious problem of closed courses. Indeed, we now have focused on that as one of our major issues. In a time of very serious budget restraint, I reported that we set aside $1.5 million to address this issue. Today, I want to update that report. Before I call upon Dr. Arnold to make a report, let me first compliment the Office of Academic Affairs, the department chairs, deans, and our faculty for their creative and committed efforts to reduce the number of closed courses that has, of course, become such an issue to us. We have turned the corner on this problem. We are offering more class sections this fall than last — 18,824 sections to be exact. Ladies and gentlemen, that is a lot of classroom teaching for those who would measure that.

I am happy to report that for the autumn quarter, more than 80 percent of our students got the courses they requested. And, out of more than 50,000 students, only 22 students who submitted a full schedule of four or five courses did not get registered for any classes. That is an extraordinary figure given the size of this institution.

The person who deserves a great deal of credit for coordinating our response to this issue, Associate Provost Bob Arnold, will now give you a brief overview of this.

Bob --

Dr. Robert Arnold:

Thank you. I am very pleased to come before the Board at the President's request with this report.
Of the $1.5 million that was allocated to the closed course problem, to date we have spent $658,000 creating new sections and courses beginning this fall. That has resulted in 6,455 new seats, which certainly has greatly alleviated the problem. The net subsidy in fee income from that effort is estimated, at this point, to be $3.6 million. Eighty-one percent of our students received all the courses they requested. Now when we compare this to autumn 1991, only 77.2 percent of our students received all the courses they requested. In comparing it to two years ago, Autumn Quarter 1990, 80.2 percent of our students received all the courses. Thus, we are doing slightly better than 1990, and much better than last autumn. The downward trend over the past four years in satisfying course requests has been reversed despite the budget cuts and the financial difficulties the University has had.

Another standard we worry about in Academic Affairs, in terms of closed courses, is the number of students that are closed out of all of their courses. It is a horrifying thought to receive a statement in the mail and open it up to find out you have been closed out of everything. I worry a lot about those people. This autumn 507 students received that bad piece of mail indicating they had been closed out of all their courses. This compares to 970 students a year ago, and 575 students two years ago. Clearly, once again, we have turned the corner on this one. Of the 507 students who didn't get any courses, 358 students requested only a single course, 80 students requested two courses, 47 students requested 3 courses, and 22 students requested a full schedule of either 4 or 5 courses.

President Gee:

Bob, I don't mean to interrupt you but I want to make sure people understand that when you talk about 500 students, you are talking about the vast majority of students who have only registered for one course. Therefore, in terms of course closure, that is as if they did not get that one course. It is an important piece of that data.

Dr. Arnold:

These are part-time students who are only registering for a single course.

Ms. Casto:

Do we do anything about getting these students who are taking three or more courses, their courses? Since they are being closed out of all of them, do we try to get them at least one or two of their courses?

Dr. Arnold:

Yes, we do. We are proactive on that. The Registrar writes to them and also writes to the colleges, asking them to get in touch with advisors, and then we work closely with them to get them courses. Sometimes before they are contacted, they contact me -- they actually contact the President's Office and it ends up with me.

Ms. Cusack:

Is that better? Is this a new system?
September 2, 1992 meeting, Board of Trustees

PRESIDENT’S REPORT (contd)

Dr. Arnold:

It is a system that has developed over the last year. It is something we are attempting to do in order to help the people in this unfortunate situation.

Ms. Casto:

Has it been implemented?

Dr. Arnold:

Yes. Once again, in comparing last year to this year, there are 3,078 fewer closeouts this year. This year 11,842 requests were denied because of closed or cancelled courses. We estimate that without intervention and the spending of the money I mentioned before, over 18,000 requests would have been denied. The 11,842 this year compares to 14,920 a year ago.

This autumn we will be offering 6,516 courses. Interestingly enough, that is down 202 from a year ago. There are 18,824 sections, which is up 55. That is interesting because this means that although there are 202 less courses, there are more sections of that fewer number of courses. We think this is a result of a letter that the Provost sent to the Deans reminding them of a faculty rule that suggests there be a minimum of 12 students in a course numbered below the 300 level, and 8 students above the 300 level. We believe the colleges are responding to that letter by eliminating the teaching of courses that have very, very low enrollments.

Another measure we use, when worrying about closed courses, is the number of courses that closeout more than 75 people. I don't know why 75. Traditionally in Academic Affairs it was 75. It was 75 when I got there, and has been ever since. We also worry about smaller ones, but one measure that is consistent, that we have had data on for some time, is those courses closing out more than 75. We had 30 of those this fall and we had 45 a year ago, so we have reduced that number significantly. What we will do is target each one of those courses and begin discussions with the department chair and the dean to determine exactly why those courses are closing out people. In some cases it is inevitable that this happen because of the lack of facilities. One of the courses that typically closes out more than 75 people is a physical education course -- golf. It is not a problem in the winter, but it is in the autumn and the spring. There is not a lot we can do about that without creating another golf course -- which I don’t think anybody wants to do.

Other courses though have other reasons for closing out. We are going to examine those in detail and see if we can fix those. A year from now I would like to see the list of courses that close out 75 people eliminated -- or possibly one with golf being the only course on it. That concludes my report, Mr. Chairman and Mr. President, thank you for inviting me.

President Gee:

Are there any questions for Bob?
PRESIDENT’S REPORT (cont’d)

President Gee: (cont’d)

I felt it was important for the Board to have this report today because this is a very serious issue for us. In this time of constraint, I am pleased that we have taken it very seriously. Indeed, the allocation of effort being put forth by our Provost's Office and our faculty and staff members who are working diligently to make good choices that advance our goals is something that we ought to note and applaud. I appreciate that. Thank you, very much, Bob.

Today, this Board will act on an appointment that brings a very capable and energetic new leader to Ohio State. Jerry May has accepted the position of Vice President for Development, a role that is enormously important, particularly in these times. He comes to us with outstanding experience. I make this comment with some reluctance, as he comes to Ohio State from -- as Woody used to say -- “that school up north.” But as you are aware as Trustees, we worked very diligently to recruit Jerry. He is one of the major leaders in terms of development activities and fund raising in this country. He has now come to launch our efforts to move forward at an absolutely vital time for us. Jerry, we are delighted to have you here and look forward to having you and your family soon involved in Ohio State. By the way, you are wearing all the right colors!

Mr. Jerry May:

You have me trained already, Gordon.

President Gee:

Very good. We are delighted to have you here, and thank you for being here for your first official day. Mr. Chairman, that concludes my report.

--0--

Mr. Barone:

At this time we would like to call on Jim Jones, who will give a report on the Big Ten Gender Equity Program.

Mr. Jim Jones:

Thank you, Mr. Chairman. President, Members of the Board, thank you for the opportunity. My role today, I believe, is to clarify for you what our friends in the media are trying to convince you this Conference did in the last two months. Indeed, in June, Conference faculty representatives did vote a gender equity commitment in the Big Ten Conference, subsequently followed by the Council of Presidents doing the same thing. Gender equity means that within the next five years this institution, and all the other institutions in this Conference, will get to 60:40 in terms of participants -- men to women -- in our intercollegiate program.

I need to tell you a couple of things that gender equity is not, insofar as I know what gender equity is. This has grown out of a statement in the Big Ten Statement of Principals where the value of equal participation was asserted. I don't think that there is any one of us who could disagree with that. While some suggest that genesis for the gender equity issue is contained in the Educational Amendments
Mr. Jones: (contd)

Act of 1972, called Title IX -- Gender Equity is not Title IX. We have passed a Title IX review at this institution and Title IX has some very definitive regulations, guidelines, and interpretations that we must follow. So we know exactly what that is. Congress, indeed, advised the Department of Education in the Office of Civil Rights that the regulations shall include, with respect to intercollegiate activities, reasonable provisions considering the nature of particular sports. Thus, we have been able to figure out what Title IX is and does for us. I don't think that we have a problem there.

I am sure that you are aware that we have one of the largest programs in the country. In fact, one of the top five largest programs combined in the United States. We have 18 men's sports and if you count the way the Big Ten Conference is now counting, we have 14 women's sports. The reason there is a difference in numbers -- if you have heard me speak before, I have always said 31 -- is that our rifle team is a co-ed team. The Big Ten counts that team twice, because it is a co-ed team. We intend to add the sport of soccer this school year for women. Nonetheless, presently we are at about 72:28 in terms of participation -- men to women in our program. That number has continually gone down over the years. As the skill level of our athletes, the skill level of our coaches, and the amount of money in women sports have all improved, the number of participants has declined. What it really tells you at this point, I think, is that young women are not willing to be what we call "walk-ons" on their team if they are not going to get a chance to play. Our society has not yet made it reasonable for a young woman to brag about having been on the team, like it has for a young man. As a consequence, you can see that young women have -- if they don't participate on a regular basis -- decided there are more important things in their lives, and they drop off the team.

In order to get to 60:40 in the next five years, this institution will have to make a swing if we retain the present program of 200 persons. That means we must get rid of a 100 men, add a 100 women, or any combination thereof. Gender Equity as far as we are concerned at the present moment has not yet been defined. What the presidents passed was simply a participation or an opportunity decision. In my mind there is a difference between opportunities and participants. We have not yet decided which one of those is gender equity. The NCAA has a committee which the associate commissioner of the conference, Phyllis Howlett, is chairing, and the Presidents' Commission has a committee to try and decide what gender equity is as far as participation or opportunity is concerned.

We have, I think, five ways to accomplish gender equity if, indeed, what it means is exactly 60 percent men participants and 40 percent women participants. That is: we can cap men's sports, not allow every young person who wants to participate on a team to be able to do so; we can cut men's sports; or we can add women participants. This is an interesting chore for us. Perhaps the easiest one to accommodate at this point, is to simply convince young women that it is worthwhile to be a walk-on on one of our teams. There is a discussion about offering more grant-in-aids. This institution for a long time has had maximum grant-in-aids in our women's sports. So we can't offer any more unless there is a national change in legislation. We can add women's sports, and we will be adding women's soccer after the Athletic Council meets this fall. When we offer women's soccer that will mean that we are offering every sport offered in the high schools of Ohio for young women; the ten most popular sports in the nation for young women. There isn't much left to add in order to pick up participants. True, we
Mr. Jones: (contd)

could add crew. I don't know who we could compete against that is close, but we
do have a river. We do have a crew club now. We could add badminton. There
are not a lot of badminton teams around, and it wouldn't give you a large number of
participants. We could add skiing, and as you know there are not a lot of mountains
in Ohio. So we are rather limited in terms of how much more we can grow on the
women's side of the sports offered.

I guess if I would give you some advice, we believe that it is a worthwhile goal to
work toward. We are concerned. We have believed for a long time in a
comprehensive intercollegiate program at this University, trying to offer the
maximum number of opportunities for all the student athletes. That puts us in a
rather difficult position in order to try to accommodate the 60:40 percentage. I
believe we can work toward it. Time will tell how close we get in the next five
years.

I'd be happy to entertain any of your questions.

President Gee:

Jim, I might note that the initial proposal which came forward from the Big Ten was
that the 60:40 result would be a condition of membership, as I remember. And as
you know, we took the position that to take that as a condition of membership was
not in the best interest of the Conference. At the same time, we indicated that our
own intent as a university would be to meet the 60:40 goal. But as a condition of
membership, we thought that was inappropriate and, of course, there was
considerable debate surrounding that issue. Have most of the other institutions
responded the way we have within the Big Ten?

Mr. Jones:

I think it is a little too early, Mr. President. Everybody is having a difficult time. If we
had a smaller program, it would be much easier for us to accomplish the 60:40. So
at this point in time, the fact that we have had a philosophy of offering a
comprehensive program makes it much more difficult for us to get there. If it was a
matter of money, then we would know what we had to do in the next five years to
get there. If we only had six sports for women, we could add six more and,
obviously, enlarge our program. There are not many things to add, so the only
thing that we can do is subtract. Although I do believe there are some young
women out there that we could encourage to be walk-ons, I must tell you that is an
adjustment for our coaches as well as the student athletes.

Take softball and baseball -- comparable sports. The baseball team has no
problem having 40 young men on it, the softball team has 16 young women. They
are the same kind of sports, they are played with nine persons on the field, you
could have similar numbers. There have not been to this point young women
willing to be the 29th and 30th person on our softball team. Our softball coach has
to adjust her recruiting and coaching philosophies in order to encourage those
young women and to try and keep them participating. But the question is, will they
be participants or will there be opportunities to participate -- there is a difference.
Ms. Casto:

Are we trying to create demand for a sport? Are you saying to me we have afforded the opportunity for so many to participate? We are not saying that you cannot participate in this? The fact is the demand is not there for women to also be included in this percentage.

Mr. Jones:

You are exactly correct, at this point in time. We may have to decide that we are going to ask some folks to give up their opportunity to participate in order for us to reach this percentage.

Ms. Casto:

I am not sure I understand what advantage that would be for anyone right now.

Mr. Jones:

That is why I am concerned about the definition -- using the term fair and equal. It can be fair and equal for one and not for the other, so we have to get to that. I hope that will be the last straw -- that we have to deny the opportunity. I believe that is what intercollegiate athletics and, indeed, going to college is all about -- opportunities.

Mr. Skestos:

We are committing ourselves to merely participating in this program to the extent that we can. We are not saying that at the end of five years if we don't have 60:40, we are going to suddenly cut our male programs. In other words, we are going to do the best we can to raise, through walk-ons and so forth, the 60:40 level. We aren't really saying in effect -- are we -- that if everything we try fails, that suddenly we are going to cut the male participation?

Mr. Jones:

I'd have to say, Mr. Skestos, that you are probably right for now, but we may reach that point in five years. We hope that none of us in this conference will reach that point. It was not the intent of the presidents when they passed it to say we are all going to get there. One of the reasons that we took it out as a condition of membership is, how do we decide, if it is a condition of membership and only three of us meet the goal in five years, who gets to vote on who is in and who is out? So obviously that was a wise decision, among other reasons, to take that out. I believe there is room for us to make a good faith effort in the next five years. Where we'll be in five years is difficult to answer. Five years from now, there may be more than enough young women who want to participate that this will not be a problem.

Mr. Celeste:

You said that recently the numbers have been going down. So at some point we had a better ratio?
Mr. Jones:

Oh, we had a much better ratio.

Mr. Celeste:

And what level was that -- when were we at our best ratio comparable to the 60:40 level?

Mr. Jones:

I am sorry, I can't give you those numbers. I would guess that we are down at least a third of our participants on the female side. As their skill level got better, as the grant-in-aid numbers went up, and as the coaching skills went up, fewer and fewer young women continued to participate.

President Gee:

So what you are saying is the quality of the programs went up in terms of competition, but the numbers of participation went down because it became so competitive, is that right?

Mr. Jones:

That is correct.

President Gee:

So we haven't created the culture where it is important to walk-on. Also, I would suspect that for our coaches -- women's coaches particularly -- that that is a new philosophy for them to encourage walk-ons, is that right?

Mr. Jones:

It is very definitely a new philosophy for every one of them, whether they are male or female coaches.

Ms. Cusack:

I would say, too, more than an attitude among women not to be walk-ons, it is sort of an intimidation thing. Because like you were saying the coaches got better, the programs got better, and that is the attitude that needs to change. It is sort of an intimidating atmosphere for a walk-on, not that people wouldn't want to be one.

President Gee:

What are you walking on for, Ms. Cusack?

Ms. Cusack:

I am going to be a soccer player.

President Gee:

Any further questions? Thank you, very much, Jim.
Resolution No. 93-16

AMENDMENTS TO THE COMMITTEE
APPOINTMENTS FOR 1992-1993

Synopsis: Amendments to the Committee Appointments of the Board of Trustees for 1992-93 are recommended.

RESOLVED, That Resolution No. 92-132, detailing the Committee Appointments of the Board of Trustees for 1992-93 be amended as follows:

University Managed Health Care System, Inc. Board of Directors
                                Theodore S. Celeste

*Serves as Board of Trustee's interface with the University's Planning Committee.

Upon motion of Ms. Casto, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

RESEARCH FOUNDATION REPORT

Mr. Celeste:

I am pleased to report on the Grants and Contracts for the months of June and July received by The Ohio State University Research Foundation. At Tab 1 we see that the award level for fiscal year 1992 is about 17 percent above fiscal year 1991. This corresponds to a growth in the number of awards received from 1531 to 1644. Each sponsor category has shown an increase this fiscal year, except for funding from the State of Ohio.

Awards for July, the first month of fiscal year 1993, are down somewhat compared to the same period last year. This appears to be due to fluctuations in the timing of some major awards that we expect will be forthcoming.

At Tab 2 you will find expenditure summaries for fiscal year 1992 and for the month of July. It is noteworthy that expenditures in fiscal year 1992 for personnel, travel, and indirect costs have exceeded the overall increase of 7.49 percent. The growth in external funding for travel reflects the increasing international research activities of the faculty.

The growth in expenditures in July compared to last year is over 14 percent. This is consistent with the increase in awards received in FY 1992.

Some projects of special interest that were funded in the months of June and July are listed at Tab 3. I thought you might be interested that two professors of Materials Science and Engineering have a new method of producing ceramic composite materials and funding from the Navy to explore the new process.
Mr. Celeste: (contd)

Last week I had the pleasure of visiting the laboratory of Professor Robert Brueggemeier to learn of his work on the role of estrogens in tumor formation. I had a good visit with him and his colleagues. His studies are basic to an understanding of approximately 50 percent of human cancers associated with sex hormones.

At Tab 4 is the list of all projects funded in June. At Tab 5 is the list of all projects funded in July. At Tab 6 is a summary of the proposal, award, and expenditure activity of our academic units during fiscal year 1992. I would like Ed Hayes to make a few brief comments on this information.

Dr. Hayes:

Thank you. I particularly want to note on that first summary table under Tab 6 there has been a significant increase in the number of proposals that have been submitted by our faculty. And I think the growth here in requests is over $100 million. It reflects the efforts of the faculty to bring in resources from the federal government and from other external sources to support their research, equipment, graduate students, and other research related activities.

As you know, the first step along the process of actually getting to spend the money is to write the proposals. And this increased activity, we believe, will pay significant dividends in terms of new awards and funding for research over the next 12 to 24 months.

The second summary page under Tab 6 is a summary for fiscal years '90, '91, and '92, in terms of award dollars. You can see from this that the new award totals in '92 are up 17 percent from '91, and 25 percent from fiscal year '90.

The third summary page is a summary of expenditures by academic units for '90, '91, and '92. The growth in expenditures from year to year is probably the best indicator of the health of our external funding picture because it is less susceptible to fluctuations in proposal deadlines and award dates.

Just a few highlights: the average increase in expenditures over the last two fiscal years has been about 17 percent, with a 7.5 percent increase coming in just the past year. There are 18 academic departments that have shown increases and nine of the academic units that have shown decreases during this past year. The details are indicated in that table.

I might mention that Academic Affairs has shown a 38 percent increase over the two-year period, due to increased funding from the National Science Foundation, the Department of Defense, and the National Institutes of Health. Much of this growth has been in the Minority Student Apprenticeship Programs, Academic Computing Services, the Ohio Supercomputing Center, International Activities, and the Mershon Center.

Agriculture has had a 39 percent increase over the two-year period due to the increased funding in the Department of Education and the State of Ohio. Much of this growth has been in Agronomy with funding from industrial sponsors.
RESEARCH FOUNDATION REPORT (contd)

Dr. Hayes: (contd)

Biological Sciences is down approximately 8 percent, due to the decline in private foundation funding. Engineering is down slightly in both the federal and non-federal categories. Health Services is up 34 percent, however, due to the renewal of funding of the Comprehensive Cancer Center. Human Ecology has shown significant growth due primarily to funding from NIH and the State of Ohio. Humanities expenditures are up; Math and Physical Sciences are up 39 percent, due primarily to increased funding from the National Science Foundation. Pharmacy is up 27 percent, due in large measure to the increased funding from industrial sources.

The Office of Research, through the Byrd and Mapping Centers, has greater than a 50 percent increase as a result of awards from NASA, NOAH, and the State of Ohio.

If members of the Board have particular questions about this information, I would be happy to answer them at a later time.

Mr. Celeste:

Thank you, very much. In the remaining two sections, Tab 7 lists examples of some of the many prestigious awards to OSU faculty during the last 2 years. Funding for these fellowships, grants, and prizes goes directly to the selected faculty member. As a result, the monthly Research Foundation reports do not include these awards.

Finally, Tab 8 includes press releases for the last 2 months issued by University Communications highlighting this recent research activity.

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS

Resolution No. 93-17

Synopsis: The reports on contracts, grants, and gifts and the summaries for June and July 1992 are presented for Board acceptance.

WHEREAS monies are solicited and received on behalf of the University from governmental, industrial, other agencies, alumni, and various individuals in support of research, instructional activities, and service; and

WHEREAS such gifts are received through The Ohio State University Research Foundation, the Engineering Experiment Station of The Ohio State University, The Ohio State University Development Fund, and The Ohio State University Foundation:

NOW THEREFORE

BE IT RESOLVED, That the research agreement between The Ohio State University and The Ohio State University Research Foundation for the contracts and grants reported herein, and the acceptance of the reports from the Engineering Experiment Station, The Ohio State University Development Fund, and The Ohio State University Foundation during the months of June and July 1992 be approved.
September 2, 1992 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

Upon motion of Mr. Celeste, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

The Ohio State University Development Fund

Establishment of Named Funds

The Donald C. Kent, D.D.S. Cancer Research Endowment Fund (Support cancer research) $100,000.00

The Harley C. and Elizabeth K. Lee Endowment Fund (Provide general support to the Department of Materials Science and Engineering) $30,000.00

The Samuel B. McCulloch Memorial Fund (Scholarships or grants-in-aid to varsity swimmers) $27,554.18

The Alan Holoch Law Library Fund (Support Library staff in attending professional development programs) $15,907.00

The Raymond E., Jr. & Dorothy B. Daily Cancer Research Endowment Fund (Support cancer research) $15,000.00

The Delaware County 4-H Endowment Fund (Support the Delaware County 4-H Program) $15,000.00

The Edward H. Jennings Scholarship Fund (Scholarships - College of Business) $15,000.00
Establishment of Named Funds

The Donald C. Kent, D.D.S Cancer Research
Endowment fund

The Donald C. Kent, D.D.S. Cancer Research Endowment Fund was established September 2, 1992, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University Development Fund from Dorothy A. Kent for the benefit of The Arthur G. James Cancer Hospital and Research Institute.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support cancer research in The Arthur G. James Cancer Hospital and Research Institute as approved by the Director of The Arthur G. James Cancer Hospital and Research Institute and the Vice President for Health Services.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the Director of The Arthur G. James Cancer Hospital and Research Institute and the Vice President for Health Services in order to carry out the desire of the donor.

The Harley C. and Elizabeth K. Lee Endowment Fund

The Harley C. and Elizabeth K. Lee Endowment Fund was established September 2, 1992, by the Board of Trustees of The Ohio State University, with a gift to The Ohio State University Development Fund from the estate of Harley C. Lee (Bachelors, Mining Engineering, 1927).

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide general support to the Department of Materials Science and Engineering in the College of Engineering. Said support may include the purchase of equipment, travel to professional meetings and conferences and other expenditures necessary where funds for same are not provided by state resources. Additionally, should resources provided by this fund not be used in any year for the general purposes of the Department, then said funds may be used to provide scholarship support to students in the speciality areas comprising the Department of Materials Science and Engineering. The chairperson of the Department shall have responsibility for determining how resources provided by the fund are to be utilized in accordance with the fund's description.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the chairperson of the Department of Materials Science and Engineering and the dean of the College of Engineering in order to carry out the desire of the donor.
Establishment of Named Funds (contd)

The Samuel B. McCulloch Memorial Fund

The Samuel B. McCulloch Memorial Fund was established September 2, 1992, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from the widow and friends and colleagues of the late Samuel B. McCulloch, Columbus, Ohio.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide scholarships or grants-in-aid to varsity swimmers at The Ohio State University. Award recipients shall be selected by the Director of Athletics in consultation with the University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

The Raymond E., Jr. & Dorothy B. Daily Cancer Research Endowment Fund

The Raymond E., Jr. & Dorothy B. Daily Cancer Research Endowment Fund was established September 2, 1992, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University Development Fund from the estate of Dorothy B. Daily (B.S.Ed. ’26; M.S. ’37) for the support of The Arthur G. James Cancer Hospital and Research Institute.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support cancer research in The Arthur G. James Cancer Hospital and Research Institute as approved by the Director of The Arthur G. James Cancer Hospital and Research Institute and the Vice President for Health Services.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the Director of The Arthur G. James Cancer Hospital and Research Institute and the Vice President for Health Services in order to carry out the desire of the donor.
REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Named Funds (contd)

The Delaware County 4-H Endowment Fund

The Delaware County 4-H Endowment Fund was established September 2, 1992, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from the Delaware County 4-H Advisory Committee and other friends of the Delaware County 4-H Program.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support the Delaware County 4-H Program. This support may include, but is not limited to, the funding of scholarships and awards for 4-H members, volunteer leaders and friends of 4-H; sponsoring seminars and programs; and purchasing materials or services that will supplement 4-H programming or increase the visibility and public support for 4-H in Delaware County. All expenditures from this fund shall be approved by the Delaware County 4-H Advisory Committee and the professional in charge of the Delaware County 4-H Program.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the Director of The Ohio Cooperative Extension Service and a committee representing the local 4-H donors in order to carry out the desire of the donors.

The Alan Holoch Law Library Fund

The Alan Holoch Law Library Fund was established September 2, 1992, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from family, friends, and colleagues of the late Alan Holoch, Director of the College of Law Library, and Professor of Law.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The Director of the Law Library, after consultation with the Dean of the College of Law, shall use the fund's annual income to assist law library staff members in attending the American Association of Law Libraries' annual meeting and institute, and similar programs of professional development for Law Library staff professional development.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean and director of the Law Library in order to carry out the desire of the donors.
The Edward H. Jennings Scholarship Fund was established September 2, 1992, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from friends and colleagues of Dr. Edward H. Jennings in recognition of Dr. Jennings’ nine years of distinguished service as president of The Ohio State University.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide scholarships to students within the College of Business. The selection of the award recipients shall be made by the appropriate College of Business representative or committee in consultation with the University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

(Used for library acquisitions - Department of History)
Establishment of Named Funds

The Reinberger Cancer Research Endowment Fund

The Reinberger Cancer Research Endowment Fund was established September 2, 1992, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University Development Fund from The Reinberger Foundation for the benefit of The Arthur G. James Cancer Hospital and Research Institute.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support cancer research in The Arthur G. James Cancer Hospital and Research Institute as approved by the Director of The Arthur G. James Cancer Hospital and Research Institute and the Vice President for Health Services.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the Director of The Arthur G. James Cancer Hospital and Research Institute and the Vice President for Health Services in order to carry out the desire of the donor.

The D. W. Miller, 1869-1947, Endowed Scholarship Fund

The D. W. Miller, 1869-1947, Endowed Scholarship Fund was established September 2, 1992, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from Marian Y. Rudd in memory of a person whose concern for others helped many. May those who benefit from it find reason to remember him and follow his example.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall provide scholarships for females enrolled in the College of Medicine with preference given to students from Auglaize or Allen Counties and in turn other Ohio residents. Any unused income should be returned to the principal at the end of each fiscal year. Every tenth year the entire income for that year should revert to The Miller Fund so it may grow and be kept in balance with possible inflation. The selection of the recipient shall be made by the College of Medicine in consultation with the University Committee on Student Financial Aid. In awarding scholarship funds it is preferred that they be as substantial as possible rather than distributing smaller amounts to numerous students.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use, which would provide financial aid to students, shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.
September 2, 1992 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Named Funds (contd)

The Thomas and Evelyn Stephens Scholarship Fund
in Special Education

The Thomas and Evelyn Stephens Scholarship Fund in Special Education was established September 2, 1992, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from Thomas and Evelyn Stephens and from their friends on the occasion of Dr. Thomas Stephens’ retirement as Professor and Associate Dean of The Ohio State University College of Education. The fund is being established to recognize the Stephens’ long-term commitment to the College, to students and to special needs populations.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide scholarship support for a graduate student(s) in the College of Education who plans a career working with special needs students and/or programs. Selection of the scholarship recipient(s) shall be made by the Dean of the College of Education in consultation with the University Committee on Student Financial Aid, Dr. Stephens to the extent possible, and appropriate faculty members in the College of Education.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the Dean of the College of Education in order to carry out the desire of the donors.

Change in Name and Description of Named Funds

The Daniel J. L. Firestone Photography Scholarship Fund

The Daniel J. L. Firestone Photography Scholarship was established May 7, 1976, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University Development Fund from Daniel J. L. Firestone (B.S.Bus.Adm. ‘51) of Columbus, Ohio. The description was revised September 2, 1992.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide one or more scholarships for undergraduate students enrolled in photography. The selection of the recipients shall be made by the University Committee on Student Financial Aid upon the recommendation of the Chairperson of the Department of Art and the Dean of the College of the Arts.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer then responsible for the study of photography in order to carry out the desire of the donor.

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Change in Name and Description of Named Funds (contd)

The William H. Havener Eye Center Fund

The Ohio State University College of Medicine Ophthalmologic Center was established October 11, 1967, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from faculty of the Department of Ophthalmology and alumni and friends of the Department, the College of Medicine and the University. The name and description were revised September 2, 1992.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

For purposes of the establishment, construction, and maintenance of a facility to be known as The William H. Havener Eye Center, a fund has been established to receive gifts, bequests, grants, etc., from interested individuals. The purpose of this fund is to provide all or a portion thereof of the cost of developing, building, equipping and maintaining the center. This center is intended to be a teaching facility for medical personnel and students at all levels, to further the effective advancement of knowledge through applied and basic research and to provide the necessary clinical facilities for the teaching and improvement of methods of eye care. Accrued interest is to be added to the principal until such time as expenditures are required to fulfill the purposes for which this fund is established. At this time, both accrued interest and principal may be used. Expenditures from this fund are to be made following normal University procedures but must be approved by a committee appointed by the Dean of the College of Medicine and consisting of the Chairperson of the Department of Ophthalmology and three ophthalmologists recommended by the Chairperson of the Department of Ophthalmology from the faculty of that Department. Appointment to the committee will be by the Dean of the College of Medicine and the committee will report to the Dean. The recommendations of this committee will be subject to the approval of the Dean of the College of Medicine.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the Dean of the College of Medicine, the Chairperson of the Department of Ophthalmology, or program administrative officer in order to carry out the desire of the donors.

Change in Name of Named Fund

The Dr. Carl Claron & Mildred Monaghan Hugger Medical Research Fund

The Mildred M. Hugger Medical Research Fund was established September 7, 1990, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from the Estate of Mildred M. Hugger, New York, New York. The name of the fund was revised September 2, 1992.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.
REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Change in Name of Named Fund (contd)

The Dr. Carl Claron & Mildred Monaghan Hugger
Medical Research Fund (contd)

The annual income shall be reinvested with no income or principal being distributed until December 23, 2013 (25 years after the donor's death). After such 25 years, one-half of the annual income shall be used for research projects. The other one-half of the annual income shall continue to be reinvested until the value of the fund reaches $1,000,000. Thereafter, the entire income may be used for research projects. The income may be used for research in the field of cardiac and vascular diseases and diseases of the eye, particularly cataracts, as approved by the Dean of the College of Medicine in consultation with the chairpersons of the appropriate departments. As appropriate, the results of the research supported by this fund shall be published.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

THE OHIO STATE UNIVERSITY FOUNDATION

Approval of Description and Establishment of Funds

The James C. and Ruthe C. Yocum Research Fund

The James C. and Ruthe C. Yocum Research Fund was established September 2, 1992, by the Board of Trustees of The Ohio State University through funds received by the University from The Ohio State University Foundation, which has established an endowed fund with gifts designated for the support of the College of Business from the estate of Ruthe C. Yocum.

Income provided by the Foundation shall be used to support archival activities of the former Bureau of Business Research and research programs now directed by the Dean of the College of Business.

The Professor John C. Burnham Endowment Fund

The Professor John C. Burnham Endowment Fund was established September 2, 1992, by the Board of Trustees of The Ohio State University through funds received by the University from The Ohio State University Foundation, which has established an endowed fund with gifts from a friend and designated for the support of the Department of History.

Income provided by the Foundation shall be distributed to the Department of History to be used for library acquisitions of primary concern and interest to the Department of History. Expenditures from this fund shall be approved by the chairperson of the Department of History.
HOSPITALS BOARD COMMITTEE REPORT

Mr. Celeste:

The Board's Executive Committee met on July 30. One of the highlights of that meeting was a review of the most recent available Medicare hospital mortality data covering 1988, 1989 and 1990. The data reveal that for all causes, University Hospitals has remained consistently below predicted mortality at 30 days, 90 days and 180 days, despite the fact that our patients are typically more acutely ill than the average patient. Mr. Fraley pointed out that our overall average rate increase of 3 percent and our $250 semi-private room rate are the lowest in the metropolitan area. During the past fiscal year, University Hospitals was able to reduce receivables from 100 days to 71 days -- well below the target of 85 days set by the Hospitals Board. That was a tremendous accomplishment.

At the August 27 Administrative/Operations Committee meeting Jerry Maier presented an in-depth analysis of the Hospitals' affiliated programs including MedOhio, Skymed, Beechwold, and Sports Medicine. The Committee also reviewed the Long-Term Financial Plan developed to support the financial goals of the medical center's Strategic Plan. Those goals are to maintain 10 days in operating cash reserves; reduce average plant age; provide for bond retirement and capital improvement funds; continue to comply with bond covenants; and operate with a margin not less than .5 percent or greater than 3 percent of net patient revenues. Lastly, the Committee received an update report on planned Cannon Drive improvements and Route 315 access ramps.

The full Hospitals Board also met on August 27. The Board received committee reports and approved the Long-Term Financial Plan as recommended by the Administrative/Operations Committee. After reports from the Medical Director and Chief of Staff. The Board received financial and statistical data from both University Hospitals and the James Cancer Hospital. Mr. Fraley presented an update on the Hospitals' involvement in various community outreach programs. University Hospitals are providing services within the Near East Side community for care of geriatric patients, prevention of premature births, and care for drug-exposed infants and toddlers. Our outreach efforts also include Food Pantry donations; United Way contributions; separate programs providing summer employment for low income students and talented minority students; and 2 additional programs offering educational and training opportunities for jobless/underemployed adults and for parents receiving state financial assistance. Dr. Patricia Temple provided an overview of OSU Managed Health Care Systems, Inc. and its relationship to the Hospitals. The Board reviewed and approved the Bylaws for establishment of the Medical Center Development Council.

That concludes my report, Mr. Chairman.

--0--

ACADEMIC AFFAIRS COMMITTEE REPORT

Mr. Kessler:

The Academic Affairs Committee received a report this morning on the implications for Ohio State of selected recommendations from the statewide Managing For the Future Task Force Report. In relation to that, Associate Provost Nancy Rudd discussed the University's mission; and Associate Provost Ed Ray discussed the regional campuses.

In addition, the Committee is recommending the following resolutions:
HONORARY DEGREES

Resolution No. 93-18

Synopsis: The Academic Affairs Committee recommended the awarding of honorary degrees to Ralph W. Cummings and Frank H. T. Rhodes.

WHEREAS the Committee on Honorary Degrees and the University Senate, pursuant to rule 3335-5-488 of the Administrative Code, have approved for recommendation to the Board of Trustees awarding of honorary degrees as listed below:

- Ralph W. Cummings  Doctor of Education
- Frank H. T. Rhodes  Doctor of Education

NOW THEREFORE

BE IT RESOLVED, That the above honorary degrees be awarded in accordance with the recommendation at a time convenient to the University and the recipients.

Upon motion of Mr. Kessler, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

WAIVER

Resolution No. 93-19

Synopsis: The Academic Affairs Committee recommended the approval of a waiver.

WHEREAS pursuant to the Board's acceptance of the Report of the Committee on Retirement and Insurance on February 6, 1959, and Resolution 77-92, "Principal Administrative Officials" of The Ohio State University are to be relieved of their administrative assignments at age 65; and

WHEREAS the University's current appointment of Robert M. Duncan as Vice President and General Counsel for Legal Affairs would be restricted by the age 65 exclusion; and

WHEREAS Robert M. Duncan has demonstrated outstanding service to the University in his capacity as Vice President and General Counsel and his appointment is within the purview of the affirmative action goals of The Ohio State University; and

WHEREAS the University wishes to continue the appointment of Robert M. Duncan in this administrative post beyond his sixty-fifth birthday:

NOW THEREFORE

BE IT RESOLVED, That Resolution 77-92 and the provisions of the February 6, 1959, Report of the Committee on Retirement and Insurance be waived to allow for the continued appointment of Robert M. Duncan as Vice President and General Counsel for Legal Affairs.

Upon motion of Mr. Kessler, seconded by Mr. Shumate, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--
PERSONNEL ACTIONS

RESOLVED, That the personnel actions as recorded in the Personnel Budget Records of the University since the July 10, 1992 meeting of the Board, including the following Appointments, Promotion, Appointment of Chairpersons and Directors, Reappointment of Chairperson and Director, Leaves of Absence Without Salary, Leave of Absence Without Salary--Continuation, Professional Improvement Leave, Professional Improvement Leaves--Change in Dates, Promotions/Tenure, Emeritus Titles, and Medical Staff Appointments and Reappointments (The Arthur G. James Cancer Hospital and Research Institute) as detailed in the University Budget be approved and the Medical Staff Appointments and Reappointments (The Ohio State University Hospitals) approved June 25, 1992, by the Hospitals Board be ratified.

Appointments

Name: JERRY A. MAY
Titles: Vice President/President
Office: Development/University Foundation
Effective: September 2, 1992
Salary: $130,008.00
Present Position: Director, Principal Gifts Program, The University of Michigan

Name: DAVID WILLIAMS II
Title: Vice Provost
Office: Minority Affairs
Effective: August 1, 1992
Salary: $94,908.00
Present Position: Associate Professor, College of Law

Name: JOSE B. CRUZ, JR.
Title: Dean
College: Engineering
Effective: November 1, 1992
Salary: $155,004.00
Present Position: Professor, Department of Electrical and Computer Engineering, University of California at Irvine

Name: JAMES C. GARLAND
Title: Dean
College: Mathematical and Physical Sciences
Effective: July 1, 1992
Salary: $155,004.00
Present Position: Acting Dean, College of Mathematical and Physical Sciences

Name: ROBERT P. LEONE
Title: Professor (The Berry Chair of New Technologies in Marketing)
Department: Marketing
Effective: January 1, 1993
Salary: $120,000.00
Present Position: The Joe C. Thompson Centennial Professor of Marketing and Research Fellow, IC Institute, University of Texas at Austin
PERSONNEL ACTIONS (contd)

Promotion

Name: R. REED FRALEY
Title: Associate Vice President
Office: Health Services
Effective: September 1, 1992
Salary: N/A
Present Position: Assistant Vice President for Health Services

Correction

Name: SHELDON G. SHORE
Title: Professor (Charles H. Kimberly Professorship in Chemistry)
Department: Chemistry
Corrected Term Dates: April 1, 1992 - March 31, 1996

Appointment of Chairpersons and Directors

July 1, 1992 through June 30, 1993

Wexner Center for the Arts
William B. Cook*

July 1, 1992 through June 30, 1996

Medicinal Chemistry and Pharmacognosy
Robert W. Brueggemeier
(Department Correction)

RESOLUTIONS IN MEMORIAM

Resolution No. 93-21

Synopsis: The Academic Affairs Committee recommended the approval of six Resolutions in Memoriam.

RESOLVED, That the Board adopt the following Resolutions in Memoriam and that the President be requested to convey a copy to the families of the deceased.
RESOLUTIONS IN MEMORIAM (contd)

Richard W. Bjornson

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on July 16, 1992, of Richard W. Bjornson, Professor in the Department of French and Italian and the Division of Comparative Studies in the Humanities.

Richard Bjornson was born January 16, 1938, in Oak Park, Illinois. He received his early training at Proviso East High School in Maywood, Illinois, his B.A. from Lawrence College in 1959, the M.A. at Northwestern University in 1961, and in 1968 his doctorate from the Universite de Paris. Before joining the faculty of Comparative Literature at The Ohio State University in 1974, he held teaching appointments at the Universities of Maryland and Wisconsin.

Dr. Bjornson was a comparatist of wide-ranging interests and a specialist in literatures of sub-Saharan Africa, especially Cameroon. His book on the cultural history of that country, The African Quest for Freedom and Identity (Indiana, 1991) has been widely praised as a scholarly model and was awarded the Choice best academic book of the year award. His Mongo Beti and the Aesthetics of Commitment is forthcoming (Cambridge). A distinguished translator of African writers, Richard Bjornson published seven volumes of translations, including the historically significant Doguicimi by Hazoume and Tales from My Hut by Pilombe. Editor of the principal American journal of African literatures, Research in African Literatures, he was editor of several special journal issues and also of essay collections, most recently Africa and the West (with Isaac Mowoe, Greenwood, 1986). He lectured frequently in Africa and in Europe and was Visiting Professor at the University of Bayreuth. His innovative comparative study, The Picaresque Hero in European Fiction (Wisconsin, 1977), was frequently reprinted and influential in renewing the subject.

An outstanding teacher at all levels, Dr. Bjornson was also a specially revered director of dissertations and an outstanding mentor to younger scholars. He worked indefatigably on curricular development, in both Comparative Studies and French and Italian, and was instrumental in establishing in the latter a flourishing program in Francophone Literatures, which he directed. His energetic commitment to interdisciplinary studies included organization of several colloquia in the College of Humanities, on broad topics like "The Future of the University" (1990) and "Rethinking Patterns of Knowledge" (1989), and their publication, with Dr. Marilyn Waldman, in the series Papers in Comparative Studies. Dr. Bjornson was awarded a University Alumni Teaching Award in 1982.

Active in the University Senate and its committees, especially on Academic Freedom, Dr. Bjornson was also a valued participant and officer in national learned societies, including the African Literature Association and the Modern Language Association of America, in which he was a member of the Prize Committee and the Delegate Assembly. The Ohio Humanities Council, in recognition of his service to it and beyond as an exemplary humanist, has named in his honor a humanities prize to be awarded annually.

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Richard P. Goldthwait

The Board of Trustees of The Ohio State University expresses its sorrow upon of the death on July 7, 1992, of Richard P. Goldthwait, Professor Emeritus in the Department of Geological Sciences.
RESOLUTIONS IN MEMORIAM (contd)

Richard P. Goldthwait (contd)

Professor Goldthwait was born in Hanover, New Hampshire, on June 6, 1911. He received an A.B. (1933) in Geology from Dartmouth College, and a M.S. (1937) and Ph.D. (1939) in Geology from Harvard University. From 1939 to 1943, he was an Instructor and Assistant Professor of Geology at Brown University. Dr. Goldthwait moved to Ohio in 1944 to serve in the U.S. Army Air Force as a Materials Engineer at Wright Field. He joined the faculty of The Ohio State University as Associate Professor in 1946 in the Department of Geology, and served as Professor from 1948 until his retirement in 1977. He founded and was the first Director (1960-65) of the Institute of Polar Studies. He was Chairman of the Department of Geology (1965-69) and Acting Dean of College of Mathematics and Physical Sciences (1972).

He was a member and fellow of numerous national and international scientific organizations. He was President of the Ohio Academy of Science (1958-59), a Governor of the Arctic Institute of North America (1960-66), and on the Council of International Glaciological Society (1970-73).

In his youth, he worked as a field assistant for his father, an eminent geologist at Dartmouth College, and in 1935 began his own research on glacial geology and glaciology. In 1936 he published the results of the first successful seismic sounding through glacier ice. Much of his career was devoted to understanding the glacial history of Ohio and he was one of the first to use carbon-14 dating in this task. He published more than 30 papers and reports, many co-authored with his students, on the glacial geology of Ohio. These have been of immense practical value in resource development, waste disposal, and land-use planning. Concepts and models for deglaciation and glacial morphologic features benefitted from his research on glaciers and glacial landscapes in Antarctica, Greenland, Baffin Island, Alaska, and New Zealand. He published more than 100 papers and reports and edited or authored five books. His understanding of past and present glaciers continued to grow even in retirement. As a Professor Emeritus, he continued to do field research, publish papers, edit books, organize sessions at professional meetings, and give advice to young scientists, other professionals, and students.

His many awards and honors include the Antarctic Medal from the U.S. Congress (1968), the Outstanding Quaternary Scientist Award of the Geological Society of America (1981), the first Distinguished Career Award from the Geological Society of America (1986), and the Mather Medal from the Ohio Geological Survey (1989). Mount Goldthwait in Antarctica and the Goldthwait Polar Library of the Byrd Polar Research Center are named for him.

He influenced the lives of many with courses, popular lectures (some on radio), publications, and his service to the university, the community and the state. His wisdom, foresight, high standards, and enthusiasm in research and education will not be forgotten.

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

R. George Jaap

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on July 18, 1992, of R. George Jaap, Professor Emeritus in the Department of Poultry Science.
RESOLUTIONS IN MEMORIAM (contd)

R. George Jaap (contd)

Dr. Jaap was born on October 27, 1905, at Thedford, Ontario, Canada. He received a Bachelor of Arts degree in 1927 and a Bachelor of Science degree in Agriculture in 1929 from the University of Saskatchewan. Dr. Jaap earned his Master of Science degree in 1930 and his Ph.D. in 1933 from the University of Wisconsin. He spent one year as a Post Doctoral Researcher in Genetics at the University of Wisconsin before joining the faculty of the Oklahoma State University. He came to The Ohio State University in 1946 as Professor of Poultry Science. He retired in June 1976, after a long career of distinguished service to the poultry industry. During his career, he served as senior advisor for 16 M.S. and 22 Ph.D. students. He was author or co-author of 86 research articles pertaining to chickens, ducks, or turkeys. He taught courses in avian physiology, animal breeding, and poultry genetics.

Dr. Jaap’s major contributions to the poultry industry were through research on quantitative inheritance of growth rate and egg production in chickens and utilization of breeding methods to achieve rapid gains in performance. He published meritorious research in the inheritance of various single gene traits in avian species; in psychological genetics related to hormonal response and development of endocrine glands; in breeding methods for application of inbreeding and crossbreeding to obtain superior performance; and in cytogenetics by identifying chromosomal abnormalities that alter development.

Dr. Jaap was particularly active in the Poultry Science Association and the World's Poultry Science Association. He served as Associate Editor of Poultry Science from 1939-1944 and Editor of the journal from 1944-1949. He was elected as a Fellow in the Poultry Science Association in 1959 and served as President in 1962-63. He was Editor of the World's Poultry Science Journal from 1958-1973 and from 1958-1978 served as Treasurer and Assistant Secretary for the World's Poultry Science Association.

His professional awards and honors included a Fulbright Research Scholarship in 1951, the Ralston Purina Teaching Award of the Poultry Science Association in 1970, the French Medal of Honor for Excellent Service to Agriculture in 1971, the Macdougall Award for meritorious service to the World's Poultry Science Association in 1974, election to the American Poultry Historical Society Poultry Hall of Fame in 1977, and the Distinguished Graduate in Agriculture Award by The University of Saskatchewan in 1986. In 1992 he received the Meritorious Service Award by the Ohio Poultry Association, and was selected for the International Poultry Hall of Fame.

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Emanuel D. Rudolph

The Board of Trustees of The Ohio State University expresses its sorrow upon the death June 22, 1992, of Emanuel D. Rudolph, Professor Emeritus of the Department of Plant Biology.

Professor Rudolph was born September 9, 1927, New York, N.Y. He received his B.A. from New York University in 1950 and his Ph.D. from Washington University (St. Louis) in 1955.

Dr. Rudolph taught in the Department of Botany (now Plant Biology) from 1961-89 and was chairperson of that department from 1978-87. In 1989 he took early retirement and continued to teach one course a year. He served as Director of the Institute of Polar Studies (now Byrd Polar Research Center) from 1969-73, and Director of the Environmental Biology Graduate Program, 1972-78. He was also a curator in the Ohio State University Herbarium.
RESOLUTIONS IN MEMORIAM (contd)

Emanuel D. Rudolph (contd)

Dr. Rudolph did research on lichens and the history of botany, authored numerous scientific papers on those topics, edited a book on symbiosis and parasitism, wrote more than 150 book reviews in major journals, and presented more than 100 papers at scientific meetings.

Professor Rudolph was active in professional societies and other organizations. He was a Fellow of the American Association for the Advancement of Science, a Fellow of the Ohio Academy of Science, a Fellow of the Arctic Institute of North America, and a Fellow of the Linnean Society of London. He was also the recipient of several awards and honors, among them the Antarctic Medal of the United States in 1970. "Rudolph Glacier" in Victoria Land, Antarctica, was named after him by the U.S. Board of Geographical Names, and Edrudia, a genus of lichens, was named after him in 1980.

Dr. Rudolph was President-Elect of the Ohio Academy of Science; President-Elect of the Friends of the Library (Ohio State University), a group of which he was a founding member and ardent supporter; and Past President of the Friends of the Byrd Polar Research Center.

Professor Rudolph was a respected researcher, valued teacher and mentor, and generous friend to people in many areas at Ohio State and around the country. His enthusiasm for learning and scholarship, his gentle good humor and cooperative spirit, were a positive example to all who knew him.

On behalf of the University community, the Board of Trustees expresses to the family its sympathy. It was directed that his resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Kathleen Scobie

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on July 3, 1992, of Kathleen Scobie, Professor Emeritus in the School of Allied Medical Professions.

Kathleen Scobie was born on May 12, 1908. She received her B.S. in 1933 from The Ohio State University with a major in food and nutrition. She received her M.S. in 1945 from Simmons College and the Harvard School of Public Health in public health nutrition. Over the years she held several positions as a dietitian in area health facilities. As a health professional, Professor Scobie was active in a number of different professional associations, including the American Dietetic Association, the Ohio Dietetic Association, American Public Health Association, and Ohio Public Health Association.

From 1936 to 1946, she was employed by the University Hospitals as a therapeutic dietician and clinic nutritionist. From 1946 to 1951, she was an associate in maternal and child care at Harvard School of Public Health, and in 1951 she returned to OSU Hospitals as a nutritionist. During this time, she was also appointed an assistant professor in the College of Medicine, Department of Preventive Medicine and became, in 1965, an assistant professor in Medical Diabetics. In 1966, when this Medical Diabetics program became a division of the School of Allied Medical Professions, her appointment continued in this academic unit. Professor Scobie was promoted to the rank of associate professor in 1969, and was granted emeritus status upon her retirement in 1971.
RESOLUTIONS IN MEMORIAM (contd)

Kathleen Scobie (contd)

Professor Scobie had a long and distinguished career at The Ohio State University as both practitioner and teacher. While in the School of Allied Medical Professions, she assumed responsibilities as an advisor for all of the undergraduate students in the Medical Dietetics Division, as well as taking an active and significant role in teaching the public health and community nutrition components in the academic program. Upon the occasion of her retirement, it was noted that, as a teacher, "she has been a source of inspiration to her students and provided wise counseling for them." During her years at the University, Professor Scobie was a dedicated and resourceful academician. She had a significant impact on the growth and development of an academic program that has become nationally known for excellence in both instruction and research.

On behalf of the University, the Board of Trustees expresses to the family its deepest sympathy and sense of understanding in their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

John S. Vasko

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on June 29, 1992, of John S. Vasko, Professor Emeritus in the Department of Surgery, the Division of Cardiothoracic Surgery.

John S. Vasko was born on March 17, 1929, in Cleveland, Ohio. He received all of his formal higher education at The Ohio State University, a Bachelor of Arts degree in 1950, a doctorate in Dental Science cum laude in 1954, and a doctorate in Medicine cum laude in 1958. During medical school, he served concurrently as an Instructor in Operative Dentistry, Consultant in Prosthetic Dentistry, and as Instructor in Anatomy and Physiology.

Dr. Vasko received his surgical training at two of America's premier residency programs. He served an internship and assistant residency at The Johns Hopkins Hospital in Baltimore, Maryland. During an additional year as the Halsted Research Fellow, he contributed significantly to the literature in a series of basic experiments investigating coronary atherosclerosis. In 1963, he coauthored, with Drs. Frank Spencer and Henry Bahnson, an important early paper on the surgical management of abdominal aortic aneurysms. He moved on to the Vanderbilt University School of Medicine to finish his surgical training under Dr. H. William Scott.

Following his residency training, Dr. Vasko served as a Senior Attending Surgeon at The National Institutes of Health and Chief of the Laboratories of Experimental Surgery. During this exciting early era in cardiovascular surgery, he contributed important articles to the literature on a wide variety of topics ranging from cardiac pharmacology, basic cardiac physiology and myocardial preservation, to inferior vena caval obstruction.

Dr. Vasko was appointed as Associate Professor of Surgery at The Ohio State University in 1966 and was promoted to Professor in 1973. He was appointed Chief of the Division of Cardiothoracic Surgery in 1982, serving with distinction. He developed an extraordinary practice in cardiac, thoracic, and peripheral vascular surgery, training dozens of surgeons in these advanced surgical techniques. He was widely respected as a master technician and fine physician. An active teacher, he exposed hundreds of students to the wonders of modern cardiovascular surgery. He continued to contribute actively to the medical literature, amassing over one hundred articles in his curriculum vitae over the course of his career. This dynamic academic surgeon's career was tragically cut short in its prime by a cerebrovascular accident in 1984. He spent his remaining years in active therapy in the company of his loving family and many friends.
RESOLUTIONS IN MEMORIAM (contd)

John S. Vasko (contd)

Dr. Vasko maintained an active association with the National Institutes of Health throughout his professional life, serving on several of its committees, including the National Research and Demonstration Center Review Committee, the Myocardial Infarction Committee of the National Heart, Blood, and Lung Institute, and the Policy Advisory Board. He was especially active in the Central Ohio Heart Association, serving as President and a member of the Board of Trustees. He served on numerous committees of the University Hospitals and the College of Medicine, rendering outstanding service to his University. He was recognized widely for his expertise, as his election to all the major national and international societies in his fields of endeavor documents.

John S. Vasko contributed much to the energy and vitality of his University and will be missed for his knowledge, experience, expertise and ability to inspire young surgeons in their pursuit of excellence.

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy and sense of understanding of their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Upon motion of Mr. Kessler, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

INVESTMENTS COMMITTEE REPORT

Amb. Wolf:

The Investments Committee reviewed the monthly Endowment Summary Report for the period July 17, 1992 through August 21, 1992. I'm pleased to report that the market value of the Endowment Fund on August 21, 1992 was $407.3 million, which was approximately $2.4 million above the July 17, 1992 market value. The market value of the equity portion of the Endowment Fund increased $300,000.00, while the fixed income portion increased $2.7 million during this reporting period. Net new additions to the Endowment Fund for August totalled $701,000.00, and we set aside an additional $500,000 for income reserves for our 1,895 named endowment funds. That was the one month report. We always give a report starting with the beginning of the fiscal year, so this starts July 1, 1992, approximately 2 1/2 weeks before the previous figures were implemented.

Since July 1, 1992, the beginning of the new fiscal year, the Endowment Fund has increased over $5 million. The net change in market value has accounted for an increase of $5.8 million, and net new additions were $706,000. The distribution of current asset allocation for the Endowment is 56 percent invested in equities, 28 percent in fixed income, 9 percent in real estate, and 7 percent in cash or cash equivalents.
INVESTMENTS COMMITTEE REPORT (contd)

Amb. Wolf: (contd)

The Investments Committee also heard the quarterly report on the total cash and investments position for the University. It was reported that the total of cash and investments for all accounts as of June 30, 1992, at the close of the last fiscal year, was $727.3 million. This was a decrease of $3.6 million from the quarter ended March 31, 1992. The primary reason for the decrease came from a $6.3 million net decrease in the University's debt service and debt construction funds resulting from certain bonded projects which were completed. Total cash and investments for the fiscal year increased $67.6 million, primarily due to an increase of $50.7 million in the University Endowment Fund.

And finally, we also heard the Quarterly Endowment Fund Report for June 30, 1992. It was indicated that the Endowment Fund had a total rate of return of 11.7 percent for the 1992 fiscal year. The Endowment distributed income of $18.6 million to its 1,895 named endowment funds in fiscal year 1992 and we anticipate that we will distribute more than $20.5 million to those same endowment funds during fiscal year 1993.

This concludes this very exciting report.

Mr. Barone:

Ambassador Wolf, do you have a ball-park figure on what the student investments has earned up to this time? Approximately?

Amb. Wolf:

I have a figure for the past 12 months, which was $14.5 million as income in dividends, not counting capital appreciation.

Mr. Barone:

But you don't have the income?

Amb. Wolf:

Well, the income, the dividends, and interest is about $14.5 million. And because we distribute around $20 million to these named endowment funds, because we don't separate the appreciation of the corpus, we just take 5.5 percent. So the $14.5 million of dividends and income, plus $5.5 million we take from capital, is about $20 million that we distribute to the named endowment funds. The market value of the portfolio went up over $25 million in that period of time. So you might say we had a market value increase of about $25 million, and dividends and income of $15 million. So we had a total appreciation in income of $40 million.

Mr. Barone:

From those records, I understand that the students have a better record to date than our professionals. That was what I was trying to bring out. Is that correct?
INVESTMENTS COMMITTEE REPORT (contd)

Amb. Wolf:

Yes. I can tell you exactly those relative reports, although one snap shot does not a movie picture make -- you might say. Because this last month the student investments portfolio had a little bit of a set back. But for the estimated 12-months return, the University students earned a total return, which includes appreciation in market value and income of dividends, of about 16.6 percent. This was almost 50 percent higher than that of our next highest portfolio manager which was about 12 percent. That was for the 12-month ending August 21.

Mr. Barone:

So our Ohio State students are still doing better than our professionals.

Amb. Wolf:

True.

Mr. Barone:

Thank you, Ambassador Wolf. I am very proud of that.

Amb. Wolf:

Well, we all are, Mr. Chairman.

--0--

FISCAL AFFAIRS COMMITTEE

Mr. Shumate:

We will begin our Committee meeting this morning with a report from Vice President Shkurti on the budget -- updating the members of the Board of Trustees.

Mr. Shkurti:

Thank you, Mr. Chairman. A number of things have happened since the budget was originally passed by the Board in July, and let me briefly touch on a couple of the most significant things. As you may recall, the budget assumed a 7 percent increase in tuition, but provided the University with the authority to raise tuition to up to 9.5 percent if tuition caps were raised by the state. The state did in fact raise the tuition caps to 9 percent, and the University followed with an increase of tuition to 9 percent. We regret that we had to do that to our students, but in order to protect the academic core we felt it was necessary. You may remember we took $23 million in cuts in the July budget, we deferred another $10 million to come up with a plan for January, and because the tuition increase will yield us about $2.5 million, that means that we still have to come up with $7.5 million in reductions or additional income between now and January. That will be difficult, but it will not be as difficult as coming up with $10 million. So I think our financial problem is eased a little bit as a result of that move.
FISCAL AFFAIRS COMMITTEE (contd)

Mr. Shkurti: (contd)

Secondly, you may recall, the budget that was passed by the Board in July implied a policy that the only pay raises that would be given to University employees are those that were required, and discretionary pay raises would not be provided. That is correct. That was followed through in the implementation of the budget. But because pay raises are such an important matter, I wanted to be absolutely clear with the Board and with the University as to what that meant. As we saw it, there were two categories of employees for whom pay raises are mandatory and they were given pay raises as a result of the budget that was passed in July. The first category are those employees who are under some collective bargaining contract, and many of them received raises of 4 percent effective July 1. The second category of employees are classified employees who are not members of a union and therefore are not covered by collective bargaining contracts. Under Board policy, in terms of the class plan that was adopted several years ago, these classified employees are guaranteed an increase of 1.5 percent in their pay each July 1. That increase was also funded and provided.

In addition, we do not classify faculty promotions as pay raises. Those are promotions that occur on merit for faculty members that come up for promotion in their cycle. As I mentioned at the Board meeting two months ago, those were funded as well. So I hope this clarifies exactly what the University policy is and what was included in the budget in terms of pay raises for University employees. And again, the statement that was made at the Board meeting two months ago -- that most University employees and faculty would not receive a pay raise -- is in fact correct.

The third item deals with an item that we identified in the budget as our first priority -- and that was the $1.5 million for course closings. Dr. Arnold has already reported on that. We feel that we have had some success in beginning to turn around the increasing number of course closings. We will keep you informed throughout fall and the rest of the year as to our progress on that.

Mr. Chairman, that concludes my report. I will be glad to answer any questions you or the Committee may have.

Mr. Shumate:

Thank you, Mr. Shkurti, are there any questions from the members of the Board?

--0--

WAIVERS OF COMPETITIVE BIDDING REQUIREMENTS
APRIL - JUNE 1992

Resolution No. 93-22

Synopsis: Acceptance of the quarterly report on waivers of competitive bidding requirements is proposed.
WHEREAS the Purchasing Policy of The Ohio State University, adopted by the Board of Trustees on September 7, 1984, and revised on February 7, 1992, provides that the President and/or the Vice President for Business and Administration may grant a waiver from competitive bidding in the event of an emergency, when a sufficient economic reason exists, or when the goods or services can be purchased from only a single source, with a report on such waivers to be made quarterly to this Board; and

WHEREAS the Vice President for Business and Administration has submitted a report on waivers of competitive bidding requirements granted for the period of April-June 1992:

NOW THEREFORE

BE IT RESOLVED, That the report on waivers of competitive bidding requirements for the period of April-June 1992, is hereby accepted.

Upon motion of Mr. Shumate, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix IV for background material, page 183.)

--0--

Ms. Pichette:

This resolution on the Cannon Drive Improvements Project will allow the University to move forward with the needed road improvements in the south part of our Columbus campus. There is background information and a map included in your materials.

Specifically, we are asking for authorization to proceed with the Cannon Road project and to complete the design work for two ramps connecting with St. Rt. 315. These ramps projects will be constructed by the state, but the University is funding the design work. Finally, the resolution will dedicate the improved portion of Cannon Drive to public access to meet a requirement of the state for its funding of the ramp projects.

I would note that it is not shown on the map, but the Cannon Drive project also includes the widening of four lanes of the Herrick Drive and the connection of the portion of the Olentangy River Road. I would be happy to answer any questions.

Mr. Kessler:

I understand we are financing the funds for the design, do we get that back or is that an expense for us?

Ms. Pichette:

Basically, most of that was out of House Bill 552, $750,000, which was done in previous years. There is a second ramp and we are funding another $150,000 internally, through Physical Facilities, because we feel this is very important.
September 2, 1992 meeting, Board of Trustees

Mr. Scott:

That we will probably not get back.

Ms. Pichette:

We would not.

CANNON DRIVE IMPROVEMENTS PROJECT,
STATE ROUTE 315 EXIT AND ENTRANCE RAMP PROJECTS, AND
DEDICATION OF A PORTION OF CANNON DRIVE TO PUBLIC ACCESS
Resolution No. 93-23

Synopsis: Reauthorization to request construction bids for the revised Cannon Drive Improvements project, authorization to expend funds for design services for the State Route 315 entrance ramp project, and dedication of a portion of Cannon Drive to access by the public are proposed.

WHEREAS to improve public access to and egress from The Ohio State University's Health Sciences Center, the University initiated planning with the City of Columbus and the Ohio Department of Transportation for a northbound exit ramp from the State Route 315 to Cannon Drive at Ninth Avenue and a southbound entrance ramp to State Route 315 from Cannon Drive at 12th Avenue; and

WHEREAS the Ohio Department of Transportation has approved these two ramp projects for State funding, subject to ensuring public access to Cannon Drive, with the University responsible for funding the design of both ramp projects and making needed improvements to Cannon Drive from King Avenue through the intersection of Herrick Drive; and

WHEREAS in July 1981 the Board of Trustees authorized the employment of Eriksson Engineering Limited to provide architectural/engineering design services for the State Route 315 exit ramp project and the Cannon Drive Improvements project from King Avenue to Herrick Drive, with funding of $750,000.00 provided from House Bill 552 (1980); and

WHEREAS the approval of the State Route 315 entrance ramp project will require approximately $150,000.00 in additional funds for design services, to be funded from the Department of Physical Facilities; and

WHEREAS in May 1991 the Board of Trustees authorized the request for construction bids for the Cannon Drive Improvements project, including the widening and straightening of the road to four lanes between King Avenue and Woody Hayes Drive, at a total project cost of $5,300,000 with funds to be provided from the University bond proceeds; and

WHEREAS with recent funding restrictions there is a need to limit the Cannon Drive Improvements project to only the work required in connection with the two State Route 315 ramp projects, for a total estimated project cost (excluding design) of $3,470,000.00 and a total estimated construction cost of $3,296,000.00, with funds to be provided from the University bond proceeds:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to request construction bids on the revised Cannon Drive Improvements project in accordance with established University procedures, and if satisfactory bids are received, to award contracts, with all actions to be reported to this Board at the appropriate time; and
CANNON DRIVE IMPROVEMENTS PROJECT,
STATE ROUTE 315 EXIT AND ENTRANCE RAMP PROJECTS, AND
DEDICATION OF A PORTION OF CANNON DRIVE TO PUBLIC ACCESS (contd)

BE IT FURTHER RESOLVED, That the President and/or Vice President for Business and
Administration be authorized to expend the additional funds necessary (approximately $150,000.00)
to complete the design work for the State Route 315 entrance ramp, with funds to be provided from
the Department of Physical Facilities; and

BE IT FURTHER RESOLVED, That the Board of Trustees hereby dedicates Cannon Drive being a
road owned by The Ohio State University, an instrumentality of the State of Ohio, from the
intersection of King Avenue through the intersection of Herrick Drive, as a roadway accessible to the
public, with such dedication involving no transfer or relinquishment of the University's jurisdiction or
rights with respect to the roadway.

Upon motion of Mr. Shumate, seconded by Mr. Kessler, the Board of Trustees adopted the
foregoing resolution by unanimous roll call vote.

(See Appendix V for map, page 185.)

--0--

REPORT OF AWARD OF CONTRACTS AND
ESTABLISHMENT OF CONTINGENCY FUNDS
Resolution No. 93-24

MCCracken POWER PLANT - REPLACEMENT OF STEAM LINES
1501 NEIL AVENUE RENOVATION - PHASE II
Graves HALL ASBESTOS ABATEMENT
DREESE LABORATORY ADDITION
VERNAL G. RIFFE JR. BUILDING (BIOSCIENCE/PARKS HALL ADDITION)

Synopsis: Acceptance of the report of award of contracts and the establishment of contingency
funds for the listed projects is recommended.

WHEREAS a resolution adopted by the Board of Trustees on September 7, 1990 authorized the
President and/or Vice President for Business and Administration to request construction bids in
accordance with established State of Ohio and University procedures, and if satisfactory bids were
received to award contracts for the McCracken Power Plant - Replacement of Steam Lines project;
and

WHEREAS resolutions adopted by the Board of Trustees on May 4, 1989, December 1, 1989, June
1, 1990, and October 3, 1991 authorized the President and/or Vice President for Business and
Administration to request construction bids in accordance with established University and State of
Ohio procedures, and if satisfactory bids were received to recommend the award of contracts for the
following projects: 1501 Neil Avenue Renovation - Phase II, Graves Hall Asbestos Abatement,
Dreese Laboratory Addition, and Vernal G. Riffe Jr. Building:

NOW THEREFORE

BE IT RESOLVED, That pursuant to the actions previously authorized by this Board, the report of
award of contracts and establishment of contingency funds for these projects is hereby approved.
REPORT OF AWARD OF CONTRACTS AND
ESTABLISHMENT OF CONTINGENCY FUNDS (contd)

MCCCRACKEN POWER PLANT - REPLACEMENT OF STEAM LINES
1501 NEIL AVENUE RENOVATION - PHASE II
GRAVES HALL ASBESTOS ABATEMENT
DREESE LABORATORY ADDITION
VERNAL G. RIFFE JR. BUILDING (BIOSCIENCE/PARKS HALL ADDITION) (contd)

Upon motion of Mr. Kessler, seconded by Mr. Shumate, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix VI for background material, page 187.)

--0--

Dr. Moser:

Mr. Chairman, Board of Trustees, I am quickly going to introduce you to Dr. Mohan Wali, who is the Director of the School of Natural Resources and will give justification for this action.

Dr. Wali:

Good afternoon, Mr. Chairman, Members of the Board, President Gee. This item pertains to properties that were gifted to the School of Natural Resources, The Ohio State University, in the early 70's in Hocking and Fairfield Counties. We have been using the properties for student education, for field trips, for getting our students trained in forestry, wildlife, and other such disciplines. The property started with two gifts totalling 1,164 acres and the University acquired another 144 acres.

Our problem in recent years has been that we are not able to afford to keep the properties. There are three or four items that are very important in the expenses related to the property. One, we have to have a full-time caretaker on the property, which costs us about $50,000. We have had problems of security there, so we constantly have to worry about the security of the property. The operation of the properties costs about $10,000 a year. Then we have a dam on the property, on what is known as Lake Romona, which is leaking. We have been cited a couple of times for that.

In looking at the entire package, we wanted to ask ourselves what can we do with the property. Obviously we could not sell it to anybody, because under the restrictions of the deed we had to use this property in perpetuity for education and research. So we started some negotiations with the Metroparks about two years ago and have been following those almost meticulously. The reason for our negotiations with the Metroparks is that they, too, are interested in conservation, wildlife management, and so on.

Two or three things have happened in the past two or three years, which I am sure you are aware of -- budget is one of them. The second thing is that the School of Natural Resources has increased its enrollment by about 20 percent over the last three years, both in the undergraduate and graduate student sections. Our scholarship funds have increased, but have not kept pace with the increase in enrollment. We discussed this in the family at Ohio State, particularly with the then Acting Vice President Jim Nichols. I kind of developed the attitude -- in a recalcitrant way of being a depression mentality kid -- and said that if we were able
September 2, 1992 meeting, Board of Trustees

to sell this property, we ought to set it aside as an endowment for student scholarships. That is exactly what we have done. The proposal before you pertains to that sale to the Metroparks. I will be very pleased to answer any questions you may have.

Mr. Shumate:

Are there any questions?

President Gee:

One point of clarification -- for some reason as I have gone through this briefing -- do we still have access to use this property as we want? It strikes me that that is one of the nice parts of this opportunity.

Dr. Wali:

My apologies, Mr. President, for ignoring that. We will have a memorandum of understanding with Metroparks that the students and faculty of Ohio State will have full access to the property to continue education and research on the properties.

President Gee:

The reason I make that point, and not to dwell on it, is that as the Board members remember, in July I told you that I'd ask Vice President Pichette and Judge Duncan to take a look at the physical assets of the University to determine what we had and what we were doing with those assets. At a time of constrained resources, we obviously have to look at opportunities in order to fill in budgetarily some of our problems -- in this instance scholarships. So of course, that was immediately translated into the golf course and the airport, but we have physical assets all over the State of Ohio, all over the United States, a variety of places -- and I know that Jim can fill you in further. I believe this is a good example of precisely the type of good management that we will continue to have.

SALE OF REAL PROPERTY

Resolution No. 93-25

BARNEBEY CENTER
FAIRFIELD AND HOCKING COUNTIES, OHIO

Synopsis: The sale of the Barnebey Center, approximately 1,278 acres located in Fairfield and Hocking Counties is recommended.

WHEREAS the Board of Trustees of The Ohio State University owns approximately 1,278 acres of real property located in Madison Township of Fairfield County and Good Hope Township of Hocking County and known as the Barnebey Center; and

WHEREAS the School of Natural Resources and College of Agriculture have determined that this property no longer can be operated economically in support of the educational and research programs of the School; and
SALE OF REAL PROPERTY (contd)

BARNEBEY CENTER
FAIRFIELD AND HOCKING COUNTIES, OHIO (contd)

WHEREAS the value of this property, based on the average of two appraisals, is $1,100,000.00, and the Columbus and Franklin County Metropolitan Park District has offered to purchase the property, including timber and mineral rights, for this amount; and

WHEREAS the net proceeds from the sale of this property shall be used to establish The Barnebey Family Scholarship Fund and The Annabelle Hoge Scholarship Fund to provide undergraduate and graduate scholarships for students in the School of Natural Resources; and

WHEREAS the appropriate University offices have determined that this sale is in the best interest of the University:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized, in the name of the Board of Trustees of The Ohio State University, to sell all of the University's right, title, and interest in this property, including all timber and mineral rights, to the Columbus and Franklin County Metropolitan Park District for no less than $1,100,000.00, upon such terms and conditions as are deemed to be in the best interest of the University, including the condition that the University shall retain, in perpetuity, the right to use the property and the adjoining Metropolitan Park District property for instruction and research upon the terms to be mutually agreed upon.

Upon motion of Mr. Shumate, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix VII for background material and map, page 203.)

--0--

Ms. Pichette:

This item, Mr. Chairman, represents a difficult but necessary decision as we continue to review our operations and look for ways to meet mandated budget reductions. We seek authorization to abolish the Division of Emergency Medical Services and Fire Prevention and the Department of Public Safety effective September 25, 1992. In addition to the resolution, you have a sheet explaining how the required functions being performed by the EMS division will be carried out and a summary of the savings that this action will provide. This recommendation has been reviewed through the budget hearing process and has been recommended by the Executive Committee. We have met with officials from the City of Columbus to facilitate a smooth transition as the Columbus Fire Department takes over the primary role of emergency medical service on campus. We are also working with other University departments to ensure that the essential services and functions required by law will be provided to the campus and to place affected employees. I will stress this action will not affect our ability to comply with required code provisions, and that we remain committed to essential safety services for the University.
September 2, 1992 meeting, Board of Trustees

Mr. Shumate:

Any questions or discussion?

Mr. Celeste:

I would just note that since it is such an important area -- the health and safety of the University -- that you do everything that you can to monitor the situation once the change is made, and report back to us to let us know the level of satisfaction we are receiving from the alternative on a regular basis.

Ms. Pichette:

I will do that.

ABOLISHMENT OF THE DIVISION OF EMERGENCY MEDICAL SERVICES AND FIRE PREVENTION

Resolution No. 93-26

Synopsis: The abolishment of the Division of Emergency Medical Services and Fire Prevention is proposed.

WHEREAS to achieve required reductions in its 1992-93 budget, the Office of Business and Administration has recommended the abolishment of the Division of Emergency Medical Services and Fire Prevention; and

WHEREAS this planned abolishment of the Division has been reviewed through the 1992-93 budget hearing process and has been reviewed and approved by the President's Executive Committee; and

WHEREAS the health and safety of all members of the University community are a critical concern of the University; and

WHEREAS the planned abolishment of the Division of Emergency Medical Services and Fire Prevention includes the coordinated reassignment of those duties to other agencies and University units, with University units undertaking these responsibilities within currently funded staffing levels and with additional training as appropriate:

NOW THEREFORE

BE IT RESOLVED, That the recommended abolishment of the Division of Emergency Medical Services and Fire Prevention is hereby approved, to be effective as of September 25, 1992.

Upon motion of Mr. Kessler, seconded by Mr. Shumate, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix VIII for background material, page 207.)

--0--

Mr. Nichols:

In your Board book under the Miscellaneous Tab are three resolutions and if I can, Mr. Chairman, I would like to cover them at the same time.
First of all, as many of you know, none of these occur without a substantial effort. There is a stack of legal documents approximately a foot high involved and I'd like to take a moment to introduce to you the folks who have worked on this most diligently on a day-to-day basis. First of all, someone whom all of you know and recognize, Al Rodack, Associate Treasurer. Next to him is Steve Messerly, Assistant Treasurer, who has the investments side and the bond side of the University. Next to Steve is Bill Matlock, who has, for a two-year period of time, handled all of our debt financing and debt relation issues. In addition to them, Rachael Davis worked on this and she left University employment for a better opportunity last Friday. So, Gentlemen, thank you. Also here is Bill Conner from the law firm Arter and Hadden who is our bond counsel, and I'll ask him in the end if he has any additional comments he would like to make.

I would like to take just a couple of minutes to bring you up-to-date, since we are talking in excess of a $200,000,000 on this particular project. The first resolution in your book pertains to the 1990 Bond Issue which, I think, could best be classified as a technical correction. In that resolution there was an ambiguity as to whether additional projects can be funded from the proceeds of that bond issue with just single projects completed, or whether every project has to be totally completed. This will allow additional funding of projects and some mixing of projects -- no additional money -- by changing the language to indicate that when individual projects are completed, then additional funds can be available for other uses by the University.

The second resolution involves up to $64 million of fixed rate bonds and, in addition to that, $115 million worth of refunding bonds for previous debts. I will talk about that in just a moment.

Finally, the third resolution involves $31 million of variable rate bonds, which we have used in the past. I would like to comment on that further. There is a handout that you have been given. If we can take just a moment to look at it, it will give you an overall idea of our debt structure. The pages are not numbered, but the first page shows you the savings from the $115 million of debt refunding. Basically what we are going to do is take the 1985, 1986 and 1990 fixed rate bond issues and refund them at lower interest rates. This will be a savings, for almost the next 20 years, of approximately $230,000 per year. Those are funds that will be available for other uses in the University.

On the second page you have a perspective over approximately a 12-year period of time where interest rates have been both fixed and variable and an indication of where we have issued debt in the past -- in 1985 at 7.6 percent, at 7.2 percent in 1986, and at just about 7 percent in 1990. The fixed rate issues and the refunding will be done in about three weeks. We would anticipate that the average interest rate we will be paying will be right about 5.75 percent over the 20-year period of time. You will also note the red line involves the variable rate issue. As you can see, we have paid on a variable rate as low as 2 percent in the last year. We would anticipate this will be issued in late October initially at somewhat just over 2 percent. That is on a weekly reset, which is the same as the existing variable rate.
Mr. Nichols: (contd)

I would tell you that the refunding will release $4.8 million of money, which can be used for additional construction projects, that is in the debt service reserve. We have not had an update on this for a couple of years, but we have now reached in excess of $11 million of interest savings on our variable rate debt, as opposed to fixed rate since 1985. So that is $11 million that the budget office does not have to come up with, and which can be used for other purposes besides debt service.

The second chart would indicate the total debt service payments that we are making in terms of millions of dollars. You can see this will take it to a maximum, in approximately the next five years, of about $30 million per year. This is the conservative estimate, it will likely be a little lower than that. It represents about 2.3, 2.4 percent of this year's annual operating revenue, well within appropriate targets. The following chart then shows our total debt that we have in the University, and how it decreases over time through a little over 20 years, with both the fixed and the variable component. We currently have about $173 million outstanding, and that will go up by $90 million pending your approval.

And then finally on the back side, as a comparison, is the specific coupon rates in the serial bonds that we had in 1985, 1986, and 1990, and then the estimates that we have here. We are in an exceptional interest rate environment to be able to issue bonds. The projects, for the most part, have previously been given to you, but they involve the projects at University Hospitals, Residence and Dining Halls, several research park and research related activities, Traffic and Parking, infrastructure issues, telephone, athletic, and general revenue funds. Approximately 85 percent of all of these debt service payments will be made from revenue producing units within the University. The other 15 percent will come from the general revenue funds of the University, which you have previously approved as part of the budget in the last meeting.

Ms. Casto:

Jim, excuse me, at that time after it goes back into the general funds -- it has already been expended because we approved it a long time ago, and some of them are completed -- then what happens to the money?

Mr. Nichols:

There are a couple of the projects that have been completed, but those have been funded out of temporary -- the equivalent of a bridge loan, and that is what will be repaid. The bridge loans generally come from the internal funding of the University. Maybe I misunderstood the question.

Ms. Casto:

When we pass a project, it will say, for instance, that it is funded by University funds. It does not say from the bond sales, it will say sometimes from the University funds. And then you are reimbursing the funds?

Mr. Nichols:

That is correct.
Ms. Casto:

I guess what I am saying is that if the funds are put back in there, what are they going to be used for after that?

Mr. Nichols:

Well all of the funds that are in the investment pool of the University -- the operating investment pool -- already have claims on them. What we are doing is borrowing money out of that fund to be used temporarily for construction projects and then that is paid back. So they are, for the most part, auxiliary operations, hospitals money, traffic and parking money, athletic money, research funds.

Ms. Casto:

Like for instance the Honors House?

Mr. Nichols:

The Honors House will -- again the temporary loan came out of that particular fund and it will be paid back into that fund. The debt service for paying off the portion of the bonds to be used for Honors House will come from the general revenue funds of the University, and that was part of the budget passed at the last meeting.

Ms. Casto:

Does everyone else get that? Does anyone have any questions on that?

Mr. Shumate:

Perhaps the two of you can talk later on this.

Mr. Nichols:

Let me make a couple more comments, Mr. Chairman. The underwriters for the fixed portion of the issue are John Nuveen and The Ohio Company, the co-managers are Huntington Bank; McDonald and Company; Pryor, McClendon, and Counts; and Prudential Securities, Inc. The variable rate issue will be co-lead managers of Lehman Brothers and WR Lazard Company. Trustee, as it has been for some time, is the Huntington Trust Company. The Bond Counsel is Arter and Hadden, appointed by the Attorney General's office. Thompson, Hine, and Flory is underwriter's counsel -- a lot of attorneys involved. Porter, Wright, Morris & Arthur is the Trustees' Counsel and University's Counsel in this is, of course, the Attorney General.

We have not yet been issued a rating for these bonds -- we may get that as early as this afternoon. We anticipate that our existing ratings of double A minus on the fixed by Standard and Poor's, and A plus by Moody's will remain, and the ratings on the variable rate portion on the bonds, which is Moody's, is A1 plus. And what they call Mid-One for Standard and Poor, which are the two highest ratings, will remain there as well.
September 2, 1992 meeting, Board of Trustees

Mr. Nichols: (contd) I think I would add maybe two more comments. As those members who have been here for a few years know, it has been our policy to constantly push the envelope in terms of flexibility for the University in our debt issues. In 1985 we redid the entire debt structure and put a new indenture in place, and the fifth and sixth variations of that are in your particular book. In the 1990 issue, we eliminated a debt service reserve, so we don't do those any more. And with the variable rate issue this time, we are going to eliminate, we hope, a requirement for a liquidity facility, which is basically a contractual agreement with the bank that they will provide the liquidity if no one is willing to buy our variable rate bonds. We are going to use the University's internal assets to back that up. Although not sounding very minor as a savings, it will be somewhere in the range of about $40,000 to $45,000 a year to the University, and will be available for other purposes.

The three resolutions that I mentioned to you, and the fifth and sixth indenture information are in the book. There is also additional information on file at the Board office of some substance that will be involved. We will mail to you the preliminary official statement which will be printed; pending approval, tonight and will be available.

Comment from Bond Counsel?

Mr. Bill Conner: I have nothing to add, but will try to answer any questions that you may have.

Mr. Nichols: And I'll answer any questions if there are, Mr. Chairman.

Mr. Shumate: Are there any questions? This might be a topic that would be appropriate to give more of an overview on in a subsequent Fiscal Affairs Committee meeting in order to address some of the underlying questions.

Mr. Nichols: I'd be glad to do that.

AMENDMENT TO RESOLUTION NO. 90-106

WHEREAS this Board of Trustees (the "Board") of The Ohio State University (the "University") has previously adopted Resolution No. 90-106 on April 6, 1990 (the "Series 1990 Bond Resolution") which, among other things, authorized the issuance of the University's General Receipts Bonds, Series 1990 Bonds (the "Series 1990 Bonds"); and

WHEREAS the Series 1990 Bond Resolution created the 1990 Construction Fund to be maintained by the Trustee (as defined in the Series 1990 Bond Resolution) and to be funded with Sale Proceeds (as defined in the Series 1990 Bond Resolution); and
AMENDMENT TO RESOLUTION NO. 90-106 (contd)

WHEREAS the Series 1990 Bond Resolution permits the use of moneys on deposit in the 1990 Construction Fund to pay the costs and expenses relating to the 1990 Project (as defined in the Series 1990 Bond Resolution) and Additional Projects (as defined in the Series 1990 Bond Resolution); and

WHEREAS Additional Projects may be undertaken at the direction of the University after the receipt by the Trustee of a certificate of completion and after payment or provision for payment in full of costs and expenses relating to the 1990 Project; and

WHEREAS the definition of 1990 Project is ambiguous with respect to whether the University may consider the components constituting the 1990 Project separately in determining when completion of such portions of the 1990 Project has occurred; and

WHEREAS Section 10 of the Series 1990 Bond Resolution authorizes changes to the text of the Series 1990 Resolution for the purpose of curing any ambiguity in the Series 1990 Bond Resolution or in respect of the Series 1990 Bond Resolution as it relates to the Indenture, the Fourth Supplemental Indenture, the Certificate of Award, the Form of Bond, the Contract of Purchase or the Official Statement (all as defined in the Series 1990 Bond Resolution); and

WHEREAS the Treasurer of the University has approved the changes proposed in this Resolution as being not substantially adverse to the University and not contrary to the true intent and meaning of the Series 1990 Bond Resolution and such changes are acceptable to Arter & Hadden, the University's Bond Counsel (as defined in the Series 1990 Bond Resolution);

NOW THEREFORE BE IT RESOLVED BY THE BOARD OF TRUSTEES OF THE OHIO STATE UNIVERSITY as follows:

Section 1. Definitions. All terms used herein with initial capitalization when the rules of grammar would not so require shall have the meanings given them in the Series 1990 Resolution unless another meaning is expressly provided.

Section 2. Changes to Series 1990 Bond Resolution. The second paragraph of Section 5 of the Series 1990 Bond Resolution is hereby amended to read as follows:

Monies, allocable to completed Components as described below, remaining in the 1990 Construction Fund (including investment earnings thereon which have not been used to pay Bond Service Charges, as described in the preceding paragraph) after receipt by the Trustee of a certificate of completion (as described in Section 9 of the Series 1985A Bond Resolution) with respect to any of the items listed in the definition of 1990 Project in Section 1 hereof (the "Components") and after payment or provision for payment in full of costs and expenses relating to each Component for which the certificate of completion is given, as well as those Components for which a certificate of completion has not yet been presented, shall, at the direction of the University, be applied by the Trustee to fund the costs of other Components or additional projects constituting University Facilities (the "Additional Projects").

Section 3. No Other Amendment. No changes, amendments or modifications to the Series 1990 Bond Resolution are to be implied by this Resolution and only the changes expressly set forth in this Resolution shall have any force or effect.
AMENDMENT TO RESOLUTION NO. 90-106 (contd)

Section 4. Effective Date. This Resolution shall be in full force and effect from the date of its adoption.

Upon motion of Mr. Shumate, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

AUTHORIZATION, ISSUANCE AND SALE OF GENERAL RECEIPTS BONDS,
SERIES 1992 A, OF THE OHIO STATE UNIVERSITY
Resolution No. 93-28

Synopsis: The Fiscal Affairs Committee recommended (A) the authorization, issuance, sale and delivery of General Receipts Bonds, Series 1992 A1 (the "Series 1992 A1 Bonds"), in a principal amount determined as provided herein, for the purposes of paying or reimbursing a portion of the costs of (i) the acquisition, construction, remodeling, improvement, installation, renovation and installation of facilities for use by University Hospitals, including a surgical intensive care unit, a neuropsychiatric facility, women and infant facilities, magnetic resonance imaging unit, elevator improvements, emergency department alterations and emergency power system improvements; (ii) the repair, improvement, remodeling, renovation and rehabilitation of University Residence and Dining Hall facilities; (iii) the acquisition, construction, installation and equipping of additional clinical medical research facilities located adjacent to Wiseman Hall; (iv) the acquisition, construction, installation and equipping of a plant growth research facility at Rightmire Hall; (v) the improvement of Cannon Drive; (vi) the renovation and remodeling of Rightmire Hall to provide laboratories for the University Biotechnology Program; (vii) the enlargement of the 12th Avenue Parking Garage and the construction thereon of Botany and Zoology facilities; (viii) the renovation of facilities at the Lab Animal Center for use in primate research; (ix) the remodeling and renovation of Bevis Hall to house a Transgenic Animal Facility to support biotechnology research; (x) the maintenance, improvement and repair of utilities, including central controls, a water purification system and storm and sanitary sewers; (xi) the acquisition and renovation of a facility for the construction of astronomical instruments; (xii) the renovation of Scott Hall to house the Byrd Polar Research Center and portions of the Geological Sciences; (xiii) the acquisition of land and a building located at 1275 Kinnear Road; (xiv) the acquisition of land for use by the Molly Caren Agricultural Center; (xv) the acquisition and installation of digital switching telecommunications equipment; (xvi) the renovation and remodeling of facilities to provide facilities for use in connection with the Honor's Program; (xvii) the development of intramural fields and acquisition and installation of additional bleachers for Ohio Stadium by the Department of Athletics; and (xviii) the renovation of a building located at 1000 Kinnear Road; (collectively, the "1992 Project"); paying costs and expenses associated with the issuance of the Series 1992 A Bonds; (B) the authorization, issuance, sale and delivery of General Receipts Refunding Bonds, Series 1992 A2 (the "Series 1992 A2 Bonds") in the principal amount determined as provided herein, for the purposes of refunding certain Prior Bonds (as defined herein) (the Series 1992 A1 Bonds and the Series 1992 A2 Bonds being sometimes collectively referred to herein as the "Series 1992 A Bonds") authorizing a Fifth Supplemental Trust Indenture to secure the payment of Bond Service Charges on the Series 1992 A Bonds; and for related purposes.

WHEREAS pursuant to Sections 3345.11 and 3345.12 of the Ohio Revised Code (the "Act"), as enacted under authority of the Constitution of Ohio, particularly Section 2i of Article VIII thereof, The Ohio State University (the "University"), a state university of the State of Ohio (the "State") created and existing under Chapter 3335 of the Ohio Revised Code, is authorized and empowered, among other things, (a) to issue, as provided herein, Bonds (as defined in the Original Indenture (as hereinafter defined)) of the University to pay the costs of certain capital facilities defined as "auxiliary facilities" in the Act (and herein called "University Facilities") and to refund, fund or retire bonds and
other obligations previously issued for such purpose; (b) to pledge to the payment of the Bonds all or a specified part of the gross amount of the General Receipts of the University (as defined in the Original Indenture) in priority to all other expenses, claims or payments; (c) to covenant, as herein provided, that the University will make, fix, adjust and collect the fees, rates, rentals, charges and other items comprising General Receipts to produce General Receipts sufficient at all times to meet Bond Service Charges (as defined in the Original Indenture) on the Bonds, to establish and to maintain the required reserves and meet other requirements herein provided; and (d) to provide for a trust indenture and to make further provisions for securing the payment of the Bond Service Charges; and

WHEREAS the University, by resolution adopted by its Board of Trustees (the "Board") on November 1, 1985 (the "Series 1985 A Bond Resolution") and by a Trust Indenture (the "Original Indenture"), dated as of November 15, 1985, between the University and The Huntington National Bank, as Trustee (the "Trustee"), has provided for the issuance from time to time of General Receipts Bonds of the University, with each such issue to be authorized by a Series Resolution (as defined in the Original Indenture) adopted by the Board pursuant thereto and secured pursuant to the terms of a Supplemental Indenture (as defined in the Original Indenture) with respect to such issue (the Original Indenture and all Supplemental Indentures being referred to collectively herein as the "Indenture"); and

WHEREAS the University has heretofore issued pursuant to the Series 1985 A Bond Resolution and the Original Indenture, the $27,680,000 The Ohio State University General Receipts Refunding Bonds, Series 1985 A, dated as of November 15, 1985 (the "Series 1985 A Bonds") ($16,530,000 principal amount outstanding as of September 1, 1992); and

WHEREAS the University has heretofore issued pursuant to the Series 1985 A Bond Resolution, the resolution, adopted by the Board on December 6, 1985 (the "Series 1985 B Bond Resolution"), the Original Indenture and the First Supplemental Trust Indenture, dated as of December 30, 1985 (the "First Supplemental Indenture"), between the University and the Trustee, as amended by the Amendment Agreement, dated as of December 1, 1986, between the University and the Trustee, as further amended by the First Supplemental Trust Indenture Amendment Agreement, dated as of March 1, 1988, between the University and the Trustee, the $42,500,000 The Ohio State University Variable Rate Demand General Receipts Bonds, Series 1985 B, initially dated as of December 30, 1985 (the "Series 1985 B Bonds") ($21,900,000 principal amount outstanding as of September 1, 1992); and

WHEREAS the University has heretofore issued pursuant to a resolution adopted by the Board on July 11, 1986 (the "Series 1986 A Bond Resolution"), the Series 1985 A Bond Resolution, the Original Indenture and the Second Supplemental Trust Indenture, dated as of July 15, 1986 (the "Second Supplemental Indenture"), between the University and the Trustee, the $45,000,000 The Ohio State University General Receipts Bonds, Series 1986 A, dated as of July 15, 1986 (the "Series 1986 A Bonds") ($34,755,000 principal amount outstanding as of September 1, 1992); and

WHEREAS the University has heretofore issued pursuant to a resolution adopted by the Board on July 11, 1986 (the "Series 1986 B Bond Resolution"), the Series 1985 A Bond Resolution, the Original Indenture and the Amended Third Supplemental Trust Indenture, dated as of August 1, 1986 (the "Third Supplemental Indenture"), between the University and the Trustee, the $45,000,000 The Ohio State University Variable Rate Demand General Receipts Bonds, Series 1986 B, initially dated as of August 14, 1986 (the "Series 1986 B Bonds") ($40,900,000 principal amount outstanding as of September 1, 1992); and
WHEREAS the University has heretofore issued pursuant to a resolution adopted by the Board on April 6, 1990 (the "Series 1990 Bond Resolution"), the Series 1985 A Bond Resolution, the Original Indenture and the Fourth Supplemental Trust Indenture, dated as of April 1, 1990 (the "Fourth Supplemental Indenture"), between the University and the Trustee, the $54,265,000 The Ohio State University General Receipts Bonds, Series 1990, dated as of April 1, 1990 (the "Series 1990 Bonds") ($49,945,000 principal amount outstanding as of September 1, 1992); and

WHEREAS the Board has determined that it is in the best interests of the University to authorize the issuance of The Ohio State University General Receipts Bonds, Series 1992 A1, (the "Series 1992 A1 Bonds") in a principal amount not to exceed $64,000,000, for the purpose of paying a portion of the costs of the 1992 Project (as defined herein) and paying costs and expenses associated with the issuance of the Series 1992 A Bonds; and

WHEREAS the Board has determined that it is in the best interests of the University to authorize the issuance of The Ohio State University General Receipts Refunding Bonds, Series 1992 A2 (the "Series 1992 A2 Bonds"), in a principal amount not to exceed $115,000,000, for the purpose of refunding the Series 1985 A Bonds maturing on or after December 1, 1996, the Series 1986 A Bonds and the Series 1990 Bonds (collectively, the "Prior Bonds"); and

WHEREAS the University desires to make provision for the issuance of the Series 1992 A Bonds and for the payment of the Bond Service Charges (as defined in the Indenture) thereon, to secure the Series 1992 A Bonds by this Resolution and a Fifth Supplemental Trust Indenture, dated as of September 1, 1992 (the "Fifth Supplemental Indenture") herein authorized and to adopt this Resolution pursuant to the Original Indenture and the Series 1985 A Bond Resolution:

NOW THEREFORE

BE IT RESOLVED BY THE BOARD OF TRUSTEES OF THE OHIO STATE UNIVERSITY as follows:

Section 1. Definitions and Interpretations. All words and terms defined in the Indenture and all interpretations therein provided shall have in this Resolution the same meanings, respectively, and be subject to the same interpretations as therein provided or used, unless the context or use clearly indicates another or different meaning or intent. Terms not appearing in the Original Indenture but used herein and not previously defined herein are defined as follows:

"Bond proceedings" means the Series 1985 A Bond Resolution, the Original Indenture, any applicable Series Resolution, any applicable Supplemental Indenture, any applicable Certificate of Award and any other resolutions and agreements and amendments of and supplements to the foregoing, or any combination thereof, authorizing or providing for the terms and conditions applicable to, or providing for the security or sale of Bonds, and the terms contained in such Bonds.

"Book Entry System" means a system under which (i) a physical Series 1992 A Bond certificate in fully registered form is issued for each maturity of Series 1992 A Bonds only to a Depository or its nominee as registered owner, with the Series 1992 A Bonds held by and immobilized in the custody of the Depository; and (ii) a book entry record, maintained by and the responsibility of the Depository and not maintained by or the responsibility of the University or the Trustee, is the record that identifies, and records the transfer of the interests of, the owners of book entry interests in such Series 1992 A Bonds.

"Certificate of Award" means the Certificate of Award authorized pursuant to Section 3 of this Resolution.
"Code" means the Internal Revenue Code of 1986, as amended, the Treasury Regulations (whether proposed, temporary or final) under that Code or the statutory predecessor of that Code, and any amendments of, or successor provisions to, the foregoing and any official rulings, announcements, notices, procedures and judicial determinations regarding any of the foregoing, all as and to the extent applicable. Unless otherwise indicated, reference to a Section of the Code means that Section, including any applicable successor section or provision and such applicable Treasury Regulations, rulings, announcements, notices, procedures and determinations pertinent to that Section.

"Contract of Purchase" means the Contract of Purchase between the Original Purchasers and the University, authorized pursuant to Section 3 hereof.

"Depository" means any securities depository that is a clearing agency under federal law operating and maintaining, with its participants or otherwise, a Book Entry System to record ownership of book entry interests in obligations, and includes and means initially as to the Series 1992 A Bonds, The Depository Trust Company (a limited purpose trust company), New York, New York.

"Mandatory sinking fund requirements" means amounts required by this Resolution to be deposited into the Bond Fund in any year for the purpose of retiring principal maturities of the Series 1992 A Bonds which by the terms of such Bonds are due and payable, if not called for prior redemption, in any subsequent fiscal year of the University.

"1992 Escrow Subaccount" means the 1992 Escrow Subaccount of the Special Bond Service Account, which subaccount is created in Section 7 hereof and held by the Trustee pursuant to the Fifth Supplemental Indenture.

"Official Statement" means, as to the Series 1992 A Bonds, the Official Statement including, without limitation, the Preliminary Official Statement, relating to the original issuance of the Series 1992 A Bonds, authorized pursuant to Section 3 hereof.

"Paying Agent" means the Trustee.

"1992 Project" means, collectively, (i) the acquisition, construction, remodeling, improvement, installation, renovation and installation of facilities for use by University Hospitals, including a surgical intensive care unit, a neuropsychiatric facility, women and infant facilities, magnetic resonance imaging unit, elevator improvements, emergency department alterations and emergency power system improvements; (ii) the repair, improvement, remodeling, renovation and rehabilitation of University Residence and Dining Hall facilities; (iii) the acquisition, construction, installation and equipping of additional clinical medical research facilities located adjacent to Wiseman Hall; (iv) the acquisition, construction, installation and equipping of a plant growth research facility at Rightmire Hall; (v) the improvement of Cannon Drive; (vi) the renovation and remodeling of Rightmire Hall to provide laboratories for the University Biotechnology Program; (vii) the enlargement of the 12th Avenue Parking Garage and the construction thereon of Botany and Zoology facilities; (viii) the renovation of facilities at the Lab Animal Center for use in primate research; (ix) the remodeling and renovation of Bevis Hall to house a Transgenic Animal Facility to support biotechnology research; (x) the maintenance, improvement and repair of utilities, including

SERIES 1992 A, OF THE OHIO STATE UNIVERSITY (contd)

central controls, a water purification system and storm and sanitary sewers; (xi) the acquisition and renovation of a facility for the construction of astronomical instruments; (xii) the renovation of Scott Hall to house the Byrd Polar Research Center and portions of the Geological Sciences; (xiii) the acquisition of land and a building located at 1275 Kinnear Road; (xiv) the acquisition of land for use by the Molly Caren Agricultural Center; (xv) the acquisition and installation of digital switching telecommunications equipment; (xvi) the renovation and remodeling of facilities to provide facilities for use in connection with the Honor's Program; (xvii) the development of intramural fields and acquisition and installation of additional bleachers for Ohio Stadium by the Department of Athletics; and (xviii) the renovation of a building located at 1000 Kinnear Road, each of (i) through (xviii) constituting a Component (as defined in Section 5 of this Resolution) and a University Facility.

"1992 Project Fund" means the 1992 Project Fund held by the University and created in Section 5 hereof to be funded in part with the proceeds of the Series 1992 A1 Bonds.

"Series 1992 A Bond Resolution" or "this Resolution" as used herein, means this Resolution and the Certificate of Award, as the same may be amended from time to time.

"Trustee" means The Huntington National Bank, Columbus, Ohio, and any successor Trustee as determined or designated under or pursuant to the Original Indenture.

Any reference herein to the University, the Board, or to any members or officers thereof or to other public boards, commissions, departments, institutions, agencies, bodies, entities or officers, shall include those which succeed to their functions, duties or responsibilities pursuant to or by operation of law or who are lawfully performing their functions. Any reference to a section or provision of the Ohio Revised Code or to the laws of Ohio shall include such section or provision and such laws as from time to time amended, modified, revised, supplemented, or superseded, provided that no such amendment, modification, revision, supplementation, or supersession shall alter the obligation to pay the Bond Service Charges in the amount and manner, at the times, and from the sources provided in this Resolution, the Original Indenture and the Fifth Supplemental Indenture, except as otherwise herein permitted.

Unless the context shall otherwise indicate, words importing the singular number shall include the plural number, and vice versa, and the terms "hereof," "herein," "hereby," "hereto," "hereunder," and similar terms, mean this Resolution.

Section 2. Authorization; Terms; Pledge; and Covenant.

(a) Authorization. The Series 1992 A Bonds shall consist of two separate series and shall be designated and known respectively as "The Ohio State University General Receipts Bonds, Series 1992 A1" and "The Ohio State University General Receipts Refunding Bonds, Series 1992 A2" and shall be issued pursuant to and as authorized by the Act, Section 2i of Article VIII of the Ohio Constitution, the Series 1985 A Bond Resolution, this Resolution, the Original Indenture and the Fifth Supplemental Indenture. The Series 1992 A1 Bonds shall be issued for the purposes of financing a portion of the costs of the University Facilities comprising the 1992 Project and paying costs and expenses incidental to the issuance of the Series 1992 A Bonds and the Series 1992 A2 Bonds shall be issued for the purpose of refunding the Prior Bonds.

(b) Form and Numbering. The Series 1992 A Bonds shall be issued only as fully registered bonds. The Series 1992 A Bonds shall be numbered as determined by the Trustee which will distinguish each Series 1992 A Bond from each other Series 1992 A Bond and shall further distinguish the Series 1992 A1 Bonds from the Series 1992 A2 Bonds.
AUTHORIZATION, ISSUANCE AND SALE OF GENERAL RECEIPTS BONDS,
SERIES 1992 A, OF THE OHIO STATE UNIVERSITY (contd)

(c) Denominations and Dates. The Series 1992 A Bonds shall be issuable in
denominations of $5,000 and integral multiples thereof and shall be dated as of September 1, 1992.

(d) Principal Amount. The Series 1992 A Bonds shall be issued in the principal amount
specified in the Certificate of Award, which amount shall not exceed $179,000,000.

(e) Delivery and Execution. The Treasurer is hereby authorized to make the necessary
arrangements with the Original Purchasers to establish the date, location, procedures and
conditions for the delivery of the Series 1992 A Bonds to the Original Purchasers and to take all
steps as necessary to effect due execution, authentication, sale and delivery of the Series 1992 A
Bonds to the Original Purchasers under the terms of this Resolution. The Series 1992 A Bonds
shall be signed by the Chairman of the Board (the "Chairman") and the Treasurer in their official
capacities (provided that both of the signatures may be facsimiles) and shall bear the corporate seal
of the University or a facsimile thereof.

(f) Interest and Maturities.

(i) The Series 1992 A Bonds shall bear interest on the unpaid principal amount thereof
from the most recent date to which interest has been paid or duly provided for or, if no interest has
been paid or provided for, from their date, with interest, payable semi-annually on each June 1 and
December 1 (the "Interest Payment Dates"), commencing December 1, 1992, at the percentage
rate or rates per annum set forth in the Certificate of Award. Interest shall be calculated on the
basis of a 360-day year consisting of twelve 30-day months. Such rate or rates shall in no event
produce an average interest rate for the Series 1992 A Bonds in excess of eight percent (8.00%)
per annum.

(ii) The Series 1992 A Bonds shall mature not later than September 1, 2017 and in
such annual amount or amounts as are provided for in the Certificate of Award.

(iii) Any mandatory redemption of Series 1992 A Bonds of certain maturities prior to
maturity pursuant to any mandatory sinking fund requirements shall be as provided in the Certificate
of Award. Notice of call for mandatory sinking fund redemption of the Series 1992 A Bonds shall be
given in the manner provided in the Indenture.

(iv) Certain maturities of the Series 1992 A Bonds, if so provided for in the Certificate of
Award, shall be subject to optional redemption at the option of the University prior to stated maturity,
in whole or in part, but if in part, only in installments of $5,000 principal amount of such Series 1992
A Bond or integral multiples thereof, in accordance with the terms, conditions, redemption prices
and on the dates set forth in the Certificate of Award. Notice of call for and other terms and
provisions governing redemption of the Series 1992 A Bonds shall be given in the manner provided
in the Indenture. At no time shall the redemption price on any Series 1992 A Bonds, exclusive of
accrued interest, exceed one hundred and two percent (102%) of the principal amount of such Bond
to be redeemed.

(g) Security. As provided in the Indenture as supplemented by the Fifth Supplemental
Indenture, there is hereby pledged to the security of the Series 1992 A Bonds and for the payment
of the Bond Service Charges on the Series 1992 A Bonds, (i) the gross amount of General Receipts
of the University (subject to the provisions for the partial release of a pledge of General Receipts
contained in Section 4.11 of the Original Indenture) and (ii) the monies contained in the Special
Funds, but excluding the Bond Reserve Fund. Anything else to the contrary in the Indenture, the
Series 1985 A Bond Resolution, the Fifth Supplemental Indenture or this Resolution notwith-
standing, the Series 1992 A Bonds shall not have access to, any claim upon or be secured by the
Bond Reserve Fund or the 1992 Project Fund.
The pledge of General Receipts in the immediately preceding paragraph shall be on a parity with expenses, claims and payments relating to other Parity Obligations and in priority to all other expenses, claims and payments of the University. In accordance with the Act, all General Receipts or portions thereof are immediately subject to the lien of the pledge upon receipt thereof by the University.

For the further security of the Series 1992 A Bonds, and any Additional Bonds (as defined in the Original Indenture), the University hereby covenants with the bondholders and the Trustee that so long as any Series 1992 A Bonds or Additional Bonds are outstanding, the University shall fix, make, adjust and collect fees, rates, rentals, charges, and other items of General Receipts, as will produce at all times General Receipts sufficient (i) to pay Bond Service Charges when due, (ii) together with other monies lawfully available therefor, to pay all costs and expenses required to be paid under the Bond proceedings, and (iii) together with other monies lawfully available therefor, to pay all other costs and expenses necessary for the proper maintenance and successful and continuous operation of the University.

(h) Payment, Places of Payment and Paying Agents. The principal of and any redemption premium on any Series 1992 A Bond when due shall be payable to the registered holder upon presentation and surrender thereof at the principal corporate trust office of the Trustee. Interest on Series 1992 A Bonds shall be payable by check or draft mailed by the Trustee as provided in the Original Indenture; provided, however, that interest on Series 1992 A Bonds aggregating $1,000,000 or more in principal amount registered in the name of a single holder shall be paid by wire transfer in immediately available funds to such account, if any, as such holder directs in writing to the Trustee at least ten (10) days prior to any Interest Payment Date, such payment by wire transfer pursuant to that direction continuing in effect as to subsequent Interest Payment Dates until such time as the holder notifies the Trustee to the contrary or until such time as such holder ceases to be a holder of the requisite principal amount of Series 1992 A Bonds.

(i) Book Entry. Subject to the provisions of the immediately following paragraph, the Series 1992 A Bonds shall be issued only to a Depository for holding in a Book Entry System. Those Series 1992 A Bonds shall be registered in the name of the Depository or its nominee, as registered owner, and immobilized in the custody of the Depository; and shall not be transferable or exchangeable, except for transfer to another Depository or to another nominee of a Depository, without further action by the University. Each maturity of the Series 1992 A1 Bonds and the Series 1992 A2 Bonds shall each be evidenced by a single certificate in the aggregate principal amount of the respective Series 1992 A1 Bonds and the Series 1992 A2 Bonds maturing on each such maturity date.

If any Depository determines not to continue to act as a Depository for the Series 1992 A Bonds for holding in a Book Entry System, the University may attempt to have established a securities depository/Book Entry System relationship with another qualified Depository. If the University does not or is unable to do so, the University, after making provision for notification of the owners of book entry interests by appropriate notice to the then Depository and any other arrangements it deems necessary, shall permit the withdrawal of the Series 1992 A Bonds from the Depository, and authenticate and deliver the Series 1992 A Bond certificates, in fully registered form to the assigns of the Depository or its nominee (if such Bond was held by a nominee), all at the cost and expense (including costs of printing or otherwise preparing and delivering replacement Series 1992 A Bonds) of the Bondholders. Series 1992 A Bond certificates authenticated and delivered pursuant to this paragraph shall be in the denomination of $5,000 or any integral multiple thereof.
AUTHORIZATION, ISSUANCE AND SALE OF GENERAL RECEIPTS BONDS, SERIES 1992 A, OF THE OHIO STATE UNIVERSITY (contd)

Section 3. Contract of Purchase; Certificate of Award; Official Statement. The Series 1992 A Bonds are sold and awarded to the Original Purchasers in accordance with the Contract of Purchase at the purchase price provided in the Certificate of Award. The form of Contract of Purchase now on file with the Secretary of the Board is hereby approved, together with any changes therein and completions thereof which are not inconsistent with this Resolution and not substantially adverse to the University, and as are permitted by the Act and approved on behalf of the University by the Chairman or the Treasurer. The approval on behalf of the University of those changes and completions by the Chairman or the Treasurer, and the status of those changes as not substantially adverse to the University, shall be conclusively evidenced by the execution of the Contract of Purchase on behalf of the University by the Chairman or the Treasurer. It is determined hereby that the purchase price and the manner of sale and the terms of the Series 1992 A Bonds, as provided in this Resolution and the Contract of Purchase are consistent with all legal requirements and will carry out the public purposes of the Act.

The sale and award of the Series 1992 A Bonds shall be further evidenced by the Certificate of Award. The Certificate of Award is hereby authorized and shall be executed by the Chairman or the Treasurer. The Certificate of Award shall state or confirm the aggregate principal amount of the Series 1992 A Bonds, the purchase price of such Bonds, the interest rate or rates with respect to each maturity of such Bonds, the annual principal amount or amounts of such Bonds becoming due, the maturity dates, any mandatory sinking fund requirements and the optional redemption provisions, all as determined in accordance with the provisions of this Resolution and the Contract of Purchase, and all of which shall be conclusively evidenced by the execution of the Certificate of Award. The Certificate of Award shall also contain such other dates or provisions as the Chairman or the Treasurer determines are appropriate or necessary, and as are consistent with this Resolution, the Indenture, the Fifth Supplemental Indenture and the Contract of Purchase.

The use and distribution of the Preliminary Official Statement and the Official Statement relating to the Series 1992 A Bonds by the Original Purchasers is hereby approved and authorized. The Preliminary Official Statement is deemed final by the University for purposes of Securities Exchange Commission Rule 15c2-12 except for such omissions therefrom as may be permitted by such Rule. The Official Statement, substantially in the form of the Preliminary Official Statement now on file with the Secretary of the Board, shall be executed by the Chairman or the Treasurer in his official capacity on behalf of the University with any modifications, changes and supplements necessary or desirable for the purposes thereof which the Chairman or the Treasurer shall approve. The Board has not confirmed, and assumes no responsibility for, the accuracy, sufficiency or fairness of the statements in the Preliminary Official Statement or the final Official Statement under the caption "UNDERWRITING."

Section 4. Allocation of Proceeds. The proceeds from the sale of the Series 1992 A Bonds, including any accrued interest, shall be allocated, deposited and applied as follows:

(i) To the Bond Fund, accrued interest received on the sale of the Series 1992 A Bonds;

(ii) To the 1992 Project Fund, created pursuant to Section 5 of this Resolution, the entire remaining amount of the proceeds of the Series 1992 A1 Bonds, to be applied to the purposes of that Fund, including transfers from that Fund authorized by the Act and to pay costs and expenses associated with the issuance of the Series 1992 A Bonds; and
AUTHORIZATION, ISSUANCE AND SALE OF GENERAL RECEIPTS BONDS, SERIES 1992 A, OF THE OHIO STATE UNIVERSITY (contd)

(iii) To the Trustee, the entire remaining amount of the proceeds of the Series 1992 A2 Bonds, for deposit into the 1992 Escrow Subaccount pursuant to the Fifth Supplemental Indenture.

Section 5. 1992 Project Fund. There is hereby created by the University a fund to be maintained in the custody of the Treasurer and designated the "1992 Project Fund." The 1992 Project Fund shall be funded in part from the proceeds of the sale of the Series 1992 A1 Bonds. Such proceeds shall be used for the payment or reimbursement of a portion of the costs and expenses relating to the 1992 Project, and costs and expenses associated with the issuance of the Series 1992 A Bonds. The 1992 Project Fund shall not constitute a Special Fund and shall not be pledged to the payment of Bond Service Charges.

Moneys held in the 1992 Project Fund, including all investment earnings thereon, pending disbursement from the 1992 Project Fund shall be invested in Authorized Investments specified in Section VIII of the Non-Endowment Investments Policy of the University attached hereto as Exhibit A, as the same may be amended from time to time. If the proceeds of the Series 1992 A1 Bonds remain unspent upon the issuance of any Additional Bonds to fund costs of the 1992 Project, the University shall establish separate accounts and subaccounts, for accounting purposes, for the deposit of the proceeds of such Additional Bonds in accordance with the provisions of this Section 5.

The Treasurer shall maintain such books and records with respect to disbursements from the 1992 Project Fund so as to enable the Treasurer to determine the name of any payee of any such disbursement, the date on which such disbursement occurred, the amount of such disbursement and the purpose for which such disbursement was made. Investment earnings on the funds on deposit in the 1992 Project Fund may, at the discretion of the University, be paid to the Trustee for deposit in the Bond Service Account in the Bond Fund to be used to pay Bond Service Charges on the Series 1992 A1 Bonds.

Upon the determination by the Treasurer that the costs incurred in connection with any item listed in Section 1 hereof in the definition of 1992 Project (each a "Component") to be paid from the 1992 Project Fund have been paid in full or provision for such payment has been made, the University may use any remaining moneys on deposit in the 1992 Project Fund with respect to such Component to fund the costs of other Components or to fund the costs of additional projects constituting University Facilities (each, an "Additional Project"). Moneys remaining on deposit in the 1992 Project Fund after the completion of the 1992 Project and any Additional Projects shall be used by the University in any manner which, in the opinion of Bond Counsel, shall be permissible under the Act and the Code.

Section 6. Application of Bond Proceeds. The University covenants that the use of the proceeds of the Series 1992 A Bonds will be restricted in such manner and to such extent, if any, as may be necessary, after taking into account reasonable expectations at the time of delivery of and payment for the Series 1992 A Bonds, so that the Series 1992 A Bonds will not constitute arbitrage bonds under Sections 103(c) and 148 of the Code. The Treasurer of the University, or any other officer having responsibility with respect to the issuance of the Series 1992 A Bonds, alone or in conjunction with any other officer or employee of or consultant to the University, will give an appropriate certificate of the University for inclusion in the transcript of proceedings for the Series 1992 A Bonds setting forth the reasonable expectations of the University regarding the amount and use of all those proceeds and the facts and estimates on which they are based, all as of the date of original delivery of and payment for the Series 1992 A Bonds.
The University further covenants that it will take all actions required to maintain the exclusion from gross income for purposes of federal income taxation of interest on the Series 1992 A Bonds, and will not take, nor permit to be taken, any actions which would adversely affect such exclusion under the provisions of the Code that apply to the Series 1992 A Bonds; and the Chairman or the Treasurer and other appropriate officers are hereby authorized to take such actions and give such certifications as may be appropriate to assure such exclusion from gross income of interest on the Series 1992 A Bonds.

Section 7. 1992 Escrow Subaccount; Call for Redemption of Prior Bonds. There is hereby created the 1992 Escrow Subaccount, a subaccount of the Special Bond Service Account, to be held in the custody of the Trustee. All moneys and investments held in the 1992 Escrow Subaccount shall be held in trust for and shall be used solely for the payment of the principal of, premium, if any, and interest on the Prior Bonds as provided in the Fifth Supplemental Indenture.

The University hereby determines that each of the Prior Bonds shall be called for optional redemption at the earliest date on which each of them may be redeemed pursuant to the Indenture and that the execution and delivery by the University of the Fifth Supplemental Indenture shall constitute the irrevocable direction to the Trustee to send such notices as are required by the Indenture to effect such call for redemption. The execution of the Fifth Supplemental Indenture and the acceptance of the estate conveyed thereby by the Trustee shall constitute the receipt by the Trustee of such direction and the agreement by the Trustee to give the aforementioned notices.

Section 8. Further Covenants. In addition to the covenants elsewhere contained herein, the University further covenants as provided in Section 13 of the Series 1985 A Bond Resolution, which covenants are incorporated herein as if fully set forth herein.

Section 9. Fifth Supplemental Indenture. In order to better secure the payment of the Bond Service Charges as the same shall become due and payable, the Chairman, the President of the University, the Secretary of the Board and the Treasurer, or any one or more of them, are authorized and directed to execute, acknowledge and deliver to the Trustee, in the name and on behalf of the University and pursuant to the Indenture, the Fifth Supplemental Indenture, in substantially the form submitted to this Board and hereby approved, with such changes therein as are not substantially adverse to the University and as may be permitted by the Act and approved by the officers executing the same on behalf of the University. The Fifth Supplemental Indenture shall also include the forms of the Series 1992 A Bonds. The execution of such document by any of such officers shall conclusively evidence the approval of such officers and the Board and that such changes are not substantially adverse to the University. Such officers are each further authorized to execute and deliver on behalf of the University such other certificates, documents and instruments as are necessary in connection with the acts authorized by this Resolution.

Section 10. Open Meeting Determination. It is found and determined that all formal actions of the Board concerning and relating to the adoption of this Resolution were adopted in an open meeting of the Board, and that all deliberations of the Board and of any of its committees that resulted in such formal action were in meetings open to the public, in compliance with all legal requirements including Section 121.22 of the Ohio Revised Code.

Section 11. Effective Date. This Resolution shall take effect and be in force immediately upon its adoption.

Upon motion of Mr. Shumate, seconded by Amb. Wolf, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

AUTHORIZATION, ISSUANCE AND SALE OF
VARIABLE RATE DEMAND GENERAL RECEIPTS BONDS,
SERIES 1992 B, OF THE OHIO STATE UNIVERSITY

Resolution No. 93-29

Synopsis: Providing for the authorization, issuance and sale of Variable Rate Demand General Receipts Bonds, Series 1992 B (the "Series 1992 B Bonds"), in a principal amount determined as provided herein, for the purpose of paying or reimbursing a portion of the costs of (i) the acquisition, construction, remodeling, improvement, installation, renovation and installation of facilities for use by University Hospitals, including a surgical intensive care unit, a neuropsychiatric facility, women and infant facilities, magnetic resonance imaging unit, elevator improvements, emergency department alterations and emergency power system improvements; (ii) the repair, improvement, remodeling, renovation and rehabilitation of University Residence and Dining Hall facilities; (iii) the acquisition, construction, installation and equipping of additional clinical medical research facilities located adjacent to Wiseman Hall; (iv) the acquisition, construction, installation and equipping of a plant growth research facility at Rightmire Hall; (v) the improvement of Cannon Drive; (vi) the renovation and remodeling of Rightmire Hall to provide laboratories for the University Biotechnology Program; (vii) the enlargement of the 12th Avenue Parking Garage and the construction thereon of Botany and Zoology facilities; (viii) the renovation of facilities at the Lab Animal Center for use in primate research; (ix) the remodeling and renovation of Bevis Hall to house a Transgenic Animal Facility to support biotechnology research; (x) the maintenance, improvement and repair of utilities, including central controls, a water purification system and storm and sanitary sewers; (xi) the acquisition and renovation of a facility for the construction of astronomical instruments; (xii) the renovation of Scott Hall to house the Byrd Polar Research Center and portions of the Geological Sciences; (xiii) the acquisition of land and a building located at 1275 Kinnear Road; (xiv) the acquisition of land for use by the Molly Caren Agricultural Center; (xv) the acquisition and installation of digital switching telecommunications equipment; (xvi) the renovation and remodeling of facilities to provide facilities for use in connection with the Honor's Program; (xvii) the development of intramural fields and acquisition and installation of additional bleachers for Ohio Stadium by the Department of Athletics; and (xviii) the renovation of a building located at 1000 Kinnear Road (collectively, the "1992 Project"), and paying costs and expenses associated with the issuance of the Series 1992 B Bonds, authorizing a Sixth Supplemental Trust Indenture to secure the payment of Bond Service Charges on the Series 1992 B Bonds and for related purposes.

WHEREAS pursuant to Sections 3345.11 and 3345.12 of the Ohio Revised Code (the "Act"), as enacted under authority of the Constitution of Ohio, particularly Section 2i of Article VIII thereof, The Ohio State University (the "University"); a state university of the State of Ohio (the "State"), created and existing under Chapter 3335 of the Ohio Revised Code, is authorized and empowered, among other things, (a) to issue, as provided herein, Bonds (as defined in the Original Indenture (as hereinafter defined)) of the University to pay the costs of certain capital facilities defined as "auxiliary facilities" in the Act (and herein called "University Facilities") and to refund, fund or retire bonds and other obligations previously issued for such purpose; (b) to pledge to the payment of the Bonds all or a specified part of the gross amount of the General Receipts of the University (as defined in the Original Indenture) in priority to all other expenses, claims or payments; (c) to covenant, as herein provided, that the University will make, fix, adjust and collect the fees, rates, rentals, charges and other items comprising General Receipts to produce General Receipts sufficient at all times to meet Bond Service Charges (as defined in the Original Indenture) on the Bonds, to establish and to maintain the required reserves and meet other requirements herein provided; and (d) to provide for a trust indenture and make further provisions for securing the payment of the Bond Service Charges; and
WHEREAS the University, by resolution adopted by its Board of Trustees (the "Board") on November 1, 1985 (the "Series 1985 A Bond Resolution") and by a Trust Indenture dated as of November 15, 1985 (the "Original Indenture") between the University and The Huntington National Bank, as Trustee (the "Trustee"), has provided for the issuance from time to time of General Receipts Bonds of the University, with each such issue to be authorized by a Series Resolution (as defined in the Original Indenture) adopted by the Board pursuant thereto and secured pursuant to the terms of a Supplemental Indenture (as defined in the Original Indenture) with respect to such issue (the Original Indenture and all Supplemental Indentures being referred to collectively herein as the "Indenture"); and

WHEREAS the University has heretofore issued pursuant to the Series 1985 A Bond Resolution and the Original Indenture the $27,680,000 The Ohio State University General Receipts Refunding Bonds, Series 1985 A, dated as of November 15, 1985 (the "Series 1985 A Bonds") ($16,530,000 principal amount outstanding as of September 1, 1992); and

WHEREAS the University has heretofore issued pursuant to the Series 1985 A Bond Resolution, the resolution adopted by the Board on December 6, 1985 (the "Series 1985 B Bond Resolution"), the Original Indenture and the First Supplemental Trust Indenture, dated as of December 30, 1985 (the "First Supplemental Indenture"), between the University and the Trustee, as amended by the Amendment Agreement, dated as of December 1, 1986, between the University and the Trustee, as further amended by the First Supplemental Trust Indenture Amendment Agreement, dated as of March 1, 1988 between the University and the Trustee, the $42,500,000 The Ohio State University Variable Rate Demand General Receipts Bonds, Series 1985 B, initially dated as of December 30, 1985 (the "Series 1985 B Bonds") ($21,900,000 principal amount outstanding as of September 1, 1992); and

WHEREAS the University has heretofore issued pursuant to a resolution adopted by the Board on July 11, 1986 (the "Series 1986 A Bond Resolution"), the Series 1985 A Resolution, the Original Indenture and the Second Supplemental Trust Indenture, dated as of July 15, 1986 (the "Second Supplemental Indenture"), between the University and the Trustee, the $45,000,000 The Ohio State University General Receipts Bonds, Series 1986 A, dated as of July 15, 1986 (the "Series 1986 A Bonds") ($34,755,000 principal amount outstanding as of September 1, 1992); and

WHEREAS the University has heretofore issued pursuant to a resolution adopted by the Board on July 11, 1986 (the "Series 1986 B Bond Resolution"), the Series 1985 A Resolution the Original Indenture and the Amended Third Supplemental Trust Indenture, dated as of August 1, 1986 (the "Third Supplemental Indenture"), between the University and the Trustee, the $45,000,000 The Ohio State University Variable Rate Demand General Receipts Bonds, Series 1986 B, initially dated as of August 14, 1986 (the "Series 1986 B Bonds") ($40,900,000 principal amount outstanding as of September 1, 1992); and

WHEREAS the University has heretofore issued pursuant to a resolution adopted by its Board of Trustees on April 6, 1990 (the "Series 1990 Bond Resolution"), the Series 1985 A Bond Resolution, the Original Indenture and the Fourth Supplemental Trust Indenture, dated as of April 1, 1990 (the "Fourth Supplemental Indenture"), between the University and the Trustee, the $54,265,000 The Ohio State University General Receipts Bonds, Series 1990, dated as of April 1, 1990 (the "Series 1990 Bonds") ($49,945,000 principal amount outstanding as of September 1, 1992); and
AUTHORIZATION, ISSUANCE AND SALE OF VARIABLE RATE DEMAND GENERAL RECEIPTS BONDS, SERIES 1992 B, OF THE OHIO STATE UNIVERSITY (contd)

WHEREAS the University intends to issue pursuant to the resolution adopted by the Board on the date hereof (the "Series 1992 A Bond Resolution"), the Series 1985 A Resolution, the Original Indenture and the Fifth Supplemental Trust Indenture, dated as of September 1, 1992 (the "Fifth Supplemental Indenture"), between the University and the Trustee, The Ohio State University General Receipts Bonds, Series 1992 A1 in an amount not to exceed $64,500,000 and The Ohio State University General Receipts Refunding Bonds, Series 1992 A2 (collectively, the "Series 1992 A Bonds"); and

WHEREAS the Board has determined that it is in the best interests of the University to authorize the issuance of The Ohio State University Variable Rate Demand General Receipts Bonds, Series 1992 B (the "Series 1992 B Bonds") in the principal amount not to exceed $31,000,000 for the purpose of paying or reimbursing a portion of the costs of the 1992 Project, paying certain Capitalized Interest and paying costs and expenses associated with the issuance of the Series 1992 B Bonds; and

WHEREAS the University desires to make provisions for the issuance of the Series 1992 B Bonds and for the payment of the Bond Service Charges thereon and the securing thereof by this Resolution and a Sixth Supplemental Trust Indenture (the "Sixth Supplemental Indenture") herein authorized.

NOW THEREFORE

BE IT RESOLVED BY THE BOARD OF TRUSTEES OF THE OHIO STATE UNIVERSITY, as follows:

Section 1. Definitions and Interpretations. All words and terms defined in the Original Indenture and all interpretations therein provided shall have in this Resolution the same meanings, respectively, and be subject to the same interpretations as therein provided or used, unless the context or use clearly indicates another or different meaning or intent. Terms not appearing in the Original Indenture but used herein and not previously defined herein are defined as follows:

"Bond Proceedings" means the Series 1985 A Bond Resolution, the Original Indenture, any applicable Series Resolution, any applicable Supplemental Indenture, any applicable Certificate of Award and any other resolutions and agreements and amendments of and supplements to the foregoing, or any combination thereof, authorizing or providing for the terms and conditions applicable to, or providing for the security or sale of Bonds, and the terms contained in such Bonds.

"Book Entry System" means a system under which (i) a physical Series 1992 B Bond certificate in fully registered form is issued for each maturity of Series 1992 B Bonds only to a Depository or its nominee as registered owner, with the Series 1992 B Bonds held by and immobilized in the custody of the Depository; and (ii) a book entry record, maintained by and the responsibility of the Depository and not maintained by or the responsibility of the University or the Trustee, is the record that identifies, and records the transfer of the interests of, the owners of book entry interests in such Series 1992 B Bonds.

"Certificate of Award" means the Certificate of Award authorized pursuant to Section 3 of this Resolution.

"Contract of Purchase" means the Contract of Purchase between the Original Purchasers and the University, authorized pursuant to Section 3 hereof.
"Converted Bond(s)" means a Series 1992 B Bond, the interest on which has been converted to a Fixed Interest Rate (as defined in the Sixth Supplemental Indenture) pursuant to Section 6(F) of the Sixth Supplemental Indenture.

"Depository" means any securities depository that is a clearing agency under federal law operating and maintaining, with its participants or otherwise, a Book Entry System to record ownership of book entry interests in obligations, and includes and means initially as to the Series 1992 B Bonds, The Depository Trust Company (a limited purpose trust company), New York, New York.

"Interest Payment Dates" means as to the Series 1992 B Bonds (i) during the effectiveness of a Weekly Rate Period, a Monthly Rate Period (as defined in the Sixth Supplemental Indenture), or a Quarterly Rate Period (as defined in the Sixth Supplemental Indenture), each March 1, June 1, September 1, and December 1 or, if such day is not a Business Day (as defined in the Sixth Supplemental Indenture), the next succeeding Business Day; (ii) during the effectiveness of a Semiannual Rate Period, an Annual Rate Period or a Fixed Rate Period (as such terms are defined in the Sixth Supplemental Indenture), each June 1 and December 1 or, if such day is not a Business Day, the next succeeding Business Day; (iii) during the effectiveness of any Money Market Rate, the first Business Day following each Rate Period; and (iv) if any or all Series 1992 B Bonds have been converted from bearing interest at a Money Market Rate or a Variable Rate to bearing interest at a Fixed Rate or Rates, the first day of each June 1 and December 1 to which interest at such rate or rates has accrued.

"Liquidity Facility" shall mean a bond purchase agreement, line of credit, revolving credit agreement or other liquidity agreement or formal undertaking, with a Liquidity Facility Issuer, pursuant to which under certain terms and conditions the Liquidity Facility Issuer agrees to purchase or provide moneys to the Tender Agent for the payment of the purchase price of tendered Bonds which cannot be remarketed, the delivery of which is disclosed by the Remarketing Agent, as certified by the Remarketing Agent to the University and the Trustee pursuant to the Sixth Supplemental Indenture, in the remarketing of all or part of the Series 1992 B Bonds as a source of funding for the payment of purchase price of the Series 1992 B Bonds tendered under the Sixth Supplemental Indenture.

"Liquidity Facility Issuer" shall mean the issuer of the Liquidity Facility if then in effect.

"Maximum Interest Rate" means twelve percentum (12%) per annum, or another maximum interest rate, if any, as provided in any Liquidity Facility.

"Money Market Mode" shall mean that Period during which the interest rate on the Series 1992 B Bonds is a Money Market Rate.

"Money Market Rate" shall mean, when used with respect to the Series 1992 B Bonds, the interest rate to be determined for each Bond pursuant to Section 6(E) of the Sixth Supplemental Indenture.

"Official Statement" means, as to the Series 1992 B Bonds, the Official Statement including, without limitation, the Preliminary Official Statement relating to the original issuance of the Series 1992 B Bonds, authorized pursuant to Section 3 hereof.

"Original Purchasers" means, as to the Series 1992 B Bonds, The Lehman Brothers Division of Shearson Lehman Brothers, Inc. and WR Lazard, Laidlaw & Mead, Inc.
"Paying Agent(s)" means, as to the Series 1992 B Bonds, the Trustee, or in the event that the Series 1992 B Bonds are in the Money Market Mode, an alternate Paying Agent designated by the University and located in New York, New York.

"Period" means Rate Period, as defined herein.

"1992 Project" means, collectively, (i) the acquisition, construction, remodeling, improvement, installation, renovation and installation of facilities for use by University Hospitals, including a surgical intensive care unit, a neuropsychiatric facility, women and infant facilities, magnetic resonance imaging unit, elevator improvements, emergency department alterations and emergency power system improvements; (ii) the repair, improvement, remodeling, renovation and rehabilitation of University Residence and Dining Hall facilities; (iii) the acquisition, construction, installation and equipping of additional clinical medical research facilities located adjacent to Wiseman Hall; (iv) the acquisition, construction, installation and equipping of a plant growth research facility at Rightmire Hall; (v) the improvement of Cannon Drive; (vi) the renovation and remodeling of Rightmire Hall to provide laboratories for the University Biotechnology Program; (vii) the enlargement of the 12th Avenue Parking Garage and the construction thereon of Botany and Zoology facilities; (viii) the renovation of facilities at the Lab Animal Center for use in primate research; (ix) the remodeling and renovation of Bevis Hall to house a Transgenic Animal Facility to support biotechnology research; (x) the maintenance, improvement and repair of utilities, including central controls, a water purification system and storm and sanitary sewers; (xi) the acquisition and renovation of a facility for the construction of astronomical instruments; (xii) the renovation of Scott Hall to house the Byrd Polar Research Center and portions of the Geological Sciences; (xiii) the acquisition of land and a building located at 1275 Kinnear Road; (xiv) the acquisition of land for use by the Molly Caren Agricultural Center; (xv) the acquisition and installation of digital switching telecommunications equipment; (xvi) the renovation and remodeling of facilities to provide facilities for use in connection with the Honor's Program; (xvii) the development of intramural fields and acquisition and installation of additional bleachers for Ohio Stadium by the Department of Athletics; and (xviii) the renovation of a building located at 1000 Kinnear Road, each of (i) through (xviii) constituting a Component, as defined in the Series 1992 A Bond Resolution.

"1992 Project Fund" means the 1992 Project Fund held by the University and created in Section 5 of the Series 1992 A Bond Resolution to be funded in part with the proceeds of the Series 1992 A Bonds.

"Rate Determination Date" shall mean, with respect to any Bond subject to the Money Market Mode, the Business Day on which the Money Market Rate shall be determined, which shall be the first day of such Rate Period.

"Rate Period" shall mean, when used with respect to any particular rate of interest (whether a Money Market Rate, Weekly Variable Rate, Monthly Variable Rate, Quarterly Variable Rate, Semiannual Rate or Annual Rate), the period during which such rate of interest determined for the Series 1992 B Bonds will remain in effect pursuant to Section 6 of the Sixth Supplemental Indenture.

"Remarketing Agent" means initially, The Lehman Brothers Division of Shearson Lehman Brothers, Inc., and any Person (as defined in the Original Indenture) meeting the qualifications of, and designated from time to time to act as Remarketing Agent under Section 7(H) of the Sixth Supplemental Indenture.
"Remarketing Agreement" means the Remarketing Agreement, dated as of October 1, 1992, provided for in Section 7 of this Resolution, to be entered into between the University and the Remarketing Agent, as the agreement may be amended, modified or supplemented.

"Series 1992 B Bond Resolution" or "this Resolution" as used herein, means this Resolution and the Certificate of Award, as the same may be amended from time to time.

"Tender Agent" means The Huntington National Bank, or any Person meeting the qualifications of, and designated from time to time to act as Tender Agent under, Section 7(K) of the Sixth Supplemental Indenture.

"Trustee" means The Huntington National Bank, and any successor Trustee as determined or designated under or pursuant to the Original Indenture.

"Variable Rate" means, as the context requires, the Weekly Variable Rate, the Monthly Variable Rate, the Quarterly Variable Rate, the Semiannual Rate or the Annual Rate.

Any reference herein to the University, the Board, or to any members or officers thereof or to other public boards, commissions, departments, institutions, agencies, bodies, entities or officers, shall include those which succeed to their functions, duties or responsibilities pursuant to or by operation of law or who are lawfully performing their functions. Any reference to a section or provision of the Ohio Revised Code or to the laws of Ohio shall include such section or provision and such laws as from time to time amended, modified, revised, supplemented, or superseded, provided that no such amendment, modification, revision, supplementation, or supersession shall alter the obligation to pay the Bond Service Charges in the amount and manner, at the times, and from the sources provided in the Series 1985 A Bond Resolution, this Resolution, the Original Indenture and the Sixth Supplemental Indenture, except as otherwise herein permitted.

Unless the context shall otherwise indicate, words importing the singular number shall include the plural number, and vice versa, and the terms "hereof," "herein, ,, "hereby, ,", "hereto," "hereunder," and similar terms, mean this Resolution.

Section 2. Authorization; Terms; Pledge; and Covenant.

(a) Authorization. The Bonds, to be designated and known as The Ohio State University Variable Rate Demand General Receipts Bonds, Series 1992 B, shall be issued pursuant to and as authorized by the Act, Section 2i of Article VIII of the Ohio Constitution, the Series 1985 A Bond Resolution, this Resolution, the Original Indenture and the Sixth Supplemental Indenture for the purposes of financing a portion of the costs of the University Facilities comprising the 1992 Project, paying certain Capitalized Interest and paying costs and expenses incidental to the issuance of the Series 1992 B Bonds.

(b) Form and Numbering. The Series 1992 B Bonds shall be issued only as fully registered Bonds. The Series 1992 B Bonds shall be numbered as determined by the Trustee.

(c) Denominations and Dates. Initially, the Series 1992 B Bonds shall be in denominations of $50,000 and integral multiples thereof and shall be dated as of the date of their first authentication and delivery. Series 1992 B Bonds subsequently issued in exchange for Series 1992 B Bonds surrendered for transfer or exchange shall be dated as of the Interest Payment Date to which interest has been paid in full or duly provided for. Converted Bonds shall be in denominations of $5,000 and any integral multiple thereof.
AUTHORIZATION, ISSUANCE AND SALE OF VARIABLE RATE DEMAND GENERAL RECEIPTS BONDS, SERIES 1992 B, OF THE OHIO STATE UNIVERSITY (contd)

(d) **Principal Amount.** The Series 1992 B Bonds shall be issued in the principal amount specified in the Certificate of Award, which amount shall not exceed $31,000,000.

(e) **Delivery and Execution.** The Treasurer is hereby authorized to make the necessary arrangements with the Original Purchasers to establish the date, location, procedures and conditions for the delivery of the Series 1992 B Bonds to the Original Purchasers and to take all steps as necessary to effect due execution, authentication and delivery of the Series 1992 B Bonds to the Original Purchasers under the terms of this Resolution. The Series 1992 B Bonds shall be signed by the Chairman of the Board (the "Chairman") and the Treasurer in their official capacities (provided that both of the signatures may be facsimiles) and shall bear the corporate seal of the University or a facsimile thereof.

(f) **Interest.** The Series 1992 B Bonds shall bear interest at a variable rate determined on a weekly, monthly, quarterly, semiannual, annual or multi-annual basis, or pursuant to the Money Market Mode, the period of recalculation to be selected by the University and the method of calculation to be performed by the Remarketing Agent as provided in Section 6 of the Sixth Supplemental Indenture. The University may also, as provided in Section 6(F) of the Sixth Supplemental Indenture, convert the interest rate on all or a portion of the Series 1992 B Bonds to Fixed Interest Rates. The interest rate on the Series 1992 B Bonds shall at no time exceed the Maximum Interest Rate. Interest shall be payable on each Interest Payment Date.

(g) **Optional Tender.** From time to time as provided in Section 7 of the Sixth Supplemental Indenture, holders of the Series 1992 B Bonds (other than Converted Bonds) may request, in accordance with the provisions of Section 7(A) of the Sixth Supplemental Indenture, that the Tender Agent purchase such Series 1992 B Bonds at a purchase price equal to one hundred percent (100%) of the principal amount of such Series 1992 B Bonds to be purchased plus accrued interest.

(h) **Maturities.** The Series 1992 B Bonds (other than Converted Bonds) shall mature not later than December 1, 2017, unless they have been redeemed prior to such date by mandatory redemption, as provided in Section 8(C) of the Sixth Supplemental Indenture, or otherwise. The Converted Bonds shall mature on the dates determined as provided in Section 6(F) of the Sixth Supplemental Indenture. The Series 1992 B Bonds (other than Converted Bonds) shall mature and be subject to mandatory sinking fund redemption as provided in the Certificate of Award. Nothing in the preceding sentences shall be deemed to in any case extend the maturity of any Series 1992 B Bond.

(i) **Redemption.** Certain maturities of the Series 1992 B Bonds are subject to redemption at the option of the University prior to stated maturity, in whole or in part, in accordance with the terms, conditions, redemption prices and on the dates set forth in Section 8 of the Sixth Supplemental Indenture. Notice of call for and other terms and provisions governing redemption of such Series 1992 B Bonds shall be given in the manner provided in the Indenture and the Sixth Supplemental Indenture.

(j) **Mandatory Purchase.** Certain of the Series 1992 B Bonds shall be subject to mandatory purchase, as designated by and in accordance with the provisions of Section 8(C) of the Sixth Supplemental Indenture. The Series 1992 B Bonds subject to mandatory purchase shall be purchased at a purchase price equal to the principal amount of the Series 1992 B Bonds to be so purchased plus accrued interest.
(k) **Appointment of Remarketing Agent.** The Board hereby appoints The Lehman Brothers Division of Shearson Lehman Brothers, Inc. as the initial Remarketing Agent under the Sixth Supplemental Indenture.

(l) **Appointment of Tender Agent.** The Board hereby appoints The Huntington National Bank as the initial Tender Agent under the Sixth Supplemental Indenture.

(m) **Security.** As provided in the Indenture as supplemented by the Sixth Supplemental Indenture, there is hereby pledged to the security of the Series 1992 B Bonds, (i) the gross amount of General Receipts of the University (subject to the provisions for the partial release of a pledge of General Receipts contained in Section 4.11 of the Original Indenture) and (ii) the monies contained in the Special Funds, but excluding the Bond Reserve Fund. Anything else to the contrary in the Indenture, the Series 1985 A Bond Resolution, the Sixth Supplemental Indenture or this Resolution notwithstanding, the Series 1992 B Bonds shall not have access to, any claim upon or be secured by, the Bond Reserve Fund or the 1992 Project Fund. This pledge of General Receipts shall be on parity with expenses, claims and payments relating to other Parity Obligations (as defined in the Original Indenture) and in priority to all other expenses, claims and payments of the University. In accordance with the Act, all the General Receipts or portions thereof are immediately subject to the lien of the pledge upon receipt thereof by the University.

For the further security of the Series 1992 B Bonds, and any Additional Bonds (as defined in the Original Indenture), the University hereby covenants with the bondholders and the Trustee that so long as any Series 1992 B Bonds or Additional Bonds are outstanding, the University shall fix, make, adjust and collect fees, rates, rentals, charges, and other items of General Receipts, as will produce at all times General Receipts sufficient (i) to pay Bond Service Charges when due, (ii) together with other monies lawfully available therefor, to pay all costs and expenses required to be paid under the Bond proceedings, and (iii) together with other monies lawfully available therefor, to pay all other costs and expenses necessary for the proper maintenance and successful and continuous operation of the University.

(n) **Payment, Places of Payment and Paying Agents.** The principal of and the redemption premium on the Series 1992 B Bonds when due shall be payable to the registered holders, upon presentation and surrender thereof at the principal corporate trust office of the Trustee and the Tender Agent, respectively. Interest shall be payable by check or draft mailed by the Trustee as provided in the Original Indenture; provided, however, that interest on Series 1992 B Bonds aggregating $1,000,000 or more in principal amount registered in the name of a single holder shall be paid by wire transfer in immediately available funds to such account, if any, as such holder directs in writing to the Trustee at least ten (10) days prior to any Interest Payment Date, such payment by wire transfer pursuant to that direction continuing in effect as to subsequent Interest Payment Dates until such time as the holder notifies the Trustee to the contrary or until such time as such holder ceases to be a holder of the requisite principal amount of Series 1992 B Bonds. Interest on Series 1992 B Bonds held by any Liquidity Facility Issuer or its designee pursuant to the Liquidity Facility shall be paid (at the) by wire transfer on each Interest Payment Date unless the Liquidity Facility Issuer notifies the Trustee of a different mutually acceptable method.
AUTHORIZATION, ISSUANCE AND SALE OF
VARIABLE RATE DEMAND GENERAL RECEIPTS BONDS,
SERIES 1992 B, OF THE OHIO STATE UNIVERSITY (contd)

(o) Book Entry. Subject to the provisions of the immediately following paragraph, the Series 1992 B Bonds shall be issued only to a Depository for holding in a Book Entry System. Those Series 1992 B Bonds shall be registered in the name of the Depository or its nominee, as registered owner, and immobilized in the custody of the Depository; and shall not be transferable or exchangeable, except for transfer to another Depository or to another nominee of a Depository, without further action by the University. Each maturity of the Series 1992 B Bonds shall be evidenced by a single certificate in the aggregate principal amount of the Series 1992 B Bonds maturing on such maturity date.

If any Depository determines not to continue to act as a Depository for the Series 1992 B Bonds for holding in a Book Entry System, the University may attempt to have established a securities depository/Book Entry System relationship with another qualified Depository. If the University does not or is unable to do so, the University, after making provision for notification of the owners of book entry interests by appropriate notice to the then Depository and any other arrangements it deems necessary, shall permit the withdrawal of the Series 1992 B Bonds from the Depository, and authenticate and deliver the Series 1992 B Bond certificates, in fully registered form to the assigns of the Depository or its nominee (if such Bond was held by a nominee), all at the cost and expense (including costs of printing or otherwise preparing and delivering replacement Series 1992 B Bonds) of the Bondholders. Series 1992 B Bond certificates authenticated and delivered pursuant to this paragraph shall be in the denomination of $5,000 or any integral multiple thereof.

Section 3. Contract of Purchase; Certificate of Award; Official Statement. The Series 1992 B Bonds are sold and awarded to the Original Purchasers in accordance with the Contract of Purchase at the purchase price provided in the Certificate of Award. The form of Contract of Purchase now on file with the Secretary of the Board is hereby approved, together with any changes therein and completions thereof which are not inconsistent with this Resolution and not substantially adverse to the University, and as are permitted by the Act and approved on behalf of the University by the Chairman or the Treasurer. The approval on behalf of the University of those changes and completions by the Chairman or the Treasurer, and the status of those changes as not substantially adverse to the University, shall be conclusively evidenced by the execution of the Contract of Purchase on behalf of the University by the Chairman or the Treasurer. It is determined hereby that the purchase price and the manner of sale and the terms of the Series 1992 B Bonds, as provided in this Resolution, are consistent with all legal requirements and will carry out the public purposes of the Act.

The sale and award of the Series 1992 B Bonds shall be further evidenced by the Certificate of Award. The Certificate of Award is hereby authorized and shall be executed by the Chairman or the Treasurer. The Certificate of Award shall, as to the Series 1992 B Bonds, state or confirm the aggregate principal amount, the purchase price of such Bonds, the initial interest rate or rates of such Bonds, the amount of Capitalized Interest, if any, with respect to such Bonds, the mandatory sinking fund requirements and the optional redemption provisions with respect to such Bonds, all as determined in accordance with the provisions of this Resolution, the Sixth Supplemental Indenture and the Contract of Purchase, all of which shall be conclusively evidenced by the execution of the Certificate of Award. The Certificate of Award shall also contain such other data or provisions as the Chairman or the Treasurer determines are appropriate or necessary, and as are consistent with the Series 1992 A Bond Resolution, this Resolution, the Original Indenture, the Sixth Supplemental Indenture and the Contract of Purchase.
The use and distribution of the Preliminary Official Statement relating to the Series 1992 B Bonds by the Original Purchasers is hereby approved and authorized. The Preliminary Official Statement is deemed final by the University for purposes of Securities Exchange Commission Rule 15c2-12 except for such omissions therefrom as may be permitted by such Rule. The final Official Statement, substantially in the form of the Preliminary Official Statement now on file with the Board, shall be executed by the Chairman or the Treasurer in his official capacity on behalf of the University with any modifications, changes or supplements necessary or desirable for the purposes thereof which the Chairman or the Treasurer shall approve. The Board has not confirmed, and assumes no responsibility for, the accuracy, sufficiency or fairness of any statements in the Preliminary Official Statement or the final Official Statement under the caption "UNDERWRITING."

Section 4. Allocation of Proceeds. The proceeds from the sale of the Series 1992 B Bonds, including any accrued interest, shall be allocated, deposited and applied as follows:

(i) To the Bond Fund, accrued interest, if any, received on the sale of the Series 1992 B Bonds; and

(ii) To the 1992 Project Fund, created pursuant to Section 5 of the Series 1992 A Bond Resolution, the entire remaining amount of the proceeds of the Series 1992 B Bonds, to be applied to the purposes of that Fund, including transfers from that Fund authorized by the Act and to pay costs and expenses associated with the issuance of the Series 1992 B Bonds.

Section 5. 1992 Project Fund. There has previously been created by the University pursuant to Section 5 of the Series 1992 A Bond Resolution a fund to be maintained in the custody of the Treasurer and designated the "1992 Project Fund." The 1992 Project Fund shall be funded in part from the proceeds of the sale of the Series 1992 B Bonds. Such proceeds shall be used for the payment or reimbursement of a portion of the costs and expenses relating to the 1992 Project, and costs and expenses associated with the issuance of the Series 1992 B Bonds. The 1992 Project Fund shall not constitute a Special Fund and shall not be pledged to the payment of Bond Service Charges.

Moneys held in the 1992 Project Fund, including all investment earnings thereon, pending disbursement from the 1992 Project Fund shall be invested in Authorized Investments specified in Section VIII of the Non-Endowment Investments Policy of the University attached hereto as Exhibit A, as the same may be amended from time to time. If the proceeds of the Series 1992 B Bonds remain unspent upon the issuance of any Additional Bonds to fund costs of the 1992 Project, the University shall establish separate accounts and subaccounts, for accounting purposes, for the deposit of the proceeds of such Additional Bonds in accordance with the provisions of this Section 5 and Section 5 of the Series 1992 A Bond Resolution.

The Treasurer shall maintain such books and records with respect to disbursements from the 1992 Project Fund so as to enable the Treasurer to determine the name of any payee of any such disbursement, the date on which such disbursement occurred, the amount of such disbursement and the purpose for which such disbursement was made. Investment earnings on the funds on deposit in the 1992 Project Fund may, at the discretion of the University, be paid to the Trustee for deposit in the Bond Service Account in the Bond Fund to be used to pay Bond Service Charges on the Series B Bonds.
AUTHORIZATION, ISSUANCE AND SALE OF VARIABLE RATE DEMAND GENERAL RECEIPTS BONDS, SERIES 1992 B, OF THE OHIO STATE UNIVERSITY (contd)

Upon the determination by the Treasurer that the costs incurred in connection with any item listed in Section 1 hereof in the definition of 1992 Project (each a "Component") to be paid from the 1992 Project Fund have been paid in full or provision for such payment has been made, the University may use any remaining moneys on deposit in the 1992 Project Fund with respect to such Component to fund the costs of other Components or to fund the costs of additional projects constituting University Facilities (each, an "Additional Project"). Monies remaining on deposit in the 1992 Project Fund after the completion of the 1992 Project and any Additional Projects shall be used by the University in any manner which, in the opinion of Bond Counsel, shall be permissible under the Act and the Code.

Section 6. Application of Bond Proceeds. The University covenants that the use of the proceeds of the Series 1992 B Bonds will be restricted in such manner and to such extent, if any, as may be necessary, after taking into account reasonable expectations at the time of delivery of and payment for the Series 1992 B Bonds, so that the Series 1992 B Bonds will not constitute "arbitrage bonds" under Sections 103(c) and 148 of the Code. The Treasurer of the University, or any other officer having responsibility with respect to the issuance of the Series 1992 B Bonds, alone or in conjunction with any other officer or employee of or consultant to the University, will give an appropriate certificate of the University for inclusion in the transcript of proceedings for the Series 1992 B Bonds setting forth the reasonable expectations of the University regarding the amount and use of those proceeds and the facts and estimates on which they are based, all as of the date of original delivery of and payment for the Series 1992 B Bonds.

The University further covenants that it will take all actions required to maintain the exclusion from gross income for purposes of federal income taxation of interest on the Series 1992 B Bonds and will not take or permit to be taken, any actions which would adversely affect such exclusion under the provisions of the Code that apply to the Series 1992 Bonds; and the Chairman or the Treasurer and other appropriate officers are hereby authorized to take such actions and give such certifications as may be appropriate to assure such exclusion from gross income of interest on the Series 1992 B Bonds.

Section 7. Further Covenants. In addition to the covenants elsewhere contained herein, the University further covenants as provided in Section 13 of the Series 1985 A Bond Resolution, which covenants are incorporated herein as if fully set forth herein.

Section 8. Sixth Supplemental Indenture, Remarketing Agreement and Other Documents. In order to better secure the payment of the Bond Service Charges as the same shall become due and payable, the Chairman, the President of the University, the Secretary of the Board and the Treasurer, or any one or more of them, are authorized and directed to execute, acknowledge and deliver to the Trustee and the Remarketing Agent, in the name and on behalf of the University and pursuant to the Indenture, the Sixth Supplemental Indenture and the Remarketing Agreement, respectively, each in substantially the form submitted to this Board, or to such officers on behalf of this Board and the University, and such documents are hereby approved, with such changes therein as are not substantially adverse to the University and as may be permitted by the Act and approved by the officers executing the same on behalf of the University. The Sixth Supplemental Indenture shall also include the form of the Series 1992 B Bonds (the "Form of Bond"), attached thereto as Exhibit A. The execution of such documents by any of the officers shall conclusively evidence that the officers and the Board approve such changes and that such changes are not substantially adverse to the University. Each of such officers is further authorized to execute and deliver on behalf of the University such other certificates, documents and instruments as are necessary in connection with the acts authorized by this Resolution.
September 2, 1992 meeting, Board of Trustees

AUTHORIZATION, ISSUANCE AND SALE OF VARIABLE RATE DEMAND GENERAL RECEIPTS BONDS, SERIES 1992 B, OF THE OHIO STATE UNIVERSITY (contd)

Section 9. Construction Bonds; Penalty in Lieu of Rebate.

(a) Construction Bonds. The University hereby determines and represents that at least seventy-five percent (75%) of the available construction proceeds (within the meaning of Section 148(f)(4)(C)(iv) of the Code) of the Series 1992 B Bonds are to be used for construction expenditures with respect to property which is to be owned by a governmental unit in accordance with the provisions of Section 148(f)(4)(C) of the Code.

(b) Election of Penalty in Lieu of Rebate. The University hereby elects the application of Section 148(f)(4)(C)(vii) of the Code which provides for the payment of a penalty in lieu of any rebate payments which would otherwise be due in connection with the investment of the proceeds of the Series 1992 B Bonds. The Chairman or the Treasurer are each authorized to execute an instrument (the "election document") that is required by the Code to evidence the election herein described. The election document shall be retained by the University until the expiration of six years following the redemption, refunding or maturity of the last Bond of the Series 1992 B Bonds to be retired.

Section 10. Open Meeting Determination. It is found and determined that all formal actions of the Board concerning and relating to the adoption of this Resolution were adopted in an open meeting of the Board, and that all deliberations of the Board and of any of its committees that resulted in such formal action were in meetings open to the public, in compliance with all legal requirements including Section 121.22 of the Ohio Revised Code.

Section 11. Effective Date. This Resolution shall take effect and be in force immediately upon its adoption.

Upon motion of Mr. Shumate, seconded by Mr. Barone, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

PRESIDENT'S REPORT

President Gee:

Welcome ladies and gentlemen -- we are delighted to have all of you here today. I am particularly pleased to see so many of my University colleagues who will be presenting some information to you later regarding activities at the University, which are enormously important. This year -- and I believe that those that were in the Student Affairs Committee meeting already heard -- by many people's estimation, we have had one of the most successful opening weeks in memory. Some are attributing this success to the beautiful weather, others say it is because of the Buckeyes' stunning victory over Syracuse. And I must say that no one appreciated that victory more than I did -- with the possible exception of Coach Cooper, of course. As I told Bob Orr of WBNS at the end of the game, I couldn't wait to send back all those letters I had been receiving lately! That did buoy our spirits tremendously. But the real reason for the success of the start of this year is the extra effort and fine work of our faculty and staff members in preparing for the 1992-93 academic year.

Just before the quarter began, we celebrated Staff Appreciation Day, an opportunity for us to thank the members of our staff for their good work. A staff arts and crafts exhibit was held in Bricker Hall and a staff talent show was part of the festivities on the Oval. In the words of an administrative secretary who wrote to me after the event, "This event certainly lifted my spirits and those of many staff members who needed a boost."

We opened our residence halls on Saturday, September 19, and within only two days nearly 7,000 undergraduates were moved into their rooms. I spent a few hours that first day talking with students and their parents, and I was able to observe firsthand the truly remarkable job that was done. Better than my description are the words of Larry and Marti Hughes of Worthington in a letter they sent me after moving their daughter into Canfield Hall, "Frankly, we were expecting hours of waiting and gave ourselves 4 to 5 hours to do this.... Within less than 45 minutes, Laura was moved into her room. We were treated very courteously and efficiently. There were no lines and the organization by everyone was superb. ... Laura's resident advisor greeted us and talked with us for 20 minutes. We felt so secure leaving our daughter in your hands." Letters like that from parents are worth a great deal to us. And as a parent, I know that this is high praise, indeed.

For the first time in many years, a welcome convocation was held for new students. More than 3,000 students attended in St. John Arena. Professor Martha Garland gave them some very sound advice, telling them to sit in the front of every class. In that way, regardless of the size of the class, it is very small and personal. Coach Randy Ayers addressed the students and gave them some of the same advice he gives his student athletes -- avoid distractions, and, of course, remember why you
PRESIDENT'S REPORT (contd)

President Gee: (contd)

are at Ohio State. From the procession of the deans to the picnic that followed, it was a very successful event.

On the first day of classes, I visited several of the busiest offices on campus. At Fees and Deposits they had a large Scarlet and Gray banner reading "Welcome to Buckeye Country." The Office of the Treasurer was disbursing checks out of Drake Union, and their staff included another one of my look-a-likes! No wonder I get blamed for everything! Leonard Copeland, Assistant Treasurer, remarked that the people in his areas are committed to providing the best possible service because "this translates into increased time and energy for students to spend on their studies." And that was a quote from Leonard.

And study they will! Last month, Associate Provost Bob Arnold told this Board of the success of our efforts to reduce the number of closed courses. Our statistics were brought to life during the first week of classes when many of the college offices noted a considerable decrease in the number of requests for schedule changes. We still have a ways to go on the issues of course availability, but we have made, in my view, tremendous strides.

I would be remiss if I did not mention, as part of my report on the opening of the school year, that another very successful Farm Science Review was held at our Molly Caren Farm. A number of the Trustees joined us for a very successful luncheon hosted by the Vice President for Agriculture, Bob Moser. The exhibits at this outstanding farm show are both interesting and important to farmers and business leaders. What Ohio State exhibits through this event is its teaching, its research, and its service to agri-business and to the citizens of Ohio and the nation.

Coincident with the opening of the academic year was the opening of an important exhibit at the Wexner Center for the Arts. "Will Power" brings together outstanding contemporary minority artists who give expression to culture and tradition, some within the context of the quincentenary remembrance. As any academic arts center should, this exhibit challenges our assumptions and reinforces our commitment to issues of diversity in our society.

The pace has quickened across our campuses. I feel we have some momentum going into this Autumn Quarter. Despite the challenges of our fiscal problems, people have pulled together and found a number of ways to enhance this great institution. I know that the Board joins me in applauding this type of effort on the part of the people who are, after all, Ohio State.

I would just note, parenthetically, that each member of the Board has in front of them an outline of my speech that I will be giving tomorrow to the University Senate. It is very consistent with discussions that we have had regarding the mission, vision, and direction of the institution. I look forward to that speech and an opportunity to discuss with my faculty and staff colleagues throughout the university the future of this institution -- something that we will further discuss at our November meeting. Thank you, very much, Mr. Chairman.
October 2, 1992 meeting, Board of Trustees

RESEARCH FOUNDATION REPORT

Mr. Celeste:

I am pleased to report on the grants and contracts for the month of August received by The Ohio State University Research Foundation. At Tab 1 we see that the awards for the period July through August remain down about the same level as last month. This is due in large measure to fluctuations in the timing of some major awards. Some awards received last year were for multiple years, some awards were received in June instead of July, and others are being delayed.

At Tab 2 you will find expenditure summaries. It is noteworthy that expenditures for personnel are up over 12 percent, while other categories are lagging behind due to a temporary backlog in accounts payable.

Some projects of special interest that were funded in the month of August are listed in Tab 3. This week I had the pleasure of visiting the Biotechnology Center and you should have copies of their promotional brochures at each of your places. Dr. Kolattukudy, Director of the Center, who took me on a whirl-wind tour of the Center, has recently been funded by the National Cancer Institute to investigate the molecular basis of hormonally induced cancer. This project is only one of the many interdisciplinary studies at the Center involving faculty in other colleges. Each of the areas being studied has the potential to provide scientific breakthroughs with immediate real-life applications -- which is a pretty exciting thing going on at the University.

The National Science Foundation has funded Professors Noltz, Pearl, and Stasny in the Department of Statistics to develop a comprehensive package of multimedia materials for use in introductory statistics courses and made available nationally.

At Tab 4 is the list of all projects funded in August.

At Tab 5 are several tables comparing federal obligations for research and development at the Big Ten Universities, plus Penn State University. The first table compares data across several academic disciplines for FY 1990. In terms of total science and engineering funding, Ohio State ranked 6 out of 11. The second table compares data by federal agency. In addition, there are tables comparing fiscal year 1986 through 1990 for the more significant federal agencies. Comparable data for 1991 are not yet available from the federal government.

In reviewing this information it may be helpful to recognize that Ohio State, Michigan State, Northwestern, Penn State, Illinois, Iowa, Michigan, Minnesota, and Wisconsin have medical schools that contribute in a major way to funding in the life sciences. Indiana and Iowa do not have engineering schools, and only Ohio State, Michigan State, Penn State, Purdue, Illinois, Minnesota, and Wisconsin have an agricultural college. Also, there is a major interdisciplinary center at Penn State that accounts for about $52 million.

Tab 6 includes a press release issued by University Communications highlighting recent research activity. This concludes my remarks.
October 2, 1992 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS
Resolution No. 93-33

Synopsis: The reports on contracts, grants, and gifts and the summary for August 1992 are presented for Board acceptance.

WHEREAS monies are solicited and received on behalf of the University from governmental, industrial, other agencies, alumni, and various individuals in support of research, instructional activities, and service; and

WHEREAS such gifts are received through The Ohio State University Research Foundation, the Engineering Experiment Station of The Ohio State University, The Ohio State University Development Fund, and The Ohio State University Foundation.

NOW THEREFORE

BE IT RESOLVED, That the research agreement between The Ohio State University and The Ohio State University Research Foundation for the contracts and grants reported herein, and the acceptance of the reports from the Engineering Experiment Station, The Ohio State University Development Fund, and The Ohio State University Foundation during the month of August 1992 be approved.

Upon motion of Mr. Celeste, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND

Establishment of Named Funds

The Ralph W. Kurtz Chair in Finance Fund

The Ralph W. Kurtz Chair in Finance Fund was established October 2, 1992, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from Helen C. and Ralph W. Kurtz (B.M.E. ’23) for the support of the College of Business.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be added to principal until the Fund reaches $1.25 million at which time the annual income shall be distributed to the College of Business to support the teaching and research of The Ralph W. Kurtz Chair in Finance. The Chair shall be an internationally recognized scholar in Finance. Appointment to the Chair shall be recommended by the Dean of the College of Business to the Provost and approved by the Board of Trustees.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

The Doctors Ruth Beckey Irwin and Harry Power Irwin Fund

The Doctors Ruth Beckey Irwin and Harry Power Irwin Fund was established October 2, 1992, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from the estate of Dr. Ruth Becky Irwin, retired Chairperson of the Division of Speech and Hearing Science, of Columbus, Ohio.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used for scholarships, lectures, symposium and research in speech pathology by the Division of Speech and Hearing Science. When scholarships are involved, scholarship selection shall be made in consultation with the University Committee on Student Financial Aid. The chairperson of the Division shall be responsible for the administration of the fund.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.
Establishment of Named Funds (contd)

The College of Medicine Distinguished Teaching Endowment Fund

The College of Medicine Distinguished Teaching Endowment Fund was established October 2, 1992, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from alumni and friends of the College of Medicine and through the leadership of Seth Kantor, M.D., Associate Dean, College of Medicine.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support the College of Medicine's Distinguished Teaching Award program and foster teaching excellence in the Medical Humanities and MEDPATH programs. Programs to be supported and distribution of the annual income shall be determined by the Associate Dean of the College of Medicine in cooperation with the Distinguished Teaching Advisory Committee and approved by the Dean of the College of Medicine.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the Dean of the College of Medicine or program administrative officer in order to carry out the desire of the donors.

The Robert W. Ferguson Award for Excellence in Writing

The Robert W. Ferguson Award for Excellence in Writing was established October 2, 1992, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from the estate of Robert W. Ferguson (B.S., Journalism '39) of Wheeling, West Virginia.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide awards to journalism students for excellence in writing. Selection of the award recipients shall be made by a committee selected by the Director of the School of Journalism of The Ohio State University.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

The Ethel Bray Rose Scholarship Fund

The Ethel Bray Rose Scholarship Fund was established 1992, by the Board of Trustees of The Ohio State University, with a gift to The Ohio State University Development Fund from James D. Irwin (B.S.Bus.Adm. '50) of Redondo Beach, California.
Establishment of Named Funds (contd)

The Eithel Bray Rose Scholarship Fund (contd)

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used for scholarships and awarded to students majoring in Home Economics Education and teacher education specifically. This scholarship is not meant to assist the affirmative action programs of The Ohio State University. Students shall be selected by the chairperson of the Department of Home Economics Education in conjunction with the College of Human Ecology Scholarship Committee and in consultation with the University Committee on Student Financial Aid. Preference shall be given to categories of students who are underrepresented in the scholarship awards otherwise made by the Scholarship Committee and the Office of Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

Vice President of Agriculture Discretionary Endowment Fund

The Vice President of Agriculture Discretionary Endowment Fund was established October 2, 1992, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from the Siegenthaler family, with proceeds from the sale of their farm in Gallia County.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide support for units within the College of Agriculture at the discretion of the Vice President for Agricultural Administration.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

Change in Name and Description of Named Funds

The Margaret Speaks Vocal Scholarship Fund

The Margaret Speaks Vocal Scholarship was established July 12, 1985, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University Development Fund from the family of Margaret Speaks (B.A. Arts '25), soprano, in her memory. The name and description were revised October 2, 1992.
October 2, 1992 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Change in Name and Description of Named Funds (contd)

The Margaret Speaks Vocal Scholarship Fund (contd)

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be awarded on the basis of musical talent as follows: one-half of the annual income, or not more than $5,000, shall be awarded to an Ohio State University School of Music female senior or graduate student who has demonstrated career potential in vocal music and either plans further study in graduate school, or pursues vocal training with a recognized teacher, or seeks affiliation with a professional music company. If there are no candidates for the award in any given year, the earnings are to be added to the principal. The remaining one-half of the annual income shall be used to provide a minimum of one full tuition scholarship per year to an undergraduate female voice major with the balance being carried over for the following year.

Recipients shall be selected by the Director of the School of Music and the appropriate music faculty, in consultation with the University Committee on Student Financial Aid, and as approved by the Dean of the College of the Arts.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees after prior consultation with the family of John C. Speaks and the appropriate college official responsible for academic programs in the School of Music in order to carry out the desire of the donors.

The Oley Speaks Memorial Scholarship Fund

The Oley Speaks Memorial Scholarship Fund was established March 7, 1958, by the Board of Trustees of The Ohio State University with gifts from Madge Chaney Drake, Margaret Speaks Pearl, Charles Speaks, Stanford S. Speaks and John C. Speaks, Jr., the nieces and nephews of the composer, the late Oley Speaks. The name and description were revised October 2, 1992.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used for scholarships in the School of Music or other departments of the creative arts at the University. Selection of the recipient(s) shall be made by the Director of the School of Music, in consultation with the University Committee on Student Financial Aid, and as approved by the Dean of the College of the Arts.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees after prior consultation with the family of Oley Speaks and the appropriate college official responsible for academic programs in the College of the Arts in order to carry out the desire of the donors.
November 2, 1992 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY FOUNDATION

Approval of Description and Establishment of Funds

The George and Edna Jaap Poultry Endowment Fund

The George and Edna Jaap Poultry Endowment Fund was established October 2, 1992, by the Board of Trustees of The Ohio State University through funds received by the University from The Ohio State University Foundation, which has established an endowed fund with gifts designated for the support of the Department of Poultry Science from R. George Jaap, Professor Emeritus, Department of Poultry Science, College of Agriculture, The Ohio State University.

Income provided by the Foundation shall be used for research support dedicated exclusively to the advancement of the poultry industry, through programs in the Department of Poultry Science in the College of Agriculture at The Ohio State University.

The J. Ray Waller and Lillian W. Waller Cancer Research Fund

The J. Ray Waller and Lillian W. Waller Cancer Research Fund was established October 2, 1992, by the Board of Trustees of The Ohio State University through funds received by the University from The Ohio State University Foundation, which has established an endowed fund with gifts designated for the support of The Arthur G. James Cancer Hospital and Research Institute from the estate of J. Ray Waller.

Income provided by the Foundation shall be used to support cancer research in The Arthur G. James Cancer Hospital and Research Institute as approved by the Director of The Arthur G. James Cancer Hospital and Research Institute and the Vice President of Health Services.

The Dr. J. Martin Byers, Jr. Memorial Fund in Family Medicine

The Dr. J. Martin Byers, Jr. Memorial Fund in Family Medicine was established October 2, 1992, by the Board of Trustees of The Ohio State University through funds received by the University from The Ohio State University Foundation, which has established an endowed fund with gifts designated for the support of the Department of Family Medicine within the College of Medicine from Dr. and Mrs. James M. Byers, III (M.D. ’70), Tucson, Arizona, and other family and friends in memory of Dr. Byers’ father.

Income provided by the Foundation shall be used to foster and nurture rural medicine through the Department of Family Medicine. Initially, as resources become available, income shall be used to support a rural health initiative with educational components placing students, residents and fellows in the rural setting with rural preceptors. As sufficient funds become available to adequately support the preceptor's component, the income shall also support the faculty director position in the Department of Family Medicine's rural health program. Any unused income shall be returned to the principal to promote the fund's growth. Should the funding level reach that required to support a professorship, the fund shall be so named and the income shall be used to support a distinguished professor in the Department of Family Medicine as recommended by the Chairperson of the Department of Family Medicine and the Dean of the College of Medicine to the Provost and approved by the Board of Trustees.

--0--
HOSPITALS BOARD COMMITTEE REPORT

Mr. Celeste:

On September 24 the Professional Affairs/Education/Research Committee opened its meeting with an executive session review of quality and resource management data. Dr. Tom Reilley reported on quality indicators and opportunities for enhancement of patient care in the critical care units. Dr. William Bay reviewed hospital-wide quality indicators and the goals that had been set for the past fiscal year. Dr. Bay discussed development of treatment guidelines so that the care process for various diagnoses and procedures is consistent, provides optimal quality, and utilizes resources appropriately.

In open session we received reports from the Medical Director and Chief of Staff. Ms. Judy Gilliam gave a comprehensive overview of nursing at University Hospitals and Tom Kyllo reported on the recently revised federally mandated standards for clinical laboratories. Reed Fraley provided an update on the Hospitals' Human Resources, including licensure and certification, vacancies, turnover, performance appraisals, and compensation adjustments.

The Executive Committee also met on September 24. Dr. Charles Bush gave a detailed progress report on development of an integrated physician practice and a single billing system. Richard Schrock presented the August financial statement and a preliminary report on audit adjustments. This concludes my report, Mr. Chairman.

--0--

STUDENT AFFAIRS COMMITTEE REPORT

Ms. Cusack:

Good morning. I'm very pleased to report on the very positive meeting that we had in Student Affairs this morning. First we had a report from Joanne Markiewicz, Associate Director of Residence and Dining Halls. She provided information on occupancy statistics over the past ten years, and modifications made for the capacity for Autumn Quarter 1992.

Occupancy has been reduced in the Olentangy area by 50 percent and in the north area by 34 percent. Several of the 3 to 4 person rooms in the south area have been converted to double rooms. This reduction in occupancy has been very popular among the students, and provides more privacy and additional space.

The Honor's Living/Learning Program, formally housed in Taylor Tower, has now expanded onto several floors in Lincoln Tower and Bradley Hall. Two new special living/learning programs were added for the 1992-93 academic year -- the African-American Living/Learning Program and the Wellness Program. The Wellness Program, for those of you who don't know, consists of students who have agreed not to use tobacco or alcohol on the floor and then they participate in wellness programs. Both of these new programs house over forty students and the feedback so far has been very positive from students, faculty, and staff.
STUDENT AFFAIRS COMMITTEE REPORT (contd)

Ms. Cusack: (contd)

Over 550 student volunteers joined staff and residents from Residence and Dining Halls, OSU Public Safety, Stores Department, Campus and Community Relations, city and county police departments, and The Ohio State University Parent Association, in a very well orchestrated effort to welcome and move in over 7,200 residents on Saturday, September 19. From all the reports I have received, it went extremely well and was a positive experience for everyone.

After our report on Residence and Dining Halls, John Hilbert from the Undergraduate Student Government brought up the reoccurring theme of parking problems for students. Also, some of his other concerns included: the EMS service, the problem with off-campus housing, including cost and conditions, and the concern with what is happening with the new Student Union. He was also happy to report -- in vain of our positive attitude this morning -- that all of those concerns are being addressed currently by the University, which is a great thing to hear. John did report that the general attitude of students on campus is very positive and upbeat. He felt the fantastic way the closed course issue was handled deserves a lot of the credit for students' positive attitudes around campus this year. USG is also at the end of Voter Awareness Week, which is going extremely well. They are getting a record number of students registered to vote to make their voices heard.

Karen Duncan of CGS also expressed concern with traffic and parking, and the safety and cleaning of the south campus residence halls where a lot of graduate students live. She also wanted me to mention the new master schedule. It was done in a different format this year and was really well received -- it made a big difference.

Greg Gorospe of the Interprofessional Council attended his first meeting to update us on what is going on with IPC. IPC seems to be up and running this year with a great deal of new organization and it seems to be working very well so far. He also mentioned the problem with parking for professional students and IPC's need for secretarial support.

Overall, the prevailing mood on campus seems to be very positive. That concludes my report.

--0--

INVESTMENTS COMMITTEE REPORT

Amb. Wolf:

The Investments Committee met this morning and reviewed the monthly Endowment Summary Report for the period August 21, 1992 through September 18, 1992. I am pleased to report that the market value of the Endowment Fund on September 18, 1992 was $414.7 million. This total was approximately $7.3 million above the August 21, 1992 market value and represents an all-time high. The market value of the equity portion of that Endowment Fund increased $7.4 million and the fixed income portion increased $150,000 during this reporting period. I am
INVESTMENTS COMMITTEE REPORT (contd)

Amb. Wof: (contd)

pleased to report, also, that net new additions to the Endowment Fund for September totalled $812,000.

Since July 1, 1992, the Endowment Fund has increased in market value over $12.7 million, which included net new additions of $1.5 million. That means that the market value, not counting the new additions, was up about $11.2 million. The current asset allocation for the Endowment Fund is 57 percent invested in equities; 27 percent invested in fixed income securities; 9 percent invested in real estate; and 7 percent invested in cash or cash equivalents. We will be holding our annual review of the Endowment Fund's fixed income advisors this afternoon from 12:00 noon until 4:00 p.m. And a report on that review will be presented to the Board at the November meeting.

Finally, the Committee heard a presentation on The Ohio State University Foundation. As of June 30, 1992, the Foundation's market value was $18.5 million. The Endowment Fund, as you may know, invests about $15 million of that $18 million for the Foundation. That concludes this report, Mr. Chairman.

--0--

AGRICULTURAL AFFAIRS COMMITTEE REPORT

Mr. Colley:

The 1992 Farm Science Review, which is Ohio's largest outdoor education exhibition, broke attendance records this year with 129,850 visitors -- arriving by 895 buses, 41,910 cars, and 177 private aircraft. The highlight was an opening day luncheon and Ms. Casto, Mr. Celeste, and I were privileged to hear Dr. Gee and Dr. Moser address an audience of 400. Earl McMunn, Roland Leeper, and James Yingling were inducted into the Farm Science Review Hall of Fame.

Mr. Chairman, that concludes my report.

--0--

ACADEMIC AFFAIRS COMMITTEE MEETING

PRESENTATION ON FACULTY WORKLOAD ASSESSMENT

Mr. Kessler:

We are pleased to have the Academic Affairs Committee meeting with the full Board this morning. We think we have developed an agenda today that will be of interest to all of you and so we appreciate you being here for our Committee. I would like to call on Provost Joan Huber to introduce our agenda. Joan --
Dr. Joan Huber:

Thank you, Jack. Mr. Chairman and members of the Board, I would like to introduce Professor Nancy Rudd, Associate Provost in the Office of Academic Affairs, and turn the meeting over to her.

Professor Nancy Rudd:

I am very pleased to meet with you this morning on a topic that I know is very much on your minds, on the minds of the Governor and the Legislature, and on the minds of the general public -- faculty workload. What we are going to do today is provide you with a little more background beyond what you received in your agenda materials -- with respect to what we mean by faculty workload policy and what the Office of Academic Affairs will actually be doing this year with respect to developing such a policy. I also have some faculty members with me who are willing -- and actually quite delighted -- to talk with you about what they do as faculty members.

There are actually several benefits to developing a faculty workload policy that have led us to decide that we are going to do this, beyond responding to public pressure and to the recommendation that is in the State-wide Managing for the Future Task Force. One of those benefits -- and this is a benefit to faculty themselves -- is that it enables faculty to know exactly how and why work is being distributed in a particular way within their department. Another benefit, which I am sure you will resonate with, is that it provides a mechanism for assuring that all faculty carry their fair share of the workload. The third benefit -- which, I think, is particularly important now given public concern about faculty workload -- is that it does provide a mechanism for monitoring a workload and for generating statistics with respect to how much faculty are teaching.

What is a workload policy? It basically is a policy built around course assignment. For example, a policy will say what the minimum and maximum course load assignment is for a particular department, what an average course load assignment is, and how that assignment will vary given department-sanctioned activities with respect to research and service for individual faculty members.

Some departments and colleges in the University already have policies. Whether they will fit exactly the kind of criteria that we are going to ask departments to meet, with respect to these policies, remains to be seen. But this is not something brand new. Our goal is to have all departments -- or in some cases colleges, which may choose to deal with this at the college-level -- have these policies by the end of the year. In order to accomplish this, the Office of Academic Affairs will try to have its guidelines for departments in place by the end of this academic quarter, so they can begin to work on these policies Winter Quarter. They will have them approved by deans and the Office of Academic Affairs by the end of the academic year, and then they will be implemented for the next academic year.

Today I have some faculty with me, as I indicated, to talk with you about their workload: Jennie Nickel, Associate Professor from the Department of Family and Community in the College of Nursing; Susan Fisher, Associate Professor in Entomology; and Randy Smith, Associate Professor in Geography. A fourth person, Professor Bruce Bursten from Chemistry hopes to join us before the session is over, but he is teaching right now. I am sure you didn't want him to
PRESENTATION ON FACULTY WORKLOAD ASSESSMENT (contd)

Professor Rudd: (contd)

leave his class, and, indeed, Susan has to leave before this session is over because she has to teach. I might add that I am tired today, because I taught last night.

President Gee:

Nancy, a couple of things -- I think to make this discussion a little bit more meaningful for everyone -- I hope our colleagues wouldn't mind if people just chimed in with questions. I know that Mr. Shumate had a question for you. And anyone else who wants to grill Nancy, it is a welcome change for us.

Professor Rudd:

We do want to keep this informal and while these individuals have been asked to prepare some very short comments, I have told them that at any point they might have to stop talking and answer questions. So we are at your service. Do you have any questions for me?

Mr. Shumate:

You mentioned that several departments currently have policies. Approximately how many departments are there and how many departments currently have workload policies?

Professor Rudd:

There are approximately 122 departments in 19 colleges. I don't know the answer to your question on how many departments currently have workload policies, but I am currently in the process of finding out. I am aware of two colleges and two departments that have such policies. I suspect that with respect to departments the number is much higher than that, but I don't know at this point. I have asked one of my staff members to survey departments to find out.

Mr. Shumate:

Thank you.

Professor Rudd:

With that brief introduction, I would like to turn to the faculty. I have asked them to be brief -- knowing that you will want to ask your own questions. Each of them will highlight something they particularly want you to know about. Do feel free to chime in with questions at any point.

I am going to ask Randy to start, because Randy was on the State-wide Task Force for the discussion of faculty workload issues, which was attached to the State-wide Managing for the Future Task Force. He has had occasion to think about workload well beyond the fact that he works about a 70-hour week most of the time.
PRESENTATION ON FACULTY WORKLOAD ASSESSMENT (contd)

Professor Randy Smith:

I appreciate the opportunity to be here today. Nancy has asked us to really just focus on two main components, and I gather that each of you has a one page sheet from each of us. So let me just walk my way through this for a couple of minutes.

One of the responsibilities that we felt we needed to address in the state-wide issue on faculty workload was to simply inform other people what the components of our actual workload are. You will notice at the top of my sheet that there are three categories: instruction, research, and service. When I came to Ohio State, and during every annual review process, it is these three components of my record that are evaluated. That goes on every year.

So for me what instruction means is five courses each academic year to a total of about 300 students. You can see that I teach four general education curriculum courses totalling near the 300 themselves. I have two big classes of 100 students each that are primarily freshmen and sophomores; I have two upper-level classes that are primarily juniors and seniors; and I have one graduate-level class, which is typical in our department, and that may have ten graduate students in it. So of my 300 or so students, really all but ten of them are undergraduate students. I have the balance between freshmen and sophomores and juniors and seniors.

I also serve in an instructional capacity as the coordinator for our big 200-level course. That means that I oversee nine or ten other sections of the class beyond the ones that I teach -- nine other professors or senior graduate students and about 800-900 students. When something goes wrong in another section, it is my phone that rings. In addition to that kind of undergraduate work, I currently have three Ph.D. students, one M.A. student, and one undergraduate honor's advisee as part of my teaching load. So that is what instruction means in terms of my workload each year. And the five courses never vary. They may not be exactly the same five courses, but I have a five-course load as does everybody else in my particular department.

On top of that the other element of my responsibilities is research. My main area is urban geography. I am particularly interested in the quantitative analysis of the linkages between urban growth and economic development. I am also interested in -- and have been fairly active in recently -- geographic education. This is the identification of basic concepts and methods to help bring geography back to the K-12 curriculum. I have been working the last couple of years with a lot of Ohio teachers, helping them in terms of bringing geography back. I am also currently working with about $160,000 in grants for my research work.

Now, I tie research and instruction together as most faculty do, and so the work that I am doing in my own area, urban geography, gets translated into my urban geography class. It also gets translated as I work with my graduate students on a one-to-one basis throughout the academic year. On top of that it is service, which is the third component of my record.

The longer you are at Ohio State and the more you become involved in activities, the more likely you are to become more heavily involved in service. I have a service record that deals at the state, university, and department levels. Let me give you a couple of examples: I am Co-Chair of the State-wide Committee on
Transfer and Articulation, that is the committee that is making it easier for students to move from one institution to another and transfer credits. At the university-level this year, I will chair the Council on Admission and Registration; and in my department I serve in several capacities elected to different committees.

Those are the basic components of my workload. They are the things that I was told I would have to do when I came here, and they are the things that I am evaluated on every year when I meet with my chairperson. That translates itself into what you see at the bottom of the sheet. It is interesting that someone would actually ask you to do this because you aren't normally sitting around counting up hours of different kinds of activities, but it is interesting to actually apportion your workload the way that we were asked to do. Over half of my time this quarter -- about 35 hours -- is given over to instruction. I am in the classroom 8 hours, I have 4 office hours, I have course preparation and grading to do, undergraduate advising to do, and graduate advising. These are all part of the instructional mission. So well over 50 percent of my time is in instruction in some way.

My research involves collecting and analyzing data, typically census data; it means reading and writing my research papers; revising papers that come back that I have sent out that need revision; and also reviewing papers and proposals. Because faculty at Ohio State are well known for their research record, they are asked to review other people's proposals and papers. That takes time if you take it seriously. So another block of time goes into research.

Then for my service commitments, I probably spend about six hours a week in full committees. Then because I chair a couple of committees, I spend another six or so hours preparing for them and getting materials ready to go. So on a typical full week, say in Autumn Quarter 1992, my workload could be as high as about 60 hours per week. In another quarter when the makeup of my workload will change a little bit, it might be 50-55 hours. But it is typically a 50-60 hour per week workload.

Do you want to ask Randy any questions?

Where would your time spent coordinating the 200-level course go in this little chart?

I put it into instruction. Because what it means is that I have to go out and visit the classes of other people who are teaching, particularly senior graduate students. I could put it under service, but it really goes under instruction.
PRESENTATION ON FACULTY WORKLOAD ASSESSMENT (contd)

Amb. Wolf:

These reports that we are hearing are they based upon a nine-month year, ten-month year, or what?

Professor Smith:

I am a nine-month faculty member.

Amb. Wolf:

And the other three months?

Professor Smith:

Keep in mind that with about 50-60 percent of my time going into instruction throughout the year, the other components that I have, particularly research, need to be fitted into other times when I am not in front of the classroom. During the regular academic year, that is evenings and weekends back in the office working. For me the summer quarter is typically my research quarter, but it is not as if that is all I am doing throughout the summer. Other sections of my 200-level class are being taught in the summer and I have to continue to coordinate them. Although I am on a 9-month contract and using most of the summer months for my research, I am back in classes again throughout the summer monitoring other peoples' teaching. My committees also continue to meet throughout the summer. Even though I am on a 9-month contract, I am working more than nine months during the year.

Mr. Skestos:

The important thing is that you get paid on a 9-month contract and there is another that is an 11-month contract. Isn't that right?

Professor Smith:

Yes.

President Gee:

I might note that my office happens to be on the second floor of Bricker Hall and Geography, where Randy resides, is on the first floor. I am certain that I can say this about Susan or anyone else, but I come in on weekends very often because I am paid to come in on weekends -- recovering from whatever we are doing -- and Randy is very often there.

One of the things that he didn't talk much about -- which I think is one of the most important things that Professor Smith does -- is that he is developing a state-wide program for teaching geography in the public schools. This is an enormously important concept. He spends a lot of his weekends bringing people in from around the state -- other teachers of geography, from the university, college and high school levels. As you know, the issue of our sense of geography -- most people, as I point out, know Michael Jordan but they don't know Amman, Jordan.
PRESENTATION ON FACULTY WORKLOAD ASSESSMENT (contd)

President Gee: (contd)

Randy is trying to correct that in this state -- we desperately need that type of work with the public schools. So, again, his is really a very full schedule and I observe it personally.

Professor Rudd:

Susan --

Professor Susan W. Fisher:

Good morning, everyone. I guess the Governor seems to be in somewhat of a carnivorous mood these days when it comes to higher education and that is the result of several difficulties. One is the lack of money, but also the perception that faculty just don't teach enough or perhaps we don't even work hard enough at all.

I think my own case may be illustrative of what the Governor considers to be the problem. When I came to OSU in 1981 I was assigned to teach four courses per year. As my research obligations grew over the intervening decade, my formal teaching obligations dropped to about two courses per year. So you are entitled to ask, certainly, what is it I do with the rest of my time?

Well the big mitigating factor in my schedule are my research obligations. You have a document in front of you summarizing most of those. I currently have two major research interests and they are: determining the fate of chemicals in the environment and the control of zebra mussels. Both, I think, are directly relevant and beneficial to the citizens of the state of Ohio.

Currently, I am the principal investigator for a total of eight federal and industrial grants totalling somewhere around $1.6 million. Among other things, I am able to employ 11 Ohioans with that money. Now the research under these grants involves a number of different collaborative efforts, both inside and outside of OSU. You have a summary list of those things. I might mention, in particular, my research with Dr. Pierre Robitaille in the Department of Radiology. We are using magnetic resonance imagings to look at the internal portions of zebra mussels. This is a technique normally used for the diagnosis of human disease and we've expanded its purview somewhat to include zebra mussels. We are also doing electrocardiograms on zebra mussels with colleagues in Veterinary Medicine, and most days we have to wonder if a Proxmire award can be far behind.

Probably the most important aspect of my research is my work with students. Currently, I have 12 graduate student advisees -- that constitutes 8 Ph.D. students and 4 master students. I also advise and support 2 post-doctoral researchers. These people are the backbone of my research effort, and that has been quite productive. This year alone we are going to submit ten manuscripts to the top journals in my field. Each manuscript is about forty pages long, so that is 400 pages, or basically a book, every year. I have given 18 invited papers and seminars during the past year, and three of them were prestigious Sigma Xi lectures, which is the scientific honorary society. My students and I have also contributed 15 papers to international scientific meetings over the past year.
The student advising takes an enormous amount of time. This time is spent on one-on-one interactions with the students where we try to challenge the students to develop hypotheses; encourage them to explore new methods of testing those hypotheses; and basically help them acquire the capacity to distinguish between good science and bad science. Unfortunately, this is a very slow process. You have to allow time for the students to make mistakes, but the importance of that process cannot be overstated. It was one such mistake that resulted in our discovery that potassium can kill zebra mussels, and we have gotten several hundred thousand dollars in grant money to explore that "mistake."

We don't really have a name for this process other than calling it student-advising, but I would tell you that it is teaching and we do an awful lot of it. In any given week I probably spend 20 hours talking to my graduate students, and that is exclusive of the time I spend with my colleagues in these interdisciplinary efforts. Now it would go a lot faster and I would be a lot more efficient and productive if I could just higher technicians and post-docs to do this work. But if I did that, I should be working at Dow or DuPont. The critical and fundamental difference between industrial and academic research is graduate students and the teaching we do with them. So if we include that teaching effort in with my formal teaching effort load, I probably spend 30-35 hours a week teaching.

That brings me to the issue of workload in general. For the past few years, I have been putting in between 50-60 hours per week. During 1992, the average was much closer to 60 hours. During 1992, the average was much closer to 60 hours. During the month of April to have a baby. And although I had --

President Gee:

How many hours?

Professor Fisher:

Thirty-six. That was my time in the hospital.

President Gee:

That flew past me!

Professor Fisher:

Was that too much?

President Gee:

We'll have to talk about that!
October 2, 1992 meeting, Board of Trustees

PRESENTATION ON FACULTY WORKLOAD ASSESSMENT (contd)

Professor Fisher:

O.K. I did have eight months worth of sick leave stored up, but, unfortunately, I had to start coming in part-time after a week. Within two weeks I had to give a paper in Nashville, and I was back full-time within 3 1/2 - 4 weeks. During May to September -- this is my off quarter on a 9-month appointment -- I spent three to four days a week travelling to various research sites around the state. Also, since it took two days a week to handle what was happening in Columbus, inevitably one of my weekend days went into OSU, which I was happy to do. But the point is, I think, we are all working pretty hard. We are trying to do more with less, but unfortunately there are only so many hours in a week and this is how we allocate them.

President Gee:

I might note -- this is interesting -- Susan is being very modest -- the problem of the zebra mussel is a $14 billion problem for the state of Ohio. That is the impact along the shore of Lake Erie. Susan, with a very modest investment by University resources and state resources, has made a dramatic impact on that business. If we were to pay Susan -- as we would in the private sector -- some kind of a bonus for money she has saved the state of Ohio, she could take 36 years off to have a baby or anything else she wanted to do. This work is enormously important and has a direct impact on the quality of life and, more importantly, on the business activities of this state. I think, Susan, it would be interesting for you to explain your research and the mistakes that were made, which led to the discoveries you've made.

Mr. Skestos:

I wanted to ask you a couple of questions about teaching. Your teaching is a little different than Randy's. You're teaching more on the graduate-level in the research facilities, and you are working with these graduate students, so that is obviously teaching, too. You are enhancing them by participating with them. You mentioned that you are now teaching two courses per year, are those freshmen or graduate courses?

Professor Fisher:

I alternate years with two graduate-level courses, and my other regular assignment is a Biology 597 course, which is an undergraduate audience.

Mr. Skestos:

You teach that twice during the three quarters?

Professor Fisher:

I teach Biology 597 once per year and then I teach one of the graduate-level courses also during the same year. So that is two courses per year.
PRESENTATION ON FACULTY WORKLOAD ASSESSMENT (contd)

Mr. Skestos:

O.K. And how many graduate students do you have working with you in your research?

Professor Fisher:

Twelve students.

Mr. Shumate:

Susan, both you and Randy -- and maybe all of the speakers will get to this -- really raise the issue of how we define teaching or instruction. I think part of the misconception that has developed recently is that many people look at teaching and instruction as just the time in the classroom, but it really has a much broader definition. Do either one of you want to expand on that?

Professor Fisher:

I would have to simply agree with your statement -- that we teach every time we sit down with a graduate student, go through the data, and try to make sense out of what was done. To be honest, 90 percent of the time we are trying to figure out what went wrong and how we can correct it. I don't know what other label you could put on that besides teaching. Since I spend an awful lot of time doing that, I feel like I am contributing a lot to the art of teaching.

Professor Smith:

I will agree with that, particularly when you are dealing with large numbers of undergraduates in a class. This quarter for example I teach from 8:00 - 9:30 a.m. in a big introductory course. To go into that class -- and there is a full range of students in there from first quarter freshmen to graduating seniors -- most of them are freshmen and sophomores. Even if you are teaching that class on a regular basis every quarter, there still is a considerable amount of preparation going into getting ready for that class each day. You change the class as you go from quarter to quarter, because you don't necessarily teach the same thing all the time. There is a lot of preparation going on, and a tremendous amount of follow-up. You have 100 students for whom you are the principal instructor and they need a lot of follow-up -- whether it is grading their papers and getting them back quickly or whatever. So just to focus in on how many hours you actually are in the classroom each week is really doing a disservice to the teaching function. Teaching includes so many other components that most people wouldn't know anything about.

Ms. Cusack:

Do you feel that trying to get too much research done, or doing too many of those kinds of things, takes away from the time you spend on classroom activities and with students?
PRESENTATION ON FACULTY WORKLOAD ASSESSMENT (contd)

Professor Fisher:

I would have to say in all honesty -- yes. It was particularly acute when I was teaching a Biology 101 class with 500 students in it. If only 10 percent of the students wanted to see me any time during the quarter, then that soaked up a significant period of time. At times the logistics could be daunting. As always, and with most jobs, we are trying to achieve a balance and we do the best we can -- which is not to say we couldn't do better.

Professor Smith:

You have to accept that point, I think, often grudgingly. It takes awhile to accept it. In the beginning you want to be doing all things at all times for all people, and it just doesn't work that way. If you have a big teaching assignment in a particular quarter, as I do this quarter for example, that means something else is going to give somewhere. It is up to me, in terms of my faculty responsibilities, to make sure that what gave this quarter gets picked up again in another quarter when my teaching responsibilities might not be as heavy. Once you are on the faculty awhile, you learn how to start balancing these more effectively. But I think it is an appropriate question and a valid one.

Mr. Skestos:

As I am listening to both of you speak, you are teaching me a little bit about teaching. In other words, teaching is not necessarily just going into the classroom where you have 20 or 30 or 50 students. You can be teaching, obviously, in research -- because there you are educating and developing graduate students so they themselves can go out and hopefully do some of the things that you are doing now with other students. So, really it depends upon the course, the type of course, and what activity within that field that you are doing. Whether you are in the classroom or laboratory, you are still teaching in many cases.

President Gee:

George, I think that is one of the hardest concepts that we have to get across in the University setting. I often use as an analogy -- we have had an ongoing discussion with our students regarding the issue of semesters and quarters. Well we certainly have had it with our faculty, and I can say that that is split. We have decided not to pursue that as aggressively, simply given our budgetary problems. Our students are strongly in favor of the quarter system, because that is what they have known their whole lives. So very often when people think of teaching they think of it within the four corners of public education. This is not to detract from public education, because they do a very important teaching function. But their responsibility is simply to pass on knowledge in some appropriate way and to stimulate young minds.

You have to understand that 80 percent of the basic research in this country is done at universities. We are not the Japanese, we are not the Chinese, we are not the Russians, we are not the Germans -- where they have these research activities that take place in centers and institutes that are not based in universities. Eighty percent of the basic research in this country is done in universities -- 80 percent of that research is done at 50 universities. So we have 3,600 colleges and universities
in this country and almost all of the creative activity in this country takes place within a small confine of about 50 universities -- of which Ohio State is one of them. So when you think of teaching in this University, you have to think of it in the context that we have a double responsibility in terms of the national commonwealth. One is the creation of knowledge, which takes place in Susan's laboratory and Randy's geography program as he is working with these students, and then passing it along.

We need to work very hard to get people to understand that if we are going to be competitive as a nation, someone needs to come up with new ideas. It is the issue of that teaching with those graduate students that stimulates that. So my view is fundamental teaching -- because it is the creation of knowledge and then the passing of that knowledge -- that is so enormously important and fundamental to the enterprise.

I also use the analogy that if we only judged a preacher by the time he spends at the pulpit, he doesn't work very hard -- or legislators by the time that they spend on the legislative floor, they are not working very hard -- or university presidents by the time they spend at university trustees' meetings, they are not working very hard. But as you well know as a trustee, there is all that comes in and then goes out which is all a learning and a teaching function. We need to do a good job at explaining this. Again in the confine of those 50 universities, this is where the future, in terms of the creative spirit, is being developed. If we lose that, we lose our capacity to compete.

Ms. Cusack:

I just want to say that I thought Randy brought up a really good point about a faculty workload policy, when he talked about balance. I think that is the important part right there. If the research is taking away from their time to work with students, that is where the problem is. The timing and balance are the most important --

President Gee:

That really is what Nancy and everyone is looking at -- how do we bring about that balance so we don't lose that competitive edge? But, also, that the student is the primary focus of that passing of knowledge side which comes from the creative side, so that the two of them combine better.

Mr. Celeste:

Isn't there a secondary issue? We are talking about what constitutes teaching. Another concern of folks -- looking from the outside or sending their kids to school - - is who is teaching? One of the issues would be -- Randy, for instance you are coordinating 8 or 9 classes -- who is teaching those courses?
October 2, 1992 meeting, Board of Trustees

PRESENTATION ON FACULTY WORKLOAD ASSESSMENT (contd)

Professor Smith:

About half of those courses are taught by faculty in our department and the other half are taught by our senior Ph.D. students. I can speak just from the point of view of my own department, but we have had a policy in our department that all faculty are involved in all levels of teaching. We have always been quite proud of that as a department. I am at the associate rank and I am teaching this level -- so are assistant professors, and professors who have been in the department for 20 or 30 years. So the whole range of us are teaching virtually at all levels. In that particular case, about half are faculty and half are senior Ph.D. students.

Dr. Jennie T. Nickel:

Nancy suggested that I enter the discussion regarding the integration of teaching, research, and service. I will also discuss who is teaching the classes. I am Jennie Nickel and I am with the College of Nursing. I have been here six years and I, like all the faculty members in the College of Nursing, teach undergraduates as well as graduates.

We have an undergraduate level course taught every quarter of the year that has 45-50 students per quarter. They are all out in the community working with about 35 different agencies. This business of trying to find clinical placements for each student -- two clinical placements each quarter -- really drives a lot of what we do as far as research and service as well.

I would like to give a couple of examples of this: one has to do with what you see on my handout -- the research on pediatric immunizations. I did bring the article that was in today's Dispatch. Believe me this was coincidental, we did not do this intentionally.

We did the research that was drawn on in this article, in terms of detecting the immunization level of two-year olds in Franklin County. We did the initial survey of mothers of two-year olds, and also an additional study was done by the Ohio Department of Health looking retrospectively at immunization records of children at school entry. The point that I wanted to make was we came into this from the research dimension. It was initially a project funded for Steve Loebs in Hospital and Health Services Administration. He asked Pam Salsberry and I, in the College of Nursing, to do the piece on pediatric immunizations. We decided we would go ahead and survey these preschoolers -- we didn't think that they were getting what they needed to have. We used some of the masters students to help us conduct this survey and we were shocked at what we found. The service dimension comes into play now because the Health Department used this information to get funding for a mass immunization campaign to try to get our preschoolers immunized. We will come back in now, using our undergraduate students to staff some clinics. So I think that is an illustration of how research, education, and service can all work together and build on each other. We will also use the study design with our graduate students in terms of trying to help them understand how we do this kind of work in reality.

As far as who is teaching our students -- in the theory piece we have tenured faculty, or faculty on the tenured track, doing all of the lectures. We have graduate students doing much of the clinical supervision in the community agencies, strictly
Dr. Nickel: (contd)

because we have them out in so many places: doing home visits; working in clinics; working in industries; and working in schools. We are then able to use our graduate students, all of whom are registered nurses and baccalaureate graduates, in small groups to give our students some extra clinical supervision. That is the way we operate in the College of Nursing.

Professor Rudd:

Any other questions for these people? Bruce has now been able to join us from his class. Bruce --

Dr. Bruce E. Bursten:

I apologize for being late, but I bring you greetings from 60 extremely bright freshmen in honors general chemistry. When Nancy approached me about this and I saw I had the class conflict, I told her that my students were more important than the Board of Trustees, but that I would get here late.

I don't know what Randy said and I only heard part of what Susan said, but I can echo some of their thoughts. I am from the Department of Chemistry and I want to make the point that the Governor's misinformation notwithstanding -- we are a nationally and internationally renowned department. Some of us were very sensitive to the editorial in The Dispatch some months ago.

The typical classroom teaching load in the Department of Chemistry is one course each quarter per faculty member. One gets very use to answering questions from alumni and friends who happen to have gone to Ohio State that say, "What do you do with your other 37 hours a week when you are only in the classroom for three hours a week?". And my usual response is, "God, I only wish it were 37 hours a week that I had!"

As you can see by my breakdown, which is reasonably accurate, it is very hard to come up with good numbers since the activities that we do are so varied. There is a lot of our activity that is involved in teaching that is outside the classroom. I have the feeling that I am just repeating what my colleagues have said. Classroom teaching is a great joy. I think that anybody who becomes a faculty member at a university must love to teach in a classroom -- that is obviously one of the goals that we want to achieve. People that don't want to teach in the classroom, probably shouldn't be faculty. That is one of the problems, I think, that face us. There is a misperception, I think, among a lot of people that "professor" is just a name given to a teacher who happens to work at a college or university. I think there is a lot more to that. Dr. Gee made the point about knowledge and, I think, that is what really ties us together -- the deep love of knowledge -- both the uncovering of new knowledge and the dispensing of old and new knowledge. That is what we try to do.

Currently in my lab I have a junior chemistry major who was a student of mine in honors general chemistry two years ago. He got interested, he got excited, and he wanted to do undergraduate research. He is doing great stuff with computer graphics in chemistry right now and this is even before he has had the courses that
really he should have had to do this work. He is just enthusiastic and bright enough to do this.

We have a first-year graduate student who came out two summers ago from Trinity University. He spent the summer doing research with us under the auspices of our research experience for undergraduates program that we have in the Department of Chemistry. He was subsequently awarded a National Science Foundation predoctoral fellowship and chose to come to Ohio State over Berkeley, Stanford, Cal-Tech, and Chicago. That is what we like to see happening.

In terms of my activities -- I love teaching and I love research. You have undoubtedly heard about the linkage between research and teaching -- that we need to do research to be good teachers, and we need to teach to be good researchers. There is no doubt about that, but also don't doubt that there is a tension in what we do. Every time I do more, in terms of classroom teaching, that time has to come from somewhere. It comes from research. Every time I get more ambitious in our research program, that might cause me to cut a corner or two in the classroom. I don't want that to happen. Is it the case that if I did more classroom teaching, I would be more effective as a teacher? The answer is yes. If I did more research, would I be more effective as a researcher? The answer is yes. In either of those cases though would I be a better professor? I don't think so. I think that at a major research institution like Ohio State, we have to intertwine these activities, we have to force the faculty to try and do everything. We really do. It is hard to turn down committees. You don't want to see the University run in a poor fashion, and some of us get called on to try and make it a better place.

I look at just my activities for today. I will be going from this meeting to meeting with a graduate student from the University of Wisconsin who is just finishing up his dissertation and wants to come to Ohio State as a post-doctoral fellow. Again, that is the sort of thing, I think, Susan was making the point about post-docs -- do we view that as a teaching function? Well, post-docs from my group are now teaching at institutions such as Illinois State University, and they are sending undergraduates from Illinois State to do graduate work at Ohio State. They end up giving a broader perspective to our undergraduate students through either teaching assistants or colleagues in the lab, and I think we really broaden the base of what we see at Ohio State. After that, I am going to be sitting on the final oral examination of one of our Ph.D. students from Ohio, who has completed a very nice dissertation. After that, I have some committee work to do, and after that, as I have put on my breakdown, I would really like to have a few minutes to think about science. The hardest thing, with all of the activities, is to find the free time that one was used to as a graduate student and a post-doc to just think about science. I think that it is something we are all trying to work with.

To point out one other thing -- I go back to this shock that people feel sometimes when they hear about our teaching load in chemistry; they describe it as shockingly low. The University of Chicago, where I was an undergrad, was also on the quarter system. Chemistry faculty there teach only two out of the three quarters a year -- one course per two quarters. So our classroom teaching load is 50 percent larger than that at the University of Chicago. I think this also tends to be somewhat market-driven. The standard teaching load in research-intensive departments, like
Dr. Bursten: (contd)

chemistry, is one course per term or less. I'm not sure if that is right, but that is what it takes here in order for us to be competitive on the research side, and I think that is what Ohio State wants.

Mr. Skestos:

In listening to all four of you, I have sort of narrowed it down and I want to see whether I'm right in my own mind. You are all saying, essentially, that you feel teaching -- that the amount of time you are spending should be somewhere around 50-55-60 percent. You are saying that teaching is not necessarily just the time in the classroom, but it could be working with your graduate students, preparing for them, etc. You are also saying that you can't be a good teacher unless you are also doing research -- coming up with new things so that you can present those to the students. So your research is as important to teaching, as your teaching is to your research. So they work hand-in-hand. You can't just go out and teach all of the time and be a good professor in the University. You need to balance the time for research and teaching so that you are a better teacher. Is that right?

Dr. Bursten:

That is very much the case. We sometimes view classroom teaching without realizing where do we want the students to end up, especially our undergraduate students. In the classroom teaching we are trying to dispense knowledge, but I would like to think that we do more than that. I would point out that -- again, I choose my undergraduate chemistry majors as people I like to use as examples -- one of my students, from a few years ago, is currently a Department of Defense Fellow in the Department of Chemistry at Cal-Tech pursuing his Ph.D. A student from Akron, Ohio, a few years ago, also did a Ph.D. at Cal-Tech and is currently working at Eastman-Kodak. Both of these students did research in my lab and came in thinking about doing something other than chemistry. Now I am as strong a proponent for chemistry as I am a proponent for Ohio State, so I love to see this. This is something I love dearly.

A student from one of my first year's here, came in thinking she was pre-med, got very interested in chemistry and is currently a faculty member at a small liberal arts college in Michigan. I absolutely adore seeing that. At the same time, I love getting what I got in the mail about a month ago, which was a postcard that showed the U.S. Olympic diving team. One of the members of that team, Karen LaFace, was a student of mine in Chemistry 122. She stayed in close touch and was coming from Barcelona to start medical school at the University of Pennsylvania. That to me is just as satisfying as getting a big grant from the National Science Foundation. But I don't want one without the other, and I don't think I would do either job as effectively without both of those.

President Gee:

George, I just want to add one modest caveat to what I think was a very good description you gave, and this goes to the differentiation among colleges and universities. If these were faculty members at Williams College or at Amherst or at Dennison University and they came in and said what they said to you, that would
President Gee: (contd)

be wrong because the responsibility in the small liberal arts college is to have that intensive teaching atmosphere.

Why, therefore, does the student not come to Ohio State? Well, first of all they want to be taught well, and I think, by every evidence that we have, we are teaching very well and getting better at it. We are putting a lot of emphasis on that in terms of recognition and substantive changes in that regard. The Office of Academic Affairs, Randy's committee, and several others are looking at that. But the reason they come is the fact that these four are examples of 4,000. The students have a unique experience -- in that small group of institutions -- to be involved with people who teach well, but people who are teaching well because they are also informing themselves in the frontiers of knowledge -- which is a unique experience. So, many of our students are being taught by people who are literally moving ideas from the laboratory right into the classroom. Bruce's books that he writes are the ones that are being used in the K-12 school, or in Williams, or at the other places. That differentiation is important.

One of the things that concerns me very much, is that we have too many institutions. I think when we look out there and we talk with our friends in the legislature and elsewhere, universities unfortunately are viewed as fungible commodities. We are all viewed like McDonald's hamburgers -- that everyone has the same pickles, lettuce, onions, and so forth. They shouldn't have -- and they don't have that in reality. When we try to make institutions look alike -- instead of that differentiation so the students have choice and an opportunity for a different kind of experience -- then we make a mistake. So it is very important for us to make certain that we, as one of this country's major teaching -- as we say in our mission -- and research universities -- that we are different from others. We are in that small group that has that different role and people understand that when they come. That is what makes us unique.

Dr. Nickel:

I would just add another thing. We have undergraduate students doing community assessments and setting up a data base with information about vital statistics from census information and from their own observations about health status and health services in each census track in Franklin County. Then they enter this on the computer. We are really developing a computerized data base which is unique -- there is not one out there. It allows us then to aggregate census tracks to look at certain neighborhoods.

We set this up as a project that involved more than one college of nursing here in the county. What happened was the others kind of faded away and we went ahead and did it. I think that the issue was skills and research skills. We had the research skills to go ahead and do it, and our students had the benefit of participating in that project. The students at some of the other colleges did not, because their faculty really didn't have that kind of expertise. So when I look at what the students are getting coming through our program, it may be that our tuition is less, but my sense is that our students are getting more than they might in some of the other places.
President Gee:

Mr. Chairman, it strikes me that this is such an interesting subject that we may want to have the opportunity to have more of these open discussions regarding these types of issues. I think our time is slipping away and unless there are further questions, we might want to move along.

Mr. Shumate:

I have one general question which we might get asked. Listening to the four of you, you represent the University excellently. You articulately set forth the balance between teaching and research and you also have public service. How representative, if this is a fair question, do you feel you are of the faculty in general of this University?

Professor Smith:

Does it mean that everybody on the faculty has the same kind of record in these three areas that all of us do? The answer is no. But my experience -- I have done a lot of work across the campus and on different kinds of committees. I know an awful lot of faculty outside my own college. One of the great experiences for me in coming to Ohio State and staying here has been the ability to interact with a set of people who really think -- outside of my own department, outside of my own college -- the same way I do about being a professor.

When you make the decision to become a faculty member you are really looking at combining teaching with research. You want to be a teacher. One of the frustrating things for me is when people say, "You are not doing enough teaching," and "undergraduates aren't being taught enough." I know that part of my responsibilities is teaching, and I know that I became a professor, in part, to be a teacher. And I know that most of the other people that I work with did the same thing. But at the university-level, you have to combine that with research. So, does everybody have the same record as we do -- no. But most people that I know -- I think a really increasing number at the University -- think the same way we do about these three kinds of activities. There may be some slight alterations in the research, teaching, and service components in any one quarter, and, then, changing again by quarter. I think if you went around the campus, you would find people who have records very much like ours. And if I didn't think that way, I would tell you that, too.

Dr. Bursten:

I agree with Randy. I have been fortunate enough to get teaching awards while at Ohio State. I think I am lucky enough to have a natural style in the classroom that just comes to me, and I won't deny that I work hard, because I do. But I see my colleagues -- again, I will go back to the comparison in Chicago, which was a department that was very good to me, but I had some really god-awful teaching. There were people in the classroom who despised it and especially despised being in front of undergraduates. There are, I believe, no faculty in the Department of Chemistry who do not teach undergraduates at some point during the year. It is not something that we look at as an odious task. In my case, I am teaching honors general chemistry this quarter; I am teaching general chemistry next quarter; and I am teaching an 800-level graduate course in the third quarter. It is a joy. I love the variety and I think most of us do. Certainly there are times when my colleagues
and I get over burdened. And we can go around and gripe about, "Oh my goodness, I"

PRESENTATION ON FACULTY WORKLOAD ASSESSMENT (contd)

have yet another lecture to give and I have to write a quiz, then an exam and all of

that!" It sounds as if we are being unenthusiastic about teaching in the classroom.

I would just ask you to look at everything that you do and find yourself in the same

situation. Are we representative -- I have the feeling we weren't quite randomly

selected. But would it be hard to come up with another panel of four faculty, or

another thirty panels of four faculty, or perhaps even another 100 panels of four

faculty? I don't think so.

Mr. Celeste:

I just wanted to say thank you, Jack, for putting this together and seeing that it was

in this form. I think the challenge for us now, as a Board and a University, is to

have this same message shared with the larger public. Too often the dialogue may

stop here. I think it is important, and we have learned a lot and I think we need to

find ways to share it.

Mr. Kessler:

Joan or Nancy, do either of you want to add anything further?

Professor Rudd:

I would just like to thank you, very much, for listening to us. We really appreciate

the opportunity.

Dr. Huber:

I'm just proud of everybody here. I think they gave the message very well and the

message is that at comprehensive universities you have to do both research and

teaching. I think among the four of them they expressed very well the

complicatedness of that kind of balance and why it is important to do.

Mr. Kessler:

Thank you, Joan. Thank you, Nancy. Thank you all, very much. We are also

proud of you and appreciate it.

ESTABLISHMENT OF NAMED CHAIR

Resolution No. 93-34

Synopsis: The Academic Affairs Committee recommended the approval of the establishment of a

named chair.
ESTABLISHMENT OF NAMED CHAIR (contd)

WHEREAS in accordance with the guidelines previously established by the Board, the J. T. "Stubby" Parker Chair in Dairy Foods Fund was established February 2, 1990, through funds received by the University from Thomas L. Parker in memory of his father, J. T. "Stubby" Parker; and

WHEREAS the funding has now reached the level required:

NOW THEREFORE

BE IT RESOLVED, That the annual income from The J. T. "Stubby" Parker Chair in Dairy Foods shall be used to support the work of a distinguished professor whose research, teaching, and public service focus on stimulating new research into the chemical, microbial and/or engineering phases of the dairy foods industry. Appointment to the chair shall be recommended by the Vice President for Agricultural Administration and approved of The Ohio State University Board of Trustees.

Upon motion of Mr. Kessler, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

PERSONNEL ACTIONS

RESOLVED, That the personnel actions as recorded in the Personnel Budget Records of the University since the September 2, 1992 meeting of the Board, including the following Appointment, Change in Title, Appointment of Chairpersons and Director, Leaves of Absence Without Salary, Professional Improvement Leave--Cancellation, Professional Improvement Leave--Change in Date, and Rejection of Notice of Appointment, as detailed in the University Budget be approved.

Appointments

Name: THOMAS L. PAYNE
Titles: Director/Associate Dean/Professor
Center/College/Department: Ohio Agricultural Research and Development Center/Agriculture/Entomology
Effective: January 1, 1993
Salary: $119,748.00
Present Position: Professor and Head, Entomology, Virginia Polytechnic Institute and State University

Name: JILL K. MORELLI
Title: Assistant Vice President and University Architect
Office: University Architect's
Effective: October 1, 1992
Salary: $72,300.00
Present Position: Senior Architectural and Project Administrator Dade County (Florida)
Public: Schools, Miami, Florida
October 2, 1992 meeting, Board of Trustees

Leaves of Absence Without Salary

LINDA ZWINGER, Associate Professor, Department of English and Center for Women's Studies, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993, to teach at the University of Arizona.

FRANCIS A. LONGSTAFF, Associate Professor, Department of Finance, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993, to serve as visiting professor at UCLA.
Leaves of Absence Without Salary (contd)

HOWARD B. FLEETER, Assistant Professor, School of Public Policy and Management, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993, to provide research support for the Governor's Education Management Council.

JACQUELINE M. HARA, Assistant Professor, Department of Spanish and Portuguese (Newark Campus), effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993, to complete her book on Goya.

JENNIFER TERRY, Assistant Professor, Division of Comparative Studies, effective Autumn Quarter 1992, to accept a Humanities Institute Fellowship at SUNY Stony Brook.

Professional Improvement Leave--Cancellation

W. C. BENTON, Professor, Department of Management Sciences, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993.

Professional Improvement Leave--Change in Dates

NEIL E. SMECK, Professor, Department of Agronomy, change dates from October 1, 1992, through September 30, 1993, to November 1, 1992, through September 30, 1993.

Recision of Notice of Appointment

The Notice of Appointment dated July 10, 1992, covering the Academic Year 1992-93 which was issued in error to Assistant Professor Amarendra Sinha is hereby rescinded.

Upon motion of Mr. Kessler, seconded by Amb. Wolf, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

RESOLUTIONS IN MEMORIAM

Resolution No. 93-36

Synopsis: The Academic Affairs Committee recommended the approval of two Resolutions in Memoriam.

RESOLVED, That the Board adopt the following Resolutions in Memoriam and that the President be requested to convey a copy to the families of the deceased.

Agnes B. Flanagan

The Board of Trustees of The Ohio State University expresses its sorrow upon the death, June 3, 1992, of Agnes B. Flanagan, Instructor Emeritus in the University Libraries.

Agnes Flanagan was born January 1, 1900, in Hartford, Connecticut. She received her Bachelor of Arts degree from Colorado College and the Bachelor of Science in Library Science from Simmons College, Boston, in 1927.
RESOLUTIONS IN MEMORIAM (contd)

Agnes B. Flanagan (contd)

Before joining The Ohio State University Libraries staff on December 1, 1931, she was a Cataloger at the University of Iowa from 1927 to 1931. In addition to her work here in the Catalog Department, she did original cataloging for the Grove City Public Library, taught cataloging, classification and reference work at Gonzaga University, and was a consultant and advisor at St. Euphrasia School, Columbus, Ohio. Ms. Flanagan served on numerous Library Committees, and in general was an active and highly valued contributor to the life of the Libraries. Professionally, Ms. Flanagan was a member of the American Library Association; Catholic Library Association; Iowa Library Association; Iowa City Library Club where she served as Secretary-Treasurer; Ohio Valley Group of Technical Services Librarians, where she served as Secretary-Treasurer; Ohio Library Association, where she also served as Secretary; and the Franklin County Library Association.

One of Ms. Flanagan's strongest and valuable attributes was her extensive knowledge of the Library of Congress Classification system. She assisted many beginning catalogers in understanding this complex system.

Ms. Flanagan was a member of the Third Order of the Carmelites.

On behalf of the University, the Board of Trustees expresses its deep sympathy and sense of understanding in this loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees.

Eugene Willard Green

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on August 16, 1992, of Eugene W. Green, Professor Emeritus in the Department of Psychiatry.

Eugene Willard Green was born on June 29, 1907, in Patterson, New Jersey. He received his Bachelor of Arts degree from Columbia University in 1928. In 1931 he graduated from Cornell Medical School with the Doctor of Medicine degree and the Gustav Seligman award for academic excellence. In 1933 he received a special citation from the National Board of Medical Examiners for obtaining an exceptionally high score on the National Board Examination. His postgraduate specialty training included two years of internal medicine at St. Luke's Hospital, New York; two years as chief resident in neurology at Bellevue Hospital in New York; and three years of psychiatry with the United States Public Health Service. His clinical competence in both Neurology and Psychiatry was certified by the American Board of Psychiatry and Neurology.

During his neurology training, Dr. Green was an instructor in Neurology at Bellevue Hospital and New York Medical College. He was then employed as a psychiatrist by the United States Public Health Service until 1961, except for a period in the medical corps of the United States Navy from March 1943 through June 1946. From 1949 through 1955, he was Clinical Director and Chief of Psychiatry at the USPHS Hospital in Fort Worth, Texas. Simultaneously, he was an associate professor of psychology and lecturer at Texas Christian University. From 1955 through 1961, he was Chief of Psychiatry and Director of Psychiatry Residency Training at the USPHS Hospital in New York.

Dr. Green arrived at The Ohio State University in 1961, receiving joint appointments as Associate Professor of Psychiatry and Clinical Associate Professor of Neurology. He acted as Director of the Residency training program in psychiatry from 1961 through 1966. In 1965 he was appointed Chief of Inpatient Psychiatry, and he continued in this position until his retirement. He was promoted to
RESOLUTIONS IN MEMORIAM (contd)

Eugene Willard Green (contd)

the rank of Professor of Psychiatry in 1968. He was designated Professor Emeritus of Psychiatry upon his retirement from the regular faculty in 1977. For several years following his retirement he remained a familiar figure in the University Hospitals environment as he continued clinical work with psychiatric outpatients and with evaluations for the Social Security Administration. He also worked as a consulting psychiatrist for the Columbus Area Community Mental Health Center from 1977 through 1981.

Dr. Green was loved and respected by his patients, students, employees, and colleagues. In appearance and manner he reminded one of the stereotypic old-fashioned doctor who inspired his patients with trust by his warmth and attentiveness, and hope by his warmth and empathy. He was a characteristically soft-spoken, courteous, humble, and gentle man. His students and colleagues knew him as an academic psychiatrist whose teaching and practice of psychiatry were well-informed and thoroughly modern.

On behalf of the University, the Board of Trustees expresses condolence to Dr. Green's family. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Upon motion of Mr. Kessler, seconded by Mr. Colley, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

FISCAL AFFAIRS COMMITTEE MEETING

BUDGET UPDATE

Mr. Shumate:

We will begin our Committee meeting this morning with a report from Vice President Shkurti on an update on the budget.

Mr. Shkurti:

Thank you, Mr. Chairman. If the Board members would turn to the briefing sheet entitled, "Process for Offsetting an Additional $7.5 million Reduction in State Support," that is where I will begin.

When the Board approved the budget resolution in July, you approved immediate reductions of $23 million that have since been implemented. We also agreed to look for up to an additional $10 million by the middle of the fiscal year. After the budget was passed, you may recall the State raised its tuition cap from 7 1/2 percent to 9 percent, and you authorized the President to raise tuition accordingly if the caps were raised. That was done, and it provided the University with an additional $2.5 million above what was planned on in income at the time the budget was passed. So what was a potential problem of $10 million is now a potential problem of $7.5 million, because of the additional $2.5 million in tuition income. But $7.5 million is still a great deal of money. The purpose of this sheet is to show you the principles of the process for a plan on how that money will be made up between now and the middle of the year.
Mr. Shkurti: (contd)

So let me now talk first about the principles. Seven and a half million dollars is equivalent to additional reductions on the average of 2 percent to all of our academic units and academic support units. That may not sound like a lot of money, but, again, it is on top of the reductions that all of our units have already suffered in one way or another. We feel to do the reductions in this way -- which we might call the "business as usual way" -- would cause further harm to the University and to our academic core. Our thought is to find a way to come up with the $7.5 million without taking it from the academic core. Now that means other functions -- although they may not be defined as part of the academic core -- are still very important or beneficial to the University. But when we are forced with tough choices, tough decisions imply some very difficult decisions need to be made. Whatever we do, it needs to be developed consistent with the University governance process. We always need to keep in mind, especially in this environment, that our budget is very fluid. We don't know what the 14th day in enrollment count is, which will in turn determine our subsidy and tuition numbers. We don't know what the state will do; there is always the possibility of additional cuts in this kind of economy. So at this point we are working on an estimate. The amount we may finally need may fluctuate up or down depending on fall enrollments and what happens with state subsidy.

The process is laid out for you in the next section --

Mr. Shumate:

Before going on, why don't we see if there are any questions from the Board on the principles that are laid out in our briefing booklet. Are there any questions or comments?

Amb. Wolf:

Bill, just to bring into focus for myself -- the reduction imposed upon us for the 1992-93 academic year was $23 million?

Mr. Shkurti:

The entire reduction is $33 million; we have already come up with $23 million. That left $10 million at the time the Board resolution was passed. We have picked up another $2.5 million from tuition, so we have another $7.5 million we have to --

Amb. Wolf:

The total was $33 million for academic and non-academic --

Mr. Shkurti:

That is correct.
October 2, 1992 meeting, Board of Trustees

**BUDGET UPDATE (contd)**

Mr. Shumate:

Any other questions? Again, I think the important point to focus on is that these reductions will not touch the academic core, which is our central goal and main operating principle.

Mr. Shkurti:

That is correct. Thank you, Mr. Chairman. I would also point out that was our operating principle in the first round of cuts. And, obviously, the deeper we cut into our income and expenditures, the more difficult it is to find things that aren't part of the academic core. But I think we all agree that we are going to have to make an extra effort over the next remaining months.

The next section of this briefing sheet lays out the process. We are using the month of September -- and I would include with this the first couple days of October -- to lay out these principles and processes not only to you, but to the other parts of the University's governance structure. In most cases these meetings have already been held. Then through the months of October and November, if you are comfortable with this process and principles, the various administrative vice presidents of the University, with assorted work teams, will work on these target areas to find ways to achieve the savings. Then in December we will report back to you. We will also do a revenue and expenditure update for you so it will be ready before the February Board meeting. Then we will share a formal proposal with you in advance of the February 5 Board meeting, and if any kind of vote is necessary, it will be done at that meeting. I think that complies with the intent of the Board resolution, which is to have these cuts worked out and available to you by mid-year.

Now, if you turn to the second page -- we list some target areas that we are thinking about looking at. If we don't want to cut further into the academic core -- and that is the major part of what we spend money on -- there isn't a whole lot left. But the part that is left bears close scrutiny. There are three general areas we picked for starting points. The first is benefits administration and I need to stress administration. This would be savings from improved administration of our existing insurance programs, not reductions in the benefits offered, which are set through, in some cases, collective bargaining and in many cases through Board policy. It is not our intent to cut back the benefits that have been provided by the University, but to see if by changing the way we administer these programs, we can come up with savings.

In the case of the University's health insurance plan we are looking at expenditures of $20 million a year alone in that plan. Higher health insurance costs are a problem everywhere in the country. We feel however, that we have an opportunity -- given that most of the providers of health care to University faculty/employees are themselves part of the University -- meaning University Hospitals and our physicians -- to perhaps find some additional savings.

The second area is revenue increases and other ways we can take assets we already have and improve the yield from them. This might include land the University owns, but there are other assets as well. I will talk about those in a minute.
BUDGET UPDATE (contd)

Mr. Shkurti: (contd)

The third would be targeted spending reductions, meaning very selective reductions that could include selective reductions, consolidation or elimination of academic or academic support units or administrative structures, again, consistent with the University governance process. It is very easy to list target areas on a piece of paper. The hard part and the challenge that we face will be working through and having something that makes sense and that provides tangible and measurable savings in the time period provided. So as the year moves on, we will continue to update you as to the progress we hope to make. But these will be the three areas we will be looking at initially.

The other thing I would like to mention, Mr. Chairman, is that we have assets other than land that are very important and one of those is our athletic program. At most universities the athletic program is a drain on the general fund. At this University the athletic program makes money for the general fund. Jim Jones is always quick to point out to me whenever he sees me that, in fact, Athletics already provides $2.3 million in revenue to the general fund on a continuing basis. This is one of the areas we have been looking at. Athletics runs on the different seasons that our teams participate and we have a basketball season coming up. As a result of the timing issues, Mr. Chairman, if it is agreeable to you, I would like to move to the issue of a surcharge on athletic tickets if that is acceptable.

Mr. Shumate:

That is acceptable with me. Before doing that, are there any questions on either the process that is laid out or the targeted areas? O.K.

Mr. Shkurti:

Thank you, Mr. Chairman. If the members of the Board will look at a document called, "Surcharge on Basketball Tickets," it is a one-page resolution and I will begin with that. Dr. Spillman will also assist me in sharing with you what our thinking was on this particular issue.

The first whereas clause simply relays the fact that the University has absorbed nearly $80 million in cuts since January 1991. It points out that we have already taken $23 million in reductions in July 1992; that the Board resolution provided for up to an additional $10 million, which I explained is now $7.5 million as a result of the increased tuition; and that further reductions to academic departments and student services would cause additional hardships to our students, faculty, and staff. I don't mean to imply that any kind of surcharge on basketball tickets or any other kind of athletic program would not be a hardship. Somebody is going to be paying more money out of their pocket than they otherwise would, and in many cases it is our own faculty and staff. But when we look at the alternatives, we feel this makes a lot of sense. So one of the revenue options we considered was an academic surcharge on tickets for athletic events -- in this case, particularly, for basketball, because the tickets do need to go out shortly.
BUDGET UPDATE (contd)

Mr. Shkurti: (contd)

The Vice President for Student Affairs and the Department of Athletics have been cooperative in helping us do some projections. We feel that if we do the kind of surcharge that is mentioned here on basketball tickets, it will bring an additional $450,000 into the University this year. At this time, I would like to turn the microphone over to Dr. Spillman, who will explain the details of what we are proposing and what process we went through.

Dr. Spillman:

Thank you, Bill. After discussions with the President's Executive Committee and members of the Athletic Council, we are recommending a $2.50 surcharge on basketball tickets for the 1992-93 season. What this means is that for the 1992-93 basketball season the cost of a ticket sold to the public will be $15.50; $13.00 of that $15.50 will be for the ticket and $2.50 will be for an academic surcharge. The cost of a faculty/staff ticket will be $13.00; $10.50 for the ticket and a $2.50 academic surcharge. We are recommending that there be no surcharge applied to the price of a student ticket. The student ticket price would remain at $5.00 per ticket.

The income from this academic surcharge on public, faculty, and staff tickets will be used to protect high-priority academic programs, such as high-demand courses and student financial aid. At this time, the surcharge applies only to basketball tickets and only to the upcoming 1992-93 season. The surcharge will be reevaluated and depending upon the University's future financial situation, it will be determined whether a surcharge should be applied to other sports such as football, or extended into later athletic seasons beyond 1992-93. That is our recommendation.

Mr. Shumate:

Are there any questions? Just to be clear, this is an academic surcharge?

Dr. Spillman:

Yes, an academic surcharge.

Mr. Shumate:

And it will not apply to students?

Dr. Spillman:

That is correct.

Mr. Shkurti:

Mr. Chairman, I think it is important that I point out what this language means. This will enable us to protect high-demand courses and student financial aid from any adverse impact of additional budget cuts as we try to come up with this additional $7.5 million. So we still have other work to do, but this is an important starting
October 2, 1992 meeting, Board of Trustees

BUDGET UPDATE (contd)

Mr. Shkurti: (contd)

point. We have particularly directed those two areas that I mentioned as part of what we want to protect.

President Gee:

One other point -- our basketball ticket prices do not require revenue sharing with the Big Ten as do our football tickets. Therefore, all of the dollars generated from the academic surcharge will go directly into the academic programs. There will be no sharing of those dollars with any of our other institutions in the Big Ten.

Mr. Shumate:

Any other questions? Dr. Spillman, you indicated that you talked to the Athletic Council and to the Athletic Director, have you also spoken with the coach?

Dr. Spillman:

No, I have not.

President Gee:

The coach has been spoken to.

SURCHARGE ON BASKETBALL TICKETS

Resolution No. 93-37

WHEREAS The Ohio State University has absorbed nearly $80 million in cuts in its state aid since January 1991; and

WHEREAS $23 million in General Fund Budget reductions were applied to academic departments and other General Funds supported units in July 1992 to partially offset these reductions in state support; and

WHEREAS the July 1992 budget resolution provides for additional General Fund expense reductions or income increases of up to $10 million before February 1993; and

WHEREAS further budget reductions to academic departments and student services would cause additional hardship to students, faculty and staff; and

WHEREAS among the revenue options which have been considered is an academic surcharge on tickets for athletic events; and

WHEREAS the President’s Executive Committee, along with the Athletic Council, has been consulted regarding this proposal:

NOW THEREFORE
BE IT RESOLVED, That consistent with financial needs of the University it is recommended that a $2.50 academic surcharge be added to the cost of each ticket for 1992-93 basketball season. Specifically, for the 1992-93 basketball season, the cost of a ticket sold to the public will be $15.50 ($13.00 ticket price, plus $2.50 academic surcharge); the cost of a faculty and staff ticket will be $13.00 ($10.50 ticket price, plus $2.50 academic surcharge). No surcharge will be applied to the price of a student ticket. The student ticket price will remain at $5.00 per ticket.

BE IT FURTHER RESOLVED, That the income from the academic surcharge shall be designated for use by the University to protect high-priority academic programs, such as high-demand courses and student financial aid, from further budget reductions.

BE IT FURTHER RESOLVED, That the surcharge applies only to basketball tickets and only to the upcoming 1992-93 season and that the surcharge will be reevaluated dependent on the University's future financial situation to determine if it should be applied to other sports or beyond 1992-93.

Upon motion of Mr. Kessler, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

FISCAL AFFAIRS COMMITTEE MEETING (contd)

Mr. Shkurti:

Mr. Chairman, I have one other item. Even though as we are working our way through the last budget, the process on the next one has already begun. In your Board books is a briefing entitled, "Biennial Budget Request for FY 1994-95." I will give you a quick sense of what is involved. This is for the two-year period beginning July 1, 1993, and during this cycle we always -- in response to a directive from the Board of Regents -- make our requests for state funding of line items. This is not capital or student subsidy, but elements such as the Cooperative Extension Service, Research Challenge, and so forth.

The time line this year was very short, because the budget problems from last year were not wrapped up until late in July. We received notification after the last Board meeting and had to send a proposal in by the end of August. That was done and the requests were sent to all of the deans and vice presidents, evaluated by the University, and forwarded to the state. That has been shared with the Board in a separating mailing.

The priorities that the University set were access, retention, and quality -- such as the Young Scholars Program, Research, Agriculture, and various parts of our health and teaching function. In addition, there were three new program requests in research. If you will turn to the second page, it describes what happens next. In fact, the Regents have already made their recommendations to the Office of Budget and Management these are attached as part of this memo. The Office of Budget and Management will then make its recommendations to the Governor sometime this fall. The Governor will make his recommendations to the General Assembly after the first of the year, and then the General Assembly, hopefully by July 1, will have a new budget in place.
Mr. Shkurti: (contd)

The third sheet simply summarizes what the Regent's have recommended compared to what the University requested. The University never gets everything it requests from the Regents, and the Regents never get everything they request from the Budget Office or from the Governor. You can see that some programs were supported. We were disappointed that none of the new research programs were recommended for funding by the Regents, but they did recommend additional funding for a number of our line items. In addition, the Regents have recommended funding for a state-wide program very similar to our Young Scholars program. We hope that will get funded because that would assist the University greatly in meeting those needs.

Mr. Chairman, that concludes my review of that request. If you or the other members of the Board have any questions, I would be glad to respond.

Mr. Shumate:

Are there any questions? We will certainly be discussing the budget requests for 1994-95 throughout our Fiscal Affairs Committee process and having some dialogue with the Trustees and your finance office. Thank you, Mr. Shkurti.

--0--

Ms. Pichette:

Mr. Chairman, the first item I would like to present is a resolution to allow University Hospitals to move forward with plans to upgrade and consolidate their emergency power system. We seek your authorization to hire an architect for the project and request construction bids.

Mr. Shumate:

You might want to share with the Trustees, at this point, some of our discussions about what we are trying to do in terms of providing more background and context on these kinds of requests.

Ms. Pichette:

I would like to introduce Jill Morelli, the new University Architect, who you just appointed earlier today. She is going to assist in bringing you, through my office, one-page summary fact sheets. This will give you a better idea of where these started, how they came along, and why we are requesting funding. We are also going to be bringing possible policy procedures to you regarding what items come to the Board and at what time. So we are going to be working on this.
EMPLOYMENT OF ARCHITECTS/ENGINEERS AND REQUEST FOR CONSTRUCTION BIDS

UNIVERSITY HOSPITALS - EMERGENCY POWER SYSTEM

Synopsis: Authorization to employ architects/engineers and request construction bids for the listed project is proposed.

WHEREAS the University Hospitals desires to update a 1989 emergency power study and initiate action to upgrade and consolidate the Hospitals' emergency power system; and

WHEREAS the total estimated project cost is $2,800,000.00, and the total estimated construction cost is $2,240,000.00; with funding provided by University bond proceeds:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to select qualified architectural/engineering firms as necessary for this project and that the fees for these services be negotiated between the firms selected and The Ohio State University; and

BE IT FURTHER RESOLVED, That the President and/or Vice President for Business and Administration be authorized to request construction bids on this project in accordance with established University procedures, and if satisfactory bids are received, to award contracts, with all actions to be reported to this Board at the appropriate time.

Upon motion of Mr. Shumate, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

REQUEST FOR CONSTRUCTION BIDS

WILCE STUDENT HEALTH CENTER - CHILLER/COOLING TOWER REPLACEMENT

Synopsis: Authorization to request construction bids for the listed project is proposed.

WHEREAS in the Wilce Student Health Center the University desires to replace the existing 210 ton absorption chiller and the forced draft cooling tower with a more energy efficient electric water chiller and efficient induced draft cooling tower; and

WHEREAS this project will be designed by the Department of Physical Facilities in consultation with the University Architect's Office; and

WHEREAS the total estimated project cost is $270,000.00, and the total estimated construction cost is $240,000.00; with funding provided by Senate Bill 351:

NOW THEREFORE
REQUEST FOR CONSTRUCTION BIDS (contd)

WILCE STUDENT HEALTH CENTER - CHILLER/COOLING TOWER REPLACEMENT (contd)

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to request construction bids on this project in accordance with established University procedures, and if satisfactory bids are received, to award contracts, with all actions to be reported to this Board at the appropriate time.

Upon motion of Mr. Shumate, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

REPORT OF AWARD OF CONTRACTS AND ESTABLISHMENT OF CONTINGENCY FUNDS

HASKETT HALL - VENTILATION AND MECHANICAL SYSTEMS

Resolution No. 93-40

Synopsis: Acceptance of the report of award of contracts and the establishment of contingency funds for the listed project is recommended.

WHEREAS a resolution adopted by the Board of Trustees on October 5, 1990 authorized the President and/or Vice President for Business and Administration to request construction bids in accordance with established State of Ohio and University procedures, and if satisfactory bids were received to award contracts for the Haskett Hall - Ventilation and Mechanical Systems project:

NOW THEREFORE

BE IT RESOLVED, That pursuant to the actions previously authorized by this Board, the report of award of contracts and establishment of contingency funds for this project is hereby accepted.

Upon motion of Mr. Shumate, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix IX for background, page 259.)

--0--

Mr. Shumate:

Are there any questions?

Mr. Celeste:

I have a question left over from our last meeting. We talked about the change we were making in the EMS situation. Since we have made that transition, Janet, you were going to try to keep us up to date on what the impact of that change is. Do you have some information?
October 2, 1992 meeting, Board of Trustees

Ms. Pichette:

The change took place with the City of Columbus coming on campus September 15. Joanne Markiewicz reported at the Student Affairs Committee meeting that so far it seems to be transparent to our students because they are still just calling the dispatcher. I would also like to let you know that I met with the Undergraduate Student Government on Wednesday night to try to make sure the information is getting out correctly. I have also written a letter to the Lantern which, hopefully, will be published very soon.

We have had a total of 32 calls in a 15-day period. There is not a lot of data, but so far we have recorded 28 transports. On the times -- which was one of the concerns -- the three longest response times were: 21 minutes, 19 minutes, and 15 minutes. The three shortest were 2 at 2 minutes and 3 at 3 minutes. The average response time by the Columbus Fire Department with their EMS unit is just under 8 minutes. They actually transported 12 people; the University Police transported 9; and a friend or coworker transported the other 7. The University Police many times were on the scene prior to Columbus responding, but most all of the response times were under 10 minutes.

Mr. Shumate:

Any other questions? Mr. Chairman, that completes our meeting.

---0---

REPORT - UNIVERSITY'S ENDOVMENT FUND

Resolution No. 93-41

RESOLVED, That the report on the University's Endowment Fund, dated September 18, 1992, as submitted to the Investments Committee of the Board of Trustees, be received and filed with the official records of the Board.

---0---

FINANCIAL REPORT - UNIVERSITY'S FOUNDATION

Resolution No. 93-42

RESOLVED, That the financial report on the University's Foundation, dated June 30, 1992, and June 30, 1991, as submitted to the Investments Committee of the Board of Trustees, be received and filed with the official records of the Board.

---0---

Thereupon the Board adjourned to meet Friday, November 6, 1992, at The Ohio State University Fawcett Center for Tomorrow, Columbus, Ohio.

Attest:

Madison H. Scott           John J. Barone
Secretary                 Chairman
THE OHIO STATE UNIVERSITY

OFFICIAL PROCEEDINGS OF THE

ONE THOUSAND TWO HUNDRED AND EIGHTY-SEVENTH MEETING

OF THE BOARD OF TRUSTEES

Columbus, Ohio, November 6, 1992

The Board of Trustees met at its regular monthly meeting on Friday, November 6, 1992, at The Ohio State University Fawcett Center for Tomorrow, Columbus, Ohio, pursuant to adjournment.

**   **   **

Minutes of the last meeting were approved.

**   **   **
November 6, 1992 meeting, Board of Trustees

The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on November 6, 1992, at 10:05 a.m. He requested the Secretary to call the roll.

Present: John J. Barone, Chairman, Deborah E. Casto, John W. Kessler, Milton A. Wolf, Leslie H. Wexner, Alex Shumate, Theodore S. Celeste, Michael F. Colley, George A. Skestos, Kristen Cusack, and Hiawatha N. Francisco, Jr.

--0--

PRESIDENT’S REPORT

President Gee:

Undoubtedly, the excitement and activities of the past few weeks have captured our collective attention. The challenge of fierce competition, national polls and rankings, criticism, commentary, and mudslinging. . . . but enough about football!

While the election is over, our concerns regarding the future of higher education are not. As our national agenda is being set, as our federal and state governments convene a record number of new faces, it is imperative the we assert the necessity of a high priority on education for the future.

Ohio's Managing For the Future Task Force Report has prompted considerable discussion of higher education around the state. Today Ohio State's Managing For the Future Task Force will present its report. It will be directly following this meeting for those of you who will be able to stay and attend. I will receive the report from the task force chair, Gerry Mayo, and all of you are invited to attend.

It is of vital importance that we look beyond the fiscal crisis of this year and prepare ourselves for the challenges and opportunities occasioned by the climate of change in our society. Our university-wide planning process is in place. Today the members of the Board of Trustees have received a draft mission statement for the institution. It has been the product of much discussion and debate -- and I hope that we can bring it to a final conclusion next month. It is imperative that this institution have a clear definition of its mission and a strong sense of vision to guide and inform our decision making and our actions that follow. I see this as a dynamic time in the life of this university. We must seize the window of opportunity and take a new look at ourselves and all that we might become.

When I look at the new freshman class, about whom you will hear more in this meeting, I am very excited for the future. This, ladies and gentlemen, is the best class since we have been maintaining statistics in the history of this university. Yes, I said that last year, and I hope to say it again next year. This is our best entering class. More than one in four of them were in the top 10 percent of his or her high school class. The freshman class is more diverse than last year; African-American enrollment is up more than 5 percent and Hispanic enrollment grew by more than 14 percent. Once again we have more than 100 National Merit and National Achievement Scholars in the class, that ranking us in the top nine or ten. Today we have about 150 National Merit Semi-Finalists, who are seniors in high school, visiting Ohio State. These outstanding students are attracted to Ohio State because of our distinguished faculty and strong academic programs.
PRESIDENT'S REPORT (contd)

President Gee: (contd)

Consider the discovery in Warren County of the State of Ohio's oldest fossils -- 525 million year old fossils -- by Assistant Professor of Geological Sciences Loren Babcock and one of his undergraduate students, Peter MacKenzie. Let me repeat: Professor Babcock made this discovery with a student, and they co-authored a paper and delivered it to the Geological Society of America. I understand that Peter is getting a number of offers from graduate programs across the country. It is this type of opportunity that attracts students to Ohio State.

Ohio State is well recognized as a center for cartoon art, with a very distinguished collection and archive. This month we again hosted the Festival of Cartoon Art. This year's conference theme was "Cartoons and Ethnicity," focusing on the expression of ethnicity and stereotypes in cartoons. The dialogue among many of this country's leading cartoon artists was lively and significant for our students and faculty.

Further evidence of our quality is found in the awards and recognitions we receive. Ohio State has been chosen as the site of a new $24 million Eisenhower National Clearinghouse for Mathematics and Science Education. The clearinghouse provides on-line access to resources and information for teachers across the country. It is part of our high priority initiative in math and science education.

October saw us celebrating the 25th anniversary of University College. Since its opening, University College has served more than 200,000 entering students, helping them make the transition to college life and define their academic objectives. Dean Mac Stewart and his staff are to be congratulated on the good work of the college, building on its foundation of a quarter century of service.

The call for change at this university comes in a variety of forms and from many voices, including mine and those in this room today. Our students, faculty, our dedicated staff all are committed to the notion of moving this University forward. It is a time of strain and also an exciting time, and I feel that together we can make significant progress. Mr. Chairman, that concludes my report.

--0--

RESEARCH FOUNDATION REPORT

Mr. Celeste:

I am especially pleased to report on the grants and contracts for the month of September received by The Ohio State University Research Foundation. At Tab 1 we see that the awards for the period July through September have turned the corner and are up 3.77 percent. This was aided by a large award from the Department of Education, which I will highlight later in my report.

At Tab 2 you will find expenditure summaries. Expenditures through September are up 5.3 percent, a modest increase over last month.
November 6, 1992 meeting, Board of Trustees

RESEARCH FOUNDATION REPORT (contd)

Mr. Celeste: (contd)

Some projects of special interest that were funded in the month of September are listed at Tab 3. A team of professors, Michael Klapper, David Haury, and Larry Buell, received about $3.5 million from the Department of Education for the Eisenhower National Mathematics and Science Education Clearinghouse. This program's goals are to store and disseminate the latest and best educational materials making it one of the preeminent vehicles for educational reform in the country. This project will total $23 million over a five-year period.

Professor Furnstahl, one of the recipients of the prestigious Alfred P. Sloan Research Fellowship, was also funded by the National Science Foundation. He will study relativistic field theory models of hadron particle systems.

I would also like to mention that I had the pleasure of visiting the laboratory of one of our eminent scholars, Professor Hamish Fraser. He has recently received major funding from the Edison Materials Technology Center (EMTEC) through the Engineering Experiment Station to develop ceramic-based composites for automotive engine blocks and brake components. This is a joint project with several key industrial companies including Ford, GM, GE, and Cummings Engine Company. They are developing technology for the production of near-net shape cylinder liners, turbocharger compressor wheels, reinforcements for diesel pistons, and brake rotors. EMTEC has provided the framework for a high degree of technology transfer with this project's Ohio-based industrial partners. I might emphasize that this project is a result of having one of our eminent scholars involved in the program and that it is an opportunity to turn the kind of research into some exciting opportunities for jobs in Ohio.

At Tab 4 is the list of all projects funded in September.

At Tab 5 is a table comparing federal obligations for research and development at the Big Ten universities including Penn State University. The table compares data across several academic disciplines for each major federal agency for FY 1990. I hope this information will give the members of the Board of Trustees a better idea of where our external funding comes from and, importantly, how much progress we need to make if we are to be at the top of the Big Ten.

Tab 6 includes a press release issued by University Communications highlighting recent research activity.

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS

Resolution No. 93-

Synopsis: The reports on contracts, grants, and gifts and the summary for September 1992 are presented for Board acceptance.

WHEREAS monies are solicited and received on behalf of the University from governmental, industrial, other agencies, alumni, and various individuals in support of research, instructional activities, and service; and
REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

WHEREAS such gifts are received through The Ohio State University Research Foundation, the Engineering Experiment Station of The Ohio State University, The Ohio State University Development Fund, and The Ohio State University Foundation.

NOW THEREFORE

BE IT RESOLVED, That the research agreement between The Ohio State University and The Ohio State University Research Foundation for the contracts and grants reported herein, and the acceptance of the reports from the Engineering Experiment Station, The Ohio State University Development Fund, and The Ohio State University Foundation during the month of September 1992 be approved.

Upon motion of Mr. Celeste, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

Establishment of Named Funds

The Dortha B. Ten Eyck Cancer Research Endowment Fund

The Dortha B. Ten Eyck Cancer Research Endowment Fund was established November 6, 1992, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University Development Fund from the estate of Dortha B. Ten Eyck.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support cancer research in The Arthur G. James Cancer Hospital and Research Institute as approved by the Director of the Comprehensive Cancer Center-Arthur G. James Cancer Hospital and Research Institute and the Vice President for Health Services.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the Director of the Comprehensive Cancer Center-Arthur G. James Cancer Hospital and Research Institute and the Vice President for Health Services in order to carry out the desire of the donor.

The Margaret P. Cavanaugh and Peter F. Cavanaugh Scholarship Fund in Social Work

The Margaret P. Cavanaugh and Peter F. Cavanaugh Scholarship Fund in Social Work was established November 6, 1992, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University Development Fund from the estate of Peter F. Cavanaugh (B.S., Social Administration, 1938) of El Paso, Texas.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide scholarships to students in the College of Social Work. The selection of the scholarship recipients shall be made by the Dean of the College of Social Work in consultation with the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

The Robert Martin Kilian Chemical Engineering Fund

The Robert Martin Kilian Chemical Engineering Fund was established November 6, 1992, by the Board of Trustees of The Ohio State University, with a gift to The Ohio State University Development Fund from the estate of Robert Martin Kilian (B.Ch.E. '51; M.S., Chemical
November 6, 1992 meeting, Board of Trustees

Engineering, 1951).

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Named Funds (contd)

The Robert Martin Kilian Chemical Engineering Fund (contd)

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to encourage and to support outstanding research by the faculty of the Department of Chemical Engineering. The chairperson of the Department of Chemical Engineering will have sole authority to authorize expenditures from the income, as approved by the dean of the College of Engineering. Any unused income from the fund shall be added to the fund's principal.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

The Shaffer Family Athletic Scholarship Fund

The Shaffer Family Athletic Scholarship Fund was established November 6, 1992, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from Phil C. Shaffer, Columbus, Ohio.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to supplement the grant-in-aid scholarship costs of student athletes who are members of the men's varsity basketball team pursuing undergraduate degrees at The Ohio State University. Recipients shall be selected by the Director of Athletics in consultation with the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees as recommended by the Director of Athletics in order to carry out the desire of the donor.

The Henrietta Fleck Houghton Scholarship Fund

The Henrietta Fleck Houghton Scholarship Fund was established November 6, 1992, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University Development Fund from the estate of Henrietta Fleck Houghton (Ph.D., Education, 1944).

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest
November 6, 1992 meeting, Board of Trustees

and reinvest as occasion dictates.

REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Named Funds (contd)

The Henrietta Fleck Houghton Scholarship Fund (contd)

The annual income shall be added to principal until the fund reaches $30,000 at which time the fund shall be divided into two equal but separate funds. One fund shall be known as The Henrietta Fleck Houghton Scholarship Fund in the College of Education and the second fund shall be known as The Henrietta Fleck Houghton Scholarship Fund in the College of Human Ecology. Income from these two funds shall be used for scholarship awards to benefit students in the College of Education and the College of Human Ecology respectively. Selection of the award recipients shall be made by the deans in these two colleges in consultation with the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college deans, department chairpersons, or program administrative officers in order to carry out the desire of the donor.

The Dorothy M. Kuohn Fund for Cancer Research

The Dorothy M. Kuohn Fund for Cancer Research was established November 6, 1992, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University Development Fund from the estate of Richard A. Kuohn (B.S.Agr. ‘41) of Toledo, Ohio, in memory of his wife, Dorothy M. Kuohn.

All gifts are to be invested in the University’s Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used by The Arthur G. James Cancer Hospital and Research Institute to assist with research efforts into a cure for cancer. Funds may also be expended on preventative measures or toward efforts to alleviate the cancer patient’s suffering. Special consideration is to be given to projects demonstrating innovative thinking in these areas. All expenditures of said funds will require the approval of both the dean of the College of Medicine and the director of The Arthur G. James Cancer Hospital and Research Institute. At such time as these funds are no longer needed for cancer research, the income may be used for other medical research efforts.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

The Fawnye M. Kuohn Scholarship Fund

The Fawnye M. Kuohn Scholarship Fund was established November 6, 1992, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University Development Fund from the estate of Richard A. Kuohn (B.S.Agr. ‘41) of Toledo, Ohio, in memory of his mother,

Fawnye M. Kuohn.
REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Named Funds (contd)

The Fawnye M. Kuohn Scholarship Fund (contd)

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide one or more scholarships to students enrolled in the College of Agriculture. Awards shall be made to students in the Department of Animal Science and the Department of Agricultural Economics who have demonstrated academic ability and a need for financial assistance. Selection of the award recipients shall be made by the dean of the College of Agriculture and the chairperson in the Department of Animal Science and the Department of Agricultural Economics in consultation with the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

The Richard A. Kuohn Scholarship Fund

The Richard A. Kuohn Scholarship Fund was established November 6, 1992, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University Development Fund from the estate of Richard A. Kuohn (B.S.Agr. ’41) of Toledo, Ohio.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide one or more scholarships in the College of Agriculture to students in the Department of Animal Science and the Department of Agricultural Economics. Awards shall be made to those who have demonstrated academic ability and a need for financial assistance. Selection of the award recipients shall be made by the dean of the College of Agriculture and the chairperson in the Department of Animal Science and the Department of Agricultural Economics in consultation with the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

The Ruth V. Hawkins Heldt University Scholarship Fund

The Ruth V. Hawkins Heldt University Scholarship Fund was established November 6, 1992, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund, from Ruth V. Hawkins Heldt of Toledo, Ohio.
REPORT OF RESEARCH CONTRACTS, GRANTS, AND GIFTS (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Named Funds (contd)

The Ruth V. Hawkins Heldt University Scholarship Fund (contd)

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide one or more merit scholarships for Ruth V. Hawkins Heldt Scholars in the College of Education. Recipients of this scholarship shall be students preparing to be teachers who qualify as Presidential, Distinguished, Medalist or University Scholars. These scholars may be continued for up to two years of post baccalaureate work to complete certification requirements. In any year that a Presidential, Distinguished, Medalist or University Scholar is not available, this merit scholarship may be awarded to another student in a teacher certification program.

This merit scholarship initiative is the result of recommendations from the 1990 University Task Force on Undergraduate Recruitment and the 1990-1991 Undergraduate Recruitment Implementation Steering Committee to the Senior Vice President for Academic Affairs and Provost. Students shall be selected based upon the criteria sanctioned by the Senior Vice President for Academic Affairs and Provost and administered by the College of Education in cooperation with the University Honors Center and in consultation with the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

The Elizabeth D. Gee Research on Women Endowed Fund

The Elizabeth D. Gee Research on Women Endowed Fund, a Critical Difference for Women program in conjunction with the Center for Women's Studies, was established November 6, 1992, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from friends and admirers of Elizabeth Gee.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide one or more grants to Ohio State University faculty members and Ph.D. candidates to pursue research on women or gender. The selection of recipients shall be made upon the recommendation of a University-wide Research on Women Committee under the direction of the Center for Women's Studies.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the director of the Center for Women's Studies.
November 6, 1992 meeting, Board of Trustees

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Change in Name and Description of Named Funds

The Donald and Sidney Brandt Memorial Scholarship Fund

The Donald Jay Brandt Memorial Scholarship Fund was established May 7, 1973, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University Development Fund from the family of the late Donald Jay Brandt (B.A., Sociology, 1972) in his memory. The name of the fund and description were revised November 6, 1992, to include his father, Dr. Sidney Brandt (D.D.S., 1938).

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide one or more scholarships for undergraduate students of average achievement or ability in the Humanities who have demonstrated a need for financial assistance. The selection of the recipients shall be made by the dean of the College of Humanities in consultation with the University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

The Jerome Lawrence and Robert E. Lee Theatre Research Institute Library Endowment Fund

The Jerome Lawrence and Robert E. Lee Theatre Research Institute Endowment Fund was established December 6, 1990, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from Jerome Lawrence (B.A., English, 1937), Robert E. Lee, and friends and supporters of the Institute. The name of the fund and description were revised November 6, 1992.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide support for (a) the position of curator, (b) acquisition and preservation of the collection, and (c) the operation and administration of The Jerome Lawrence and Robert E. Lee Theatre Research Institute. Funds will be administered by the director of University Libraries and the chairperson of the Department of Theatre in consultation with the director and curator of the Theatre Research Institute.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, director of University Libraries, department chairperson, or program administrative officer in order to carry out the desire of the donors.
Approval of Description and Establishment of Funds

The Donald R. Glancy Endowed Fund

The Donald R. Glancy Endowed Fund was established November 6, 1992, by the Board of Trustees of The Ohio State University through funds received by the University from The Ohio State University Foundation, which has established an endowed fund with gifts in support of WOSU from the late Donald R. Glancy, Associate Professor Emeritus in the Department of Theatre.

Net income provided by the Foundation, after payments described in paragraph 3 and including any income not paid in regard to paragraph 3, shall be distributed to WOSU, at least annually, to be used solely for its television and radio programming needs. WOSU shall publicly acknowledge periodically the monies received from this fund in such manner as determined by WOSU.

Up to $7,000 in income, including principal as needed, shall be distributed annually to St. Anne's Anglican Church in Columbus, Ohio, to provide salary support for a part-time or full-time resident ordained minister, provided St. Anne's Anglican Church matches these funds, does not merge with another church, and remains a charity under Section 170(c) of the Internal Revenue Code. The Church's failure to meet these conditions in any given year shall not prevent the Church from meeting such conditions and receiving such payments in subsequent years.

HOSPITALS BOARD COMMITTEE REPORT

Mr. Celeste:

The Hospitals Board had very good attendance at an all-day strategic planning retreat on Thursday, October 29. During the day we looked at the current environment and healthcare reform measures anticipated at the state and national levels. Dr. St. Pierre presented indicators that will help the Hospitals and College of Medicine measure progress toward our goal of becoming one of the nation's "top ten" academic medical centers by the year 2000. Associate Provost Edward Ray discussed the University's mission and vision statements, planning process, and action agenda. Cathy Bruno reviewed environmental forces which have an effect on the medical center and projected several scenarios for the future. Finally, we discussed strategies to help the medical center toward our goal.

During the afternoon the Hospitals Board held its October meeting. After reviewing the committee reports we received updates on medical staff issues from the Medical Director and the Chief of Staff. The Hospitals' September financial report was favorable. We were pleased to note that net days in receivables have been reduced to 66, compared to 100 the previous year, and a goal of 85 set by the Hospitals Board.
HOSPITALS BOARD COMMITTEE REPORT (contd)

Mr. Celeste: (contd)

The day concluded with a joint dinner meeting at which the Hospitals Board and Cancer Hospital Oversight Committee learned more about the new standards by which both institutions will be measured next year by the Joint Commission on Accreditation of Healthcare Organizations. This concludes my report, Mr. Chairman.

--0--

STUDENT AFFAIRS COMMITTEE REPORT

Ms. Cusack:

The Student Affairs Committee met yesterday at the Ohio Union. The format of our meeting was a round-table discussion with undergraduate students. We gathered nine students from different years of school, different parts of campus, and different backgrounds. The purpose of our meeting was to find out what is really happening in the general population at Ohio State.

The information we gathered was both interesting and exciting. Students have a lot to say about their experiences at Ohio State. Although all students seemed to agree that this is a huge place, that comment held both positive and negative connotations.

As far as comments for improvements, students mentioned a need for greater cultural and lifestyle sensitivity from teachers and students alike, and improvement in our system of advising. A variety of other topics were brought to light which will be used to format future Student Affairs meetings. We heard many positive comments -- you will be pleased to hear that students really like their university. Many teachers do take the time to make this a smaller, more comfortable place for students and many of the University's services aid in that task. I must point out that Disability Services was mentioned quite often and described as a very well run system at Ohio State. Several students gave positive testimonials about that office.

Overall, this meeting was very positive and productive. You will be hearing more about these issues at future Student Affairs meetings. Next month the graduate and professional students will have the same type of round-table discussion and a chance to air their ideas and comments about Ohio State.

Yesterday in the meeting we heard comments from John Hilbert, President of the Undergraduate Student Government. He mentioned their Freshman Internship Program which is a great opportunity to get 18 freshman involved early in USG. He also mentioned three resolutions which were discussed in USG: 1) was to support the rape education demands; 2) a negative comment against the regional campus guidelines outlined in the Managing For the Future Task Force; and 3) backing the Human Ecology Internship Program.
STUDENT AFFAIRS COMMITTEE REPORT (contd)

Ms. Cusack: (contd)

John also mentioned that USG is working on a tuition payment plan with the Office of Fees and Deposits. They thought this would help students by allowing them to pay their fees throughout the quarter instead of all in one lump sum. USG also has a new student outreach program which tries to reach students all over campus to let them know what USG is doing and to get them involved.

Next, Greg Gorospe, President of the Interprofessional Council, mentioned some issues such as helping non-traditional students and fee waivers. The professional students are also very much in favor of a fee payment plan.

I would now like to call on Karen Duncan who has asked to address the full Board on behalf of graduate students. Karen --

Ms. Karen Duncan:

Thank you, Ms. Cusack, and good morning. I have asked for the opportunity to address you directly today for a couple of reasons. One is that we are far enough into the academic year for me to give you a good sense of graduate student life at OSU this year and to answer any questions that you might have. Secondly, I understand that it has been about three years since any of the student government presidents have addressed the full Board. I just figured that was a record that needed to be broken, so I am going to break it today.

The Council of Graduate Students is also known as CGS, and we are the student voice for Ohio State's 11,000 graduate students. One of the brochures that was distributed to you this morning -- it is a gray one with a red and black logo on it -- is one that we published this year as a way of reaching some of our new graduate students and telling them a little bit about the Council and its works. I will refer you to that for further information. About one of every five students at the OSU campus is a graduate student, and graduate students earn about one in every three subsidy dollars that the University generates. In addition to being good, quality students, we tend to be rather nice people, too. So I am thrilled to be here today to talk to you about some of our efforts.

I think that it is rather easy to think of students at OSU as being 18 to 24 year olds, away from home for the first time, supported by their parents, maybe living in a dorm, or a sorority or fraternity house. That model really doesn't fit graduate students at all. We tend to be older students. In fact, our median age is 29 and many of us have been away from home for a good long time. Some of us are continuing on with our degrees, others are coming back after several years out in the work force. We are self-supporting and many of us are married and starting families of our own. So while we share similar concerns to our undergraduate and professional counterparts, we do have some needs and concerns that are a little different.
Ms. Duncan: (contd)

I think that one that comes immediately to mind is the need for affordable, accessible child care. Graduate students are really rather vital in realizing the mission of The Ohio State University. Graduate students support the teaching and research efforts, we also support the service effort of the University, both in the community and on campus. In fact, one of the most important things that the Council of Graduate Students does is appoint graduate students to serve on many of the committees across campus. We are active and involved participants in the University governance process. The second important thing that the Council does is act as a voice for graduate students on campus, providing an important forum for the discussion and examination of the issues that concern graduate students.

I would like to give you an example of just some of those issues that we have been dealing with. First, this fall we passed a resolution which requested that the University look into the idea of offering a payment plan for tuition. We feel that it is difficult for students and their families to come up with tuition in one lump sum at the beginning of each quarter and at the same time having to come up with money for books, health insurance, and for all those other beginning of the quarter expenses. Giving students the option of spreading that tuition payment out over several months could be a real service to students and their families. We are real pleased that the Undergraduate Student Government has joined us in that effort, and the professional students are also considering it. While I haven't heard anything specifically from any of the University offices, I have heard rumblings that such a plan is under consideration, and I am very pleased to hear that.

Another example of something that we have been looking at is the Report of the President's Commission on Women. Last Sunday, the Council approved a statement in support of that report. We commended the Commission for its work and highlighted several of the recommendations that we thought were of particular interest to graduate students. We will be distributing our reaction to that report widely throughout the campus.

Those are just two of our most recent efforts, but perhaps the most important issue in the minds of all graduate students at OSU is the effect of state mandated budget cuts on our education. Like everyone else at the University, we are concerned over the inadequate state support for higher education in Ohio. We've participated in rallies, we have written our legislators, and we have written letters to the editor. Some of us have even marched in parades to protest the budget cuts and we have done that because graduate students really are hit doubly hard by the cuts in higher education. We face reduced resources in the classroom. We suffer because our departments can't hire the faculty that they need to hire to do the teaching and the research. There are fewer graduate assistantships available and about half of the graduate students at OSU fund their education through those assistantships. We note with some concern that while graduate enrollment is up 2 percent nationally, it is down 16 percent at Ohio State this year, and part of that is due to fewer positions being available. Also as costs for health insurance, housing, and other living expenses go up, our stipend levels have remained stagnant for a year. So graduate students do feel squeezed on all sides, and we understand that it is part of the larger problem that the University is facing with its funding.
Ms. Duncan: (contd)

While the University is clearly facing a fiscal challenge, we find that one of the options that is being examined by the University, as a way to deal with the financial difficulties, is an option that we find rather unacceptable and that is the option of differential fees. I want to spend a few moments talking with you about that right now. As you may recall, last spring CGS expressed its opposition to differential fees and we remain opposed to differential fees, including the engineering computing fee which will be coming to you for approval. Although we have serious reservations, we do accede to this fee on a trial basis. We recognize that computing facilities in the College of Engineering have been allowed to decline appreciably and we recognize the funds the College has allocated are not sufficient to meet the needs.

Why does the engineering computing fee make graduate students so uneasy? Our concerns are not limited to the budget being balanced on the backs of students -- although certainly that is a concern -- we have other concerns with this fee as well. First, what appears to be the subversion of the normal budgeting process at OSU. That is, if computing is a priority, and graduate students do believe that it is a priority, why then is it not included in the general funds budget and considered along with other priority items? Are computers any different than libraries and other resources that are necessary to keep the University operating? By allowing the College of Engineering to charge a computing fee, the University sends a message that the needs of the College of Engineering are more important than the needs of other units on campus and we wonder if this is the message that the University wants to send.

Second, for various reasons decisions have been made in the past that have left not only the College of Engineering, but much of the University behind the times in computer support. The unsatisfactory conditions we now face are the result of decisions made by faculty and administrators in the past, they are not the result of student decisions. Rather than holding decision makers accountable for those decisions, students are being asked to bail out the College of Engineering and the University through this differential fee.

Third, we believe that such a fee sets a dangerous precedent -- possibly opening a "Pandora's box" of fees at this University. No doubt approval of the engineering computing fee will prompt other colleges and departments to propose fees of their own to meet their own needs. There is not a unit on this campus that does not need money, but students and their parents do not have bottomless pockets. One of the goals in the Board of Regents' Managing For the Future Task Force Report is that higher education should be accessible and affordable to all. This is a goal that we highly support. We do not believe that students should be choosing their major or career based on what they can afford. We do not think that the decisions to change majors should be guided by the amount of fees charged in that major, and we do worry about the implications for student financial aid.

Fourth, as a university we appear to be ignoring a larger question, "Is it not time that we, as a university, ask the state why is it willing to give us money to build buildings, when it is not willing to give us money for libraries, computers, laboratories, and other resources that are necessary to run a world-class university?"
STUDENT AFFAIRS COMMITTEE REPORT (contd)

Ms. Duncan: (contd)

Let me reiterate that CGS reluctantly accepts the University engineering computing fee as a pilot project of limited duration. We do not endorse a permanent computing fee for the College of Engineering, nor do we excuse the flawed decisions of the past that have led us to this state. We believe a university-wide academic computing plan is critical and should be implemented. The College of Engineering fee is bitter medicine for the decisions of the past, but it is medicine we will swallow on a temporary basis on the clear understanding that this fee will be subject to comprehensive review within a year.

In closing, I deeply appreciate this opportunity to come before you today to share with you some of the issues in graduate student life at this University and to express the support of graduate students for the University during these challenging times. I would certainly be happy to answer any questions that you may have.

President Gee:

Karen, thank you, very much. We were going to discuss the computer fee today, although it is on the agenda for December, and I will ask Dr. Ray to come forward to discuss that proposal. Are there any questions that the Board may have for Karen regarding this or any other issue that she has brought forth? I might say on a very positive note, that we have been blessed with great leadership in our graduate students. Sean Tipton, over the past several years, and now Karen have done an outstanding job. Karen, you are certainly welcome to continue in this discussion with Dr. Ray as we talk a bit more about the computer fee in a more comprehensive context.

Dr. Ed Ray:

Let me make a personal observation -- and Karen is excellent testimony to it -- I have served on a number of University committees where we have had undergraduate and graduate student representation and these are first-class people. They raise the right questions and concerns. Karen expressed it quite eloquently when she said that -- and I think this expresses fairly the views of the University Fee Committee that proposed to bring the computer laboratory fee forward for your consideration -- this is a preliminary discussion. We want you to think hard about the pros and cons of this particular issue before you are asked to vote on a resolution. I will point out that the resolution that you will be asked to consider -- in fact embodies the caveats that Karen has already mentioned -- is viewed as a pilot effort. It will be a differential fee to provide a critical service to an academic unit that has a strong desire to move forward even in the worst budget times and to try to maintain state-of-the-art technology for its students in the learning process.

The resolution that you will be asked to vote on asks you to consider this as a pilot project and requires that it be reviewed annually until and unless alternative means of providing these resources to students are found. I think the committee would also endorse the idea that the University needs to get on with the very serious business of considering reallocations of resources within the University to match priorities more clearly perhaps than has been the case in the past. We must press the case forward with the state to get appropriate funding to provide the kind of
quality higher education that the state insists it wants. Those who have looked at the issues clearly understand it must have that funding if it is not to become a third-rate state in the 21st century. I think that we have had a number of discussions on that issue.

The proposal is to have a charge of $120 per quarter for engineering majors. The understanding is that the money will go into a specific account targeted to provide laboratory space, computer equipment, and software to be used for the purpose of training graduate and undergraduate students in the College of Engineering. The need for computer services throughout the University is substantial and serious. There is an academic computing plan that involves many more millions of dollars of very necessary expenditures than we are able to provide funding for at this time. The understanding in moving forward with the College of Engineering proposal was: 1) that this is a proposal that the College has been working on for two years - - they weren't just picked out of a hat; and 2) there is a specific need within engineering training for high-end technology computer equipment that they need to make available to their students. That makes it a little more specialized need than the computing needs for the University community as a whole. Again, I want to stress that this is being viewed as one of the more urgent priorities -- within a very important priority for this University -- and that is upgrading and expanding the quality of computer resources available to all students and researchers.

In any event, the proposal asks for $120 per quarter fee for majors in engineering. For this year that represents approximately a 13 percent increase in tuition payments, on top of the 9 percent that students are already faced with. The College of Engineering has been discussing proposals for the last two years. Students and faculty have had a lot of input into designing the package itself and in discussing the pros and cons of it. The College of Engineering intends to borrow against future receipts in order to go as far as it can to put the computers and software in laboratories and available for students the day they walk in, with the understanding that they are now paying fees for such services. The idea is to defer implementation of this fee structure until Spring Quarter, so that over the course of the next several months the College of Engineering will be able to do the work that needs to be done to have the resources available for students at the time they are asked to begin paying for it.

There is also the understanding that all funds collected in this fashion will go for the specific uses that we have been talking about here. You need to understand that the College of Engineering is now spending about $2.2 million a year on computers and computer-related resources. This fee structure would generate approximately $1.5 million a year on top of that which would be used for the specific purpose of training undergraduate and graduate students. The College estimates it would have to spend on the order of $9 million a year to achieve a steady state-of-the-art technology for the kind of training that their students need.

Karen has already, rather eloquently, expressed some of the downside concerns, including this notion of differential fees within the University. I think some would find that unpalatable -- the notion that students in a public institution would face differential costs to one kind of education versus another. That may have an impact on students’ career choices that many would find quite inappropriate. There
STUDENT AFFAIRS COMMITTEE REPORT (contd)

Dr. Ray: (contd)

is also this issue of who gets the differential fee as opposed to others to meet their specialized needs.

I have tried to explain that this is a project that the College of Engineering has been looking at very seriously for two years with a lot of participation. They happen to be first in the queue because they have recognized the urgency of their needs and the fact that the University didn't seem to be responding effectively. So they have tried to move forward with a proposal that made a certain amount of sense. But there is this other danger and that is we could start down the road where we have every college, department, or program coming forward with user fees. The user fees would be a way of essentially circumventing the reality we find ourselves faced with -- that we are underfunding higher education in Ohio and at Ohio State. The quality degradation that that process entails is going to show up systematically in some areas before it does in others. We need to figure out how we are going to get our act together to deal with it. The Committee's sense was that we would prefer to see the University reorder its house internally, and make its case more effective externally to get the resources that we need where we need them to provide the highest quality possible training for our students. As painful as the possibility is of going forward with a charge like this is, it is not responsible to walk away from the fact that if we do nothing, there will be a very quiet, but a very real degradation in the quality of resources available to our students, and that is not acceptable. We have to address this and we have to address it as quickly as possible.

Mr. Celeste:

Of the $1.5 million, how much would go for the lab space, the equipment, and the software?

Dr. Ray:

The intention is that all the money that would be generated from this would go toward the computers and the computer software. The facility adaptations or renovations that were required for this would be part of the expenditures that the Engineering College would make. The College would not divert sums of money for physical space creation or renovation at the expense of having learning resources directly available to students.

Mr. Celeste:

Is the computer equipment you anticipate having there accessible only by coming to the location or is there remote access?

Dr. Ray:

It will be by having secure laboratory facilities available. What we are talking about here is high end, some work stations that can handle fairly sophisticated software. So we are not talking about things that we could substitute lap top computers for, at least at this time. We are really focusing on high-end technology at this point.
and in the foreseeable future would not be possible to provide except within a laboratory environment.

Mr. Shumate:

Certainly we are all committed to quality at this University, but, as you also indicated, as a public university we are committed to the concept of access. What has been the analysis or thinking on what steps we can take to try to minimize or avoid this type of procedure having a chilling effect on access?

Dr. Ray:

Well the answer is easy, getting there is hard. The answer is that we get our act together and we redirect resources internally. We do everything that we can to generate those external resources and to get the level of funding up to where it needs to be so that we can meet specific, targeted, quality needs without simply dumping additional costs on the students. I think that the way we proceed to that point is to get on with the business that we will be talking about later this morning -- what are we doing about planning and getting our act together and redirecting resources. I think that we adopt something like this very cautiously and with the understanding that we view this as an intermediate measure, that we are doing this on a pilot basis, with the understanding that it is going to be reviewed regularly. There should also be the understanding that we are going to explore alternative ways of providing these services, rather than presume that this is something that we want to stay in place long-term, or that it is something that we want to invite other units to view as the only way to get on with resource acquisition.

The University Fees Committee in its report -- before the engineering proposal came forward as a pilot possibility in May of 1982 -- specifically indicated that the Committee preferred university-wide fees if such measures were needed. They preferred to get along with the very large and expensive agenda of computing on campus and not have differential fees either on a course or by college or by major basis. So the University Committee that had to review this specific proposal is on record as preferring not to have a structure like this. I think Karen's statement about acceding to the adoption of this as a way of not simply walking away from the fact that these people have a particular problem that they are willing to try and deal with reflects the sentiment of the committee.

Mr. Shumate:

The point I am trying to make is that as a part of the evaluation of the pilot project, there should be an effort to evaluate or measure whether or not this has had a negative impact on access for students being able to enter and succeed in the Engineering Department.

Dr. Ray:

I think there has been some very serious soul searching within Engineering. The faculty seem to have a fairly clear sense that the feedback they are getting from the external community is that there is genuine concern about whether the students
STUDENT AFFAIRS COMMITTEE REPORT (contd)

Dr. Ray: (contd)

that they are turning out are in fact trained on the best available research and operating materials available. They are beginning to get nervous that they are going to fall behind very quickly if they don't move now. That is really where the impetus comes from. They understand what it takes to be effective teachers and they don't feel they have the tools needed to do the best job possible. They understand from the students and from potential employers that they need to move ahead with this matter.

Ms. Cusack:

Since it is supposed to be effective Spring Quarter, have there been any special provisions made for students on financial aid or students who are on scholarships? That is a pretty good chunk of money to throw at someone.

Dr. Ray:

There are really a couple of aspects to this that have to do with making the transition from doing nothing to trying to get on with doing something. The Engineering College has made it clear that they expect to provide their own resources for students who have particular financial needs and to help them deal with the financing of this add on charge. So they are intending to work with students on an individual basis to make sure that any damage of this sort -- in terms of what they can afford, what they are able to do, or career choices that they would make -- is minimized.

There are some more technical complications with graduate students, in terms of whether or not they are on projects where add on fees might be picked up immediately, or they are on their own resources and it hits them as a charge. Their intention for the first year is to basically underwrite those costs for graduate students, to avoid inequities in how they are treated by this add on fee. In the course of this academic year they hope to figure out what represents a fair way of levying this charge so that they don't pick on some people relative to others. But the need question is a real one.

President Gee:

I think that Alex's question is a very specific one that we wrestle with a lot. Every time we raise one of these fees or every time we raise tuition, what impact does that have in terms of access to this institution? As committed as we are to merit, we're committed to it on the basis of access and not on the basis of someone's ability to pay. Of course, again, we may not have all the structures that show that our tuition is among the lowest and a variety of other things, but the impact has to be dealt with. You are saying that the Engineering School in the short-term will have --
Dr. Ray:

Engineering will do what it can to try and minimize the hardship that individual students face as a result of these added charges. We are, as we all know because we have seen the statistics, low relative to other institutions in the state and nationwide in terms of tuition charges. But $2,800 is still $2,800, and for a lot of young people that is a very severe barrier to getting the kind of education they hope to get. So none of this is something that we would do on a whim. I think people are pretty sensitive to the problem.

Mr. Skestos:

In response to Alex's question -- you had mentioned that if we don't do this, it could result in a number of students not coming here because we don't have the facilities to serve them in their education. President Gee raised a question of the negative access from the standpoint of, "Are we going to drive some students away and cut down our enrollment in the future?" Hopefully, during this period of experimentation we can take a look at that. Then, you can come back to us and give us a report on whether this is really having a negative impact. Are there students not enrolling because of the added fee? Those are the kind of figures I would like to see.

Dr. Ray:

That is exactly right. That is why we proposed this be viewed only as a pilot project and that it be monitored regularly until and unless we find alternative ways to provide these services.

President Gee:

I think it is important to try to put one thing in context here. Karen, you raised a very important question -- are we doing this as an ad hoc issue? In other words, we get a budgetary problem and so we go and put it on the backs of students, or have we tried to think this thing through more long-term. The answer is yes. That is the reason that when it was initially proposed rather than us saying fine we will do it -- because Engineering has made a very persuasive case -- we said no we won't do it until we have thought through the impact and what the University wants to do. I believe this and this is my view -- not expressing it as the University's view - - a university in today's world has the responsibility, particularly on the technology side to provide a minimum sense of support for all students whether they be in dance or engineering. The reality is that when we try to meet the needs of engineering, we start charging dance students to meet that need at some point. If you were to vector this at some point, they cross the line and there is a fairness issue that is on that side of it. I believe that what the committee is trying to do is wrestle with this. By accepting the academic computing plan and a variety of other proposals, and having set up the Vice President's Task Force, we are going to move forward in terms of technology in a way that provides a level of support for all of our students and faculty at this institution. But at the same time, there are pockets within the institution that have very voracious needs and those needs could consume everything that we have. The question is how do we pay for that? And isn't it perhaps fair for those who are the ultimate users pay some share or cost for that? That is a broader philosophical issue that could go all across the board.
November 6, 1992 meeting, Board of Trustees

STUDENT AFFAIRS COMMITTEE REPORT (contd)

President Gee: (contd)

Should our dancers pay for our physicians? That is another way to put it, and I think that the answer is that we do need to have some differentiation.

Ms. Duncan:

I wonder why computers are any different than libraries. I think that students in different disciplines may make different differential use of many different services on campus. As you say, there is a larger philosophical issue that we need to discuss.

President Gee:

And we need to ask the question about libraries and other things. I would contend that perhaps with very specialized library resources we do charge differentiated approaches to them. You asked the question, but you can answer it the other way, too.

Mr. Barone:

Has anyone exploited -- and I like to use the word "exploited" -- contacting other engineering firms which can lease this equipment? Maybe we could lease it back for $1.00 a year or something. There are industries and companies that have done this. I know Dana Corporation in Toledo does this frequently. They will buy certain equipment and lease it to the University and to the students in order to help. It does help the community in employment and knowledge.

Dr. Ray:

Yes. In fact, Mr. Chairman, the College of Engineering intends -- with the money that is advanced to it -- to work on leasing arrangements to maximize the resources for each dollar that is used.

INVESTMENTS COMMITTEE REPORT

Amb. Wolf:

The Investments Committee met yesterday afternoon to perform our annual review of the Endowment Funds Equity Managers. We heard presentations from the Student Investments Management class, the Chicago Corporation, Wood Island Associates, Nicholas-Applegate, Wells Fargo, R. Meeder and Associates, and the University Office of the Treasurer, which manages part of the portfolio.

It is reported that for the twelve months ended June 30, 1992, we had a total return of 24.3 percent versus the 13.4 percent return for the Standard and Poor 500 index. Also, outperforming the S&P 500 were the Office of the Treasurer, which administers part of our account, and two investment advisors, Nicholas-Applegate.
November 6, 1992 meeting, Board of Trustees

INVESTMENTS COMMITTEE REPORT (contd)

Amb. Wolf: (contd)

and R. Meeder. I am pleased to announce that the student investments class recorded the best performance.

The Investments Committee also reviewed additional investment performance information and discussed topics including asset allocation, broker commissions, and manager fees. Recommendations regarding the allotment to our managers were made and will be presented as a resolution to the next full meeting of this Board.

I would also like to report that the market value of the University's Endowment Fund as of October 16, 1992 was $411.1 million. This concludes the Investments Committee report, Mr. Chairman.

--0--

FISCAL AFFAIRS COMMITTEE MEETING

REPORT ON ENROLLMENT

Mr. Shumate:

Our first item of business this morning is a report on enrollment from Vice President Shkurti.

Mr. Shkurti:

Thank you, Mr. Shumate. This is an annual report that I provide every fall on 14th day enrollment. With us today is Jim Mager, Director of Admissions. Jim is really the soldier in the trenches who handles a lot of this, so if I get stuck on answering any of your questions, he will be delighted to assist.

The issues to be reviewed are: 1) What is our current enrollment? 2) What is the composition of the student body? 3) What is the quality of the incoming class? 4) What progress has been made in increasing minority enrollments? and 5) What are the implications for the future, including the financial implications?

Let me start first with the current enrollment and that is the page headlined 1A. Our total enrollment this fall is 58,585, down 2,000 in terms of head count from last year. This is the lowest enrollment for the University as a whole since autumn 1987. We will talk about why in a minute. The decline was substantially on the Columbus main campus, the lowest enrollment since the fall of 1982.

Next if you turn to page 2A, we talk a little bit more about the Autumn 1992 enrollment on the main campus. Actually the number of new first quarter freshmen we attracted has remained at the desired level, which is 5,300 -- so we did hit that target. I might add that the retention of new students from last fall is up from last year's rate to 82.2 percent. This is one of the things we hoped to accomplish when we moved to selective admissions. The question is, "Where did we lose students if we picked them up as new first quarter freshmen?" There are two places. One,
the number of continuing undergraduates is down 1,345 from last year's level. And second, we believe we lost part of these students in the summer, and part of them in the fall, primarily because of the bad economy. They simply did not have the financial resources to come back to school.

In addition, the enrollment of new graduate students decreased by 16 percent. While we kept the graduate students we had -- which has been kind of the reverse of the undergraduates -- we didn't bring in a lot of new students and Karen referred to this in her testimony. We believe the reason for this is in dealing with the budget cuts -- we have been cut so many times, we don't have too many more places to turn, especially in the academic departments. The money is just not there to sponsor graduate students. The departments rightfully are trying to protect and keep the students they have before they bring on new students. So without the financial support that is needed, we are unable to attract as many graduate students as we had hoped.

If we turn to 3A, we talk about the quality of the incoming class or the new first quarter freshmen. As the President mentioned in his opening remarks, autumn 1993 represents one of our best freshman classes ever. The improvements have been realized in almost all quality measures which are on the following page. For example, the number of University scholars is up 19.8 percent and the number of high school valedictorians is up 15.9 percent.

The next set of figures on page 4A, deals with minority enrollment. Even though our overall enrollment is down, the autumn 1992 minority enrollment is up -- up 4 percent from last year and is the highest on the Columbus campus ever. So minorities now represent 10.9 percent of the student population on the Columbus campus. In addition, which I think is an equally significant statistic, not only are we bringing minorities to the campus, but our retention, particularly of Black new first quarter freshmen, is now 70.8 percent. That is the second highest level ever achieved by the University.

On page 5A, is a summary of the information I have just covered. I think it is fair to say that the University continues to attract quality students at all levels.

Mr. Wexner:

The class decrease in size -- how does that match with national experience or the Big Ten experience? Do we know?

President Gee:

We have some data -- it is mixed across the country. Much of it is related, again, to the economy and also institutions that have had dramatic budgetary reductions. California and a variety of other places have had huge decreases in the numbers of students. We can provide that data, though I am not certain that we have that readily available. We can get that data, but we fall somewhere in the middle in terms of that roll-off. Of course, our numbers are so big that anytime we lose a percentage that is a substantial number of students for us.
Mr. Shkurti:

I would also add, Mr. Wexner, although all the other Ohio public four-year colleges and universities are not necessarily comparable to us, because they are not comprehensive research institutions, we do have figures for elsewhere in Ohio. The pattern has been for every four-year main campus in the state to suffer some sort of enrollment problem. So we think, in part, that this reflects the economy and the tuition increases from the reduction of state aid. We don't have all the figures yet across the country, but as the President indicated that record is somewhat mixed.

Mr. Wexner:

If I were looking at it on a regional basis or a national basis, I would take out of my statistical base, say California, because it is unique and it would distort the average. For this discussion about fees, tuition, and minority enrollment, I would like to see more information presented so that we are seeing ourselves in a comparative universe. For example, 10 percent down may be very good or it could be catastrophic. Another example is -- and I am only talking about myself -- I can run a mile in 9 minutes. But if that is the only knowledge I have, if I don't know that there are Olympic athletes that can run a mile in less than 4 minutes, I have no standard of comparison. Relating to the discussion earlier about planning, budgeting, and charges, I don't have a frame of reference -- maybe other Trustees do -- but I think the University in total has to see itself in a national competition against similar universities for students and for resources. We always have to see ourselves that way.

Mr. Shkurti:

Mr. Wexner, I agree with you. Let me state two things: 1) we do keep regular comparisons of our fees and charges compared to other public comprehensive research institutions, and I will be glad to provide that for you; and 2) we will try to provide you comparative enrollment information, to the degree we can get it, that addresses the same issue. If this is the kind of information that you feel would be helpful --

Mr. Wexner:

I am not saying this on a personal basis, I'm trying to say this is a policy issue for the Board, the faculty, and certainly for the President to consider. The question is if we have a vision, as the medical school and the Hospitals have expressed, in terms of being at the top ten level, then you always have to know where the top ten are and where we are. If the University is going to advance in all areas, whether it is support from the state or tuition or the caliber of resources, I think we have to know where we are and where we are advancing to.

President Gee:

You are absolutely correct. We have all those comparative data, particularly on our planning side, which we will provide. In the Managing For the Future Task Force report today, we will provide a lot of comparative data. We cannot make decisions about whether we are moving forward or not in a vacuum. We have to know how we compare to a variety of sources. Second of all, I think it is very important --
and the point is well made and has been made several times -- when we provide these kinds of data we should not just be comparing ourselves, in terms of this discussion, with ourselves. We do want to know what has happened to us over a trend line, but also what is happening nationally to get some sense of our overall context. We will start to do that. Even though we have the data and we use it in our planning process, it needs to be more widely distributed.

Ms. Casto:

Is the enrollment down purposely?

President Gee:

Some of it is down purposely. As you know, we targeted 5,300 -- let me just make a point here, 5,300 freshmen, the best class in the history of the University and that was by design. But there were some parts of it that weren't by design, and Karen made the point in terms of the loss of graduate students. Our intent, frankly, was to start moving the other direction. Remember we have talked about this -- a slightly lower number of undergraduate, and a slightly higher number of graduate students. Instead we got a slightly lower number of undergraduates by design and a lower number of graduate students not by design, but by impact. That is a very serious problem for us. The other thing is on the retention side -- we are going up steadily and that is very good, but a number of students didn't return, about 1,300 this year. We are trying to determine why. We think the majority was related to the economy and not, in this instance, to the University being unable to provide resources, or that they failed out, or a variety of other things.

Ms. Casto:

I have asked for that data before. I am hoping that it is not due to quality, because we had cut so many student services at that time. I pointed out to Bill Shkurti that there is a magic 400 number here, and that is the number of students that we predicted could be budgetarily affected in the Graduate School. We looked back and, in fact, it was. So I think we need to look into this further as to why all these things happen.

Mr. Shkurti:

We will have a more detailed budget impact study for the Board at the next meeting, which will detail numbers. We are still guessing at what numbers we lost for this or that. We will know exactly how many undergraduate student positions have been lost, how many graduate teaching positions have been lost, how many other positions have been lost, and this will give you a better feel for the impact of these budget reductions.

Ms. Casto:

Also, what is the difference between a continuing student and a returning student?
A continuing student is a student who was here either summer quarter or spring quarter. A returning student is a student that was gone spring or summer, but was enrolled previously in 1992 -- they stepped out and now they are returning.

Mr. Skestos:

Do we do any kind of exit poll on these non-returning students to get an idea of why they are not coming back? There are a lot of answers possibly out there -- maybe some students realize that college is not the place for them, or maybe they should be going to a technical school or some other place. Do we do anything at all to determine why these students are not returning?

President Gee:

The answer is yes and we do it in a variety of ways. Jim, you may want to answer this question.

Dr. Mager:

The best thing that we can do is a sampling, because many students are enrolled one quarter and do not return and they leave no forwarding address. The sampling that we have done for people who identify themselves on the way out is that many of the students have personal or financial reasons. Financial problems would be the number one reason. Now, again, none of the reasons are more than 50 percent -- 20 percent or so are financial reasons, other personal reasons, and some students, academically, are finding it very difficult. So, I am saying financial reasons and personal change reasons, such as having to do with a marriage or something like that. Then all of these reasons would add up to 100 percent.

Mr. Shkurti:

Let me conclude by summarizing, again, that we feel in terms of attracting quality freshmen, that is good news. In terms of recruiting quality minority students, that is also good news. The bad news has been that we haven't been able to meet our expectations on continuing undergraduates and on attracting new graduate students. The implications of these numbers for subsidy and fee income -- because as you know the Regents' funding formula is primarily enrollment driven -- we predicted when the budget was put together last spring and early summer we feared that there would be some enrollment decline and tried to build that into the numbers. So even though enrollment is down by a large number of students, we don't feel that we need to change our projections at this point. We won't know for sure what our subsidy income will be until December. Right now we are estimating that the final numbers we will have for you in the middle of the year will be within plus or minus $2 million of the estimates that we gave you earlier in the summer, even taking into account this 14th day enrollment loss.
The second implication deals with resource allocation. This is a rather large institution, but I think what we are finding is not imperious to the budget problems and reductions in state aid and some of the other elements of the national economy. Another resource allocation decision we will have to face is what do we do with limited funds regarding closed courses. We have students coming in, paying fees, and drawing subsidies, and however bad or however disappointing these enrollment numbers are, it scares me to think of what they might have been had the Board not supported the proposal to reallocate $1.5 million to take care of closed courses and keep additional sections open this fall. I think we did the right thing last year, and we will probably be faced with a very similar, difficult budget decision in the budget that we put together this spring in terms of where we put our limited resources. This is all connected and we need to make sure that we are keeping our courses open and having students coming in. The thing we want to avoid is what is called in higher education, "the death spiral." This is where we cut out courses and classes so fewer students come here, and because fewer students come here we have less tuition and less state support so we reduce more courses which means even fewer students come here. This is something that we need to avoid at all costs when making our resource allocation decisions.

Ms. Casto:

Bill, in this budget that we are going to look at will the amount of moneys that have been lost be reflected?

Mr. Shkurti:

Ms. Casto, I think if I understand your question correctly, the money we think we have lost because of the drop in enrollment this fall, we predicted pretty closely, within plus or minus $2 million which will come out. So if that is what you meant by your question the answer to that is yes. If the question is what will be the impact next fall, we are not yet at a position where we are able to project that. We will have to discuss that when we put the next budget together.

Ms. Casto:

In other words, with the $7.5 million that we have to take in reductions, we could have another $2 million in reductions on top of it?

Mr. Shkurti:

It could be as much as another $2 million, which would mean $9.5 million, but it also could be as low as $5.5 million, that is the plus or minus $2 million. My expectation and my hope is that it will be fairly close to the $7.5 million. I was hoping that we would have better results with enrollment than we expected in July. What would have been a $7.5 million problem may have become a $6 million, $5 million, or a $4 million problem. It now looks less likely that that is going to happen because enrollment is not over what the projections were.
November 6, 1992 meeting, Board of Trustees

REPORT ON ENROLLMENT (contd)

Mr. Shkurti: (contd)

Then the final point deals with the question Mr. Wexner asked earlier. One of the things we as an institution have to grapple with, in terms of our long-range planning, is what size of an institution we want to be. Whether we want to try to grow every fall, or whether we want to deliberately reduce enrollment, and if we do, what are the enrollments we deliberately want to reduce. So that will be one of the issues facing our planning process in the months ahead.

Mr. Chairman, that concludes my presentation. I will be glad to answer any additional questions.

Mr. Shumate:

Are there any questions on the enrollment report? If not, the report is received.

---0---

BUDGET UPDATE

Mr. Shkurti:

This is the first quarter budget adjustment and is not a report we spend a great deal of time on because it reflects only those actions that have taken place in the first 2 or 3 months after the budget was approved. You will have a more detailed report, which I hope will encompass the final numbers from these enrollment changes, when we do the mid-year review in February. The two number changes that you see in this report are the ones resulting from the tuition cap being increased by 2 percent after the budget was passed and also the adjustment of 1.5 percent in classified employee salaries that was made. Those are both reflected in that first quarter report.

Mr. Shumate:

Are there any questions? If not, that report is received.

---0---

REPORT ON UNIVERSITY PLANNING, MISSION, AND RESOURCE MANAGEMENT

Ms. Casto:

I would like to call on Dr. Ray for his report.

Dr. Ray:

Bill Shkurti will have some more to say about the contents of the book that was distributed to you. I would like to ask you to turn your attention to the material that was handed out this morning stamped "DRAFT." The intent of this material is to try and give you a sense of where we see ourselves in the planning resource management process and to provide you with some of the documentation that you
November 6, 1992 meeting, Board of Trustees

REPORT ON UNIVERSITY PLANNING, MISSION, AND RESOURCE MANAGEMENT (contd)

Dr. Ray: (contd)

really ought to have, not simply for purposes of discussion today, but as we move through the future. I would expect that we can provide supplementary material as we go along. What we want to focus on today is an update on the feedback that we've gotten on the mission and vision statements that you have seen earlier drafts of and that were presented to the University Senate by the President on October 3.

What I would like to do before we get into my perceptions about where we are on mission and vision and the issues that you need to think about, is try to put this a little bit more in context. Our sense is that we are trying to proceed with the planning process this year on two levels. At the upper level we are trying to rationalize the planning process and procedures within the central administration. We also feel we are trying to systematize operating procedures within academic units. The idea is that basically we need to situate ourselves both at the top and bottom throughout the University to be able to respond to a number of internal and external pressures that we have to deal with.

In dealing with the rationalization of University priorities, we are talking today a little bit about mission and vision statements. The idea is to focus on what we are about, what are our boundaries, and how do we see ourselves moving through the next 5 or 10 years. Once we have completed that task, we expect to be reassessing current long-term commitments by the University and bringing those in line with our perception of where we want to go long-term. We expect that sense of purpose that we establish during the course of this autumn to help us develop budget themes for the next budget cycle. We need to bring long-term perspectives on where we are going with Academic Planning and Resource Management in line with our annual budget cycle so that people can see that there is a kind of consistency to what we are doing over time as we move from budget to budget.

The restructuring of the planning process within the central administration includes the adoption of openness and accountability by the University in its planning and budgeting processes, as reflected in the publication of budget allocations last summer in the creation of the University Priorities Committee. That committee is intended as a permanent advisory committee to the Provost, President, and the Board of Trustees. Our objective is the use of open access to information and decision making as a vehicle for linking interests to discipline, for the planning budget activities of the University, and to establish accountability. It is a very different way of doing business than the University has been accustomed to in my 22 years here.

When I talk about systematizing operating procedures within academic units, we are talking about articulating how we deal with issues such as workload, which we already have had some discussion of here, tenure reviews, post-tenure evaluation, and other issues on a system-wide basis. I think that what we are trying to do is to lay groundwork for an open, rational system for management, with well-defined responsibilities at every level of the University. I think that if we can get on with the task this year, then next year we will see something that looks more like the traditional planning process with coordination from top to bottom. If you allow me
REPORT ON UNIVERSITY PLANNING, MISSION, AND RESOURCE MANAGEMENT (contd)

Dr. Ray: (contd)

a more colorful characterization, I think this year is about getting our act together. Essentially, we want to make sure that everyone understands what we need to be doing at every level in this University, and how we need to coordinate with each other so we can move forward.

I said that we wanted to rationalize the planning process within the University and central administration, and the first step of that is to reach some consensus about the mission and vision of this University for the future. If you will turn to the second page of that handout, you will see restatements of the mission and vision statement. These are basically the same statements that President Gee presented to the University Senate on October 3. Since that time, I would judge that in written form to the President and myself, there have been as many as 30 individual suggestions about changes that could be made in the mission and vision statements. I think all of those were very thoughtful, and many suggestions that one could see incorporated in one form or another. I guess at this point I would suggest that the Board look at the mission and vision statements that we have as a package. The vision bullets nicely compliment and clarify the statement of mission. Look at that as a package -- it gives us a directive for moving into the future. See if there aren't some particular points of emphasis that you think need to be enhanced or perhaps decreased.

The kinds of comments that we have gotten typically have been expressions of concerns by particular constituent interests that perhaps they are not viewed as important as they believe they are, and frankly we often believe they are in the University. For example, there were a number of comments from academic units where people are very involved in extension work or outreach efforts, or continuing education -- or any of the number of other things that are important to what this University is about -- who want to see that word in there and they look and the word isn't in there. In the mission statement it is stated that we are committed to our land grant heritage of creating knowledge, of reaching out to the community, of being a part of people's lives, but there are people who don't see the word "extension" in there and would like to see it in there. One can understand what their concern is. They want reassurance that we are not moving inappropriately away from our traditional commitments. There are other people who have asked, for example, that the word "professional" be added when we talk about undergraduate and graduate students. The terms undergraduate and graduate are certainly inclusive enough and I don't think that anyone in the University would think that professional school students aren't part of the undergraduate/graduate student body. But, again, I think that the request for a specific reference reflects genuine concerns for people and they want to be reassured that we are not overlooking their importance and their interest in the University. I think there is a natural tendency for constituent groups to want to see the right phrase or the right buzz word and to indicate that we still consider them very much on board.

My own perception is that with all the interests and concerns that I have heard expressed, I do not believe that there is anything in the mission or vision statement that excludes the appropriate constituencies as part of the group that we want to move forward with. But, again, this is a matter of honest judgment. Let me stop there, and respond to any questions that you may have.
November 6, 1992 meeting, Board of Trustees

REPORT ON UNIVERSITY PLANNING, MISSION, AND RESOURCE MANAGEMENT (contd)

President Gee:

Ed, I do think that it is fair to say that although there were a number of comments regarding a particular word or a phrase, in terms of the boundaries of the statement itself, there seems to have been a general agreement that it does provide the appropriate boundary and definition for this University. Am I not correct about that?

Dr. Ray:

Let me make a personal observation. I was a department chair for 16 years and I can tell you that the nature of academics is such as not to tell you when you got something right, but not to miss a beat when it is not quite right. When something of this sort gets circulated for general comment and there is not a lot of strong sentiment expressed, or some thoughtful suggestions about how you might change a word here or a phrase there, then it tells me you are pretty much on the mark -- that people pretty much see what you are about and find themselves comfortable with it. That is sort of my gut reaction to where we are on this issue.

Ms. Casto:

I am going to ask the Committee to meet before the next Board meeting and discuss this. I think it is an excellent suggestion. Thank you, very much.

Dr. Ray:

Ms. Casto, I don't know if you wanted to pursue one other issue. There was some discussion and it really is not clear to me why the nature and the appointments on the University Priorities Committee aren't clearer. There has been an effort to make this information as explicit as possible. If you turn to the three pages that deal with the University Priorities Committee, it is useful to have people hear one of the paragraphs under the charge for this Committee. "This Committee is an advisory and coordinating body, not an administrative or governance committee. Day to day operational decisions will still be made by the appropriate administrative entity, such as the Executive Committee and reviewed by the appropriate element of the University's governance structure."

There is no effort in the creation of the University Priorities Committee to supplant any of the existing processes or mechanisms for making decisions at this University. This group is really intended to, in a sense, be the eyes, ears, and conscious for a central administration, to make sure that we are constantly in touch with University community members before initiatives are undertaken, before long-term targets are set, and before we find that, in fact, there isn't a consensus for a particular long-term agenda item.
November 6, 1992 meeting, Board of Trustees

REPORT ON UNIVERSITY PLANNING, MISSION, AND RESOURCE MANAGEMENT (contd)

Dr. Ray: (contd)

The last page of that three page handout indicates who the individuals are on this committee and I'd only point out that this group includes: three senior administrators, vice presidents, five members of senate committees to get representatives from the various governance bodies, six regular faculty, three students -- undergraduate, graduate and professional school students -- two staff persons, and other resource people associated with it. The idea is to make this group as broadly representative of the University community as possible.

The last few pages of the handout starts with the page entitled, "Long Term Resource Management." Again, we are trying to develop a system of open access to decision making at this University, without allowing anyone to duck responsibility. There are people on this campus who are paid to make decisions, just as you have to make difficult decisions. What we want to be clear to the University community is that this is a mechanism for access, review and consultation of decisions that are made at this University. This group was never intended to take the hit, under the worse of circumstances, for things that may or may not go wrong at this University. It is really intended to provide us with input.

The last several pages consist of a number of questions we need to be asking ourselves such as, "What size should we be? What should be the undergraduate and graduate mix? In what sense do we operationalize our commitment to diversity?", and a number of other issues. I expect we will be sharing this document with the members of the University Priorities Committee and ultimately with the University community at large to get input into the process. We want to make sure we're asking the right long-term questions so as we move forward there is an understanding of where we're going.

Ms. Casto:

Thank you. That's very important and very good that it come to us from within. I think the more people that get involved the better off we are in the long run. I'm glad to see that everybody is moving forward on this.

Mr. Shumate:

Any other questions or comments?

Mr. Barone:

Are there other universities that have followed this procedure? If they have, what has been the effect to date?

President Gee:

There have been several universities that have tried a variety of different planning approaches, several in the Big Ten: the University of Minnesota and the University of Michigan. In all candor, they've gone back three or four times to the beginning because they have failed. I take great pride in the fact that we are much further along than almost any other institution, public or private. I was just with a group
President Gee: (contd)

of colleagues -- at Yale where they had three Nobel laureates meet in a private room and say this is the future of the University, the university president is no longer there and this whole planning process is in shambles. We actually allocated dollars on the basis of a very clear set of priorities this year, and it will be absolutely allocated next year. I think it's because we've been enormously open and communicative about it, frantically so. We've tried to get as many people involved, but ultimately we have made some very tough decisions. We know how good we are because we have everyone in the country coming to take a look at us.

Mr. Shumate:

Any questions or comments? I think it is important for the Trustee Planning Committee to meet and thoroughly review and analyze this information. I would suggest that notice be sent to all Trustee members in case others would like to attend that meeting.

President Gee:

That's a good idea.

Mr. Shumate:

Thank you, Dr. Ray.

WAIVERS OF COMPETITIVE BIDDING REQUIREMENTS
JULY - SEPTEMBER 1992
Resolution No. 93-44

Synopsis: Acceptance of the quarterly report on waivers of competitive bidding requirements is proposed.

WHEREAS the Purchasing Policy of The Ohio State University, adopted by the Board of Trustees on September 7, 1984, and revised on February 7, 1992, provides that the President and/or Vice President for Business and Administration may grant a waiver from competitive bidding in the event of an emergency, when a sufficient economic reason exists, or when the goods or services can be purchased from only a single source, with a report on such waivers to be made quarterly to this Board; and

WHEREAS the Vice President for Business and Administration has submitted a report on waivers of competitive bidding requirements granted for the period of July - September, 1992; and
November 6, 1992 meeting, Board of Trustees

**WAIVERS OF COMPETITIVE BIDDING REQUIREMENTS**
**JULY - SEPTEMBER 1992 (contd)**

WHEREAS during the period covered, the Vice President for Business and Administration, at the requests of the departments making the purchases and upon the recommendation of the Purchasing Department, granted 34 waivers of competitive bidding requirements for annual purchases totaling approximately $13,575,300.00, including $8,748,000.00 for publications for the University libraries and other departments, as shown on the enclosed exhibit:

NOW THEREFORE

BE IT RESOLVED, That the report on waivers of competitive bidding requirements for the period of July - September, 1992 is hereby accepted.

Upon motion of Mr. Shumate, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix X for background material, page 333.)

---0---

**EMPLOYMENT OF ARCHITECTS/ENGINEERS AND REQUEST FOR CONSTRUCTION BIDS**

Resolution No. 93-45

STORM SEWER SEPARATION, PHASE II;
BEVIS HALL - TRANSGENIC ANIMAL FACILITY

Synopsis: The Fiscal Affairs Committee recommended authorization to employ architects/engineers and request construction bids for the listed projects.

WHEREAS the University desires to proceed with the second phase of the Storm Sewer Separation for the Columbus campus with the new storm sewer to service the north and west central portion of the main campus; and

WHEREAS the total estimated cost of the second phase of this project is $1,000,000.00, and the total estimated construction cost is $900,000.00; with funding provided by University bond proceeds; and

WHEREAS the University desires to proceed with the construction of an approximate 20,000 square foot facility to conduct immune deficiency research in Bevis Hall; and

WHEREAS the total estimated project cost is $3,700,000.00, and the total estimated construction cost is $2,750,000.00; with funding provided by University bond proceeds ($2,500,000.00) and a National Institute of Health grant ($1,200,000.00):

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to select qualified architectural/engineering firms as necessary for these projects and that the fees for these services be negotiated between the firms selected and The Ohio State University; and
EMPLOYMENT OF ARCHITECTS/ENGINEERS AND REQUEST FOR CONSTRUCTION BIDS (contd)

STORM SEWER SEPARATION, PHASE II;
BEVIS HALL - TRANSGENIC ANIMAL FACILITY (contd)

BE IT FURTHER RESOLVED, That the President and/or Vice President for Business and Administration be authorized to request construction bids on these projects in accordance with established University procedures, and if satisfactory bids are received, to award contracts, with all actions to be reported to this Board at the appropriate time.

Upon motion of Mr. Shumate, seconded by Amb. Wolf, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

REQUEST FOR CONSTRUCTION BIDS

Resolution No. 93-46

NORTH RESIDENCE HALLS - CHILLER REPLACEMENT, PHASE II
RHODES HALL - SURGERY SUPPORT HVAC REVISIONS

Synopsis: The Fiscal Affairs Committee recommended authorization to request construction bids for the listed projects.

WHEREAS the Office of Residence and Dining Halls desires to proceed with replacement of chillers in Barrett House, Halloran House, Haverfield House, and Houck House; and

WHEREAS the total estimated project cost is $450,000.00, and the total estimated construction cost is $400,000.00; with funding provided by University bond proceeds; and

WHEREAS the University Hospitals desires to proceed with HVAC revisions within the Surgery Support area of Rhodes Hall; and

WHEREAS the total estimated project cost is $136,000.00, and the total construction project cost is $110,000.00; with funding provided by University Hospitals:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to request construction bids on these projects in accordance with established University procedures, and if satisfactory bids are received, to award contracts, with all actions to be reported to this Board at the appropriate time.

Upon motion of Mr. Shumate, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

REPORT OF AWARD OF CONTRACTS AND
ESTABLISHMENT OF CONTINGENCY FUNDS
Resolution No. 93-47

MACQUIGG LABORATORY
OARDC - DAIRY MATERNITY AND CALF BARN REPLACEMENT
OXLEY HALL - MASONRY IMPROVEMENTS
ATI - PHASES II AND III, BUILDING IMPROVEMENTS, POLE BARN, AND
LAND IMPROVEMENTS
SOUTH RESIDENCE HALLS - WINDOW REPLACEMENT

Synopsis: Acceptance of the report of award of contracts and the establishment of contingency funds for the listed projects is recommended.

WHEREAS resolutions adopted by the Board of Trustees on May 4, 1989, September 7, 1990, October 5, 1990, May 3, 1991, and June 5, 1992 authorized the President and/or Vice President for Business and Administration to request construction bids in accordance with established State of Ohio and University procedures, and if satisfactory bids were received to award contracts for the MacQuigg Laboratory, OARDC - Dairy Maternity and Calf Barn Replacement, Oxley Hall - Masonry Improvements, ATI - Phases II and III, Building Improvements, Pole Barn, and Land Improvements, and South Residence Halls - Window Replacement projects.

NOW THEREFORE

BE IT RESOLVED, That pursuant to the actions previously authorized by this Board, the report of award of contracts and establishment of contingency funds for these projects is hereby accepted.

Upon motion of Mr. Shumate, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix XI for background and maps, page 335.)

--0--

REPORT - EXPENSES FOR DESIGNATED ADMINISTRATIVE OFFICIALS
Resolution No. 93-48

Synopsis: Approval for reimbursement of expenses for designated administrative officials is requested.

WHEREAS, the Fiscal Affairs Committee has authorized the payment of expenses for designated administrative officials; and

WHEREAS, it is deemed in the best interest of the University for the Fiscal Affairs Committee to provide from the unrestricted gifts to the University Endowment Fund on an appropriate basis, to the President and designated University officials, reimbursement for expenditures which are directly and necessarily related to the performance of their assigned responsibilities and in the best interest of the University:

NOW THEREFORE
November 6, 1992 meeting, Board of Trustees

REPORT - EXPENSES FOR DESIGNATED ADMINISTRATIVE OFFICIALS (contd)

BE IT RESOLVED, That the Fiscal Affairs Committee be authorized to provide reimbursement to designated University officials from unrestricted gifts to the University Endowment Fund.

Upon motion of Mr. Shumate, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

AUDIT REPORT

Ms. Pichette:

As you know, the University has a contract with Coopers & Lybrand for annual audits of the University for fiscal years 1991-1995. Coopers & Lybrand has completed the audit for FY 1991-1992, and we are submitting that for your acceptance. You should have two documents with your agenda materials, the Audited Financial Statements and a separate report on Internal Control Structures, the Auditors' Recommendation, and the University responses. The audit was reviewed in detail by the Fiscal Affairs Committee at its meeting yesterday. I also want to point out that the Controller's area, the Auditors, and Internal Audit should be congratulated for having this audit completed by September 18. At this time, I'd like to introduce Mark Hilligoss, Director of Internal Audit.

Mr. Mark Hilligoss:

To be brief, we were asked to capsule yesterday's committee meeting and I'm going to ask Bill Shkurti to present the financial review, in Janet Achterman's absence, and then Dave Gaston will present the auditor's report.

Mr. Shkurti:

Thank you, Mark. Janet Achterman, the Controller, would normally make this report, however, her father is undergoing open heart surgery this morning so she asked me to fill in. There's probably nothing worse than a non-accountant trying to explain accounting data, but I will give it a whirl.

There are three things to keep in mind regarding the annual audit report of the University: 1) "Is the audit a clean audit?" and Dave Gaston from Coopers & Lybrand will address that issue; 2) "Is the audit a timely audit?" and Mark Hilligoss will deal with that; and 3) "What does the audit show about the financial condition of the University?" and that's what I will summarize very briefly. I will talk about three areas: revenues, expenditures, and the overall financial health of the University and these will be shown on the slides. I will also refer you to specific pages in the audit book.

The first chart, which deals with the composition of where the money comes from, is on page 5 of your books. You'll see a reference throughout this report to E & G costs -- that is education and general. The reason we use that particular designation is it takes the University Hospitals out of the picture -- not because they aren't important, but they substantially support themselves and, in fact, help the University. To get a picture of what's going on in the main campus academic core of the institution -- what this does is compare the percentage of education and
AUDIT REPORT (contd)

Mr. Shkurti: (contd)

The general cost covered by student tuition and fees. You can see back in the early '80s the students paid about 25 cents out of every dollar of the cost. Then as state support increased steadily in the mid-'80s, the students' share declined steadily by conscious University policy to about 20 percent. Beginning in 1987 when the state budget started to tighten up and state support to universities started to decline, the University made up part of this loss of support by turning to the students for a higher portion of tuition and fees. Now they are back up to 25 percent, which is where we were about 10 years ago. So one way our revenue picture has changed is that students are back to paying a higher share of their education.

If we turn next to the expenditure side, on page 7 of your books, you'll see current fund expenditures by category. There is a category called Academic and Institutional Support, which is essentially central administration. You'll see that over the last year spending in that area has declined by 6.5 percent, while it has gone up in some other areas. That reflects a conscious decision in the University to protect what we call the academic core. Institutional support, although important to the University, is not the academic core, and that is where some of the burden of the budget cuts have been.

If you turn next to page 9, you will see some of the indicators of the overall financial health of the University. This particular chart is called Education in General Equity Trends and simply is a measure, in layman's terms, of the University spending more than it's taking in. You can see in the early '80s the University's financial health was very good. Then beginning in the mid-'80s it started to decline. Part of the conscious decision was to spend down some balance, so that by 1989 it was very close to zero. So additional spending controls were put on and spending tightened up. The University's financial position started to improve until last year. What you're seeing there is the impact of two things, budget reductions from the State and also a one-time hit from the last round of early retirements. The University appropriately put on its books the entire 5 years of early retirement cost to expend that in one year, because that's appropriate conservative accounting practices. It makes that chart look a little worse than it is. Our hope and goal is to get that line back up into the positive next year and in the years after, but I think you can definitely see the impact. The University's financial situation is going in the wrong direction and we need to get that reversed.

Finally, if you turn to page 14, you'll see a chart that measures the University's expenditures for operating and maintaining our facilities compared to our investment in buildings and land. This shows another area where the University has tightened up on spending and that is in the maintenance of our buildings. This is one of the first areas that always gets tightened up, because you don't see an immediate impact from it. But if it continues over time, where we are not investing in the care of our buildings and facilities, it will cost us more in the long run. So this is another financial indicator we are concerned about. It's not at a crisis yet, but if we don't deal with it over the next couple of years, it will be.
Finally, there are a couple of measures on debt service and because of time I won't go into them, I'll just summarize. Essentially what they show is the ratio of plant equity to plant debt and our capacity to take on additional debt. It shows that if you compare it to industry-wide ratios, we still have the capacity to take on additional debt. If you look at the next chart which is the ratio of equity to plant debt, it is a measure of our ability to pay for the additional capacity. So if you view the first chart as how big our gas tank is, it shows we have quite a lot of room left. This next chart shows our ability to pay cash for the gas as we order it. That's a little more constrained, although the figures are still healthy. We have to be careful and very measured in taking on any additional debt.

In summary on page 17, if you look at our revenues, the students' share of our revenues is up and the state's share is down. In terms of expenditures, our spending for administration is down, for instruction, research and student services our spending is up. Also, our spending for plant maintenance and equipment isn't as high as we would like it to be. Finally, if you look at the bottom line measures in terms of equity and debt, our equity is down. We think most of that is the one-time effect of early retirement. Our capacity on debt is good, but our ability to float additional debt is not unlimited. So we will have to be watching our dollars and pennies very carefully over the next year as the full impact of the budget reductions start to show up in the University's financial statements.

Mr. Chairman, that concludes my part of the presentation. I will now turn the podium back over to Mr. Hilligoss.

Mr. Hilligoss:

Thank you, Mr. Shkurti. At this time I'd like to have Dave Gaston, from Coopers & Lybrand, explain a few things in his report to the Board of Trustees.

Mr. Dave Gaston:

In the spirit of giving a brief overview, I'll start by saying that as the outside auditors we have given a clean opinion on the University's financial statements. There was an opportunity to include these financial statements in the very successful bond offerings that the University has been involved with in the last month. The items that we did cover with the Fiscal Affairs Committee are on the screen and I won't go into each of them in any detail. We did discuss how the audit is organized, dealt with the formal communications between the auditor and the University, and included our report on the internal control structure. We then came up with a couple of significant recommendations, which I will go through with the Board in a little more detail.

We also indicated the other reports, the compliance and governmental programs that we're involved with -- indicated what those are by the different areas and departments in the University -- and then spent a few minutes on emerging issues -- things that we see colleges and universities facing in the future. We had an opportunity to spend some time with the committee to answer any questions and to discuss things that they had on their mind. Just as a reminder, Coopers & Lybrand are the primary auditors for the University and at the same time we
November 6, 1992 meeting, Board of Trustees

AUDIT REPORT (contd)

Mr. Gaston: (contd)

subcontract approximately 20 percent of the work to two minority firms. Those firms are Parms and Company, who deal primarily with student financial aid; and Manoranjan and Jayanthan, who deal with WOSU, both radio and TV reporting.

As I indicated, we dealt with two new specific recommendations for the Board's consideration this year. The first recommendation dealt with the external release of what we'll call significant financial information. We recommended that the Controller's office be a switch point or controlling factor for the release of a number of reports that go to the public and represent the University's financial position.

The second recommendation is assisting Judge Duncan and his organization, Legal Affairs, on how we account for and communicate the contingent liabilities for pending litigation. As you know, the University has a number of cases that are always in process and this is a way of coordinating that information for financial purposes.

In addition, we did bring back to your attention two comments from last year. First, on the information technology environment -- indicating the decentralized and perhaps outdated situation that we deal with, and also to indicate that the University has taken steps to address this. The reason the comment is back is just to reemphasize the need for continued involvement. The second comment has to do with the central maintenance of some of the records that apply to vacation and sick leave for the University. We think this should be standardized and brought into compliance with state requirements.

In other areas, the recommendations we made last year were fully implemented and on one, the timeliness of financial information and speaking with one voice on tax issues, we were complementary to the Controller's office for how those had been dealt with. Basically, that covered our presentation and consideration.

Mr. Shumate:

Are there any questions?

ACCEPTANCE OF THE REPORT OF AUDIT RECOMMENDATIONS AND RESPONSES FOR 1991-92

Resolution No. 93-49

Synopsis: The report of the audit recommendations and responses for The Ohio State University for 1991-92 conducted by Coppers & Lybrand is recommended for acceptance.

WHEREAS in April 1991, with the approval of the Auditor of State, The Ohio State University entered into a five-year agreement with Coopers & Lybrand for an annual audit of the University for fiscal years 1990-91 through 1994-95; and

WHEREAS the Coopers & Lybrand audit of the University for 1991-92, meeting the requirements of the Auditor of State, has been received and the accounts, records, files, and reports of the University have been found to be in satisfactory condition, but certain recommendations have been included in the audit report; and
November 6, 1992 meeting, Board of Trustees

ACCEPTANCE OF THE REPORT OF AUDIT
RECOMMENDATIONS AND RESPONSES FOR 1991-92 (contd)

WHEREAS the auditors’ recommendations have been studied by the appropriate University offices, and procedures and responses have been developed as a result of the recommendation:

NOW THEREFORE

BE IT RESOLVED, That the report of the Coopers and Lybrand audit for The Ohio State University for 1991-92 (including the report on the audit of the University financial statements; the report on the internal control structure; and the summary of recommendations to management) and the management responses to the recommendations be accepted.

Upon motion of Mr. Shumate, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

TERM EXTENSION FOR UNIVERSITY FOUNDATION
BOARD OF DIRECTORS

Resolution No. 93-50

Synopsis: One-year term extension for current elected directors of the University Foundation whose terms have expired is proposed.

WHEREAS in order to provide continuity to The Ohio State University Foundation, the Board of Directors requests that the terms of office for current elected directors, whose terms expired at the end of October 1992, be extended by one year:

NOW THEREFORE

BE IT RESOLVED That term extension for Directors of the University Foundation described above be hereby approved.

Upon motion of Mr. Shumate, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

ACADEMIC AFFAIRS COMMITTEE MEETING
POST TENURE REVIEW

Mr. Kessler:

I’d like to call on Nancy Rudd for the presentation on post tenure review.
Ms. Casto:

Jack, I'm going to stall you one more minute. Last month when we had the presentation on the teaching workload, it was excellent and I think that everyone here was pleased with it. I wondered if we are then to draw a conclusion from that and say this is the standard workload that is acceptable for teaching versus research or research versus teaching. Are we going to draw a standard from that?

Dr. Nancy Rudd:

No. The purpose of that session was really to just help you understand the variety of work that faculty undertake and the differences among faculty and their workload. Some faculty teach more, some do more research, some are more involved in service. It was also intended to help you understand the diversity of teaching activities in and of themselves. We are in the process of developing guidelines which will be distributed right after the start of Winter Quarter, to ask departments to develop workload policies of their own. Those will revolve around teaching responsibilities, but they will not preclude the possibility that some faculty will teach more and others will do more research. The department simply needs to rationalize what it is it's doing, so that it is clear that all faculty are carrying their fair share of the load.

Ms. Casto:

I thought that came through in the reports. I didn't know if we were going to, for example, say this is what we're looking towards or we were to draw a conclusion. We will look forward to your report.

Dr. Rudd:

Thank you. The topic for today's Academic Affairs Committee Meeting is that of faculty performance review and the emphasis is on post tenure review. I'd like to make just a few additional comments with regard to background, in addition to those that are in your agenda materials. I also have with me today panelists who are here to talk with you.

As you probably know, the institution of tenure has undergone periodic attacks by those outside higher education probably for as long as it has existed. The magnitude of these attacks seems to be greater now and I think this is part of just the broader scrutiny to which higher education is being subjected.

One of the beliefs underlying these criticisms is that tenure provides faculty with a job for life, regardless of how productive they are. Some seek to remedy this perceived problem by eliminating tenure all together or by weakening it in some way. Others call for what is referred to as a post tenure review. As is indicated in the materials, this term "post tenure review" is somewhat misleading because faculty are subjected to reviews throughout their careers both before tenure and after tenure. In fact, they probably undergo more review than just about any other kind of professional I can think of. But nonetheless, there are faculty -- hopefully a small percentage of the total at Ohio State -- who do become unproductive over time. They do receive little or no salary increases and their non-productivity is usually addressed in that way. But I have to admit that unless they can be encouraged to retire or to leave the institution in some other way, they do remain employed. The concept of a post tenure review which really refers to a very
POST TENURE REVIEW (contd)

Dr. Rudd: (contd)

intensive periodic review about every 5 years -- possibly even involving outside letters such as we get during promotion and tenure processes -- is one that's been designed to address this issue. The notion is that if the review were negative, either efforts would be made to quickly turn the situation around or termination would be sought for the faculty member.

We've considered developing a post tenure review process here at Ohio State, but at least for now potentially serious problems with it are leading us to seek an alternative method for improving our accountability and for assuring that faculty either remain productive or they leave. One of the problems associated with this elaborate process is that most tenured faculty do remain productive. In fact, at Ohio State many of these people are leaders in their fields. If we create a very elaborate periodic review process that everybody has to go through, then we're going to a great deal of effort to address a relatively small problem. This is probably not a very good use of resources and it would probably make our best faculty angry enough to consider whether this is really the kind of work environment they want. Also, if outside letters were solicited from peers at other institutions, that would generate a certain amount of hostility because faculty, in particular the better faculty, are already pretty much burdened having to write these kind of letters for promotion and tenure candidates around the country. The second problem with this kind of process is that if faculty are becoming problematical, they really need to be monitored continuously, rather than every 5 years.

So what we're trying to do for now is address any weaknesses in our review processes that exist and to develop guidelines that will be promulgated from our office for regular reviews, probably annually -- perhaps not quite that often -- which will assure that all faculty receive the kind of evaluation and feedback that they have a right to expect. We also hope to address developing problems in a timely and appropriate fashion.

Four administrators are here today to talk with you about some of the issues involved in carrying out performance reviews and to respond to your questions and comments. They represent four very different disciplines and that is by design, because some of the issues involved with performance review are very different. All these people here are or have been department chairs: Jim Garland, current Dean of the College of Mathematical and Physical Sciences and former Chair of the Department of Physics; Morris Beja current Chairperson of the Department of English; L. H. Newcomb, Associate Dean of the College of Agriculture and former Chairperson of the Department of Agricultural Education; and Jim Naylor, Chairperson of the Department of Psychology. These individuals have prepared brief comments with regard to their perspective on performance review, but they're also prepared to begin answering questions if Board members would prefer to go that way.
POST TENURE REVIEW (contd)

Dean Jim Garland:

Thank you, Nancy. I thought what I would do is to provide some context about the kind of performance reviews that we already do for faculty. I'll limit my remarks to the performance reviews for full professors, which differ markedly from the reviews that we do for the junior faculty. I will also limit my remarks to what takes place in the Department of Physics, which is, of course, what I know about in the most detail.

In December or January of each year, faculty members are asked to fill out a performance and professional activity questionnaire. This is about a five-page questionnaire, which is sent to every member of the faculty and is divided into three parts -- teaching, research, and service. In teaching, professors are asked to fill in information on the courses that they have taught. They are suppose to describe any innovative class materials they have developed, any new curricular ideas they have come up with, and provide copies of the relevant documentation. We provide for them an analysis of the student evaluation of teaching questionnaires that are distributed in the department to students every quarter. We also maintain a file in the office for letters of complaints or praise from students, and sometimes parents, and those become part of the dossier that we collect on each faculty member.

With regard to research, professors are asked to list papers they have published during the previous 12 months, to provide copies of any papers that have been submitted, and to provide a statement of their work that is in progress. They are asked to give the details of any invited papers or talks they have given at major international conferences and any contributions to conference proceedings. They are asked to supply information about proposals they have written and submitted; about the level of their grant and contract support; and they are also supposed to write a paragraph detailing any significant accomplishments they feel they have made in the research area.

With regard to service, they are asked to explain what they have been doing on department and University committees, such as whether they have served on any national workshops or advising panels, whether they have been organizers of conferences, and whether they have worked on any special projects on behalf of the University or on behalf of their discipline. They are also suppose to describe any advising that they have done for students.

I, as department chair, and my two vice chairs would sit down and review the dossier for each of these professors. The way we did it in Physics was probably more quantitative, as you might expect, than what some departments would do. We actually assigned a numerical ranking for each professor in teaching, research, and service. That person got a plus 2, plus 1, zero, minus 1, or minus 2, in each of the three categories. When this was completed we then actually rank-ordered everybody in the department from first to last. That then formed the basis for making our salary raise determinations. I should also say that before this process began we would send out a letter to each of the faculty members informing them of the criteria we were going to use in making salary recommendations. This criteria had been discussed by the faculty and was broadly approved by the faculty. After the process was completed, I sent a letter to each of the professors telling him or her what their raise was going to be and how that person's raise fell into the statistical profile in the department. I invited that professor to come and talk to me

312
POST TENURE REVIEW (contd)

Dean Garland: (contd)

if there were any questions or concerns about the raise, or if that person wanted
me to justify the basis on which the raise was given. I think that all departments
have slightly different mechanisms, but I think that probably captures the general
sense of what goes on in most of the academic departments.

Dean L. H. Newcomb:

I think Jim captures fairly well the basic pattern in Agriculture. The Department of
Agricultural Education is a smaller department than some of the others that are
represented here. An additional twist which we add to this -- interestingly by faculty
vote -- is a policy that, in addition to student reviews and peer reviews of teaching,
the department chair must see each faculty member teach at least once each year.
This was to be followed by a personal conference regarding strengths of the
performance and concerns that might be addressed in the future. Another thing in
a smaller department that we did follow -- it is very similar to Jim's outline -- we
would have a personal conference between the department chair and each of the
faculty members. This allowed for some additional face to face feedback, in terms
of how I, as department chair, saw their performance in each of the areas of
teaching, research, and service, and my qualitative judgment about how they were
doing, which would lead to recommendations for varying levels of salary increases.

I would just say to the Board that it is my considered judgment that we have a
mechanism at Ohio State which we need to assure is working. That is that every
dean and every department chair fulfill their obligation to be sure that each member
of the faculty is annually reviewed and provided feedback. If there are people who
are not performing -- tenure is not a guarantee for life -- we do have processes that
we can follow to detenure people for just cause. We ought to be willing to embrace
that. I would not favor a five-year review. That is my personal point of view. It will
take enormous amounts of time to do that in terms of clock hours, of all the
committees involved and of the preparation time for the individual. And, frankly, I'd
like to consider what it can lead to and that is documenting more of that which is
easy to document, which I think will produce behaviors that are counter to what I
hope this University wants to be about. Namely, it will deemphasize teaching at the
cost of overemphasizing research and publication, in my view, because of the
documentation distinctions between those two categories.

Dr. James Naylor:

Our procedure is virtually the same. I would say that it is my firm conviction that
Ohio State does an excellent job of annually reviewing its faculty at all levels, from
the very beginning assistant professor up to the most distinguished full professor. I
think we take that charge very seriously, we see it as a developmental issue with
our younger faculty, and we see it as a supportive issue with our senior faculty. I
think these reviews are very thorough and there is no instance in which I am not
fully aware of the performance of every member of my faculty. I do not think the
annual five-year reviews that are proposed are something that would add to this
process, and I have a serious concern that they would detract from them.
POST TENURE REVIEW (contd)

Dr. Morris Beja:

I guess I, too, would like to stress the fact that evaluations are already constantly going on. Obviously, in some ways it is especially complex in cases of promotion or tenure, but it goes on throughout a faculty member's entire career. For example, when it comes to merit salary increases -- and I sure hope someday that it will come to that -- people have raised the issue of the balance between teaching and scholarship in the ways we evaluate teachers. Several years ago in my department we changed what used to be an annual bibliography, in which faculty indicated what they had published during the last year, to an entire professional report. This included service to the profession, but also service to the University, records of teaching, records of how much dissertation advising they had done, campus service, and M.A. theses. That report is distributed to the entire faculty prior to the chairs receiving recommendations about merit salary increases.

Jim talked about the quantitative nature of a lot of what goes on in Physics. That report I mentioned is obviously a quantitative document, but efforts are also made at qualitative assessments -- evaluating scholarships for example. Yes, I think this is where it is a little different from what L. H. Newcomb said. English is a very large department and it gets particularly complex with a lot of people in very diverse fields. These fields include the traditional literary historical periods, but also non-historical fields like composition studies, rhetoric, folklore, drama, creative writing, and literary theory. Each of which has particular approaches and expectations which may be different from those in other fields. In teaching, too, there can be major differences -- not only from faculty member to faculty member, but even within a given faculty member's diverse responsibilities. In one quarter, for example, she or he may teach a large lecture course and a small workshop, or a discussion class for majors and a freshman composition class, or an honors class for majors and another large lecture course. All the time, by the way, advising undergraduates in their major, advising Ph.D. students, directing dissertations, and so on. All those different kinds of activities have to be evaluated in very different ways.

In evaluating the teaching we rely very heavily on student evaluations, but also on extensive visits by senior colleagues. In our case, we like to read words and we rely on statements of their own procedures and policies, and philosophies and approaches by the faculty themselves. All faculty, including those with tenure, must submit evidence of their teaching effectiveness periodically.

Mr. Skestos:

I have a question for Dean Garland. In your ranking system, do you notify each one of your professors of their rank so that they know where they stand, at least in relationship to the rest of the people in their department?

Dean Garland:

No. I'm not sure what the present chair in the department does, but I did not. I don't think the rankings are that -- they are good for giving you a rough indicator of performance, but I don't think -- I could imagine a fire storm in the department if I told somebody that he was number nineteen and his colleague down the hall.
POST TENURE REVIEW (contd)

Dean Garland: (contd)

was number eighteen. The system has quantitative overtones, but it is not so precise that this would be prudent.

I realize that what I have just described is this nice clean kind of process. But in fact, the evaluation of teaching and research is actually very hard to do and there are a lot of subjective overtones. You know we can look at these student questionnaires that come in, and we do look at them, but there are many factors that determine a professor's grade on a student course evaluation. It can involve how hard the last mid-term exam was, whether the professor gives partial credit easily or not, it can be affected by the temperature of the room, or whether the course was early in the morning or late in the afternoon when everyone was tired, or it can involve the nationality of the professor. There are all kinds of issues that get folded into course evaluation surveys that makes a precise determination of their meaning very difficult. What they are good at doing, and I really do believe this, is identifying the outstanding extremes -- the very good teacher or the very bad teacher. I think that they are also very good at identifying mechanical faults with a person -- someone who writes large enough or clearly enough on the blackboard, or speaks clearly or maintains eye contact with the students, or whether the person shows up late for class. They are very good at identifying that type of problem, but there is this big area in the middle of the extremes where I think the evaluation becomes very subjective. As a chairman, I found myself relying on the sort of scuttlebutt in the department, "Well, Smith is pretty good, everyone knows he's good." I will fold in my own subjective opinion of how Smith did when he gave a colloquium to the rest of the department, whether he presented his ideas to me in an orderly manner, etc. So there are a lot of subjective elements that go into these, and we try to quantify it as much as we can.

Mr. Skestos:

Suppose that I am teaching in your department and on your list that you make up in rankings, I keep coming up number 40 out of 40 for 2 or 3 years. I assume I am not getting any kind of merit raise, assuming that there are merit raises in effect at that time. Do you call me in and have a long talk with me and say, "Now, George things are not looking too good for you. For the last several years you have not been performing at least at some kind of average that we expect out of someone. We are going to look for you to do better and if you don't, then you and I are going to sit down and we are going to have to do some serious talking." Does that take place or not? How do you do that? Do you ever get rid of anyone that constantly fails to perform?

Dean Garland:

Do you mean do we tell them to go home and not come back?

Mr. Skestos:

Well, I suppose eventually that kind of a situation --
Dean Garland:

I tried to have talks and to work with faculty members whose teaching was not up to par. I found that usually, not always, professors would welcome suggestions. In fact, Leonard Jossem is an Emeritus Professor in my department and some of you may know that he is very interested in improving teaching quality. On his own initiative he would offer to videotape people and play the tapes back to them and critique the tapes. He would try to help them understand how they could be more effective at what they did. I also have to say that I probably didn't do it as systematically as I should have, and I tended to avoid doing it with professors who I felt were simply doing what they could do and weren't really capable of doing much better.

Mr. Skestos:

The review process is time to let you know what is happening out there, at least to get feedback as department chair, but it is also obviously to determine merit raises. What happens to those people who are consistently down at the bottom that get no raise when some are given? Do you have a program? Have you thought this out? Do you take action against them? Do you seek a removal? It is a bad situation when I suddenly become a professor and decide that I have other things on my agenda rather than what I use to do. Is there a process by which you can rid the department of these people and bring in people that are going to be more aggressive and perform above the average?

Dean Garland:

There is a process and fortunately I didn't have to use it when I was department chair because I think that virtually all the faculty members in my department took their teaching responsibilities seriously. That is not to say that they were all excellent teachers, but I think that they took the responsibility seriously. I wasn't aware of any egregious lapses of responsibility of the 50 people in my department. What I did as a practical matter for the professors that I felt weren't strong teachers, I tried to screen them from the critical courses. When we made teaching assignments I would certainly factor in my perceived quality of the teacher. So those courses where the subject matter was particularly subtle and we really needed somebody who was very good at explaining complex subjects, we would try to put the right kind of person into that course. There are other types of courses where the subject matter was quite elementary and what was really important is that the professor be able to establish a good rapport with the students and be enthusiastic and convey a sense of excitement about the discipline. You try to put those people in this core curriculum.

Mr. Skestos:

When you hear complaints from time to time -- even in the mathematics department, more so than any other place -- that there are a lot of grad students having difficulty with the English language. They are teaching a very difficult course as it is, and there is a failure of communication between the graduate teacher and the student. Is that a problem that you are looking into? How do you rectify that?
POST TENURE REVIEW (contd)

Dean Garland:

You ask a very complicated question. Let me try to put it into context -- first about the use of teaching assistants, because I know there is often concern about the number of classes that are taught by teaching assistants. There is a rule of thumb in my area, which is mathematical and physical sciences, we estimate that the most students that a single faculty member can accommodate in a quarter is roughly 30 on average. What I mean by that is if you ask the professor to get to know the students, to take an interest in them, to provide them with some individual attention, you can accommodate about 30 students a quarter. Last quarter in my college we taught 27,000 students, we have about 250 faculty, and that comes out to about 110 students per faculty member. So we are way over that 30 criterion. That gap is basically made up with graduate teaching assistants. If we didn't have the graduate teaching assistants, aside from the other impact on our graduate programs, it would mean that we would need a faculty of about 900 people. So we have to depend, for financial reasons and for a whole variety of other reasons, on graduate teaching assistants.

Now what we do with our teaching assistants when they come to Ohio State? The first thing we do if they are foreign students is give them language tests. As a matter of fact, we don't even admit them until they pass a certain minimum threshold language exam and they are standardized tests of the English language. Then those who pass that filter when they come to our college are put into a training program. That training program is given on a department by department basis. We basically give them techniques on how to be teachers, we stand them up in front of hypothetical classrooms, we critique them, and give them feedback on how they are doing. Once they pass that, then we are prepared to put them in front of students. Now sometimes our admissions mechanisms break down or it is clear to us that they are not going to make good teachers. We ask those students to be graders, and we don't put them in classrooms. The students who do pass our criteria, get assigned typically to recitation sections or to introductory laboratories. We have about 900 graduate students and I would say about 20 of those, when they become senior graduate students, with four or five years of experience under their belt, we will actually let them lecture sometimes to introductory classes. Now those people usually do an outstanding job.

Amb Wolf:

Can you indeed withdraw tenure from a faculty member? I mean the purpose of post tenure review --

Dr. Rudd:

We have a faculty rule which -- I go around calling 5-04, because I have been working on a revision of it for seven years now and it feels like a part of me -- defines a process by which a faculty member can be detenured for a variety of reasons. That generally falls into two categories: serious incompetence or grave misconduct. It is however a rather difficult rule to use. The process is very elaborate, and to some extent it should be elaborate, because if you are going to detenure a faculty member -- and for the faculty member this almost amounts to capital punishment -- then you do want to make sure that your processes allow for
POST TENURE REVIEW (contd)

Dr. Rudd: (contd)

maximum fact finding and rebuttle by the faculty member. But having said that, it is a very difficult process to use, and it is not used.

I would say that to my knowledge no faculty member has ever been detenured for incompetence. In fact, I believe that rule has only been used three times: once to remove a faculty member who had disappeared, and two other cases recently which did not involve the type of things that we are talking about now. In my view, part of why we have not done this is that our budget situation has not been as tight as it is now. It is so grueling to go through the process, that department faculty peers have been willing to some extent to work around problems. I would rather suspect that things are changing.

Amb. Wolf:

In some institutions do they grant tenure for a certain period of time? Like for a ten year period or --

Dr. Rudd:

Not at the kind of institutions that we compete with. For a research institution, because of the importance of academic freedom and scholarly activities, tenure is considered to be a commitment until retirement, unless it is removed for cause. That cause would be serious incompetence, grave misconduct, and so on.

Dean Newcomb:

I would like to argue to the Board that the tenure for 5 years or tenure for 10 years is not tenure at all. If tenure is going to protect academic freedom, and that is what we are after, it cannot be in little fixed increments at which time some administrator, me or otherwise, can wait out a person and then conveniently wipe the slate clean. Frankly, I can tell this Board that I have had occasion in my career at Ohio State to be very grateful for academic freedom. Nothing that ever reached any high level administrative offices, but we did have a situation in my department where part of some of our salary was paid for by another state agency. We did have an individual in charge of that budget at one point in time that attempted to instruct me to teach different content in a different way than I was doing. And I would say to the Board, that is the very heart of the matter of academic freedom and responsibility and competence.

As I reflected about that early in my career, I was very grateful that I could not be subject -- and that was before I was a full professor -- to the whims of some individual who happened to think that their judgment was better on a solid academic matter than was my own. So I would be very cautious about 5 and 10-year increments, because I don't think that is tenure at all. That just says that if you behave for five years and do it the way we want, we may extend it again. If you really want to be pursuing truth that is volatile -- which doesn't happen often, but is the very heart of this issue -- I think that you have to have the protection of tenure.
November 6, 1992 meeting, Board of Trustees

POST TENURE REVIEW (contd)

Amb. Wolf:

What about when a person is appointed to a chair, do you appoint chairs for term limits?

Dr. Newcomb:

Four-year terms -- to be reviewed by the faculty and dean, and subject to reappointment or not at the pleasure of the dean.

President Gee:

You are looking at the most vulnerable people at the University right now, followed shortly by me. I would like to make a couple of comments. I have been listening to this and these are very insightful questions. The issue of removing someone for cause is an issue of grave importance, but I might note that when we get to that point it shows a failure in our system, and we need to understand that. If this University is doing what it should be, there should never be an instance when we remove someone for cause, because of the fact that we have had a continuing review process. No member of any activity, whether it be a member of a law firm or whether it be a member of any other public or private group, is reviewed more aggressively and continually than our faculty members. The thing that I am concerned about is the other side of the coin. In today's world, as we bring particularly young people into the University, I am concerned that we don't give them enough help, and embrace and mentor them enough. I am afraid that we view this very often as the rite of passage. Many people come to this institution and never get tenure and that in many ways is a failure of our system. Because what happens with that process is that we throw you in and say, "Listen you've got this bright young person with this great degree, thank you, very much. We will see you in seven years and in the meantime we are just going to pound on you." It is a very, very difficult process that they go through. I am afraid that through that process sometimes we create a sense of cynicism and a variety of other things by those who make it through the process.

I'm delighted to hear from several of our department chairs here today, that there is now, and progressively so, an institutional issue in which we are trying to mentor people. Professor Beja's point, I think, was a good one, of trying to bring people in and talk to them and embrace them. George, your point about what happens to number 40. There are many departments in this institution where number 40 is one of the very best people at the University. In other words, what I am saying is that many times 40 out of 40 is still a person who is doing a very good job or an adequate job. What we have to try to do with number 40 or number 1 is to make certain that there is an expectation. The University should also have an expectation of this mentoring and creating an environment in which people really want to progress. The colleagues that I work with across this institution clearly have that sense of commitment. That is the reason they are here. But I often worry about the University's commitment on the other side, of providing the kind of resources, the kind of help in the classroom, and the kind of technology for them to meet that obligation so they no longer are 40. I think that has to be one of our major processes.
November 6, 1992 meeting, Board of Trustees

POST TENURE REVIEW (contd)

President Gee: (contd)

I often hear the story, "Well, do you detenure people?" There are institutions across this country that have had detenuring processes. I would submit to you that those also would be the type of institutions that have never made the kind of commitment up front that we have made, in terms of qualitative evaluations.

Dr. Rudd:

I might add, that as we work this year with department chairpersons and deans to try to assure that the performance review process is what we expect them to do, there will be a very heavy emphasis on the responsibility of chairs and deans to work with faculty in the area of faculty development. That is the primary purpose of this process. It is not to get bad guys and move them out, but to continue to invest in people that we have already invested in considerably and who can be tremendous assets to the institution. That is not only an important way of looking at this process from the perspective of the good of the institution, but it is very important to generate the kind of faculty loyalty that we need to keep our best people. If we create a very hostile environment in which the attitude is simply, "You either produce or we are going to kick you out," we are going to have a very hard time attracting and keeping good faculty.

Mr. Celeste:

Mr. Chairman, are there any other questions for Nancy or the other folks? We thank you, very much, for being here and making presentations and responding to questions.

RENAME OF DEPARTMENT

Resolution No. 93-51

Synopsis: The approval to rename the Department of Judaic and Near Eastern Languages and Literatures to the Department of Near Eastern, Judaic, and Hellenic Languages and Literatures is proposed.

WHEREAS the proposed change of name of the Department of Judaic and Near Eastern Languages and Literatures to the Department of Near Eastern, Judaic, and Hellenic Languages and Literatures has been approved by the faculty in the Department, and by the College of Humanities Executive Committee; and

WHEREAS the proposed name change will provide visibility to the academic program in Modern Greek and more accurately reflects the programmatic offerings of the Department which include undergraduate and graduate degree programs with concentration in Modern Greek as well as Arabic, Byzantine Greek, Hebrew, Persian, Turkish, and Yiddish; and
RENAMING OF DEPARTMENT (contd)

WHEREAS the Council for Research and Graduate Studies has approved the name change for the graduate degree program, M.A. in Judaic and Near Eastern Languages and Literatures to M.A. in Near Eastern, Judaic, and Hellenic Languages and Literatures; and

WHEREAS this proposed change has the approval of the Council on Academic Affairs, and was approved by the University Senate at its October 3, 1992 meeting:

NOW THEREFORE

BE IT RESOLVED, That the proposal to change the name of the Department of Judaic and Near Eastern Languages and Literatures to the Department of Near Eastern, Judaic, and Hellenic Languages and Literatures, effective January 1, 1993, is hereby approved.

Upon motion of Mr. Shumate, seconded by Mr. Colley, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

HUMAN RESOURCES REORGANIZATION

Resolution No. 93-52

Synopsis: Amendments to the Bylaws of the Board of Trustees and Rules of the University Faculty are proposed to reflect the organizational changes made within the Office of Human Resources.

WHEREAS the Office of Human Resources and Relations has undergone restructuring and reorganization in order to achieve more flexibility, increased productivity, and effectiveness; and

WHEREAS as part of the reorganization of the Office of Human Resources, amendments to the Bylaws of the Board of Trustees and Rules of the University Faculty are necessary to effectuate the changes proposed outlined below:

3335-3-156 Vice president for human resources and relations.

(A) The vice president for human resources and relations shall be the executive head of the office of human resources and relations.

(B) The major area of responsibility and authority of the vice president for human resources and relations shall be that of the administration of human resources PROGRAMS AND SERVICES FOR FACULTY AND STAFF, training and development, human relations of the university, and affirmative action/diversity. Without limiting the generality of the foregoing, the vice president for human resources and relations shall, under the direction of the president and subject to the approval of the board of trustees, be responsible and have the requisite authority for: human resources, including professional and staff employment services; employee relations, including negotiating with the labor unions; compensation services; benefits administration; classification AND COMPENSATION administration, including determining which employees and positions are to be in the unclassified and classified service; PAYROLL; APPOINTMENTS PROCESSING; AFFIRMATIVE ACTION/DIVERSITY; DISPUTE RESOLUTION, INCLUDING CIVIL RIGHTS; PERFORMANCE MANAGEMENT; the i.d. center, retirement affairs; personnel research and HUMAN RESOURCES INFORMATION systems; and safety and health; training and development;
HUMAN RESOURCES REORGANIZATION (contd)

including career development and counseling; education and staff training; AND DEVELOPMENT; ORGANIZATION DEVELOPMENT; faculty/staff assistance; substance abuse programs; human relations, including dependent CAREER care; WORK AND FAMILY PROGRAMS; veterans affairs; partner/spouse assistance; recognition and awards; and RETIREMENT AFFAIRS faculty, staff and student advocacy; affirmative action/diversity, including civil rights, disability services (faculty and staff), the commission on women; and research and information.

(C) The principal administrative officials in the office of human resources and relations shall be the associate vice president for EMPLOYEE RELATIONS AND AFFIRMATIVE ACTION human resources, the associate ASSISTANT vice president for human RESOURCES SERVICES relations, THE ASSISTANT VICE PRESIDENT FOR HUMAN RESOURCES AND ORGANIZATION DEVELOPMENT, and such other associates as may be authorized from time to time. (B/T 7/12/91, 11/6/92)

NOW THEREFORE

BE IT RESOLVED, That the proposed amendments are hereby approved and that the Secretary of the Board of Trustees is hereby authorized and directed to incorporate the recommended changes in the applicable sections in the Bylaws of the Board of Trustees and Rules of the University Faculty.

Upon motion of Ms. Casto, seconded by Mr. Shumate, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

(See Appendix XII for organizational chart, page 347.)

--0--

DEGREES AND CERTIFICATES - AUTUMN QUARTER COMMENCEMENT

Resolution No. 93-53

Synopsis: The Academic Affairs Committee recommended the approval of Degrees and Certificates for Autumn Quarter.

WHEREAS pursuant to paragraph (E) of rule 3335-1-06 of the Administrative Code, the Board has authority for the issuance of degrees and certificates; and

WHEREAS the faculties of the colleges and schools shall transmit, in accordance with rule 3335-9-29 of the Administrative Code, for approval by the Board of Trustees the names of persons who have completed degree and certificate requirements:

NOW THEREFORE

BE IT RESOLVED, That the degrees and certificates be conferred on December 11, 1992, to those persons who have completed the requirements for their respective degrees and certificates and are recommended by the colleges and schools, and that the names of those persons awarded degrees and certificates be included in the minutes of this meeting.

Upon motion of Amb. Wolf, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--
RESOLVED, That the personnel actions as recorded in the Personnel Budget Records of the University since the October 2, 1992 meeting of the Board, including the following Appointment, Appointment of Chairperson and Director, Leaves of Absence Without Salary, Leaves of Absence Without Salary--Continuation, Professional Improvement Leave, Emeritus Title, and Medical Staff Appointments (The Arthur G. James Cancer Hospital and Research Institute) as detailed in the University Budget be approved and the Medical Staff Appointments/Reappointments (The Ohio State University Hospitals) approved September 24, 1992, by the Hospitals Board be ratified.

**Appointment**

Name: MARTHA E. SUCHESTON  
Title: Associate Professor (The Harry C. and Mary Elizabeth Powelson Professorship of Medicine)  
College/Department: Medicine/Cell Biology, Neurobiology, and Anatomy  
Effective: October 1, 1992  
Salary: $47,484.00  
Present Position: Associate Professor, Department of Cell Biology, Neurobiology, and Anatomy

**Appointment of Chairperson and Director**

October 1, 1992 through September 30, 1995  
Center for Slavic and East European Studies Allan K. Wildman  
October 1, 1992 through September 30, 1996  
Geodetic Science and Surveying Clyde C. Goad

**Leaves of Absence Without Salary**

WALTER D. NEUMANN, Professor, Department of Mathematics, effective Winter Quarter and Spring Quarter 1993, to work with a research group in the Department of Mathematics at Melbourne University, Melbourne, Australia.

ERNST A. RUH, Professor, Department of Mathematics, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993, to conduct research at the University of Fribourg in Switzerland.

RANDALL L. DOUGHERTY, Associate Professor, Department of Mathematics, effective Autumn Quarter 1992, to conduct research at the University of Colorado at Boulder.

SUE E. LEURGANS, Associate Professor, Department of Statistics, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993, for personal reasons.

GEORGE J. MAJDA, Associate Professor, Department of Mathematics, effective Winter Quarter and Spring Quarter 1993, to conduct research at the Institute for Advanced Studies at Princeton University.

JOHN P. VIMMERSTEDT, Associate Professor, School of Natural Resources (OARDC), effective October 1, 1992, through October 31, 1992, for personal reasons.
PERSONNEL ACTIONS (contd)

Leaves of Absence Without Salary (contd)

JAN MOUSING, Assistant Professor, Department of Veterinary Preventive Medicine, effective November 1, 1992, through June 30, 1993, for personal reasons.

ANNE E. NORRIS, Assistant Professor, Department of Family and Community, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993, for personal reasons.

MELANIE STEIN, Instructor, Department of Mathematics, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993, to visit some German universities.

THOMAS B. WARD, Instructor, Department of Mathematics, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993, to continue his current research project at the University of East Anglia in the United Kingdom.

Leaves of Absence Without Salary--Continuation

ROMAN T. SKARDA, Associate Professor, Department of Veterinary Clinical Sciences, effective April 1, 1992, through March 31, 1993, to continue work at the University of Zurich.

JOAN F. FITZGERALD, Assistant Professor, Department of City and Regional Planning, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993, to continue research at the University of Illinois.

Professional Improvement Leaves

JEREMY COHEN, Professor (Samuel and Esther Melton Professor of Jewish History), Department of History, effective Summer Quarter and Autumn Quarter 1993.

WILLIAM L. HEWARD, Professor, Department of Educational Services and Research, effective Winter Quarter and Spring Quarter 1993.

Emeritus Title

LUCY D. VENABLE, Department of Dance, with the title Professor Emeritus, effective August 1, 1992.

Recision of Notice of Appointment

The Notice of Appointment dated July 10, 1992, covering the Academic Year 1992-93 which was issued in error to Associate Professor Blanca Kent is hereby rescinded.

Medical Staff Appointments (The Arthur G. James Cancer Hospital and Research Institute)

August 1, 1992 - June 30, 1993

Starling, Randall Carson, M.D., Associate Attending Staff, Department of Internal Medicine - Division of Cardiology

Vaccarello, Luis, M.D., Attending Staff, Department of Obstetrics/Gynecology

Eaton, Lynne Antoinette, M.D., Associate Attending Staff, Department of Obstetrics/Gynecology

Bona, Susan J., M.D., Associate Attending Staff, Department of Pathology

Wasielewski, Ray Carl, M.D., Associate Attending Staff, Department of Surgery - Division of Orthopaedic Surgery
November 6, 1992 meeting, Board of Trustees

PERSONNEL ACTIONS (contd)

Medical Staff Appointments (1992-1994) (The Ohio State University Hospitals)

Cohen, Daniel Michael, M.D., Associate Attending Staff, Department of Surgery - Division of Thoracic Surgery
Nelson, James Hisom, III, M.D., Clinical Assistant Professor, Department of Surgery - Division of Urologic Surgery
Agarwal, Anil K., Limited Staff, Department of Internal Medicine--Division of General Medicine
Albers, Henry W., Limited Staff, Department of Pediatrics
Baptista Baeza, Jose L., Limited Staff, Department of Family Medicine
Beman, Sandra A., Limited Staff, Department of Pediatrics
Bender, Thomas M., Limited Staff, Department of Pediatrics
Bevan, Claudia K., Limited Staff, Department of Dentistry--Division of General Dentistry
Bird, Michael W., Limited Staff, Department of Pediatrics
Bona, Susan J., Attending Staff, Department of Pathology
Burak, William E., Limited Staff, Department of Surgery--Division of Surgical Oncology
Chan, David P., Attending Staff, Department of Pediatrics
Chatteraj, Mary R., Limited Staff, Department of Pediatrics
Clinchot, Daniel M., Attending Staff, Department of Physical Medicine & Rehabilitation
Coccia, Maria R., Courtesy Staff, Department of Internal Medicine--Division of General Medicine
Conlon, Jennifer M., Limited Staff, Department of Pediatrics
Dickson, Bradley E., Limited Staff, Department of Pediatrics
Gandhi, Anjali K., Limited Staff, Department of Pediatrics
Hackshaw, Dawn S., Limited Staff, Department of Pediatrics
Heck, Robert W., Attending Staff, Department of Emergency Medicine
Hudson, Hilton M., II, Limited Staff, Department of Surgery--Division of Thoracic & Cardiovascular Surgery
Huffman, Todd A., Limited Staff, Department of Pediatrics
Judis, Gary M., Limited Staff, Department of Dentistry--Division of General Dentistry
Kiluk, Andrew K., Limited Staff, Department of Pediatrics
Koranyi, Katalin I., Attending Staff, Department of Pediatrics
Lorch, Frank E., Limited Staff, Department of Physical Medicine and Rehabilitation
Minnich, Lisa A., Limited Staff, Department of Pediatrics
Motarjeme, Steven C., Limited Staff, Department of Internal Medicine--Division of General Medicine (joint with Pediatrics)
Murphy, Brian P., Limited Staff, Department of Anesthesiology
Myers, Laurie A., Limited Staff, Department of Pediatrics
Nicol, Steven J., Attending Staff, Department of Internal Medicine--Division of General Medicine
Nunag, Robert D., Limited Staff, Department of Pediatrics
Nuss, Kathryn E., Limited Staff, Department of Pediatrics
Parr, David E., Limited Staff, Department of Pediatrics
Prestifilippo, Rita E., Limited Staff, Department of Pediatrics
Rossi, Timothy, Limited Staff, Department of Anesthesiology
Shaffer, James P., Limited Staff, Department of Internal Medicine--Division of General Medicine (joint with Pediatrics)
Singh, Kanwaljit, Limited Staff, Department of Internal Medicine--Division of Hematology/Oncology
Thomson, Blythe G., Limited Staff, Department of Pediatrics
Tramuta, Daniel A., Limited Staff, Department of Internal Medicine--Division of General Medicine
Waissbluth, Alvaro Daniel, M.D., Limited Staff, Department of Internal Medicine - Division of General Medicine
Ward, John J., Limited Staff, Department of Internal Medicine--Division of General Medicine
Ward, Kevin R., Attending Staff, Department of Emergency Medicine
Wittenberg, Ami J., Limited Staff, Department of Pediatrics
PERSONNEL ACTIONS (contd)

Medical Staff Appointments (1992-1994) (The Ohio State University Hospitals) (contd)

Wren, Joseph E., Limited Staff, Department of Pediatrics
Wylen, Esther L., Limited Staff, Department of Surgery--Division of General Surgery
Zegarski, Thomas J., Limited Staff, Department of Pediatrics
Beckmeyer, William Peter, M.D., Limited Staff - Department of Anesthesiology
Dowling, Todd Michael, M.D., Limited Staff - Department of Anesthesiology
Kungl, Martin John, M.D., Limited Staff - Department of Anesthesiology
Martin, Michael Allen, M.D., Limited Staff - Department of Anesthesiology
Moore, Kevin John, M.D., Limited Staff - Department of Anesthesiology
Tourangeau, Steven E., M.D., Limited Staff - Department of Anesthesiology
Persse, David E., M.D., Attending Staff - Department of Emergency Medicine

RESOLUTIONS IN MEMORIAM

Resolution No. 93-55

Synopsis: The approval of five Resolutions in Memoriam is proposed.

RESOLVED, That the Board adopt the following Resolutions in Memoriam and that the President be requested to convey a copy to the families of the deceased.

W. Arthur Cullman

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on October 18, 1992, of W. Arthur Cullman, Professor Emeritus in the Department of Marketing.

W. Arthur Cullman was born December 27, 1914, in New York City. He received his Bachelor of Arts from Yale University and his Master's degree in Business Administration from Harvard University. In 1951 he received his Doctor of Philosophy degree in Business Administration from The Ohio State University. He held a number of sales and management positions for Philip Morris, Inc., and for Benson & Hedges where he was Executive Vice President.

In 1947, Dr. Cullman moved from the business world to the academic world where he became a professor in Marketing at The Ohio State University. He had the honor of being named Professor of the Year by College of Business students as well as a recipient of the OSU Distinguished Service Award. While here, he served on a number of committees and councils, including the Faculty Council, Graduate Council, Council on Instruction, Council on Student Affairs, and University Senate. He also served on The Ohio State University's fundraising campaign and the Cullman Symposium Committees.

Dr. Cullman was instrumental in the establishment and development of many business and not-for-profit organizations; he also served on several board of directors for these organizations. He received numerous awards and honors including the Achievement in Marketing Award, the Ohio Governor's Award for contributions that benefitted Ohio businesses, and, with his wife, the Temple Israel's Community Humanitarian Award. In 1988, he was named the Top Entrepreneurial Supporter by the Columbus and Central Ohio Entrepreneur of the Year Committee, and in 1989 he was inducted into the Central Ohio Business Hall of Fame.

Dr. Cullman was a caring, committed person who loved people. He was creative, an over-achiever, honest and fair, gracious, thoughtful, serving, generous, and was concerned about justice and fairness. He will be missed and will be remembered.

On behalf of the University, the Board of Trustees expresses to the family its deepest sympathy and sense of understanding in their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's Heartfelt sympathy.
RESOLUTIONS IN MEMORIAM (contd)

Frank M. Fletcher

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on August 17, 1992, of Frank M. Fletcher, Ph.D., Professor Emeritus in the Department of Psychology.

Dr. Fletcher was born in Colorado Springs, Colorado. The family moved to Denver, Colorado where he completed his elementary and secondary education, graduating from Denver East High School in 1931. He attended the University of Colorado studying Psychology and received his B.S. degree in 1935. He began his graduate studies in 1935 in Animal Psychology and received the Ph.D. degree in 1939. During these years he had several part-time positions at Yale, including Animal Research Assistant under Professor Yerkes and a staff position in the Department of Personnel Studies.

In 1940, he accepted a position with the Occupational Analysis Section of the United States Employment Service and in 1941, four days after Pearl Harbor, he was commissioned as a psychologist in the Navy. Following World War II, he accepted a faculty position at the University of Michigan and in 1947 he came to The Ohio State University as the Director of the Occupational Opportunity Service, now the Consulting and Consultation Service, and an additional appointment in the Department of Psychology. He remained Director of OOS until 1962 and served as a Professor of Psychology until 1979, when he retired and was named Professor Emeritus.

Although his Ph.D. in Animal Science was under Dr. Yerkes, he has held positions in the Department of Personnel Studies at Yale, the United States Employment Service, the U.S. Navy during the war, and at the University of Michigan. As a result, he came to The Ohio State University with extensive knowledge and experience in psychology, veterans' counseling, and in other areas such as personnel classification and interviewing.

Dr. Fletcher was nationally known and respected for his work in the field of Counseling Psychology. He worked for the best interests of the individuals and organizations he served, and cared deeply about students. He was a founding member and helped organize the American Personnel and Guidance Association (now the American Counseling Association). He served as the Association's first treasurer and as an early president. He was awarded Fellow status for exceptional contributions to the field of Counseling Psychology, Division 17, the American Psychological Association; and was elected President of Division 17 for the year 1964-1965. He was a founding member of the Journal of Counseling Psychology and managing editor for many years.

His work was instrumental in the passage of the National Defense Education Act of 1958, which provided support for the training of high school guidance counselors. He developed procedures for and presided over the counseling of thousands of veterans returning from World War II. With Frank Robinson he secured the first Veterans' Administration training positions for graduate students in Counseling Psychology. He was a consultant to the Ministry of Education, the Government of India in New Delhi, the United States Department of Labor, and the Veterans' Administration. For many years, he was a field selection officer for the Peace Corps.

Professor Fletcher was a major figure in the growth of The Ohio State University's highly regarded Counseling Psychology program. Dr. Fletcher was a pioneer in this field. In 1983 the Fletcher Fund (Robinson, Fletcher, Pepinsky, and Stewart Endowment Fund) was established to support faculty development and faculty and graduate student research primarily in the area of Counseling Psychology.
RESOLUTIONS IN MEMORIAM (contd)

Frank M. Fletcher (contd)

Dr. Fletcher will be remembered by students, colleagues, and friends for his 40 year career as an educator and psychologist, for his devotion to them and to the advancement of the field of Counseling Psychology.

On behalf of the University, the Board of Trustee expresses to the family its deepest sympathy and sense of understanding in their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's Heartfelt sympathy.

Philip S. Jastram

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on October 6, 1992, of Philip S. Jastram, Professor Emeritus in the Department of Physics.

Dr. Jastram was born in Providence, Rhode Island, on February 28, 1920, and was a graduate of Harvard University and the University of Michigan, where he earned a doctorate in physics in 1948. He joined the faculty at Ohio State in 1955, and was a remarkably active member of the University community until his retirement in 1988.

Dr. Jastram's influence was felt deeply, and benignly, in a variety of different areas of university and community life. As a physicist he was productive in research, and particularly effective -- and loved -- as a teacher at every level and as research supervisor for numerous graduate students. He was actively involved in university governance at all levels, and made substantial contributions to the American Association of University Professors, with which he was involved at both the local and national levels. In 1982 he was honored by the Ohio State chapter of AAUP with its Lou Nemzer award.

In the community Dr. Jastram was perhaps best known as a lover and patron of the arts. A founding trustee of the Cantari Singers of Columbus, he was also past president of the Jefferson Academy of Music and an active supporter of a number of musical and cultural organizations. He is particularly known in Columbus for playing a critical role in the rescue, at decisive moments in their history, of the Ohio Theatre, Opera/Columbus, and the Columbus Symphony Orchestra.

On behalf of the University community, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in their loss. It was directed that his resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Arthur E. Middleton

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on September 21, 1992 of Arthur E. Middleton, Professor Emeritus in the Department of Electrical Engineering.

Professor Middleton was born in Erie, Pennsylvania on June 10, 1919. He received a B.S. degree in 1940 from Westminster College, his M.S. and Ph.D. degrees from Purdue University in 1942 and 1944; all of his degrees were in Physics. The Ph.D. degree was in the rapidly developing field of solid state physics. From 1942 to 1945 he served as Instructor and Research Fellow in the Physics Department of Purdue University.
RESOLUTIONS IN MEMORIAM (contd)

Arthur E. Middleton (contd)

In 1945, Dr. Middleton joined Battelle Memorial Institute in Columbus, Ohio, as Supervisor of the Semiconductor and Dielectrics division. Starting as a subunit of the Metallurgical Physics division, with one assistant, Professor Middleton supervised the growth of this activity to a point in 1951 in which it was a separate division within Battelle, employing 45 people (5 Ph.D.’s) and conducting 20 research projects concurrently.

In 1953, he joined the P.R. Mallory Company, in Indianapolis, Indiana, as Director of Physics and Physical Chemistry Laboratories. In this capacity he directed research on semiconductor materials, device design and device applications, and led Mallory in its efforts to become a prominent supplier of semiconductor and thin film components.

From 1958 to 1959, Dr. Middleton served as Head of the Electroluminescent (EL) Lamp Division of the General Electric Co., in Cleveland, Ohio. In 1959, he joined the Harnshaw Chemical Co., in Cleveland, Ohio, as manager and Director of the Solid State Research and Electronics Division.

Dr. Middleton joined the Ohio Semiconductor Division of Tecumseh Products Company, in 1962, as Chief Scientist and Director of Materials and Long Range Research. Among his other activities, he organized and directed a substantial research activity capable of conducting high level semiconductor research activity.

In 1965, Dr. Middleton joined the faculty of The Ohio State University as Professor of Electrical Engineering and Director of the Department's Electronic Devices Laboratory. In this latter capacity, he continued to pursue fundamental research on semiconductor materials and added to his already impressive list of publications in prestigious journals. At the time of his retirement in 1984, he was accredited with 14 patents on solid state devices. He also taught courses in solid state theory and electronics and introduced a successful upper-level laboratory course sequence on solid state device fabrication.

Following his retirement from University service, Dr. Middleton was Vice President of Ohio Semitrronics, in Columbus, Ohio, and also continued his long service as a member of the board of directors of North Pittsburgh Systems, Inc.

On behalf of the University the Board of Trustees expresses to the family of Professor Middleton its deep sympathy and sense of understanding of their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

John A. Prior, M.D.

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on October 14, 1992, of John A. Prior, M.D., Professor Emeritus in the Department of Internal Medicine.

John A. Prior was born on April 17, 1913, in Columbus, Ohio. He attended The Ohio State University and received a B.A. degree in 1935 and M.D. degree in 1938. Following graduation from Medical School, Dr. Prior did his internship at Grant Hospital in Columbus, followed by residency and fellowship training in Cincinnati in the Pulmonary Division of Dunham Hospital. He completed this training in 1944.
RESOLUTIONS IN MEMORIAM (contd)

John A. Prior, M.D. (contd)

Immediately following training, Dr. Prior was offered a faculty position in the Department of Medicine at The Ohio State University. He was promoted to Associate Professor in 1948 and Professor in 1951. He served as Chief of the Division of Pulmonary Diseases from 1952-61. Later, he served as Assistant Dean of the College of Medicine from 1961 to 1963, as Associate Dean from 1963 to 1970, and Dean from 1970 to 1972. He returned to teaching in 1972 in the Department of Internal Medicine, where he worked until his retirement in 1981. Upon retirement, Dr. Prior was named Professor Emeritus as a result of his long and meritorious service to the medical center.

Over the course of his career, Dr. Prior was awarded the Distinguished Teaching Award, the Alumni Achievement Award and the University Distinguished Service Award. He has authored or co-authored a number of scientific publications and is the author of a textbook entitled *Physical Diagnosis* which has been published in four foreign languages.

Dr. Prior's contributions to the University have been significant. He played a major role in the development of the Health Sciences Library, a facility which was later named for him in recognition of his achievements in this area. He was an enthusiastic medical educator who energetically worked to develop the new medical center library, for which he was instrumental in acquiring a nearly $2 million federal grant. In the official Board of Trustees minutes of September 2, 1988, Dr. Prior was described as a person whose "leadership, dedication and energies helped make the Health Sciences Library possible."

In other areas of his professional life, Dr. Prior also excelled. He was a consultant to a number of local agencies such as the Ohio Industrial Commission, the Dayton and Chillicothe Veterans Administration Hospitals, the Ohio Department of Health, and others. He held membership in a number of prestigious medical and scientific societies such as the American College of Physicians, American College of Chest Physicians, American Thoracic Society, and he served on the Board of Trustees of the Children's Hospital Research Foundation and as a member of the Board of Directors of the Ohio State University Research Foundation. He was president of The Ohio State University College of Medicine Alumni Society and was also active in the Rotary Club of Columbus. He is listed in *Who's Who in America, Who's Who in World Science, American Men in Medicine*, and *Who's Who in the Midwest*.

Dr. Prior was known throughout his career as a compassionate and caring physician and teacher, as well as an accomplished statesman.

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in this loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Upon motion of Mr. Celeste, seconded by Mr. Skestos, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--
November 6, 1992 meeting, Board of Trustees

REPORT - UNIVERSITY'S ENDOWMENT FUND

Resolution No. 93-56

RESOLVED, That the report on the University's Endowment Fund, dated October 16, 1992, as submitted to the Investments Committee of the Board of Trustees, be received and filed with the official records of the Board.

--0--

Thereupon the Board adjourned to meet Friday, December 4, 1992, at The Ohio State University Fawcett Center for Tomorrow, Columbus, Ohio.

Attest:

Madison H. Scott                      John J. Barone
Secretary                           Chairman
The Board of Trustees met at its regular monthly meeting on Friday, December 4, 1992, at The Ohio State University Fawcett Center for Tomorrow, Columbus, Ohio, pursuant to adjournment.

**  **  **

Minutes of the last meeting were approved.

**  **  **
December 4, 1992 meeting, Board of Trustees

The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on December 4, 1992, at 10:30 a.m. He requested the Secretary to call the roll.

Present: John J. Barone, Chairman, John W. Kessler, Milton A. Wolf, Alex Shumate, Theodore S. Celeste, Michael F. Colley, George A. Skestos, Kristen Cusack, and Hiawatha N. Francisco, Jr.

--0--

Mr. Barone:

We will now have a presentation by the Men's Glee Club. These young men are known as the "Statesmen."

Professor James Gallagher:

Good morning. We are pleased to be able to bring you some holiday cheer this morning -- we will be brief and hopefully sprightly. Our first song is a very old, but familiar tune, "Carol of the Bells." Next is a piece that probably made Irving Berlin's name and Bing Crosby's name even more of a household word than any other tune, "White Christmas." And we will end with a tune that everybody knows and if you would like to sing along, you are certainly welcome -- Jinglebells."

President Gee:

Gentlemen, thank you very much. We appreciate your coming today. I wish we could make that much harmony.

Mr. Barone:

Thank you, Jim.

AMENDMENTS TO THE COMMITTEE APPOINTMENTS FOR 1992-1993

Resolution No. 93-57

Synopsis: Amendments to the Committee Appointments of the Board of Trustees for 1992-93 are recommended.

RESOLVED, That Resolution No. 93-16, detailing the Committee Appointments of the Board of Trustees for 1992-93 be amended as follows:

Educational Affairs
John W. Kessler, Chair
Theodore S. Celeste, Vice Chair
Alex Shumate
George A. Skestos

Investments Committee
Milton A. Wolf, Chair
Theodore S. Celeste, Vice Chair
John W. Kessler
George A. Skestos

PRESIDENT'S REPORT

President Gee:

As we come to the end of the autumn quarter, I think I hear a collective sigh of relief from our very busy faculty, staff, and students. It has by any account been a rigorous and I believe a very successful quarter. As you recall, I set out an action agenda in early October that identified five strategic areas to receive priority attention this year. From that impetus, more than 20 initiatives are underway centrally, and various committees and offices have taken up the call to action with their own efforts.

For example, this Board has heard from Associate Provost Nancy Rudd regarding the preparation of guidelines for faculty workload and performance evaluation. You have received a report on the successful work of Associate Provost Bob Arnold in addressing the autumn quarter closed course problems. He is now working on the problem for Winter Quarter registration. Vice President Hayes has convened an Ad Hoc Advisory Committee for Research Space. Vice President Linda Tom expects to have the university policy on sexual harassment ready in January.

University Systems has unveiled the Front Door Project, making information about Ohio State accessible to prospective students and friends of the university using state-of-the-art laser disk and computer technology. The Commission on Diversity has been formed and has begun meeting. And, importantly, in support of all of the activity under way, we are continuing our academic planning effort. The university mission statement on today's agenda represents the collaboration and discussion of literally hundreds of people all of whom care deeply about this institution and its direction.

The University Priorities Committee, chaired by the Provost, is meeting and advising on a number of planning issues. At the same time, we also have before us two reports that require our attention: the statewide Managing For the Future Task Force Report and the report of Ohio State's Managing For the Future Task Force. Obviously, saying all of that, our plate is full and our tasks are important. I am reminded just how important as I travel throughout the campus and the state and hear people's concerns.

At an evening assembly recently at Orange High School in Cleveland, I was struck by the eagerness of the students to attend college juxtaposed to their concern for the cost and challenges of the moment in higher education.
Our current students inspire us in all of our efforts as well. Of particular note this month were the splendid Marching Band Concert and the Men's Glee Club fall concert. You heard, of course, the Statesmen today. Both, by the way, were outstanding performances.

Speaking of performances, this university was again honored to host Twyla Tharp in residence at the Wexner Center for the Arts. The dances created by Twyla Tharp for her company and Mikhail Baryshnikov provided magnificent and memorable evenings for the campus and community. The Wexner Center Anniversary Celebration provided another memorable occasion. This event was the largest single fund-raising event ever held for this university, raising $1.4 million in one evening for the Wexner Center for the Arts. With the current exhibit "Will/Power" and the Tharp residency as examples, the Wexner Center programs are truly a centerpiece of pride for Ohio State.

At last night's Merrymaker's Banquet, I was further reminded of the support this university enjoys from this community. This group of dedicated Central Ohio leaders has created and supported an endowment for National Achievement Scholars at Ohio State. One of the talented students they support spoke at the banquet, and she expressed her gratitude for the opportunities made possible by their generosity.

Expressions of gratitude were also in order on Thanksgiving Day as the staff of the Hale Black Cultural Center served a free Thanksgiving dinner to those students who remained here during the holiday. They truly captured the warmth of the season and the spirit of the people of this university who are daily demonstrating a high level of commitment to our students and who are enhancing the quality of Ohio State.

Mr. Chairman, before ending my report, I want to bring to the attention of the Board a matter of utmost importance. Last winter, the University Senate passed a resolution calling for the university to mention the non-compliance of ROTC programs with the university's anti-discrimination policy. The resolution was brought to the Senate by the Undergraduate Student Government, and a similar resolution was passed by the Council of Graduate Students.

I am today taking administrative action to require the posting of a "notice of violation" in appropriate university publications. The "notice of violation" text will specify that the Reserve Officers Training Corps, as a result of the United States Department of Defense regulations, is in violation of university policy.

Let me note that the Reserve Officers Training Program has a long history at Ohio State. In fact, Ohio State was one of the first institutions in this federally created program some 75 years ago. Many students have received scholarships and educational opportunities through the program. I would hope that eventually all students at this university will be able to participate if they wish in this truly outstanding program.
PRESIDENT’S REPORT (contd)

President Gee: (contd)

As you are all aware, the discriminatory military policy is receiving the attention of the new Presidential administration. In the meantime, recent lower federal court decisions preliminarily have held that discrimination in the military based on sexual orientation is unconstitutional. Therefore, there is hope that a “notice of violation” not only will clearly set forth the university's position on the inappropriateness of this discrimination, but also will serve as an interim position until the Department of Defense policy is changed to align with the university's institutional policies and values.

Mr. Chairman, that completes my report.

--0--

HOSPITALS BOARD REPORT

Mr. Barone:

I now have the extreme pleasure of introducing Ms. Susan Insley, Chairperson of the University Hospitals Board, who will give a report on the Hospitals.

Ms. Susan Insley:

Good morning and thank you very much on behalf of the Hospitals Board, Dr. Tzagournis, and Mr. Fraley. We are pleased to have the opportunity to share with you just briefly some of the activities and directions of your University Hospitals.

I would like to focus your attention on select components of the Hospitals’ Strategic Plan. As you would expect, the Hospitals’ Strategic Plan is dynamic and it needs to be flexible to adapt to our ever changing health care environment while providing the Hospitals with sufficient direction to retain control. As we all know, health care is a very hot topic on the news. Our strategic plan is intended to permit the Hospitals to be a strong leader as we carry forward our three part mission of teaching, research, and patient care.

A key to fulfilling our strategic plan has been the modernization and development of new facilities. The bond financing approved by this Board of Trustees recently in support of new facilities has been integral in moving our Hospitals along our strategic path. Construction of the Neuropsychiatric Hospital, made possible through the bond issue, is progressing well. This replacement facility, the first Hospitals building to be paid for by hospital operating funds, will enhance our ability to provide modern psychiatric services in a state-of-the-art setting. Also under design, is the renovation of the Surgical Intensive Care Unit. These greatly needed renovations also are being funded through the University bond issue. The renovated SICU will ensure the highest quality of care to our surgical patients.

To improve patient care for those not requiring an overnight stay, but who require extended post anesthesia recovery time, the Post Procedure Recovery Center has been established. This area has proven to be effective in reducing unnecessary patient stays. An additional portion of the bond financing is to support the continued growth of our Women and Infants Center, which is one of our centers.
December 4, 1992 meeting, Board of Trustees

HOSPITALS BOARD REPORT (contd)

Ms. Insley: (contd)

of emphasis. This program focuses on high risk pregnant women and very premature neonates.

Another one of our centers of emphasis which continues to grow is transplantations. The number of transplants being performed reached an all time high in fiscal year '91-'92. Currently, a transplant is performed at the Hospitals every 34 hours. Ohio State University Hospitals, for example, is the fifth busiest kidney transplantation center in America. The heart transplantation program celebrated its fifth year anniversary and the one hundredth heart was transplanted in November.

The Medicare Coronary Artery Bypass Graft Program is one of many examples of quality in procedures established by your Hospitals. Since its inception in 1991 as one of only four medicare recognized programs in America, 171 medicare patients have received coronary artery bypass grafts at our Hospitals. Our strategic plan does not end just on campus. In the further development of off site Hospitals' services, cardiology and outpatients psychiatric and rehabilitation services began in Dublin, Ohio, at the Stoneridge Center.

Despite the resources needed to keep up with rapid changes in services and the changing health care environment, patient care and satisfaction continue to be the primary concern of our Hospitals. We are pleased to note that patient satisfaction continues to rise. Comments would suggest that the rise in patient satisfaction is largely attributable to the intensive caring of our staff and faculty. More than 4,000 people are employed at University Hospitals. They are our best asset.

How do we use that asset? Well, we have a variety of programs. One is the Adult Literacy Program which exemplifies staff team work by pairing various staff members. As a result of these tutorials, they raised the literacy rate of all of our Hospitals' staff members. Learn for Life was established this year to provide information and resources to our staff members about ongoing educational opportunities both within and outside the Hospitals and the University.

Many staff members have contributed well beyond expectations in these tough economic times through initiating winter clothing drives for a homeless shelter in our community and providing generous contributions to the United Way and other agencies. This year, for example, donations to the United Way from the Hospitals' staff will exceed $89,000. In addition, for the fifth straight year the staff at University Hospitals has been the largest donor of blood of any hospital group in Franklin County -- leadership in every area.

Community outreach also involves educational opportunities. I want to take a few minutes to talk to you about some of the things that the Hospitals is doing to aid our communities. In serving our educational mission, the Hospitals has created numerous opportunities for people in this area. Children from the Hubbard Elementary School in Columbus, one of the Hospitals two area adopted schools, learn about the Hospitals through events such as Emergency Department Tours, Career Days, and observations. On occasion our staff provides supplies otherwise unavailable to these schools. This slide shows youngsters touring the Emergency Department. As a result of an internship program with Ft. Hayes High School in
Columbus, the Hospitals second adopted school, we received an outstanding school partnership award last year. Similarly, programs such as Think First, a head injury prevention program developed in conjunction with our Department of Neurosurgery, are brought directly into area schools.

The Hospitals also provide educational opportunities to those of every age. This slide shows individuals who walk at Lane Avenue shopping mall. These individuals are provided free monthly seminars sponsored by the Office of Geriatrics on various wellness and fitness topics. Future topics will include: Arthritis in the Active Life and Cancer Prevention. Opportunities to learn about the health care career choices are provided through forums such as career days, shown here with an Explorers' post, and nursing camps for young women. Through funding by the Area Private Industry Council, low income and unemployed persons receive training in housekeeping and interpersonal skills here at the Hospitals. This program increases our ability to recruit and retain skilled persons in a high turnover area, as well as benefitting all of the Columbus area hospitals. Thus far, 42 adults have graduated from this program initiated by the Hospitals.

Parents on the Move is another program initiated by your Hospitals. In cooperation with the Private Industry Council, Human Services, and Columbus State Community College, this program provides parents who are currently on public assistance with the opportunity to obtain a degree and receive on the job training. Seven participants completed the program in its first year of operation and one participant received a scholarship from Columbus State Community College.

We also reached out to the business and professional community in Columbus this year by starting OSU Health Insights. This program was established in the spring involving, thus far, 60 young business professionals in the area. It serves to increase community health care awareness and fostering goodwill between the Hospitals and our business community.

Now supplementing these community education efforts is Health Professional Education. OMEN-TV and Radio, developed by the College of Medicine's Department of Continuing Medical Education, presents challenging discussions on medical topics. Currently OMEN-TV and Radio reaches about 1,500 physicians with each program, and 675 of these physicians are outside the State of Ohio. OMEN Radio is produced each week and 25 OMEN television programs will be shown this year. The Department of Obstetrics and Gynecology has developed newsletters for referring physicians, not only to keep them up-to-date on the latest practices and procedures, but also offering opportunities for their leadership and for continuing education credits.

Nursing has made substantial strides in extending continuing education to community nurses through seminars and internships. The Hospitals is the leading provider of continuing education for public school nurses around the country.

National and local seminars were attended by 1,800 nurses from all over America coming here to our campus.
Ms. Insley: (contd)

As another part of our strategy of outreach and to fulfill our mission, the Hospitals provide services tailored to differing and frequently unmet community needs. Let me share a few of those services provided both here on campus as well as off. Close to home this year the Hospitals provided screening and information services at the fall University Staff Party on the Oval. As you can see from this slide, the event was enjoyed by all. Team building efforts encourage enthusiasm and morale. Again on campus the Hospitals sponsored something called, "Birth of a Bed." It was initiated by Hospitals' staff to compensate for budget reductions for campus beautification. Members from 30 Hospitals' departments volunteered time, energy, initiative, and money to ensure that the Hospitals' campus and University was attractive to patients and visitors. More recently the Hospitals have agreed to loan a Park and Ride van to the University for use in the evenings as part of the Crime Watch Escort Service Program.

The Hospitals is also the largest donor to the MedOhio Food Bank Second Servings Program. Each month the Hospitals provide an average of 6,000 pounds of food to the food bank for less privileged individuals. The second largest donor incidentally is the Ohio Union, providing 1,500 pounds of food. Through the Hospitals' sponsored Ask-a-Nurse Program, Ohioans have free 24-hour access to help and referral information. There were over 125,000 calls last year.

For the third year, the Hospitals has reached out and provided checkups in the community. This year's health check visited the Martin Luther King Center in Columbus for 2 days. A Geriatric Nursing Program was recently established in cooperation with the Asbury United Methodist Church and Lifecare Alliance, also in Columbus. In this program, a Hospitals' sponsored nurse, pictured here incidentally, provides care to the elderly within the Woodland Park Community. In addition, the Hospitals and the Department of Obstetrics and Gynecology provide nursing support for a preterm birth prevention service offered by the Echo Family Health Center on Broad Street in Columbus.

All of these outreach initiatives involve and rely upon people. It is people after all who are our best asset, and who make it possible for us at University Hospitals and this University to carry out our three part mission of teaching, research, and patient care. Thank you, Mr. Chairman.

Mr. Barone:

Thank you, Susan.

December 4, 1992 meeting, Board of Trustees

RESEARCH FOUNDATION REPORT

Mr. Celeste:

I am pleased to give this report on the grants and contracts for the month of October received by The Ohio State University Research Foundation. Once again, you should all have a copy of this report. If you look at Tab 1, we see that the awards for the period July through October are up about the same as last month, 3.49 percent. This was aided by a large award from the Rehabilitation Services Administration that I will highlight in a minute. In addition, there was a significant increase in funding from the National Institutes of Health -- some of this funding had been delayed until the end of the federal fiscal year.

At Tab 2 you will find expenditure summaries. Expenditures through October continue to show a modest increase over last month and are up approximately 5.5 percent.

Some projects of special interest that were funded in the month of October are listed at Tab 3. Just this week I visited with Professor Corrigan, Director of the new Ohio Valley Center for Head Injury Prevention and Rehabilitation. The center has received $2.9 million of funding from the Rehabilitation Services Administration for four years. The center will develop, demonstrate, and disseminate model programs for effective prevention, acute care, and rehabilitation of persons who have experienced traumatic brain injury. This center will be a resource for over 23 million people living in Ohio, Indiana, Virginia, and West Virginia. You may have read about this program in the paper yesterday.

The National Center for Nursing Research has funded Professor Wewers in the Department of Life Span Process to study the relationships between cigarette smoking, opioid peptides, and mood states. These studies are expected to lead to an understanding of the mechanisms responsible for tobacco withdrawal symptoms and dysphoric mood states that is critical to developing therapeutic interventions aimed at improving successful smoking cessation.

At Tab 4 is the list of all projects funded in October. At Tab 5 there are several graphs comparing the growth rate of federal obligations in science and engineering for research and development at the Big Ten universities, plus Penn State University. The first graph shows the rate of growth for total science and engineering R&D at Ohio State that is comparable to the Big Ten and all other institutions. The remaining graphs show the growth trends for each major science and engineering discipline. I hope that this will give the members of the Board a better idea of the disciplines where growth at OSU has exceeded or lagged behind the Big Ten and all other institutions. Finally, at Tab 6 you'll find a press release issued by University Communications highlighting a recent research activity.

REPORT OF RESEARCH CONTRACTS AND GRANTS

Resolution No. 93-58

Synopsis: The reports on research and other sponsored program contracts and grants and the summary for October 1992 are presented for Board acceptance.

WHEREAS monies are solicited and received on behalf of the University from governmental, industrial, and other agencies in support of research, instructional activities, and service; and
REPORT OF RESEARCH CONTRACTS AND GRANTS (contd)

WHEREAS such monies are received through The Ohio State University Research Foundation and the Engineering Experiment Station of The Ohio State University:

NOW THEREFORE

BE IT RESOLVED, That the research agreement between The Ohio State University and The Ohio State University Research Foundation for the contracts and grants reported herein, and the acceptance of the reports from the Engineering Experiment Station during the month of October 1992 be approved.

Upon motion of Mr. Celeste, seconded by Mr. Colley, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

Summary

STUDENT AFFAIRS COMMITTEE REPORT

Ms. Cusack:

Yesterday we had a round-table discussion with graduate and professional students and learned about several issues of importance to them. We discovered that though we help many graduates and professional students find their way to Ohio State, we are not nearly as active in helping them find their way out of Ohio State. Graduate students suggested that aids such a vita bank and more information and help in attending professional conferences would be a great help. The role of advisors in both groups could use some improvement, and stronger guidance in all areas of student career development would be helpful.

We were informed that a great many of the TA's that cover the classes have little or no training to teach students. They have knowledge of the subject material, but they have not necessarily been taught to communicate that material.

We also learned of the critical problem of child care for graduates and professional students. The Ohio State University child care system is based on a first come first serve basis, but students do not have places held for them when they return in the autumn after a break during the summer. Flexible child care is important. We cannot recruit these talented older students and then make it impossible for them to attend classes.
STUDENT AFFAIRS COMMITTEE REPORT (contd)

Ms. Cusack: (contd)

Campus safety is still an issue. Professors could help the situation by asking students how they will be getting home after a night class and making it so that students can pair up and get home safer. The students overall gave us a lot to think about in the Student Affairs Committee meeting yesterday, but they also offered us a lot of valuable suggestions and solutions.

Finally, we heard reports from the student government leaders. John Hilbert mentioned that the Undergraduate Student Government has had a successful campaign for student evaluations of teachers. USG sent out their own questionnaires in addition to those sent out by the University. The results of those questionnaires will be published by the Undergraduate Student Government and distributed. The questionnaires were distributed to all professors and are returned on a voluntary basis. Professors’ responses were very positive and the questionnaires returned so far have been very good.

Karen Duncan, President of the Council of Graduate Students, asked me to call your attention to the two memos that you received today. They are the responses by the Council of Graduate Students on the President's Commission on Women and the Engineering Computer Fee.

Greg Gorospe, President of the Interprofessional Council, reported that they are taking definitive steps toward making IPC a stronger and more stable group that more professional students can take part in. That concludes my report.

--0--

AGRICULTURAL AFFAIRS COMMITTEE REPORT

Mr. Colley:

Mr. Chairman, the Agricultural Affairs Committee of the Board of Trustees met this morning. Vice President Moser reviewed the budget cuts of the College of Agriculture and their negative impact on research, education, and outreach programs of the College, and the steps which the College has taken to reduce expenditures and generate additional income. The capital improvements budget was discussed and approval of the $13 million requested will enable the College to continue important programs on the Columbus campus and OARDC and ATI in Wooster. The College of Agriculture administrators also discussed budget requests for the next biennium.

Vice President Moser also discussed Agriculture Policy and Outlook Conferences which are being held at 10 sites around the state. These Policy and Outlook Conferences are a cooperative effort between the Department of Agricultural Economics and Rural Sociology and the Extension Service in a design to bring the latest economic information to people from all areas of the agriculture industry in Ohio and surrounding states. Outlook is presented from commodities, the national economy, trade, and policies which will affect all aspects of the farm economy.
AGRICULTURAL AFFAIRS COMMITTEE REPORT (contd)

Mr. Colley: (contd)

Vice President Moser presented the recently completed mission/vision statement for the College of Agriculture which includes the priority areas of the campuses. The proposed name change for the Ohio Cooperative Extension Service as well as a future name change for the College of Agriculture were also discussed. He reported a 5.5 percent increase in overall enrollment for the College.

Finally, Mr. Chairman, the Agricultural Affairs Committee recommends the adoption of a proposed resolution renaming the Ohio Cooperative Extension Service to the Ohio State University Extension.

RENAMEING OF THE OHIO COOPERATIVE EXTENSION SERVICE
Resolution No. 93-59

Synopsis: The Agricultural Affairs Committee recommended the renaming of the Ohio Cooperative Extension Service to Ohio State University Extension.

WHEREAS changing the name of the Ohio Cooperative Extension Service to "Ohio State University Extension" will promote the identification of the Extension with The Ohio State University and broaden the understanding of its mission; and

WHEREAS the name "Ohio Cooperative Extension Service" fails to convey the teaching and research aspects of the Extension and may mislead the public as to its goals and objectives; and

WHEREAS the name "Ohio State University Extension" will promote an awareness of the larger vision and opportunity for Extension to collaborate with University faculty and incorporate educational programs and expertise from all areas of the University; and

WHEREAS the Extension mission in Ohio has two objectives that would benefit from a greater awareness and applicability of a broader University base, including to unite and extend the broad base of University resources as well as maximize available resources by organizing leading coalitions; and

WHEREAS this broad based approach will promote the University's objective to concentrate on critical economic, environmental, leadership and youth, family development issues:

NOW THEREFORE

BE IT RESOLVED, That the name Ohio Cooperative Extension Service be changed to the "Ohio State University Extension" pursuant to Ohio Revised Code, Section 3335.16 and Section 3335.36.

Upon motion of Mr. Colley, seconded by Mr. Shumate, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.
AGRICULTURAL AFFAIRS COMMITTEE REPORT (contd)

President Gee:

The changing of the name of the Ohio Cooperative Extension Service to Ohio State
University Extension is a most significant name change. Our extension faculty are
located in all 88 counties of the State and are truly the presence of this University in
every facet of life for Ohioans. By this name change, we hope that their work will
be recognized not only for the fine work that they do, but ultimately recognized as
work of this University. For too long our faculty have been recognized for the great
work that they do, but not for their affiliation with the institution that provides them
that opportunity. I believe that this is a most significant change, and one that will be
readily welcomed by all of us at the University.

Mr. Barone:

Thank you, Mr. President. I think we'll all agree with that.

--0--

INVESTMENTS COMMITTEE REPORT

Amb. Wolf:

The Investments Committee heard the monthly Endowment Summary Report for
the period October 16, 1992 through November 20, 1992. The market value of the
Endowment Fund on November 20, was $426.7 million. This total is approximately
$15.6 million above the October 16, 1992 market value, and I'm pleased to
announce that it represents an all-time high. The market value of the equity portion
of the Endowment Fund increased $16.1 million, while the fixed income portion
decreased $1.4 million during this reporting period. Net new additions to the
Endowment Fund for November totalled $2.2 million. Since July 1992 the
Endowment Fund has increased over $24.7 million, including net new additions of
$6.1 million. The current asset allocation for the Endowment Fund is 57 percent
invested in equities, 26 percent invested in fixed income securities, 8 percent in real
estate, and 9 percent in cash equivalents.

The Investments Committee also heard the Quarterly Endowment Report for
September 30, 1992. It showed that the Endowment Fund continued to grow over
that quarter. To date this fiscal year the Endowment has distributed $20.6 million of
income to over 1,900 funds. This is nearly triple the amount distributed 10 years
ago. I would like to call your attention to the graph on page 6 -- it shows that over
the past 10 years the growth of the Endowment Fund has consistently stayed
ahead of the index for the higher education price index.

We also heard the Quarterly Report on Total Cash and Investments for the
University. It was reported that the total of cash and investments for all accounts in
the University as of September 30, 1992 was $826 million. This was an increase of
$98.7 million from the quarter ended June 30, 1992, however the primary reason
for the increase came from a $61.3 million net increase in the University's debt
service and debt construction funds due to the 1992 fixed rate bond that was
issued.
Finally, the Investments Committee discussed the Endowment's current asset allocation and, once again, reviewed the individual investment managers' performances for the 1992 fiscal year. The Committee had formerly reviewed the fixed income managers in October and met with our equity managers in November. The Investments Committee discussed our current targets of 60 percent equities, 25 percent fixed income, and the balance in real estate and cash equivalents. At the next Board meeting we will review again this asset allocation formula and we hope to determine then whether or not we should revise this allocation formula or retain it in its present condition. The allocations to the investment managers were discussed, and therefore, Mr. Chairman, a resolution is now before us to reappoint the investment advisors of The Ohio State University Endowment Fund.

REAPPOINTMENT OF INVESTMENTS ADVISORS

Resolution No. 93-60

Synopsis: The Investments Committee recommended the approval of the Reappointment of Investment Advisors.

WHEREAS it is the policy of The Ohio State University to utilize the services of external Investment Advisors to assist in the management of the University's Endowment Fund; and

WHEREAS the Investments Committee of the Board of Trustees periodically reviews the results obtained by the external Investment Advisors and the amount of funds assigned to each of them; and

WHEREAS it is prudent investment policy to adjust the mix and amounts of money assigned to external Investment Advisors as economic conditions change; and

WHEREAS the Investments Committee has also directed the Treasurer to maintain University Managed equity funds which primarily consist of gifts and a University Managed GNMA fund; and

WHEREAS the number of external Investment Advisors and the amount of funds assigned to them and the Treasurer shall be determined by the Board of Trustees:

NOW THEREFORE

BE IT RESOLVED, That upon the recommendation of the Investments Committee of the Board of Trustees the following named external Investment Advisors and the Office of the Treasurer shall be reappointed to counsel in the management of Endowment Fund Investments totaling the initial amounts indicated:

Upon motion of Amb. Wolf, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

Amb. Wolf:

The Investments Committee is also recommending the following resolutions:

REPORT ON UNIVERSITY DEVELOPMENT

Resolution No. 93-61

Synopsis: The report on the receipt of gifts and the summary for October 1992 are presented for Board acceptance.

WHEREAS monies are solicited and received on behalf of the University from alumni, industry, and various individuals in support of research, instructional activities, and service; and

WHEREAS such gifts are received through The Ohio State University Development Fund and The Ohio State University Foundation:

NOW THEREFORE

BE IT RESOLVED, That the acceptance of the report from The Ohio State University Development Fund and The Ohio State University Foundation during the month of October 1992 be approved.

Upon motion of Amb. Wolf, seconded by Mr. Shumate, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

REPORT ON UNIVERSITY DEVELOPMENT (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Named Funds

The Jane Moss Lloyd Gynecologic Cancer
Research Endowment Fund

The Jane Moss Lloyd Gynecologic Cancer Research Endowment Fund was established December 4, 1992, by the Board of Trustees of The Ohio State University, with a gift to The Ohio State University Development Fund from Mrs. Gladys Kirk Lloyd and Mr. Charles L. Lloyd, Jr., Dallas, Texas, in memory of Mrs. Jane Moss Lloyd.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to sponsor gynecologic cancer research as directed by the Chief of the Division of Gynecologic Oncology in The Arthur G. James Cancer Hospital and Research Institute as approved by the Director of The Arthur G. James Cancer Hospital and Research Institute and the Vice President for Health Services.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the Director of The Arthur G. James Cancer Hospital and Research Institute and the Vice President for Health Services in order to carry out the desire of the donors.

The Alice Lucile Russel Scholarship Fund

The Alice Lucile Russel Scholarship Fund was established December 4, 1992, by the Board of Trustees of The Ohio State University, with a gift to The Ohio State University Development Fund from the estate of Alice Lucile Russel (B.S.Bus.Adm. '27).

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to fund one or more undergraduate scholarships for the benefit of students pursuing studies in vocational agriculture and agricultural engineering. Award recipients shall be selected based on their previous academic achievement and financial need, with preference being given to students from Belmont or Champaign Counties in Ohio. Selection of the award recipients shall be made by the Dean of the College of Agriculture upon recommendations received from the chairpersons in the Departments of Agricultural Education and Agricultural Engineering and in consultation with the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.
Establishment of Named Funds (contd)

The Robert B. Bockstiegel and Viola V. Bockstiegel
Memorial Scholarship Fund

The Robert B. Bockstiegel and Viola V. Bockstiegel Memorial Scholarship Fund was established December 4, 1992, by the Board of Trustees of The Ohio State University, with a gift to The Ohio State University Development Fund from the estate of Viola Bockstiegel.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

Ten percent (10%) of the annual income shall be reinvested in the fund's principal to assure future growth. The remaining ninety percent (90%) of the annual income shall be used to provide scholarships to students who have demonstrated superior academic ability as electrical engineering majors at The Ohio State University. Preference shall be given to students with proven financial need. Recipients shall be named annually, but may be eligible to compete for renewed awards. Selection of the award recipients shall be made by the Dean of the College of Engineering in consultation with the chairperson of the Department of Electrical Engineering and the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

The Dr. Paul C. Clayton International Agriculture Award

The Dr. Paul C. Clayton International Agriculture Award was established December 4, 1992, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from family, friends and colleagues in memory of Dr. Clayton (B.S., Poultry Science, 1949; M.S., Poultry Science, 1950; Ph.D., Poultry Science, 1954).

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support domestic or international students who are studying, working, or conducting research in the United States or abroad. Awards may be made to undergraduate as well as graduate students. Selection of the award recipients shall be made by the director of international programs in agriculture and/or his/her designee. The Clayton family shall be advised of the award recipient(s) on an annual basis.

It is the desire of the donors that this fund should benefit the College of Agriculture and the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer and a representative of the Clayton family in order to carry out the desire of the donors.
Establishment of Named Funds (contd)

The Murray Grey Beef Fund

The Murray Grey Beef Fund was established December 4, 1992, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from Mr. and Mrs. John C. Wozny of Coolville, Ohio.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to benefit the beef cattle option within the Livestock Production and Management Technology at the Agricultural Technical Institute. At least $500 or 10%, whichever is greater, of the annual income shall be used for scholarships to second-year students with high academic achievement.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors, and in agreement with the initial donors or the initial donors' designated heirs.

Change in Name and Description of Named Fund

The Bea Cleveland College of Human Ecology and Ohio 4-H Support Fund

The Bea Cleveland College of Home Economics and Ohio 4-H Support Fund was established December 6, 1985, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from Beatrice J. Cleveland (B.S.H.E. '42), of Columbus, Ohio. The name of the fund and description were revised December 4, 1992.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

One-half of the annual income shall go to the College of Human Ecology Programs Fund for use as prescribed by that fund. One-half of the annual income shall be used for Ohio 4-H advisor training as determined by the Ohio State 4-H faculty.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the Dean of the College of Human Ecology and the Assistant Director of 4-H in order to carry out the desire of the donor.
Change of Description of Named Fund

Daniel Hughes Memorial Fund

The Daniel Hughes Memorial Fund was established March 7, 1986, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University Development Fund from Violeta Hughes (M.A., Education, 1979) of Columbus, Ohio, and friends in memory of her husband, Daniel Hughes, Ph.D., Professor of Anthropology. The fund was revised December 4, 1992.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to help support graduate and undergraduate student travel to present professional papers/posters at international, national, or regional meetings. Students are eligible for support once per year and preference shall be given to those who have not previously been awarded funding. The selection of recipients shall be made by the Graduate Studies Committee of the Department of Anthropology in consultation with the chairperson of that Department.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

ESTABLISHMENT OF NAMED CHAIR

Summary: The Investments Committee recommended the approval of the establishment of a named chair.

The Dorothy M. Davis Chair in Cancer Research

WHEREAS in accordance with the guidelines previously established by the Board, The Dorothy M. Davis Chair in Cancer Research Fund was established May 8, 1987, through funds received by the University from The Ohio State University Foundation which established an endowed fund with gifts from Dorothy M. Davis; and

WHEREAS the funding has now reached the level required:

NOW THEREFORE
ESTABLISHMENT OF NAMED CHAIR (contd)  
The Dorothy M. Davis Chair in Cancer Research (contd)  

BE IT RESOLVED, That the annual income from The Dorothy M. Davis Chair in Cancer Research shall be used to support the cancer research activities of the holder of The Dorothy M. Davis Chair in Cancer Research. The individual appointed to this chair should have a record of significant achievements in the field of cancer research. Appointment to the chair will be recommended by the Dean of the College of Medicine to the Provost and approved by The Ohio State University Board of Trustees.

Upon motion of Amb. Wolf, seconded by Mr. Shumate, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

---0---

ESTABLISHMENT OF NAMED PROFESSORSHIPS
Resolution No. 93-63

Synopsis: The Investments Committee recommended the approval of the establishment of two named professorships.

The E. F. Wildermuth Foundation Professorship in Optometry

WHEREAS in accordance with the guidelines previously established by the Board, "The E. F. Wildermuth Foundation Professorship Fund in Optometry" was established on February 3, 1989, with an initial gift of $50,000 and a five-year pledge and agreement with The Ohio State University Development Fund from the E. F. Wildermuth Foundation of Columbus, Ohio; and

WHEREAS all gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates; and

WHEREAS The Ohio State University Development Fund has received from the E. F. Wildermuth Foundation a total of $250,000 as pledged and the University has transferred $250,000 from the existing E. F. and Kathryn M. Wildermuth Memorial Endowment - Optometry Fund to bring "The E. F. Wildermuth Foundation Professorship Fund in Optometry" up to $500,000:

NOW THEREFORE

BE IT RESOLVED, That "The E. F. Wildermuth Foundation Professorship Fund in Optometry" be changed to "The E. F. Wildermuth Foundation Professorship in Optometry". A minimum of ten percent (10%) of the annual income shall be returned to principal each year in perpetuity. The remaining ninety percent (90%) of the annual income shall be used to provide compensation and/or program support for truly distinguished scholars in Optometry. Appointment of the Professorship shall be recommended by the Dean of the College of Optometry, after consultation with the appropriate academic selection committees. Final approval shall be made by the Provost, the President, and the Board of Trustees.
ESTABLISHMENT OF NAMED PROFESSORSHIPS (contd)

The Glenn A. Fry Professorship in Optometry

WHEREAS in accordance with the guidelines previously established by the Board, “The Glenn A. Fry Professorship Endowment Fund” was established May 5, 1983, with gifts from friends and alumni of the College of Optometry in honor of Dr. Glenn A. Fry, Professor Emeritus, 1979; and

WHEREAS all gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates; and

WHEREAS at the time of the establishment of the endowed fund, it was agreed that the fund be redesignated "The Glenn A. Fry Professorship in Optometry" when the level of funding reached $250,000; and

WHEREAS the funding has now reached the level required:

NOW THEREFORE

BE IT RESOLVED, That "The Glenn A. Fry Professorship Endowment Fund" be changed to “The Glenn A. Fry Professorship in Optometry” to support a professorship in physiological optics within the College of Optometry. Nominees for appointment to this professorship are to be made by the Dean of the College of Optometry with the approval of the Senior Vice President for Academic Affairs and Provost and The Ohio State University Board of Trustees.

Upon motion of Amb. Wolf, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

ACADEMIC AFFAIRS COMMITTEE REPORT

Mr. Kessler:

The Academic Affairs Committee received a very interesting report this morning from Associate Provost Nancy Rudd on The Ohio State University Managing For the Future Task Force and you will hear more from us on this matter in future meetings. The Committee is also recommending the following resolutions:

MISSION AND VISION STATEMENT FOR THE UNIVERSITY

Resolution No. 93-64

Synopsis: Adoption of a mission and vision statement for the university is proposed.

WHEREAS The Ohio State University has established a need to articulate a long-range academic plan for the university; and

WHEREAS the academic plan must be guided by an understanding of the mission of the university; and
MISSION AND VISION STATEMENT FOR THE UNIVERSITY (contd)

WHEREAS a mission and vision statement has been developed in consultation with all members of the university family:

NOW THEREFORE

BE IT RESOLVED, That the university will adopt the following statement of mission and vision:

The Ohio State University has as its mission the attainment of international distinction in education, scholarship and public service. As the state's leading comprehensive teaching and research university, Ohio State combines a responsibility for the advancement and dissemination of knowledge with a land-grant heritage of public service. It offers an extensive range of academic programs in the liberal arts, the sciences and the professions.

Ohio State provides accessible, high-quality undergraduate and graduate education for qualified students who are able to benefit from a scholarly environment in which research inspires and informs teaching.

At Ohio State, we celebrate and learn from our diversity and we value individual differences. Academic freedom is defended within an environment of civility, tolerance, and mutual respect.

The Ohio State University is a community of scholars of which:

- Teaching and research are recognized as part of the same process: learning.
- Academic units and curricula are structured to foster learning and nurture creativity.
- Administrative services, facilities, and technology enrich the academic experience.
- Academic programs and research opportunities are extensive and excellent, but not exhaustive.
- Human resources complement our promise: High-ability students, faculty, and staff from diverse backgrounds participate in leading programs and enrich an environment that sustains learning and growth.
- Ideas, inventions, and creative work are made accessible to practitioners throughout the state of Ohio and the world in keeping with our land-grant mission.

BE IT FURTHER RESOLVED, That the university will review its declared statement of mission and vision on a decennial basis.

Upon motion of Mr. Kessler, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--
RESOLVED, That the personnel actions as recorded in the Personnel Budget Records of the University since the November 6, 1992 meeting of the Board, including the following Appointments, Appointment of Chairperson, Leave of Absence Without Salary, Leave of Absence Without Salary--Continuation, and Promotion, as detailed in the University Budget be approved.

**Appointments**

Name: MARILYNN B. BREWER  
Title: Professor (The Ohio Eminent Scholar in Social Psychology)  
Department: Psychology  
Effective: July 1, 1993  
Salary: $120,000.00  
Present Position: Professor, Department of Psychology, and Director, Institute for Social Science Research, University of California, Los Angeles

Name: JESSIE L. AU  
Title: Professor (The Dorothy M. Davis Chair in Cancer Research)  
Colleges: Pharmacy and Medicine Administration  
Effective: December 1, 1992  
Salary: $95,400.00  
Present Position: Professor, Colleges of Pharmacy and Medicine Administration

Name: THOMAS J. BURNS  
Title: Professor (The Deloitte & Touche Accounting Professorship Fund)  
College/Department: Business/Department of Accounting and Management Information Systems  
Term: November 1, 1992 - October 31, 1993  
Salary: N/A  
Present Position: Professor, Department of Accounting and Management Information Systems

**Appointment of Chairpersons**

August 11, 1992 through September 30, 1993  
Finance  
Stephen A. Buser*

November 1, 1992 through June 30, 1993  
Medical Microbiology and Immunology  
Caroline C. Whitacre*

*Acting

**Leave of Absence Without Salary**

JOSEPH R. DRAGO, Professor, College of Medicine-Administration and Department of Surgery, effective November 1, 1992, through June 30, 1993.
December 4, 1992 meeting, Board of Trustees

PERSONNEL ACTIONS (contd)

Leave of Absence Without Salary—Continuation

JOAN F. FITZGERALD, Assistant Professor, Department of City and Regional Planning, effective Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993, to conduct research on the economic development impact of new technical preparation programs in the state of Illinois.

Promotion and Tenure

PROMOTION TO FULL PROFESSOR

Jessie L. Au, Pharmacy and Medicine Administration, effective October 1, 1992

Upon motion of Mr. Kessler, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

RESOLUTION IN MEMORIAM

Resolution No. 93-66

Synopsis: The Academic Affairs Committee recommended the approval of a Resolution in Memoriam for Glenn H. Goodman.

RESOLVED, That the Board adopt the following Resolution in Memoriam and that the President be requested to convey a copy to the family of the deceased.

Glenn H. Goodman

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on September 6, 1992 of Glenn H. Goodman, Assistant Professor Emeritus in the Department of Germanic Languages and Literatures.

Glenn H. Goodman was born in 1911, in Middletown, Ohio, and received his early education there. He received his B.A. from Miami University in 1936 after having also spent a year as an exchange student at Heidelberg University in Germany. After receiving the M.A. from the University of Illinois in 1938, he returned to Germany -- this time to the University of Berlin -- to work on a Ph.D. His study was interrupted by World War II and, unable to return to the U.S., he spent part of the war in German interment camps. In 1945 he served briefly as an interpreter for the French occupation forces, and then until 1947 he worked for the U.S. Military Government in Frankfurt. There he headed a depot which collected libraries and archival materials that had been looted by the Nazis and sought to determine rightful owners and return the holdings to them.

In 1947 he returned to the United States and joined the faculty of the Department of Germanic Languages and Literatures as an Instructor. In 1964 he was promoted to Assistant Professor. He retired in 1978 after having served Ohio State for 31 years.

He taught language courses almost exclusively; and particularly in the early years of his tenure he was instrumental in developing new programs in the Department and new approaches to foreign language study. He helped to arrange one of the very first on-going study abroad opportunities for OSU undergraduates and worked to remove barriers to cultural exchanges wherever he could. He remained a popular instructor with lower-division students of German and with graduate students from other disciplines who learned to use German as a research tool from him.
RESOLUTIONS IN MEMORIAM (contd)

Glenn H. Goodman (contd)

His special interests included communication with students and student relations. He was an honorary member of several student honorary associations: Symphonia (national music honorary), Sphinx, Romophos, Phi Eta Sigma, and he was also an honorary member of the interracial fraternities Beta Sigma Tau and Pi Lambda Phi.

He also became known all over Ohio through his early radio broadcasts, which began in 1948 and ran for nearly a decade and a half. He produced two opera commentaries each week for WOSU-Radio, a daily German language program for the radio, and from 1957-61 a half-hour TV program called "Die Deutsche Stunde," which appeared twice weekly on WOSU-TV, Channel 34. For the last, he received the first award given by the National TV Institute for best instructional show.

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Upon motion of Mr. Kessler, seconded by Mr. Shumate, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

FISCAL AFFAIRS COMMITTEE MEETING

Mr. Shumate:

I'd like first to make two notes regarding our meeting agenda. First, we had requested a report on the Restructuring and Realignment in the Office of Human Resources by Linda Tom. Because of the lengthy agenda, we have asked Linda to make that report at our next meeting, so that we will have time to properly hear the report and ask any questions. Secondly, there was an excellent meeting yesterday of the Planning Committee of this Board and notebooks have been prepared for all Board members. At that meeting we discussed in detail the mission and vision statement for the University, and received an outstanding presentation from Dr. Ed Ray. The Committee really appreciates the hard work and efforts that he provided in leading us through this process. We'll be hearing more about this later.

Mr. Shumate:

Thank you very much, Dr. Ray.

--0--

REPORT ON THE IMPACT OF BUDGET REDUCTIONS

Mr. Shumate:

Mr. Chairman, we have a number of very important items and I would like to call upon Mr. Shkurti to report on the impact of the budget reductions.
Mr. Shkurti:

Thank you, Mr. Chairman. When the Board adopted the budget in July, you asked for a detailed accounting of the impact of the budget reductions once they had worked their way through the system. What will be presented to you today is the response to that request. I’ve asked Janet Achterman, the University Controller, to provide this report to you because she and her staff are the people who put the report together and also work day to day with the colleges and other units on financial matters. I feel they are the people who can best relay to you what the reductions have meant to the people on the firing line at the University.

Ms. Janet Achterman:

Thank you, Mr. Shkurti. You should have a gray bound document in front of you entitled, "Impact of the Budget Reductions." For those of you on the Fiscal Affairs Committee, as well as those who attended the Board meeting last month, both Mr. Shkurti and I gave a presentation on the bottom line of the financial impact on the over $78 million in state budget cuts in the past several years. The purpose of the presentation today is really to go beyond the bottom line and the financial impact of the budget cuts over the past several years, and to understand and begin to plan to deal with some of the less visible, but still very real impacts.

As Mr. Shkurti suggested, we distributed a detailed survey to all deans and vice presidents across campus and asked them a series of questions regarding the impact of the budget reductions on: personnel, instructional programs, affirmative action initiatives, recruitment and retention of faculty and staff, academic and administrative support, the climate of the institution, and the physical environment. The surveys were sent out jointly from the Offices of Finance and Academic Affairs in November 1992. Specifically, we asked questions about some quantitative issues relating to staffing and programs -- in terms of the number of staff reductions as well as the impact on programs. We also asked for a qualitative assessment of the impact of the budget reductions. The responses that I will be reporting to you this morning reflect the accumulative effect of the success of the budget reductions over the past several years.

The first category we will be talking about is personnel. You will notice that the bottom line of over 1,200 full-time equivalents as the estimated decrease in the series of budget reductions over the past several years. This includes both filled and vacant positions. The staff numbers include both Civil Service and Administrative and Professional and it also includes the 130 individuals that were laid off from their original positions with the University. The student number of 539, includes 246 graduate students and 293 undergraduate student positions as well.

In terms of impact on the instructional programs, deans reported that there were approximately 245 courses either delayed or eliminated. Now a delayed course can mean several different things. The implementation of a new course or series of courses may have been delayed or courses may be taught less frequently. Whereas now they might be taught every quarter, the budget reductions have caused them to be taught either every other quarter or perhaps even just once a year.
Ms. Achterman: (contd)

Forty-seven programs in total have been downsized and a total of 15 programs eliminated. The common theme in the instructional programs that is talked about again and again in response to the survey was the fact that we have increased class sizes. In increasing class sizes there has been a declining faculty/student ratio, fewer graduate teaching associates, less time for advising students by the faculty, a potential reduction in quality and therefore leading to lack of stability in course offerings. Some colleges have even indicated that majors had been closed out or were not able to take courses in the proper sequence as a result of some of the instructional programmatic cuts.

On pages 5a and 5b of the report, you'll see a list by college of some of the more significant budget cuts. They are obviously less visible than what we read about on the front page of the Columbus Dispatch in terms of losing the emergency medical service or the reduction in the campus bus system, but they are still very real. Some of the ones that I have highlighted are: in the College of Business, the Insurance Library closed; in the Graduate School, the recruitment grants program has been eliminated; in the College of Human Ecology, the hotel/hospitality management program has been downsized; in the Library, open hours in seven of the largest libraries have been reduced and 43 public-access terminals for the library information system have been eliminated; in the College of Social Work, the elimination of their microcomputer laboratory; and on the extended campuses, funds for faculty research support have been eliminated.

Overall the comments included the fact that a lot of colleges and offices have eliminated maintenance on their PC's and other equipment, and they have had no departmental support for research and research initiatives. Some colleges discussed the fact that their morale among graduate students is low, and the graduate students fear that there will be no continued funding for their programs and therefore they will not be able to continue their field of study. Faculty also reported that funds for travel, faculty start-up, and the like were nearly gone.

The next subject area that I want to talk about is the impact on Affirmative Action initiatives. Fewer positions available on campus result in fewer opportunities for affirmative action recruitment. There is also some increasing uncertainty that the positions themselves will remain funded over the long-term. There are limited or no recruitment funds available for Affirmative Action initiatives and through the Office of Human Resources, the Affirmative Action Awards Program has been downsized and Affirmative Action Grants have been eliminated. I would like to quote from the College of Humanities' report, "The budget cuts...have made it virtually impossible to act on targets of opportunity [for affirmative action] as they have come along."

The next category that I would like to talk about very briefly is recruitment and retention. Again, with fewer faculty positions available it is difficult to recruit strong faculty members and often times candidates who had been recruited were concerned about Ohio State's future. We are able to provide even less time for research for junior faculty who are striving for tenure, and therefore there is less incentive for faculty to stay as other institutions are beginning to seek out some of our prominent faculty.
REPORT ON THE IMPACT OF BUDGET REDUCTIONS (contd)

Ms. Achterman: (contd)

I would like to quote from two separate reports: from the College of Veterinary Medicine, "[Lack of research time] is devastating to the junior faculty member who is working towards promotion and tenure." From the College of Engineering, "Thus, our faculty are working with more demands, fewer rewards, and in a dingy, dirty, and high-pressure environment. I doubt if the most mobile and highly-sought of them will remain here long under these conditions."

The next category is support and climate -- this is administrative and academic support. Most of the vice presidents, as well as administrative offices were reporting that their staff were burdened with the same amount of work, but fewer people to get this same work done. Many were concerned about deteriorating customer service, the length of lines, and less effective operations with the reduced staffing and operating support. And as a result of that, often times we have seen more decentralization of functions, as well as fiscal responsibility. As centrally provided services are growing tighter, more of the burden of providing those functions have been placed on the departments. Continuing in that same vain, there is a lot of uncertainty, anxiety, and stress and low morale among the faculty and staff. Units and individuals are often turning inward with less collaborative efforts outside of their departments. Overall, people are concerned that the reputation of the Institution could be in jeopardy.

I would like to quote from two other reports: from the College of Agriculture, "Reduced motivation and low morale is the most devastating impact of the budget cuts." From the College of Mathematical and Physical Sciences, "Low morale is quite pervasive in the College. The explanation goes beyond the simple economic consequence of no raises and no equity/excellence funds. Widespread talk of program elimination and consolidations, mandatory workload policies, post-tenure review, and further retrenchment has created an environment of apprehension and bleakness, especially in those departments which, even in better times, felt themselves to be under funded and unappreciated."

You will see on the next page some of the highlights of the reports back from the vice presidential areas on the impact of the budget reductions on academic support functions. I would like to highlight just a few. From the Business and Administration report there were comments regarding offices cleaned only weekly and slower response to maintenance problems. In the area of Communication, you see that the OSU Quest and On Campus have been reduced in number, size, and frequency, which means less external communication to our constituent groups. In the Office of Finance we are experiencing increased processing time of invoices which leads to increased complaints from vendors and departments. In the Office of Human Resources, the Affirmative Action directives and activities for the entire University have been delayed and planning and execution of University diversity programs have been delayed. In the Office of Research, many services provided by OSURF to faculty have been eliminated or reduced -- that was stated many times in the deans' reports as well.

In the Office of Student Affairs, reduced funding to student organizations, decline in student tutor services, extremely high student/provider ratio for counseling services, and increased waiting for meal services from 5 minutes or less to 15 minutes or more for students in the Residence Halls dining facilities.
Ms. Achterman: (contd)

The next category is physical environment and overall the comments relate to the fact that buildings are in disrepair and we have a deteriorating physical plant. Now as you know, this does not come about only because of the recent budget cuts, but is merely exacerbated by the recent budget. There have been reports of laboratories and instructional facilities in very poor condition, with limited daily maintenance in classrooms, offices, as well as public spaces. And there has been poor or no equipment maintenance and replacements so people are struggling with unworkable and outdated equipment.

I would like to read two quotes. From the College of Engineering, "While the custodial condition of classrooms, laboratories and offices has always been poor, it has recently become worse. Not only have we received complaints from students, but also federal and industrial contract monitors who fund our research programs describe our facilities as the worst maintained in their experience!" From the Office of Physical Facilities in Business and Administration, "We have been unable to hire adequate numbers of student employees or replace vacant positions which have had an adverse impact on the quality and quantity of tasks performed. Trash containers are not emptied as regularly, individual offices are only serviced weekly, and cleaning of public spaces, indoor and out, is not as frequent. The campus is simply not as clean or well kept."

Where do we go from here? What are our future directions? You heard the President speak earlier this morning about our long-range academic planning, obviously that needs to continue. We need to respond to the institutional Managing For the Future Task Force Report, as well as to the state-wide Managing For the Future Task Force Report. We need to convince the state to reestablish higher education as a priority. Above all, we need to continue to protect the academic core of the institution.

Again, as a part of our long-range planning, there are things that we need to begin now. We need to encourage faculty, staff, and students to take risks and be innovative in trying to deal with some of the problems that we are facing as a result of reduced resources. We need to investigate cost-effective changes for campus-wide support services either through consolidation of those services, decentralization, or potential elimination. Some of those suggestions were put forward in both Managing For the Future Task Force Reports. We also need to create University-wide incentives for cost-reducing changes. We need to do that in order to avoid human tendency to hunker down in bad times until these blow over.

Finally, out of those long-range academic and strategic plans we need to set priorities for 1994. We need to set priorities for the budget reallocation and more than likely we are going to be looking at continued differential reallocation as we begin to address our priorities. We also need to commit permanent funds to continue to address the closed courses problem.

In summary, I would like to say that the purpose of today's presentation was for all of us at the institutional and Board level to gain an appreciation perspective on the less visible impact of these budget cuts. We believe that we have done everything possible to protect the academic core, as well as to protect the students, but the burden has fallen squarely on the shoulders of the faculty and staff. In spite of everything this is still a great institution, one we are very proud to be a part of -- classes are still being held, faculty are still teaching, and research is still being done. But the strain on the
REPORT ON THE IMPACT OF BUDGET REDUCTIONS (contd)

Ms. Achterman: (contd)

system and its resources -- its human resources, its fiscal resources, and its physical resources -- is taking its toll. Additional reductions will only make the problems worse.

Again, both our long-term and short-term strategy must include ways to alleviate the pressure while recognizing our limited financial flexibility. The last slide shows basically the magnitude of the budget cuts that we have experienced over the past two years. This concludes my report. I would be happy to answer any questions you might have.

Mr. Shumate:

Thank you, Ms. Achterman, for your report. Are there any questions?

--0--

REPORT ON THE STATUS OF MAJOR CAPITAL IMPROVEMENT PROJECTS

Mr. Shumate:

The next item on the agenda was to be the report on the University Bonded Debt and we will receive that report at the next meeting of the Fiscal Affairs Committee. We will now receive a report on the status of major capital improvement projects. This report is in response to specific requests from a number of Board members -- an overview of the major capital improvement projects that we have, as well as a detailed discussion on how we are monitoring and tracking these projects. I will call upon Ms. Pichette to lead us in this presentation.

Ms. Pichette:

I would like to thank you, Mr. Chairman, for allowing us to bring this report to you. This is a result of many requests that I have received since my arrival at Ohio State last April, as to the status of all the major capital improvement projects being undertaken throughout the University. Many times I hear that you have voted on different projects and have wondered, "Where are they?" and "What is happening now?"

To bring you up-to-date on the progress of the projects of over $1 million or more, we sent out this report, which all of you should have, along with a cover memo from myself and Jill Morelli. This report has project data sheets on every project -- whether it is emerging, design, construction, or completed -- that are over $1 million. If you are interested in any of the projects under $1 million, we also have those available. This is our first effort to provide this type of summary documentation on what for last year was over 170 projects. We welcome any suggestions for improvement on this process.

This morning we would like to highlight for you several of the projects noted in the report. First I need to emphasize that the Architect's Office is one of many players in the successful completion of these projects. Campus Planning and Physical Facilities both have critical roles in bringing these to successful completion. To make this presentation I would like to introduce Jill Morelli, the new University Architect. We are fortunate to have a person of her ability and enthusiasm. She was not daunted by the
Ms. Pichette: (contd)

challenge of being asked to do this with only being here two months. Jill and her staff have done yeoman's work to bring this to you today.

Ms. Jill Morelli:

Thank you, Janet. We in the University Architect's Office appreciate this opportunity to talk to you about the variety of projects that we deal with and the milestones of direct involvement. Should you approve, we hope to make this an annual event. Of course, this presentation would not have been possible without the help of numerous staff members in the office, some of which are here today. I personally wish to thank Julie Karovics, Jean Frey, Jae Kauh, and Patty Berger for their assistance in putting this together.

In 1992 the University Architect's Office was involved with 174 publicly advertised projects, which totalled over $400 million. The color code used -- green represents emerging projects; blue represents projects in design; red represents projects under construction; and yellow represents projects completed -- will be consistent throughout this presentation and also in the report that you have received. Projects which have had the Office's involvement in 1992 encompass those denoted by the color coding on this slide of the Columbus Campus.

Today we have selected a few projects which illustrate the variety of types, location, and complexity of projects our Office handles. Should you desire specific information on a project, I refer you to the annual report. This report contains project data sheets on all publicly advertised projects over $1 million. If you desire specific information on projects less than $1 million, we will arrange for you to receive those project data sheets. After the presentation, should you desire, we can review the project data sheets and the information they contain or feel free to contact me at the office.

Today we will be looking at representative projects within each of the four categories: emerging projects, projects in design, projects under construction, and completed projects in 1992. We could easily spend 10 to 20 minutes or even more on each of these projects, but due to time constraints this presentation can only be a cursory review.

Emerging Projects are projects that are in the conceptual or planning stage. The involvement of the University Architect's Office at this stage is one of support for the Office of Campus Planning, headed by Assistant Vice President David Marsh under the auspices of Vice President Bill Shkurti. At this time the Board is often asked to approve proceeding with feasibility studies for major projects. Such was the case in February of this year for the College of Business Facilities and the Student Affairs Facilities Complex. Although there are many emerging projects, today we will focus on two: the College of Business Complex and the Student Affairs Facilities Complex.

Presently, the University is proceeding with preliminary planning for the College of Business Facilities, denoted by the green code up in the upper part of this screen. Issues such as the site, funding, program, parking, and phasing are being addressed. A site, north of Woodruff and east of St. John Arena, is being investigated. As this project is the next item on your agenda this morning, I will not discuss it but leave that task to others.
Ms. Morelli: (contd)

The Student Affairs Facilities Complex is in an earlier stage of planning than the College of Business. Presently, the University is investigating possible sites and their resultant impact on user access, parking, utilities, etc. Initially, seven sites were deemed to have some merit denoted by the green circles that you see on this map. Two sites seem to warrant a more in-depth study before a recommendation is made by the advisory committee. These two sites include the existing site on High Street and the Cunz Hall site adjacent to the intramural fields.

With Board approval, an associate architect or engineer is hired for site specific analysis and design. We will focus on four projects presently in design: Campbell Hall Addition, Doan Hall, Equine Center, and Wiseman Hall. The Campbell Hall Addition will add a 25,000 square addition to an existing building located on Neil Avenue. The addition will include offices, classrooms, and a costume and textile gallery. This project was funded primarily by a donation to the University by the Schottenstein family and the total cost of the project is $3.3 million.

The Doan Hall Surgical Intensive Care Unit is a four-floor addition on top of an existing two-story Medical Logistical Facility, which was constructed in 1990. This addition will house Surgical Intensive Care expansion, which will require the renovation of approximately 12,000 square feet of existing Doan Hall space. In addition, this will be the future home of Occupational and Physical Therapy, Endoscopy, and tissue culture labs. Presently the construction documents have been completed by the associate architect and are being reviewed by the University. Bids will be received in February 1993, with completion projected for fall 1994. The total estimated cost of this project is $12 million.

The Equine Center will be an addition to the west side of the existing Veterinary Hospital and will house horses used in the College's academic programs, in addition to privately owned patient horses. A trauma surgical unit with facilities for intensive care are major components of this facility. In addition to state and local funding of this project, the Galbreath family has made a generous donation. Total estimated project cost is $6.5 million, with an estimated completion date of mid-1994.

The Wiseman Hall Medical Research Facility is a five-story, clinical research facility connected to the existing Wiseman Hall. Four of the floors will contain laboratories and support facilities, two floors are presently designated to be shells for future use, and all space has been assigned to the College of Medicine. Bids will be opened on December 8 for this project and should this project be the beneficiary of our excellent bidding climate, infill of one or both of the shelled floors is possible within the total estimated project of $11 million. Construction should begin in the first quarter of 1993, and be completed in the spring 1994.

After bids are received and analyzed by the University, contracts are issued, signed, and a report is brought to the Board on the bids and contract costs. These become the projects under construction. We have over 38 projects in some phase of construction at this moment, but will focus on the Brown Hall Annex, Dreese Laboratory, the Law Building, Neuropsychiatric Facility, Newark Regional Campus Grounds Improvement, and Sullivant Hall Renovation.
Ms. Morelli: (contd)

The Brown Hall Annex Replacement is three buildings done as one project, which will house three user groups -- the Science Engineering Library, which consolidates five existing libraries; the Math Tower, a 7-story structure built to house the Department of Mathematics' offices; and the new classroom building which features two lectures halls and four computer classrooms. If you will notice on this slide, the rendering by the architect and the subsequent photograph taken from the same vantage point are strikingly similar. World renowned architect Philip Johnson is the design consultant for this $23 million project. Classrooms will open January 4, while the offices will be occupied later in the year.

The Dreese Laboratory Addition provides numerous specialized classrooms, labs, a large computer room, a clean room, high-voltage lab, and several conference and seminar rooms. This project is presently being worked on outside of our office windows, offering our entire staff and visitors a unique vantage point for field observation. The estimated completion date is March 1994, with a total project cost of $20.5 million.

The Law Building Addition and Renovation is a Gunnar Birkerts designed addition which doubles the size of the current building and renovates the existing spaces. In this slide High Street is horizontal at the top of the screen and the featured prow reaches towards the central part of the campus to include the College of Law as an integral part of the campus community. The new expanded library facility and administrative faculty offices compliment the remodeled facilities for student organizations, a legal clinic, renovated law library, an auditorium, and classrooms. Funding sources for the project included state appropriations, local University funds, a Kellogg Foundation grant, and over $7 million raised by the College of Law. Phased occupancy began in August 1992, with the occupancy of the renovated classrooms, and is expected to be completed in January 1993, with the completion of the Library, renovation of the existing Library, and remodeling of the offices.

The Neuropsychiatric Facility is scheduled for occupancy in fall 1993. This five-story, 111,000 square foot hospital will house 84 children, adolescence, and adult in-patients when completed. It will both replace and enhance activities currently performed in Upham Hall to which it is attached by a corridor and the total project cost is $15 million.

The University Architect's Office also coordinates the projects at the Regional Campuses. For example, the grounds improvement project in Newark. In addition to the loop road, a small lake and amphitheater were constructed and sidewalks improved. This partially donor-funded project cost $1.4 million and will be completed in February 1993.

Sullivant Hall is an older facility with numerous, historical features worthy of preservation. This project created space for the Undergraduate Library and expands the space for the Department of Dance, including the renovation of the theatre. Sullivant Hall was a particularly difficult project due to renovation continuing while the using agencies occupied the facility. As with all projects, requirements of the American's With Disabilities Act are being incorporated. Completion is set for March 1993.
Ms. Morelli: (contd)

Ultimately the project is completed and occupied by the using agency, at this time the University Architect's Office coordinates the warranty work and project closeout with Physical Facilities to provide a smooth transition. Numerous projects were completed in 1992, including the Dental Instructional Lab improvements, Exterior Campus Lighting, Honors House, Oxley Hall, Agricultural Research Center, Biotechnology Center, and the University Airport Renovation.

The Dental Instructional Lab Improvements was phase one of a two-phase project that renovated the existing Clinic Facilities on the first and second floors of Postle Hall. Nearly 23,000 square feet of lab space was remodeled and newly equipped to provide a relaxing enhanced environment for clinical instruction.

The Exterior Campus Lighting is an ongoing project coordinated by Physical Facilities with the administrative aspects of the project handled by our office. The project doubled the recommended foot candles for outdoor spaces in response to the need for greater amounts of illumination on campus. The light poles have preconstructed foundations for quick installation and the pole and the light are designed to have a historical look while incorporating the most current lighting technology.

Honors House was a major renovation of the former home of the Presidents of the University. New mechanical systems were installed and all floors are now accessible to the physically handicapped, in addition there was cosmetic refurbishing of the interiors. This project was completed in July 1992.

Oxley Hall was in a state of severe decay before renovation. This distinctive building was the first dormitory on campus for women and was the first, and I personally hope not the last, designed by a woman architect. Mechanical systems and windows were replaced, and interiors were refurbished as well. This facility is presently occupied by the Office of International Affairs and was completed in January 1992.

Another project off the Columbus Campus is the Piketon Agricultural Research and Extension Center. This project included the construction of buildings which house a greenhouse, aquaculture unit, and the farm operation shop. In addition, the project included the construction of numerous fish ponds and a reservoir. This project was completed last month.

The Biotechnology Center Addition was the second phase of a three-phase project to establish a major biotechnology center at Ohio State. The work includes a complete renovation of the ground and first floor to establish the Center's molecular neurobiology and macro molecular structure programs. Included in the 62,000 square foot renovation was an environmentally controlled lab. The third phase is presently under construction.

The University Airport received a new overlay and grooving of the main runways, and surface sensors for weather monitoring. New overlay was also installed on taxiways E and A. In addition, this facility was constructed to house snow removal equipment, as required by the FAA, and the Airport's maintenance shop.
REPORT ON THE STATUS OF MAJOR CAPITAL IMPROVEMENT PROJECTS (contd)

Ms. Morelli: (contd)

In addition to the projects that we have accomplished this year and that we've shown you today, there are numerous, smaller, publicly advertised projects and projects that are designed internally, contracted, and administered by the University Architect's Office. These are usually smaller in dollars, but constitute a significant portion of the administrative and project management workload.

From the smallest chiller replacement project to the largest signature building, each project gets the attention necessary to make it a positive addition to Ohio State's environment for learning. It is the goal of the University Architect's Office to provide an environment that is conducive to learning so each student maximizes their potential. In addition, when each of us returns to campus the built environment becomes a symbol of that creative and stimulating atmosphere that we call The Ohio State University.

Thank you very much for this opportunity. If there are any questions, I will be happy to answer them at this time or any other time.

Mr. Shkurti:

Thank you very much. Are there any questions? I have been on the Board for four years and this is the first time that I have received a comprehensive overview of the various projects. I appreciate the definitions that you have used to help us focus on the Board's responsibilities, as well as role in each of these steps. As we mentioned earlier, today was designed to primarily provide an informational foundation for the Board. At our next meeting of the Fiscal Affairs Committee there will certainly be more dialogue and interaction regarding any changes that the Board would have in either the reporting process or the process that is used by the department. Specially, I would ask the Board to look at the chart, located in the report, that shows the points of our inquiry as they presently exist and if there are any recommendations for change or suggestions, to give them to either Ms. Pichette or Ms. Morelli. Again, this is a first step and it has been in response to the request of the Board.

Ms. Pichette:

I would just encourage you to look at the project data sheets and if you don't understand them or you think there is something missing that you would like to see, please let us know because they are considered to be dynamic documents. As you get into the completed projects, obviously there is more information. So, please, we want your input.

--0--

REPORT ON THE COLLEGE OF BUSINESS

Mr. Shkurti:

This is an extremely important project and one that is in the emerging stage, so we felt that it was very important that the Board be both familiar and comfortable with what is going on. What I would like to do today is very briefly give the Board a sense of what has gone on so far, what has come to the Board so far, and then what happens next.
Mr. Shkurti: (contd)

I think the place to start is where this project was first reported to the Board in June 1991. Those of you who were here at the time may remember I tried to visualize the importance of the project in describing an experience I had when I was still teaching in the School of Public Policy -- where part of the ceiling came down, literally, during one of my lectures. I hope it had nothing to do with what I said, but I think it is not an uncommon occurrence for those who teach and work in Hagerty Hall to have those kinds of dysfunctional elements happen. At that time, the project was presented as part of the six-year capital plan that was reviewed by the Board and we indicated that it would be a project that would combine state and private funding and fundraising. We were looking at two sites: one was near the Ohio Union and the other was on north Campus, near Tuttle Avenue. We would then come back to the Board in six months, after we had done some preliminary work, and indicate what we were thinking of regarding the sites.

In November 1991 a briefing sheet was prepared indicating that we expected the project to cost between $60 million and $70 million in 1991 dollars. Hopefully, $42 million of that would come from the state, but $20 million would be raised by private funds. We also shared with the Board at that time our sense that the Woodruff and Tuttle site would be the more likely and the more preferable of the two sites. The reason that we felt the Ohio Union site was not as desirable was: 1) there are a lot of things under the ground at that site -- utility lines and so forth -- that we felt would complicate construction; and 2) if we use the Ohio Union site it would mean the University and the Board would be committed then to building a new Ohio Union, which would be a rather substantial expense. So we felt that when both the complications of the site and the potential cost were weighed against a relatively pristine site on the north campus that that was the more valuable site.

At that time we indicated the next event that the Board would be asked to deal with would be the hiring of architects for some preliminary plans, site studies, and conceptual design. That event occurred in February 1992 and you may remember at that time Mr. Nichols presented a resolution to the Board to hire the architect for phase one, which was the conceptual design. The conceptual design is now almost completed, so now we are getting ready for phase two. What we are proposing is not to decide this today, but to bring it to you for vote at the February Board meeting. The reason that Janet and I both felt it was important -- and the President supported us on this -- to bring this project forward at this particular meeting, was to let you know this project was coming to you for a major decision in February. We wanted to share with you the information we've had up to this point, and also to give you a chance to express to us any additional information you would like to have.

Let me also point out that a memorandum from Ms. Pichette and I, along with briefing material on the background of the building, was mailed to you on November 25. There will also be a second mailing to you hopefully within a week. Ms. Casto has ask me to prepare a list of questions that we feel should be addressed on every major building project that the University undertakes. We have prepared that and we will use the College of Business building as the first example to run through that system. So you will see what we think are the most important questions to ask about that project, what our responses are, and it will help you to determine what questions you may want to raise.
In addition, we have with us today Joe Alluto, Dean of the College of Business, who has been one of the driving forces behind the project. Also in attendance are staff from the Architect's Office and Campus Planning, and the key faculty person from the College of Business involved in this project. So if there are any questions you have at this time, or any questions you want to make sure are answered by the time this comes up for a vote at the February meeting, we will do our utmost to assist you in providing that information.

Mr. Shumate:

Are there any questions or additional comments?

Ms. Pichette:

I just want to clarify that the last page in the mailing to you was the draft resolution on the Employment of Architects and Engineers for this project, so you know what you will be voting on in February.

Mr. Shumate:

This information is provided, again, in response to Board requests. This allows the Board at least a month's time in between meetings to review, analyze, and engage in any dialogue with the appropriate staff on these issues. Since Dean Alluto is here we certainly want to provide him with an opportunity, if he would like, to make a comment.

Dean Joe Alutto:

Thank you. I really don't have anything to add -- I think that you have all the information. We have been very pleased with the way the project has progressed. We are at a critical stage at this point, and are looking forward to moving the project through to completion, but I would be happy to answer any questions.

Mr. Shumate:

Thank you. Any other items for discussion on the College of Business? If not, I am going to suggest that we move to the property, easement, and miscellaneous issues that require Board vote, and discuss the smaller capital projects at a subsequent meeting.

--0--

PURCHASE OF REAL PROPERTY
Resolution No. 93-67

209-211 and 215 WEST TENTH AVENUE
COLUMBUS, OHIO

Synopsis: Authorization to purchase improved real property at 209-211 and 215 West Tenth Avenue in Columbus, Ohio, is proposed.
December 4, 1992 meeting, Board of Trustees

PURCHASE OF REAL PROPERTY (contd)

209-211 and 215 WEST TENTH AVENUE
COLUMBUS, OHIO (contd)

WHEREAS The Ohio State University has been presented with an opportunity to purchase the improved real property located at 209-211 and 215 West Tenth Avenue in Columbus, Ohio; and

WHEREAS this property has an appraised value of $425,600.00 to $430,000.00, and the owner, Ms. Mary Sanford Cobb Schirmer of Columbus, has offered to sell the property to the University at a price of $425,000.00; and

WHEREAS this property is located within the South Campus acquisition boundary of the University's Master Plan and the appropriate University offices have determined that the purchase of this property is in the best interest of the University; and

WHEREAS funds for the purchase will be provided from general University funds:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to purchase, in the name of the State of Ohio for the use of The Ohio State University, the improved real property located at 209-211 and 215 West Tenth Avenue at a price not to exceed $425,000.00, upon such terms and conditions as are deemed to be in the best interest of the University, subject to the University receiving the necessary approvals from the Ohio Board of Regents and the State Controlling Board.

Upon motion of Mr. Shumate, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix XIV for background and map, page 419.)

--0--

Ms. Pichette:

We are requesting authorization to sell a small unimproved lot on West Oakland Avenue. This property is located on the west side of the Olentangy River and is across the river from the Fawcett Center. I would note that this and several other small lots on the other side of the river were acquired by the University in the 1960s. They are totally isolated from the University property, and are not needed for University programs. This is the last remaining lot to be sold, except for two that are under water.

SALE OF REAL PROPERTY

Resolution No. 93-68

LOT #114, WEST OAKLAND AVENUE
COLUMBUS, OHIO

Synopsis: Authorization to sell 0.0963 acre of unimproved real property in Columbus, Ohio, is proposed.
December 4, 1992 meeting, Board of Trustees

SALE OF REAL PROPERTY (contd)

LOT #114, WEST OAKLAND AVENUE
COLUMBUS, OHIO (contd)

WHEREAS the Board of Trustees of The Ohio State University owns 0.0963 acre of unimproved real property, known as Lot 114, on West Oakland Avenue in Columbus, Ohio; and

WHEREAS the appraised value of this property is $5,000.00, and Richard W. Foster and Robert E. Deis of Columbus have offered to purchase the property for $8,500.00; and

WHEREAS the appropriate University offices have determined that this sale of the property is in the best interest of the University, and it is the desire of this Board to accept this purchase offer and to sell all the Board's right, title, and interest in this property:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized, in the name of the Board of Trustees of The Ohio State University, to sell all of the University's right, title, and interest in this property to Richard W. Foster and Robert E. Deis at a price of $8,500.00, upon such terms and conditions as are deemed to be in the best interest of the University.

Upon motion of Mr. Shumate, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix XV for background and map, page 423.)

EASEMENT

Resolution No. 93-69

OHIO POWER COMPANY
OARDC - WOOSTER, OHIO

Synopsis: The Fiscal Affairs Committee recommended authorization to grant an easement to the Ohio Power Company for installation of electric service at 2232 Oil City Road, Wooster, Ohio.

WHEREAS the Ohio Power Company has requested the granting of a 15-year easement consisting of a strip of land approximately 20 feet in width and 378 feet in length for the installation of electric service to the Dairy Maternity and Calf Barn on the Ohio Agricultural Research and Development Center property located at 2232 Oil City Road, Wooster, Ohio; and

WHEREAS this easement will serve University property, and the appropriate University offices have recommended the approval of this easement:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to request the Deputy Director of Public Works of the Department of Administrative Services, pursuant to his statutory duties, to act for and on behalf of the University in developing the necessary legal instruments to provide for this easement.
December 4, 1992 meeting, Board of Trustees

EASEMENT (contd)

OHIO POWER COMPANY
OARDC - WOOSTER, OHIO (contd)

Upon motion of Mr. Shumate, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix XVI for map, page 427.)

--0--

NON-MANDATORY TRANSFERS FROM CURRENT FUNDS
FISCAL YEAR 1991-1992

Resolution No. 93-70

Synopsis: Transfers to Endowment Principal Funds, Annuity and Life Income Funds, Loan Funds, Unexpended Plant Funds, Renewal and Replacement Funds - Remodeling and Renovation, Renewal and Replacement Funds - Repair and Replacement, and Retirement of Indebtedness Funds be submitted for approval.

WHEREAS non-mandatory transfers from current funds for the fiscal year 1991-1992 have been made; and

WHEREAS this accounting procedure is in compliance with the Auditor of State that all transfers among fund groups be reported:

NOW THEREFORE

BE IT RESOLVED, That the transfers as detailed in the accompanying report be accepted and approved.

Upon motion of Mr. Shumate, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix XVII for charts, page 429.)

COMPUTER LABORATORY FEE IN ENGINEERING

Resolution No. 93-71

Synopsis: Authorization of a computer laboratory fee for majors only in the College of Engineering is proposed.

WHEREAS the College of Engineering has established an immediate need for up-grading of computer services for instructional purposes; and

WHEREAS current University funding is inadequate to meet the financial costs of those instructional needs; and

WHEREAS the College has a plan for a computer laboratory fee for majors only that assigns funds collected to the provision of instructional computing services:
NOW THEREFORE

BE IT RESOLVED, That full-time undergraduate majors (12 credit hours or more) and full-time graduate students (8 credit hours or more) in the College of Engineering will be assessed a computer laboratory fee of $120 per quarter beginning Spring Quarter 1993. The fee will be prorated at $10 per credit hour for undergraduate majors enrolled for less than 12 credit hours and at $15 per credit hour for graduate students enrolled for less than 8 credit hours. For subsequent academic years the full-time computing fee will be limited to 15% of the resident undergraduate tuition. Prorated fees per credit hour for undergraduate and graduate students will be adjusted correspondingly; and

BE IT FURTHER RESOLVED, That the use of the Engineering computer laboratory fee will be reviewed annually by the Office of Academic Affairs until the fee is eliminated or replaced by a University-wide computing fee.

Upon motion of Mr. Shumate, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

Mr. Shumate:

I would just like to say that I appreciate all of the reports. I know that the reports were very lengthy, but very important and also responsive to the Board. I think our agenda today also emphasizes that we need to do a better job of coordinating with Mr. Scott on the number of reports that we have at any one meeting. We would also ask Mr. Scott to help us out in that regard.

REPORT - UNIVERSITY'S ENDOWMENT FUND  
Resolution No. 93-72

RESOLVED, That the report on the University's Endowment Fund, dated November 20, 1992, as submitted to the Investments Committee of the Board of Trustees, be received and filed with the official records of the Board.

--0--

REPORT - UNIVERSITY'S ENDOWMENT FUND  
QUARTERLY REPORTS  
Resolution No. 93-73

RESOLVED, That the report on the University's Endowment Fund Quarterly Reports, dated September 30, 1992, as submitted to the Investments Committee of the Board of Trustees, be received and filed with the official records of the Board.

--0--
REPORT - UNIVERSITY'S CASH AND INVESTMENTS
Resolution No. 93-74

RESOLVED, That the report on the University's Cash and Investments, dated September 30, 1992, as submitted to the Investments Committee of the Board of Trustees, be received and filed with the official records of the Board.

---0---

Thereupon the Board adjourned to meet Thursday, February 4, 1993, at The Ohio State University Ohio Union, Columbus, Ohio.

Attest:

Madison H. Scott                     John J. Barone
Secretary                            Chairman
The Board of Trustees met at its regular monthly meeting on Thursday, February 4, 1993, at The Ohio State University Ohio Union, Columbus, Ohio, pursuant to adjournment.

Minutes of the last meeting were approved.

Columbus, Ohio, February 4, 1993
February 4, 1993 meeting, Board of Trustees

The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on February 4, 1993, at 10:25 a.m. He requested the Secretary to call the roll.

Present: John J. Barone, Chairman, Deborah E. Casto, John W. Kessler, Milton A. Wolf, Alex Shumate, Theodore S. Celeste, Michael F. Colley, George A. Skestos, Kristen Cusack, and Hiawatha N. Francisco, Jr.

---

PRESIDENT'S REPORT

President Gee:

Mr. Chairman, members of the Board, ladies and gentlemen, we are glad to be meeting here with all of you today in this setting, and indeed, I am glad to see the sun shining. On February 2, I saw my shadow and went back into recluse.

I want to say how pleased I am that The Ohio State University is number one in the Big Ten! Before someone slips me a note reminding me of Indiana's record, or Iowa's standing atop the women's basketball standings, let me say again that Ohio State is Number One. According to the National Merit Scholarship Corporation, Ohio State enrolled more National Merit Scholars in this year's freshman class than any other Big Ten University. I might say that also includes Northwestern. Our 100 scholars placed us 13th in the nation among all universities. Clearly, Ohio State is the university of choice for a great many high ability students, which we take great pride.

At the graduate level, I am pleased to announce also that in a survey published by Science magazine, Ohio State ranks fifth in the nation in the number of doctoral degrees awarded to African-American students. It is, of course, our distinguished faculty who attract these outstanding students to this university. As evidence of that quality, a national survey of the reputation of doctoral programs in six liberal arts disciplines ranks The Ohio State University 25th among all universities in the country and 14th among public universities. And, as a reflection of our momentum, Ohio State gained five places in the ranking over the last decade. Which in and of itself is quite remarkable. As they say in the Billboard music charts, Ohio State is Number 25 "with a bullet" -- continuing to advance in reputation across the country. The programs ranked were: economics, English, history, political science, psychology, and sociology.

Our quality extends to many, many disciplines. Among the honors received by our faculty recently is an international recognition in physics. Professor Frank DeLucia, chair of the Department of Physics, received the Max Planck Research Award from the Humboldt Foundation. He is one of only 25 physicists world-wide to receive this prestigious award.

Also this month, the Wexner Center for the Arts has received the 1993 Honor Award from the American Institute of Architects. This is the A.I.A.'s highest recognition of design excellence for individual buildings. I was interested to note that the award jury called the Wexner Center, "the Lenny Bruce of Architecture: bold and brilliant to some and to others irritating and resistant." They said it "shrieks at visitors." If they had these words for the winner, I'd hate to hear what they said about the losers!
President Gee: (contd)

Two weeks ago, Ohio State received another form of national recognition. ABC News "Business World," a 30-minute weekly program on current events in business, broadcast a four-minute segment on Ohio State's investment class. And, of course, Mr. Barone is so interested in that. Some of you viewed that piece during yesterday's Investments Committee meeting as I remember. It could not have been a more complimentary story about the university. The student investment management activity continues to be an excellent educational program. I might note our thanks to John and Rose Barone for their financial support of the program, which is included in today's foundation report by the way, John, and we recognize that.

As today's agenda reflects, the Office of Academic Affairs is proposing some restructuring that will enhance the effectiveness of our support services and programs in several critical areas of the university. I want to particularly note the reconfiguration of student financial aid, aligning that office to our recruitment and admission activity. Clearly, the availability and administration of financial aid is critical to our efforts to attract and retain a highly capable and diverse student population. We have made improved student financial aid services a priority, and Dr. Jim Mager is being charged with examining and enhancing all facets of the operation. I have every confidence that this new administrative structure will strengthen the delivery of financial aid to students.

Also on today's agenda is a proposal to adjust the 1992-93 budget to accommodate the projected shortfall. Again, difficult decisions are being made consistent with our mission and our priorities. As we enter a new legislative season, and a new budget cycle, it is of utmost importance that the people of this university make our case to the people of this state. As you are aware, this continues to be a priority for my time, as we seek to secure the support of elected officials for higher education.

To advance our case, our School of Public Policy and Management prepared an economic impact study of Ohio State. Among the highlights, let me just mention a few:

The university, its employees, students, and visitors spent an estimated $1.45 billion in Ohio this past year. These dollars were spent at least one more time before leaving the state -- and by the way that is a very conservative estimate. The economists and I argue and, of course, I try to win, but they always come up with some economic theory. Nonetheless, if it circulates only one time, that is an impact of over $3 billion, about seven times greater than the state's initial investment in the university.

The university brought in about $295 million to Ohio in out-of-state revenues including federal research support.

The university's in-state purchases and physical plant expenditures of $411 million created nearly 17,000 jobs for Ohioans beyond the campus.
February 4, 1993 meeting, Board of Trustees

PRESIDENT’S REPORT (contd)

President Gee: (contd)

Following the release of this report, I am hoping that I will be able to visit several major cities in the state, and indeed have those scheduled, to hold briefings for business leaders, media representatives, and our many friends.

Beyond these numbers -- as impressive as they are -- is our most important impact on this state -- our graduates. Each quarter, this Board, on the recommendation of the faculty, authorizes degrees for thousands of students. Today, I want to call your attention to one degree recipient. Joseph Michael Snively is being recommended for a Bachelor of Arts degree posthumously. Joe had hoped to graduate at the end of Autumn Quarter, but his failing health required that he enroll one more quarter. Joe’s long battle with Cystic Fibrosis resulted in his receiving a very unique double lung transplant at Cleveland Clinic in 1991. He was able to resume his education in 1992. Regrettably, he passed away this past month. An audit of his record, however, indicated that he had already completed the necessary course work for his degree. I know that his family in Newark and his widow, Stephanie, are very pleased that his courageous effort will result in Joe’s being granted that thing he valued the most -- an Ohio State degree.

As we prepare to hear from students today in the open forum, it is important to note the individual efforts of each of these women and men, in the classroom and beyond, that inspire our efforts and enhance what we call The Ohio State University.

--0--

STUDENT AFFAIRS COMMITTEE MEETING

STUDENT OPEN FORUM

Ms. Cusack:

Good morning. As Chair of the Student Affairs Committee, I would like to welcome all of you to our second student forum. Although Hiawatha Francisco and I, as your Student Trustees, do try to represent your concerns as accurately as we possibly can, we are not 60,000 people rolled in to one. This is an opportunity for you to bring your concerns directly to the Board. It is also an opportunity for the Board members to hear, directly from you, what you are thinking and why.

This forum is intended to be an exchange of ideas. Due to time constraints, it is not a question/answer session. We would like the Board to have an opportunity to hear as many ideas and thoughts as possible. To this end, please limit your discussion to one topic per person. To further expedite the forum, we have asked students to sign up prior to being seated. I will go directly through the list and call your name. When your name is called, please come to the microphone and state your name, hometown, major, and year in school. As this is a student forum, only current OSU students are asked to speak.

Thank you, again, for coming. We will call first upon Mary Wagner.
Ms. Mary Wagner:

Good morning. My hometown is Columbus and I am a Ph.D. candidate in the English Department. I am unfamiliar with this, so I am a little nervous. I have been the parent of children in the Child Care Center for five and a half years. That is my concern today.

I live far from the campus and so I am very familiar with the average citizen of the State of Ohio thinking that our budget is a little bit of meat and a lot of fat. The people who live around me also know that my children get very good care at the Child Care Center. I am most concerned that we be aware, as we get prepared to cut money and possibly cut the subsidy to the Child Care Center, that what the children at that Center receive is what we know to be the care the children need -- that most children do not get the care that children need. I cannot speak for how much it costs to administer the program, but I know that in the classroom we have what the people at Ohio State who study those things have determined to be the care the children need. They do not get egg in their beer!

I suppose it has been bandied about that we ought not be in the child care business. I don't know why we have not appointed a Director of Dependent Services if we have not seen it as a growing concern and necessity. I want you to consider that so few children get what children need. And if you only want to give what children need to the children of faculty, go ahead and do what has been proposed that you should do.

I am a single, working mother and my children have gotten what children need. I know that in percentages I should kiss the ground -- and I do -- that they have been afforded this opportunity. I would ask you not to take it away from others. My kids are almost done now. You have to decide whether you want to be in the business of providing child care and what it does. I have neighbors who work in child care who have gotten training there, I have met hundreds of students over the years who have worked there and who have learned about child care. It fulfills a function, and it is excellent, but it is not beyond what children need. Thank you very much.

Ms. Cusack:

Thank you, Mary. The next person is Michael Scarce.

Mr. Michael Scarce:

My hometown is New Paris, Ohio, and I am a fifth-year undergraduate senior majoring in Women's Studies. What I would like to talk to all of you about today is the topic of HIV and AIDS on our campus.

National, medical, and health organizations estimate that anywhere between 1 and 500 to 1 and 50 American college students are HIV infected. Ohio ranks 13th in the nation for the number of AIDS cases, so we do have a sizable population of HIV-positive faculty, staff, and students on our campus. While there is more HIV education here on our campus -- more than ever before, especially in the UVC
Mr. Scarce: (contd)

classes thanks to our AIDS Education and Outreach Program -- it is primarily targeted at prevention, teaching safer sex methods and talking about IV drug use.

While this is good and we certainly need this, there also needs to be a lot more done to improve the AIDSphobic and homophobic climate on our campus. That is what affects the people that are already HIV-positive. For the faculty, staff, and students out there who are HIV-negative, we want to keep them that way. But what are we doing for the people who are already HIV-positive?

I just have a couple of suggestions that I would like to throw out real fast. I strongly believe that the AIDS Education and Outreach Program here at OSU needs a full-time director or manager, rather than leaving the task of educating 60,000 people to two graduate assistants. I would suggest that we increase funding for free condoms and dental dams provided to everyone, as well as funding for educational resources and materials. Another really important thing is that we make free and anonymous testing available to all faculty, staff, and students, with quality pre-test and post-test psychological counseling.

As I stated before, please improve the AIDSphobic climate for HIV-positive faculty, staff, and students on our campus. These people are living in terror. They are isolated, they are alone, and they do not know where to go for help or where to turn.

So in closing, I would like to leave you with an Ethiopian proverb which says, "He who conceals his disease cannot expect to be cured." Thank you.

Ms. Cusack:

Thanks a lot, Mike. Next, we have Chris Norman.

Mr. Chris Norman:

My name is Chris Norman, I am from Norwalk, Ohio, and am a junior majoring in agriculture communications. My concern here today is the College of Agriculture and School of Natural Resources' name change.

Currently the College of Agriculture and School of Natural Resources is planning on changing the name of the College to something with a variation of the College of Food, Agricultural, and Environmental Sciences and the School of Natural Resources. I feel the main reason for the change is that the general public does not comprehend the magnitude that agriculture involves. It is just not slopping the hogs and square dances every Saturday night like most people think.

I am against the name change because the current name holds a high amount of tradition and respect world-wide. If the name is changed, I feel that the College and University as a whole would greatly suffer. With the change there is a plan on marketing the new name throughout the state, promoting all aspects of agriculture to try to break the stereotype. I ask to keep the honored name of the College of
Mr. Norman: (contd)

Agriculture and School of Natural Resources, but to go ahead and market the programs more effectively, breaking the stereotypes like we should have done all along. And just as a reminder, agriculture is Ohio's number one industry. Thank you.

Ms. Cusack:

Thank you. Next we have Marc Conte.

Mr. Marc Conte:

Good morning. My name is Marc Conte and I am a fifth-year senior majoring in communications, from Seven Hills, Ohio. For the past three years, I have been working on gay, lesbian, and bisexual issues, most recently as the co-president of the Bisexual, Gay, and Lesbian Alliance.

At the student forum last year, I spoke about the ongoing discrimination of campus ROTC programs based on sexual orientation -- a clear violation of Ohio State's nondiscrimination policy. Ending the military ban on gay, lesbian, and bisexual citizens has been a priority of President Clinton as he took office. This is in no small part due to the work of the Undergraduate Student Government, the University Senate, and President Gee to articulate the University's displeasure with the policy. I am hopeful that this will soon cease to be an issue.

At the same meeting last year, the Board approved the concept of spousal equivalency for faculty and staff. I am asking today that the Board continue that effort, follow the lead of Stanford, University of Chicago, and Illinois, and grant full spousal equivalency benefits for faculty, staff, and -- the group that was left out last year -- students. The most important areas for students are health insurance coverage for domestic partners and access to Buckeye Village and other married student housing facilities. In addition, live-in staff of Residence and Dining Halls need to be able to live with their domestic partners.

Recently, President Gee and other administrators have been speaking about the general climate on campus. I fully support his efforts to improve the climate for all people and encourage him to take steps to directly face the climate issues of disempowered groups.

Widespread education needs to be the cornerstone of any effort to reduce these acts of hatred. To that end, I strongly encourage that UVC courses be redesigned to include substantive presentations and discussions that cover all disempowered groups.

The OSU Office of Gay, Lesbian, and Bisexual Student Services has also provided education to the campus especially through an Awareness Week and the Speakers Bureau. However, this office can not go it alone, especially on the minuscule programming budget that it has. As an active member of the planning committee for the Awareness Week for the past two years, I can say that many other offices on
STUDENT AFFAIRS COMMITTEE MEETING (contd)

STUDENT OPEN FORUM (contd)

Mr. Conte: (contd)

campus have not been doing their fair share when it comes to serving gay, lesbian, and bisexual students. Furthermore, these offices have been uncooperative when members of the gay, lesbian, and bisexual community have reached out to do joint programs.

For example, of the nearly 80 events planned for United Black World Month, only one of these programs directly deals with gay, lesbian, and bisexual African-Americans. Moreover, the Wexner Center did a majority of the work in setting up the program. I honestly believe that the only reason this event appears on the calendar at all is that it occurs during Gay, Lesbian, and Bisexual Awareness Week.

This situation, which is repeated on a regular basis, illustrates how students on this campus are marginalized and made to prioritize different parts of their lives. It is especially appalling that this is going on in the Office of Student Life.

Ohio State has taken the right step in creating all of these offices. Unfortunately, their own biases and ignorance gets in the way of serving all of the students that the office was set up to serve. The University must now take steps to formalize communication between these offices and make a clear directive that they must work together so that no student is left out, no student is marginalized, and no student is made to feel unwelcome.

Staff and administrators on this campus, from people in Student Life to Academic Advising, need to wake up and realize that gay, lesbian, and bisexual students make up the largest oppressed minority on this campus besides women. Thank you for your time.

Ms. Cusack:

Thank you. Frank Chloupek --

Mr. Frank Chloupek:

My name is Frank Chloupek, I am a third-year graduate student in the Department of Physics, and I am from South Holland, Illinois. The issue I would like to speak about today is the issue of differential fees.

Recently the Board passed a differential computing fee for the College of Engineering. When it passed that fee there were assurances that this was a special case, this was Engineering, this was computing, and that the University did not want to make this a habit of raising fees. Recently we have been hearing that the College of Business is on the fast-track in getting a computer fee approved for their College.

All I want to say is should all students now start to lay aside ten percent of what they are paying for tuition now in preparation for their college having a fee for a computing fee? If this is going to be the case that we are having fees for computing, why don't we just open the door for everything. We should allow each
February 4, 1993 meeting, Board of Trustees

STUDENT AFFAIRS COMMITTEE MEETING (contd)

STUDENT OPEN FORUM (contd)

Mr. Chloupek: (contd)

college to lay out their budget and have the fees approved that way, instead of saying now we have our budget for everything we consider important, but we are going to try to get this little extra here. Thank you very much.

Ms. Cusack:

Thank you. Wes Byers --

Mr. Wes Byers:

Hello. My name is Wes Byers, I am a junior in System Resource Management, and I would like to speak today about community service and volunteerism here at OSU.

I am the student director of OSU’s Project Community, a new program here at Ohio State that strives to enhance the educational experience of all OSU students by providing community service opportunities, plus creating programs that would meet community needs. We are in our first year and I would like to ask all of the Board members to think about how each and every one of you can help us to grow and to hopefully become the community service center in the state. We have many students who are enthusiastic and dedicated to the effort of community service and volunteerism, but what we really need is the support of the University. I have been working closely with a representative from the President’s Office to organize certain events, but I would like to see every member of the Board support and lobby to get more funding, more publicity, and more credibility for our program.

I passed out our first newsletter which was put together by a student and also a flyer about a speaker we are having on Monday to speak about homelessness. One of the things that we would like to do is raise awareness on different social issues by providing speakers or creating programs that would raise awareness and involve students in the community. Basically, I would just like to ask each Board member to see what you can do to help us to become a solid community service program and to help us to develop and grow over the years. Thanks again.

Ms. Cusack:

Thanks very much. Next is Ellen Bouton.

Ms. Ellen Bouton:

Good morning. My name is Ellen Bouton, I am a senior and I will be graduating in 127 days in Agriculture Communications and Agriculture Economics from Mt. Vernon. I am not really representing any student organization today, because I just want to represent the working students that do not receive financial aid. Because I live on a farm, I don’t qualify for any work study or any financial aid. I did receive one scholarship my freshman year based on academics. Since then, my father passed away, so we do not have any actual income -- just from what we get from the farm. I have a younger brother that is saving for college, and I have been working 30 hours a week these last two weeks -- and I actually just cleaned up your breakfast dishes.
Ms. Bouton: (contd)

By not qualifying for work-study, it is difficult to find a job on campus. I have been lucky, I have worked in Residence and Dining Halls, I worked for the Libraries one quarter, I work for Visitor Information now, and I also work for the Unions. And these are about the only places that you can find nonwork-study jobs. Because of budget cuts, all you can find are work-study jobs. For some of us that don't have vehicles to get to other places in Columbus, there is not a whole lot left on campus for us.

That is the only thing that I wanted to bring up to you -- financial aid and work-study, and making it more accessible for more students. Some students do get through the cracks and receive financial aid when maybe they're not really deserving of it. There are others out there that for different reasons -- I know now for agriculture occupations you now will be receiving special financial aid. It comes a little too late for me, but I am glad and happy it is out there for everybody else. Thank you.

Ms. Cusack:

Thank you, Ellen. Next is Shirley Brooks-Jones.

Ms. Brooks-Jones:

Hi, my name is Shirley Brooks-Jones and I am a senior majoring in English. As President Gee said last fall, "I am a senior in more ways than one." I am here representing the non-traditional, undergraduate student. My hometown -- actually, I don't have a hometown, I am from Southeast, Ohio, Vinton County, the coal mining, strip mining, forestry area. I am very proud of that area of the State.

What I would like to talk to you about today is volunteerism. Students are very, very busy and I am sure that if students were not in classes, we would have more students here meeting with the Board. But I decided that I should come and talk with the Board, this is the first opportunity that I have had to do this. What I have to say ties right in with what Wes Byers said earlier about community service. I spent almost 35 years working at Ohio State. I retired and now I am an undergraduate student. I have been involved in a lot of volunteer activities. When I retired I was going to school full-time, that was my goal. I was going to graduate very quickly. Well, here it is five years later and I still haven't graduated because there are all of these wonderful volunteer efforts to be involved with.

I am involved in a number of undergraduate student organizations, Ohio Stater's Incorporated is my primary organization. We do a lot of great things on this campus. The other activity that I spend a great deal of time with is serving as co-chair of the Campus Campaign Council. Now I think most of the Board members know what the Campus Campaign Council is. For those folks who do not know, it is the fund raising effort of the faculty and staff. I am now in my fifth and final year of serving as co-chair of the Council and we have raised some $20 million from the faculty and staff on this campus. I think that is incredible. The faculty and staff believe in students and they believe in the programs of this University. The theme of the Campus Campaign from the very beginning has been "I Believe in Ohio
Ms. Brooks-Jones: (contd)

State. And, indeed, all of us do believe in Ohio State. That is why we are here and that is why I am making an effort to still continue with all of my volunteer efforts.

I am not on the four-year plan, I am not on the five-year plan, or even the 10-year plan for getting my undergraduate degree. I do now know that I will graduate in June 1994. That will be forty years since I graduated from high school, so I am on the 40-year plan.

I want to close by inviting the members of the Board and anyone else who would like to attend the kick-off for this year’s Campus Campaign. It will be at 3:30 p.m. in the Fawcett Center on February 25. Dr. Gee and Vice President May will be with us and we are just delighted. We are going to raise some more millions of dollars for Ohio State and its students. Thank you very much.

Ms. Cusack:

Thank you. Next, I would like to call on Art Molloy.

Mr. Art Molloy:

Good morning -- I trust that it is still morning. My name is Art Molloy, I am from Raleigh, North Carolina, and a second-year graduate student. Why did I tell you that I’m from North Carolina? That is the state that gives us Senator Jessie Helms. And the reason why I am sitting before you today is because I would like to address an issue at Ohio State that is very, very reminiscent of North Carolina.

I left North Carolina because I considered it to be a state that was opposed to progress. We know that Jessie Helms is sexist, racist, and also homophobic. We know that many of our faculty members, our staff members, and some of our students at this institution are racist, sexist, and homophobic, but we seem to feel like there is some reason why we cannot give mandatory training to faculty, staff, and students.

I do believe that it very, very important, as we move into the year 2000, to stress that we will become more and more diverse and the majority as we know it today will become the minority. So if we do not move proactively to train ourselves and the students about the issues of diversity so that we will not be sexist, we will not be racist, and we will not be homophobic, then I think Ohio State is going to be behind many of the other institutions in the United States. Thank you.

Ms. Cusack:

Thank you. Next we have Michelle McKarn.
Ms. Michelle McKarn:

The reason that I am dressed this way and didn't really prepare anything is because someone just told me that this was going on. I came really to support A.C.T.I.O.N., but I did have some questions and concerns. Hi, Dr. Gee, it seems we are meeting again.

My concern is with A.C.T.I.O.N. I have been here three years and during my freshman year nothing really Black ever went on. I didn't even know that there was a Black Cultural Center when I first came here. I mistook it for the Commons, because it said, "Bradford Commons." It took a militant organization to even get a sign erected so Black students would know where to go.

We've made demands for a flagpole. I want to know why everyone else can have a flagpole, but the Black Cultural Center doesn't even have a flagpole so that we can hang our national flag? I just want to know why it seems so long that we keep getting promised everything, but in order to get everything we have to have another committee, and another committee, and another committee.

When do the committees stop and the action begin? When are we going to get some concrete results? I have been sitting here listening and everyone is coming here saying, "Well, we need this," and "We have been promised this, and we are doing this, and we are doing this." Well, I have yet to see anything, and I know that I am personally tired of waiting. The reason why things erupted in Los Angeles is because everyone was tired of waiting. You know I would hate to see that happen here on this campus, but it can and it will! You know if you continue to put students on hold, and things that are important to them on hold, something is going to happen. We have warned you, we've asked you. You know A.C.T.I.O.N. wants to know when there is going to be some action. And that is just all that I came to say.

Ms. Cusack:

Thank you for your comments. That concludes our student forum. Thank you, everyone, for coming and I hope that we can continue this. I think that it has provided valuable information for all of us and that concludes my report for Student Affairs.

--0--

REPORT FROM A.C.T.I.O.N.

Mr. Barone:

At this time, I would like to call on Aya Fubara from A.C.T.I.O.N. who will address the Board. You will have ten minutes.

Ms. Aya Fubara:

Good morning. I am just going to be reading a memorandum and when I am done we are going to have copies circulated to the members of the Board of Trustees. (See Appendix XVIII for memorandum, page 513.)
REPORT FROM A.C.T.I.O.N. (contd)

Ms. Fubara: (contd)

On July 10, 1992, members of A.C.T.I.O.N., an ever expanding group of African faculty, staff and students at The Ohio State University and members of the African-American community, addressed you on the progress being made by this university in response to issues raised by OSU's African constituency. OSU President E. Gordon Gee stated in his response of May 13 to A.C.T.I.O.N., "our actions have not always matched our commitment." A.C.T.I.O.N. believes that once again, history is repeating itself.

In his response of May 26, 1992 to A.C.T.I.O.N., President Gee appointed a Presidential Group "to facilitate the next steps in achieving these specific goals." More recently, President Gee has since shifted the responsibility to solve the issues we have raised from the Presidential Group to a President's Advisory Committee on Diversity. We are well aware of the complexities of some of the issues we have raised, but we are also aware of the "zero-sum mentality" that exists amongst protected groups as well as the historical tactic of pitting different protected groups against each other.

We are confident that you will understand our dismay and reluctance at the formation of yet another university committee charged with advising the president on solutions to our issues in light of the numerous committee reports that have already been generated such as the very extensive report of the Committee on Women and Minorities. This committee report amongst many others is replete with recommendations on institutional direction, policies and priorities for achieving equity and diversity on this campus. It is critical that we take charge of our own destiny and stop waiting for some unknown mythical committee to come along and wipe racism from this campus.

As you are also well aware from the numerous committee reports that have already been generated, the conditions on this campus for "minority" groups and specifically the African-American constituency are very dismal.

The Ohio State University can boast of only one African-American Dean and one African-American Chairperson. Dean Mac Stewart heads University College, a college with no faculty of its own, while Dr. Ted McDaniel heads the Black Studies Department. Four colleges on the Columbus campus have NO BLACK faculty members. Eighty-four of 138 departments have NO BLACK faculty, one of the two African vice presidents just turned in his resignation, perhaps an indication of OSU's ability to both recruit and retain African-Americans especially in decision making positions. As of October 1991 African-Americans comprised 50.7 percent of all Service/Maintenance-07 classification staff even though we only constitute 12-13 percent of the population in the state of Ohio.

Retention figures for African students regardless of the slight increases in the number of recruits remains between 20-30 percent as compared to 50-60 percent for the rest of the university. African faculty account for only 104 of over 3,000 faculty members down from 109 as of 1991, and the list goes on. In addition to the problems we have enumerated, we are asking for a full scale investigation into Ohio State University's business practices with "minority" vendors.
REPORT FROM A.C.T.I.O.N. (contd)

Ms. Fubara: (contd)

Henceforth, A.C.T.I.O.N. will deal primarily with the Chairperson and members of the OSU Board of Trustees recognizing you as the creators of ideas. For it is the creators of ideas who run the world, everyone else tap dances.

Our voice is not a single voice, but a communal voice, a voice of matrices, not a single matrix of solely A.C.T.I.O.N., but a matrix where the coefficients are A.C.T.I.O.N., the Coalition of Concerned Black Citizens, the president of the NAACP Columbus Chapter, African-American churches, the African-American legislators, and the African-American community at large.

Where is the power? Not on the outside, but within. You be the thinkers that think the thoughts. If you don't like them, then change your thoughts make it what you want it to be. If you don't define this university and the direction it is going for yourself, you will be crunched into your tap dancers’ fantasies and thus be eaten alive. In the words of our ancestors, "because every shut eye ain't sleep and every goodbye ain't gone!"

In good faith, A.C.T.I.O.N. temporarily postponed sending out letters to the blue chip African-American athletes. We are hoping that your timely response to our concerns will make it totally unnecessary for us to ever have to send these letters out. We do not wish to convey that we are posturing or threatening anyone or anything. We fully realize that we are all in this environment together and that we can only make it work together.

Thank you for your time, continued patience and support as we work to empower each other. May the ancestors guide your thoughts and hearts.

Any questions?

President Gee:

We have prepared yet another interim report on the progress that we have made on the various issues and the non-progress which we will be distributing both to the Board and to the community. Again, I would ask you to look very carefully at those. And as you know, we are prepared to continue to meet and discuss these issues.

As to the committee issue, I would just point out to you that this is not a committee, this is a committee designed to make certain that the recommendations that have now been brought forward from the various committees and commissions will be implemented. It is an implementation committee. And if there is some misunderstanding about that, let me clarify that today. This is not another committee to study anything. The purpose of that committee is simply to say that we have adopted a set of recommendations, and to make certain that they are being adopted, and to monitor those adoptions.

Ms. Fubara:

Well, we have read very carefully the fine print of what the charge for that committee is and we were unable to find anything that talked about their implementation of powers or ability to monitor anything on this campus.
REPORT FROM A.C.T.I.O.N. (contd)

President Gee:

Well let me just make this very clear -- you've heard it from me. I am the one who wrote the recommendations, I am the one who wrote the charge, and it is precisely what they are charged to do. And if it was not clear, then you have heard it today, period.

Ms. Fubara:

Okay. The main concern is the fact that -- and there is precedent for this, even if we look back to the A.C.T.I.O.N. plans that were created while President Jennings was here -- and what historically happens is presidents come and they create their own committees or groups or whatever, they have plans in place, and then the presidents move on. The next president comes, those plans are shifted to somewhere in the library to collect dust, and then a new committee starts. A.C.T.I.O.N. at this point is dealing with the same issues that my parents dealt with when they were students on this campus in the '60s. So we just want to make sure that this does not happen again.

President Gee:

Again, let me just emphasize that that is precisely my own view. You and I have been in dialogue about this issue, that I don't want to create yet another set of committees to take a look at issues, rather we have a set of recommendations and we intend on implementing them. We are in the process of bringing forth the final implementation strategies on our equity committees, on our Commission on Women, on our various A.C.T.I.O.N. plans, and we're not saying that we are going to stay those any more. That is precisely what this committee is about. Each of those various committees and commissions have always come forward with a recommendation that is somewhat the same, but it always says that we need to have someone who will monitor to make certain this happens. The issue of empowerment, as you have stated it, is precisely right. Someone, somewhere needs to make certain that the recommendations that we have do not go back to the library, but go into the reality of the fabric of the institution. And that is precisely the charge. Therefore, if David Williams is here, I am certain that he would tell you that he does not feel that his charge is one to create yet another committee, but rather it is clearly to make certain that what we are doing and what we have committed to do is being done. David can speak for himself, but if that is not clear, then it is certainly clear today, because I am on record about that.

Ms. Fubara:

Well, we are awaiting results.

President Gee:

I might say that I think that when you review the issues and the report that we have -- as you know, I have continued to put forth a series of interim reports -- I think that both the Board and you will see that there have been a number of things that have resulted from the discussions that we had which are positive. Some of the issues that you raised today are absolutely on target, we continue to not do well on our recruiting in certain areas, we intend --
February 4, 1993 meeting, Board of Trustees

REPORT FROM A.C.T.I.O.N. (contd)

Ms. Fubara:

And in the meantime, we continue to lose students.

President Gee:

Well, let me point out that our student population is up and --

Ms. Fubara:

And we acknowledge that.

President Gee:

And I'm pleased that you did acknowledge that, because we have made substantial strides --

Ms. Fubara:

But the retention figures are still horrible.

President Gee:

The retention figures are not good. The retention figures are getting better though, and that is all part of the issue right now. So, I thank you for that.

Ms. Fubara:

Thank you.

--0--

RESTRUCTURING AND REALIGNMENT IN THE OFFICE OF HUMAN RESOURCES

Mr. Barone:

At this time, I would like to call on Vice President Linda Tom who will discuss Human Resources.

Ms. Linda Tom:

I want to thank the Board for allowing this time for me to talk about the new Human Resources organization. I will have some help here this morning -- Joe Partridge, who is one of our able student employees will be assisting. I will address the following issues: 1) What is Human Resources?; 2) I will talk about our customers and our services; 3) I will talk about our new organization and mission; and 4) share with you our priorities for the coming year.

What is Human Resources? Human Resources is a people business. To give you a sense of the magnitude, the combined cost of payroll and benefits at the
Ms. Tom: (contd)

University comprise the single, largest budgetary item. Our payroll approximates $630 million and our benefits costs are about $141 million. Combined that is in excess of $775 million or about two-thirds of the University's total $1.3 billion budget. The people who are our primary customers are the faculty, administrators, staff, and students who work at the University. While I recognize the word, "customer" is not familiar in a university, I use it to refer to anyone who receives services from us.

What does the OSU work force or this customer face look like? We are the third largest employer in Columbus, with approximately 16,500 full-time employees. This puts us just behind the federal and state governments. Fifty-five percent of the work force are women; one out of five is a minority. We have jobs which virtually cross all occupational categories. As can be indicated on this chart, these positions range from service/technical positions to faculty, professional, and senior administrators. There are positions in over 2,000 job titles. I just want to point out in terms of the highest level, and you may not be able to see it that clearly, the highest percentage of our employees are in the professional ranks, but about 35-40 percent of those are in the University Hospitals.

One of the major strategic imperatives singled-out by President Gee this year for the University was resource management. When the University's payroll and benefits constitute about two-thirds of its total budget, the need to effectively manage our people is critical.

When we ask people what Human Resources does, most will tell you, "They pay us," "They process our benefits claims," "They hire people," "They are the child care people." All of this is true and I want to share some selective statistics with you just to indicate how substantial these operational activities are -- these are annual numbers. In any given year we process about 600,000 paychecks; we issue about 47,000 W-2's, so every time a position or an appointment changes there needs to be a record of that; we process about 47,000 personnel actions; the number of lives that are insured in terms of our benefits programs approximates 34,000; we process about 30,000 applications for positions a year; and we hire about 2,500 non-faculty positions annually. Grievances and hearings -- we have about 315 of those a year, which we process and we hear. And we serve about 400 children in our Child Care Center.

These operational services are very important, but they represent only some of what we do. We do much more. The totality of Human Resources impacts the full life cycle of people in the institution and this is illustrated in what we call, "Our Integrated Model of Human Resources." This overhead shows a model that we developed to guide us in linking or integrating our services so that we could most effectively serve our customers and our services fall into four general categories.

Starting at the top, an important function is the recruitment and hiring of the best people to the University. We do this through the employment and affirmative action functions.
February 4, 1993 meeting, Board of Trustees

RESTRUCTURING AND REALIGNMENT IN THE
OFFICE OF HUMAN RESOURCES (contd)

Ms. Tom: (contd)

Once people are here we have to ensure that they have the appropriate support. Therefore, we need to provide benefits, make sure that compensation is appropriate, actually process the pay in terms of the payroll, and provide necessary information.

The third circle is a very important one and this has to do with the creation of a quality of work life environment. The environment directly affects morale and productivity. We have procedures and resources to ensure that people or employee relation problems are resolved appropriately. We provide programs to enhance the climate for all people, we also provide work and family services to enable working families and parents to fully participate within the institution.

The fourth category is training and development. Training and development of all our employees will not only enhance the climate, but also the effectiveness of all that we do.

Our ability to carry out these functions in an integrated fashion reduces redundancies, eliminates overlap, and allows for provision of services in the most cost-effective manner. This will result in long-term improvements in productivity, morale, and quality of work life for all within the community.

Mr. Shumate:

How long has this model been in place?

Ms. Tom:

It has been in place for the last six months, since we have reorganized. Next, I will talk about our reorganization and show you how we have reorganized to effectively address the human resources needs of the University. We consolidated two separate departments into one stream-lined human resources organization. Basically, we used to have two separate departments: 1) Human Relations; and 2) Human Resources. Now we have one stream-lined department and we essentially have three functional areas: 1) Human Resources Services, which is our day-to-day activities – hiring, benefits, classification, and payroll; 2) Employee Relations and Affirmative Action, this is where we deal with labor relations and negotiations of contracts, problem resolutions, and the important area of affirmative action; and 3) Training and Development.

We have combined related functions to maximize synergies and efficiencies. As an example, we previously had two training groups, now we have one. Previously we had three units that were handling grievances and complaints, now we have one. We have reallocated resources to priority areas, we have eliminated redundancies, we now have fewer total positions as a result of this consolidation. The number of staff in our Human Resources Department is very lean when we compare this with other universities and with private industry.
RESTRUCTURING AND REALIGNMENT IN THE
OFFICE OF HUMAN RESOURCES (contd)

Ms. Tom: (contd)

As you can see on this chart the tallest column there is Ohio State University. What that shows is that one human resources staff serves approximately 267 employees. The average corporation has one human resources staff that serves 175, and the average university, which came from a recent survey, shows that there is one human resource staff to serve 142 employees. From this you can see that our average Human Resources staff serves twice as many employees as other universities.

As part of this reorganization, we have been in the process of a significant culture change, and this has been facilitated through creation of a shared vision within our department. This is reflected in our new Mission and Value Statement, and I would like to share this with you today. This is a Mission and Value Statement which has been created from many, many hours of discussions within our own department. Basically, very simply stated our mission here is to provide the best quality human resources services to help faculty, administrators, and staff accomplish the University's teaching, research, and service objectives. Our responsibilities as I indicated before include recruiting and hiring the best people, providing the highest quality compensation and benefits programs, developing employees through education and training, enhancing the climate and quality of work life, and creating and valuing diversity.

As we developed our mission we felt it important to also talk about our values, because that will guide how we not only interact with our customers, but how we perform our work. And we have a set of values that describe how we value our internal and external customers. A couple of these are: we value respect of the individual, we are involved with open and honest communication, and we try to have fair and equitable treatment in all of our dealings. Some of our operational values which guide our practices are: we are committed to quality in all that we do, we seek to improve efficiency and productivity, and we also value teamwork. We carry out our mission by understanding and anticipating customer needs, and we are always striving to develop customer-friendly procedures and to continually improve our services.

This is really to give you a flavor of the discussions that we have been having in our department. As you may have noticed on the front page of that, there was the word "draft" stamped on this. That is because we are now just getting to the final stages of having full conversations within our whole department to ensure that we are going to have effective buy-in and agreement on these values.

Let me turn now to our top five priorities for the coming year. The five priorities are: 1) to improve basic services; 2) to improve affirmative action and diversity; 3) to improve the quality of work life; 4) management, development and staff training; and 5) to implement total quality management. I will talk just briefly about each of these.

We will continue to improve our basic services. These basic services keep the University running. For example, we are talking about paying people, providing them with benefits, processing their claims, hiring people, etc. If these services are
February 4, 1993 meeting, Board of Trustees

RESTRUCTURING AND REALIGNMENT IN THE OFFICE OF HUMAN RESOURCES (contd)

Ms. Tom: (contd)

effectively delivered, faculty, administrators, and staff can spend their time performing their jobs as opposed to being involved in unnecessary bureaucratic activity. In trying to improve these basic services, our efforts are focused on reducing bureaucracy, making our services more user-friendly, automating processes wherever possible, and improving our data systems.

One notable accomplishment in this area is that we have been able to reduce the turn-around time on job classification requests. Employees have the right to ask that their jobs be audited, or when jobs are changed we review them to determine what the appropriate pay range and pay is. In the past it took anywhere from two to eight months to have such a review accomplished. We have now reduced this to an average of four weeks and I think that is a significant improvement.

The second area is improving affirmative action and diversity. We have initiated a process to develop and update affirmative action plans for all departments. We expect these plans to be in place by Fall Quarter 1993.

The third area is improving the quality of work life. How people are treated and supported directly affects morale, motivation, and productivity. People who are treated with dignity and respect, not only feel better but will be more productive employees. Efforts to enhance the quality of work life include: training managers and supervisors so that they can effectively motivate employees and deal with problems as they arise; providing resources for the earliest resolution of employee relations problems; and creating fair and equitable policies and communicating these openly.

Some of the achievements to date include the creation of a new sexual harassment policy. This was completed this quarter and we will be broadly communicating the policy to all of the community very shortly. Sexual harassment workshops for vice presidents, deans, and chairs were conducted in December and January, and we will have more of these programs for other managers and staff throughout the campus. We have also provided help to UNITS to resolve problems at the earliest stages through providing services of trained human resource generalists and dispute resolution advisors.

Management and training is the fourth, but it is a very important priority for us. We have created teams that are developing programs in three priority areas and these include: management and supervisory education; diversity training; and support staff training.

The last item is the implementation of total quality management. While this is last on the list, it certainly does not mean that it is the least important. As a matter of fact, I think that this may be one of the more important areas which we will be initiating. Total quality is merely a philosophy which we feel will help us to be more efficient and productive. Human Resources is working collaboratively with the Offices of Finance and Business and Administration to implement total quality management in all of our departments. These are just five of our priorities. We have many more activities underway, but I thought I would just share the top of these with you today.
February 4, 1993 meeting, Board of Trustees

RESTRUCTURING AND REALIGNMENT IN THE
OFFICE OF HUMAN RESOURCES (contd)

Ms. Tom: (contd)

In closing, let me just make a few personal observations. As I complete my first year at Ohio State University, I feel very good about the significant progress that we've made. We have a new organization and a mission and we have clarity on our priorities. Obviously there is much, much more to do. This coming year will be a challenging time, but we feel confident that we are moving in the right direction. We are excited and committed to meeting the challenges. And let me take this opportunity to publicly acknowledge the dedicated staff in Human Resources for their good work. It has also been a real pleasure for me to have worked with President Gee, who has been most supportive, and the members of the Board, Provost Huber, and all of the other vice presidents. I look forward to many more years of not only challenges, but very enjoyable work at the University. With that I will close and thank you for your time. I will be happy to take any questions.

President Gee:

Linda, thank you very much. That was very well done indeed and we appreciate it.

--0--

RESEARCH FOUNDATION REPORT

Mr. Celeste:

As a prologue to my formal report, I would like to call your attention to the copy of the newspaper article that was passed around to your places. This was an article that appeared in a Columbus newspaper, so Amb. Wolf and Mr. Barone may not have had a chance to see this. This is an article about one of the reports that I made several months ago, where Michael Breslin, a student, and Hamish Fraser, an Eminent Scholar, were involved in a project, "The True Definition of Serendipity." It is going to lead to what I think are going to be some exciting implications for development and jobs in the future. It is the kind of thing that research can be all about.

I would like to report on the Grants and Contracts for the months of November and December received by The Ohio State University Research Foundation. At Tab 1 we see that the awards for the period July through November are up about the same as reported at the last meeting, 3.56 percent. However, awards for the period July through December are down 3.26 percent. To give you an appreciation of the fluctuation in awards each month, the last page under Tab 1 is a graph of the award variations by month for the last five fiscal years. Please note that in December of fiscal year 1992 there was a significant increase over prior years. This increase is due to one $8 million award that was recorded last December.

At Tab 2 you will find expenditure summaries for the months of November and December. As expected, expenditures continue to track the increase in awards last year and show a modest increase of 6.1 percent.
Some projects of special interest that were funded in the months of November and December are listed at Tab 3. Professor Lin from Veterinary Medicine along with his multidisciplinary team from Medicine, Pharmacy, and Veterinary Medicine have received $160,000 from the National Institutes of Health to study one of the most important diseases in men of advancing age, human benign prostatic hyperplasia. Their research approach involves both a canine model and human clinical studies to generate the science base needed to develop novel therapeutic approaches for patients with this disease.

Professor Bhushan, an Eminent Scholar in the Department of Mechanical Engineering, has received $100,000 from the Navy to develop a fundamental understanding of the friction and wear mechanisms of ceramic materials and multilayered thin films using atomic scale microscopy. These studies could result in new material combinations and finishing processes with ultra-low friction.

At Tab 4 is the list of all projects funded in November and at Tab 5 is the list of all projects funded in December.

Attached to your report is the University's 1992 annual Research Report. In an effort to reduce costs and also provide our researchers with the information most important to their interests, this year's report has been divided into two parts. Part one is the listing of expenditures and awards by college and department. It is noteworthy that in fiscal year 1992 the University received more than $186 million in externally sponsored research grants and contracts.

Part two of the report, which contains the detailed listing of each project, is in press and will be available next month. However, the data is currently available electronically via connection to the University's MAGNUS system. As a result, one can dial-up this database from your office and browse through the data by department. This is a fact which I can verify, I had it demonstrated to me in my office this week.

Tab 6 includes press releases issued by University Communications highlighting recent research activity.
REPORT OF RESEARCH CONTRACTS AND GRANTS (contd)

BE IT RESOLVED, That the research agreement between The Ohio State University and The Ohio State University Research Foundation for the contracts and grants reported herein, and the acceptance of the reports from the Engineering Experiment Station during the months of November and December 1992 be approved.

Upon motion of Mr. Celeste, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

HOSPITALS BOARD COMMITTEE REPORT

Mr. Celeste:

I would like to say that I am pleased that Mr. Skestos has joined the Hospitals Board operation and I will be passing the report on to him for the next formal report.

The Strategic Planning Committee met on January 28. The meeting began with a summary of the November 19 retreat at which Board members reaffirmed our goal of becoming one of the nation's top ten academic medical centers by the year 2000, and reached consensus on the necessity for restructuring of the faculty and generating resources to increase our research capabilities. The Committee discussed possible future environmental forces and cooperative actions that can be taken by the Hospitals and the College of Medicine. Cathy Bruno presented a market and service analysis and Jerry Maier gave an overview of the Hospitals' Outreach Strategic Plan to maintain local and regional market share positions.
The Hospitals Board also met on January 28. We reviewed the results of our annual self-assessment and the actions that have been initiated to strengthen our performance. The major agenda item was an in-depth discussion of management's recommendations related to acquisition of umbrella liability coverage in addition to the Hospitals' existing Self-Indemnification Fund. The Hospitals Board voted to purchase an excess coverage policy and to initiate planning for the establishment of a risk-bearing captive insurance company. A recommended plan for the captive will be presented to the Hospitals Board no later than January 1994.

Mr. Schrock reported the Hospitals' net patient revenue through December was within $100,000 of budget, while expenses were approximately $3.5 million under budget. Length of stay continued to decline in December, although the case mix (which reflects intensity of resource utilization) increased. At a future meeting we will review what determines the case mix index and how that impacts on the Hospitals' revenues.

We received a brief summary from the Hospitals' director of Communications and Public Affairs, and Mr. Fraley presented a photograph and report on implementation of the second SkyMed consortium helicopter. This concludes my report.

--0--

INVESTMENTS COMMITTEE REPORT

Amb. Wolf:

I would like to report that the Investments Committee reviewed the Monthly Endowment Summary Report for the period December 18, 1992 through January 15, 1993. The market value of the Endowment Fund on January 15, 1993 was $444 million. This total was approximately $8.8 million above the December 18, 1992 market value and represents an all-time high in the history of this University. The market value of the equity portion of the Endowment Fund increased $8.4 million while the Fixed Income portion increased $1.1 million during this reporting period. Net new additions to the Endowment Fund for January totalled $2.5 million.

Since July 1, 1992, the Endowment Fund has increased over $42.1 million, including new additions of $11.3 million. The other increase was about a $31 million increase in market value. The current asset allocation for the Endowment Fund is 58 percent invested in equities, 26 percent in fixed income, 8 percent in real estate, and 8 percent in cash equivalents. I would like to call your attention to the fact that we are reviewing these percentages. In a month or two we will come up either concurring to keep these percentages as they are or to recommend that the percentages be changed because of the indices in the market, such as the price earnings ratios, and the price of both ratios and the dividend yield of the S&P 500.

The Investments Committee next heard the Quarterly Endowment Report for December 31, 1992. It was a good six-month period and, as page three indicates, the Endowment's Equity and Fixed Income Advisors have both outperformed their corresponding benchmarks of the S&P 500 for the equities and Lehman
February 4, 1993 meeting, Board of Trustees

Government/Corporate Index for the fixed income.
INVESTMENTS COMMITTEE REPORT (contd)

Amb. Wolf: (contd)

We also reviewed in great detail the asset allocation of the Endowment Fund. At this juncture we are about in line with most of the Endowment Funds of the Big Ten Universities; however, we are examining whether those ratios should be changed.

The Investments Committee also heard the quarterly report on Total Cash and Investments for the University. This is a control account for the entire institution, not only the Endowment Fund. It was reported that the total of cash and investments for all accounts as of December 31, 1992 was $873 million. This was an increase of $146 million since June 30, 1992. The primary reasons for this increase came from a $36 million increase in the University Endowment Fund and a $77 million net increase in the University's Debt Service and Debt Construction Funds due to the issuance of General Receipts Bonds last fall.

In addition, the Committee discussed various financing scenarios for the River Road Hotel Corporation, which as you know is the University Ramada Inn operation. Our Committee felt uneasy with the presentation we reviewed. We asked the Treasurer to search out and present a broader array of specific proposals for refinancing, together with the pros and cons of each of the specific proposals, and we will review those at our next meeting and report back to this Board.

Finally, I am proud to say that the Investments Committee watched a video tape of an ABC nationally broadcasted news segment on the student investment class. It brought great visibility to the University, of course, and to the creative concepts it instituted. I must say, Mr. Chairman, that at your initiation the Student Investment Program did come along.

I also wanted to say that we reviewed and received the Development Report from Mr. Jerry May. I am pleased to report that during the first six months of 1992, the University received $41.5 million in private gift support. This represents the largest amount of gifts ever received in a six-month period. The previous high was $29.4 million -- which is no small amount itself -- and that was during July-December 1990.

As you can see from the report, giving is up 43 percent over the comparable period last year. The 36 percent increase in individual giving includes two irrevocable trusts totaling $3 million, one current gift of $1.2 million, and an estate settlement of $1.1 million.

Corporate giving is up 94 percent largely due to a $9 million gift-in-kind of cartoon art to University Libraries. This gift-in-kind has received meaningful publicity in the news media. The decrease in support from private foundations can be attributed to three major gifts totaling nearly $1 million received last year not matched by comparable gifts thus far this year.

Giving in December also set a one-month record. For the month of December 1992, University Development received more than 25,000 individual gifts totaling $21.4 million. This erased the previous one-month high of $15.2 million received in December 1986.
February 4, 1993 meeting, Board of Trustees

INVESTMENTS COMMITTEE REPORT (contd)

Amb. Wolf: (contd)

Finally, it should be noted that of the $41.5 million in gift receipts, only $4.6 million or 11 percent of the total were payments made against previous campaign pledges that the University received. Therefore, nearly 90 percent of that $41.5 million were new dollars resulting from new gifts.

Finally, Mr. Chairman, I would like to say that we have a resolution for approval by this Board. I would like to call on Jerry May, Vice President for Development and President of The Ohio State University Foundation, to review the contents of this resolution.

Mr. Jerry May:

Thank you, Amb. Wolf. If you would turn to the tab marked "Development," you'll notice the details of what I would like to recommend. Mr. Chairman, as part of the resolution, I would like to recommend that the Board recognize three now fully endowed chairs: The John J. Gerlach Chair, The Ralph W. Kurtz Chair in Finance, and The H. P. Wolfe Chair in Accounting. I would also like to recommend the establishment of the Raymond E. Mason, Jr., Designated Professorship in Military History. We are also recommending to the Board the establishment of 17 new endowed funds totaling $1,611,941.07 in new restricted support to the University. And finally, I would like to recommend revisions to five already endowed funds.

Mr. Chairman, this resolution is presented in total for the approval of the Board.

REPORT ON UNIVERSITY DEVELOPMENT

Resolution No. 93-76

Synopsis: The report on the receipt of gifts and the summary for December 1992 are presented for Board acceptance.

WHEREAS monies are solicited and received on behalf of the University from alumni, industry, and various individuals in support of research, instructional activities, and service; and

WHEREAS such gifts are received through The Ohio State University Development Fund and The Ohio State University Foundation; and

WHEREAS the funding level has been reached to establish The John J. Gerlach Chair, The Ralph W. Kurtz Chair in Finance, and The H. P. Wolfe Chair in Accounting; and

WHEREAS funds have been received through the Development Fund to establish The Raymond E. Mason, Jr. Designated Professorship in Military History; and

WHEREAS this report includes the establishment of seventeen (17) new funds and amendments to five (5) existing endowment funds:

NOW THEREFORE
February 4, 1993 meeting, Board of Trustees

REPORT ON UNIVERSITY DEVELOPMENT (contd)

BE IT RESOLVED, That the acceptance of the report from The Ohio State University Development Fund and The Ohio State University Foundation during the month of December 1992 be approved.

Upon motion of Mr. Celeste, seconded by Mr. Shumate, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

Amb. Wolf:

I want to add, Mr. Chairman, that the Investments Committee has been very beneficial to the financial health of this University. A clear incidence of this has come about in the last six months, which I think is one of the reasons for the happy array of figures we were able to present today. We had $17 million invested in an ESIF, which is an overseas european index fund. And because we didn't have a high comfort level with the way that fund was going, we took out the $17 million and put it into a domestic fund which we thought would do well. The net result is that the one move -- the ESIF index went down and we would have lost about $2.5 million of the $17 million. By transferring it to the other fund, we increased it by $2.5 or $3 million. So one little move alone made a difference of almost $5 million in the financial health of this University. I am just proud of our Investments Committee members and thank them for the input they give us at each meeting.

Mr. Scott:

Mr. Chairman, I would just like to make one note for the Board. If you will note in the report that Jerry presented, the former Associate to the Secretary of the Board, the late Faye Smith, and her husband, Professor Neal A. Smith, established a fund to create a Chair in Electrical Engineering in the amount of $900,000. I think that some of you remember Faye serving as Associate to the Secretary of the Board for many years.

ESTABLISHMENT OF NAMED CHAIRS

The John J. Gerlach Chair

In accordance with the guidelines previously established by the Board, The John J. Gerlach Chair Fund was established December 9, 1982, through funds received by the University from the family and friends of John J. Gerlach (B.S.Bus.Adm. '23; M.A. '23). The fund was revised October 6, 1989. The funding level has been reached and the Chair was established February 4, 1993.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide support for the work of a distinguished teacher and scholar of accounting in the College of Business. Appointment to the Gerlach Chair shall be recommended by the Dean of the College of Business to the Vice President for Academic Affairs and Provost and approved by The Ohio State University Board of Trustees.

$1,250,000.00

The Ralph W. Kurtz Chair in Finance

In accordance with the guidelines previously established by the Board, The Ralph W. Kurtz Chair in Finance Fund was established October 2, 1992, through funds received by the University from Helen C. and Ralph W. Kurtz (B.M.E., 1923) for the support of the College of Business. The funding level has been reached and the Chair was established February 4, 1993.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be distributed to the College of Business to support the teaching and research of The Ralph W. Kurtz Chair in Finance. The Chair shall be an internationally recognized scholar in Finance. Appointment to the Chair shall be recommended by the Dean of the College of Business to the Provost and approved by The Ohio State University Board of Trustees.

$1,250,000.00
February 4, 1993 meeting, Board of Trustees

REPORT ON UNIVERSITY DEVELOPMENT (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT (contd)

ESTABLISHMENT OF NAMED CHAIRS (contd)

The H. P. Wolfe Chair in Accounting

In accordance with the guidelines previously established by the Board, The H. P. Wolfe Chair in Accounting Fund was established June 2, 1989, through funds received by the University from Wolfe Associates, Inc. The fund was revised August 23, 1989. The funding level has been reached and the Chair was established February 4, 1993.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support the search for and maintenance of The H. P. Wolfe Chair in Accounting. When the H. P. Wolfe Chaired Professor has been appointed, the annual income shall be used to provide salary and program support in the Department of Accounting and Management Information Systems of the College of Business. Appointment to the H. P. Wolfe Chair shall be recommended by the Dean of the College of Business to the Provost and approved by The Ohio State University Board of Trustees. The holder will report annually to the donor's designees on the goals, objectives, and plans for the chair in the upcoming academic year. These yearly reports shall describe also the use of all fund earnings, past and projected, over the same two-year period.

$1,250,000.00

ESTABLISHMENT OF DESIGNATED PROFESSORSHIP

The Raymond E. Mason, Jr.
Designated Professorship in Military History

The Raymond E. Mason, Jr. Designated Professorship in Military History was established February 4, 1993, by the Board of Trustees of The Ohio State University with a pledge of $30,000 per year for five years from Raymond E. Mason (B.S.Bus.Adm. ’41) and the first annual gift having been received.

The annual gift shall be used to provide support for the work of a Professor in Military History recommended by the Director of the Mershon Center through the Vice Provost for International Affairs to the Provost, and approved by the Board of Trustees.

The designated professorship may be renewed at the prevailing amount and term at the time of renewal.

$30,000.00

Establishment of Named Funds
Establishment of Named Funds (contd)

The Neal A. Smith Chair Fund in Electrical Engineering

The Neal A. Smith Chair Fund in Electrical Engineering was established February 4, 1993, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from the estates of Neal A. Smith (B.S.E.E. '41; M.S., Electrical Engineering, 1947), Professor Emeritus, Electrical Engineering, and Faye L. Smith (B.S.Ed. '39; M.A., Education, 1952), Assistant to the Secretary Emeritus of the Board of Trustees.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be returned to principal until such time as the fund reaches $1.25 million, the minimum required to endow a chair. Upon attaining the required funding level, ninety percent (90%) of the annual income shall be used to attract, provide salary and program support, and retain an internationally recognized scholar in electrical engineering, with emphasis on Professor Neal A. Smith's specialty, power systems engineering. Appointment to the Neal A. Smith Chair shall be recommended by the Chairperson of the Department of Electrical Engineering to the Dean of the College of Engineering and to the Provost, and approved by the Board of Trustees. Ten percent (10%) of the annual income shall be reinvested in the principal.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

$900,000.00

The Margo Jones Medal Endowment Fund

The Margo Jones Medal Endowment Fund was established February 4, 1993, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from the estate of J. B. Tad Adoue III, business manager and board member of Margo Jones' Theatre in Dallas, Texas, and the Lawrence and Lee Foundation, in honor of the late Margo Jones, founder of one of the earliest regional professional theatres and champion of new plays and playwrights.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support the administration and awarding of the annual Margo Jones Medal and prize. The recipient shall be an individual who (a) has made a lifetime commitment to the encouragement of living theatre in the United States; (b) has demonstrated an understanding and affirmation of the craft of playwriting; and (c) has contributed, in a significant manner, to the art of the living theatre.
Establishment of Named Funds (contd)

The Margo Jones Medal Endowment Fund (contd)

The award recipient shall be selected by an award committee comprised of the Director of the Lawrence and Lee Theatre Research Institute; the Curator of the Lawrence and Lee Theatre Research Institute; David E. LeVine; Jerome Lawrence and Robert E. Lee, or their designated heirs; and the two most recent recipients of the medal. Nominations may be made or solicited by any member of the award committee. The Director and Curator of the Lawrence and Lee Theatre Research Institute shall serve as co-administrators of the committee. The committee shall select its own chair. Administrative and financial responsibility for the medal and prize shall reside with the Lawrence and Lee Theatre Research Institute. Any unexpended income in any given year shall be directed to the Jerome Lawrence and Robert E. Lee Theatre Research Institute Library Endowment Fund.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then the fund shall be incorporated into the Jerome Lawrence and Robert E. Lee Theatre Research Institute Library Endowment Fund.

$100,000.00

The Alfred Nelson and Elizabeth Dixon Watson Cancer Research Endowment Fund

The Alfred Nelson and Elizabeth Dixon Watson Cancer Research Endowment Fund was established February 4, 1993, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from the late Alfred Nelson Watson (B.A., Arts and Sciences, 1931; M.S., Biological Sciences, 1932; Ph.D., Biological Sciences, 1934) and his wife, Elizabeth Dixon Watson (B.A., English, 1934; B.S.Ed. '34) of Columbus, Ohio.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used by The Arthur G. James Cancer Hospital and Research Institute for research into the causes, prevention, and treatment of cancer as approved by the Director of The Arthur G. James Cancer Hospital and Research Institute and the Vice President for Health Services.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the Director of The Arthur G. James Cancer Hospital and Research Institute and the Vice President for Health Services in order to carry out the desire of the donors.

$100,000.00
Establishment of Named Funds (contd)

The Elizabeth D. Gee Memorial Endowment Fund
for Cancer Education and Research

The Elizabeth D. Gee Memorial Endowment Fund for Cancer Education and Research was established February 4, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund in memory of Elizabeth D. Gee.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support cancer education and research programs in The Arthur G. James Cancer Hospital and Research Institute as approved by the Director of The Arthur G. James Cancer Hospital and Research Institute and the Vice President for Health Services.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the Director of The Arthur G. James Cancer Hospital and Research Institute and the Vice President for Health Services in order to carry out the desire of the donors.

$47,804.81

The David H. George Chemical Engineering Scholarship Fund

The David H. George Chemical Engineering Scholarship Fund was established February 4, 1993, by the Board of Trustees of The Ohio State University with a gift in memory of David H. George (B.Ch.E. '48).

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to attract and to retain students who have successfully combined extracurricular University-based or community service activities with challenging academic study as evidenced by their major in chemical engineering. Entering first-year, as well as upper level students, shall be considered for these scholarships. Recipients shall be named annually, but may be eligible to compete for renewed awards. If and when a David H. George Chair in Chemical Engineering is established at the University, the chairholder shall be responsible for the selection of these awards in consultation with the Department of Chemical Engineering Scholarship Committee. The David H. George Chair shall be expected also to serve as advisor and mentor for each of these undergraduate recipients. In the absence of the David H. George Chair, the Department of Chemical Engineering chairperson shall make the selections. The University Committee on Student Financial Aid shall be informed of all selections.

$25,000.00

The Muriel Kahler Hoge, Hamilton Hoge and Edward Kahler Scholarship Fund

The Muriel Kahler Hoge, Hamilton Hoge and Edward Kahler Scholarship Fund was established February 4, 1993, by the Board of Trustees of The Ohio State University, with a gift to The Ohio State University Development Fund from the estate of Muriel M. Hoge of Kenton, Ohio, in memory of her father, husband and herself.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide scholarships for room, board, and tuition for students attending Ohio State and pursuing an undergraduate degree, and who are legal residents of Hardin County, Ohio, and who have graduated from either Kenton Senior High School, Ada High School, or any of the other public high schools attended by residents of Hardin County, Ohio, and which are under the administrative control of the Hardin County Board of Education or its successor. Students receiving such scholarships shall be selected by the University Committee on Student Financial Aid and shall be based on the factors of scholastic merit and achievement. The financial need of the student may also be considered when determining recipients. The scholarships or grants shall be awarded in substantial amounts to a fewer number of students, rather than relatively small amounts to a greater number of students. No student shall be awarded or granted a scholarship for more than four (4) academic school years.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

$25,000.00

The State Farm Insurance & Business Scholarship Fund

The State Farm Insurance & Business Scholarship Fund was established February 4, 1993, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University Development Fund from the State Farm Insurance Companies (Ohio Region), Newark, Ohio.
February 4, 1993 meeting, Board of Trustees

The State Farm Insurance & Business Scholarship Fund (contd)

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide scholarships at The Ohio State University Newark Campus for those who have either experience or an interest in developing a career in insurance or related business emphasis including marketing, finance, or accounting. Award recipients should show some degree of academic prowess and the ability to successfully pursue academic studies at the college level. The selection of the scholarship recipients shall be made by The Ohio State University Newark Campus Scholarship Committee in coordination with the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

$19,000.00

The Bea Cleveland 4-H Scholarship Fund

The Bea Cleveland 4-H Scholarship Fund was established February 4, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from Beatrice J. Cleveland (B.S.H.E. ’42), Columbus, Ohio.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support one scholarship, not to exceed $1,000, to be awarded annually to a 4-H member who is a senior in high school during the year of application. Applicants must be committed to a profession in Human Ecology and planning to enroll as a freshman, autumn quarter of the current year at The Ohio State University, Columbus campus. The scholarship shall be equally divided and awarded for three consecutive quarters providing the recipient maintains a minimum GPA required for admission to the College of Human Ecology. Should the annual income exceed $1,000, the unused income shall be applied to the principal balance until the annual income is sufficient to award an additional scholarship of a like amount, under the same conditions. In the event there are no qualified applicants, unused income shall be applied to the principal balance. The recipient(s) of the scholarship shall be determined by the Ohio 4-H Awards Committee on an annual basis in consultation with the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be determined by the Board of Trustees with first preference being given to the recommendation of the Ohio State 4-H Leader, Assistant Director Ohio State University Extension.

$18,000.00

The William R. Wallace Dental Research Scholarship Fund

The William R. Wallace Dental Research Scholarship Fund was established February 4, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from alumni and friends of William R. Wallace (D.D.S, 1956, M.S., Pathology, 1962), Dean of The Ohio State University College of Dentistry, 1981-1991.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide scholarship funds each year for a third-year dental student to be selected at the end of his/her second year. Selection shall be based on outstanding achievement in the College of Dentistry's student research program. Selection of the scholarship recipient shall be made by a College of Dentistry faculty committee in consultation with the Dean of the College of Dentistry and the University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

$16,686.26

The Ohio Pest Control Association Scholarship Fund

The Ohio Pest Control Association Scholarship Fund was established February 4, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from members of the Ohio Pest Control Association in honor of past presidents, officers, and members, living and deceased.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.
Establishment of Named Funds (contd)

The Ohio Pest Control Association Scholarship Fund (contd)

The annual income shall be used to provide one or more merit scholarships or fellowships in urban entomology, with preference given to students who are members of the Ohio Pest Control Association, or spouses, or children of members. Students shall be selected to receive awards based upon the recommendation of the Chairperson, Department of Entomology, and in consultation with the University Committee on Student Financial Aid as a result of a selection process through the Department of Entomology Awards Committee which shall consider the students' expressed interest in urban entomology and academic achievement.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

$15,450.00

The Dr. William L. Berson Food Science and Technology Fund

The Dr. William L. Berson Food Science and Technology Fund was established February 4, 1993, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University Development Fund from Dr. William L. Berson (B.S.Agr. '43; M.D. '50).

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support research and educational programs within the Department of Food Science and Technology, or its successor administrative unit(s). Utilization of income from this endowment shall be at the discretion of the Chairperson of the Department of Food Science and Technology with concurrence by the Vice President for Agricultural Administration.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

$15,000.00

The John L. Ryant Memorial 4-H Agriculture Scholarship Fund

The John L. Ryant Memorial 4-H Agriculture Scholarship Fund was established February 4, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from his niece, Beatrice J. Cleveland (B.S.H.E. '42), Columbus, Ohio.
February 4, 1993 meeting, Board of Trustees

REPORT ON UNIVERSITY DEVELOPMENT (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Named Funds (contd)

The John L. Ryant Memorial 4-H Agriculture Scholarship Fund (contd)

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support one scholarship, not to exceed $1,000, to be awarded annually to an incoming freshman enrolled in the College of Agriculture, preferably from Delaware County, who is a current or former 4-H member, and who has demonstrated qualities of leadership. The scholarship shall be equally divided and awarded for three consecutive quarters providing the recipient maintains a minimum GPA required for admission to the College of Agriculture. Any unused income shall be applied to the principal balance until the annual income is sufficient to award an additional scholarship of a like amount, under the same conditions. In the event there are no qualified applicants, the unused income shall be added to the principal balance. The recipient(s) of the scholarship shall be determined by the Ohio 4-H Awards Committee on an annual basis in consultation with the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees with strong preference being given to the recommendation of the Ohio State 4-H Leader, Assistant Director Ohio State University Extension.

$15,000.00

The Class of 1941 Mechanical Engineering Scholarship Fund

The Class of 1941 Mechanical Engineering Scholarship Fund was established February 4, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from Mechanical Engineering graduates within the University's Class of 1941.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

Eighty percent (80%) of the annual income shall be used to support one or more scholarships for outstanding students studying mechanical engineering. The Chairperson of the Department of Mechanical Engineering shall be responsible for selecting the recipients in consultation with the Dean of the College of Engineering and in cooperation with the University Committee on Student Financial Aid. The remaining twenty percent (20%) of the annual income and any other unused income shall be added to the fund's principal.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

The Doris Eckfeld Elliot Scholarship Fund
in the College of Human Ecology

The Doris Eckfeld Elliot Scholarship Fund in the College of Human Ecology was established February 4, 1993, by the Board of Trustees of The Ohio State University in memory of Doris Eckfeld Elliot (Fulton) with gifts to The Ohio State University Development Fund from the children of Doris Eckfeld Elliot (B.S.H.E. '35; M.S., Biochemistry, 1938).

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used for a graduate tuition scholarship(s) for students enrolled in the College of Human Ecology. Preference shall be given to a single parent with custody of a minor child(ren) who has discontinued their education for five or more years; who has financial need; who has demonstrated academic excellence, service and commitment to a career in Home Economics/Human Ecology; and who has a potential for leadership. It is the intention of the donors to assist individual adult graduate students in reaching graduation. Any unused income (no less than one-third) shall be returned to principal. Selection shall be made by the Dean of the College of Human Ecology, or his/her appointee, in consultation with the University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist it should be used for a scholarship for a graduate student enrolled in the Colleges of the Arts or Social and Behavioral Sciences. If the need for this fund should so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer who is directly responsible for Human Ecology graduate student education or Arts and Sciences graduate education in order to carry out the desire of the donors.

$15,000.00

Change in Name of Named Fund

The Paul N. and Thelma M. Lehoczky Memorial Fund

The Paul N. Lehoczky Memorial Fund was established January 9, 1976, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund by alumni, friends and family in memory of Paul N. Lehoczky (M.S., Mechanical Engineering, 1928; Ph.D., Mechanical Engineering, 1931), Professor in the Department of Industrial and Systems Engineering from 1928 to 1965 and Chairman from 1944 to 1964. At the request of the family and the Industrial and Systems Engineering faculty, the name of the fund was revised February 4, 1993.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

REPORT ON UNIVERSITY DEVELOPMENT (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Change in Name of Named Fund (contd)

The Paul N. and Thelma M. Lehoczky Memorial Fund (contd)

The annual income shall be used to attract funded research and to support development projects within the department, including grants to faculty, research personnel, and equipment and supplies. Requests for expenditure of funds shall be initiated by the Chairperson of the Department of Industrial and Systems Engineering and approved by the Dean of the College of Engineering.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

Change in Name and Description of Named Funds

The Francis W. Davis Fellowship for Cinema

The Francis W. Davis Fellowship for the Department of Photography and Cinema was established September 2, 1983, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University from Agnes Turner Davis (B.S.H.E. ’30). The name of the fund and description were revised February 4, 1993.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used for a graduate fellowship in cinema or video with preference being given to a qualified student whose major area is studio, laboratory, historical, or theoretical studies in cinema or in video. The fellowship shall be awarded to an outstanding student with the potential for making a significant contribution to the field, and shall be given only when all conditions are met. The selected student must be an enrolled candidate for the Master of Arts degree in cinema, recommended by the Graduate Committee of the Department of Theatre, and approved by the Chairperson of the Department of Theatre and the Dean of the College.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer responsible for cinema studies in order to carry out the desire of the donor.

The Charles G. Lichtenstein Memorial Award Fund

The Charles Lichtenstein Memorial Award Fund was established September 11, 1969, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from Abba and Cecile Lichtenstein and family in memory of their son and brother, Charles G. Lichtenstein. The name and description were revised February 4, 1993, at the request of the Lichtenstein family.
February 4, 1993 meeting, Board of Trustees

REPORT ON UNIVERSITY DEVELOPMENT (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Change in Name and Description of Named Funds (contd)

The Charles G. Lichtenstein Memorial Award Fund (contd)

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used primarily to encourage the pursuit of graduate civil engineering degrees at The Ohio State University. Selection preference shall be given to U.S. born, Ohio State senior-year students who have been accepted into the University's graduate program. Women and other underrepresented populations within the civil engineering profession shall be granted additional consideration. A secondary use for the annual income shall be the recognition of teaching and research excellence among the University's civil engineering faculty. The Chairperson of the Department of Civil Engineering shall be responsible for the annual income's allocation and award selection. The Chair shall avoid considering previous faculty recipients of these awards, except in extraordinary circumstances. Notification of awards to the Lichtenstein family is expected.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be determined by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

The Alga "Peg" Weaver 4-H Scholarship Fund

The Alga D. "Peg" Weaver Honor Scholarship in Home Economics was established September 3, 1982, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from Alga D. "Peg" Weaver, her family and friends. The name of the fund and description were revised February 4, 1993.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to grant at least one scholarship with earnings up to $1,200 to be awarded for three (3) consecutive quarters providing the recipient maintains a minimum GPA of 2.0 or above on a 4.0 scale. Should the earnings exceed $1,200, a second scholarship shall be awarded following the same guidelines as the first scholarship. Applicants must be 4-H members, seniors in high school during the year of application, committed to a profession in home economics and planning to enroll as freshmen at The Ohio State University Columbus campus, branches and satellites. The award shall be given in "voucher" form, to be used for academic, supplies and books only. If no applicant is found, then the scholarship may be awarded to a student currently enrolled (continuing education students included) in home economics at The Ohio State University Columbus campus, branches and satellites. Award recipients shall be selected by the 4-H Awards Selection Committee in consultation with the scholarship coordinators of the College of Agriculture and the College of Human Ecology and the University Committee on Student Financial Aid.
It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the Director for the Ohio State University Extension in consultation with a committee representing the local 4-H donors in order to carry out the desire of the donor.

Change of Description of Named Fund

The John M. Shepherd Athletic Scholarship Fund

The John M. Shepherd Athletic Scholarship Fund was established July 7, 1989, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from John M. Shepherd (B.Cer.E. '58, M.B.A. '59) of Cincinnati, Ohio. The description was revised February 4, 1993.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to supplement the grant-in-aid scholarship costs of qualified student athletes pursuing undergraduate degrees at The Ohio State University who are members of the men's varsity basketball team. Preference shall be given to members of the team who are graduates of Ohio high schools. If no Ohio high school graduates are members of the team, the award may go to other members of the men's varsity basketball team. Recipients shall be selected by the Director of Athletics in consultation with the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the Director of Athletics in order to carry out the desire of the donor.

THE OHIO STATE UNIVERSITY FOUNDATION

Approval of Description and Establishment of Funds

The Kent Distinguished Scholarship Fund

The Kent Distinguished Scholarship Fund was established February 4, 1993, by the Board of Trustees of The Ohio State University through funds received by the University from The Ohio State University Foundation, which has established an endowed fund with an initial gift funding to The Ohio State University Foundation from Ralph Kent (B.S., Accounting, 1937) and Betty Kent (w. 1939), Harbor Springs, Michigan, and Longboat Key, Florida.
Approval of Description and Establishment of Funds (contd)

The Kent Distinguished Scholarship Fund (contd)

The annual income and principal, if needed, as provided by the Foundation shall be used to provide merit scholarships for Kent Distinguished Scholars in Accounting. It is anticipated that the endowment principal, when fully funded, will provide each year sufficient distributable income to fund tuition, room and board for five students annually on a continuing basis. Recipients shall be students majoring or planning to major in Accounting. Annually, any prior year's income which was not awarded shall be added to the fund's principal. It is the desire of the donors that students be selected as freshmen and continued through their senior year so long as they continue as Distinguished Scholars and continue in Accounting. Should the Accounting major become a five-year program, as is now anticipated, recipients shall be continued for their fifth year.

It is the hope of the donors that recipients will give strong consideration to the accounting honors program and accounting internships, especially the internships offered by Ernst & Young. The scholarship will be administered by the Department of Accounting in cooperation with the University Honors Center and in consultation with the University Committee on Student Financial Aid. The Dean of the College of Business will have a continuing oversight role on the operation of the Kent Scholarship program.

Kent Distinguished Scholars shall be selected through the University initiative to recruit National Merit and National Achievement Scholars. Once these Scholars have confirmed acceptance at Ohio State, a Kent Scholar shall be named from the pool of candidates based on the above criteria. Should the recipient maintain eligibility as a Distinguished Scholar, but change from Accounting, then the University shall fund the student from other sources and a new Kent Distinguished Scholar would be named. Each year, any unused income shall be transferred to the endowment principal.

The merit scholarship initiative is the result of recommendations from the 1990 University Task Force on Undergraduate Recruitment and the 1990-1991 Undergraduate Recruitment Implementation Steering Committee to the Senior Vice President for Academic Affairs and Provost. Students shall be selected based upon the criteria sanctioned by the Senior Vice President for Academic Affairs and Provost.

$219,000.00

The Alonzo H. Tuttle Memorial Scholarship Fund

The Alonzo H. Tuttle Memorial Scholarship Fund was established February 4, 1993, by the Board of Trustees of The Ohio State University through funds received by the University from The Ohio State University Foundation, which has established an endowed fund with gifts designated for the support of the College of Law from Carter C. Kissell (B.A., Arts & Sciences, 1925; J.D., 1927).

Income provided by the Foundation shall be distributed to the College of Law to be used to provide scholarships for students enrolled in the College of Law. Selection of the scholarship recipient(s) shall be made by the Dean of the College of Law, or his/her designee, in consultation with the University Committee on Student Financial Aid.

$50,000.00
The John and Rose Barone "Whiz Kid Investors" Fund

The John and Rose Barone "Whiz Kid Investors" Fund was established February 4, 1993, by the Board of Trustees of The Ohio State University through funds received by the University from The Ohio State University Foundation, which has established an endowed fund with gifts designated for the support of the College of Business from John and Rose Barone of Toledo, Ohio.

Income provided by the Foundation shall be distributed to the College of Business to benefit students in the Student Investment Management Program, with preference given to students with financial need from Northwest Ohio.

$16,000.00

ACADEMIC AFFAIRS COMMITTEE REPORT

Mr. Kessler:

The Academic Affairs Committee met this morning and heard a very interesting report from Associate Provost Ed Ray and Vice President Bill Shkurti on Academic Planning and Budget Priorities. The Committee is also recommending the following resolutions:

RESTRUCTURING OF ACADEMIC SUPPORT UNITS

Resolution No. 93-77

Synopsis: The Academic Affairs Committee recommended the combining of the Office of Admissions and the Office of Student Financial Aid and designating the combined office as the Office of Admissions and Financial Aid; the reporting lines of the Office of Continuing Education be redirected to University College; the Center for Teaching Excellence become the Center for Instructional Resources and the reporting line be redirected to the Office of Academic Computing; and the reporting line for the Young Scholars Program be redirected to the Office of Minority Affairs.

WHEREAS the Office of Admissions is responsible for administering admission to the University; and the Office of Student Financial Aid is responsible for administering financial aid for all eligible University students; and

WHEREAS the Office of Continuing Education is responsible for entry level undergraduate education; and University College is responsible for incoming freshman education; and

WHEREAS the Center for Teaching Excellence is responsible for the support of teaching and classrooms; and the Office of Academic Computing is responsible for the technical support of teaching; and
RESTRICTURING OF ACADEMIC SUPPORT UNITS (contd)

WHEREAS the Young Scholars Program is responsible for the recruitment of low income minority students; and the Office of Minority Affairs is responsible for the recruitment of minority students; and

WHEREAS the functions of the above offices have been restructured so as to provide an enhanced level of support and effectiveness at the direction of the Senior Vice President for Academic Affairs:

NOW THEREFORE

BE IT RESOLVED, That the name of the combined Office of Admissions and Office of Student Financial Aid be designated as the "Office of Admissions and Financial Aid,"; the Office of Continuing Education report to University College; the Center for Teaching Excellence be designated the "Center for Instructional Resources" and report to the Office of Academic Computing; and the Young Scholars Program report to the Office of Minority Affairs; and

BE IT FURTHER RESOLVED, That the Secretary of the Board of Trustees be hereby authorized and directed to incorporate the changes in the applicable sections of the Bylaws of the Board of Trustees and the Rules of the University Faculty.

Upon motion of Mr. Kessler, seconded by Mr. Shumate, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

AMENDMENTS TO THE RULES OF THE UNIVERSITY FACULTY

Resolution No. 93-78

Synopsis: The Academic Affairs Committee recommended the approval of the following amendments to the Rules of the University Faculty.

WHEREAS the University Senate pursuant to rule 3335-1-09 of the Administrative Code is authorized to recommend through the President to the Board of Trustees the adoption of amendments to the Rules of the University Faculty as approved by the University Senate; and

WHEREAS the proposed changes in the Rules of the University Faculty were approved by the University Senate on December 5, 1992:

Amended Rules

3335-5-47 Organizing committees of the senate.

(A) Unchanged.

(B) Membership.

(1) The president shall appoint members of the administration; the council of graduate students, the inter-professional council, and the undergraduate student government shall select members of their own constituency using procedures adopted by their respective bodies. Faculty members of the steering committee (that is, the executive committee of
the faculty council) shall be elected by the faculty council serving the following year. The slate of candidates shall be prepared by the outgoing members of the executive committee and shall include at least one more name than there are positions to be filled. Faculty members of other organizing committees shall be appointed by the executive committee of the faculty council. Names of potential committee members shall be solicited from the faculty council in writing.

Balance unchanged.

3335-5-472 Program Committee.

(A) Membership.

The program committee shall consist of nine members.

(1) Four regular faculty, all of whom are members of the senate, appointed by the executive committee of the faculty council. The term of service is two years.

Balance unchanged.

3335-5-473 Rules committee.

(A) Membership.

The rules committee shall consist of ten members.

(1) Six regular faculty, all of whom are members of the senate, appointed by the executive committee of the faculty council. The term of service is two years.

Balance unchanged.

3335-5-48 Standing and special committees of the senate.

(A) Unchanged.

(B) Membership.

(1) Unchanged.

(2) Unless otherwise specified by the rules, or by the senate, the president shall appoint members of the administration; the council of graduate students, the inter-professional council, and the undergraduate student government shall select members of their own constituency using procedures adopted by their respective bodies. A three-step process shall be followed in establishing the faculty membership of standing and special committees.

(a) The executive committee of the faculty council shall appoint senators to committees based, as nearly as possible, on written preferences provided by senators. If it is not possible for a senator to be appointed to his or her preferred committees, the senator will be contacted to determine whether any other committee assignment would be acceptable.
AMENDMENTS TO THE RULES OF THE UNIVERSITY FACULTY (contd)

(b) Committee vacancies not filled by senators shall be filled through election by faculty council members serving the following year. The executive committee of the faculty council shall prepare a ballot based on nominations solicited in writing from the faculty. The ballot shall include at least one more name than there are positions to be filled.

(c) The president shall be provided with the results of the processes described in (a) and (b) above and shall then fill any vacancies designated as presidential appointments.

Balance unchanged.

3335-5-481 Council on academic affairs.

(A) Membership.

The council on academic affairs shall consist of fourteen members.

(1) Nine regular faculty.

(a) Five regular faculty, at least two of whom are members of the senate, appointed by the executive committee of the faculty council or elected by the faculty council in accordance with procedures specified in faculty rule 3335-5-48 (B)(2). The term of service is three years.

(b) Four regular faculty shall be appointed by the president. The term of service is three years.

Balance unchanged.

3335-5-482 The library council.

(A) Membership.

The library council shall consist of fifteen members.

(1) Nine regular faculty appointed by the executive committee of the faculty council or elected by the faculty council in accordance with procedures specified in faculty rule 3335-5-48 (B)(2). The term of service is three years.

(2) Four students.

(a) One graduate student selected by the council of graduate students. The term of service is one year.

(b) One professional student selected by the inter-professional council. The term of service is one year.

(c) Two undergraduate students selected by the undergraduate student government. The term of service is one year.
AMENDMENTS TO THE RULES OF THE UNIVERSITY FACULTY (contd)

Amended Rules (contd)

(3) Two administrators.
   (a) The dean of the graduate school.
   (b) The director of libraries.

Balance unchanged.

3335-5-483 Committee on university bookstores.

(A) Membership.

The committee on university bookstores shall consist of eleven members.

   (1) Five regular faculty, one of whom is a member of the university libraries, appointed by the executive committee of the faculty council or elected by the faculty council in accordance with procedures specified in faculty rule 3335-5-48 (B)(2). The term of service is three years.

Balance unchanged.

3335-5-484 Council on student affairs.

(A) Membership.

The council on student affairs shall consist of eighteen members.

   (1) Six regular faculty, at least two of whom are members of the senate, appointed by the executive committee of the faculty council or elected by the faculty council in accordance with procedures specified in faculty rule 3335-5-48 (B)(2). The term of service is three years.

Balance unchanged.

3335-5-485 Athletic council.

(A) The athletic council shall consist of fourteen members.

   (1) Eight regular faculty.

      (a) Four regular faculty appointed by the executive committee of the faculty council or elected by the faculty council in accordance with procedures specified in faculty rule 3335-5-48 (B)(2). The term of service is four years with service commencing the first of July following appointment or election.

      (b) Four regular faculty members appointed by the president. The term of service is four years with service commencing the first of July following appointment.

Balance unchanged.
3335-5-486 Council on admission and registration.

(A) Membership.

The council on admission and registration shall consist of nineteen members.

(1) Nine regular faculty.

(a) Three regular faculty appointed by the president for three-year terms. Appointed members are eligible for reappointment.

(b) Six regular faculty, at least two of whom are senate members, appointed by the executive committee of the faculty council or elected by the faculty council in accordance with procedures specified in faculty rule 3335-5-48 (B)(2). The term of service is three years.

Balance unchanged.

3335-5-487 Committee on academic misconduct.

(A) Membership.

The committee on academic misconduct shall consist of thirty-four members.

(1) Eighteen regular faculty appointed by the executive committee of the faculty council or elected by the faculty council in accordance with procedures specified in faculty rule 3335-5-48 (B)(2). The term of service is three years. No faculty member shall serve more than two consecutive terms.

Balance unchanged.

3335-5-488 Committee on honorary degrees.

(A) Membership.

The committee on honorary degrees shall consist of five members of the regular faculty appointed by the executive committee of the faculty council or elected by the faculty council in accordance with procedures specified in faculty rule 3335-5-48 (B)(2). The term of service is five years.

Balance unchanged.

3335-5-489 Committee on academic freedom and responsibility.

(A) Membership.

The committee on academic freedom and responsibility shall consist of eight members during autumn, winter, and spring quarters and ten members from June to the beginning of autumn quarter.

489
AMENDMENTS TO THE RULES OF THE UNIVERSITY FACULTY (contd)

Amended Rules (contd)

(1) Six regular faculty (eight during the summer period), all of whom are members of the senate, appointed by the executive committee of the faculty council. The term of service begins in the summer quarter following election and extends through the summer quarter following the third year of service.

(2) Two graduate teaching, research, or administrative associates selected by the council of graduate students. The term of service is one year.

Balance unchanged.

3335-5-4810 Faculty hearing committee.

(A) Membership.

The faculty hearing committee shall consist of twelve tenured members of the regular faculty appointed by the executive committee of the faculty council or elected by the faculty council in accordance with procedures specified in faculty rule 3335-5-48 (B)(2). Each elected person shall serve a four-year term as a regular member followed by a one-year term as an alternate member.

Balance unchanged.

3335-5-4811 Fiscal committee.

(A) Membership.

The fiscal committee shall consist of sixteen members.

(1) Eight regular faculty members.

(a) Six regular faculty, at least two of whom are members of the senate, appointed by the executive committee of the faculty council or elected by the faculty council in accordance with procedures specified in faculty rule 3335-5-48 (B)(2). The term of service is three years.

(b) Two regular faculty appointed by the president. The term of service is three years.

Balance unchanged.

3335-5-4812 Faculty compensation and benefits committee.

(A) Membership.

The faculty compensation and benefits committee shall consist of fifteen members.

(1) Twelve regular faculty, at least two of whom are members of the senate, appointed by the executive committee of the faculty council or elected by the faculty council in accordance with procedures specified in faculty rule 3335-5-48 (B)(2). The term of service is three years.
February 4, 1993 meeting, Board of Trustees

AMENDMENTS TO THE RULES OF THE UNIVERSITY FACULTY (contd)

Amended Rules (contd)

Balance unchanged.

3335-5-4813 Legislative affairs committee.

(A) Membership.

The legislative affairs committee shall consist of seven members.

(1) Three regular faculty appointed by the executive committee of the faculty council or elected by the faculty council in accordance with procedures specified in faculty rule 3335-5-48 (B)(2). The term of service is three years.

Balance unchanged.

3335-5-4814 Research committee.

(A) Membership.

The research committee shall consist of twenty-six members.

(1) Sixteen faculty.

(a) Ten regular faculty to be determined by the established procedures of the council on research and graduate studies. Faculty must be members of the council on research and graduate studies and represent the ten areas of the graduate school. The term of service is two years.

(b) Six regular faculty appointed by the executive committee of the faculty council or elected by the faculty council in accordance with procedures specified in faculty rule 3335-5-48 (B)(2). Of these six, one member must serve on a regional campus and no more than one member may be from any individual college. The term of service is three years.

Balance unchanged.

3335-5-4815 Committee on traffic, parking, and public safety.

(A) Membership.

The committee on traffic, parking, and public safety shall consist of seventeen members.

(1) Six regular faculty appointed by the executive committee of the faculty council or elected by the faculty council in accordance with procedures specified in faculty rule 3335-5-48 (B)(2). The term of service is three years.

Balance unchanged.
AMENDMENTS TO THE RULES OF THE UNIVERSITY FACULTY (contd)

Amended Rules (contd)

3335-5-4816 Committee on women and minorities.

(A) Membership.

The committee on women and minorities shall consist of thirteen members.

(1) Six regular faculty appointed by the executive committee of the faculty council or elected by the faculty council in accordance with procedures specified in faculty rule 3335-5-48 (B)(2). The term of service is three years.

Balance unchanged.

NOW THEREFORE

BE IT RESOLVED, That the foregoing amendments to the Rules of the University Faculty be adopted as recommended by the University Senate.

Upon motion of Mr. Kessler, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

HONORARY DEGREES

Resolution No. 93-79

Synopsis: The Academic Affairs Committee recommended the awarding of honorary degrees.

WHEREAS the Committee on Honorary Degrees and the University Senate, pursuant to rule 3335-5-488 of the Administrative Code, have approved for recommendation to the Board of Trustees awarding of honorary degrees as listed below.

Frank Ellis         Doctor of Science
Hideo Sasaki         Doctor of Fine Arts
William H. Sweet        Doctor of Science
Torsten N. Wiesel        Doctor of Science

NOW THEREFORE

BE IT RESOLVED, That the above honorary degrees be awarded in accordance with the recommendation at a time convenient to the University and the recipients.

Upon motion of Mr. Kessler, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

February 4, 1993 meeting, Board of Trustees

DEGREES AND CERTIFICATES - WINTER QUARTER COMMENCEMENT  
Resolution No. 93-80

Synopsis: The Academic Affairs Committee recommended the approval of Degrees and Certificates for Winter Quarter.

WHEREAS pursuant to paragraph (E) of rule 3335-1-06 of the Administrative Code, the Board has authority for the issuance of degrees and certificates; and

WHEREAS the faculties of the colleges and schools shall transmit, in accordance with rule 3335-9-29 of the Administrative Code, for approval by the Board of Trustees the names of persons who have completed degree and certificate requirements; and

WHEREAS the Colleges of the Arts and Sciences has recommended that Joseph Michael Snively, Jr., be awarded a B.A. degree posthumously:

NOW THEREFORE

BE IT RESOLVED, That the degrees and certificates be conferred on March 19, 1993, to those persons who have completed the requirements for their respective degrees and certificates and are recommended by the colleges and schools, and that Joseph Michael Snively, Jr., be awarded the above named degree, posthumously, and the names of those persons awarded degrees and certificates be included in the minutes of this meeting.

Upon motion of Mr. Kessler, seconded by Mr. Shumate, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

PERSONNEL ACTIONS  
Resolution No. 93-81

RESOLVED, That the personnel actions as recorded in the Personnel Budget Records of the University since the December 4, 1992 meeting of the Board, including the following Appointments, Change in Title, Reappointment of Concurrent Appointments, Reappointment of Principal Administrative Official, Appointments of Chairpersons and Director, Reappointment of Chairpersons, Leaves of Absence Without Salary, Professional Improvement Leaves, Tenure--Correction of Dates, Emeritus Titles, and Medical Staff Appointments (The Arthur G. James Cancer Hospital and Research Institute) as detailed in the University Budget be approved and the Medical Staff Appointments/Reappointments (The Ohio State University Hospitals) approved December 17, 1992, by the Hospitals Board be ratified.

Appointments

Name: NANCY L. ZIMPFER  
Title: Dean  
College: Education  
Effective: March 1, 1993  
Salary: $110,004.00  
Present Position: Acting Dean, College of Education and Professor, Department of Educational Policy and Leadership
PERSONNEL ACTIONS (contd)

Appointments (contd)

Name: ALLAN R. MILLETT
Title: Professor (The Raymond E. Mason, Jr. Designated Professorship in Military History)
Department/Center: History/Mershon
Effective: February 4, 1993
Salary: $76,520.00
Present Position: Professor, Department of History and Mershon Center

Change in Title

Name: JAMES J. MAGER
Title: Director
Office: Admissions and Financial Aid
Effective: January 5, 1993
Salary: $80,004.00
Present Position: Director, Office of Admissions

Reappointment of Concurrent Appointments

Name: GARY L. FLOYD
Title: Coordinating Dean for Arts and Sciences
Office: Academic Affairs
Effective Period: July 1, 1992 - June 30, 1993
Salary: $111,688.00
Present Assignment: Dean, College of Biological Sciences and Coordinating Dean for Arts and Sciences

Name: JOHN O. RIEDL
Title: Coordinating Dean for Regional Campuses
Office: Academic Affairs
Effective Period: July 1, 1992 - June 30, 1994
Salary: $92,080.00
Present Assignment: Dean/Director, Mansfield Campus and Coordinating Dean for Regional Campuses

Reappointment of Principal Administrative Official

RICHARD M. HILL, Dean, College of Optometry, effective July 1, 1993, through June 30, 1998, pursuant to rule 3335-3-17 of the Administrative Code.

Appointments of Chairpersons and Director

July 1, 1992 through June 30, 1996

Statistics
Thomas J. Santner

Geological Sciences
James W. Collinson

October 1, 1992 through September 30, 1996
February 4, 1993 meeting, Board of Trustees

PERSONNEL ACTIONS (contd)

Appointments of Chairpersons and Director (contd)

January 1, 1993 through June 30, 1993

Division of Pharmaceutical Administration
Stephen W. Birdwell*

January 1, 1993 through June 30, 1996

Radiology (change in effective date)
Dimitrios G. Spigos

January 1, 1993 through September 30, 1996

Folklore Center
Patrick B. Mullen

Reappointment of Chairpersons

July 1, 1992 through September 30, 1993

Astronomy
Gerald H. Newsom*

October 1, 1993 September 30, 1997

Linguistics
Brian D. Joseph

*Acting

Leaves of Absence Without Salary

KENNETH W. KWOCHEKA, Associate Professor, Department of Veterinary Clinical Sciences, effective November 1, 1992, through April 30, 1993, for personal reasons.

ROBERT A. AGUNGA, Assistant Professor, Department of Agricultural Education, effective January 11, 1993, through February 5, 1993, for personal reasons.

ROGER D. CHERRY, Assistant Professor, Department of English, effective Winter Quarter and Spring Quarter 1993, for personal reasons.

CARLOS E. CUEVAS, Assistant Professor, OSURF and Department of Agricultural Economics and Rural Sociology, effective Autumn Quarter 1992 and Winter Quarter 1993, to work on a project at The World Bank.

JAMES C. TURNER, JR., Assistant Professor, Department of Mathematics, effective Autumn Quarter 1992 and Winter Quarter 1993, to continue developing the Joint Science and Technology Alliance (JSTA).

PATRICK J. MAHONEY, Instructor, School of Allied Medical Professions, effective January 1, 1993, through May 31, 1993, for personal reasons.

Leave of Absence Without Salary--Change in Dates

WALTER D. NEUMANN, Professor, Department of Mathematics, change leave from Winter Quarter and Spring Quarter 1993, to Spring Quarter 1993.
February 4, 1993 meeting, Board of Trustees

PERSONNEL ACTIONS (contd)

Professional Improvement Leaves

BRIAN D. JOSEPH, Chair and Professor, Department of Linguistics, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

JOHN S. MCDONALD, Chair and Professor, Department of Anesthesiology, effective September 1, 1993, through July 31, 1994.

JAMES L. BATTERSBY, Professor, Department of English, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

RUDINE SIMS BISHOP, Professor, Department of Educational Theory and Practice, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

JOHN C. BURNHAM, Professor, Department of History, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

SANDRA E. MCCORMICK, Professor, Department of Educational Theory and Practice, effective Autumn Quarter 1993, Winter Quarter and Summer Quarter 1994.

MELVIN L. MOESCHBERGER, Professor, Department of Preventive Medicine, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

ANDREW I. SCHWEBEL, Professor, Department of Psychology, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

WILLIAM W. BATSTONE, Associate Professor, Department of Classics, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

ANN K. BLOMBACH, Associate Professor, Department of Music, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

MICHAEL F. BRUGGER, Associate Professor and Assistant to the Director, Department of Agricultural Engineering and OARDC - Facilities Administration, effective December 1, 1992, through May 31, 1993.

ROBERT W. CURLEY, JR., Associate Professor, College of Pharmacy, effective September 22, 1993, through March 27, 1994.

BRUCE A. HEIDEN, Associate Professor, Department of Classics, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

THOMAS E. NYGREN, Associate Professor, Department of Psychology, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

DUANE W. ROLLER, Associate Professor, Department of Classics, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.
PERSONNEL ACTIONS (contd)

Tenure--Correction of Dates

NORMA J. BRUCE, Assistant Professor, University Libraries, change tenure date from July 1, 1992, to February 16, 1993.

CAROL P. HAWKS, Assistant Professor, University Libraries, change tenure date from July 1, 1992, to October 1, 1993.

SALLY A. ROGERS, Assistant Professor, University Libraries, change tenure date from July 1, 1992, to March 26, 1993.

Emeritus Titles

WILLIAM H. HAVENER, Department of Ophthalmology, with the title Professor Emeritus (Posthumously), effective February 4, 1993.

LEON PETERS, JR., Department of Electrical Engineering, with the title Professor Emeritus, effective February 1, 1993.

MICHAEL W. CURRAN, Department of History, with the title Associate Professor Emeritus, effective January 1, 1993.

Medical Staff Appointments (The Arthur G. James Cancer Hospital and Research Institute)

Kelly, William Brian, M.D., Associate Attending Staff - Department of Anesthesiology
Ness, Gregory Mark, D.D.S, Associate Attending Staff - College of Dentistry
Lynn, Deborah Joanne, M.D., Associate Attending Staff - Department of Neurology

Medical Staff Appointments (1992-1994) (The Ohio State University Hospitals)

Eaton, Gregory Michael, M.D., Attending Staff - Department of Internal Medicine -- Division of Cardiology
Evans, Cynthia Beth, M.D., Attending Staff - Department of Obstetrics and Gynecology
Kelly, William Brian, M.D., Attending Staff - Department of Anesthesiology
Lynn, Deborah Joanne, M.D. Attending Staff - Department of Neurology
Rosenfeld, Scott Lee, M.D., Limited Staff - Department of Pediatrics
Samuels, Philip, M.D., Attending Staff - Department of Obstetrics and Gynecology
Vasko, Susan D., M.D., Courtesy Staff - Department of Surgery -- Division of Plastic Surgery
Couling, Sidney Lawrence, M.D., Courtesy Staff - Department of Pediatrics
Langkamp, Diane L., M.D., Attending Staff - Department of Pediatrics
Myers, Gerard Anthony, D.O., Limited Staff - Department of Anesthesiology
Nassif, Jr., Robert Alan, D.M.D., Limited Staff - College of Dentistry -- Division of General Dentistry
Salness, Rebecca Ann, M.D., Limited Staff - Department of Pediatrics
Seguin, John H., M.D., Attending Staff - Department of Pediatrics
Walsh, Brian Jay, D.D.S., Attending Staff - College of Dentistry -- Division of General Dentistry
Castellano, David, M.D., Limited Staff - Department of Ophthalmology
Castile, Robert Glenn, M.D., Attending Staff - Department of Pediatrics
Clements, Herman Ronald, M.D., Limited Staff - Department of Psychiatry, Division of General Psychiatry
Hoffman, Stephen Paul, M.D., Courtesy Staff - Department of Internal Medicine -- Division of Infectious Diseases
February 4, 1993 meeting, Board of Trustees

PERSONNEL ACTIONS (contd)

Medical Staff Appointments (1992-1994) (The Ohio State University Hospitals) (contd)

Jackson, Benita Marie, M.D., Attending Staff - Department of Internal Medicine -- Division of General Medicine
Kuzma, Mary Kay, M.D., Attending Staff - Department of Pediatrics

Medical Staff Reappointments (The Ohio State University Hospitals)

McAnallen, Curtis M., Limited Staff - Department of Family Medicine
Olson, Stephen C., Attending Staff - Department of Psychiatry -- Division of General Psychiatry
Pema, Peter J., Limited Staff - Department of Radiology -- Division of Diagnostic Radiology
Taniguchi, Marshall, Attending Staff - Department of Physical Medicine & Rehabilitation
Van Aman, Michael E., Attending Staff - Department of Radiology -- Division of Diagnostic Radiology
Zacher, Judith B., Attending Staff - Department of Surgery -- Division of Plastic Surgery
Petro, Vincent, Attending Staff - Department of Internal Medicine -- Division of Cardiology
Triozzi, Pierre L., Attending Staff - Department of Internal Medicine -- Division of Hematology/Oncology
Restuccio, Laura, Courtesy Staff - Department of Family Medicine
Scaperoth, Daniel D., Limited Staff - Department of Radiology -- Division of Radiation Oncology

Upon motion of Mr. Kessler, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

RESOLUTIONS IN MEMORIAM

Resolution No. 93-82

Synopsis: The Academic Affairs Committee recommended the approval of seven Resolutions in Memoriam.

RESOLVED, That the Board adopt the following Resolutions in Memoriam and that the President be requested to convey a copy to the families of the deceased.

Clarence Brown

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on January 18, 1993, of Clarence Brown, Instructor Emeritus in the Ohio State University Extension.

Mr. Brown was born May 18, 1900 in Logan, Ohio. He completed his B.S. in Agriculture in 1924 at The Ohio State University.

Mr. Brown began his Extension career in Ohio when he joined the faculty at The Ohio State University on June 16, 1934 as the County Agricultural Agent in Auglaize County. He held this position until his retirement on December 31, 1965.

Mr. Brown's contributions in providing excellent Extension educational programs during his career earned him the respect and admiration of his co-workers and associates throughout the state.
RESOLUTIONS IN MEMORIAM (contd)

Clarence Brown (contd)

On behalf of the University community, the Board of Trustees expresses its sympathy and understanding to his family as well as friends. It was directed that this resolution be inscribed in the minutes of the Board of Trustees as an expression of the Board's heartfelt sympathy.

Nathan S. Fechheimer

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on November 10, 1992, of Nathan S. Fechheimer, Professor in the Department of Dairy Science, a distinguished scholar and educator.

Professor Fechheimer's laboratory was the first in the world to enter into cytogenetic studies of farm animals. Dr. Fechheimer is consistently mentioned in cytogenetic laboratories throughout the world as the "master" of animal cytogenetics. There is no serious cytogenetic laboratory of farm livestock where his work is not known. Furthermore, many of his students attained distinction in human as well as animal cytogenetics which added to his fame.

After completing military duty as a Seabee Coxswain during WWII, Professor Fechheimer began his academic work at The Ohio State University, and completed his B.S., M.S., and Ph.D. degrees. He began his career as an instructor in the Department of Dairy Science and quickly advanced to the rank of Professor. He continued to serve The Ohio State University with distinction for 42 years until his death.

Dr. Fechheimer properly landed a NATO postdoctoral fellowship position at the University of Edinburgh shortly after being awarded his Ph.D. degree. This is important because Edinburgh, for many years, was the world's greatest and most venturesome center of activity in animal genetics. Subsequently, he was awarded Ford Foundation support for two more tours-of-duty at Edinburgh. He filled out his external professional experience by working a year at Jackson laboratory, Bar Harbor, Maine. Jackson Laboratory was surely the top center of biological genetics at the time in the U.S.A. It is no accident that Professor Fechheimer chose the best laboratories in the world to found his expertise in genetics and it is commendable that he was accepted in these laboratories.

Professor Fechheimer was affectionately regarded as "The Intellectual" of agriculture and was widely known throughout the campus. He served the American Association of University Professors (AAUP) in every office at The Ohio State University campus and on statewide committees where he staunchly defended academic propriety. He led his department, his college, and his university in science and in righteous academics. Recognition of his defense of academic freedom resulted in the Louis Nemzer Award at OSU in 1980 by the AAUP.

In the beginning, his teaching and research were in classical genetic studies of cattle. He explored the genetic etiology of coat color and color patterns. He began to investigate the causation of gross morphological abnormalities of calves. Through a comprehensive collection of data on all stillbirths and abnormalities reported to the two major artificial breeding cooperatives in Ohio during a five-year period, he was able to summarize genetic relationships to fetal deformities. It was this work which keyed him into consideration of the importance of embryonic death as a limiting factor in livestock production.

A new method was needed to pursue this compelling interest. Chromosome studies were only beginning to be reported for large animals and most work was done with squashed cells or serially
sectioned cells. The methods were crude. Professor Fechheimer began to explore cell culture and chemically spread metaphase cells to conduct chromosome studies. His discovery of an effective method led to the publication of the first published karyotype for swine. A hypotheses began to form in his mind which stated that chromosome imbalance is a factor in embryonic mortality.

Students began to discover Dr. Fechheimer as the rest of the world's animal geneticists took notice of his work. He had already worked as a postdoctoral fellow in the world's leading animal breeding center of the time - University of Edinburgh. Professor Fechheimer discovered from critical work on the Freemartin Syndrome of cattle (sterile female, twin to a bull) a hypothesis which was contrary to the widely accepted hypothesis of Lillie. His hypothesis held true. Precisely, he proved the syndrome was not solely due to testosterone dominance from the male twin but, rather, there was placental anastomosis of the twin embryos and primordial male germ cells migrated through the admixed blood to the female germinal ridge where sexual differentiation became confused and abnormal. More profoundly, this work laid the stage for the discovery of H-Y antigen on male (Y-type) sperm cells which has been the crux of sex determination studies and embryo sexing procedures which are so vital in today's science.

In need of a model animal for further exploration of his seminal concept regarding chromosome imbalance, Professor Fechheimer was attracted to the chicken. He found it to be a highly suitable vertebrate example and developed the studies into a wealth of fundamental discoveries. He and his students produced parabionts, chimeras, and twin studies in double-yolked eggs. He studied sex-ratio disturbances relative to age of sperm engaged in fertilization (hen only needs to be inseminated once a week to lay fertilized eggs every day). This was an important follow-up on the hypothesis for humans which predicts that Down's syndrome (trisomy-21) is factored by the aging mother but not by the father. Professor Fechheimer's work substantiated that hypothesis with another experimental design.

While working at Edinburgh on two occasions at about this stage of his career, he developed rabbit models for similar studies on chromosome imbalance related to embryo mortality. He joined Dr. Goodman of the pediatrics unit at OSU in establishing chromosome imbalance as a contributor to embryonic death in humans.

Returning to the chicken, Professor Fechheimer pursued studies of chromosome segments and their relationship to embryo vitality. He worked out the optimal x-ray dosage to produce the greatest yield of chromosomally aberrant live chicks. This gave him an abundant pool of material with which to conduct his studies. The dose delivered to rooster semen is best at 600r. This produces a 10% yield of chicks carrying chromosome defects large enough to see with the light microscope. The method, coupled with observation of a wide array of spontaneous mutations, permitted the resolution of the manner of parentage for chromosome defects known to kill embryos. He was able to pinpoint the origins of mutations that were initiated during or after germ cell formation, i.e., meiosis I or II, cleavage, etc. Professor Fechheimer and his students had gone far toward identifying important causal factors for chromosome aberrations which occur in a non-experimental environment. That is, broiler lines of chickens differ from laying lines and family clusters vary in mutational incidences. It was shown that translocations occur spontaneously at relatively high frequencies in some genetic backgrounds and these are not automatically eliminated by the reproductive screen. He was busy elucidating the factors that influence the maintenance and segregation of chromosome translocations.
RESOLUTIONS IN MEMORIAM (contd)

Nathan S. Fechheimer (contd)

Professor Fechheimer showed that genetically unbalanced spermatozoa do not have a reduced functional capacity. But, almost all genetically unbalanced embryos are destined to die. Although this is true, some can survive and influence species evolution through provision of redundant DNA. Much of this work has been derived from studied translocations of the Z chromosome in chickens where segment errors have been compared against various sex maldevelopment. Nate did not find disomic or nullisomic W chromosome imbalance and, therefore, was not able to resolve the effect of the W. Professor Fechheimer was the first to have recovered three triploid ZZZ males which proved to be infertile although they were functional. With his student, Bill Blazak, he demonstrated that autosome and X chromosome translocations of mammals render males infertile. On the contrary, they found this not to be true for chickens with a Z chromosome involvement. This work eliminated several prior hypotheses regarding causes of sterility in mammals.

Dr. Fechheimer established the response of X-rayed chicken spermatozoa to be linear for fertility and for incidence of chromosome breakage as seen in subsequent embryos. He continued extensive work to characterize translocations and the meiotic behavior of various chromosome segments involved in translocations. He found the centromeres from avian micro chromosomes do no perform normally on large chromosomes.

Professor Fechheimer presented invited lectures in Great Britain, France, Germany, Switzerland, Sweden, Spain, Hungary, U.S.S.R., and extensively throughout the U.S.A. Since Professor Fechheimer established the first laboratory in the world to do cytogenetics of domestic animals, it is not unexpected that he became the best known expert in that area. He was invited to Moscow, Russia, to do a symposium lecture at the 14th International Congress of Genetics in 1978. This led to an invitation to lecture for two weeks to the Academy of Sciences of the U.S.S.R. at the Institute of Cytology and Genetics at Novosibirsk. Collaborative research was developed there which led to two scientific research publications in both Russian and English.

He was an invited speaker, once as a keynote speaker, at three of the four European Colloquia on Cytogenetics of Domestic Animals, at two of the four North American Symposia on Cytogenetics of Domestic Animals, and at the two European Association of Animal Production Symposia on Cytogenetics. He was an invited speaker the only time the Symposium on Reproduction had a cytogenetics topic. Professor Fechheimer arranged, chaired, and summarized for publication the papers on cytogenetics for the 1st World Congress on Genetics Applied to Animal Production in Madrid in 1974. He was an invited lecturer and discussant at the Gordon Conference on Biotechnology and Quantitative Genetics in 1986. The Ohio State University presented him its highest academic performance award of Distinguished Scholar in 1986.

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in its loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.
RESOLUTIONS IN MEMORIAM (contd)

Arthur Raymond Mangus

The Board for Trustees of The Ohio State University expresses its sorrow upon the death on December 4, 1992, of Arthur Raymond Mangus, Professor Emeritus in the Department of Sociology and the Department of Agricultural Economics and Rural Sociology.

Arthur Raymond Mangus was born February 22, 1900 in Salem, Virginia. He received a Ph.D. in Sociology and Social Psychology from the University of Wisconsin in 1934. After completing the doctorate, Professor Mangus served as the Senior Research Supervisor on the staff of the United States Welfare Agencies in Washington, D.C. (1934-1939). He came to The Ohio State University in 1939 at the rank of Full Professor and joined the Emeriti ranks after thirty years (1969). He was a Visiting Professor at a number of major institutions such as the University of California, Berkeley; the University of Southern California, Los Angeles; Highlands University in New Mexico; and Inter-American University in Puerto Rico.

Professor Mangus's accomplishments mark a very distinguished career. In social psychology, medical sociology, family sociology, and rural sociology, he made major conceptual and methodological contributions. His Miami County (Ohio) study is one of the pioneering social science efforts in the field of mental health. He is credited as a founder of the specialty of medical sociology, having published an original paper entitled "Medical Sociology" in the Journal of Sociology and Social Research in 1955. Professor Mangus also received national recognition with the publication in 1940 of Rural Regions of the U.S., a widely used monograph of that period. Throughout his work, important consideration was given to the family institution. His publications and presentations at meetings of learned societies are numerous.

In describing Professor Mangus's impact on the field, there are a number of professional activities other than publications per se that deserve special comment. During the 1940's, he served as a social science consultant to the Ohio Department of Mental Health and as founder and director of the Ohio Mental Hygiene Society. In 1945, he spent three months as a social science consultant to the State of New York, during which time he was headquartered at Cornell University. Recognition of his research and community service in this area led to his appointment in 1951 to the position of Lecturer in Psychiatry and Research Sociologist at the University of California Medical School in San Francisco where he spent two years while on leave from Ohio State.

Excellence in instruction is yet another of Professor Mangus's important contributions. Many students benefitted from his tireless efforts in teaching and graduate advising. His scholarship together with his highly professional demeanor made him a particularly important role model for graduate students.

In August 1991, The Rural Sociological Society honored Professor Mangus by making him a Distinguished Rural Sociologist, or Fellow, of the Society.

On behalf of the University community, the Board of Trustees expresses to the family its deep sympathy. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.
RESOLUTIONS IN MEMORIAM (contd)

Charles C. Ritter

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on December 11, 1992, of Charles C. Ritter, Ph.D., Professor Emeritus in the Department of Theatre.

Born in Fredricksburg, Virginia, February 14, 1928, Professor Ritter received a bachelor of arts degree in 1951 from Mary Washington College of the University of Virginia, a master of arts degree in 1952 from the University of Florida, and a doctor of philosophy degree in 1956 from the University of Iowa. He served in the United States Navy from 1945 to 1947. Professor Ritter taught at Stetson University, Deland, Florida, for four years before joining the Department of Theatre at The Ohio State University in 1960. He taught in the department for 30 years, retiring in 1986.

During his teaching career he taught in numerous areas of theatre. He taught American theatre history on both the undergraduate and graduate level and served as Assistant Director of The Ohio State University Theatre Collection, which later became the Jerome Lawrence and Robert E. Lee Theatre Research Institute. Throughout his career he created and taught Theatre 100, Introduction to Theatre, a General Education Requirement course which continued over many years to be the highest enrolled freshman class at this University. Through this course he introduced thousands of young students to the arts and crafts of the theatre. He was awarded The Ohio State University Distinguished Teacher of the Year Award in 1970.

Professor Ritter directed over fifty productions during his years at Ohio State, each done with insight and stimulating imagination. He also had a distinguished career as an actor in university, community, and professional theatre. His memorable performances include Glengarry Glenn Ross, Galileo, The Lion in Winter, Richard II, Scrooge, and Golden Age Is All the Rage. He served on departmental, college, university, and national committees, carrying out in thoughtful and energetic action, their specific responsibilities.

His publications included The Lively Art of Theatre, Masterpieces of the Theatre, Introduction to Theatre Handbook, and Theatre 100 Outlines. He wrote many articles and reviews for regional and national theatre publications which reflected his life-long research and writing in theatre history and criticism.

On behalf of the University, the Board of Trustees expresses to the family its deepest sympathy and sense of understanding in their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Lewis C. Saboe

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on January 4, 1993, of Lewis C. Saboe, Professor Emeritus in the Ohio State University Extension.

Dr. Saboe was born December 2, 1907, in Willow Lake, South Dakota. He completed his B.S. in 1931 at South Dakota State College, the M.A. in 1940 at the University of Minnesota, and the Ph.D. in 1942 from the University of Minnesota.

Dr. Saboe began his Extension career in Ohio when he joined the faculty at The Ohio State University in 1955 as an Extension Agronomist. He held this position until his retirement on December 31, 1968.
February 4, 1993 meeting, Board of Trustees

RESOLUTIONS IN MEMORIAM (contd)

Lewis C. Saboe (contd)

Dr. Saboe's contributions in providing excellent Extension educational programs, writing numerous Extension and popular articles on crop improvement and crop production during his career earned him the respect and admiration of his co-workers and associates throughout the state and nation.

On behalf of the University community, the Board of Trustees expresses its sympathy and understanding to his family as well as friends. It was directed that this resolution be inscribed in the minutes of the Board of Trustees as an expression of the Board's heartfelt sympathy.

Helen D. Terrill

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on December 24, 1992, of Helen D. Terrill, Associate Professor Emeritus of the Ohio State University Extension.

Professor Terrill was born November 7, 1907, in Bellefontaine, Ohio. She completed her B.S. in home economics in 1933, and the M.S. in home economics in 1939 at The Ohio State University.

Helen Terrill began her Extension career in Ohio when she joined the faculty at The Ohio State University in 1951 as a Home Demonstration Agent in Hardin County. She remained this position until her retirement on September 30, 1972.

Miss Terrill's contributions in providing excellent Extension educational programs during her career earned her the respect and admirations of her coworkers.

On behalf of the University community, the Board of Trustees expressed its sympathy and understanding to her family as well as friends. It was directed that this resolution be inscribed in the minutes of the Board of Trustees as an expression of the Board's heartfelt sympathy.

Ilse E. Wilhelmi

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on January 5, 1993 of Ilse Emma Wilhelmi, Assistant Professor Emeritus in the University Libraries.

Ilse Wilhelmi was born on October 20, 1894 in Lawrence, Kansas. She received her B.A. from the University of Kansas, 1917, and her B.S.L.S. (Master's degree in library science) from Columbia University in 1929.

Professor Wilhelmi had been associated with the library field for forty-three years of which thirty-four were as Supervisor of Department Libraries at Ohio State. Prior to receiving her library degree, Professor Wilhelmi worked in the library system at the University of Kansas. From 1921 to 1928 she held positions in the Acquisitions Department, the Medical Library, and the Science Room. She left Kansas to obtain her library degree and returned to Kansas to become their serials librarian, a positions she held for two years before coming to Ohio State University Library on March 24, 1931.

When Professor Wilhelmi arrived in Columbus, Ohio State had eleven established department libraries with a total collection of 176,000 volumes. When she retired in June 30, 1965 she was supervising 21 department libraries with a total collection of 516,000 volumes and a library staff which had more than doubled in numbers. Professor Wilhelmi was devoted to her work and cheerfully carried the burden of staffing and maintaining service in department libraries under many
RESOLUTIONS IN MEMORIAM (contd)

Ilse E. Wilhelmi (contd)

adverse times as the Great Depression, World War II, and the rapid expansion after the war. Professor Wilhelmi had to deal with budget crises, flood, fires, snow storms, flu epidemics, and numerous and constant vacancies. Because of her dedication, charm and friendly personality, Professor Wilhelmi developed strong department libraries and made many friends among the faculty and the library staff.

In addition to maintaining her duties, Professor Wilhelmi was very active in many professional organizations. Among these were the American Library Association, Special Libraries Association, Ohio Library Association, Ohioana, Franklin County Library Association (President), and the Library Division of the Ohio College Association. She was also an active P.E.O. and Kappa Alpha Theta.

On behalf of the University, the Board of Trustees expresses to her family its deep sympathy and sense of understanding in their loss. It was directed that this resolution be inscribed upon the minutes of the board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

FISCAL AFFAIRS COMMITTEE REPORT

Mr. Shumate:

Our first item of business this morning is a report on the mid-year budget review by Vice President Shkurti.

Mr. Shkurti:

Thank you, Mr. Chairman. The Mid-Year Budget Review is essentially updating you on where we are in the $7.5 million short fall. There is also an item in your Board books on areas where we think the University is making progress, and the challenges ahead. I went over that in detail with the Fiscal Affairs Committee, so I will not go over it in detail at this point.

(See Appendix XIX for chart on Mid-Year Budget Review and a chart on the Second Quarter Report, page 517.)

--0--

$7.5 MILLION REDUCTION

Mr. Shkurti:

The appropriate resolution is in your Board books under the Tab Budget. You may recall in July we absorbed the $25.5 million in the reductions to the General Fund and our plan for absorbing that at that time included the abolishment of 1,000 jobs, a pay freeze on most faculty, staff, and student employees for this year, and the nine percent tuition increase for our students.
Although none of these items were desirable, we felt that they were necessary to keep the University on an even financial keel. Despite the reduction in resources, we struggled to protect the academic core in key services to our students. And even despite the loss in income during this academic year, the number of courses closed to our students is down, and the number of research dollars brought in from the federal government and other sources to the State of Ohio through the efforts of our researchers is up. The quality of our incoming students, in terms of their level of preparation, is up and the number of minority students recruited, although retention is still an issue, is also up. So I feel that we have done better with less, despite a very adverse set of circumstances, and that our priorities are in order.

So the challenge for us, even though we took the $25.5 million in July, was another $7.5 million to make up between July and mid-year. That is the resolution that is in front of you today. We think that we have been able to come up with a plan that allows that reduction in income to be absorbed in the institution. Although it is not being done without pain, it is being done without injuring further the academic core or putting an unfair burden on our students. The way we propose to do that is to look at either revenue increases or budget reductions in four areas: 1) administration of benefits; 2) revenues exclusive of tuition; 3) consolidation of various academic support units, without reducing services to faculty and students; and 4) reprogramming of central funds to higher priority needs.

Savings in these particular areas were recommended by six different work groups chaired by either vice presidents or senior faculty in the University. Those recommendations and proposals have been shared widely with the University community over the last two months, including: all of the vice presidents as part of the Executive Committee, all of the deans, the University Senate Fiscal Committee -- which includes faculty, staff, and student members, the University Priorities Committee, the Staff Advisory Committee, the Faculty Compensation and Benefits Committee, the Diversity Committee, and a variety of student groups. So, I think that we have met the Board's objective in having wide spread consultation on these issues. And I want to stress, although this is not a plebiscite on how we do budgets, we do feel that we have had wide consultation. All these groups are in support of the objectives laid out in the $7.5 million reduction -- which is to absorb this without doing damage to the academic core and damage to our students.

The specific proposals are listed in the attachment in your Board book, and they have been discussed quite widely. I will not go into the specific proposals, but simply explain that we have divided those, and the recommendations that went from the Provost and I to the President, and the recommendations the President has accepted and put on to you. Those four categories are first: items that we proceed with immediately, that we feel have been aired out, make sense, and that we ought to go forward with. Those items add up to an estimated $7.7 million for this year, which means with their adoption we have a balanced budget for fiscal year 1993. And on a continuing basis, would yield about $5.4 million, which would get us a long way towards the $7.5 million of permanent savings that is required in the future.

The second category are those recommendations that we feel have a great deal of merit, but also need some additional exploration and work over the next 60-90 days.
Mr. Shkurti: (contd)

To do some refining and possibly identify alternatives or where there might have been concern expressed which we feel is legitimate from the various groups we consulted with. Those will total $2.2 million, if all of them are adopted, in continuing savings, and would add up then to $7.6 million on a continuing basis, with the other $5.4 million if adopted. Again, what we are recommending to you is that we take another 60-90 days to further explore those before coming back with a final decision.

The third group of recommendations are two that we recommend not to proceed with immediately. It involves canceling one or more commencements, and restructuring the way we do fee authorizations. Our feeling in the area of commencement was that 83 percent of the students who are eligible to attend commencement do so. We felt that for the money involved -- and even that was questionable, because if we didn't have commencement we still had to mail diplomas -- it would simply not provide a savings that would be worth it in terms of the loss and the feeling of community and pride from the students and their faculty. On fee authorizations we simply feel more time is needed to work through that system very carefully. We need to make sure we do not unintentially adversely affect graduate students and other students on fee waivers.

The fourth area are two recommendations that we recommend be held in reserve in the case the other recommendations do not raise quite as much money as needed. They will be held only as the last resort, and include an across-the-board cut of one percent to all academic support units headed by vice presidents and all college offices, but not instructional units and departments. We simply ask that this be held in reserve as a trigger in case we run short in the other areas. But our preference will be to come up with itemized reductions or revenue increases for the full $7.5 million.

So in conclusion, let me stress, again, that we have had a very severe reduction in income, but that we have reprioritized the income that we have left to protect the academic core. Our goal is to continue to do that in the sense of the priorities that we've established earlier in the year. Let me also express my appreciation to the 36 students, staff, faculty, and senior administrators who served on the various work groups that came up with the initial recommendation.

Mr. Chairman, I would be glad to attempt to answer any questions any one may have.

Mr. Shumate:

Are there any questions? This information was previously mailed to members of the Board and fully discussed at the Fiscal Affairs Committee. If there are no questions, I will move for adoption of the resolution.
February 4, 1993 meeting, Board of Trustees

FISCAL 1992-93 BUDGET ADJUSTMENTS

Synopsis: This resolution outlines the authorization necessary to implement budget reductions and revenue enhancements to balance the FY 1993 General Funds Budget.

WHEREAS the Columbus Campus is projected to have a $7.5 million shortfall in the Fiscal Year 1993 General Funds Budget; and

WHEREAS it is necessary for the Columbus Campus to make sufficient annual rate budget adjustments to ensure that the General Funds Budget is in balance by the end of the 1993 Fiscal Year; and

WHEREAS it is the goal of the University to achieve these reductions without further annual rate adjustments to the budgets of instructional units and core student services; and

WHEREAS the University administration established work groups in six areas (Benefits Administration, Fee Authorizations, Revenue Increases, Central Funds, Academic Support Units Reporting to the Provost and other Academic Support Units) to study and make recommendations on ways to balance the budget; and

WHEREAS the results of those recommendations have been compiled, debated and evaluated by the various University governing bodies and the President's Executive Committee:

NOW THEREFORE

BE IT RESOLVED, That the Administration be authorized to implement the General Funds Budget adjustments outlined in Section A of the attachment; and

BE IT FURTHER RESOLVED, That the University will conduct additional evaluation on those items contained in Section B of the attachment, and be authorized to implement those annual rate adjustments that are determined to be prudent in addressing the budget shortfall; and

BE IT FURTHER RESOLVED, That the President be authorized to implement any necessary budget reductions to Academic Support Units and College Administrative Offices, to ensure that the sum of the actions outlined in this resolution result in a $7.5 million annual rate budget reduction to the General Funds Budget by no later than June 30, 1993.

Upon motion of Mr. Shumate, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix XX for $7.5 Million Savings Plan and Supporting letter from William M. Mercer, Co., page 521.)

WAIVERS OF COMPETITIVE BIDDING REQUIREMENTS
OCTOBER-DECEMBER 1992

Synopsis: Acceptance of the quarterly report on waivers of competitive bidding requirements is proposed.
WAIVERS OF COMPETITIVE BIDDING REQUIREMENTS
OCTOBER-DECEMBER 1992 (contd)

WHEREAS the Purchasing Policy of The Ohio State University, adopted by the Board of Trustees on September 7, 1984, and revised on February 7, 1992, provides that the President and/or Vice President for Business and Administration may grant a waiver from competitive bidding in the event of an emergency, when a sufficient economic reason exists, or when the goods or services can be purchased from only a single source, with a report on such waivers to be made quarterly to this Board; and

WHEREAS the Vice President for Business and Administration has submitted a report on waivers of competitive bidding requirements granted for the period of October-December 1992; and

WHEREAS during the period covered, the Vice President for Business and Administration, at the requests of the departments making the purchases and upon the recommendation of the Purchasing Department, granted 29 waivers of competitive bidding requirements for annual purchases totaling approximately $1,997,500.00:

NOW THEREFORE

BE IT RESOLVED, That the report on waivers of competitive bidding requirements for the period of October-December 1992, is hereby accepted.

Upon motion of Mr. Shumate, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix XXI for background material, page 525.)

EMPLOYMENT OF ARCHITECTS/ENGINEERS
Resolution No. 93-85

COLLEGE OF BUSINESS FACILITIES

Synopsis: The Fiscal Affairs Committee recommended authorization to employ architects/engineers for the College of Business Facilities.

WHEREAS the University desires to employ an architectural/engineering firm to provide schematic design, design development, construction documents, and contract administration for an anticipated two phases of construction consisting of undergraduate and graduate classrooms, offices, library, auditorium, meeting facilities, and related support space for the College of Business; and

WHEREAS the total estimated project cost is $62,000,000.00 in 1991 dollars ($67,000,000.00 in 1993 dollars), and the total estimated construction cost is $48,000,000.00 in 1991 dollars ($52,300,000.00 in 1993 dollars), with funding to be provided from private donations and future State capital appropriations anticipated in the 1995-96 and 1997-98 biennia:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to select qualified architectural/engineering firms as necessary for this project and that the fees for these services be negotiated between the firms selected and State of Ohio Department of Administrative Services, Division of Public Works.
EMPLOYMENT OF ARCHITECTS/ENGINEERS (contd)

Upon motion of Mr. Shumate, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

UNIVERSITY AIRPORT GUIDANCE SIGNS

Synopsis: The Fiscal Affairs Committee recommended authorization to employ architects/engineers and request construction bids for the University Airport Guidance Signs project.

WHEREAS the University would like to proceed with the installation of Airport guidance signs and associated pavement markings in accordance with the FAA approved sign plan; and

WHEREAS this project also would include the performance of an Airport boundary survey; and

WHEREAS the total estimated project cost is $550,000.00, and total estimated construction cost is $450,000.00; with anticipated funding provided by a Federal Aviation Administration grant ($495,000.00) and University Airport funds ($55,000.00):

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to select qualified architectural/engineering firms as necessary for this project and that the fees for these services be negotiated between the firms selected and The Ohio State University; and

BE IT FURTHER RESOLVED, That the President and/or Vice President for Business and Administration be authorized to request construction bids on this project in accordance with established University procedures, and if satisfactory bids are received, to award contracts, with all actions to be reported to this Board at the appropriate time.

Upon motion of Mr. Shumate, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

REQUEST FOR CONSTRUCTION BIDS

MARION REGIONAL CAMPUS - EARLY CHILDHOOD LABORATORY
DOAN HALL WEST - TRASH COMPACTOR RENOVATIONS
MENDENHALL LABORATORY RENOVATION

Synopsis: The Fiscal Affairs Committee recommended authorization to request construction bids for the listed projects.
February 4, 1993 meeting, Board of Trustees
REQUEST FOR CONSTRUCTION BIDS (contd)

MARION REGIONAL CAMPUS - EARLY CHILDHOOD LABORATORY
DOAN HALL WEST - TRASH COMPACTOR RENOVATIONS
MENDENHALL LABORATORY RENOVATION (contd)

WHEREAS the University desires to proceed with the renovation of the University-owned "McDonald's Restaurant" building adjoining the northwest corner of the main Marion Regional Campus property to house the program for student training in the area of child care and services; and

WHEREAS the total estimated project cost is $325,000.00, and the total estimated construction cost is $265,000.00; with funding provided by the Marion Regional Campus; and

WHEREAS University Hospitals desires to proceed with the installation of an additional trash dumping facility adjacent to the existing trash compactor, excavation for a new concrete ramp, and construction of a new concrete wall to screen the new and existing trash compactors; and

WHEREAS the total estimated project cost is $190,000.00, and the total estimated construction cost is $165,000.00; with funding provided by University Hospitals; and

WHEREAS the University desires to proceed with the interior renovation and addition to Mendenhall Laboratory to house Geological Sciences, including offices, classrooms, and research laboratories; and

WHEREAS the total estimated project cost is $14,861,000.00, and the total estimated construction cost is $11,880,000.00; with funding provided by Senate Bill 381 ($10,244,000.00), House Bill 904 ($4,417,000.00) and central University funds ($200,000.00):

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to request construction bids on these projects in accordance with established University procedures, and if satisfactory bids are received, to award contracts, with all actions to be reported to this Board at the appropriate time.

Upon motion of Mr. Shumate, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix XXII for map, page 527.)

REPORT OF AWARD OF CONTRACTS AND
ESTABLISHMENT OF CONTINGENCY FUNDS
Resolution No. 93-88

ROBINSON LABORATORY - BALCONY REMODELING
ROBINSON LABORATORY - ELEVATOR REPLACEMENT
OARDC - THORNE AND GOURLEY RENOVATION
MARION REGIONAL CAMPUS - HVAC CONTROL SYSTEM
PAGE HALL - ROOF REPLACEMENT
WISEMAN HALL - MEDICAL RESEARCH FACILITY
STARLING-LOVING - CONTINUING MEDICAL EDUCATION RENOVATION
STORM SEWER SEPARATION, PHASE I
KEPLER CLUBHOUSE MODIFICATIONS

Synopsis: Acceptance of the report of award of contracts and the establishment of contingency funds for the listed projects is recommended.

WHEREAS resolutions adopted by the Board of Trustees on October 5, 1990, December 6, 1990, June 7, 1991, February 7, 1992, and April 3, 1992 authorized the President and/or Vice President for Business and Administration to request construction bids in accordance with established State of Ohio and University procedures, and if satisfactory bids were received to award contracts for the Robinson Laboratory - Balcony Remodeling, Robinson Laboratory - Elevator Replacement, OARDC - Thorne and Gourley Renovation, Marion Regional Campus - HVAC Control System, Page Hall - Roof Replacement, Wiseman Hall - Medical Research Facility, Starling-Loving - Continuing Medical Education Renovation, Storm Sewer Separation, Phase I, and Kepler Clubhouse Modifications projects:

NOW THEREFORE

BE IT RESOLVED, That pursuant to the actions previously authorized by this Board, the report of award of contracts and establishment of contingency funds for these projects is hereby accepted.

Upon motion of Mr. Shumate, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix XXIII for background and maps, page 529.)

--0--

Ms. Pichette:

This proposal is for an alternative way to handle those capital projects under $1 million. In response to the concerns the Board has raised over the resolution, we are recommending today a resolution to provide authorization for the University to proceed only with those projects identified on the list accompanying the resolution. At the end of the year, we will then submit for your approval a report on these projects. These projects total about $15.1 million, and I would emphasize that we will let you know if any project on the list exceeds $1 million. Because this is our first attempt on this new process, we will be refining it during the year, and may need to revise the list for your review at a later meeting.
AUTHORIZATION FOR CAPITAL IMPROVEMENT PROJECTS
Resolution No. 93-89

Synopsis: Approval of report covering anticipated list of capital improvement projects (setting forth the estimated costs of each project) at less than $1,000,000.00 and a request for authorization for the administration to proceed with these projects subject to subsequent Board ratification are proposed.

WHEREAS consistent with the Board of Trustees fiduciary duty regarding oversight and approval, the delegation of authority to proceed with projects specified in the attached list is designed to expedite the University's ability to move forward with capital projects on a timely basis and to ensure the most effective use of University resources; and

WHEREAS the Board has received the attached listing of capital improvement projects estimated at a total project cost of less than $1,000,000.00 that are anticipated and/or scheduled to be undertaken during 1993, subject to scheduling and funding availability; and

WHEREAS the President has recommended that the Administration be permitted to undertake, in accordance with established procedures, those listed capital improvement projects without additional Board authorization of each such project:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized, without any additional authorization or approval from this Board being necessary, to select qualified architectural and/or engineering firms as necessary, with the fees for these services to be negotiated between the firms selected and the Department of Administrative Services, Division of Public Works, or the University, as appropriate, and to request construction bids in accordance with established University and/or State of Ohio procedures, as appropriate, and if satisfactory bids are received, to award contracts, or as appropriate to recommend the award of contracts to the Department of Administrative Services, for any capital improvement project on the attached 1993 listing of projects estimated at less than $1,000,000.00; and

BE IT FURTHER RESOLVED, That the President and/or Vice President for Business and Administration shall report as appropriate to the Fiscal Affairs Committee any such project undertaken pursuant to this authorization in which the total actual project cost exceeds $1,000,000.00 and shall present to this Board an annual report on capital improvement projects completed, under construction, or in planning or design during 1993, including a written report to the Fiscal Affairs Committee of this Board on all contracts awarded pursuant to this authorization.

Upon motion of Mr. Shumate, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix XXIV for list of projects, page 553.)

--0--

Ms. Tom:

We are asking the Board to approve the revisions to the Non-Smoking Policy, and you have a resolution in your materials. Essentially, there are two changes that are included here: 1) that the University becomes a non-smoking campus, which means that there will be no smoking in the buildings in either private offices or designated areas; and 2) there will be no smoking in the Stadium and the Arena.
February 4, 1993 meeting, Board of Trustees

Ms. Tom: (contd)

By way of background, let me just go back to 1987. In 1987 the Board approved a resolution which established the University's Non-Smoking Policy. That Policy indicated that there would be no smoking in buildings, but made allowance for smoking in private offices and designated areas -- the Stadium and Arena were not included.

A committee was set up in accordance with that policy to review the status of this provision in 1991. It was chaired by Dr. Steve Loebs, who is here today, from the College of Medicine. The committee made its recommendation in March 1992 and the recommendation is shown in the resolution which, to repeat, just indicates that there will be no smoking now at all in any of our buildings and the Stadium and the Arena will be included. The policy itself has gone through extensive consultation, in terms of our Senate Committee's employee forums.

I need to indicate that this is a very emotional issue and we have had people indicate their positions in many ways. But the rationale for the change is that the body of medical evidence supports the conclusion that environmental tobacco smoke is a hazard to human health. So this is a health issue that affects all members of the University community, our faculty, staff, students, and visitors. That is the rationale for this change in policy.

I would be pleased to take any questions, or Dr. Loebs is here that he can respond to any questions as well.

NON-SMOKING POLICY

Resolution No. 93-90

Synopsis: A change in the University's non-smoking policy is proposed.

WHEREAS the University recognizes the need to create and maintain an environmental quality that sustains and enhances the general health of its faculty, staff, students, and visitors; and

WHEREAS in furtherance of this commitment, the University recognizes the need to modify its present smoking policy as set forth in The Ohio State University Operating Manual, Number 7.20 and in Faculty Rule 3335-13-02 in an effort to reduce the level of environmental contaminants produced by smoking; and

WHEREAS in addressing this question the University should seek to accommodate the needs of its faculty, staff, students, and visitors through the adoption of a comprehensive policy statement; and

WHEREAS the University has considered a report from the Committee established to review the University Non-Smoking Policy which solicited opinion and other information from the University community, its various governance groups, and other comparable institutions on the issue of smoking, which study has been reviewed by University administrative personnel who have made their own independent assessment:

NOW THEREFORE
NON-SMOKING POLICY (contd)

BE IT RESOLVED, That Number 7.20 of the Operating Manual be amended and that the non-smoking policy in the form as attached hereto as Appendix XXV, be adopted effective July 1, 1993 and the revised policy shall be published as Number 7.20 of the Operating Manual; and

BE IT FURTHER RESOLVED, That as a part of the general health promotion programs of the University, voluntary smoking cessation services for faculty, staff, and students will continue to be made available.

Upon motion of Mr. Celeste, seconded by Mr. Shumate, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

(See Appendix XXV for background, page 557.)

REPORT - UNIVERSITY’S CASH AND INVESTMENTS
Resolution No. 93-93

RESOLVED, That the report on the University's Cash and Investments, dated December 31, 1992, as submitted to the Investments Committee of the Board of Trustees, be received and filed with the official records of the Board.

--0--

Thereupon the Board adjourned to meet Friday, March 12, 1993, at The Ohio State University Hale Black Cultural Center, Columbus, Ohio.

Attest:

Madison H. Scott       John J. Barone
Secretary              Chairman
Columbus, Ohio, March 12, 1993

The Board of Trustees met at its regular monthly meeting on Friday, March 12, 1993, at The Ohio State University Hale Black Cultural Center, Columbus, Ohio, pursuant to adjournment.

**                                    **                                    **

Minutes of the last meeting were approved.

**                                    **                                    **
March 12, 1993 meeting, Board of Trustees

The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on March 12, 1993, at 10:30 a.m. He requested the Secretary to call the roll.

Present: John J. Barone, Chairman, Deborah E. Casto, John W. Kessler, Milton A. Wolf, Alex Shumate, Theodore S. Celeste, Michael F. Colley, George A. Skestos, Kristen Cusack, and Hiawatha N. Francisco, Jr.

---0--

PRESIDENT'S REPORT

President Gee:

Ladies and gentlemen, I am pleased that we could all be here together today and I am delighted that we are meeting in the Frank W. Hale Jr. Black Cultural Center. I particularly want to thank Vice Provost for Minority Affairs David Williams for his support and effort in allowing us to have these accommodations available; and Larry Williamson, Director of the Center, who does a remarkable job. Not only does Larry run the center, but he has taken on an extra responsibility of working with our movable art displays which appear on a regular basis in Bricker Hall. Again, thanks to Larry and everyone. We are terribly sorry that we disrupted your day. This is a place that is ordinarily filled with students, but nonetheless we appreciate the opportunity to be here today. A feature of this center, for which Ohio State receives much community recognition, is a very active program of exhibitions as I indicated to you. They add significantly to this campus and to the quality of life for all of our students.

Today, I am happy to report to this Board a number of significant honors and awards Ohio State has captured over the past few weeks. Dr. Harald Vaessin, assistant professor of molecular genetics, has just been awarded the Sloan Research Fellowship, one of the most prestigious awards for researchers in North America. Only 90 such awards were given this year. Professor Vaessin is doing basic research on the nervous system of the fruit fly. [I'm not going to make any jokes about that, but I have often wondered what makes the fruit fly nervous!] His basic research on the development of the nervous system can possibly help us understand the same process in vertebrates as well. He teaches the core graduate course in developmental biology.

And, let me add that he has been at Ohio State just one year. He joined our faculty because of the outstanding reputation of our biotechnology program and our distinguished faculty in the area of molecular biology. And, Joan, I might add that this is a good example of how five or six years ago we invested in creating a biotechnology program and now we are attracting the type of faculty members that are joining us. I think this is something that we can take pride in and we ought to use this as yet another example of the investment policy that we are making in this University.

Ohio State's faculty in family relations and human development have received national attention for the A. Sophie Rogers Laboratory for Child and Family Studies in the College of Human Ecology. This laboratory pre-school program was cited in Education Week magazine as one of the nation's most successful in using a flexible preschool curriculum that fosters creativity and involvement in children under 5 years of age. The Rogers preschool program is an excellent example of the
President Gee: (contd)

synergy of teaching and research as it trains undergraduates as teachers and provides a setting for graduate research in early childhood development and education. I happen to know that it is a wonderful program. I don't know if David Williams is here, but I know that his daughter, Samantha, is in that program and he was telling me about it the other day.

I am also pleased to report that Dr. Michael Para, professor of internal medicine and professor of medical microbiology and immunology, has been named national co-chair of the Phase I and II Working Groups of Health Professionals who are formulating research and scientific priorities for fighting the HIV virus. Dr. Para assumes a critical leadership role in the national initiative to identify and approve new anti-HIV treatments. And as we all know, Michael is one of the leading researchers in this area in the country and has brought distinguished activities to this University.

Outstanding faculty, such as those I have just mentioned, are important in attracting very talented students to this university. Last week, the University Honors Center hosted more than 600 high school seniors -- students in the top 3 percent of their class -- in competition for 10 presidential and 40 medalist scholarships. Each of these students has already been designated a University Scholar. They spent two hours responding to essay questions. The day was designed to allow the students to interact with faculty and current students informally at meals, and by visiting classes, laboratories, and centers. Many faculty members assisted in this recruitment effort. Professor David Hothersall, director of the University Honors program, informed me that this year, nearly 80 percent of the students invited to be part of this top Ohio State scholarship competition participated, coming from 18 states, including one student from Hawaii.

Last evening, several members of this Board had the opportunity to meet some of the exceptional undergraduate students. And those of us that were there were truly impressed. I know we were all impressed with the range of their academic interests and co-curricular involvements, the energy and activity that they are bringing to this institution. As we noted last evening, from conducting senior thesis research in Senegal to creating drug and steroid education programs for youth, these students reflect the breadth of the institution and contribute significantly to its quality.

I want to announce that Kate Mueller who was with us last night, a sophomore from Altamont Springs, Florida, has been named a National Endowment for the Humanities Younger Scholar. Only 82 students across the country received this honor as the most promising undergraduates in the humanities. Kate is working with Professor Dan Farrell in the Department of Philosophy.

Just last Monday, USA Today announced that William Taylor, a student in the College of Business, finished fourth in the nation in the AT&T Collegiate Investment Challenge. Between November and March, he turned an imaginary $500,000 into $1.1 million, finishing only $100,000 behind the winner. The members of this Board might be interested to know that William has not yet taken the finance department investment class -- but I suspect, Mr. Ambassador, he is going to be highly recruited for that class!
PRESIDENT’S REPORT (contd)

President Gee: (contd)

Rex Holman, a senior in business from Upper Arlington and Kevin Randleman, a junior in Arts and Sciences from Sandusky, both are Big Ten Champion wrestlers. The Big Ten Diver of the Year is Yoshi Sakata, a physical education major who came to Ohio State from Tsukuba, Japan. He came here by the way to work with the Big Ten Diving Coach of the Year, Vince Panzano. Add to these accomplishments, the Big Ten Indoor Track title we won this last week. By the way with some small caveat note — the last time we won the conference title indoors, Howard Bevis was president of the university! And, of course, I must mention how proud we are of the women's basketball program. Our winter sports programs are entering NCAA competitions over the next few weeks, and we look for big things from them.

Finally, I want to report that yesterday and later today, I have the pleasure of invading the classrooms of some of our very best and brightest faculty, completely by surprise again, to award them either the Alumni Award for Distinguished Teaching or the Distinguished Scholar Award. By next Tuesday, we will have notified the 14 winners in this way. From History 152 to Agricultural Education 631, the students have enjoyed these occasions to honor outstanding teaching and scholarship.

I would just add a caveat to that, Mr. Chairman. Yesterday, I went into the Agricultural Education building to give an outstanding teaching award to one of our young faculty members. There were two young people standing out in the hallway and this woman asked me, “What are you doing?” And I whispered, “I am here to give a teaching award.” And she said, “To whom?” When I mentioned the name, she absolutely screamed. It turned out that she was the one I was giving the award to. She slipped down the hall to confer with her students. It was a surprise to her and I had not had anyone scream like that before, but it was great fun. Mr. Chairman, this completes my report.

--0--

REPORT ON THE JAMES CANCER HOSPITAL

Mr. Barone:

At this time I would like to call on Dr. David Schuller, for a report on the James Cancer Hospital.

Mr. Kessler:

Mr. Chairman, before Dr. Schuller starts, I would like to mention to the Board that several years ago when Shirley Bowser or Joel Teaford was Chairperson, we set up the Oversight Committee of the Cancer Hospital Board. John Barone and I have had the pleasure of representing this Board on that Oversight Committee since its inception. I must tell all of our Board members, particularly our newer Board members, that several years ago if you would have asked us what our major concern of the University is as Board of Trustees it would have been the Cancer Hospital.
REPORT ON THE JAMES CANCER HOSPITAL (contd)

Mr. Kessler: (contd)

It is with great pride that -- if I may John -- on behalf of John Barone and myself, compliment Dennis Smith, Dave Schuller, and the whole staff for the wonderful job they have done. From the nurses to the staff who admit the patients, we are very, very proud of what they have done -- not only Central Ohio, but for the whole midwest region -- in setting up this Comprehensive Cancer Hospital at Ohio State University. I also must add that we are connected with the University Hospitals, and the cooperation between the two institutions is wonderful. I am real proud to mention this because we think Dave, Dennis, and the whole staff have done just a great job.

Mr. Barone:

I have to say that back then Trustee Kessler was not smiling the way he is this morning. I think it reflects the fact of the fine job that you, the associates, and doctors have done not only in the James Cancer Hospital, but the University Hospitals. I personally also wish to congratulate you, Dr. Schuller, and Mr. Smith as well. I think the success is self-evident.

Dr. David Schuller:

Thank you very much for your kind comments and I appreciate the opportunity to come and give you an update this morning. The Cancer Hospital is now in its third year of operation. I would like to mention, for those new on the Board, that even though we do work closely with University Hospitals, this facility has a direct reporting relationship to the President and the Board independent of University Hospitals. This organizational model was necessary so that it qualified for an exemption from the Medicare Prospective Payment System as described by the healthcare finance administration. The University Trustees Oversight Committee is the Hospital's governing board, with Trustees Barone and Kessler serving as its members. Mr. Kessler currently serves as Chair of the Oversight Committee.

The first year of operation produced a $10 million loss, which was slightly in excess of what the original financial projections predicted, and this was partially explained by the six-month delay in opening as the result of the water pipe breakage. The second year of operation brought substantial improvement with a loss that was considerably less than what was originally projected. Now in the third year, we hope to at least break even. In the first half of this '92-'93 fiscal year, the Hospital is surpassing all income projections. Assuming a similar level of activity for the second half of this fiscal year, it is projected that net revenue will exceed expenses at the end of this fiscal year of operation. We are achieving that goal some two years earlier than the original financial projections.

At each of its meetings, the Oversight Committee receives reports on continuous quality improvement that assess all aspects of patient care and the quality of service provided our patients. A means of assessing this satisfaction has been developed by University Hospitals’ administrative personnel, which is now being used in the Cancer Hospital. Every patient admitted to the James Cancer Hospital or seen in the Ambulatory Oncology Center has an opportunity to complete a patient satisfaction survey. The Hospital continues to receive high scores in areas of patient satisfaction that include the patients’ assessment of their overall stay, as well as their extreme satisfaction with nursing and physician care.
REPORT ON THE JAMES CANCER HOSPITAL (contd)

Dr. Schuller: (contd)

We are now in the implementation phase of our strategic plan which was completed approximately one year ago. A number of objectives and goals outlined by this strategic plan have already been attained in these past six months. These objectives include the successful opening of another 17-bed unit within the Cancer Hospital, bringing a total number of staff beds to 123. Based on the number of patient beds, the James Cancer Hospital is now the fifth largest of the exempt cancer hospitals in the United States. We have worked jointly with University Hospitals and entered into affiliation agreements with six regional community hospitals. The Cancer Hospital is currently in the process of implementing a state-wide library contact program which brings cancer educational materials to the citizenry of Ohio, and has also initiated a program with Block Buster Video to create cancer educational video tapes for free distribution at all Block Buster Video stores nationwide.

The Comprehensive Cancer Center, the James Cancer Hospital and Research Institute, is one of only nine centers to receive national cancer institute funded feasibility grants to establish a brain tumor research center. We are working with the leaders of that program to develop interdisciplinary, ambulatory, and in-patient care programs. The Oversight Committee has recently approved $450,000 to attain a stereotactic radiosurgery unit, which will expand the treatment capabilities of the clinician investigators in this brain tumor program. We recognize the importance of rehabilitation of our patients and accordingly have established a multidisciplinary comprehensive rehabilitation team. This group has been charged with developing a program that will meet all of the rehabilitative needs of our patients, as well as address the issues of how we might proactively deal with minimizing the morbidity associated with the disease and its treatment.

The Comprehensive Cancer Center is the organizational framework that includes more than 200 faculty members involved with cancer research from eleven different colleges. A considerable amount of the basic research as well as all of the clinical research is housed within the James Cancer Hospital and Research Institute. The Comprehensive Cancer Center has recently been notified that it has received a fundable priority score for the construction of additional cancer laboratories juxtaposed to the existing cancer labs on the third and fourth floors of Wiseman Halls. However, there are currently no funds for distribution in the National Cancer Institute budget to make this award. We are hopeful that construction funds will be available in next year's NCI budget.

An interdisciplinary group of basic scientists and clinicians has received funding to study new treatment approaches for bladder cancer research. This is the only NCI funded project like this in the United States. We continue to maintain a strong presence in taxall research and have recently received approval to study treatment efficacy in patients with head and neck cancers as well as breast cancer. Currently in the United States there are only three taxall treatment programs available for head and neck cancer and sixteen for breast cancer. In the last year, four new clinician investigators have been recruited to our cancer program, which brings the total of newly recruited faculty with cancer expertise to twenty-one since 1989. Since this past July we have received forty-six grants totalling almost $3 million in additional support to the cancer program. The total annual amount of external peer reviewed support for the cancer program is now in excess of $22 million.
REPORT ON THE JAMES CANCER HOSPITAL (contd)

Dr. Schuller: (contd)

In summary, our finances have stabilized, the quality of our care is excellent, and externally sponsored research continues to grow. The administration of the James Cancer Hospital and Research Institute appreciates the leadership of the Oversight Committee and will continue a vigorous and aggressive pursuit of achieving the objectives and goals outlined in our strategic plan. Thank you for your attention.

--0--

RESEARCH FOUNDATION REPORT

Mr. Celeste:

A summary of the Grants and Contracts received by The Ohio State University Research Foundation during the month of January may be found at Tab 1 in your Research Foundation Report. The awards for the period July through January are down about 7 percent. However, awards from federal sponsors are up 4.2 percent. As mentioned last month, award dollars can fluctuate up and down from month-to-month because of timing of funding for major multi-year projects.

At Tab 2 you will find expenditure summaries for the month of January. Expenditures are continuing a modest increase of 6.6 percent as they track the increase in awards last year.

Some new projects of special interest that were funded in the month of January are listed at Tab 3. This week I visited with Professor Ing-Ming Chiu and his molecular biology laboratory in the Department of Internal Medicine and received a blitz course in gene splicing and cloning. Dr. Chiu recently received a $200,000 award from the American Cancer Society to identify the critical gene responsible for preventing cells from becoming cancerous in acute nonlymphocytic leukemia patients.

I thought you might also be interested to know that Professor Prabir Dutta in the Department of Chemistry has been funded by the National Aeronautics and Space Administration to study the synthesis of microporous materials in microgravity. These materials have applicability to sensor technology, electronics, and optics. These studies are preliminary investigations aimed at defining an experiment for a future space shuttle flight.

In another study, Professor Shirley O'Bryant in the Department of Family Relations and Human Development has received funding from the American Association of Retired Persons Andrus Foundation to study older men's adjustment to widowhood and the effects of remarriage on their well-being.

At Tab 4 is the list of all projects funded in January. Tab 5 includes press releases issued by University Communications highlighting recent research activity, including some that the President has talked about.
March 12, 1993 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS AND GRANTS
Resolution No. 93-94

Synopsis: The reports on research and other sponsored program contracts and grants and the summary for January 1993 are presented for Board acceptance.

WHEREAS monies are solicited and received on behalf of the University from governmental, industrial, and other agencies in support of research, instructional activities, and service; and

WHEREAS such monies are received through The Ohio State University Research Foundation and the Engineering Experiment Station of The Ohio State University:

NOW THEREFORE

BE IT RESOLVED, That the research agreement between The Ohio State University and The Ohio State University Research Foundation for the contracts and grants reported herein, and the acceptance of the reports from the Engineering Experiment Station during the month of January 1993 be approved.

Upon motion of Mr. Celeste, seconded by Mr. Shumate, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

HOSPITALS BOARD COMMITTEE REPORT

Mr. Skestos:

Mr. Chairman, here is the following summary of activities during the month of February 1993. The Professional Affairs/Education/Research Committee met on February 18. The Committee adjourned into executive session to hear a report on the Quality and Resource Management activities in the Department of Psychiatry. Dr. William Bay reviewed the hospital-wide quality and resource management indicators, including a case review and comparative national data. He also reported on the work of the Correction Unit Clinical Advisory Committee.

In open session the Committee received the reports of the Medical Director and the Chief of Staff. The Director of Physician Relations reported on initiatives to build and strengthen relationships with community physicians and the Hospitals' residents. Mr. Fraley presented quarterly highlights of Human Resources' activities and information gained through exit interviews.
HOSPITALS BOARD COMMITTEE REPORT (contd)

Mr. Skestos: (contd)

The Administrative/Operations Committee met one week later on February 25. After reviewing the Financial Statement, the Committee received a report on Internal Operations. We also learned that the Joint Commission on Accreditation of Healthcare Organizations intends to begin on July 1, 1993, conducting one-day, unannounced visits to selected institutions. I might add that our University Hospitals has the highest accreditation given, which is a three-year accreditation period. We are presently about halfway through that and can expect these unannounced inspections sometime after July. All of the departments are gearing up for this and hopefully they will continue to receive the high accreditation that they have had in the past.

The Hospitals are acquiring a new radio system to improve internal and external communications during emergency situations. We have had a failure in the phone system and our backup didn't work too well, so we are in the process of acquiring a new one that will adequately take care of our needs. Mr. Fraley presented multiple comparisons between University Hospitals and other teaching and community hospitals. Those comparisons indicate that our pricing, staff productivity, and operating costs are extremely competitive with all teaching hospitals and moderately competitive with other large, non-teaching hospitals. In order to attract other managed healthcare contracts and market the University's healthcare system we must maintain quality, continue to control operating costs, and follow through with our strategic pricing efforts.

In a meeting on February 25, the Hospitals Board discussed a medical staff personnel issue both in executive session and in open session. In addition, the Hospitals Board approved the recommendation of the Administrative/Operations Committee to authorize a contract for a sixth-floor addition to the SICU project.

--0--

AGRICULTURAL AFFAIRS COMMITTEE REPORT

Mr. Colley:

Mr. Chairman, the members of the Agricultural Affairs Committee met twice since the last meeting of the Board. At the first meeting we reviewed the College's mission and vision statements. This week we met with 32 leaders from the College, OSU Extension administrators, department chairs from the Colleges of Agriculture and Human Ecology, and the Vice President's administrative cabinet. We focused on two major topics: internal marketing and outreach to the community. Mr. Chairman, I have asked the Secretary to include a more detailed report in the records.

Finally, we wish to commend Dr. Moser on his outstanding leadership in the College and for his obvious rapport with his colleagues.

(See Appendix XXVII for complete context of Agricultural Affairs Report, page 617.)

--0--
ACADEMIC AFFAIRS COMMITTEE REPORT

Mr. Kessler:

The Academic Affairs Committee met this morning and heard an interesting report on the Assessment of Institutional Quality by Associate Provosts Nancy Rudd and Don Dell. The Committee is also recommending the following resolutions:

CREATION OF THE DEPARTMENT OF SPEECH AND HEARING SCIENCE

Resolution No. 93-95

Synopsis: The Academic Affairs Committee recommended the creation of the Department of Speech and Hearing Science in the College of Social and Behavioral Sciences.

WHEREAS the faculty of the Division of Speech and Hearing Science have requested the designation of the Division be changed to the Department of Speech and Hearing Science in the College of Social and Behavioral Sciences; and

WHEREAS the College of Social and Behavioral Sciences has reviewed the proposal and endorses it strongly; and

WHEREAS recruitment of both faculty and students will be enhanced by departmental status; and

WHEREAS the Division meet the required qualitative and quantitative requirements for departmental status as outlined in University Faculty Rule 3335-3-34; and

WHEREAS this proposed change has the approval of the Council on Academic Affairs; and was approved by the University Senate at its February 27, 1993 meeting:

NOW THEREFORE

BE IT RESOLVED, That the proposal to create the Department of Speech and Hearing Science within the College of Social and Behavioral Sciences, effective immediately, is hereby approved.

Upon motion of Mr. Kessler, seconded by Mr. Shumate, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

AMENDMENTS TO THE RULES OF THE UNIVERSITY FACULTY

Resolution No. 93-96

Synopsis: The Academic Affairs Committee recommended the approval of the following amendments to the Rules of the University Faculty.

WHEREAS the University Senate pursuant to rule 3335-1-09 of the Administrative Code is authorized to recommend through the President to the Board of Trustees the adoption of amendments to the Rules of the University Faculty as approved by the University Senate; and

WHEREAS the proposed changes in the Rules of the University Faculty were approved by the University Senate on December 7, 1991 and February 27, 1993:
3335-3-35 Chairpersons of departments, directors of schools.*

(A) The chairperson of each department and the director of each school, shall be the administrative head, respectively, of the department or school. The department chairperson and the director of a school perform a dual function. In addition to being the administrative head of the department or school, the chairperson or director represents the faculty of the department or school in dealing with the dean or others in the university administration. Upon the nomination of the president, the board of trustees shall appoint each chairperson and director for a term of four years subject to the annual review provisions of rule 3335-3-17 of the administrative code. A chairperson or director shall be eligible for reappointment. In selecting a chairperson or director, the president shall confer with the dean of the college involved. The dean, in turn, will consult with the faculty of the department or school on all campuses, as well as other appropriate university officials. Department chairpersons and directors of schools report to the deans of their colleges.

(B) The president may remove a chairperson or director during a four-year term after consultation with the voting faculty and dean of the unit involved. The views of the faculty shall be given substantial weight in arriving at any decision to remove a chairperson or director from office.

(C) The duties of the chairperson of a department or the director of a school shall be as follows:

(1) To have general administrative responsibility for its program, subject to the approval of the dean of the college.

(2) To develop in consultation with the faculty a pattern of administration. This pattern of administration shall be made available to all present and prospective members of the faculty of the department or school, and a copy shall be deposited in the office of the dean of the college and in the office of the senior vice president for academic affairs and provost.

For purposes of defining minimum content, the following shall be included in the pattern of administration:

(a) A statement requiring the chair to provide a schedule of all regular faculty meetings (see rule 3335-5-18 of the Administrative Code) to all faculty members before the start of each quarter, semester, or session.

(b) A statement requiring the chair to maintain minutes of all faculty meetings and to maintain records of all other actions covered by the pattern of administration.

(c) A statement that the chair will consult with the faculty as a whole on all policy matters, and that such consideration will, whenever practicable, be undertaken at a meeting of the faculty as a whole.

(d) A statement recognizing in principle the presumption favoring majority faculty rule on all matters covered by the pattern of administration. This statement shall further provide that whenever majority faculty rule is not followed, the department or faculty chairperson, or school director, or dean and director of a regional campus, whichever is the case, shall explain the reasons for the departure to enhance communication and to facilitate understanding within the department. Where possible, this statement of reasons shall be provided before the departure occurs. This explanation shall outline
the decision of the majority of the faculty, the decision of the department or faculty
chairperson, or school director, or dean and director of the regional campus,
whichever is the case, and the reasons the decisions differ. The explanation shall be
communicated to the faculty in writing, where possible, or at a faculty meeting, with an
opportunity provided for faculty to comment.

(e) A statement affirming that the faculty shall be consulted in the initiation and in the
review and selection of new faculty members for appointment.

(f) A statement explaining how faculty duties and responsibilities in instruction,
scholarship, and service are to be assigned and distributed equitably.

Balance unchanged.

3335-5-486 Council on enrollment and student progress.

(A) Membership.

The council on enrollment and student progress shall consist of sixteen members.

(1) Nine regular faculty.

(a) Three regular faculty appointed by the president. The term of service is three years.
Appointed members are eligible for reappointment.

(b) Six regular faculty appointed by the executive committee of the faculty council or
elected by the faculty council in accordance with procedures specified in faculty rule
3335-5-48 (B)(2). The term of service is three years.

(2) Six students.

(a) Two graduate students selected by the council of graduate students. The term of
service is one year.

(b) Two professional student selected by the inter-professional council. The term of
service is one year.

(c) Two undergraduate students selected by the undergraduate student government.
The term of service is one year.

(3) One administrator. The senior vice president for academic affairs and provost, or
designee, non-voting, to serve as administrative liaison for the council.

(B) Duties and responsibilities.

(1) Initiate recommendations and review proposals with regard to policies which affect the
characteristics of the student body. The council shall address issues with regard to
enrollment planning for undergraduate, graduate, and professional student enrollment. In
addition, the council shall address issues related to undergraduate students in regard to
AMENDMENTS TO THE RULES OF THE UNIVERSITY FACULTY (contd)

Amended Rules (contd)

recruitment, competitive admissions, intra-university transfers, financial aid, and retention, and coordinate any resulting actions with issues concerning graduate and professional students. Recommendations and advice will be provided to appropriate administrators and offices.

(2) Initiate recommendations and review proposals with regard to policies which affect the processes by which undergraduate students enroll, register, and carry out other administrative functions related to the completion of their coursework and/or degree requirements. Recommendations and advice shall be provided to appropriate administrators and offices.

(3) Initiate recommendations and review proposals with regard to policies and procedures pertinent to students' passage through the institution, including, but not limited to, the university calendar, student records, approval of transfer credit, and quarter-end validation procedures.

(4) Encourage the collection of data and participate in the analysis of data which will support the development of informed policies on issues within the council's domain and include a summary of such data in the annual report to the senate.

(5) Serve as a channel of communication for the work of all other committees, permanent and ad hoc, which address issues within the domain of the council of enrollment and student progress and establish regular mechanisms by which such committees report regularly to the council on enrollment and student progress and through it to the university senate.

(C) Organization.

(1) The chairperson and chairperson-elect shall be elected from among the faculty members. The chairperson-elect shall serve as vice-chairperson.

(2) Reports by this council to the president, other than those made through the senate, shall be made through the senior vice president for academic affairs and provost.

(3) As a standing committee of the senate, this council is also governed by the provisions of rules 3335-5-46 and 3335-5-48 of the Administrative Code.

NOW THEREFORE

BE IT RESOLVED, That the foregoing amendments to the Rules of the University Faculty be adopted as recommended by the University Senate.

Upon motion of Mr. Kessler, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--
March 12, 1993 meeting, Board of Trustees

HONORARY DEGREES

Resolution No. 93-97

Synopsis: The Academic Affairs Committee recommended the awarding of an honorary degree to Willy Burgdorfer.

WHEREAS the Committee on Honorary Degrees and the University Senate, pursuant to rule 3335-5-488 of the Administrative Code, have approved for recommendation to the Board of Trustees awarding of an honorary degree as listed below:

Willy Burgdorfer

Doctor of Science

NOW THEREFORE

BE IT RESOLVED, That the above honorary degree be awarded in accordance with the recommendation at a time convenient to the University and the recipients.

Upon motion of Mr. Kessler, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

PERSONNEL ACTIONS

Resolution No. 93-98

RESOLVED, That the personnel actions as recorded in the Personnel Budget Records of the University since the February 4, 1993 meeting of the Board, including the following Appointment, Appointment of Chairpersons, Reappointment of Principal Administrative Official, Leave of Absence Without Salary, Professional Improvement Leaves, Emeritus Titles, and Medical Staff Appointments/Reappointment (The Arthur G. James Cancer Hospital and Research Hospital) as detailed in the University Budget be approved.

Appointment

Name: FENG-SHENG HSUEH
Title: Professor (Bliss M. and Mildred A. Wiant Designated Professorship in Chinese Literature and Culture)
Department: East Asian Languages and Literatures
Effective Period: October 1, 1993 - September 30, 1996
Salary: N/A
Present Position: Acting Chair and Professor, Department of East Asian Languages and Literatures

Appointment of Chairpersons

January 1, 1993 through June 30, 1996

Materials Science and Engineering

Robert H. Wagoner

March 1, 1993 through March 31, 1993

Surgery

William L. Smead*
PERSONNEL ACTIONS (contd)

Appointment of Chairpersons (contd)

April 1, 1993 through June 30, 1997

Surgery

Ronald M. Ferguson

*Acting

Reappointment of Principal Administrative Official

R. REED FRALEY, Executive Director of University Hospitals and Associate Vice President for Health Services, effective March 1, 1993, through February 28, 1997, pursuant to rule 3335-3-17 of the Administrative Code.

Leave of Absence Without Salary

MOHAMMED I. EL-NAGGER, Professor, Department of Electrical Engineering, effective October 1, 1992 through November 30, 1992, for personal reasons.

Professional Improvement Leaves--Change in Dates

DAGMAR C. G. LORENZ, Professor, Department of Germanic Languages and Literatures, change dates from Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993, to Autumn Quarter 1992.

TIN-LUN (JASON) HO, Assistant Professor, Department of Physics, change dates from Autumn Quarter 1992, Winter Quarter and Spring Quarter 1993, to Winter Quarter, Spring Quarter, and Autumn Quarter 1993.

Emeritus Title

JOE D. PITTMAN, Ohio State University Extension, with the title Associate Professor Emeritus, effective March 12, 1993.

Medical Staff Appointments (The Arthur G. James Cancer Hospital and Research Institute)

November 20, 1992 through June 30, 1993

EVANS, CYNTHIA BETH, M.D., Associate Attending, Obstetrics and Gynecology

SAMUELS, PHILIP, M.D., Associate Attending, Obstetrics and Gynecology

January 21, 1993 through June 30, 1993

BROWN, DAVID ALAN, M.D., Associate Attending, Surgery -- Thoracic & Cardiovascular

KOSLOSKE, ANN MARY, M.D., Associate Attending, Pediatric Surgery

HUNEKE, ALLEN LOUIS, M.D., Associate Attending, Obstetrics and Gynecology
PERSONNEL ACTIONS (contd)

Medical Staff Reappointment (The Arthur G. James Cancer Hospital and Research Institute

January 21, 1993 through June 30, 1993

WILLIAM L. SMEAD, M.D., Associate Attending, Surgery

Upon motion of Mr. Kessler, seconded by Mr. Shumate, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

RESOLUTIONS IN MEMORIAM

Resolution No. 93-99

Synopsis: The Academic Affairs Committee recommended the approval of seven Resolutions in Memoriam.

RESOLVED, That the Board adopt the following Resolutions in Memoriam and that the President be requested to convey a copy to the families of the deceased.

Ralph Bergman

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on February 2, 1993, of Ralph Bergman, Assistant Professor Emeritus in the Ohio State University Extension.

Professor Bergman was born June 16, 1912, in Bryan, Ohio. He completed his B.S. in Agriculture Education in 1935 and his M.A. in 1950 at The Ohio State University.

Ralph Bergman began his Extension career in Ohio when he joined the faculty at The Ohio State University on June 16, 1957, as the County 4-H Agent in Logan County. He held this position until his retirement on June 30, 1973.

Professor Bergman's contributions in providing excellent Extension educational programs during his career earned him the respect and admiration of his co-workers and associates throughout the state. He served on numerous committees and wrote several articles pertaining to youth development throughout his career.

On behalf of the University community, the Board of Trustees expresses its sympathy and understanding to his wife, as well as friends. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees as an expression of the Board's heartfelt sympathy.

John W. Hevener

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on January 26, 1993, of John W. Hevener, Associate Professor Emeritus in the Department of History at The Ohio State University Lima Campus.

Professor Hevener was born in Dunmore, West Virginia, on March 21, 1933. He held the B.A. and M.A. degrees from Marshall University and, in 1971 received his Ph.D. from Ohio State, where he
RESOLUTIONS IN MEMORIAM (contd)

John W. Hevener (contd)

held the William Green Memorial Fellowship as a graduate student. He taught high school in McArthur and Hamilton Township (Columbus), Ohio, and from 1966 to 1970 served in the history department of Wisconsin State University, Whitewater. In 1972, he began teaching at Mankato State College in Minnesota, and then in the fall of 1975, he joined the faculty at the Lima Campus. He served there until he took emeritus status in 1991.

Professor Hevener was well known in the field of American labor history. He was the author of Which Side Are You On? The Harlan County Coal Miners, 1931-39 (University of Illinois Press, 1979), for which he was recognized in 1978 by being presented the W.D. Weatherford Award for that year. Professor Hevener was a particularly beloved teacher who in his seventeen years at Lima made a major impact upon many students and left important institutional contributions at the Lima Campus and within the University generally. He was also a respected ambassador of the University to the Lima community, being very active in his church and serving for a number of years on the executive committee of the Allen County Democratic Party.

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Verl L. House

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on December 9, 1992, of Verl L. House, Professor Emeritus in the Department of Molecular Genetics.

Professor House was born April 10, 1919. He received a bachelor's degree in zoology from the University of California at Berkeley in 1941. After serving with the U.S. Army from 1943-46, he returned to Berkeley and received a master's degree in zoology in 1948 and a Ph.D. in 1950.

After teaching at Johns Hopkins, and Virginia Polytechnic Institute, Dr. House came to Ohio State as an associate professor of zoology and entomology in 1958. In 1965 he served as consultant to the Indian Summer Institutes in Biology, sponsored by USAID. From 1966-67, he served as Associate Director of Fellowships, National Academy of Sciences-National Research Council, Office of Scientific Personnel, Washington, DC. He became a professor of genetics in 1967 and retired in 1980.

Professor House served on a variety of college and university committees, including the Committee for the Establishment of a Graduate Program in Genetics at The Ohio State University, the Colleges of the Arts and Sciences Honors Committee, and the Task Force for a Program in General Biology, College of Biological Sciences.

Professor House was a member of several professional societies, including Sigma Xi, the American Genetics Society, the Society of American Zoologists, and the American Society of Human Geneticists. He was also a Fellow of the Ohio Academy of Sciences.

Professor House's research interest was physiological genetics with emphasis on developmental aspects of gene expression. He advised numerous graduate students and was the author or co-author of 41 scholarly papers. He initiated and taught courses in General Genetics, and the Nature of Gene Action.
RESOLUTIONS IN MEMORIAM (contd)

Verl L. House (contd)

On behalf of the University, the Board of Trustees expresses to the family of Professor House its deep sympathy and sense of understanding of their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Elton F. Paddock

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on November 27, 1992, of Elton F. Paddock, Professor Emeritus in the Department of Molecular Genetics.

Professor Paddock was born December 11, 1913. He received his B.A. from Whittier College in 1936 and his Ph.D. in genetics from the University of California at Berkeley in 1942. He came to Ohio State in 1946 and retired in 1985.

He initiated and taught Genetics 631, the Cytological Basis of Genetics; Genetics 632, Plant Genetics; and Genetics 730, Cytogenetics.

Professor Paddock was a member of various scientific and honorary societies. He was a Fellow of the Ohio Academy of Science and a consultant to the United States Agency for International Development. He advised many graduate students, both Master's and Ph.D.candidates and was the author of numerous scientific articles on biology and genetics. He was a member of the Senior Chorus at Barber-Roselea, Columbus Alumni Chapter of SPEBSQSA, and Eagles Scouts.

On behalf of the University, the Board of Trustees expresses to the family of Professor Paddock its deep sympathy and sense of understanding of their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

William C. Smith

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on January 28, 1993, of William C. Smith, Associate Professor in the Ohio State University Extension.

Professor Smith was born June 24, 1948, in Conneaut, Ohio. He completed his B.S. in Education in 1970 at The Ohio State University and his Master's in Ag. Education in 1978 at Kent State University. He was currently working on his Ph.D. in Education from The Ohio State University.

William Smith began his Extension career in Ohio when he joined the faculty at The Ohio State University on October 16, 1970 as the County 4-H Agent in Geauga County. On February 16, 1974, he became the County 4-H Extension Agent in Columbiana County. He held this position until he became the Area 4-H Agent for the Canfield Area on March 1, 1979. On June 1, 1985 he transferred to the Southwest District as the District 4-H Specialist and held this position until his death.

Professor Smith's contributions in providing excellent Extension 4-H educational programs during his career earned him the respect and admiration of his co-workers, peers, volunteer advisors, 4-H members and associates throughout the state as well as the nation. He served on numerous committees and wrote several articles pertaining to youth development throughout his career.
RESOLUTIONS IN MEMORIAM (contd)

William C. Smith (contd)

On behalf of the University community, the Board of Trustees expresses its sympathy and understanding to his wife, children, and parents as well as friends. It was directed that this resolution be inscribed in the minutes of the Board of Trustees as an expression of the Board's heartfelt sympathy.

Ted Suie

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on December 17, 1992, of Ted Suie, Ph.D., Professor Emeritus, Department of Ophthalmology.

Dr. Suie was born on June 20, 1923, in Akron, Ohio. He earned a Bachelor's Degree in Biology from Akron University in 1949. He received a Masters and Ph.D. in Microbiology from The Ohio State University.

Dr. Suie was a faculty member in the Department of Ophthalmology for 35 years. He also held a courtesy appointment with the Department of Microbiology in the College of Biological Sciences. He served on many College of Medicine committees including the Animal Research Committee, Curriculum Committee, the Committee on Faculty and Alumni Programs, and the University Campus Campaign.

Within the Department of Ophthalmology, Dr. Suie served as director of Ophthalmic Research, Graduate School Committee Chairman, and as a member of the Department Promotion and Tenure Committee. Dr. Suie was director of the Ophthalmic Microbiology Laboratory for 25 years. In this capacity, he trained many technicians in the field of Ophthalmic Microbiology.

Dr. Suie published over 60 papers in the major ophthalmology journals dealing with his research in eye microbiology and immunology. He was author of the manual "Microbiology of the Eye" published by the American Academy of Ophthalmology and served as a permanent instructor for the Academy for over 20 years. It is significant to note this in that Dr. Suie was the first non-ophthalmologist to become a member of the American Academy of Ophthalmology.

Dr. Suie received the Honor Award of the American Academy of Ophthalmology for teaching. He was also the recipient of the Cantacuzino Medal from the Government of Romania for his contributions for eye research.

On behalf of the University community, the Board of Trustees expresses to the family and friends of Dr. Suie its deepest sympathy. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's realization of the loss that the family, the University and many friends and associates have sustained.

William V. Walton, Jr.

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on October 29, 1992, of William V. Walton, Jr., Associate Professor Emeritus in the College of Dentistry (Periodontology).
RESOLUTIONS IN MEMORIAM (contd)

William V. Walton, Jr. (contd)

Professor Walton was born in Woodsfield, Ohio, in 1899, the son of Woodsfield's mayor, the late William Walton. During World War I, he served as a private in the infantry. He attended The Ohio State University College of Dentistry from which he received his D.D.S. degree in dentistry in 1922. Initially, he practiced general dentistry and from 1928 to 1958 the specialty of periodontics with his brothers, Dr. Albert B. Walton and Dr. Leland V. Walton, who had a medical-dental practice on East Broad Street in Columbus. In 1953 he joined the faculty in the College of Dentistry as a part-time Instructor in Periodontics, and in 1955 became Assistant Professor in Periodontics. In 1958 he became a full-time faculty member with rank of Associate Professor, a position he held until his retirement on July 1, 1968.

Professor Walton was a member of many professional organizations, notably Omicron Kappa Upsilon, an honorary dental organization to which he was elected upon his graduation in 1922. Additionally, he was a member of the American Dental Association, the Ohio Dental Association and the Columbus Dental Association of which he was elected president 1927-1928.

Professor Walton was highly recognized as the designer of the first impression-molded latex mouthpiece in 1956, derivatives of which are widely used presently in the sports field to prevent injuries to the teeth and jaws. During his academic tenure from 1958 through 1968, he developed many teaching aids within his department to include dentoforms. He established the Sophomore Scaling Laboratory and Clinic Seminar; researched principle of ultrasonics as applicable to dentistry and established the Junior Ultrasonic Clinic Seminar; developed the individual Junior and Senior Periodontal Conference; wrote the clinic manual entitled, "An Aid to the Treatment of the Diseased Periodontium"; and worked with graduate students in clinic and seminar. During 1965, he chaired the Department of Periodontology. During his teaching years he earned the reputation as a tough professor but with a deep love for his students. Since he proudly possessed a large, white mustache, he was nicknamed, "The Walrus."

On behalf of the University, the Board of Trustees expresses to the family of Professor Walton its deep sympathy and sense of understanding of their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Upon motion of Mr. Kessler, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

STUDENT AFFAIRS COMMITTEE REPORT

Ms. Cusack:

In the Student Affairs Committee meeting today we just began to scratch the surface on the issue of Academic Advising at Ohio State and you will be hearing a lot more about it in the future. Dr. Mac Stewart from University College, Dr. Martha Garland from the Department of History, Dr. Bob Arkin from Arts and Sciences, and Mr. Jay Yutzey from the College of Business came and discussed this issue with us. I am sure this is a subject that you have heard murmurs about and I could probably spend all day discussing this with you the different dynamics of academic advising at Ohio State and about improvements that could be made. But since you probably
March 12, 1993 meeting, Board of Trustees

STUDENT AFFAIRS COMMITTEE REPORT (contd)

Ms. Cusack: (contd)

don't want me to do that, I will just greatly oversimplify it by saying that I don't think we are currently furnishing our students with all of the aid that they could get from this University. I think there is a lot more that we could be doing in the area of academic advising. We will be working on that and giving you some more information as it comes in.

We also heard from the student government leaders. John Hilbert, from the Undergraduate Student Government, told us that the Assembly of the Undergraduate Student Government is currently moving around -- as we are as a Board -- getting out to the students. They have been to south campus, they went to the Mansfield Campus last week, and next quarter they will be at the Hale Center.

They are also participating in a High Street cleanup project, which they have done several times this quarter. This is where they go out into High Street and actually cleanup after a weekend activity. They are also planning a Student Government Organization President Leadership Conference. USG's elections are coming up and John's replacement will be selected April 6 and 7 on the Regional Campuses, and April 7 and 8 on Main Campus.

Also, the student governments have been busy selecting the five finalists to try and replace me. They have sent the finalists' names and information to the Governor who will hopefully be making the decision sometime soon.

Karen Duncan, from the Council of Graduate Students, spoke about a document -- which we should have all received or will be receiving soon -- which is their response to the local Managing for the Future Task Force Report. A couple of points that Karen highlighted and I would like to pass along were that the graduate students generally feel that the report was very good and had a lot of useful information. They did, however, have a few things that they would like to bring up as possible problems. On the issue of college structure they think that the number of faculty and the budget size are a poor organization for college structure -- a poor way to do that. They disagree with the elimination or the disbandment of the University Senate. And they noted that there was no mention or documentation of graduate student achievement in the section, "Documenting Academic Achievement." Also, Karen wanted me to note that there were no students on the local Managing For the Future Task Force.

Greg Gorospe, President of the Interprofessional Council, made his last report to us and we would like to thank him. His replacement will be starting very soon and they are planning on having a very well-planned transition this year, which is their first one in quite a while. They are really working to make the structure of IPC something that can be useful for the students in the professional schools. I would just like to congratulate Greg on his impending graduation and thank him for all of his help this year.

--0--
INVESTMENTS COMMITTEE REPORT

Amb. Wolf:

As you can see from the report, total giving from private sources is up 59 percent through the first seven months compared with the same period last year. Individual giving continues to be strong largely due to four major gifts totaling $5.3 million.

The $9 million gift-in-kind of cartoon art in December and the receipt of a $3.2 million mainframe computer in January are responsible for the 133 percent increase in corporate giving. However, corporate giving would still be up 7 percent if these two gifts were factored out.

Private foundation giving is improving. We were down 25 percent at the end of December, but by the end of January we were down only 12 percent compared to last year.

I should also note that the totals reported constitute approximately $43 million in new dollars, since only $5.2 million of the total resulted from pledge payments on commitments made during The Ohio State University Campaign.

I would like to recommend to the Board the establishment of seven new named endowed funds totaling $161,631.69 in restricted support to the University. These funds are listed behind the Development Tab in your Board books.

REPORT ON UNIVERSITY DEVELOPMENT

Resolution No. 93-100

Synopsis: The report on the receipt of gifts and the summary for January 1993 are presented for Board acceptance.

WHEREAS monies are solicited and received on behalf of the University from alumni, industry, and various individuals in support of research, instructional activities, and service; and

WHEREAS such gifts are received through The Ohio State University Development Fund and The Ohio State University Foundation; and

WHEREAS this report includes the establishment of seven (7) new named endowed funds:

NOW THEREFORE

BE IT RESOLVED, That the acceptance of the report from The Ohio State University Development Fund and The Ohio State University Foundation during the month of January 1993 be approved.

Upon motion of Amb. Wolf, seconded by Mr. Shumate, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

Establishment of Named Endowed Funds

The Max A. Karr University Scholarship Fund

The Max A. Karr University Scholarship Fund was established March 12, 1993, by the Board of Trustees of The Ohio State University, with a gift to The Ohio State University Development Fund from the estate of Max A. Karr (B.S.Bus.Adm. ’35) and a gift from Clara A. Karr, Livonia, Michigan, in memory of her husband.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide one or more merit scholarships for University Scholars. Should the fund grow sufficiently, it may be used to support Presidential Scholars, Distinguished Scholars, or Medalist Scholars. Students shall be selected based upon the criteria sanctioned by the Senior Vice President for Academic Affairs and Provost and administered by the University Honors Center in consultation with the University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

$30,650.65

The Robert C. Gossman & Associates Endowment Fund

The Robert C. Gossman & Associates Endowment Fund was established March 12, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from the Gossman family and friends.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide senior medical students with The Robert C. Gossman & Associates Service Award. The minimum award shall be $500. The Dean of the College of Medicine and a committee appointed by the Dean shall select the recipient. The Gossman family shall be notified of the award winner.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be determined by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

$30,572.54
Establishment of Named Endowed Funds (contd)

The Highland County 4-H Endowment Fund

The Highland County 4-H Endowment Fund was established March 12, 1993, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from friends of Highland County 4-H.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support the Highland County 4-H program. This support may include, but is not limited to, the funding of scholarships and awards for 4-H members, volunteer leaders and friends of 4-H; sponsoring seminars and programs; purchasing material or services that will supplement 4-H programming or increase the visibility and public support for 4-H in Highland County. All expenditures from this fund shall be approved by the Highland County 4-H Committee.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be determined by the Board of Trustees with preference being given to recommendations from the Director of Ohio State University Extension in consultation with a committee representing the local 4-H donors in order to carry out the desire of the donors.

$27,018

The F. Peter and Gwendolyn Kautz Gross Scholarship Fund

The F. Peter and Gwendolyn Kautz Gross Scholarship Fund was established March 12, 1993, by the Board of Trustees of The Ohio State University, with a gift to The Ohio State University Development Fund from Mr. F. Peter Gross (M.A., Psychology '57) of Dublin, Ohio, in memory of Gwendolyn Kautz Gross (M.A., Education '66) and in honor of their joint experiences in education.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide scholarship support for a graduate student(s) in the College of Education with demonstrated financial need who plans to serve public schools. The scholarship shall alternate annually between the school psychology and the school counseling and guidance programs. First preference shall be given to graduates of Ohio Wesleyan University. Selection of the scholarship recipient(s) shall be made by the Dean of the College of Education in consultation with the University Committee on Student Financial Aid. If the school psychology program ceases to exist, the annual income may be used to assist graduate students in the College of Education who plan a career working with special needs students and/or programs. If the school counseling and guidance programs cease to exist, the annual income shall be used to provide scholarship support to the school psychology program. If such program no longer exists, then the annual income shall be used to assist graduate students who plan a career working with special needs students and/or programs.
Establishment of Named Endowed Funds (contd)

The F. Peter and Gwendolyn Kautz Gross Scholarship Fund (contd)

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

$20,000

The Pickaway County 4-H Endowment Fund

The Pickaway County 4-H Endowment Fund was established March 12, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from the Pickaway County 4-H Committee and other friends of the Pickaway County 4-H Program.

The gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees at The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support the Pickaway County 4-H Programs. This support may include, but is not limited to, the funding of scholarships and awards for 4-H members, volunteer leaders and friends of 4-H; sponsoring seminars and programs; purchasing material or services that will supplement 4-H programming or increase the visibility and public support for 4-H in Pickaway County. All expenditures from this fund shall be approved by the Pickaway County 4-H Committee and the professional in charge of the Pickaway County 4-H Program.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be determined by the Board of Trustees with preference being given to recommendations from the Director of Ohio State University Extension in consultation with a committee representing the Pickaway 4-H donors in order to carry out the desire of the donors.

$16,709

The University School Endowment Fund

The University School Endowment Fund was established March 12, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from alumni, faculty and friends of the University School.

All gifts are to be invested in the University's Permanent Endowment Fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.
Establishment of Named Endowed Funds (contd)

The University School Endowment Fund (contd)

The annual income shall be used for grants to fund programs and projects incorporating the democratic tenets of the Philosophy and Practices of the University School as defined and published by the School in 1948. These programs and projects shall also address the multiple pressures and problems of schoolchildren of the late 1990s and beyond. Grant recipients must be Ohio State University graduate students in any discipline who have had experience as or are currently practicing educators in the K-12 grade levels.

Specific criteria for selecting grant recipients shall include, but not be limited to: (1) the demonstrated commitment of the candidate to encourage realistic, contemporary, quality educational practices throughout the state and nation; (2) the potential of the candidate's proposed project to improve education in schools; (3) the potential of candidate's proposed project to involve communities with their schools; and (4) the potential of methods into the educational process that might stimulate other practicing educators. The selection of candidates shall be made by the Dean of the Graduate School upon the recommendation of a committee of faculty members. Grants may be awarded for a second year provided the recipient reapplications and is selected by the dean and the faculty committee.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another similar use for the school community shall be chosen by the Board of Trustees in consultation with the Dean of the Graduate School and a committee chosen from among the last ten grant recipients in order to carry out the desire of the donors.

$16,681.50

THE OHIO STATE UNIVERSITY FOUNDATION

Approval of Description and Establishment of Endowed Fund

The Richard and Karol Wells Scholarship Fund

The Richard and Karol Wells Scholarship Fund was established March 12, 1993, by the Board of Trustees of The Ohio State University through funds received by the University from The Ohio State University Foundation, which has established an endowed fund with gifts designated for the support of the Office of Admissions and Financial Aid from Richard (B.S.Phar. '56) and Karol (B.S.Ed. '58) Wells, Los Angeles, California.

Income provided by the Foundation shall be distributed to the Office of Student Financial Aid to be used to provide one or more scholarships for a student who (1) does not qualify for need based federal aid but still has difficulty meeting expenses to attend The Ohio State University, and (2) does not qualify for merit based aid but exhibits potential for success at The Ohio State University. Preference shall be given to entering freshmen and scholarships are renewable for up to twelve (12) quarters of satisfactory academic performance. Selection of the scholarship recipients shall be made by the University Committee on Student Financial Aid.

$20,000
INVESTMENTS COMMITTEE REPORT (contd)

Amb. Wolf:

The Investments Committee also heard the monthly Endowment Summary Report for the period January 15, 1993 through February 19, 1993. The market value of the Endowment Fund on February 19, 1993 was $440.8 million. This total was approximately $3.3 million below the January 15, 1993 market value. The market value of the equity portion of the Endowment Fund decreased $6.9 million while the Fixed Income portion increased $2.8 million during this reporting period. Net new additions to the Endowment Fund for February totalled $1.3 million. I must add that since the closing date of these figures the market has shot up, as we all know, and these figures would be much more encouraging had we had an up-to-date figure.

Since July 1, 1992, the Endowment Fund has increased over $38.8 million, including net new additions of $12.6 million.

I would now like to direct your attention to page four of the Endowment Summary Report located in your agenda book. This new Asset Allocation Summary page indicates that the current asset allocation for the Endowment Fund is 60 percent invested in equities, 26 percent in fixed income, 8 percent in real estate, and 6 percent in cash equivalents. The bottom half of the page indicates that if real estate is backed out, the asset allocation would be 65 percent equities, 28 percent fixed income, and 7 percent cash.

The Investments Committee next heard a report on Endowment Fund Properties. It was noted that the $38.4 million Endowment Real Estate Portfolio has a total annual return of 8.2 percent. That is just a statement of fact.

(See Appendix XXVIII for chart on Endowment Fund Property, page 619.)

FISCAL AFFAIRS COMMITTEE REPORT

Mr. Shumate:

The Fiscal Affairs Committee met yesterday afternoon and we heard reports on: Deficit Reduction Plan, the State Funding Formula, Budget Themes and Priorities for Fiscal Year 1994, and Fiscal Year 1995-96 Capital Requests. Background information regarding these four items were previously mailed to all members of this Board. The Committee is also recommending the following resolutions:

REQUEST FOR CONSTRUCTION BIDS

Resolution No. 93-101

MANSFIELD REGIONAL CAMPUS - UNIVERSITY DRIVE RESTORATION
MANSFIELD REGIONAL CAMPUS - EISENHOWER CENTER BOILER SYSTEM

Synopsis: The Fiscal Affairs Committee recommended authorization to request construction bids for the listed projects.
REQUEST FOR CONSTRUCTION BIDS (contd)

MANSFIELD REGIONAL CAMPUS - UNIVERSITY DRIVE RESTORATION
MANSFIELD REGIONAL CAMPUS - EISENHOWER CENTER BOILER SYSTEM (contd)

WHEREAS the University desires to proceed with the restoration of the deteriorated University Drive on the Mansfield Regional Campus; and

WHEREAS the total estimated project cost is $145,000.00, and the total estimated construction cost is $122,000.00; with design funding provided by the Mansfield Regional Campus ($10,000) and the construction funds provided by House Bill 904 ($135,000.00); and

WHEREAS the University desires to proceed with the replacement of two failing boilers and associated pumps and recovery tanks in the Eisenhower Memorial Center on the Mansfield Regional Campus; and

WHEREAS the total estimated project cost is $97,500.00, and the total estimated construction cost is $81,000.00; with design funding provided by Mansfield Regional Campus ($7,500.00) and the construction funds provided by House Bill 904 ($90,000.00):

NOW THEREFORE

BE IT RESOLVED, The President and/or Vice President for Business and Administration be authorized to request construction bids on these projects in accordance with established University procedures, and if satisfactory bids are received, to award contracts, with all actions to be reported to this Board at the appropriate time.

Upon motion of Mr. Shumate, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix XXIX for maps, page 621.)

--0--

Mr. Shumate:

The next item of business, Mr. Chairman, regards the transfer of jurisdiction for the Fawcett Center for Tomorrow and Mr. Shkurti is going to report on that.

Mr. Shkurti:

Thank you, Mr. Chairman. This last item on the Fiscal Affairs Committee agenda is authorization to transfer administrative responsibility for the Fawcett Center for Tomorrow from the Office of Business and Administration to the Office of Residence and Dining Halls. Vice President Pichette reviewed this matter with the Committee yesterday and the Fiscal Affairs Committee is recommending this action to provide the most effective use of this conference and hotel facility and to eliminate duplication of services.

I would emphasize that the transfer will have no affect on the WOSU stations, the Alumni Association or University Development which are housed in this building, and that all current Fawcett Center personnel will be transferred to Residence and Dining Halls. The transfer has the full support of the Offices of Business and Administration, Finance, and Student Services, and we seek your approval of this
Mr. Shkurti: (contd)

administrative change and the necessary revisions in the University Rules to reflect
this administrative realignment.

TRANSFER OF MANAGEMENT OVERSIGHT FOR THE
FAWCETT CENTER FOR TOMORROW

Resolution No. 93-102

Synopsis: The Fiscal Affairs Committee recommended that management oversight responsibility
for the Fawcett Center for Tomorrow be transferred from the Office of Business and Administration
to the Office of Residence and Dining Halls.

WHEREAS the Fawcett Center for Tomorrow provides general conference facilities for the
University and provides space for the WOSU Stations, University Development, and The Ohio State
University Alumni Association; and

WHEREAS to ensure the most effective use of this facility to support the academic mission and
eliminate duplication of services, the Office of Business and Administration and the Office of Student
Affairs, in consultation with the other offices involved, have recommended that the Fawcett Center
for Tomorrow should continue to be operated as an academic support auxiliary unit and should
report to the Office of Residence and Dining Halls:

NOW THEREFORE

BE IT RESOLVED, That effective immediately, responsibility for management oversight for the
Fawcett Center for Tomorrow be transferred from the Office of Business and Administration to the
Office of Residence and Dining Halls in accordance with a memorandum of understanding to be
entered into among the offices involved; and

BE IT FURTHER RESOLVED, That the Secretary of the Board of Trustees be hereby authorized
and directed to incorporate this change in the applicable sections of the Bylaws of the Board of
Trustees and the Rules of the University Faculty.

Upon motion of Mr. Shumate, seconded by Ms. Casto, the Board of Trustees adopted the foregoing
resolution by unanimous roll call vote.

--0--

Mr. Barone:

Before adjourning the meeting, I would like to thank the staff of the Hale Black
Cultural Center for the use of their facilities. It has been very pleasant having the
Board meeting here.

President Gee:

I would like to recognize Lee Smith, Administrative Secretary of the Center. Lee
has worked very closely with Mr. Scott and with all of us in making these
arrangements. Lee, we just wanted you to come forward and to tell you how much
we appreciated your help. You made it so easy, I think we will come back on a
regular basis. Will you thank all of those who worked with you, Lee? I would really
appreciate that.
March 12, 1993 meeting, Board of Trustees

Mr. Scott:

Mr. Chairman, I have an announcement. Normally, we have our Board photograph taken in April, but because we are going to be away from the campus we will have the Board photograph in May. A suggestion -- please try to attend!

--0--

REPORT - UNIVERSITY’S ENDOWMENT FUND

RESOLVED, That the report on the University's Endowment Fund, dated February 19, 1993, as submitted to the Investments Committee of the Board of Trustees, be received and filed with the official records of the Board.

--0--

Thereupon the Board adjourned to meet Friday, April 2, 1993, at the Ohio Agricultural Research and Development Center, Wooster, Ohio.

Attest:

Madison H. Scott       John J. Barone
Secretary              Chairman
THE OHIO STATE UNIVERSITY
OFFICIAL PROCEEDINGS OF THE
ONE THOUSAND TWO HUNDRED AND NINETY-FIRST MEETING
OF THE BOARD OF TRUSTEES

Columbus, Ohio, April 2, 1993

The Board of Trustees met at its regular monthly meeting on Friday, April 2, 1993, at the Ohio Agricultural Research and Development Center, Wooster, Ohio, pursuant to adjournment.

**     **     **

Minutes of the last meeting were approved.

**     **     **
The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on April 2, 1993, at 10:40 a.m. He requested the Secretary to call the roll.

Present: John J. Barone, Chairman, Alex Shumate, Theodore S. Celeste, Michael F. Colley, George A. Skestos, Kristen Cusack, and Hiawatha N. Francisco, Jr.

Mr. Barone announced the appointment of the following persons to the Nominating Committee for the selection of Board Officers for 1993-94:

John J. Barone, Chairman
Deborah E. Casto
John W. Kessler

PRESIDENT'S REPORT

President Gee:

Ladies and gentlemen, I am delighted to be in Wooster, and pleased that Bill Anderson, Director of ATI, and Tom Payne, Director of OARDC, are hosting us today. I would particularly like to thank Tom -- who assumed his new role with OARDC in January -- and Bill, not only for their efforts today, but more importantly for their good work at this outstanding facility. Fisher Auditorium, the building we are in today, is one of the finest facilities that we have in this University.

As we all know, Agriculture is Ohio's number one industry. From the University's very beginnings as the Ohio Agricultural and Mechanical College, Ohio A & M, Ohio State -- as a land-grant institution -- has been committed to agricultural education and service. And it is fitting that with the arrival of spring and the anticipation of a season of growth, that we gather at OARDC and ATI, which make such important contributions to Ohio's agri-business.

As many of you know, since the spring of 1991, I have taken a number of trips around Ohio to learn more about the state and it's people. And, earlier this week I spent three days in southwest Ohio. We focused a good bit of our time on student recruitment. In Montgomery County and again in Hamilton County a group of our faculty and honors students joined me in meeting high ability juniors and their parents. The response to our invitations exceeded even our own expectations, as an increasing number of Ohio's best and brightest are enthusiastic about our great university and attending that institution.

I also had the opportunity to visit with young people in their schools. At the Hughes Center in Cincinnati, I was interviewed on a 30-minute talk show produced and staffed entirely by students in The High School for Communication Professions. This program is broadcast to all of the Cincinnati Public Schools. A group of Brown County 4-H members told me of their nationally recognized traffic safety program for first-time juvenile traffic offenders called Carteens. A peer to peer program, the Carteens work with the County Probate Court and the State Highway Patrol. The 4-H members prepare and present a two-hour seminar on traffic safety. The number of second-time juvenile offenders has dropped by 89 percent in Brown County since this program began. And I think, Bobby, you should tell our 4-H people how...
PRESIDENT'S REPORT (contd)

President Gee: (contd)

pleased I am with that program. As I could see from the briefing they did for me, the students also are developing leadership skills through the program. This is an outstanding example of the partnership between Ohio State Extension and the community. The Carteens program has spread to a dozen other Ohio counties and is now being replicated in several other states.

My state tours always include meetings with our enthusiastic alumni and friends, representatives of the media, and public officials. A quick count from all of the events revealed that I addressed a total of more than 1,000 people during those three days. I am not certain that they were necessarily pleased about it, but we had a great time and only once did I forget what town I was in. I knew it was time to head for home, however, when at the very last event in this marathon, at a dinner in Manchester, Ohio, which is in Adams County, I could not recall the name of the university that I was president of!

These tours give me the opportunity to see the work of our faculty in the field and the factory. One theme that is readily apparent when you get out into the communities of this beautiful state is that our research, teaching, and service are making a difference to the people of Ohio. Clearly, all of us share a commitment to enhancing each aspect of our three-part mission. Last month it was a particular pleasure for me to take part in an induction ceremony for our newly formed Academy of Teaching. This is an exciting step that builds on a long tradition of excellence in teaching at Ohio State. We inducted almost 100 faculty at all ranks, from academic units across our campuses, who have demonstrated outstanding teaching abilities. We are asking them, through the Academy, to become "teaching ambassadors," telling audiences across our campuses and around the state about our teaching success stories. And, they will advise me and the Office of Academic Affairs on important issues related to our teaching mission so that we can build on the strong base of teaching that currently exists.

To continue our pursuit of excellence, you have before you today the appointments of two individuals who bring to us outstanding experience and exceptional skills. I am delighted to recommend to you Dr. Randall Ripley as the dean of the College of Social and Behavioral Sciences. As a leading national scholar in the fields of public policy and Congress, Dr. Ripley had a significant role in bringing our political science department to national prominence during his years as chair. Since April of last year, he has done a superb job as acting dean of the college, and I know that he will continue to provide strong and effective leadership.

I am also pleased to recommend to you Dr. Dominic Dottavio as the dean and director of The Ohio State University at Marion. That by the way ought to make you very happy, John. The Ohio State University at Marion, as you well know, is one of our regional campuses and this position will mark a return for him to Ohio State, where he received his bachelor's degree before going on to Yale and Purdue for his graduate work. The very able search committee and members of the Marion community were particularly impressed with Dr. Dottavio's scholarly and administrative credentials, and with his enthusiasm.

Enthusiasm is definitely a word that captures not only The Ohio State University, but the spirit of our women's basketball team and its many fans. As you are well aware, they are co-champs of the Big Ten and tomorrow in Atlanta, they will enter Ohio
President Gee: (contd)

State's first-ever Final Four in women's basketball as they face Iowa. I am very impressed with these student athletes because they win, and clearly they win in the right way...in the classroom, the community, and on the court.

We do indeed have much of which to be proud. A recent survey reported in the March 22 issue of U.S. News & World Report ranked Ohio State's College of Medicine second among the top comprehensive medical schools in the nation. Congratulations by the way, Manual.

As we continue on our path of national and international distinction, I would like to mention the April 23 workshop for our academic leaders and Board members on Strategic Opportunities in Russia. Given our substantial international programs and involvements, along with the new circumstances in Russia, the workshop will explore issues and implications for higher education and Ohio State. I know that we all look forward to a vigorous and lively exchange with leading Russian experts, and certainly we will attempt to understand the quickly changing scene in the former Soviet Union. Ohio State's leadership role can be expanded to the benefit of our state and nation.

Finally, I would like to report on our initiatives under way that will continue to encourage equity and diversity in the university community. As many of you know, three university committees reviewing equity-related issues submitted their reports in the fall. An institutional response related to the work of these committees was released last week. The actions outlined in this document are only a beginning, and I expect deans, chairpersons, vice presidents, and managers to provide the leadership to achieve our objectives. Similarly, I expect all faculty and staff to work together with our students in making Ohio State a truly diverse community characterized, I might note, by civility, tolerance, and mutual respect.

Mr. Chairman, this completes my report and I thank you.

--0--

RESEARCH FOUNDATION REPORT

Mr. Celeste:

You will find a summary of the Grants and Contracts received by The Ohio State University Research Foundation during the month of February at Tab 1 in your Research Foundation Report. The awards for the period July through February from Federal sponsors continue to increase and are up 8.4 percent. However, the total awards are down about 5 percent. Most of this decrease is due to one large multi-year award received last year that we've mentioned before.

At Tab 2 you will find expenditure summaries for the month of February. Total expenditures have increased 5.2 percent and indirect cost recovery is up 4.7 percent.

Some new projects of special interest that were funded in the month of February are listed at Tab 3. I thought you might be interested that Professor Richard Howell in the Department of Educational Policy and Leadership has been funded by the
April 2, 1993 meeting, Board of Trustees

RESEARCH FOUNDATION REPORT (contd)

Mr. Celeste: (contd)

Department of Education to develop a prototype music system for children with physical disabilities. This system will expand and enhance the artistic opportunities which contribute to healthy development and learning in childhood.

In another Department of Education study under the direction of Professor Arnold Mokma, the Agricultural Technical Institute has formed a partnership with a local industry to implement a workplace literacy program. It is expected that about 80 percent of the employees will volunteer for competency assessment or training in reading, writing, listening, math, and teamwork skills.

I thought you might also be interested to know that this week, I had the pleasure of meeting with Professor Robert Wagoner, Chairperson of Materials Science and Engineering, to discuss his activities relating to defense conversion. He is one of several faculty working to position themselves to take advantage of funding opportunities under the Technology Reinvestment Project authorized by the Defense Conversion, Reinvestment, and Transition Assistance Act of Fiscal Year 1993.

At Tab 4 is the list of all projects funded in February.

Tab 5 includes press releases issued by University Communications highlighting recent research activity.

Effective February 1, 1993, the Research Foundation entered into a Memorandum of Agreement with the College of Engineering for purposes of enhancing the services to faculty in the College. Pre-award and development services will be provided through staff holding joint appointments between the Research Foundation and the College, all in collaboration with other staff of the Research Foundation. Post-award activities will be provided by the Research Foundation in the same manner as for all other University units. As a result, this is the last month for a regular report of grant and contract activity from the Engineering Experiment Station. The Engineering Experiment Station may report to the Board on other activities from time to time.

REPORT OF RESEARCH CONTRACTS AND GRANTS

Resolution No. 93-104

Synopsis: The reports on research and other sponsored program contracts and grants and the summary for February 1993 are presented for Board acceptance.

WHEREAS monies are solicited and received on behalf of the University from governmental, industrial, and other agencies in support of research, instructional activities, and service; and

WHEREAS such monies are received through The Ohio State University Research Foundation and the Engineering Experiment Station of The Ohio State University:

NOW THEREFORE

BE IT RESOLVED, That the research agreement between The Ohio State University and The Ohio State University Research Foundation for the contracts and grants reported herein, and the acceptance of the reports from the Engineering Experiment Station during the month of February 1993 be approved.
April 2, 1993 meeting, Board of Trustees

REPORT OF RESEARCH CONTRACTS AND GRANTS (contd)

Upon motion of Mr. Celeste, seconded by Mr. Colley, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

UNIVERSITY DEVELOPMENT REPORT

Mr. Celeste:

As you can see from the report, total giving from private sources is up 47 percent through the first seven months compared to the same period last year. Individual giving continues to be strong, up 28 percent compared to last year, in part due to four major gifts totaling $5.3 million.

Corporate giving continues to run ahead of last year largely due to two gifts-in-kind reported earlier. Factoring out the gifts-in-kind, we are still up 8 percent in corporate giving cash receipts.

Private foundation giving is lagging behind last year largely due to the fact that two major gifts totaling $1.1 million were received by this time last year, but similar gifts have not been received yet this year.

Of the $50.7 million in private support recorded so far this year, $14.1 million will go to the endowment of the University. This endowment increase is 47 percent above the same time last year.

Are there any questions about any of the sections of the report? If not, I would like to recommend to the Board the establishment of 9 new named endowed funds totaling $506,863 in restricted support to the University. I am also recommending the establishment of one designated chair (current use) in the amount of $75,000 per year for three years, and the revision of the name and/or description of two previously established named endowed funds.

REPORT ON UNIVERSITY DEVELOPMENT

Resolution No. 93-105

Synopsis: The report on the receipt of gifts and the summary for February 1993 are presented for Board acceptance.
REPORT ON UNIVERSITY DEVELOPMENT (contd)

WHEREAS monies are solicited and received on behalf of the University from alumni, industry, and various individuals in support of research, instructional activities, and service; and

WHEREAS such gifts are received through The Ohio State University Development Fund and The Ohio State University Foundation; and

WHEREAS funds have been received through the Development Fund to establish The NCR Designated Chair in Biodynamics; and

WHEREAS this report includes the establishment of nine (9) new named endowed funds and amendments to two (2) endowment funds:

NOW THEREFORE

BE IT RESOLVED, That the acceptance of the report from The Ohio State University Development Fund and The Ohio State University Foundation during the month of February 1993 be approved.

Upon motion of Mr. Celeste, seconded by Mr. Shumate, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

REPORT ON UNIVERSITY DEVELOPMENT (contd)

ESTABLISHMENT OF NAMED DESIGNATED CHAIR

The NCR Designated Chair in Biodynamics

The NCR Designated Chair in Biodynamics was approved April 2, 1993, by the Board of Trustees of The Ohio State University, with a pledge of $75,000 per year for three years from the NCR Corporation and the first annual gift having been received.

The annual gift shall be used to provide support for the work of an outstanding faculty member in the Department of Industrial and Systems Engineering who is affiliated with the Department's Biodynamics Laboratory. This professor shall be recommended by the Chairperson of the Department of Industrial and Systems Engineering through the Dean of the College of Engineering to the Provost, and approved by the Board of Trustees.

The designated chair may be renewed at the prevailing amount and term at the time of renewal.

$75,000.00

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND

Establishment of Named Endowed Funds

The R.A. Bloch Cancer Foundation Endowment Fund

The R.A. Bloch Cancer Foundation Endowment Fund was established April 2, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from Richard and Annette Bloch for the development and maintenance of the Cancer Survivors Park at The Ohio State University Chadwick Arboretum, Columbus, Ohio.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income, and principal when necessary, shall be used for the development of the Cancer Survivors Park at the Chadwick Arboretum. These expenditures include, but are not limited to:

1. the construction, installation and interpretation of landscape spaces whether new, additional or renovation of existing grounds, plantings, structures, art objects and buildings of the Arboretum;

2. the maintenance of the above whether as supplies, services, equipment and labor in the form of permanent and/or temporary wages; and

3. the interpretation of the site in the form of signage and educational programming.

The Ohio State University Chadwick Arboretum Coordinating Council shall have responsibility for and must approve all expenditures from the fund. Any principal remaining after the construction phase shall be left in the endowment fund to provide for future maintenance, repair, and care of the Cancer Survivors Park.
Establishment of Named Endowed Funds (contd)

The R.A. Bloch Cancer Foundation Endowment Fund (contd)

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

$250,000.00

The Gerhard M. Kuechle Mechanical Engineering Scholarship Fund

The Gerhard W. Kuechle Mechanical Engineering Scholarship Fund was established April 2, 1993, by the Board of Trustees of The Ohio State University, with a gift to The Ohio State University Development Fund from Gerhard M. Kuechle (B.M.E. '24).

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide one or more scholarships to worthy students majoring in mechanical engineering who have completed their freshman year. Selection shall be based on academic merit. Recipients will be eligible for renewed awards as long as each maintains progress towards a degree and high academic standards. The selection shall be made by the Dean of the College of Engineering in consultation with the Chair of the Department of Mechanical Engineering and the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

$100,000.00

The Charles D. Hill Equine Nutrition Fund

The Charles D. Hill Equine Nutrition Fund was established April 2, 1993, by the Board of Trustees of The Ohio State University, with a bequest to The Ohio State University Development Fund from Charles D. Hill, Chief Executive Officer and President of the Scioto Downs Corporation, and preeminent owner and breeder of Standardbred horses.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support equine research and educational programs within the Department of Animal Science (or its successor administrative unit). Utilization of income shall give
REPORT ON UNIVERSITY DEVELOPMENT (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Establishment of Named Endowed Funds (contd)

The Charles D. Hill Equine Nutrition Fund (contd)

special attention to neonatal nutrition and management and to reproductive problems involving nutrition and management of pregnant females. Allocation of income for the aforementioned purposes shall be at the discretion of the Chairperson of the Department of Animal Science with concurrence by the Vice President of Agricultural Administration and Dean, College of Agriculture.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

$50,000.00

The Linda and Larry Abbott Athletic Scholarship Fund

The Linda and Larry Abbott Athletic Scholarship Fund was established April 2, 1993, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from Linda (B.S., Occupational Therapy, 1970) and Larry Abbott (B.S., Finance '70; M.B.A. '80), Columbus, Ohio.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to supplement the grant-in-aid scholarship costs of student athletes who are members of the varsity men's basketball team pursuing undergraduate degrees at The Ohio State University. Recipients shall be selected by the Director of Athletics in consultation with the University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees as recommended by the Director of Athletics in order to carry out the desire of the donors.

$20,000.00

The Dale R. Pflaumer Athletic Scholarship Fund

The Dale R. Pflaumer Athletic Scholarship Fund was established April 2, 1993, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from family and friends in memory of Dale R. Pflaumer (B.Cer.E. '58).

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.
Establishment of Named Endowed Funds (contd)

The Dale R. Pflaumer Athletic Scholarship Fund (contd)

The annual income shall be used to supplement the grant-in-aid scholarship costs of the Senior Head Football Manager who is pursuing an undergraduate degree at The Ohio State University. If the Head Football Manager is not a senior, the underclassman serving as the Head Manager may be the recipient. In all cases, the recipient must be carrying a minimum of 12 academic credit hours per quarter and have a minimum G.P.A. of 2.00. The recipients must be making satisfactory progress towards a degree. Recipients shall be selected by the Director of Athletics in consultation with the University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees as recommended by the Director of Athletics in order to carry out the desire of the donors.

$18,845.00

The Carl W. and Mary Alice Groppe Large Animal Research Fund

The Carl W. and Mary Alice Groppe Large Animal Research Fund was established April 2, 1993, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from Mary Alice Groppe, Salem, Ohio, in memory of her husband, Carl W. Groppe (D.V.M. ’32).

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be distributed to the College of Veterinary Medicine in support of research into cures for diseases of large animals.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

$18,018.00

The Donna Sell Kohlhepp and Daniel B. Kohlhepp Scholarship Fund

The Donna Sell Kohlhepp and Daniel B. Kohlhepp Scholarship Fund was established April 2, 1993, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University Development Fund from Daniel B. Kohlhepp (Ph.D., Business Administration '74) and Donna Sell Kohlhepp (B.S.Nurs. '74) of Baltimore, Maryland.
Establishment of Named Endowed Funds (contd)

The Donna Sell Kohlhepp and Daniel B. Kohlhepp Scholarship Fund (contd)

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide for scholarships to entering or currently enrolled female students who are majoring in real estate or nursing. Scholarship recipients shall be selected on financial need with preference being given to students who exhibit leadership skills and who are active in extracurricular activities. Selection of the award recipients shall be made by the University Committee on Student Financial Aid in consultation with the scholarship coordinators in each of the respective program areas.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

$15,000.00

The Williams County 4-H Endowment Fund

The Williams County 4-H Endowment Fund was established April 2, 1993, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from Glen and Irma Fitzenrider (B.S.H.E. '43) of Bryan, Ohio.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support the Williams County 4-H Program. This support may include, but is not limited to, funding of youth development, educational activities, and trips; volunteer development, educational opportunities, materials, seminars, and workshops; and increasing the visibility and public support for 4-H in Williams County. All expenditures from this fund shall be approved by the Williams County 4-H Advisory Committee and the professional in charge of the Williams County 4-H Program.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees with preference being given to recommendations from the Director for The Ohio State University Extension, in consultation with a committee representing the local 4-H donors, in order to carry out the desire of the donors.

$15,000.00
Change in Name and Description of Named Endowed Fund

The Robert M. Estrich Fellowship Fund was established October 5, 1990, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from Alice E. Estrich of Columbus, Ohio, colleagues, friends and former students in memory of Robert M. Estrich (M.A., English '29; Ph.D., English '35), Professor Emeritus, The Ohio State University Department of English. The name of the fund and description were revised April 2, 1993.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide one or more fellowships for graduate students in the English Department of the College of Humanities while writing dissertations for the degree of Doctor of Philosophy. If no candidate appears during the appropriate period, whose qualifications meet the approval of the committee, then the grant which would have been awarded at that time shall revert to and become part of the principal of the fund. The committee selecting the recipient of the grant shall be composed of the Dean of the College of Humanities, the Chairperson of the Department of English, a senior professor in the English Department, and a senior graduate student of the English Department.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

Change in Description of Named Endowed Fund

The Harry W. Ebert Scholarship in Welding Engineering was established April 5, 1985, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from Harry W. Ebert (B.W.E. '48), his family, friends and associates. The description was revised April 2, 1993.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used primarily to support worthy welding engineering students. Each Ebert Scholar shall have proven academic ability. Preference shall be given to (1) immigrants and children of immigrants; (2) veterans of the U.S. Armed Forces with a minimum of two years of honorable service; (3) members or graduates of an advanced R.O.T.C. program; and (4) other deserving welding engineering students. If welding engineering is no longer offered as a major at The Ohio State University, then other engineering graduates shall be considered using the same selection criteria. If the University ceases to award any engineering degrees, then qualified
REPORT ON UNIVERSITY DEVELOPMENT (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Change in Description of Named Endowed Fund (contd)

Harry W. Ebert Scholarship in Welding Engineering (contd)

candidates among mathematics and physical science majors shall be eligible. Selection of each recipient shall be made by the Chairperson of the Department of Welding Engineering in conjunction with the Dean of the College of Engineering and in cooperation with the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

THE OHIO STATE UNIVERSITY FOUNDATION

Approval of Description and Establishment of Named Endowed Fund

The Shirle N. and William King Westwater Fund

The Shirle N. and William King Westwater Fund was established April 2, 1993, by the Board of Trustees of The Ohio State University through funds received by the University from The Ohio State University Foundation, which has established an endowed fund with gifts from Shirle Nesbitt Westwater and William King Westwater (B.A., Economics '35), Columbus, Ohio.

Income provided by the Foundation shall be divided equally between the President of The Ohio State University and the Dean of the College of Medicine and shall be expended by them without restriction.

$20,000.00

FISCAL AFFAIRS COMMITTEE MEETING

Mr. Shumate:

For our first item of business this morning, I'd like to call upon Vice President Janet Pichette to present the resolutions to the Board.

Ms. Pichette:

Thank you, Mr. Chairman. These first two resolutions will continue the process we began at the February meeting to initiate design work on projects funded by House Bill 904, the Biennial Capital Appropriations Bill. We have included in your materials, a summary sheet showing the status of those capital appropriations. The two resolutions today, address the first two entries on the summary for a total of 12 new line-item projects. With these resolutions, we'll proceed with about $53 million
FISCAL AFFAIRS COMMITTEE MEETING (contd)

Ms. Pichette: (contd)

of the $62 million appropriated. At the May meeting, we plan to present resolutions for the remainder of the appropriations except for those renovation funds that might be held in reserve for emergencies.

The first resolution covers new line-item projects for which only planning funds were appropriated. So it authorizes only design work for those five projects listed and the total is $4.88 million. I would be happy to answer any questions and would like a motion to approve this resolution.

EMPLOYMENT OF ARCHITECTS/ENGINEERS

Resolution No. 93-106

PROJECTS FUNDED BY AMENDED SUBSTITUTE HOUSE BILL 904

Synopsis: The Fiscal Affairs Committee recommended the employment of Architects/Engineers for projects funded by Amended Substitute House Bill 904.

WHEREAS authorization to employ architects/engineers for the following projects is recommended:

- Life Science Research Building - Planning
- Instructional and Academic Building - Planning
- Conference Center - ATI - Planning
- Student Services Building - Newark - Planning
- Food Science and Technology Building - Planning

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to select qualified architectural/engineering firms as necessary for these projects and that the fees for these services be negotiated between the firm selected and the University or State of Ohio, as appropriate.

Upon motion of Mr. Shumate, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix XXX for background information, page 667.)

--0--

Ms. Pichette:

This resolution, Mr. Chairman, will authorize the University to proceed with seven other projects for which total project funds were appropriated in House Bill 904. The total amount is $21,544 million. We seek your approval to hire design professionals and request construction bids for these projects.
EMPLOYMENT
OF ARCHITECTS/ENGINEERS AND
REQUEST FOR CONSTRUCTION BIDS
Resolution No. 93-107

PROJECTS FUNDED BY AMENDED SUBSTITUTE HOUSE BILL 904

Synopsis: The Fiscal Affairs Committee recommended the employment of Architects/Engineers and request for Construction Bids for Projects funded by Amended Substitute House Bill 904.

WHEREAS authorization to employ architects/engineers and request construction bids for the following projects is recommended:

- Poultry Building Replacement - OARDC
- Horticulture and Entomology Greenhouse - OARDC
- Stillman Hall Addition
- Poultry Science Facility - Phase 1A
- Composting Research Facility - OARDC
- Library and Classroom Building - Marion
- Health Sciences Library Improvements

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to select qualified architectural/engineering firms as necessary for these projects and that the fees for these services be negotiated between the firm selected and the University or State of Ohio, as appropriate; and

BE IT FURTHER RESOLVED, That the President and/or Vice President for Business and Administration be authorized to request construction bids on these projects in accordance with established University and State of Ohio procedures, and if satisfactory bids are received, to recommend the award of contracts to the Department of Administrative Services, Division of Public Works, or to award contracts, with all actions to be reported to this Board at the appropriate time.

Upon motion of Mr. Shumate, seconded by Mr. Colley, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix XXXI for background information, page 671.)

PURCHASE OF REAL PROPERTY
Resolution No. 93-108

43-47 1/2 NORTHWOOD AVENUE
COLUMBUS, OHIO

Synopsis: Authorization to purchase improved real property at 43 - 47 1/2 Northwood Avenue in Columbus, Ohio, is proposed.
PURCHASE OF REAL PROPERTY

43-47 1/2 NORTHWOOD AVENUE
COLUMBUS, OHIO (contd)

WHEREAS The Ohio State University has been presented with an opportunity to purchase four lots located at 43-47 1/2 Northwood Avenue in Columbus, Ohio; and

WHEREAS this property has an appraised value of $137,000 to $185,000 and the owners, Dr. Charles W. Pavey, Sr., Nancy Pavey Martin, W. Heckman, et al., of Columbus have offered to sell these lots to the University at a price of $150,000; and

WHEREAS this property is adjacent to University property that is the site for a new facility to house the University's Family Practice Center, the Office of Human Resources' Employment Services, and a community center, and the appropriate University offices have determined that these lots are required to provide adequate parking for the faculty and that the purchase of this property is in the best interest of the University; and

WHEREAS funds for the purchase will be provided from the Northwood/High Building project account:

NOW THEREFORE

BE IT RESOLVED, that the President and/or Vice President for Business and Administration be authorized to purchase, in the name of the State of Ohio for the use of The Ohio State University, the four lots located at 43-47 1/2 Northwood Avenue at a price not to exceed $150,000, upon such terms and conditions as are deemed to be in the best interest of the University, subject to the University receiving the necessary approvals from the Ohio Board of Regents and the State Controlling Board.

Upon motion of Mr. Shumate, seconded by Mr. Skestos, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix XXXII for background information and map, page 675.)

PURCHASE OF REAL PROPERTY
Resolution No. 93-109

1618 HIGHLAND STREET
COLUMBUS, OHIO

Synopsis: Authorization to purchase improved real property at 1618 Highland Street in Columbus, Ohio is proposed.

WHEREAS The Ohio State University has been presented with an opportunity to purchase the improved real property located at 1618 Highland Street in Columbus, Ohio; and

WHEREAS this property has an average appraised value of $128,000.00, and the owner, American National Red Cross has offered to sell the property to the University at a price of $105,000.00; and

WHEREAS this property is located within the South Campus acquisition boundary of the University's Master Plan and the appropriate University offices have determined that the purchase of this property is in the best interest of the University; and
PURCHASE OF REAL PROPERTY (contd)

1618 HIGHLAND STREET
COLUMBUS, OHIO (contd)

WHEREAS funds for the purchase will be provided from general University funds:

NOW THEREFORE

BE IT RESOLVED, That the President and/or the Vice President for Business and Administration be authorized to purchase, in the name of the State of Ohio for the use of The Ohio State University, the improved real property located at 1618 Highland Street at a price not to exceed $105,000.00, upon such terms and conditions as are deemed to be in the best interest of the University, subject to the University receiving the necessary approvals from the Ohio Board of Regents and the State Controlling Board.

Upon motion of Mr. Shumate, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix XXXIII for background information and map, page 679.)

EASEMENT
Resolution No. 93-110

UNITED TELEPHONE SYSTEM
MANSFIELD CAMPUS

Synopsis: The Fiscal Affairs Committee recommended authorization to grant an easement for the installation of fiber optic cable on University property located on the Mansfield Regional Campus along County Road 133 and the immediate vicinity.

WHEREAS the United Telephone System has requested a 15-year easement consisting of a strip of land approximately 15 feet in width and approximately 1,233 feet in length and an additional strip of land approximately 30 feet in width and approximately 37 feet in length all for the installation of underground fiber optic cable at the Mansfield Regional Campus along County Road 133 and the immediate vicinity; and

WHEREAS this easement will serve private property, and United Telephone System will compensate the University with a lump sum payment of $500.00 to cover administrative costs; and

WHEREAS the appropriate University offices have recommended the approval of this easement:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to request the Deputy Director of Public Works of the Department of Administrative Services, to act for and on behalf of the University in developing the necessary legal instruments to provide for this easement.

Upon motion of Mr. Shumate, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix XXXIV for map, page 683.)

--0--
Mr. Shumate:

Mr. Chairman, our next item of business deals with the subject of benefits and I am going to call upon Vice President Linda Tom to present this resolution.

Ms. Tom:

The first resolution in your book has to do with the award of the Claims Administration Services Contract to Central Benefits Mutual Insurance Company. In our continuing efforts to improve the administration and cost effectiveness of our medical plans, the University determined that we would benefit by consolidating our administration from three administrators to one administrator for the University's medical plans.

We had an open bid process and received eight bids. We had a committee that was comprised of faculty and staff who reviewed the bids. It is now recommended that we award the contract to Central Benefits Mutual Insurance Company at the cost of $69,280 a month and the numbers for the various plans are indicated in the resolution. I'll be happy to answer any questions?

**AWARD OF MEDICAL PROGRAMS CLAIMS ADMINISTRATION SERVICES CONTRACT**

Resolution No. 93-111

Synopsis: The Fiscal Affairs Committee recommended the award of claims administration services for the University's medical insurance benefits programs.

WHEREAS after specification and proposal forms were mailed to twenty-one companies: eleven attended a pre-bid conference, eight of which submitted proposals for consideration; and

WHEREAS William M. Mercer, Incorporated was employed to assist the Vice President of Human Resources in the investigation and analysis of the proposals; and

WHEREAS the appropriate University offices have reviewed the proposals, and based on financial considerations, claims processing capability and other administrative services to be provided, it is the recommendation of the Office of Human Resources that the lowest responsive and responsible bid be awarded the University contract. This bidder is Central Benefits Mutual Insurance Company. Quoted rates are:

<table>
<thead>
<tr>
<th>Type of Medical Plan</th>
<th>Administrative Cost Per Person Per Month</th>
</tr>
</thead>
<tbody>
<tr>
<td>OSU Health Plan</td>
<td>$4.23</td>
</tr>
<tr>
<td>Traditional Health Plan</td>
<td>$4.23</td>
</tr>
<tr>
<td>Buckeye Health Plan</td>
<td>$4.23</td>
</tr>
<tr>
<td>Exclusive Provider Organization</td>
<td>$4.23</td>
</tr>
<tr>
<td>Individual Conversion Policy</td>
<td>$.10</td>
</tr>
</tbody>
</table>

Total Monthly Cost for 16,000 Faculty and Staff $69,280.00

NOW THEREFORE
AWARD OF MEDICAL PROGRAMS CLAIMS
ADMINISTRATION SERVICES CONTRACT (contd)

BE IT RESOLVED, That the contract for claims administration services for the University's medical insurance benefits plans be awarded to Central Benefits Mutual Insurance Company for a one-year period effective July 1, 1993, with the administration fee and the performance of the administrator to be reviewed annually. This administrative services contract will remain in force after the initial term until the University deems it appropriate to review the designation of the administrator and/or seek a new price quotation.

Upon motion of Mr. Shumate, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

Mr. Shumate:

Our next agenda item is on the topic of premium holiday and I, again, call upon Vice President Tom.

Ms. Tom:

At the February 4 meeting, the Board approved the University reducing its medical reserve from 20-25 percent to 5 percent. Again, this was part of our ongoing effort to improve our benefits program administration and we reviewed the practice of maintaining reserves for our health plans.

As a little bit of background, in the mid-'70s our reserves were maintained at about 20-25 percent and this was at a time when the University's medical plans were carried through insurance programs. The purpose of the reserves was to handle fluctuating claims from month to month, but also to protect the insurance companies in the event that the University would cancel the contracts with them and that they could cover open and unreported claims. However, in the mid-'80s the University went from an insurance approach to a self-insurance modality.

When we reviewed the reserves, we felt that it was really not essential to keep the reserves at the same level because the likelihood of the University going out of business is really low to none existent. So we asked Mercer, as our benefits consultant, to review our claims reserves and it was their recommendation that we would be able to deal with the fluctuating claims for the University's programs with a 5 percent reserve. So the recommendation was that we would lower the reserve levels to 5 percent and this would be implemented in April. But to do that we would have to return the portion to the employees from their contributions. To have that portion of the claims returned to the employees, we would be declaring what we would call a Premium Holiday. I will be happy to answer any questions.

Mr. Shumate:

Are there any questions? I would remind the Members of the Board that we do have a letter that is part of the file of minutes from William Mercer supporting their recommendation. This resolution is simply to return to the employees that portion of the rate that they contributed to these policies.
PREMIUM HOLIDAY

Resolution No. 93-112

Synopsis: The Fiscal Affairs Committee recommended the approval of a premium holiday for the month of April 1993.

WHEREAS as a part of the medical claims calculation process it has been determined that a claim revenue of five percent (5%) of paid claims would be adequate to cover an appropriate margin for claim fluctuation; and

WHEREAS this Board approved at its February 4, 1993 meeting, the administration's recommendation to maintain a medical claims reserve consistent with the advise from William Mercer Inc.; and

WHEREAS it has been determined that as a component of the medical claims reserve reallocation process, a premium holiday should be authorized for University faculty and staff for the month of April 1993:

NOW THEREFORE

BE IT RESOLVED, That in accordance with the recommendation of President Gee, the Vice President for Human Resources is hereby authorized and directed to implement a premium holiday for the month of April 1993.

Upon motion of Mr. Shumate, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

COMPLIANCE WITH REGULATIONS OF THE OHIO PUBLIC FACILITIES COMMISSION

Resolution No. 93-113

Synopsis: The Fiscal Affairs Committee recommended authorization for the designated officials to ensure compliance with regulations of the Ohio Public Facilities Commission.

WHEREAS pursuant to Chapter 154 of the Revised Code and the regulations of the Ohio Public Facilities Commission, each State Institution of higher education, to which funds are appropriated in Amended Substitute House Bill 904 enacted by the 119th General Assembly, is required to authorize a designated official to sign and submit to the Ohio Public Facilities Commission documentation required with respect to the individual projects for which funds are appropriated; and

WHEREAS in submitting this documentation each institution is required to permit the Commission to use designated institutional sites for the purpose of these projects and to agree to undertake the performance of the functions and responsibilities of a using governmental agency as provided in the Commission's regulations with respect to such projects:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to complete, sign, and submit to the Ohio Public Facilities Commission documentation required by the Commission for any or all of the projects for The Ohio State University provided for or pursuant to the appropriations made under Section 51 of Amended Substitute House Bill 904 enacted by the 119th General Assembly; and
COMPLIANCE WITH REGULATIONS OF
THE OHIO PUBLIC FACILITIES COMMISSION (contd)

BE IT FURTHER RESOLVED, That this Board agrees to permit the Ohio Public Facilities Commission to use designated University sites for the purpose of such projects, the boundaries of which will be shown in the plans for such projects, for so long as the respective notes, if any, and bonds issued to finance the project shall be outstanding; and

BE IT FURTHER RESOLVED, That this Board agrees to undertake performance of the functions and responsibilities of a using governmental agency and of a designated governmental agency to the extent is it such as provided in the regulations of the Ohio Public Facilities Commission and any applicable leases, agreements, or rules of the Commission with respect to such projects.

Upon motion of Mr. Shumate, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

FISCAL AFFAIRS COMMITTEE MEETING (contd)

Mr. Shumate:

At this time, I would like to call upon Mr. Nichols to present the background information for the approval of a Tuition Option Payment Plan. The Board members may recall that this information was previously mailed and there is a memo attached to the resolution dated February 22, 1993, that provides the details and background. Mr. Nichols --

Mr. Nichols:

Today we are bringing before you for your approval a tuition option payment plan. In recent years there have been cost increases in higher education, greater difficulties in getting student financial aid, and also greater competition among schools. We have been adding various financial and administrative options to students to attract them.

In line with that is the tuition option plan, which is basically a periodic plan for the payment of student fees. Each of the students that choose to participate in the plan would make three payments per quarter, instead of making one payment per quarter. This would allow those students that want to do it on a periodic basis to do so. We estimate approximately 4,000 students out of our student body will participate in the plan. There is a nominal administrative fee as there is for insurance. If you're going to pay on a periodic basis there is no interest charged on any of the deferred payments.

We anticipate this to begin Autumn Quarter 1993 and it has the approval of all University offices. It has the approval of the undergraduate and graduate student governments and it also received an extremely high favorable rating from students in a poll that was taken. This will not require any additional general revenue fund expenditures. We present this for your approval.

Mr. Shumate:

Are there any questions? Trustee Cusack, would you like to make any comments?
Ms. Cusack:

Yes. I just want to say that students are in good favor of this plan and it actually originated in the graduate student government and then through the Undergraduate Student Government. Students are really happy about the plan going through and happy about how quickly it came about.

Mr. Shumate:

Any other comments or questions?

Mr. Nichols:

Mr. Chairman, with your permission, I would like to introduce to you the three people that were primarily responsible internally for this at the next Board meeting.

Mr. Shumate:

That's fine. Any other comments?

**APPROVAL OF TUITION OPTION PAYMENT PLAN**

Resolution No. 93-114

Synopsis: The Fiscal Affairs Committee recommended approval of the Tuition Option Payment Plan (TOPP).

WHEREAS in recent years there have been cost increases in attending institutions of higher education, insufficient financial aid funding and greater competition with other colleges and universities for students; and

WHEREAS other Big Ten and Ohio universities have established some form of periodic or deferred payment plans; and

WHEREAS establishment of a tuition payment plan has the support of all involved University offices, the Undergraduate and Graduate Student Governments, and a very positive response from a polling of students; and

WHEREAS a tuition payment plan further extends quality service to the students while not requiring additional general fund expenditures:

NOW THEREFORE

BE IT RESOLVED, That the proposal to create a tuition option payment plan, effective for the next academic year, is hereby approved; and

BE IT FURTHER RESOLVED, That the Treasurer is authorized to establish and operate a tuition option payment plan in accordance with the outline of the program in the attached materials.

Upon motion of Mr. Shumate, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

(See Appendix XXXV for background material, page 685.)

--0--
Synopsis: The Academic Affairs Committee recommended, on behalf of the Steering Committee of the University Senate and the Undergraduate Student Government, the support of the Regional Campuses.

WHEREAS the Steering Committee of the University Senate and the Undergraduate Student Government approved and forwarded to this Board the following resolution:

"On behalf of the Steering Committee and the Undergraduate Student Government we present the following:

BE IT RESOLVED, That the University Senate affirms that:

The Regional Campuses of the Ohio State University represent an important resource for the State of Ohio and for the University. As ports of entry to Ohio State for location bound students, the campuses provide significant support to the maintenance of Ohio State's time honored land grant tradition, with its emphasis on accessibility and quality. Further, the regional campuses provide a transition for those students who can profit from an opportunity to begin their college careers in a more intimate environment. Regional campus faculty are valued members of the broader university, and the regional campuses make numerous important contributions to the communities that they serve.

At the same time, the Senate recognized that the University in all of its aspects is in the process of self examination and change, and we welcome and applaud the efforts of the University to continue to improve the regional campuses and their relationships with Columbus. Such efforts at reform and renewal can only serve to strengthen our institution as a whole.

The Senate requests that the President carry this Resolution forward to the Board of Trustees."

NOW THEREFORE

BE IT RESOLVED, That the proposed resolution, on behalf of the Steering Committee of the University Senate and the Undergraduate Student Government, has the full support of the Board of Trustees.

Upon motion of Mr. Celeste, seconded by Mr. Colley, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

NAMING OF TENNIS CENTER

Resolution No. 93-116

Synopsis: The Academic Affairs Committee recommended the naming of the Stickney Tennis Center.
NAMING OF TENNIS CENTER (contd)

WHEREAS this Board has authority in naming of all buildings and structures at The Ohio State University, as set forth in paragraph (F) of rule 3335-1-08 of the Administrative Code; and

WHEREAS upon the recommendation of the President, with the concurrence of the President's Executive Committee, it has been proposed that the twelve tennis courts located north of and adjacent to the Woody Hayes Athletic Facility on Olentangy River Road be named the Stickney Tennis Center; and

WHEREAS this naming request would recognize the dedication and the generosity of the Stickney family, which has provided for the renovation of six existing tennis courts and the construction of six new tennis courts; and

WHEREAS the six pre-existing and renovated tennis courts will continue to be known as the Wirthwein Tennis Facility (so named by action of the Board of Trustees on February 7, 1975) and will be part of the Stickney Tennis Center:

NOW THEREFORE

BE IT RESOLVED, That hereafter the above-described facility will be known as the Stickney Tennis Center.

Upon motion of Mr. Celeste, seconded by Mr. Shumate, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

DISTINGUISHED SERVICE AWARDS
   Resolution No. 93-117

Synopsis: The Academic Affairs Committee recommended the approval for eight individuals to receive Distinguished Service Awards.

WHEREAS the President's Executive Committee, serving as a Committee on Distinguished Service Awards, has nominated and recommended eight individuals for approval by the Board of Trustees to receive the Distinguished Service Award at a time convenient to the University and the recipients:

Shirley Dunlap Bowser
Andrew J. Broekema
Dorothy M. Davis
John G. Kramer
John G. McCoy
John Mount
Marlene Owens Rankin
Chalmers Wylie

WHEREAS these awards are given in recognition of distinguished service to The Ohio State University and the awards are in accordance with action taken by the Board of Trustees in 1952:

NOW THEREFORE
DISTINGUISHED SERVICE AWARDS (contd)

BE IT RESOLVED, That the Distinguished Service Award be approved for awarding as designated above.

Upon motion of Mr. Celeste, seconded by Mr. Skestos, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

PERSONNEL ACTIONS

RESOLVED, That the personnel actions as recorded in the Personnel Budget Records of the University since the March 12, 1993 meeting of the Board, including the following Appointments, Reappointment of Principal Administrative Official, Appointment of Chairperson, Reappointment of Chairperson, Leave of Absence Without Salary, and Promotion with Tenure--Correction of Dates as detailed in the University Budget be approved.

Appointments

Name: F. DOMINIC DOTTAVIO
Titles: Dean and Director, and Professor
Campus/School: Marion Campus/Natural Resources
Effective: August 15, 1993
Salary: $82,008.00
Present Position: Chief Scientist and Associate Regional Director, U.S. Department of Interior, National Park Service, Atlanta, GA

Name: RANDALL B. RIPLEY
Title: Dean
College: Social and Behavioral Sciences
Effective: April 1, 1993
Salary: $145,008.00
Present Position: Acting Dean, College of Social and Behavioral Sciences and Professor, Department of Political Science

Reappointment of Principal Administrative Official

JOHN M. CASSADY, Dean, College of Pharmacy, effective July 1, 1993, through June 30, 1998, pursuant to rule 3335-3-17 of the Administrative Code.

Appointment of Chairperson

October 1, 1993 through September 30, 1997

Accounting and Management Information Systems Lawrence A. Tomassini

Reappointment of Chairperson

July 1, 1993 through September 30, 1997

History of Art Christine B. Verzar
April 2, 1993 meeting, Board of Trustees

PERSONNEL ACTIONS (contd)

Leave of Absence Without Salary

NANCY E. ANDREWS, Assistant Professor, Department of Classics, effective Spring Quarter and Autumn Quarter 1993, and Winter Quarter 1994, to conduct research.

Promotion with Tenure--Correction of Dates

ELLEN S. NEWMAN, Associate Professor, Department of Theatre, change promotion with tenure from October 1, 1992, to January 1, 1993.

Upon motion of Mr. Celeste, seconded by Mr. Shumate, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

RESOLUTIONS IN MEMORIAM

Resolution No. 93-119

Synopsis: The Academic Affairs Committee recommended the approval of four Resolutions in Memoriam.

RESOLVED, That the Board adopt the following Resolutions in Memoriam and that the President be requested to convey a copy to the families of the deceased.

Brewton Berry

The Board of Trustees of The Ohio State University expresses its sorrow upon the death, on March 4, 1993, of Brewton Berry, Professor Emeritus in the Department of Sociology.

Professor Berry was born in Orangeburg, South Carolina, on August 9, 1901. He graduated Cum Laude from Yale University, where he was a Fogg Scholar, winner of the Archibald High Scholarship prize, and, upon graduation, was awarded the Day Traveling Fellowship to the University of Edinburgh, Scotland, where he received his Ph.D. degree (1930). He began his professional career in 1931 at the University of Missouri as the Curator of the Anthropological Museum and Director of the Archeological Survey of the State of Missouri. He was the Head of the Department of Sociology at the University of Rhode Island during 1945-46. In 1946 he came to The Ohio State University as Professor of Sociology and Anthropology and upon his retirement in 1963 became Professor Emeritus.

He served on the Editorial Board of The Ohio State University Press for a number of years and was editor of Ohio Valley Sociologists and an associate editor of the American Sociological Review for a time. He was the author of 13 books, including You and Your Superstitions, Education of American Indians, Almost White, and Race Relations. He was also a Fellow of the American Anthropological Association, a member of the American Sociological Association, and a member and past president of the Ohio Valley Sociological Society. He is listed in Who's Who in America, Who's Who in the World, Contemporary Authors, and International Authors' and Writers' Who's Who.

On behalf of the University, the Board of Trustees expresses to the family of Professor Berry its deep sympathy and sense of understanding of their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.
RESOLUTIONS IN MEMORIAM (contd)

William M. Brooks

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on March 2, 1993, of William M. Brooks, Professor Emeritus in the Department of Horticulture.

Professor Brooks was born on July 12, 1923, in Continental, Ohio, and served his country during World War II as a sergeant in the United States Army Air Force, primarily in England, from 1943 to 1945. Upon his return to civilian life, he held several positions in state government before completing his Bachelor of Science degree at Ohio University in 1954. He decided to continue his education by entering Ohio State where he earned his Master of Science degree in horticulture in 1957. Following the completion of his graduate work at Ohio State, he joined the faculty at West Virginia University and then returned to Ohio State in 1958 as Extension horticulturist in the Department of Horticulture where he retired in 1984 as professor emeritus.

His major areas of expertise involved the production and marketing of vegetables, both outdoors and under glass. In addition to his national reputation for his sweet corn work where he gave leadership to the Ohio cultivar evaluation trials, he assisted industry groups in other states, Canada, and Columbia with greenhouse educational programs.

Throughout his career and even in retirement, he continued to assist various organizations with educational programs to help Ohio citizens. This included such organizations as the Ohio Vegetable and Potato Growers Association, Ohio Fruit Growers Society, Ohio Florists Association and the Ohio Potato Growers Association. For many years, he was an active member of the planning committee for the well-known Ohio Roadside Marketing Conference which he attended regularly.

Professor Brooks always had time to counsel with students and new faculty. For many years, he was an advisor to the Ohio Junior Horticultural Association. His membership in professional societies included the American Society for Horticultural Science, National Agricultural Plastics Association, and Bedding Plants, Inc.

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy and sense of understanding to his family. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Henry Rene Velkoff

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on February 17, 1993, of Henry R. Velkoff, Professor Emeritus in the Department of Mechanical Engineering.

Professor Velkoff, Hank to his colleagues, was born in Cleveland, Ohio, on May 14, 1921. He received his B.S. in Aeronautical Engineering from Purdue University in 1942, his M.S. in Mechanical Engineering from Ohio State in 1952 and his Ph.D. from Ohio State in Mechanical Engineering in 1962. After graduating from Purdue, Dr. Velkoff worked for the Lockheed Aircraft Corporation and NASA Langley Field where he developed his initial expertise in helicopter rotors. He joined the Wright Field Propeller Laboratory as a project engineer for helicopter rotor design in 1944. Over the next twenty years Dr. Velkoff directed a variety of programs in rotary wing and VTO rotor research and development. He rose to be Chief of the gas turbine development branch responsible for helicopter and VTO aircraft drive systems and rotor research and development. During this period he directed the development of the T-53 and the T-55 gas turbine rotor drive systems for the UH-1 and CH-47 helicopters. From 1959 to 1963 he also served as consultant in the electric and
RESOLUTIONS IN MEMORIAM (contd)

Henry Rene Velkoff (contd)

advanced propulsion branch and served as an independent research scientist in the application of the interaction of electrostatic fields with fluids. Professor Velkoff conducted the original research in this area as related to convection and condensation coupled with applied electric fields.

Dr. Velkoff joined The Ohio State University in 1963 as a Professor in the Department of Mechanical Engineering. He taught undergraduate and graduate courses in turbomachinery, gas turbines, advanced heat transfer and magnetohydrodynamics. He directed graduate students on the effects of ions on gaseous boundary layers and in the areas of fatigue, damage indicators, rotor non-steady flow and rotor boundary layers. In 1972-74 he took a two-year leave of absence and served as Chief Scientist of the U.S. Army Aviation research at Ames Research Center, Moffett Field, California. In this position he oversaw all of the research and development activities for the U.S. Army Aviation. He evaluated and planned overall education and training programs for all engineers and scientists within the laboratory. He returned to the University in 1974, where he served until his retirement in 1987.

Professor Velkoff was a Honorary Fellow of the American Helicopter Society. He was a member of many professional organizations including the American Institute for Aeronautics and Astronautics, American Helicopter Society, and the American Society of Mechanical Engineers. He was honored by the Air Force for his research on electrostatics, and received certificates of achievement as members of the Army Advisory group on aviation. He was also a member of the Tau Beta Phi and Sigma Phi Honor Societies and was honored with the MacQuigg Award for the outstanding engineering teacher.

Dr. Velkoff was known as an international expert in the area of helicopter rotor dynamics. This field motivated his research activities at the University, and was his center of focus for two decades. He was also one of the early developers of the use of applied electric fields to influence fluid motion.

He was well respected by his colleagues and students who held him in high esteem for his concern and interest in teaching. Dr. Velkoff was one of those individuals who integrated his research interests with his strong dedication to undergraduate teaching. Developing a synthesis between these two aspects he stimulated and motivated his students. Hank was truly concerned that his students were not merely accumulating facts but rather, learning how to make facts live. This is the mark of an educator who knows that long after he is forgotten, individuals whom he had taught or would teach others, would be moving to a measure of this thoughts.

On behalf of the University, the Board of Trustees, expresses to the family of Professor Velkoff, its deep sympathy and sense of understanding of their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Richard F. Wilson

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on February 19, 1993, of Richard F. Wilson, Professor Emeritus in the Department of Animal Science. Dr. Richard F. Wilson was born on January 8, 1920, on a farm in Saskatchewan, Canada, where he lived for seventeen years until his family moved to Iowa. He received his B.S. degree from Iowa State University in 1943. Graduate work was done at the University of Illinois where he received an M.S. degree in 1946 and Ph.D. degree in 1949; both degrees were in Animal Science. He taught two years at South Dakota State University and spent thirty-five years at The Ohio State University.
RESOLUTIONS IN MEMORIAM (contd)

Richard F. Wilson (contd)

in teaching and research in the Department of Animal Science. He retired from The Ohio State University in 1985.

Dr. Wilson authored and coauthored eighty-one research articles in swine production and nutrition. He was in charge of the Columbus OSU swine teaching and research herd and served for many years as secretary-treasurer of the Ohio Swine Breeders and Feeders Association. For his outstanding service to the swine industry, he received the Ohio Pork Producers Council Service to the Industry Award in 1990.

Professor Wilson also contributed to the Department of Animal Science through service on committees such as Farm Science Review, Graduate Studies Committee, Scholarship and Student Recognition Committee, and Interdepartmental Physiology Committee. He was a member of the American Society of Animal Science, Gamma Sigma Delta, and Sigma Xi professional societies.

Dr. Wilson enjoyed traveling and was a leader of Goodwill People-to-People trips to Eastern Europe, Australia, and New Zealand. He was a volunteer leader in Boy Scouts of America programs for thirty-nine years and received the Silver Beaver Award as well as the District Award of Merit from the Boy Scouts of America.

On behalf of the University community, the Board of Trustees expresses its sympathy and understanding to his family and friends. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees as an expression of the Board's heartfelt sympathy.

Upon motion of Mr. Celeste, seconded by Mr. Colley, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

Mr. Celeste:

What I'd like to do at this point is to call on Ed Hayes. You will find in the back of your notebooks the items that we'd like to talk about. I think it is the last three pages relative to, "What Does It Mean for Ohio State to be a Comprehensive Research Institute?" What I would like to suggest to the Board members, at Ed's request, is that this be a two-way process. If you have questions, feel free to interrupt at any point.

"WHAT DOES IT MEAN FOR OHIO STATE TO BE A COMPREHENSIVE RESEARCH INSTITUTE?"

Dr. Hayes:

Thank you very much. I think it is quite appropriate that this be an important item under Academic Affairs. I think that as we do strategic planning for the University, it's very important to see research and scholarship as an integral part of making Ohio State the best academic institution that it can possibly be. I think that is a very important context because one is aware that research and scholarship are carried out in other locations in addition to universities. But when we think about research and comprehensive research universities, it is important to understand how that supports the academic mission of the University.
"WHAT DOES IT MEAN FOR OHIO STATE TO BE A COMPREHENSIVE RESEARCH INSTITUTE?" (contd)

Dr. Hayes: (contd)

In sort of promoting the idea that we might make this a dialogue rather than a monologue, I challenge you to just write down on a piece of paper -- in a sense a word association -- when you think about a comprehensive research university, what comes to mind? What do you think about? In terms of our communication, I think it is important to understand whether we mean the same things. What kinds of associations do we make, and more importantly, how do you see it supporting the academic mission of Ohio State University?

Mr. Shumate:

In responding to your question that teaching and research are part of the same process how about learning.

Dr. Hayes:

Other thoughts? How many of you would think of the feline leukemia-virus vaccine?

Ms. Cusack:

I guess to play the devil's advocate role, I also see them pulling at each other -- which we have obviously experienced at this University. A lot of times students may feel that it takes the teacher out of the classroom. I think of that in the comprehensive research institution.

Dr. Hayes:

I think that is one of the important tensions to recognize is that there are, within the institution, various forces that focus the attention of faculty, students, and staff on various aspects of the educational mission of the University. One of the reasons I was preferring my remarks by saying I think it's important to see research as an integral part of the educational mission is because if you see research as a separate goal of the University then you see it as a separate goal that is in parallel and in competition with delivering teaching, particularly classroom teaching. It seems to be that conceptually we get into this problem of well is it one or the other? If you think about this as a pyramid, where at the top what we are trying to do is to deliver to our students the very best educational opportunities, it gives you a framework to set down, think about, and work through these kinds of conflicts.

Mr. Skestos:

From time to time, I have read different things and it seems as though research is very much maligned. One, it's maligned because we don't show the importance it has to teaching. And two, I don't think we do a good enough job of telling the public what we are doing research on. Too many times the perception out there is that this is just some professor's idiosyncrasy that he is following through, expending funds, and not spending the time on what the University is all about. The value of research needs to be better communicated as to what we are doing, why we are doing it, and how important it is to the students and to the public.
"WHAT DOES IT MEAN FOR OHIO STATE TO BE A COMPREHENSIVE RESEARCH INSTITUTE?" (contd)

Dr. Hayes:

That is a very good comment. If I could just put a footnote on this, I'd like to enter into a discussion of the concept of teaching and the concept of learning. I think in communication often we focus on the input side and talk about what contributes in the classroom. As part of this discussion, one of the examples I'd like to use is Project Discovery. The learning by discovery mode, as opposed to the learning -- which sometimes we think of as the ideal model -- where you have a teacher in front of a classroom delivering materials. The aspect of a college education, where I think research becomes very important, is opening up opportunities for students to discover through a much broader set of experiences what it is that we think we know, and how we got to the point that we think we know that.

Mr. Celeste:

We had a good example of that with Hamish Fraser's example, where it was actually an undergraduate student who came up with a particular discovery in that case. There were research dollars being used, and an exciting new discovery came about through serendipity.

Dr. Hayes:

That is a great example. In fact we've had students at this institution who have done work that has led to patents and copyrights and other kinds of things. They were immersed in this kind of environment where they had the opportunity to get hands-on experience with the discovery process. One of the important elements associated with a comprehensive research university that we are able to offer that a non-comprehensive university is not able to offer is that sort of challenge. The opportunity is here to come to Ohio State and get into the laboratory, whether it's a science laboratory, an engineering laboratory, or in the social and behavioral sciences, and actually go beyond what is in the text book.

Ms. Cusack:

Along the lines of what George was saying about communication, I think that also starts in the classroom. In talking with deans, I have noticed that a lot of professors will say, "Students don't know what's going on in the classroom." But we need to be told. We don't know what is going on in the laboratory unless somebody tells us. We are not just going to stumble into a laboratory on our way to class. I think that whole area of communication can be improved. The professors should communicate a little more about the significance of what they are doing outside of the classroom and how that relates to the students.

President Gee:

I think that's an enormously important point that was just made here. Again, it is a fact that we are sort of a closed circle. We all talk in codes in academic life and we need to reinterpret those codes so that people understand what they are doing. I think that our faculty can really do a much better job of explaining what they are doing in the classroom.
"WHAT DOES IT MEAN FOR OHIO STATE TO BE A COMPREHENSIVE RESEARCH INSTITUTE?" (contd)

President Gee: (contd)

I think there are a couple of points that we need to make about this issue. First of all, George, to come back to your point, there are 3,600 colleges and universities in this country. They are not all the same, nor should they be the same. I believe for example, that at a very fine, small liberal arts college they have a very particular mission that needs to be dealt with. And that is to teach and to teach well, all the time, in a very kind of committed atmosphere. That doesn't mean that we shouldn't teach and teach well, but it means that they have a very particular role. The community colleges have a very particular role and that is the transmittal of knowledge. They ought to be teaching a lot and they ought to be expected to teach a lot in those regards. The regional universities have a role which is to do some limited research, but to again transmit that research.

One of the things that I think that we have to understand -- and I don't want to spend a lot of time on this -- is that we made a fundamental decision in this country in terms of basic research. By the way, the thing that has propelled us into the leadership in the world is the fact that we have had better ideas than anyone else. But we made a fundamental decision that went this way, that instead of creating government research institutes or instead of recreating research centers that were basically federally funded, that the vast bulk of creative work in this country would be done in our universities. And the federal government and others would fund that through the National Institutes of Health, the National Science Foundation, and so forth.

This is an amazing figure. There are 3,600 colleges and universities, 80 percent of all of the basic research done in universities are done in fewer than 50 universities. The second part of this is that of the basic research done in this country, about 80 percent of it is done in universities. So you see the particular role universities have been given. Those 50 universities, of which Ohio State is one, have a very particular charge for the national health in terms of creating knowledge and then transmitting it.

We have never done a good job of looking at that from the pyramids point of view. So when someone is reading the Cincinnati Inquirer or The Columbus Dispatch or the Cleveland Plan Dealer, and they think about faculty teaching, they think of this amalgamation of faculty -- community colleges, regional universities, the liberal arts, and so forth. We need to do a better job of communicating and we need to start with our own classrooms and faculty. So many of the ideas that are brought into our classrooms by faculty are things that are done in direct relationship to what they have done outside, in terms of the teaching mode, but they don't relate that.

The other thing that is revealing to me is we had a group of undergraduate students talking to juniors and these were all honors students. We have 3,500 honors students at the University, but every one of those honors students talked about the research that they were doing with faculty. In fact, one young man is leaving to go with Professor Gregory to Greece. One of four or five undergraduates in this country is able to go over and do research. The fact that we do have this relationship is almost unique among universities, and I think we need to tell that story.
Ms. Cusack:

It took me almost until my senior year to know that people were even doing that.

President Gee:

But you are a Trustee of the University -- think of what other people think.

Ms. Cusack:

Right, and I'm a very involved student. This just proves the point that we're not all hearing about it. Yes, those honors students are hearing about it, but there's a lot more going on out there than that.

Mr. Barone:

I think you've got to stop thinking that research is a separate issue from teaching and teaching is a separate issue from research. When I was on the Research Foundation Board, I felt our research department did outstanding work. We have some students who do much better in research -- learning by doing. Some learn much better by not doing, but by learning through knowledge. If you try to separate the two, I think you are making a big mistake. I think they are both equally important, and that both research and teaching are necessary. They are a very essential part of an education.

Not long ago, we had a fellow by the name of Kettering. Kettering was probably not the best student at Ohio State, but Kettering was the best researcher. Learning how to do research and getting the results is what counts, and that's what research and learning is. I don't think you can separate the two. You've got to work the two together to get the best results. After being on the Research Foundation Board, that is the conclusion I came to. I feel strongly that when an effort is made to separate the two -- the value of one against the other -- it is like saying which is most important my left leg or my right leg. I need them both!

Dr. Hayes:

One of the things this means to Ohio State is that we're actually in the process of an evolution. The level of undergraduate participation and research is not what it's going to be in the future and what it needs to be in the future. I'm pleased to be able to tell you that the Honors Program has been helping us and working with the Research Foundation. They have been dealing precisely with this problem, documenting at a higher level than it has in the past, what the opportunities are for undergraduates, and cases where undergraduates have significantly enhanced their experiences here at Ohio State, as a result of opportunities that have existed.

The comments also have been made, which I think may be obvious but sometimes missed, that many universities use this availability of research participation as a real carrot to bring in the highest quality students. I think that as we put together our materials to let people know why Ohio State is the right place for them, it is not only important that we get the message out to students internally, but to those students who are in the process of deciding what institution is best for them. We want to let them know the opportunities that exist here. In many instances, when
Dr. Hayes: (contd)

you go to four-year colleges, junior colleges, and other parts of the 2,000 plus undergraduate institutions they don't have these opportunities. It will help them make the right decision if that is their particular orientation.

If you would look at the material that is at your place, at the ten key planning areas. The ten points are what I have talked about with faculty, the University Senate, and others as being ten key points in planning for research. I am not going to go through all of these today, but I did want to give you an overview. I thought I would focus on the first point and the last point. Namely, the Human Resources part of this equation, as well as the Technology Transfer.

In terms of the Human Resources part of this equation, quality faculty, graduate students, and staff with a research orientation are a very important part of the equation of making Ohio State a first-rate educational institution. Increasingly, the start-up packages for faculty are very important. Historically, Ohio State and other institutions have not had to budget for the same level of start-up packages that are now required to bring researchers to the institution. It gives them the chance to get started in their research activities, so that they're competitive for external funding.

The resources that Mr. Celeste reports to you each month are the result of faculty being competitive with people around the country. In many instances, these are in competitions in which one out of ten people are going to be funded. So it is very intense competition. To get to that point, our faculty in general need to have a demonstrated track record that they can perform and carry out research in the Ohio State environment. In terms of graduate students and post-doctoral fellows, some faculty will tell you that they don't know which comes first, the quality graduate students and post-doctoral fellows, or the quality research. Because the mode in which Gordon was talking about, the coupling of the education of graduates, undergraduates, and post-doctoral students with the research that uniquely takes place in the University -- and it has been responsible for the strength of basic research in this country -- depends upon having quality faculty and quality students.

One of the issues that I wanted to bring to your attention for some discussion is the third bullet on page two under Human Resources. This is a proposal that is being discussed broadly here on campus with respect to research faculty.

Mr. Shumate:

Before leaving the second point, have we lost many, in terms of the number of graduate students that we use at the University, as a result of budget cuts over the past 18 months?

Dr. Hayes:

On the specific issue of stipends and fringe benefits, I'd say the following: this past year we have seen a significant reduction in the number of entering graduate students and I think that is strictly driven by financial considerations. Some of it is related to the uncertainty that was being experienced at the department level.
WHAT DOES IT MEAN FOR OHIO STATE TO BE A COMPREHENSIVE RESEARCH INSTITUTE? (contd)

Dr. Hayes: (contd)

Departments did not want to make offers to potential graduate students because they were uncertain about whether they could provide the funding for the stipends and fringe benefits for graduate students. This is an issue that in our planning we have to think through very carefully, how do we keep from having further erosion in that area.

Mr. Shumate:

That was my sense. I was just wondering what, if anything, we were doing. Since it is an important component of Human Resources, and the thrust for making OSU a comprehensive research institution, what initiatives or programs do we have in place to try to deal with this?

Dr. Hayes:

We have been working with Academic Affairs to try to be as clear as possible with departments about the resources that are going to be available to support graduate students. Uncertainty works against us in this area. We have also been talking with Bill Shkurti, from a budget point of view, on whether there are strategic investments that we will be able to make either this year or in the future that will help us both with the number and quality of graduate students.

Let me move into the research faculty fellow proposal. The basic thrust of this proposal is to open up a new mechanism for bringing nationally competitive researchers to Ohio State that would be completely funded by external resources. These people would not be tenured. So that if some point in the future, 5, 10, 20 years down the road the source of funding dried up, we would not have a long-term commitment to continue funding of these researchers.

The proposal that is being circulated in the University was developed by the University Research Committee. There is a great deal of discussion with people feeling very strongly about issues like tenure: What does this mean for the tenure system?; What does it mean to be in a laboratory in which the person next to you is spending full-time on research and you are a faculty member who is doing teaching, University service, and research?; How does this all come together in a way that will be productive for the University?

There are a number of other research universities that have such positions and they have worked out mechanisms that are appropriate for them. I think the challenge for us is to figure out what is right for Ohio State. Is this the right place and time to be introducing research faculty? What I have been trying to facilitate is a broader discussion. Some of you may be aware of other situations or may have thoughts on this particular idea, and I would be happy to open that particular proposal up for discussion.

Mr. Celeste:

Based on the timing with what you hope to accomplish, maybe this is something we can do at a separate session. I think we only have a little more time.
WHAT DOES IT MEAN FOR OHIO STATE TO BE A COMPREHENSIVE RESEARCH INSTITUTE? (contd)

Dr. Hayes:

O.K. Let me just move on then to the other item, Technology Transfer. On page 5, there is a review of what we are doing presently. The basic thread here is that we have an office that accepts invention disclosures, they make determinations with respect to whether or not there is a basis for pursuing patents, and the office also markets the intellectual property. We have the bulk of our royalty income related to the feline leukemia vaccine. We have a growing number of invention disclosures and patents coming through this office. What has been recommended by the Research Foundation Board is that we put out an RFP, and have an outside group come and look at what we are doing, how we are organized, and figure out whether we are organized in the appropriate way. If not, what our options are for moving forward in this particular area.

One of the concerns is that in focusing on technology transfer we want to do this in a way that is consistent with the educational mission of the University. It is possible to become so focused on technology transfer as a separate goal that it again competes with what our main mission is. So in thinking about this, this is very much on our minds.

Mr. Celeste:

One of the things that I think about is that as a land-grant institution and having the support that we do, that this technology transfer area allows us an opportunity to leverage some dollars that are invested in the University to support the business community in the state through technology transfer. There is a major opportunity to really leverage dollars through this process.

Dr. Hayes:

I would say it is also an opportunity to open up experiences for students, as well as faculty. In some areas the presence of an active technology transfer program is very important in terms of attracting people to the University or keeping people here that might otherwise be drawn away to an environment where these opportunities existed.

I'd like to move to the University Research Park. This is another aspect of creating the type of environment which supports the educational mission of the University. It is another area in which one can be so focused on the Research Park aspects of this that it detracts from our main mission, but we are looking for a way to go about bringing into full blossom our Research Park. On page 7, there is a mission statement that is under discussion. One of the ways in which technologies might move out of our laboratories and become businesses, as well as opportunities for students to have hands on experiences with small and medium size business operations, is if we had more such activities. If we had a business incubator in our Research Park, for instance. And, again, that is the context in which we are thinking about the Research Park.
Mr. Celeste:

One of the things I have had the benefit of, that I think the others may not have, would be to get a handle on that area. Perhaps if we could have a tour of the area that you are talking about, to really see what is there, that might be useful.

Dr. Hayes:

Yes, I think that would be very important to do. I'd also like to underscore the fact that we are working very closely in this area with Business and Administration -- Janet Pichette's people -- in terms of trying to understand what our options are there. I think working with them we could put together a fine tour and give you a better overview of what the opportunities are there.

There is currently underway at the state level, under the Ohio Science and Technology Council, an effort to identify key technologies. At your places you will find a report on the key technologies. This is our submission to the Ohio Science and Technology Council as to key areas from the perspective of Ohio State. These areas are where we believe we have existing strengths and interests, in terms of our faculty research interests, but also in terms of the coupling of those research interests with academic programs. Two of these areas, advanced materials and the Biotech Center, have been areas of emphasis over a number of years in terms of building up our research capability. We have invested in these two areas over the last five years quite significantly. In addition, there are several areas which we believe are strategical positions for further development. We are going to be talking not only to the Ohio Science and Technology Council, but with business leaders throughout the state to make them aware of what our capabilities are and our plans for the future in these key areas. I'd be happy to answer questions on the specifics.

Mr. Shumate:

Going back to page one of your outline -- what are budget cross-cuts?

Dr. Hayes:

Good question. The basic notion is that this is a short-hand for the importance of looking at the present budget of the University. In this particular case, you can write down the colleges and the various vice presidents' areas. That is one way of looking at the University's budget. The cross-cut that we have in mind for research is to now come back and look at that, build a column, and say how much each one of these budgets contribute to the research vitality of the University. One of the important areas has to do with research space. That is a key impediment to expanding the research and scholarship on the Ohio State campus. If, in fact, we are going to double or triple the amount of research which is going on at the Ohio State campus over the next 5 to 10 years, there are important space implications. So one needs to find in what parts of the budget are these provided for. Similarly, you mentioned graduate students, what are those aspects of the budget that affect graduate student recruitment, retention, and stipends? We don't have a separate line-item for research, which has all of the research funding within
Dr. Hayes: (contd)

the University. In fact, the majority of the funding for research, as it affects our activities, is not through the Office of Research. So if you want to get a good picture of the whole enchilada, if you will, you have to pay attention to budgets in many different areas and that is the significance of that.

One of the activities, which is currently underway, is to focus very much on space. Where do we need space for research? Where do we need renovation? Where do we need upgrade of space for health and safety reasons so that we get a specific focus on that? It is not that other aspects of the budgets are not important. But it is important to recognize that if you are trying to develop a strategic plan and if you are trying to follow through on that, you have to pay attention to all of those items of the budget that may turn out either to be helpful or significant impediments.

Mr. Celeste:

Are there other questions?

Mr. Shumate:

Is that your goal, to double or triple the research in the next 5 to 10 years?

Dr. Hayes:

I would say that everything that I see in terms of what the capability is -- in terms of our size and the interest of the faculty -- would suggest that the potential is there to do that. The challenge is to do that in a way that supports the academic mission of the University. I feel uncomfortable with stating that as a goal outside the context of saying, "Look in doing that, we want to do it in a way that makes Ohio State a stronger and better educational institution."

Mr. Celeste:

Any other questions? Thank you very much for the presentation and this concludes the activity of the Academic Affairs Committee.

Mr. Barone:

At this time, I would like to say a few words -- I know it is time to adjourn. The last time I came to Wooster, my former secretary had moved here along with her husband, Frank Irons, and they worked for the State Institution in Agriculture. Both have passed away, but I wanted to say that when they found out that I was appointed to the Board of Trustees, they gave The Ohio State University $25,000.

That is not the only thing that is nostalgic here. A very close friend of mine graduated from here, his name was Frank Celeste; and Mrs. Celeste graduated from here, too. When I was appointed a Trustee Frank said, "Now, I want you to be a great Trustee." Little did he know that his son would be sitting on the Board at the same time. I know that somewhere he is very proud of what he does see.
April 2, 1993 meeting, Board of Trustees

Mr. Barone: (contd)

I have carried out and, God willing, if I make the next meeting, I will have attended all the meetings, as he advised me to do.

I would like to tell a little story about Frank Celeste, that a lot of you do not know. To me he had more charisma than any politician I have ever known. The time his son was running for Governor, there was a dinner planned but he was asked to go to another dinner. The dinner that I was having was mostly made up of Republicans. In fact, all Republicans -- Ottawa Hills. So Dick said, "Well, I can't attend that." I said, "Don't worry about it," and he said, "What do you mean, don't worry about it?" I told him, "Instead of you coming, I prefer to have your dad come anyway."

This is a true story -- we collected $35,000 from a group of Republicans at that dinner. I think Dick had collected -- I won't say how much, but about one-third of what we collected with Frank Celeste. Frank formed the Governor's Club, he formed everything.

With this story, I will adjourn the meeting. Once in a while it is good to add a little personal touch.

--0--

REPORT - UNIVERSITY'S ENDOWMENT FUND

Resolution No. 93-120

RESOLVED, That the report on the University's Endowment Fund, dated March 19, 1993, as submitted to the Investments Committee of the Board of Trustees, be received and filed with the official records of the Board.

--0--

Thereupon the Board adjourned to meet Friday, May 7, 1993, at The Ohio State University Fawcett Center for Tomorrow, Columbus, Ohio.

Attest:

Madison H. Scott
Secretary

John J. Barone
Chairman
THE OHIO STATE UNIVERSITY
OFFICIAL PROCEEDINGS OF THE
ONE THOUSAND TWO HUNDRED AND NINETY-SECOND MEETING
OF THE BOARD OF TRUSTEES

Columbus, Ohio, May 7, 1993

The Board of Trustees met at its regular monthly meeting on Friday, May 7, 1993, at The Ohio State University Fawcett Center for Tomorrow, Columbus, Ohio, pursuant to adjournment.

**     **

Minutes of the last meeting were approved.

**     **     **
May 7, 1993 meeting, Board of Trustees

The Chairman, Mr. Barone, called the meeting of the Board of Trustees to order on May 7, 1993, at 10:15 a.m. He requested the Secretary to call the roll.

Present: John J. Barone, Chairman, Deborah E. Casto, John W. Kessler, Milton A. Wolf, Leslie H. Wexner, Alex Shumate, Theodore S. Celeste, Michael F. Colley, George A. Skestos, Kristen Cusack, and Hiawatha N. Francisco, Jr.

PRESIDENT'S REPORT

President Gee:

Ladies and gentlemen, welcome today. As we approach the end of the academic year, the colleges, departments, and campus organizations turn their attention to recognizing outstanding achievement.

It is, indeed by any measure, the banquet season . . . and while we might joke about night after night on the "chicken and peas" circuit, we must not lose sight of the importance of these events in building community pride and enhancing the educational experience at this university.

Today, in that vain I want to highlight just a few of the recent accomplishments of our students as we are in the season in which we are celebrating those accomplishments. Frank Swenton, a junior majoring in mathematics from Columbus, was named a national Barry M. Goldwater Scholar. This very competitive fellowship is given to the most promising young scholars in mathematics and the natural sciences. He is so promising that I have absolutely no idea of what he is studying -- manifold classifications of the higher dimensions using algebraic topology! I can assure you that that is something that I don't understand.

Lora Birkefeld Younkman of Grove City won the national invention competition sponsored by BF Goodrich and the National Invention Center in Akron. A doctoral student in materials science and engineering, Ms. Younkman has developed a ceramic sensor that detects carbon monoxide. I might note that this is the third straight year that an Ohio State student has won this national competition.

Jennifer Spreitzer, a first-year M.B.A. student from Columbus, has been named one of eight recipients of the 1993 Business Fellowship in Japan. Co-sponsored by the Japan Society and the International House of Japan, this fellowship places students in internships with Japanese firms. Ms. Spreitzer took her undergraduate degree in Japanese and finance at Ohio State, and during that time lived in Japan for a year, attending a Japanese university. She is currently a graduate assistant in the Office of the University Treasurer in the Cash Management Department.

Dena Abdon, an elementary education and English major from London, Ohio, received the Franklin County Children's Services Volunteer of the Year Award for her work with children. She has served as a Friendship Volunteer for two youngsters, spending time with them as a sort of "Big Sister."

William Hoffman, a freshman from Concord, Ohio, was named Collegiate Bowler of the Year by the Bowling Writers Association of America. He also was named Rookie of the Year and first-team All-American by the National Collegiate Bowling Coaches Association. Bill is a member of Ohio State's Bowling Club. It is one of our very successful club sports activities.
President Gee: (contd)

Another club achieving great success is Ohio State's Equestrian Club. Last weekend, the team won the collegiate stock-seat championship -- that is western saddle riding. This is the third year in a row that we have won it -- unprecedented in the collegiate championships. The reason I note these, by the way, is that we tend to only think of our 31 intercollegiate sports. We have a number of club sports that compete on the national level and compete equally well with intercollegiate sports.

The students who work with our computer scoreboards in Ohio Stadium and St. John Arena won three awards from the Fifth Annual Golden Matrix Awards competition: best black and white matrix display, best color matrix display, and best original matrix animation. Ohio State was the only university to win in all of its categories. And we won first place in all of our categories and ours was the only school with students working on the staff. The awards are given by the Information Display and Entertainment Association.

The 1992-93 Ohio State Cheerleaders won the National Cheerleading competition in San Diego. They are the National Champions. You will be able to see their successful competition routines on ESPN throughout this month.

Our varsity student-athletes have had an exceptional year. While you have seen the results of individual teams from week to week in the newspaper, let me reel off a list of achievements that, when considered in total, underscore the excellence of our athletic programs. We were Big Ten Champions or Co-Champions in women's basketball, men's gymnastics, and indoor men's track. Ohio State also had the Big Ten Diver of the Year, and four Big Ten Coaches of the Year (so far): diving, men's track, men's soccer, and men's gymnastics. Ohio State won the collegiate national championship in synchronized swimming, and had 7 All Americans in that sport.

We finished second in women's basketball, and had one women's basketball All-American. Also going to the collegiate Final Four were the women's fencing foil team, finishing third in the nation, with 5 All Americans. Men's gymnastics went to the Final Four in their sport, finished third in the country, and had 5 All Americans. Men's Track finished fifth at the NCAA Indoor Championships, had 5 All Americans, and had one individual national champion. The wrestling team finished fifth in the NCAA tournament and had two national champions. And Pete Hansen and the men's volleyball team are in the Final Four at Pauley Pavilion tonight playing UCLA for a national title. When you hear all of these accomplishments at once, you appreciate the depth and breadth of the quality of our intercollegiate sports program.

Those of you on campus last weekend for the dedication of the Law Building also saw some of the colorful Medieval and Renaissance Festival in the Mirror Lake Hollow. And the Greek Week Games were taking place on the Oval. It is a busy season.

This week we celebrate Asian Awareness Week with a series of special events including an art exhibit in Bricker Hall. We also are observing AIDS Awareness Week on campus. And Saturday is the American Indian Pow Wow at the Ohio Union, kicking off Native American Awareness Week.
PRESIDENT'S REPORT (contd)

President Gee: (contd)

These and many other activities are organized largely by students, whose creativity and leadership provide outstanding programs. These events are an important part of campus life and enhance the education of our students. As part of the international panel presentation on the future of democracy at Mershon, Dr. Henry Kissinger, President Oscar Arias Sanchez, and Dr. Hans Dietrich Gencher also met with honors students in seminar discussions.

Wexner Center Artist in Residence, Ms. Maya Lin, a sculptor and architect, perhaps most recognized for her design of the Vietnam Memorial in Washington, is working with graduate students on the installation of an environmental sculpture for the university. She also has given a public lecture on her work.

There is no doubt that a great deal is happening at Ohio State, and that each of the people and achievements I have mentioned contributes to the quality of our university. Also enhancing our quality are several important personnel appointments on your agenda today. Let me say how delighted I am that Professor Richard Sisson is joining our faculty and will serve as senior vice president for academic affairs and provost. I am confident that you will find Dr. Sisson to be a dedicated and proven academic administrator as well as an outstanding scholar in the field of politics in India and South Asia.

I am pleased that Professor Gregory Williams will be joining our College of Law as Dean. Professor Williams brings with him outstanding credentials as an administrator. He joins the college at a very exciting time in its history. I have no doubt that with the exceptional new facilities and its highly committed faculty, our College of Law will reach ever increasing heights.

Finally, Mr. Chairman, I want to welcome today Mr. David Brennan, who will soon join this Board. I know that we look forward to his contributions to The Ohio State University. Mr. Brennan, if you would stand and be recognized we would like to note that.

Of course, even as we welcome a new trustee, we also say goodbye to our chairman. John Barone has been a dedicated board member whose commitment to improving our university has been steadfast. He has given strong direction to the institution. His concern for students, his insistence on quality, and his dedication to public service have inspired each of us. So therefore, John, it is my opportunity, and indeed my honor and responsibility today, to present something to you with a memento of our appreciation. In recognition of your outstanding service, I am pleased to present you with this gavel symbolic of your leadership. And I know you will use it to gavel down those people in Toledo when they get rowdy.

Thank you, Mr. Chairman.

Mr. Barone:

Thank you.

--0--
ELECTION OF OFFICERS
BOARD OF TRUSTEES

Resolution No. 93-121

Mr. Scott read the Nominating Committee's report in which the following slate of officers were recommended:

WHEREAS pursuant to paragraph (B) of rule 3335-1-02 of the Administrative Code, the officers of the Board are to be elected at the May meeting to take office immediately following adjournment of the meeting (May 7, 1993) and shall hold their office through the May 1994 meeting:

NOW THEREFORE

BE IT RESOLVED, That the following slate of officers for 1993-94 be elected:

Deborah E. Casto, Chairman
John W. Kessler, Vice Chairman
Madison H. Scott, Secretary
James L. Nichols, Treasurer

Upon motion of Mr. Celeste, seconded by Mr. Shumate, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

RESEARCH FOUNDATION REPORT

Mr. Celeste:

You will find a summary of the Grants and Contracts received by The Ohio State University Research Foundation during the month of March at Tab 1 in your Research Foundation Report. The two tables in this tab also include awards for the Engineering Experiment Station. In accordance with the recent agreement between the Research Foundation and the Engineering Experiment Station, the data for 1993 has been combined and for consistency sake the amounts in 1992 include EES data. In the first table, the awards for the period July through March from federal sponsors continue to show an increase of 6.4 percent. However, total funding from all sponsors is down about 4 percent. Most of this decrease is due to one large multi-year award received last year, which we referred to before. The second table provides a summary of fiscal year 1993 awards with the detail on how the awards would have been distributed between OSURF and EES prior to the merger.

At Tab 2 you will find expenditure summaries for the month of March. This table only includes OSURF expenditures because similar data for EES administered awards is not available in this format. Total expenditures have increased 4.7 percent and it is noteworthy that both federal and non-federal expenditures are following this trend.
RESEARCH FOUNDATION REPORT (contd)

Mr. Celeste: (contd)

Some new projects of special interest that were funded in the month of March are listed at Tab 3. These new projects are all in areas that the University has identified as Key Technologies. I thought you might be interested that Professors George Milo, Steven D’Ambrosio, and Randall Harris from the College of Medicine have been funded by the Ohio Water Development Authority to establish a Center for Molecular Environmental Health. This Center will focus on investigating the effects on human health of environmental contaminants.

And in honor of you, Mr. Chairman, I had the pleasure of visiting the laboratory of Professor Giorgio Rizzoni in the Department of Mechanical Engineering this week. He is funded by the Chrysler Corporation to evaluate the feasibility of using time-varying signal processing algorithms for improving something we all know -- the detection of knock in their 3.5 liter V6 engine.

At Tab 4 is the list of all projects funded in March.

At Tab 5 is a report of progress payments received by the Engineering Experiment Station for projects remaining with them and terminating before July 1993.

Tab 6 includes press releases issued by University Communications highlighting recent research activity.

As a follow-up to The Ohio State University Research Foundation Board meeting on March 26, 1993, I want to report that, following the review and recommendation of the OSURF Board, the Foundation has issued a Request for Proposals for the Management Review of The Ohio State University Research Foundation Technology Transfer Activities. The deadline for receipt of proposals is May 20, 1993, and we expect to have this review completed by the end of the summer.

REPORT OF RESEARCH CONTRACTS AND GRANTS

Resolution No. 93-122

Synopsis: The reports on research and other sponsored program contracts and grants and the summary for March 1993 are presented for Board acceptance.

WHEREAS monies are solicited and received on behalf of the University from governmental, industrial, and other agencies in support of research, instructional activities, and service; and

WHEREAS such monies are received through The Ohio State University Research Foundation:

NOW THEREFORE

BE IT RESOLVED, That the research agreement between The Ohio State University and The Ohio State University Research Foundation for the contracts and grants listed with the Report of March 1993 Grants and Contracts be approved.

Upon motion of Mr. Celeste, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.
RESEARCH FOUNDATION REPORT (contd)

Mr. Barone:

Thank you, Mr. Celeste. I think that you have done a wonderful job this year and I want to thank you personally.

--0--

HOSPITALS BOARD COMMITTEE REPORT

Mr. Skestos:

On April 8 the Professional Affairs/Education/Research Committee began its meeting with an executive session review of quality and resource management efforts, both hospital-wide and within the Trauma Service. The Committee was pleased to hear that although our Trauma Service receives patients with very severe injuries, our survival rates for those patients are significantly better than national averages. The Hospitals was certified in 1983-84 by the American College of Surgeons as meeting the criteria for a Level 1 trauma center, and we are confident their return visit this June will result in recertification. In open session we learned that the College of Medicine was very successful in placing this year's graduates in residency programs through the National Resident Match program; University Hospitals was also successful in attracting top students to our residency programs.

On April 22 the Strategic Planning Committee continued its review of the evolving healthcare market and strategies that will need to be implemented by large university teaching hospitals in order to survive and thrive in a rapidly changing environment. Also on April 22 the full Hospitals Board met. After receiving reports from the Medical Director and the Chief of Staff, we received an overview of the Hospitals' financial performance. Mr. Schrock discussed how Medicare and Medicaid reimbursement is affected by the Case Mix Index and how Medicare reimbursement is expected to change during the next several years. Ms. Insley reviewed proposed Hospitals Board Bylaws revisions, which were endorsed by the full Board and will be forwarded to the Trustees for final action. Lastly, we elected officers for the coming year: Dr. Donald Shackelford as Chairperson and Mr. William Bennett as Vice Chairperson.

UNIVERSITY HOSPITALS BOARD REAPPOINTMENTS

Resolution No. 93-123

Synopsis: Approval of the reappointments of University Hospitals Board members is proposed.

WHEREAS the Board of Trustees on November 30, 1979, approved the establishment of a University Hospitals Board; and

WHEREAS the membership of the Hospitals Board was approved on April 4, 1980, and has been subsequently amended; and

WHEREAS the term of two general public members of the Hospitals Board has expired:

NOW THEREFORE
UNIVERSITY HOSPITALS BOARD REAPPOINTMENTS (contd)

BE IT RESOLVED, That the following individuals be reappointed as general public members of the University Hospitals Board, for a three-year term, effective May 1, 1993:

Charlotte L. Immke
Grayce M. Sills

Upon motion of Mr. Celeste, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

Mr. Barone:

I want to thank you personally, too, George, for the fine work you have done on this Committee while I have been Chairman. I greatly appreciate it. You have made my job a lot easier.

--0--

CANCER HOSPITAL REPORT

Mr. Kessler:

I would like to present the following resolution:

REAPPOINTMENT OF THE OVERSIGHT COMMITTEE MEMBERS FOR THE ARTHUR G. JAMES CANCER HOSPITAL AND RESEARCH INSTITUTE

Resolution No. 93-124

Synopsis: The reappointment of the oversight committee members for The Arthur G. James Cancer Hospital and Research Institute is proposed.

WHEREAS The Arthur G. James Cancer Hospital and Research Institute admitted its first patients in July 1990 and now is fully operational; and

WHEREAS in June 1990 the Board of Trustees established the position of Trustee Liaison to the James Cancer Hospital during its initial phase of operations; and

WHEREAS in June 1991 the Board of Trustees established the Oversight Committee for The Arthur G. James Cancer Hospital and Research Institute to provide a formal oversight process for this unique interdisciplinary clinical and research facility to provide continuing involvement and support by this Board for the mission and operation of the James Cancer Hospital:

NOW THEREFORE

BE IT RESOLVED, That the Board of Trustees hereby reappoints, as a committee of this Board, The Arthur G. James Cancer Hospital and Research Institute Oversight Committee and approves the amended Policy Statement regarding the Committee’s membership and operation; and
REAPPOINTMENT OF THE OVERSIGHT COMMITTEE MEMBERS FOR
THE ARTHUR G. JAMES CANCER HOSPITAL AND RESEARCH INSTITUTE (contd)

BE IT FURTHER RESOLVED, That the following individuals be appointed as members of the Committee for 1993-94.

John W. Kessler, Chair
Alex Shumate
David E. Schuller, M.D.
R. Reed Fraley
William J. Shkurti
Edward F. Hayes
Henry G. Cramblett, M.D.

Upon motion of Mr. Kessler, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix XXXVI for background information, page 751.)

INVESTMENTS COMMITTEE REPORT

Amb. Wolf:

As the report shows, private gift support through the first three quarters of the year remains strong with a 49 percent increase over last year.

The only significant decrease in any category is that of private foundations which is down 24 percent. As previously reported, this is due to two major gifts of $1.1 million which were received by this time last year, but similar sized gifts have not been received yet this year.

I would also like to call your attention to how important major gifts are to the Development Fund. During the period July 1992 - March 1993, that is a nine-month period, we received 195 gifts of $100,000 or more totaling $30.2 million.

REPORT ON UNIVERSITY DEVELOPMENT

Resolution No. 93-125

Synopsis: The report on the receipt of gifts and the summary for March 1993 are presented for Board acceptance.
May 7, 1993 meeting, Board of Trustees

REPORT ON UNIVERSITY DEVELOPMENT (contd)

WHEREAS monies are solicited and received on behalf of the University from alumni, industry, and various individuals in support of research, instructional activities, and service; and

WHEREAS such gifts are received through The Ohio State University Development Fund and The Ohio State University Foundation; and

WHEREAS this report includes the establishment of thirteen (13) new named endowed funds and amendments to three (3) endowment funds:

NOW THEREFORE

BE IT RESOLVED, That the acceptance of the report from The Ohio State University Development Fund and The Ohio State University Foundation during the month of March 1993 be approved.

Upon motion of Amb. Wolf, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

Establishment of Named Endowed Funds

The Lawrence and Isabel Barnett Distinguished Visiting Professor Fund in Arts Policy and Administration

The Lawrence and Isabel Barnett Distinguished Visiting Professor Fund in Arts Policy and Administration was established May 7, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from Lawrence R. Barnett (B.S.Bus.Adm. ’88) and Isabel Barnett of Rye, New York.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support the teaching and other work of the Lawrence and Isabel Barnett visiting professor in Art Policy and Administration. The visiting professor shall be nationally and internationally recognized in the academic or arts community with expertise and experience in the business and policy aspects of the arts.

Duties of the visiting professor shall include, but is not limited to, teaching classes, seminars and workshops; meeting with individual and groups of students; giving public lectures; and participating in symposium and University arts community functions.

Appointment to the visiting professor position shall be made by the Dean of the College of the Arts and the Director of the School of Public Policy and Management upon recommendation of a faculty and student committee with representatives from the College of the Arts and the School of Public Policy and Management. Any unused income in any given year shall be returned to principal.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the Dean of the College of the Arts and Director of the School of Public Policy and Management in order to carry out the desire of the donors.

$260,000

The Lynn G. Wilkins Scholarship Fund for Teacher Education: St. Clairsville-Richland School District

The Lynn G. Wilkins Scholarship Fund for Teacher Education: St. Clairsville-Richland School District was established May 7, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from the estate of Lynn G. Wilkins (B.A., Political Science ’45; M.A., Political Science ’47).

All gifts are to be invested in the University’s permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.
Establishment of Named Endowed Funds (contd)

The Lynn G. Wilkins Scholarship Fund for Teacher Education: St. Clairsville-Richland School District (contd)

The annual income shall be used to provide one or more annual scholarships to students from the St. Clairsville-Richland School District who are entering The Ohio State University and plan to pursue an education for the purpose of teaching at the elementary or secondary level. If there is no eligible student, the scholarship may be awarded to a student from the St. Clairsville-Richland School District who is currently enrolled, including a former recipient who remains committed to pursuing the profession of teaching. Selection of the recipient shall be made by the district superintendent in conjunction with the high school principal(s) and in conjunction with the Dean of the College of Education and the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the Dean of the College of Education in order to carry out the desire of the donor.

$40,000

The Bert C. Wiley, M.D., Chair Fund in Physical Medicine and Rehabilitation

The Bert C. Wiley, M.D., Chair Fund in Physical Medicine and Rehabilitation was established May 7, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from an anonymous donor in honor of Bert C. Wiley, M.D., a graduate of The Ohio State University College of Medicine, Class of 1943.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

Additional gifts and annual income shall be applied to the principal until the Fund reaches $500,000 at which time it will be combined with The Bert C. Wiley, M.D. Endowed Professorship in Physical Medicine and Rehabilitation to establish a fully funded Chair at $750,000. Once funded, the annual income shall support a faculty chair position in the Department of Physical Medicine and Rehabilitation as recommended by the Chairperson of the Department of Physical Medicine and Rehabilitation and the Dean of the College of Medicine to the Provost and approved by the Board of Trustees.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the Dean of the College of Medicine, or program administrative officer in order to carry out the desire of the donor.

$35,000
Establishment of Named Endowed Funds (contd)

The Lynn G. Wilkins Scholarship Fund for Teacher Education: Barnesville Exempted Village School District

The Lynn G. Wilkins Scholarship Fund for Teacher Education: Barnesville Exempted Village School District was established May 7, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from the estate of Lynn G. Wilkins (B.A., Political Science '45; M.A., Political Science '47).

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide one or more annual scholarships to students from the Barnesville Exempted Village School District who are entering The Ohio State University and plan to pursue an education for the purpose of teaching at the elementary or secondary level. If there is no eligible student, the scholarship may be awarded to a student from the Barnesville Exempted Village School District who is currently enrolled, including a former recipient who remains committed to pursuing the profession of teaching. Selection of the recipient shall be made by the district superintendent in conjunction with the high school principal(s) and in conjunction with the Dean of the College of Education and the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the Dean of the College of Education in order to carry out the desire of the donor.

$30,000

The Herbert Norris Snowden, Jr. Athletic Scholarship Fund

The Herbert Norris Snowden, Jr. Athletic Scholarship Fund was established May 7, 1993, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from Herbert N. Snowden III of Columbus, Ohio, in honor of his father, a former member of the OSU Track Team.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to supplement the grant-in-aid scholarship costs of student athletes who are members of the men's varsity track team pursuing undergraduate degrees at The Ohio State University. Recipients shall be selected by the Director of Athletics in consultation with the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees as recommended by the Director of Athletics in order to carry out the desire of the donor.

$26,875
Establishment of Named Endowed Funds (contd)

The Russell E. Heinzelman Civil Engineering Scholarship Fund

The Russell E. Heinzelman Civil Engineering Scholarship Fund was established May 7, 1993, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University Development Fund from Mrs. Doris U. Heinzelman in memory of her husband, Russell E. Heinzelman (B.C.E. '27).

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide one or more scholarships to worthy students majoring in civil engineering. Selection shall be based on academic merit. Recipients shall be eligible for renewed awards as long as each maintains progress towards a degree and high academic standards. The selection shall be made by the Department of Civil Engineering Chairperson in consultation with the Dean of the College of Engineering and the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

$25,000

The Howard R. Hill Scholarship Fund

The Howard R. Hill Scholarship Fund was established May 7, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from family and friends in memory of Howard R. Hill.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide one or more scholarships for an in-state male voice student enrolled at The Ohio State University at the junior or senior level with a minimum GPA of 3.0. The recipients are to be talented but are not required to belong to a choral group. The scholarship is to be awarded annually and is not renewable. Selection of the recipients shall be made by the Director of the School of Music in consultation with voice faculty members and the University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

$15,000
Establishment of Named Endowed Funds (contd)

The Medco Containment Services, Inc. Scholarship Fund

The Medco Containment Services, Inc. Scholarship Fund was established May 7, 1993, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University Development Fund from Medco Containment Services, Inc. of Montvale, New Jersey.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide one or more scholarships to fifth year students in the College of Pharmacy who excel academically but need financial assistance. The scholarship recipients shall be determined by the Dean of the College of Pharmacy, or his designee, in consultation with the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

$15,000

The John H. Rosemond, Sr., M.D. Scholarship Fund

The John H. Rosemond, Sr., M.D. Scholarship Fund was established May 7, 1993, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from Mrs. John H. Rosemond, Sr., their children, relatives and friends.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide one or more scholarships for African-American students graduating from Columbus public schools who have earned a GPA of 3.0 or better in the college preparatory curriculum. Preference shall be given to students with outstanding leadership potential who have demonstrated an interest in aviation, medicine, science or the arts. Typically, this scholarship shall be awarded to an entering freshman student(s) and is renewable through the completion of their baccalaureate degree not to exceed more than five years provided they maintain a minimum GPA of 3.0. Selection of the award recipients shall be made by the Vice Provost for Minority Affairs in consultation with the OMA Committee on Student Financial Aid and the University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

$15,000
The Sandusky County 4-H Endowment Fund

The Sandusky County 4-H Endowment Fund was established May 7, 1993, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from Sandusky County 4-H Clubs and local friends of 4-H.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support the Sandusky County 4-H Program. This support may include, but is not limited to, the funding of scholarships and awards for 4-H members, volunteer leaders and friends of 4-H; sponsoring seminars and programs; and purchasing material or services that will supplement 4-H programming or increase the visibility and public support for 4-H in Sandusky County. All expenditures from this fund shall be approved by the Sandusky County 4-H Advisory Committee and the professional in charge of the Sandusky County 4-H Program.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees with preference being given to recommendations from the Director of Ohio State University Extension in consultation with a committee representing the local 4-H donors in order to carry out the desire of the donors.

$15,000

The Alga "Peg" Weaver 4-H Scholarship Fund

The Alga "Peg" Weaver 4-H Scholarship Fund was established May 7, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from Alga Weaver (B.S.H.E. ’40).

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to grant at least one scholarship up to $1,200 for three (3) consecutive quarters providing the recipient maintains a minimum GPA of 2.0 or above on a 4.0 scale. Should the annual income exceed $1,200, a second scholarship shall be awarded, dividing the interest into equal values, following the same guidelines as the first scholarship. Applicants must be 4-H members, seniors in high school during the year of application, committed to a profession in home economics and planning to enroll as freshmen at The Ohio State University, Columbus campus, branches and satellites. The award shall be credited directly to the student's account to be used for academic, supplies and books only. If no applicant is found, then the scholarship may be awarded to a student currently enrolled (continuing education students included) in home economics at The Ohio State University, Columbus campus, branches and satellites. Award recipients shall be selected by the 4-H Awards Selection Committee in consultation with the scholarship coordinators of the College of Agriculture and the College of Human Ecology and the University Committee on Student Financial Aid.
Establishment of Named Endowed Funds (contd)

The Alga "Peg" Weaver 4-H Scholarship Fund (contd)

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees with preference being given to recommendations from the Director for the Ohio State University Extension, in consultation with a committee representing the local 4-H donors, in order to carry out the desire of the donor.

$15,000

The Paul and Verda Denning Scholarship Fund

The Paul and Verda Denning Scholarship Fund was established May 7, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from Paul and Verda Denning, Sarasota, Florida, for the support of the College of Business.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide a scholarship for an undergraduate student with a grade point average of 3.0 (4.0 scale) or better who is enrolled in the College of Business. Preference shall be given to students with demonstrated financial need. Selection of the scholarship recipient shall be made by the Dean of the College of Business in consultation with the University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

$5,300

Change in Description of Named Endowed Fund

The Ruby Cofflesh Hess Memorial Fund in the College of Education

The Ruby Cofflesh Hess Memorial Fund in the College of Education was established November 1, 1985, by the Board of Trustees of The Ohio State University with a gift to The Ohio State University Development Fund from John Frederick Hess (B.S.Bus.Adm. '36) in memory of his wife, Ruby Cofflesh Hess (B.S.Ed. '28; M.A., Education '51). The description was revised May 7, 1993.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.
Change in Description of Named Endowed Fund (contd)

The Ruby Colflesh Hess Memorial Fund in the College of Education (contd)

The annual income shall be used for the benefit of the secondary education program in the Department of Educational Studies, College of Education, in the areas of greatest need which would benefit many students. This may include such items as instructional materials and equipment, laboratory materials and equipment, and classroom innovations. Expenditure decisions shall be made by the Chair of the Department in conjunction with the Dean of the College of Education.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer who is directly responsible for the secondary education program in order to carry out the desire of the donor.

Change in Name and Description of Named Endowed Funds

The Ernst & Young Endowment for Excellence in Accounting Education

The Ernst & Young Endowment for Excellence in Accounting Education was established May 7, 1993, by the Board of Trustees of The Ohio State University (University) with gifts to The Ohio State University Development Fund from the Ernst & Young Foundation and the staff and partners of Ernst & Young.

The Ernst & Young Endowment for Excellence in Accounting Education was also being funded through the merger of the Arthur Young Professorship of Accounting established April 10, 1969, by the Board of Trustees of The Ohio State University and The Ernst & Ernst Professorship in Accounting established February 3, 1978, by the Board of Trustees of The Ohio State University. The name of The Ernst & Ernst Professorship in Accounting was changed to the Ernst & Whinney Professorship in Accounting on November 30, 1979.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to promote innovations and excellence in accounting through the support of faculty, students and practitioners. The administrator of the fund shall be the Chair of the Department of Accounting & MIS (Chair) of the College of Business (College) at the University. The Chair shall form an advisory committee consisting of representation from Ernst & Young (three members) and the College (four members) to review the endowment's purposes and budget each year. The Chair of the Department of Accounting & MIS shall also become a member of any council of professors or chairholders that may be formed by Ernst & Young to interact and promote dialogue with the academic community in higher education.

The endowment objectives shall include:

- Provide annual income to support scholarships to recruit and retain meritorious students in accounting. Students receiving such support shall be identified as Ernst & Young Scholars, and internships shall be provided. Ernst & Young shall be actively involved in the selection of the recipients.
Change in Name and Description of Named Endowed Funds (contd)

The Ernst & Young Endowment for Excellence in Accounting Education (contd)

- Provide resources annually to promote the Ernst & Young Speaker Series. The series shall annually showcase a nationally known business figure and shall be offered in different cities in Ohio. The endowment shall provide the honorarium and transportation costs for the speaker, while Ernst & Young shall provide other budget and planning support for the event, subject to limitation and prior approval by Ernst & Young.

- Provide resources to fund the Ernst & Young Excellence in Teaching Award. A cash award shall be given to the selected faculty member, and additional resources shall be used to fund an event (and memento) in honor of the recipient. Initially, it is intended that the award shall be given every year with the first award and alternating awards thereafter to be made to a regular faculty member in the Department of Accounting & MIS. For the second and alternating competitions thereafter, any regular faculty in the College shall be eligible to receive the award. A committee consisting of prominent business leaders (including a representative of Ernst & Young), the Chair of the Department of Accounting & MIS and the Dean of the College shall make the selection.

- Provide resources annually to support the Ernst & Young Faculty Scholars. This program is intended to help attract and retain faculty who are "up and coming" in the Accounting/MIS and business education community. As members of the teaching faculty, they shall be identified as Ernst & Young Faculty Scholars and shall have a high level of exposure in the classroom.

- Provide resources for Accounting/MIS research and faculty development as well as administration of the endowment. This program shall support research and professional enrichment for members of the Accounting faculty. It shall also provide funds for costs associated with administering the endowment.

The Ernst & Young Endowment for Excellence in Accounting Education is the first of its kind in the nation and is perfectly positioned to adapt over time to new challenges identified by Ernst & Young and the College.

It is the desire of the donors that this fund should benefit the University in perpetuity. However, Ernst & Young has no obligation to provide any additional funds to the endowment. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with Ernst & Young and the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

The Alga D. "Peg" Weaver Honor Scholarship in Human Ecology

The Alga D. "Peg" Weaver Honor Scholarship in Human Ecology was established September 3, 1982, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from Alga D. "Peg" Weaver, her family and friends. The name of the fund and description were revised February 4, 1993, and have been revised May 7, 1993, to restore the endowment back to its original intent.
REPORT ON UNIVERSITY DEVELOPMENT (contd)

THE OHIO STATE UNIVERSITY DEVELOPMENT FUND (contd)

Change in Name and Description of Named Endowed Funds (contd)

The Alga D. "Peg" Weaver Honor Scholarship in Human Ecology (contd)

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support undergraduate honor scholarships for students enrolling in education programs administered by the College of Human Ecology. Scholarships shall be awarded by the Office of Student Financial Aids based upon recommendations of the Honors Committee within the College of Human Ecology.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

THE OHIO STATE UNIVERSITY FOUNDATION

Approval of Description and Establishment of Named Endowed Fund

The King George III Professorship Fund in British History

The King George III Professorship Fund in British History was established May 7, 1993, by the Board of Trustees of The Ohio State University through funds received by the University from The Ohio State University Foundation, which has established an endowed fund with gifts designated for the support of the College of Humanities from Carl W. Thomas (B.S.Bus.Adm '50; M.B.A. '53).

Income provided by the Foundation shall be added to the principal until the fund reaches $500,000. Once the funding level has reached $500,000, the annual income shall be distributed to the College of Humanities to be used to support a professorship in British History. Appointment to the professorship shall be recommended by the Dean of the College of Humanities to the Provost and approved by the Board of Trustees.

INVESTMENTS COMMITTEE REPORT (contd)

Amb. Wolf:

The final part of our report has to do with the Investments Committee reviewing the Monthly Endowment Summary Report for the period March 20, 1993 through April 16, 1993. The market value of the Endowment Fund on April 16, 1993 was $454.5 million. This total was approximately $900,000 above the March 20, 1993 market value figure. The equity portion of the Endowment Fund decreased $500,000; however, the fixed income portion increased a little over $700,000 during the reporting period. Net new additions to the Endowment Fund for April totaled $800,000.
INVESTMENTS COMMITTEE REPORT (contd)

Amb. Wolf: (contd)

Since July 1, 1992, the Endowment Fund has increased an amazing $52.5 million, including net new additions of $14.6 million. The $38 million was an increase in the market value of our investment portfolio. The current asset allocation for the Endowment Fund is 60 percent invested in equities, 26 percent in fixed income, 8 percent in real estate, and 6 percent in cash equivalents.

The Committee next heard the Quarterly Endowment Report for March 31, 1993. It was reported that the Endowment's Equity and Fixed Income Advisors have both outperformed their corresponding benchmarks of the S&P 500 and the Lehman Government/Corporate Index, respectively, for the nine-month period ending March 31. The report also indicated the Endowment has distributed $20.9 million of income to its 1,950 funds for the current fiscal year.

Finally, let me say that the Investments Committee heard the quarterly report on Total Cash and Investments for the University and you will find this at the end of the Endowment Fund tab. At the end of that second tab, there is a summation of the total of cash and investments for all accounts for the entire University, which totaled $920 million as of March 31, 1993. This is an increase of $191 million since June 30, 1992. The primary reasons for the increase came from a $54 million increase in the University Endowment Fund, a $68 million dollar increase in the Operating Funds, and a $53 million net increase in the University's Debt Service & Debt Construction Funds due to the issuance of general receipts bonds last fall. So if you take out the $53 million of new debt that we incurred, the net increases really are $140 million, which is remarkable. This concludes my report, Mr. Chairman.

Mr. Barone:

Thank you, Amb. Wolf. And once again, your expertise and your knowledge of investments this Board has been unusually well-served. As Chairman, I would like to recognize that. I wish to personally thank you for the help you have given me in my chairmanship.

--0--

STUDENT AFFAIRS COMMITTEE REPORT

Ms. Cusack:

At Wednesday's Student Affairs Committee meeting there was a discussion with graduating seniors and graduate students, which I thought was very appropriate at this time especially since I am a graduating senior. We wanted to hear the views of graduating seniors as they prepare to leave Ohio State to get a different perspective on the University. A wide variety of issues were discussed and brought to light. Among other things, students mentioned that red tape at Lincoln Tower and other administrative offices was still a point of frustration. The problem of closed courses causes more problems than inconvenience for the current quarter. Because prerequisites are so often needed, a closed course one quarter can have repercussions for several additional quarters. That was one cause that students gave for being here more than the standard four years at Ohio State.
STUDENT AFFAIRS COMMITTEE REPORT (contd)

Ms. Cusack: (contd)

Students also stated that career services offices and career assistance offices have not moved with the times. One student noted that the offices are conducting business as usual in economic times that have changed the job search process. On a positive note, students in agriculture felt well prepared and the College of Business was praised for its interviewing program. All the graduate students present were unanimous in their praise of the treatment they received from the Graduate School administration.

Having said all that, there were two very surprising results from the discussion also. First, and perhaps most surprising, was the fact that the problem of parking was never mentioned. It may be the first time that I have ever spoken with a group at the University and never had any mention of parking.

President Gee:

We've obviously solved it.

Ms. Cusack:

It must be over.

President Gee:

Let's declare victory!

Ms. Cusack:

I might note that these are graduating students and they have given up.

President Gee:

Or else we've towed all their cars!

Ms. Cusack:

The second surprising result of the meeting was a discussion about the conflict between research and teaching. The conflict is noticed by students and that it is regarded with concern is not surprising. It was the context that the discussion arose from that was most surprising.

One question that I asked the students in our discussion was did they feel prepared by Ohio State to enter their chosen field. Several graduate students stated that although they were entering academia, they did not feel prepared to teach. Not only were they unprepared, they were actually discouraged from spending time working on their teaching skills. Several were told by their advisors and faculty "not to waste their time" learning to teach. They must publish and do research to receive grants in order to make it in the academic world. All the students present expressed in some way their feeling about the lack of respect for teaching, but it was particularly upsetting to hear that graduate students felt that they were being taught a lack of respect for teaching.
All in all though, I would have to say it was a very enlightening meeting and I am pleased to report on a positive note that all the participants in the meeting have jobs or graduate slots waiting for them upon graduation.

Also, during the meeting we were given a copy of a resolution thanking the outgoing student government leaders for their help this past year. Under the tab Student Affairs, you will notice that there are individual resolutions for each of the student government leaders: Karen Duncan, John Hilbert, and Greg Gorospe. On a personal note, I would like to thank all of them. I want everyone to know that they went above and beyond their duty and helped each of us in a personal way. I think my job would have been nearly impossible without the help of the student government presidents.

**EXPRESSION OF APPRECIATION**

Resolution No. 93-126

Synopsis: The Student Affairs Committee recommended an expression of appreciation to Karen A. Duncan.

WHEREAS Karen A. Duncan, a Ph.D. candidate in Family Resource Management, has served as President of the Council of Graduate Students during the past year; and

WHEREAS Karen has given generously of her time in serving and representing the graduate student community at Ohio State; and

WHEREAS her academic and leadership roles extended into professional contributing of the highest standards:

NOW THEREFORE

BE IT RESOLVED, That this Board expresses appreciation to Karen A. Duncan for her outstanding service to The Ohio State University and wishes her the best of happiness, good health, and success in the future.

Upon motion of Mr. Barone, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

---0---

**EXPRESSION OF APPRECIATION**

Resolution No. 93-127

Synopsis: The Student Affairs Committee recommended an expression of appreciation to Gregory A. Gorospe.

WHEREAS Gregory A. Gorospe, a student in the College of Law, has served as President of the Interprofessional Council during this past year; and

WHEREAS Greg has served the University and his peers in an exemplary manner; and

WHEREAS he has carried out his duties with professionalism and integrity:
EXPRESSION OF APPRECIATION (contd)

NOW THEREFORE

BE IT RESOLVED, That this Board expresses appreciation to Gregory A. Gorospe for his outstanding service to The Ohio State University and wishes him the best of happiness, good health, and success in the future.

Upon motion of Mr. Barone, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

EXPRESSION OF APPRECIATION

Resolution No. 93-128

Synopsis: The Student Affairs Committee recommended an expression of appreciation to John W. Hilbert III.

WHEREAS John W. Hilbert, a senior majoring in Business Administration, has served this past year as President of the Undergraduate Student Government; and

WHEREAS John has also previously served as Vice President of the Undergraduate Student Government; and

WHEREAS he has worked tirelessly in representing the interests of the undergraduate student body; and

WHEREAS he has earned the respect and regard of faculty, staff, and students with whom he has interacted:

NOW THEREFORE

BE IT RESOLVED, That this Board expresses appreciation to John W. Hilbert III for his outstanding service to The Ohio State University and wishes him the best of happiness, good health, and success in the future.

Upon motion of Mr. Barone, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

STUDENT AFFAIRS COMMITTEE REPORT (contd)

Ms. Cusack:

I would also like to thank the Board and the Administration for a great two years and the best experience of my life. Thank you.

President Gee:

I would like to comment on just a couple of things. One is, I couldn't agree more with you that we have had great student leadership this year. We have had quality leadership by people who have been very caring and concerned in our
STUDENT AFFAIRS COMMITTEE REPORT (contd)

President Gee: (contd)

undergraduate and graduate student leadership. As some of you know, we have also had frank and fair discussions. I think that Karen can say that. She and I have had, as recently as last week, what one could euphemistically call a frank and fair discussion. I think that is part of academic life and part of the living process, that we do take each other seriously. The worst thing that could happen is if we would ignore people. I think that is something that we have not done. We have taken those issues seriously and I say that to all of the students.

Secondly, to Kristen, we really do plan on having you back and having a full-fledged review of your two years on this Board with pictures and other things to go along. Kristen has been a great asset. As you know, she has taken her membership on the Board seriously, therefore giving us the opportunity to say that students, as representatives of this University on this Board, are taken seriously and I thank you for that wonderful job.

The third point that you brought up is one that I cannot let go by, and I know the Provost knows that I want to comment on that. That is the issue of the continuing relationship between teaching and research as you have identified. We have taken that seriously. I am sorry that any graduate student would leave this institution feeling that we have not put strong emphasis on that. We will, we have, and we must do that. At the same time, the balance between those issues has to be creative and not destructive. We need to work very, very hard on that. But as you know, we have a whole series of things in place. If these students were caught in the interregnum, then we hope that they will be caught back up. But nonetheless, the emphasis and the clear relationship, I think, is being addressed by the Provost’s office. Ed, are you vigorously shaking your head yes? Okay, great. And I do thank you for bringing that to our attention.

Ms. Casto:

Mr. President, we also have a plaque to give Kristen which reads: “Kristen Cusack, Student Member, The Ohio State University Board of Trustees, 1991-1993. In appreciation to Kristen Cusack for her dedication, commitment, and praiseworthy service to The Ohio State University.”

FISCAL AFFAIRS COMMITTEE REPORT

Mr. Shumate:

The Fiscal Affairs Committee met this morning and is recommending the following resolutions:

WAIVERS OF COMPETITIVE BIDDING REQUIREMENTS

JANUARY-MARCH, 1993

Resolution No. 93-129

Synopsis: Acceptance of the quarterly report on waivers of competitive bidding requirements is proposed:
WAIVERS OF COMPETITIVE BIDDING REQUIREMENTS
JANUARY-MARCH, 1993 (contd)

WHEREAS the Purchasing Policy of The Ohio State University, adopted by the Board of Trustees on September 7, 1984, and revised on February 7, 1992, provides that the President and/or the Vice President for Business and Administration may grant a waiver from competitive bidding in the event of an emergency, when a sufficient economic reason exists, or when the goods or services can be purchased from only a single source, with a report on such waivers to be made quarterly to this Board; and

WHEREAS the Vice President for Business and Administration has submitted a report on waivers of competitive bidding requirements granted for the period of January-March, 1993; and

WHEREAS during the period covered, the Vice President for Business and Administration, at the requests of the departments making the purchases and upon the recommendation of the Purchasing Department, granted 49 waivers of competitive bidding requirements for annual purchases totaling approximately $3,054,500.00, as shown on the enclosed exhibit:

NOW THEREFORE

BE IT RESOLVED, That the report on waivers of competitive bidding requirements for the period of January-March, 1993, is hereby accepted.

Upon motion of Mr. Shumate, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix XXXVII for background material, page 753.)

--0--

Ms. Pichette:

This resolution continues the process to initiate the design work on projects funded by the Biennial Capital Appropriations Bill. Specifically, it authorizes us to proceed with numerous renovation projects at the Columbus and extended campuses. We have included in your materials an updated summary sheet showing the status of those capital appropriations. I would be happy to answer any questions. This has been recommended by the Fiscal Affairs Committee and we seek your authorization to proceed with this work.

Mr. Shumate:

Are there any questions? As indicated, we have fully reviewed this report.

EMPLOYMENT OF ARCHITECTS/ENGINEERS AND REQUEST FOR CONSTRUCTION BIDS
Resolution No. 93-130

PROJECTS FUNDED BY AMENDED SUBSTITUTE HOUSE BILL 904

Synopsis: The Fiscal Affairs Committee recommended the employment of Architects/Engineers and request for Construction Bids for Projects funded by Amended Substitute House Bill 904.

WHEREAS authorization to employ architects/engineers and request construction bids for the following projects is recommended:
EMPLOYMENT OF ARCHITECTS/ENGINEERS AND REQUEST FOR CONSTRUCTION BIDS (contd)

PROJECTS FUNDED BY AMENDED SUBSTITUTE HOUSE BILL 904 (contd)

Caldwell Lab Remodeling (Classrooms)
Hopkins Hall Ventilation Improvements, Phase II
Larkins Hall Locker/Shower Area Renovations
Larkins Hall Roof Replacement
Larkins Hall Window Replacement
Parks Hall Renovation
Postle Hall Research Lab Renovation
Poultry Science Lab Remodeling
Smith Lab Elevator Replacement
Lima Regional Campus - Galvin Hall
Lima Regional Campus Walkways
Lima Regional Campus - Asphalt/Concrete Renovations
Lima Regional Campus - Technical Education Lab Service
Lima Regional Campus - All Buildings
Lima Regional Campus - Cook Hall
Newark Regional Campus - Adena Parking Lot Expansion
ATI - Halterman Hall Research Labs
ATI - Administrative Reception Office
ATI - Swine and Beef Barn Renovation
OARDC - Poultry Electric Supply and Sanitary Sewer
EORDC Building Improvements
OARDC - Library Expansion and Video Center
OARDC - Wooster Greenhouse Supplemental Lights
OARDC - Outlying Branch Roads
OARDC - Thorne and Gourley Hall Renovation, Phase II

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to select qualified architectural/engineering firms as necessary for these projects and that the fees for these services be negotiated between the firm selected and the University or State of Ohio, as appropriate; and

BE IT FURTHER RESOLVED, That the President and/or Vice President for Business and Administration be authorized to request construction bids on these projects in accordance with established University and State of Ohio procedures, and if satisfactory bids are received, to recommend the award of contracts to the Department of Administrative Services, Division of Public Works, or to award contracts, with all actions to be reported to this Board at the appropriate time.

Upon motion of Mr. Shumate, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix XXXVIII for background information, page 755.)

--0--
REPORT OF AWARD OF CONTRACTS AND
ESTABLISHMENT OF CONTINGENCY FUNDS
Resolution No. 93-131

MORRILL AND LINCOLN TOWERS RESIDENCE HALLS UPGRADE TREATMENT -- PHASE IV
DOAN HALL - SICU EXPANSION (MEDICAL LOGISTICAL SERVICES FACILITY EXPANSION)
RELOCATION OF ART LABORATORIES
(LORD/HOPKINS RENOVATION -- RELOCATION OF ART LABORATORIES)
MENDENHALL LABORATORY RENOVATION

Synopsis: Acceptance of the report of award of contracts and the establishment of contingency funds for the listed projects is recommended.

WHEREAS resolutions adopted by the Board of Trustees on December 6, 1990 and March 1, 1991 authorized the President and/or Vice President for Business and Administration to request construction bids in accordance with established State of Ohio and University procedures, and if satisfactory bids were received to award contracts for the Morrill and Lincoln Towers Residence Halls Upgrade Treatment Phase IV and Doan Hall - SICU Expansion (Medical Logistical Services Facility Expansion); and

WHEREAS a resolution adopted by the Board of Trustees on March 6, 1987 and February 4, 1993 authorized the President and/or Vice President for Business and Administration to request construction bids in accordance with established State of Ohio and University procedures, and if satisfactory bids were received to recommend the award of contract for the Lord/Hopkins Renovation -- Relocation of Art Laboratories and Mendenhall Laboratory Renovation projects:

NOW THEREFORE

BE IT RESOLVED, That pursuant to the actions previously authorized by this Board, the report of award of contracts and establishment of contingency funds for these projects is hereby accepted.

Upon motion of Mr. Shumate, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix XXXIX for background information, page 763.)

--0--

Ms. Pichette:

This resolution is to authorize transfer title to the property at 930 Kinnear Road from the Board to the State for the University's use. This property will be used for academic rather than investment purposes to house the University Center for Automotive Research. So it is appropriate and required by law that title be held in the name of the State. A memorandum of understanding among the offices involved, provides for the endowment which funded the buildings purchased to be reimbursed for its value. I would emphasize that this will remain a University owned building. This transfer was recommended by the Fiscal Affairs Committee and we seek your authorization.
TRANSFER OF TITLE

Resolution No. 93-132

PROPERTY AT 930 KINNEAR ROAD
COLUMBUS, OHIO

Synopsis: The Fiscal Affairs Committee recommended that the University be authorized to transfer title to the property at 930 Kinnear Road from the Board of Trustees to the State of Ohio.

WHEREAS title to the property at 930 Kinnear Road is held by the Board of Trustees of The Ohio State University; and

WHEREAS the University has determined that this property should be used for academic rather than investment purposes and proposes to transfer this property from the University’s Endowment portfolio to the General Fund, with the Endowment to be reimbursed for the appraised value of $1.6 million and the transfer to be in accordance with a memorandum of understanding among the offices involved; and

WHEREAS to effect this transfer, title to this property needs to be transferred from the Board of Trustees to the State of Ohio for the use of the University; and

WHEREAS the appropriate University offices are in agreement that this transfer of the property is in the best interest of the University:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized, in the name of this Board, convey all of the Board’s right, title, and interest in this property to the State of Ohio for the use of The Ohio State University, in accordance with the memorandum of understanding entered into among the offices involved.

Upon motion of Mr. Shumate, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix XL for background information and map, page 769.)

--0--

Ms. Pichette:

We are seeking authorization to purchase the improved property at 235-243 West 11th Avenue in the south campus area. As you can see from the map included in your materials, this property is one of only two properties that we do not own along 11th Avenue from Neil to College. The purchase will be funded from our University’s Properties and Land Purchases Account. This purchase has been recommended by the Fiscal Affairs Committee and we seek your authorization.

Mr. Shumate:

Mr. Chairman, this is a unique opportunity that has become recently available to the University and I so move adoption of the resolution for purchase.
May 7, 1993 meeting, Board of Trustees

PURCHASE OF REAL PROPERTY

Resolution No. 93-133

235-243 WEST 11TH AVENUE
COLUMBUS, OHIO

Synopsis: The Fiscal Affairs Committee recommended authorization to purchase improved real property at 235-243 West 11th Avenue in Columbus, Ohio.

WHEREAS The Ohio State University has been presented with an opportunity to purchase the improved real property located at 235-243 West 11th Avenue in Columbus, Ohio; and

WHEREAS this property has an appraised value of $350,000.00 to $380,000.00, and the owners, William B. and Teresa G. Dawson, have offered to sell the property to the University at a price of $380,000.00; and

WHEREAS this property is located within the South Campus acquisition boundary of the University's Master Plan and the appropriate University offices have determined that the purchase of this property is in the best interest of the University; and

WHEREAS funds for the purchase will be provided from general University funds:

NOW THEREFORE

BE IT RESOLVED, That the President and/or the Vice President for Business and Administration be authorized to purchase, in the name of the State of Ohio for the use of The Ohio State University, the improved real property located at 235-243 West 11th Avenue at a price not to exceed $380,000.00, upon such terms and conditions as are deemed to be in the best interest of the University, subject to the University receiving the necessary approvals from the Ohio Board of Regents and the State Controlling Board.

Upon motion of Mr. Shumate, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

(See Appendix XLI for background information and map, page 773.)

--0--

Mr. Shumate:

The next agenda item has to do with the renewal of our student health insurance and Vice President Spillman will present this resolution.

Dr. Spillman:

Thank you, Mr. Chairman. We are recommending that the Central Benefits Medical Insurance Company be approved for renewal of the Student Health Insurance contract effective the first day of Autumn Quarter 1993 for a period of one academic year. The contract will provide benefits now available under the terms of the current contract, subject to benefit changes contained in the report of the Student Health Insurance Committee.
May 7, 1993 meeting, Board of Trustees

Mr. Shumate:

Are there any questions? And, again, Mr. Chairman, this item was fully discussed. We are able to get an attractive financial package available for our students with this plan. Based upon the report and the resolution, I would move adoption.

**RENEWAL OF STUDENT HEALTH INSURANCE**

Resolution No. 93-134

WHEREAS on May 4, 1989, this Board awarded the insurance contract to Central Benefits Mutual Insurance Company following a competitive bid process, effective Autumn Quarter 1989 for an initial two (2) year term, subject to renewal thereafter, and

WHEREAS the University now has the opportunity to competitively bid the insurance program or to seek renewal of the program with the current carrier; and

WHEREAS the current carrier, Central Benefits Mutual Insurance Company, has offered renewal rates that are very competitive in the insurance market and appropriate to our history of claims experience; and

WHEREAS the Student Health Insurance Committee obtained the assistance and expertise of Stephen L. Beckley & Associates, a nationally recognized student insurance consulting firm, and also obtained selected actuarial review consulting services from William M. Mercer, Inc., an international benefits and actuarial consulting firm; and

WHEREAS after consideration of the desires and concerns of the students who purchase the insurance, the Student Health Insurance Committee of the Council on Student Affairs has recommended -- and the full Council has ratified that recommendation -- that the current contract be renewed at the specific rates to provide the existing benefits plus numerous benefit improvements and cost containment measures as illustrated by the following examples:

(a) Adding the OSU Hospitals and OSU Physicians Provider Network to the current Student Health Service and MedOHIO urgent care facilities preferred provider network;

(b) Offering an incentive for students to choose the services of the OSU Hospitals and Physicians Provider Network through a $200 annual maximum waiver of direct medical expenses for each person covered under the plan for inpatient or ambulatory surgery procedures done at OSU Hospitals;

(c) Increasing coverage under the self-insured services at the Student Health Service from $1,000 to $2,000 blanket per year;

(d) Accepting outside physician orders for services offered and rendered at the Student Health Service;

WHEREAS this program will be available on an optional basis to all registered students for the following proposed Quarterly Premium Rates:

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Student</td>
<td>$139</td>
<td>$156</td>
</tr>
<tr>
<td>Student &amp; Spouse</td>
<td>$340</td>
<td>$373</td>
</tr>
<tr>
<td>Student &amp; Child(ren)</td>
<td>$430</td>
<td>$477</td>
</tr>
<tr>
<td>Student, Spouse &amp; Child(ren)</td>
<td>$625</td>
<td>$694</td>
</tr>
</tbody>
</table>
May 7, 1993 meeting, Board of Trustees

RENEWAL OF STUDENT HEALTH INSURANCE (contd)

Appropriate rates have also been derived from the quarterly rate for students on a semester system, and for periods of continuing coverage while not registered as a student.

NOW THEREFORE

BE IT RESOLVED, That Central Benefits Medical Insurance Company be approved for renewal of the Student Health Insurance Contract effective the first day of classes, Autumn Term 1993, for a period of one (1) academic year. The contract will provide the benefits now available under the terms of the current contract subject to the benefit changes contained in the report of the Student Health Insurance Committee.

Upon motion of Mr. Shumate, seconded by Ms. Casto, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

Mr. Shumate:

Finally, Mr. Chairman, Mr. Nichols had asked at our last meeting for the opportunity to briefly introduce several members of his staff who have worked very hard and diligently on a tuition payment plan for students. We want to thank them especially for their dedication and hard work. Mr. Nichols --

Mr. Nichols:

Thank you, Mr. Shumate. At the last meeting, the Board approved the tuition payment option for students which has been well received. I might point out that we have received 800 requests already to be a part of the program. Because the meeting was in Wooster, we did not have the immediate availability of the personnel that really worked on this project. As we often like to do, I would like to introduce the people who are doing the real good work. They are all from the Office of Fees, Deposits, and Disbursements, which for many of us was called the Bursar function at one time. Kathy Gagnon, who is the project manager for this effort, led this and did an excellent job. Guy Flora is the assistant manager of the office and is involved in basically all of the cashiering functions. And, finally, Leonard Copeland, the assistant treasurer of the University, who is in charge of the Office of Fees, Deposits, and Disbursements. We appreciate, very much, your efforts on this project.

Mr. Shumate:

That completes my report, Mr. Chairman.

Mr. Barone:

Alex, again, on behalf of this Board, I would like to thank you for the fine work you have done on this Committee. I think it is outstanding and probably one of the busiest committees that we have.

--0--
ACADEMIC AFFAIRS COMMITTEE MEETING

Mr. Kessler:

I'd like to call on Linda Tom and Nancy Rudd to discuss diversity and campus climate.

REPORT ON DIVERSITY AND CAMPUS CLIMATE

Dr. Nancy Rudd:

Thank you. You received earlier three reports that were produced by committees that were appointed by President Gee a couple of years ago, as well as the University's response to those reports. What we would like to do today is build on the information provided in those reports with respect to both data regarding where we are with regard to diversity, as well as our plans for the future. We want to be a little formal about this if you'll bear with us. Please feel free to interrupt us with questions at any time. We will try to talk quickly so you have plenty of time for discussion following our report. We'd like to talk about issues related to diversity first, and Vice President Tom has put together some data which will give you a rough idea of where we stand. Then I will talk about some of the plans that we have for promoting diversity in the future.

Ms. Linda Tom:

Thank you, Nancy. We distributed some handouts and if you could just go to that we would like to ask you to follow us. What we want to do is share some data with you that will give you the current faculty and staff profile by gender and ethnicity and provide some historical perspective on changes over the years. It will give you some information on how we compare relative to other institutions.

If you turn to the first chart that shows how the OSU faculty and staff look by gender, our faculty and staff is 54 percent female and 46 percent male. And just an observation here, in terms of the national work force, the national work force is 54 percent male and 46 percent female so our work force is the reverse, which is an interesting observation.

Chart number 2 shows the OSU faculty and staff by minority status. Eighty-two percent of our work force is white, 13 percent of our work force is African-American, and that compares with 11 percent of the U.S. work force being African-American. The Native-American work force here at the University is less than 1 percent, and in the national work force it is also 1 percent. The Asian-American faculty and staff comprise 4 percent at OSU, and in the national work force the Asian-American group comprises 3 percent. The Hispanic-American work force at OSU is 1 percent, and in the U.S. work force that group comprises 8 percent. So that really gives you a sense of where we are today.

What changes have occurred over the last couple of years? The next two charts will give you some perspective on that. The chart on page 3 shows women at OSU and the changes from 1976 to 1992. The reason we went back to 1976 is because that was the year that the last Commission on Women did their report and they set 1976 as the baseline for comparison.
President Gee:

That was the University's Commission on Women?

Ms. Tom:

Yes, the University's Commission on Women. If you look at 1976 in terms of tenure track faculty, 15.3 percent were women and today 25.3 percent are women. In terms of staff in 1976, 48 percent were women and in 1992-93 62 percent are women. So what we have seen there are significant and steady increases.

On page 4, there is a chart that shows the movement of our tenure track faculty by gender and minority status. The first two in the left-hand side of that chart show the total tenure track faculty in the three years of 1986, 1991, and 1993. The reason that we did the comparison from the years 1986 to 1991 was that that was the period of time of the last Black A.C.T.I.O.N. report and Black A.C.T.I.O.N. plan. The most current is the 1993 information. If you look at those three years, between 1986 and 1991, the total tenure track faculty really stayed pretty flat. There was a very small increase. However, from 1991 to 1993 there was a 5 percent decrease, and some of that is explained by our early retirements and also from some of our budget cuts.

Now if we look at those same periods of time and look at the women and minority representation, I'd like to walk you through that. In terms of the category of women, from 1986 to 1991 we increased representation from 766 to 831 which is about 8.5 percent. Then from 1991 to 1993, the number went down slightly. So from 1986 to 1991, when the University's total faculty base stayed pretty much the same, we did see some significant increases in terms of women, and from 1991 to 1993, there has been a slight decrease.

The next group is the African-American faculty. From 1986 to 1991, we did have a significant increase in African-American faculty, from 79 to 109, and that was about 40 percent. From 1991 to 1993, when we did see a decrease in the total faculty, we also saw a decrease here from 109 to 103.

The Native-American faculty is a very small number and that has really been insignificant. The Asian-American faculty has grown and has shown steady growth. From 1986 to 1991, there was a significant increase, and from 1991 to 1993, there is still a gradual increase. Hispanic-Americans, the number is small, but we have seen gradual growth.

The next several charts show how we look relative to other institutions, and we have chosen the Big Ten as one group for comparison. In general, the distribution of women in faculty and staff is similar to other Big Ten institutions. Generally OSU compares as well, if not better, in all occupational categories, and what this chart shows are the occupational categories across the horizontal. The first chart shows women representation by occupational categories, compared against the Big Ten. Where we look to be doing better than the average is in the faculty area where our representation of women is higher. We do quite well in terms of our professional
May 7, 1993 meeting, Board of Trustees

REPORT ON DIVERSITY AND CAMPUS CLIMATE (contd)

Ms. Tom: (contd)

non-faculty category. The clerical and secretarial comparison is an interesting one -- where our representation of women is lower than the average. That to me is an indication that we have diversified in that category, which has been and still is predominately female.

If you flip to page 6, this is a comparison against the Big Ten, but by minority representation. Again, we follow the pattern fairly well. The faculty is slightly below the average. The area that looks to be much higher is in the service and maintenance areas where we have greater minority representation. I think part of the explanation is that OSU is a large urban institution. So I think in terms of pool, we can draw on the larger pool of minority workers. We also again do fairly well in the professional non-faculty area in terms of minority representation.

Mr. Shumate:

What are some examples of professional non-faculty? What is that?

Ms. Tom:

People like managers of offices, supervisors, financial professionals, people in business and administration.

Mr. Kessler:

Would you be in that category?

Ms. Tom:

Yes. The high level executive administrators are, directors, and people who would be performing professional functions, accountants, lawyers, etc., would also be in that category. All of the academic counselors, too. In the private sector it would be your exempt-level employees.

The next two charts are similar comparisons, but these are comparisons with selective comprehensive research universities who are a part of what we call the AAU, which is the Association of American Universities. This group includes the large public institutions, as well as some privates. Those that are included are the Big Ten, but also the California Systems Schools, Rutgers, and the State University of New York. Some of the privates that are included in this group are Cornell, Duke, MIT, and Carnegie-Melon. Again, what we see here is the representation by both female and ethnicity compares fairly well with these institutions. On this comparison we do fairly well with women in the faculty areas, and again we do very well in the professional non-faculty areas. Our clerical and secretarial group is again more diverse than other institutions.

The next chart on page 8 is the same comparison but by minority representation. If we look across the categories, the faculty is pretty much on the average with our professional non-faculty. OSU again is higher in terms of our minority
REPORT ON DIVERSITY AND CAMPUS CLIMATE (contd)

Ms. Tom: (contd)

representation. We do again see high representation in the service maintenance area, and I think this is due in part to the location of the institution. We have the ability to draw on a larger pool.

Are there any questions on any of those charts? If not, Nancy will now talk about where we go from here and talk about our affirmative action planning process.

Dr. Rudd:

Before I do that, I would like to call your attention to the chart on page 4, "Tenure Track Faculty by Gender and Minority Status, Change From 1986, 1991, and 1993." Because a point to be made by this makes a nice preface to what I want to talk about next. Linda noted that the size of the total tenure track faculty was quite flat between 1986 and 1991 and declined by a fairly large number. At least if you asked academic departments who are trying to deal with this loss, they would say that is a fairly large number between 1991 and 1993. While at the same time, the number of female faculty and African-American faculty increased by substantially more than the numbers that the overall faculty increased, and decreased by numbers that are substantially less than those by which the faculty decreased. These data indicate that we were replacing white males with other sorts of people. I think at least one reason we see this trend is that we have had in place for the last five years an Affirmative Action Plan across departments for the recruitment of female and minority faculty. These data suggest that indeed that plan has worked. In light of that, as well as because the institution is very committed to increasing its diversity even more, we are now in the process of asking academic units -- and this time academic support units -- to develop new affirmative action plans which will look forward to the next three years with respect to increasing the representation of women and minorities.

On the next sheet are the four elements that will have to be included in these Affirmative Action Plans. The first is goals and time tables. The units -- academic and academic support -- are being asked to establish goals for increasing the proportion of their faculty and their staff from underrepresented groups. They have to indicate, as best they can, the speed with which they are going to try to do that over the three-year time frame covered by these plans. It is important that these goals reflect both the best information available with respect to the availability of qualified individuals and expectations regarding position vacancies. I will talk a little bit more about those issues in a minute.

The second component is to identify barriers to diversifying the faculty and staff and plans for strategies to try and address those barriers. And, of course, the primary barrier which I am also going to talk some more about is the small pool problem.

The third component is to develop plans to address climate issues and retention issues. It is not terribly useful to recruit members from underrepresented groups unless you can keep them. And the fourth component is to establish benchmarks to measure success.
REPORT ON DIVERSITY AND CAMPUS CLIMATE (contd)

Dr. Rudd: (contd)

It is very important that we be realistic about what is possible and I want to talk a little bit about that. The next graph provides some information that will start us on a discussion. I am not going to describe all the information on this table. What I want you to focus your attention on is the left-hand bars that are somewhat lighter. These represent the proportion of all Ph.D. degrees conferred in 1991-92 by CIC institutions to various groups. If you are not familiar with the CIC designation that includes all of the Big Ten universities or Big Eleven, if you want to count right, and the University of Chicago. Those are the institutions from whom we recruit a lot of our faculty, although certainly not all of them.

Note that in 1991-92, only 2.8 percent of all doctorates were conferred to African-Americans; 0.4 percent to Native-Americans; 6.1 percent to Asian-Americans; and 2.5 percent to Hispanic-Americans. However, these are gross figures, they do not take into account the number factors. They don't take into account the fact that many people who get Ph.D.'s -- in some fields more than others -- don't even go into higher education. Many go into the private sector or into self-employment and the like.

Secondly, of those who do go into higher education, only some subset of those go into positions in research universities -- they go to other kinds of four-year institutions, they go to two-year colleges, and other kinds of institutions of higher education.

The third problem -- and the one I want to talk about a little bit more -- is that these gross figures do not reflect the size of the pool and specific academic disciplines. In some academic disciplines the pool is much larger than this and in some the pool is much smaller. I would like to cite a specific example to give you some insight of the pool problem without being too abstract. A broad academic area that is often noted to have a pool problem is mathematical and physical sciences. That area has a pool problem with respect to both women and minorities, which is not necessarily the case in other disciplines. I will give you an example from physics. The primary source of new faculty for most academic units, and not just physics, is new Ph.D.'s, so it is useful to talk about the size of that pool.

In 1991, 1,358 doctorates were granted in physics, keep that number in mind. Of these, nine were awarded to African-Americans and 145 to women. Obviously very small numbers in relationship to the number of doctorates granted. These numbers however small they are, are a very inflated indication of the pool of potential candidates for research faculty positions. This is partly for reasons that I indicated a minute ago -- many won't go into higher education. Of those who do, many won't want positions in research universities or they won't have the appropriate training for those positions.

Second, a characteristic required of new faculty in many of the sciences including physics is that to obtain a position in a research university an individual has to do a 3 to 5-year post-doc somewhere to get additional research training. And of those who might be interested in a research university position, only some will successfully get such a position. You can see that the pool keeps getting smaller.
REPORT ON DIVERSITY AND CAMPUS CLIMATE (contd)

Dr. Rudd: (contd)

But the problem that is least understood -- and actually applies to all academic disciplines and not just to physics -- is that physics is not a homogenous field. A physicist is not a physicist is not a physicist. Just to give you an example, there are high energy physicists, condensed matter physicists, nuclear physicists, atomic and molecular physicists, astro physicists, and within each one of these groups there are experimental and theoretical physicists. I am told by my physicists friends that these people don't even speak the same language, literally. It is sort of like Chinese versus German. So they are not interchangeable. When a physics department, ours or anybody elses, goes out to recruit a physicist, it recruits the kind it needs to build its program. You can see by the time you take the kind of small pool that I have already described and divide it up by subdisciplines that it is likely in this case that the number of African-Americans approaches zero and the number of women perhaps as well.

Now that kind of problem faces every discipline, but sometimes the starting pool is larger than it is in this case. In any event, there really is a pool problem, more so I think in respect to African-Americans than in respect to women in many fields. What academic disciplines are doing now -- because virtually all research universities are seeking to diversify vigorously -- is that they keep rosters. The American Physical Society, and just about any other professional organization you can name, is quite organized and it keeps a track record of who is coming along in Ph.D. programs around the country with respect to women and minorities, and that information is shared. So these disciplines can estimate very accurately what their potential pool is.

As part of these Affirmative Action Plans, we are asking units that face these kinds of pool problems -- and we even ask them to do this where the pool problem may not be so severe -- to identify what they can do to help solve the pool problem. That is, we don't say, "O.K., you face a very limited pool, you don't have to do anything." That is simply not acceptable. What a unit or particular discipline might do depends on the nature of the problem. In mathematical and physical sciences, we don't have enough students in undergraduate programs in those areas to move them into graduate school and then move them into University positions. So what they might do, and in fact a great deal of this work is going on, is try to improve the quality of science and math education in the primary and secondary schools. They try to do things to increase interest in these fields so that we begin to develop a pool of undergraduates who can then become graduate students and then ultimately faculty.

In other kinds of disciplines where there is an undergraduate pool, then the strategy will be to try and recruit graduate students. And to make this a bit personal, that in fact is what my own department has done. I am from a field in Human Ecology where you would not expect us to have a pool problem. We certainly don't with respect to women, but we do with respect to African-Americans. A few years ago there were virtually no African-American Ph.D.'s in our field, so we started recruiting African-American graduate students. We have now graduated three Black Ph.D.'s, the fourth will graduate sometime this year. Three of these have been my students, and we will continue to do that.
May 7, 1993 meeting, Board of Trustees

REPORT ON DIVERSITY AND CAMPUS CLIMATE (contd)

Dr. Rudd: (contd)

I think before I move on to another point, it is important to note that this strategy can only be successful to the extent that we can develop interest in various fields in different kinds of people. If women and various minority groups are simply not interested in a field, then it may be very difficult to do anything about the pool problem.

The second area, in terms of developing these plans, is that we have to be realistic about how we measure success. Obviously one measure of success we will be looking at is the extent to which individual units meet the goals that they have stated for themselves. But there are a number of good reasons why they may not meet their goals. One is because they inaccurately estimated the availability of various groups. Another -- and I think this is particularly a problem for Ohio State right now -- is that they will not be able to compete financially. Supply and demand works with respect to the recruitment of underrepresented groups. Where the group is small relative to the demand, the salaries get bid up.

And the third area, which is also a feature of our current fiscal environment, is that units simply may not be able to fill vacancies that they had hoped to. So we need other measures of success. We think that probably the most reasonable is reflected in the data that Linda showed you a minute ago -- and that is to look at how we are doing compared to our peer institutions. If we are doing at least as well or better than them, given that they face the same constraints that we do -- although I think our financial situation may be worse -- and are competing for the same persons, then we are probably doing pretty well. If we are doing worse than them, then we need to take a hard look at why.

And one last observation is that accountability with respect to these plans is going to be very important. We have to make sure that whatever the difficulties academic units and academic support units face in meeting their plans, that they are making every reasonable effort to do that. So every year they will have to submit progress reports to Academic Affairs and to Human Resources for review. These will also be monitored by the Diversity Committee. Where there appears to be problems, then we will have to work proactively with these units to remedy these problems. I might note, however, that these kinds of efforts are not new. In fact, at this point in time I am already monitoring the searches in one academic unit where there have been problems and have provided, on request, assistance in searches in other units.

Before we turn to the issue of climate, do you have any questions about diversity and our efforts to improve diversity?

Mr. Shumate:

I just have one question. You use the example of your department and I think you said four new Ph.D.’s who were African-Americans. What happened to those four?
REPORT ON DIVERSITY AND CAMPUS CLIMATE (contd)

Dr. Rudd:

They all have jobs. One went to the University of New Hampshire, one went to the University of Georgia, and one went to the University of Kentucky. And the one who is in the process, already has a job that she has to go back to. She is on leave from North Carolina State University.

Mr. Shumate:

So in effect, we have done a great job of increasing the pool. As part of our analysis then, of those that we have graduated and assisted, why aren't they coming to Ohio State University?

Dr. Rudd:

Well there are a couple of reasons why these particular students did not come back to Ohio State. The most obvious one is that we did not have any position vacancies. You can't hire if you don't have a position. But there are benefits and perhaps costs of hiring your own graduates. From the point of view of the individual graduate, the cost of remaining in place instead of going someplace new is that it can be difficult to cut the apron strings, to put it in simple terms. A person may still see him or herself as subordinate in some sense to the faculty members who have advised him or her and find it very difficult to stand up on his or her own professional feet.

The other disadvantage which I think perhaps pertains both to the graduate and the department is what we sometimes call the new blood problem. The student who stays in place does not get the benefit of new ideas and perspectives that would be gained from going someplace, and the department does not get that benefit either from bringing in somebody new. However, it is rather obvious that for some academic units the only way to increase their diversity will be to hire their own graduates. That is something that every department and every graduate has to sort through for itself.

President Gee:

Alex, to respond to that, because I think that is the important question, we have taken seriously increasing the pool. The question is if we are increasing the pool for other people, then what about for ourselves. Why don't we take advantage of some of our own graduates. The answer is that we are really aggressively pursuing the opportunity to take advantage of our own graduate students. There used to be this notion of the academic Berlin Wall as Nancy has described -- that one would never look at their own graduates, send them away, or else send them away and then bring them back. I think that we have come full circle on the realization that in many instances if we are going to do the kind of job in terms of these data, that we are going to have to increasingly look at our own.

It does not negate the issue that I think in many instances it is probably advisable for someone to go away for a while and get other types of academic experiences. This world is not perfect, and so therefore we have to weigh the quality of various goods.
President Gee: (contd)

In my own view, the opportunity for us to have some of our very bright people stay with us is a greater good than having them go elsewhere and then having us try to hire them back in some appropriate or opportune way. And we certainly are looking at that. I think that has been an increasing issue among our programs and certainly in the sciences. I know that we have several department chairs who are very dedicated to bringing in bright graduate students in protected classes and then trying to protect them in terms of an opportunity for them to stay with us. So we are doing some things in that regard.

Ms. Tom:

What I would like to talk a little bit about is climate. In the three equity reports that were issued recently climate was an issue that was quoted as being a pervasive problem across the campus. The problem that we have with climate is that it is a very difficult issue to get our arms around and climate means different things to different people. For the purposes of our discussion, what we would like to do is use a definition on the next page which is offered by the American Council on Education. That is defined as "Climate being the sum total of the daily environment, including the culture, habits, decisions, policies, and practices that make up campus life."

It is our strong belief that we need to create and maintain a positive climate which is conducive to the highest levels of productivity. This does not mean that we can make every individual happy, or that we can give every individual what he or she wants. What this does mean is that we should treat all people with dignity, sensitivity, and respect, and have fair and equitable policies and practices in place which we can consistently apply. It also means that we provide some effective mechanisms for resolving differences when they occur.

In both the offices of Academic Affairs and Human Resources we are currently focusing our efforts to improve climate for all faculty and staff in the following key areas. Those areas are outlined on the next page. We believe that if we can make progress in these areas, that we will improve the climate for all faculty and staff on this campus.

The first one is to improve policies and procedures. What the Office of Academic Affairs has focused on over the last couple of months is developing guidelines for the colleges for determining faculty workload and also performance evaluation. The issue of criteria for salary increases was cited in the faculty equity report as a major source of distrust among faculty. So there are guidelines now that have been issued and the colleges will be required to indicate clear criteria for merit increases.

A new policy that we created this last quarter is a policy on sexual harassment. The policy will be distributed this quarter and we have also had four different training programs for vice presidents, chairs, and deans, and communicated to them what their responsibilities are for making sure that this policy is consistently applied. The Office of Academic Affairs is also developing an appeals procedure for faculty regarding disputes around salary. This is being worked out with the members of the Faculty Equity Committee and members of the Office of Academic Affairs. With regards to staff grievance procedures, we will have improved grievance procedures by the end of this year.
Ms. Tom: (contd)

The second area is strengthening Affirmative Action and that was discussed by Nancy. We are working on this and we expect revised Affirmative Action Plans for colleges and all administrative units to be completed within the next 3 to 6 months.

Establish Accountability -- this was also an issue that was cited in the three equity reports. What we will be doing relative to the affirmative action area is to ensure that once the plans are developed that they will be reviewed by appropriate offices. The President's Committee on Diversity will also have oversight on the reports and the progress that is made there. We also will be working on developing effective performance management systems for the University in terms of faculty and staff. Affirmative action and the effective management of diversity, and management in general, will be evaluated and tied to reward systems.

The fourth area is improving the quality of work life for all on the campus. We are working now to develop and implement training for management in terms of how we communicate with our staff, how we motivate, and how we deal with problems relative to performance. We also have a Diversity Training Task Force that is working to identify needs for sensitivity and awareness among all of the elements of our community, the students, our faculty and staff. We will have a plan for what diversity training ought to be, who will be responsible, and the time table. As I mentioned earlier, we did deliver training for chairs, deans, and vice presidents on sexual harassment.

The fifth area is improving the data and the information. Data is very important for us so that we can really get an accurate understanding of the problems which will help us to develop effective solutions. This again is an area that was cited in all of the three equity reports as being deficient at the University. We are making initiatives to upgrade our data systems and to improve our analytical capabilities relative to making that information useful for decision-making. This year the offices of Academic Affairs and Human Resources will also develop a pilot climate survey to systematically assist with faculty and staff concerns and to ascertain some levels of work satisfaction. Such information will be very useful as measures of how well we are doing. We can capture base line data at different times which can then serve as benchmarks for measuring the impact of our efforts on improving climate.

This list does not include all of the work that we are doing, but it is intended to be illustrative. This really concludes our comments and we would be happy to answer any questions.

Mr. Kessler:

Thank you, Linda.

Ms. Cusack:

I have a question. I don't know how to put this, but it seems that consistently when I meet with groups of students that the issue of professors being sensitive to their needs -- even just on Wednesday a couple of students were saying that they felt that some professors are still sexist and not sensitive to the diverse needs of students. I don't really see an avenue to address this. Students have the reviews
REPORT ON DIVERSITY AND CAMPUS CLIMATE (contd)

Ms. Cusack: (contd)

that they give their professors, but they really don't feel that's an area that gets enough credence. They don't feel that they are really listened to. I just don't really see an avenue for the professor to become aware or to be helped in the process of becoming more sensitive. Because if the students are seeing this in the class, the faculty that reviews them may not be seeing that same thing. So how can we link that together better so that the professors can be made aware and then maybe taught a little bit better how to handle those situations?

Ms. Tom:

I think what we would do in terms of training is to have it so that faculty and staff become more aware and sensitive in terms of their behavior. The other part of that is that we do have to have some accountability so that faculty and staff will be evaluated in terms of their treatment of others. Also, we have procedures in place where if individual students or staff have concerns, they can come to an appropriate office and have someone help resolve those issues specifically.

Ms. Cusack:

I guess what I would like to see is maybe a greater awareness in the student population that that is an avenue that they can take. I don't see that as something they are aware of. I think as a student you hear those things being said, you maybe feel the discrimination, but you don't really know where to go and how to go about making a change.

Ms. Tom:

Well, we want to make clear our policies and our procedures to all faculty, staff, and students. If they do have a problem, then they have a place to come. That needs to be communicated really more effectively.

Mr. Kessler:

Any more questions for Linda or Nancy? Thank you both, very much.

(See Appendix LXII for background information, page 777.)

HONORARY DEGREE

Resolution No. 93-135

Synopsis: Approval of awarding an honorary degree to Leonard Downie, Jr., is proposed.

WHEREAS pursuant to paragraph (C) of rule 3335-3-03 of the Administrative Code, the President, after consultation with the Steering Committee of the University Senate, recommends to the Board of Trustees awarding of an honorary degree as listed below:

Leonard Downie, Jr.  Doctor of Humane Letters
HONORARY DEGREE (contd)

NOW THEREFORE

BE IT RESOLVED, That the above honorary degree be awarded in accordance with the recommendation at a time convenient to the University and the recipient.

Upon motion of Mr. Kessler, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

DEGREES AND CERTIFICATES - SPRING QUARTER COMMENCEMENT

Resolution No. 93-136

Synopsis: The approval of Degrees and Certificates for Spring Quarter is proposed.

WHEREAS pursuant to paragraph (E) of rule 3335-1-06 of the Administrative Code, the Board has authority for the issuance of degrees and certificates; and

WHEREAS the faculties of the colleges and schools shall transmit, in accordance with rule 3335-9-29 of the Administrative Code, for approval by the Board of Trustees the names of persons who have completed degree and certificate requirements:

NOW THEREFORE

BE IT RESOLVED, That the degrees and certificates be conferred on June 11, 1993, to those persons who have completed the requirements for their respective degrees and certificates and are recommended by the colleges and schools, and that the names of those persons awarded degrees and certificates be included in the minutes of this meeting.

Upon motion of Mr. Kessler, seconded by Mr. Celeste, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

PERSONNEL ACTIONS

Resolution No. 93-137

RESOLVED, That the personnel actions as recorded in the Personnel Budget Records of the University since the April 2, 1993 meeting of the Board, including the following Appointments, Appointment of Chairpersons, Reappointment of Chairpersons and Director, Reappointment of Principal Administrative Official, Leave of Absence Without Salary--Cancellation, Professional Improvement Leaves, Promotions and Tenure, Promotion with Tenure--Correction of Dates, Emeritus Title, and Medical Staff Appointment (The Arthur G. James Cancer Hospital and Research Institute) as detailed in the University Budget be approved.

Appointments

Name: RICHARD SISSON
Title: Senior Vice President and Provost
Office: Academic Affairs
Effective: August 1, 1993
Salary: $161,000.00
Present Position: Senior Vice Chancellor for Academic Affairs and Professor, Department of Political Science, University of California, Los Angeles, CA

July 1, 1993 through June 30, 1995

Veterinary Physiology and Pharmacology  Young C. Lin

*Acting

July 1, 1993 through June 30, 1997

Aeronautical and Astronautical Engineering  Gerald M. Gregorek
School of Architecture  Jerrold R. Voss
Engineering Mechanics  Carl H. Popelar
Welding Engineering  William A. Baeslack

Reappointment of Principal Administrative Official

CHARLES F. BENDER, Director of the Ohio Supercomputer Center and Office of Academic Computing, effective April 1, 1993, through June 30, 1998, pursuant to rule 3335-3-17 of the Administrative Code.

Leave of Absence Without Salary—Cancellation

WALTER D. NEUMANN, Professor, Department of Mathematics, effective Spring Quarter 1993.

Professional Improvement Leaves

LAWRENCE A. KENNEDY, The Ralph W. Kurtz Professor of Mechanical Engineering, Department of Mechanical Engineering, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

LAWRENCE J. BERLINER, Professor, Department of Chemistry, effective Winter Quarter and Spring Quarter 1994.

ODETTE BLUM, Professor, Department of Dance, Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

MICHAEL BRAUNSTEIN, Professor, College of Law, Autumn Semester 1993 and Spring Semester 1994.

ROBERT E. BURNKRANT, Professor, Department of Marketing, effective Spring Quarter 1993.

GREGORY A. CALDEIRA, Professor, Department of Political Science, effective Winter Quarter, Spring Quarter, and Autumn Quarter 1994.

BUNNY C. CLARK, Professor, Department of Physics, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.
PERSONNEL ACTIONS (contd)

Professional Improvement Leaves (contd)

RONALD G. CORWIN, Department of Sociology, effective Spring Quarter, Summer Quarter, and Autumn Quarter 1994.

BRENDA L. DERVIN, Professor, Department of Communication, effective Winter Quarter and Spring Quarter 1994.

ROBERT J. GARBACZ, Professor, Department of Electrical Engineering, effective Autumn Quarter 1993.

DAVID M. GOSS, Professor, Department of Mathematics, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

PRABHAT K. GUPTA, Professor, Department of Materials Science and Engineering, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

RICHARD F. HAMILTON, Professor, Department of Sociology, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

JOHN C. HUNTINGTON, Professor, Department of History of Art, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

TATSURO ICHIISHI, Professor, Department of Economics, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

SALVATORE IMBROGNO, Professor, College of Social Work, effective Winter Quarter and Spring Quarter 1994.

RICHARD J. JAGACINSKI, Professor, Department of Psychology, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

J. CRAIG JENKINS, Professor, Department of Sociology, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

ANDREA A. LUNSFORD, Professor, Department of English, effective Winter Quarter and Spring Quarter 1994.

WILLIAM J. MITSCH, Professor, School of Natural Resources, effective September 20, 1993 through September 19, 1994.

E. OKECHUKWU ODITA, Professor, Department of History of Art, effective Autumn Quarter 1993 and Winter Quarter 1994.

THOMAS M. OSTROM, Professor, Department of Psychology, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

SAMUEL C. PATTERSON, Professor, Department of Political Science, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.
May 7, 1993 meeting, Board of Trustees

PERSONNEL ACTIONS (contd)

Professional Improvement Leaves (contd)

STEPHEN S. PINSKY, Professor, Department of Physics, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

KATHLEEN A. SEXTON-STONE, Professor, Department of Life Span Processes, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

RICHARD H. STECKEL, Professor, Department of Economics, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

GARY STEIGMAN, Professor, Department of Physics, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

E. SCOTT BAIR, Associate Professor, Department of Geological Sciences, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

MARVIN T. BATTE, Associate Professor, Department of Agricultural Economics and Rural Sociology, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

WOLFGANG D. BAUER, Associate Professor, Department of Agronomy, effective July 1, 1993 through June 30, 1994.

STRATOS E. CONSTANTINIDIS, Associate Professor, Department of Theatre, effective Spring Quarter 1994.

DANIEL L. COX, Associate Professor, Department of Physics, effective Winter Quarter and Spring Quarter 1994.

BARBARA A. CROMER, Associate Professor, Department of Pediatrics, effective September 1, 1993, through July 1, 1994.

ANDRZEJ J. DERDZINSKI, Associate Professor, Department of Mathematics, effective Autumn Quarter 1993 and Winter Quarter 1994.

HELEN FEHERVARY, Associate Professor, Department of Germanic Languages and Literatures, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

BERND FISCHER, Associate Professor, Department of Germanic Languages and Literatures, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

JEFFREY D. FORD, Associate Professor, Department of Management and Human Resources, effective Autumn Quarter 1993.

HEIKE S. GOELLER, Associate Professor, Department of Industrial Design, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

MATHEW HERBAN III, Associate Professor, Department of History of Art, effective Autumn Quarter 1993 and Winter Quarter 1994.
PERSONNEL ACTIONS (contd)

Professional Improvement Leaves (contd)

SCOTT H. IRWIN, Associate Professor, Department of Agricultural Economics and Rural Sociology, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

DEBRA A. MODDELMOG, Associate Professor, Department of English, effective Autumn Quarter 1993, and Winter Quarter 1994.

RICHARD H. MOORE, Associate Professor, Department of Anthropology, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

RANDOLPH L. MOSES, Associate Professor, Department of Electrical Engineering, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

FRED D. SACK, Associate Professor, Department of Plant Biology, effective Winter Quarter 1994.

ANTHONY R. WALKER, Associate Professor, Department of Anthropology, effective Winter Quarter and Spring Quarter 1994.

BRUCE W. WEIDE, Associate Professor, Department of Computer and Information Science, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

PHEORIS WEST, Associate Professor, Department of Art, effective Winter Quarter and Spring Quarter 1994.

SHANG-TIAN YANG, Associate Professor, Department of Chemical Engineering, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994.

Promotions and Tenure

COLLEGE OF AGRICULTURE

PROMOTION TO FULL PROFESSOR

Donald J. Eckert, Agronomy - effective 7/1/93
H. Erdal Ozkan, Agricultural Engineering - effective 7/1/93

RESOLUTIONS IN MEMORIAM

Resolution No. 93-138

Synopsis: The Academic Affairs Committee recommended the approval of two Resolutions in Memoriam.

RESOLVED, That the Board adopt the following Resolutions in Memoriam and that the President be requested to convey a copy to the families of the deceased.

Joseph Havlicek, Jr.

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on March 15, 1993, of Joseph Havlicek, Jr., Professor in the Department of Agricultural Economics and Rural Sociology.

A native Ohioan, Dr. Havlicek was born in Rockford, Ohio, on April 18, 1934. His roots in Mercer County agriculture provided strong support for his many contributions to his profession. He received both his Bachelor of Science in Agriculture and Master of Science (Agricultural Economics) degrees from The Ohio State University in 1955 and 1956, respectively. He earned his Doctor of Philosophy degree in both Agricultural Economics and Statistics from North Carolina State University in 1959.

Before assuming administrative responsibilities beginning in 1982, Dr. Havlicek spent 23 years in research and graduate teaching in the areas of agricultural marketing, price analysis, demand and consumption, environmental economics, and technology assessment. Dr. Havlicek served as Chairperson of OSU's Department of Agricultural Economics and Rural Sociology from 1984 to 1990. From 1982 to 1984, he was Chairman of the Department of Agricultural and Resource Economics at the University of Maryland. From 1974 to 1982, Dr. Havlicek was Professor of Agricultural Economics and Professor of Statistics at Virginia Polytechnic Institute and State University. At VPI, he was engaged in teaching agricultural economics and statistics and in research focusing on supply, demand, price analyses of selected products and production inputs, consumption analysis, environmental economics, and returns to investment in agricultural research. Dr. Havlicek began his academic career at Purdue University where he spent 13 years in research and teaching. His research focused on interregional competition, demand and price analysis of selected agricultural products and purchased inputs, and the economics of waste management.
RESOLUTIONS IN MEMORIAM (contd)

Joseph Havlicek, Jr. (contd)

After completing graduate work in 1959, he worked in the Agricultural Economics Branch of the Tennessee Valley Authority where he conducted research in agronomic-economic analyses and resource economics. Most recently, he had been working with Prague University in the Czech Republic to establish programs between that school and OSU.

Dr. Havlicek's professional memberships included Gamma Sigma Delta, Sigma Xi, Atlantic Economic Society, Southern Agricultural Economics Association (SAEA), The Econometric Society, American Statistical Association, American Economic Association, and the American Agricultural Economics Association (AAEA). He was President of the SAEA in 1984 and President of AAEA in 1987. In 1989 he was named the 108th Fellow in the 79-year history of the American Agricultural Economics Association, the highest distinction bestowed upon members in that association.

Dr. Havlicek was well-known and highly respected by colleagues around the world. He achieved much in his lifetime. His energy, good nature and optimism were contagious.

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy and sense of understanding in its loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

George P. Patten

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on March 19, 1993, of George Phillip Patten, Professor Emeritus in the Department of Geography.

Dr. Patten was born on June 29, 1924, in Farmersburg, Indiana. He earned a Bachelor of Science degree from Indiana State University in 1948 and first came to Ohio State later that year to undertake graduate work in Geography receiving his M.A. in 1949. He later continued his graduate work at Northwestern University receiving the Ph.D. there in 1955.

Dr. Patten was invited to return to Ohio State in 1957 as an Assistant Professor following prior teaching experiences at the University of Arkansas, Hunter College, and Iowa State Teachers College. He was promoted to Associate Professor in 1963 and to Professor in 1969. He retired in 1986.

Professor Patten carried on research in tropical agriculture in Central America, particularly in Nicaragua. This led to a number of journal articles and encyclopedia entries dealing with aspects of tropical agriculture that reflected his field work in the region. In addition, he wrote about agriculture in the emerging smaller nations of West Africa.

George "Phil" Patten was known as a warm and friendly person. He taught a large number of undergraduate courses during his career as well as graduate courses on Central America and Africa related to his research. His nearly 30 years of service to the University reflected his strong interest in his students and his commitment to the University.

On behalf of the University community, the Board of Trustees expresses to the family and friends of Dr. Patten its deepest sympathy. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's realization of the loss that the family, the University, and many friends and associates have sustained.
RESOLUTIONS IN MEMORIAM (contd)

Upon motion of Mr. Kessler, seconded by Mr. Shumate, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

REPORT - UNIVERSITY'S ENDOWMENT FUND
Resolution No. 93-139

RESOLVED, That the report on the University's Endowment Fund, dated April 16, 1993, as submitted to the Investments Committee of the Board of Trustees, be received and filed with the official records of the Board.

--0--

REPORT - UNIVERSITY'S ENDOWMENT FUND QUARTERLY REPORTS
Resolution No. 93-140

RESOLVED, That the report on the University's Endowment Fund Quarterly Reports, dated March 31, 1993, as submitted to the Investments Committee of the Board of Trustees, be received and filed with the official records of the Board.

--0--

REPORT - UNIVERSITY'S CASH AND INVESTMENTS
Resolution No. 93-141

RESOLVED, That the report on the University's Cash and Investments, dated March 31, 1993, as submitted to the Investments Committee of the Board of Trustees, be received and filed with the official records of the Board.

--0--

REPORT - ENDOWMENT INVESTMENT POOL
FINANCIAL STATEMENTS
Resolution No. 93-142

RESOLVED, That the report on the University's Endowment Investment Pool Financial Statements, dated March 31, 1993, as submitted to the Investments Committee of the Board of Trustees, be received and filed with the official records of the Board.
May 7, 1993 meeting, Board of Trustees

Ms. Casto:

Mr. Chairman, I would like to say how much I've enjoyed working with you over the last 8 years and how much we will miss you.

Mr. Barone:

Thank you. I also would like to thank each and every one of the Trustees for making my job so pleasant and I hope satisfactory. I want to personally thank all of you.

--0--

Thereupon the Board adjourned to meet Friday, June 4, 1993, at The Ohio State University Fawcett Center for Tomorrow, Columbus, Ohio.

Attest:

Madison H. Scott     John J. Barone
Secretary            Chairman
Columbus, Ohio, June 4, 1993

The Board of Trustees met at its regular monthly meeting on Friday, June 4, 1993, at
The Ohio State University Fawcett Center for Tomorrow, Columbus, Ohio, pursuant to adjournment.

Minutes of the last meeting were approved.
June 4, 1993 meeting, Board of Trustees

The Chairman, Ms. Casto, called the meeting of the Board of Trustees to order on June 4, 1993, at 10:15 a.m. She requested the Secretary to call the roll.

Present: Deborah E. Casto, Chairman, John W. Kessler, Milton A. Wolf, Leslie H. Wexner, Alex Shumate, Theodore S. Celeste, Michael F. Colley, George A. Skestos, David L. Brennan, and Hiawatha N. Francisco, Jr.

--0--

Ms. Casto:

I am pleased to have the opportunity to officially welcome Mr. David L. Brennan as our newest member of The Ohio State University's Board of Trustees.

--0--

COMMITTEE APPOINTMENTS 1993-1994

Resolution No. 93-143

WHEREAS the appointments to Committees and representatives to the Research Foundation Board of Directors, the Inter-University Council, the University Hospitals Board, The Arthur G. James Cancer Hospital and Research Institute Trustee Liaison, the Ohio State University Affiliates, Inc., Board of Directors, the Ad Hoc Committee on Planning, the University Foundation, and the University Managed Health Care System, Inc. ### COMMITTEE APPOINTMENTS 1993-1994 (contd)

| University Hospitals | Theodore S. Celeste  
| Board | George A. Skestos  
| The Arthur G. James Cancer Hospital and Research Institute | John W. Kessler  
| Trustee Liaison | Alex Shumate  
| Ohio State University Affiliates, Inc. | Deborah E. Casto (term 1 year)  
| | John W. Kessler (term 2 years)  
| | Milton A. Wolf (term 3 years)  
| University Foundation Ex Officio Class of Directors | Deborah E. Casto (term 1 year)  
| | John W. Kessler (term 2 years)  
| | Alex Shumate (term 3 years)  
| University Managed Health Care System, Inc. Board of Directors | Theodore S. Celeste  
| Committee on Planning* | Michael F. Colley, Chair  
| | Alex Shumate, Vice Chair  
| | John W. Kessler  
| | George A. Skestos  

*Serves as Board of Trustee's interface with the University's Planning Committee.

NOW THEREFORE

BE IT RESOLVED, That the above Committee appointments and the representatives for 1993-94 are hereby ratified and confirmed.

Upon motion of Mr. Skestos, seconded by Mr. Colley, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

### PRESIDENT'S REPORT

President Gee:

First of all, congratulations, Ms. Casto, on your first meeting as chair of this Board. You are doing great. I know that your contributions will be of great value as we face a number of opportunities and challenges that we have here. Also, congratulations, Mr. Brennan, and welcome to the Board of Trustees.

We are very pleased to have you here. I would also like to note, that sitting here and already taking on new responsibilities is the incoming Provost of the University, Dr. Richard Sisson. We are very pleased to have you here with us, Dick, and hope you are enjoying yourself.

I wanted to note that I have asked Dr. Martha Garland, chair of the Steering Committee, to now sit with us as a resource person. I think it is important that we have a representative from our faculty sitting with our vice presidents as a resource person for the University. That will make a great deal of difference.
PRESIDENT'S REPORT (contd)

President Gee: (contd)

Finally, in this regard, I would like to give congratulations to one of the members of our Board of Trustees, who just officially became a newly minted member of the Academy with a Ph.D., Dr. Milton Wolf. Dr. Wolf received his Ph.D. in economics, two weeks ago from Case Western Reserve, a distinguished institution which he is now distinguishing even further by that degree. Nonetheless, it is not an Ohio State degree, but he has one decent degree that we know of which is that Ohio State degree. But Mr. Ambassador, now Dr. Wolf, congratulations. That is a unique achievement and we are all proud of you.

As the academic year draws to a close, we are, indeed, facing budgetary challenges. Over the past few weeks and months, several factors have had significant impact on our planning for next year. Lower than expected enrollment revenues, the slow recovery of the state and national economies, and spending commitments have brought into sharp relief the problem with which we are dealing. Simply put, as I told our university community last week, while it is healthy that our ambition exceeds our revenues, we must assure that our expenditures do not.

Over the past several days, I have met with faculty, staff, and students across the campuses to field their questions and hear their concerns. We continue to encourage open discussion and welcome the variety and creativity of solutions being brought forward from many sources. Based on these open meetings, I am more convinced than ever that the people of this university, while very concerned at the impact of the losses we have experienced, share a deep commitment to protecting the quality of education that Ohio State offers to its students. And so therefore despite the challenges, I remain encouraged by the support of our hard-working faculty, our students, and their families.

One mother wrote to me last week that as far as her two daughters are concerned, "Ohio State University is the greatest learning institution in the world, barring none." While during these difficult times, that kind of dedication inspires our efforts and certainly reflects the pride of this institution.

We do, indeed, have much to celebrate and let me just talk about those. In May, we inducted 44 Columbus sixth-graders into our Young Scholars Program. They join the nearly 2,000 students from nine major Ohio cities who are part of this effort. The first class of Young Scholars, inducted as sixth graders in 1988, will be entering their senior year next fall. We look forward to welcoming all of them to Ohio State.

Yesterday, I introduced to the media a group of outstanding high school graduating seniors who will be entering Ohio State this fall. They are members of a class that again promises to be the best on record at this University. We expect to have 106 National Merit and National Achievement Scholars in the class, keeping us among the top universities in the country. We also will be welcoming a record number of Minority Scholars and University Scholars -- students in the top 3 percent of their high school classes. They will be joining an already distinguished group of students and faculty.

Dan Wiley, a senior from Atwater, Ohio, received the Andrew W. Mellon Fellowship as one of the top 80 students in the nation this year in the humanities. Dr. Milap Nahata, professor of pharmacy practice, has received the 1993 Distinguished Pharmacy Educator Award from the American Association of Colleges of Pharmacy. As distinguished scholar, Professor Nahata is praised by his students for using examples of his research that enhance their studies. He was chosen from among 4,000 pharmacy faculty nationwide.
June 4, 1993 meeting, Board of Trustees

PRESIDENT’S REPORT (contd)

President Gee: (contd)

This month, the university has recognized a number of members of our Ohio State family for their contributions throughout the year. Twelve notable students were named Outstanding Seniors and 50 received the Presidential Leadership Citation for their efforts to enhance campus life. Many of the colleges and departments have held recognition events to honor enrollment achievement.

I might note that there was truly an inspiring occasion for the university and the community with the presentation of the 1993 Wexner Prize to John Cage and Merce Cunningham. Mr. Cunningham literally transfixed the audience with his recollections of his collaboration with John Cage and his sincere appreciation for this honor.

The Wexner Prize is bringing great credit to the university, while a new degree program is advancing the role of Ohio State in the area of arts policy, funding, and regulation. This Master's degree program in arts policy and administration is a collaboration between the College of the Arts and the School of Public Policy and Management. To inaugurate the program, a symposium brought a distinguished panel to campus to discuss public policy and the arts.

I had the enjoyable opportunity to meet with the members of the Ohio State Class of 1943, marking their 50th reunion, and the Class of 1933, celebrating their 60th anniversary. For many of these alums, their years on campus were cut short by national and international turmoil. Their stories were interesting and their devotion to their alma mater is absolutely unbelievable.

From our newest class of Young Scholars to our alumni across the ages, Ohio State remains a place of opportunity, a place of vitality, and a place of commitment. And so in these times of challenges we have much to celebrate and much to strive toward as we work through the opportunities that are presented to us.

With that, I give you my report, Madam Chair.

--0--

REPORT ON THE COLLEGE OF VETERINARY MEDICINE

Ms. Casto:

At this time, I would like to call on Dr. William DeHoff and Dr. Milton Wyman, who wish to address the Board regarding the College of Veterinary Medicine.

Dr. Milton Wyman:

Thank you, Madam Chair. Distinguished Board of Trustees Members, we want to thank you on behalf of the Veterinary Medical Alumni Society for the opportunity to address this Board and our concern for the future of veterinary medical education here in the State of Ohio.
Dr. Wyman: (contd)

When President Gee first came on board at the University, he came over and made visitations to all of the schools and he honored us with his presence. His off-the-cuff comments suggested that he would support uniqueness and excellence in education. I would like to discuss with you a little bit about the uniqueness and the excellence of veterinary medical education in the State of Ohio.

We are the only College of veterinary medical education in the state. That in itself is very unique. Indeed, we are one of only twenty-seven colleges of veterinary medicine in the United States. We are the third oldest college of veterinary medicine, and the largest college of veterinary medicine in the United States. We have graduated more veterinarians than any other college of veterinary medicine in the United States.

One hundred and thirty students are selected every year to the College. This is in and of itself unique, because it is more difficult to get admitted to a college of veterinary medicine than it is to any of the other allied health professions. The reason for that is because of the posity of schools and the interest in the profession. So we have an opportunity to select extremely bright, young people who have finished their academic requirements for admission to the College of Veterinary Medicine.

The average point hour of these students is somewhere in the area of 3.5. We talk about national merit scholars -- we have very, very good national merit scholars, because we select these students from other institutions rather than only The Ohio State University. Their diversity of socioeconomic and cultural backgrounds provide an excellent environment for not only our College, but the University. The majority of our students that we select, fulfill the requirements to earn the degree Doctor of Veterinary Medicine.

Let's talk about some of the excellence in veterinary medicine in the State of Ohio. We have the largest clinical patient load in institutional veterinary medicine. That is extremely important, because our students have an opportunity to get hands on experience. Our faculty and graduate students have available to them naturally occurring diseases that go across-the-board of species and, indeed, reflect the opportunity for basic research in diseases of animals and humankind.

Let me cite some examples of this. Our retrovirus laboratory -- that group was responsible for the development of a feline-leukemia vaccine. This is analogous to, but not identical to, AIDS. And although it does not answer the immunization for AIDS question, it certainly adds a piece of the puzzle to that very difficult situation.

Many years ago, one of our faculty members developed the first artificial hip and today, the Gorman Prosthesis is routine in the replacement of hips, knees, etc. A veterinarian from the State of Ohio, from the College of Veterinary Medicine, was responsible for the initiation of that through animals.

In regards to the internal fixation of fractures, the late Dr. Bruce Hohn, brought that technique to this country from Switzerland. It is utilized annually in a short course -- over twenty years now -- where the individuals who participate number in excess of 450 every year. These are medical people and veterinarians from this country and abroad. It has received the highest awards from this University for continuing education. It is more or less extension work without any cost to the University.
REPORT ON THE COLLEGE OF VETERINARY MEDICINE (contd)

Dr. Wyman: (contd)

I can continue to go on with all of the various things that our institution can be proud of in excellence and in uniqueness. We share the pride -- the good Buckeye Pride -- of this institution, in general, and of the College of Veterinary Medicine, in particular. We thought with the excellence and the uniqueness of our College that we would be on this ship. We find that we are on a lifeboat and we are not certain whether that lifeboat is seaworthy.

I would like to introduce my colleague, Dr. Bill DeHoff, who will discuss some of the other problems that we feel are present today. Bill --

Dr. William DeHoff:

I thank you for your time and I will be as brief as I can. Dr. Wyman and I have been asked, by the Veterinary Alumni Association of the College of Veterinary Medicine of Ohio State University and by the State's Veterinary Medical Association, to present some concerns to you for your consideration. Because it is incomprehensible to them that the present activities of the University and its administration in its approach and direction to this College are unacceptable.

It is felt that you, the Board of Trustees, must not be fully aware of the attitude that is perceived by the College and the alumni of the activities of the administration. We are aware that the alumni has little official or legal position as to the decision-making process, except the positions that we may assume in voicing our support or disagreement with University activity. To what extent this review is decided upon or questioned and pursued is up to the individual organizations. Therefore, before the process of examination or review widens or explodes, the leaders of organized veterinarian medicine in this State and the memberships of the alumni of Ohio State around this country and around this world felt that the Board of Trustees should be fully aware of the problems and how they are being managed at this time. We need to be sure that we have at least presented our concerns, brief albeit.

It should be reinforced that the alumni of the University of professional colleges have a close binding. I am an alumnus, as are all of the rest of them that represent us here today. The binding to your professional college is greater. It goes on through a formation of learning as a way of life in your professional career, which is continually supported by your college. The personal reputation of the college is felt to reflect personally on the individual veterinarians or physicians or dentists, as it may be. The feelings of commitment -- to give you some idea why these people have come out of everywhere -- is not dissimilar to a parent in the local school system with their children. It may not be the most logical or forthright, but it is sincere and it is dear. They are committed to being sure not that we receive any more, but that we receive no less than is our due.

The straw that broke the camel's back that was brought to the Board and that brought the body of the alumni to their feet was the process that will not go away. It was the manner, the style, the attitude, and the lack of respect in the presentation for the request of the resignation of the Dean of the College of Veterinary Medicine. He is not the reason we are here, he is just the lightening rod that has brought the alumni across this country to their feet.
REPORT ON THE COLLEGE OF VETERINARY MEDICINE (contd)

Dr. DeHoff: (contd)

We are aware of severe budget cuts continuing from the State over which you have little control, but we are sure that you are working very hard to shore them up. The question is to what degree -- and more importantly, are those cuts understood by the budgeteers. This is the largest veterinary medicine college in the country. Of the five schools in the Big 10, the student/faculty ratio at Ohio State is five to one, the average is 3.8 to one. Funding of faculty salaries is about $8,000 below the average full professor and it's equivalent as it drops. $24.9 million was brought into Ohio State's College, the average for those other five colleges is $33.7 million. The average student expenditure is $39.8 million at Ohio, the average for the other schools is $68.5 million. University funding is 58 percent of our total budget, 28.9 percent goes for the professional student, when the average is 51.2 percent.

This is a time of decreasing financial budgets, which everybody is going through. When it gets down where it gets bitter you have to make hard choices. The decision to start new programs is admirable, but when it takes from your foundation stock, whether you are a farmer or you are in business, and you start to cut away the pins that have made you strong we begin to doubt that the judgements are being used in an appropriate manner.

Our College is under limited accreditation by the AVMA and this needs to be corrected for us not to be predisposed to losing accreditation. Faculty and student morale isn't good. It's not good anywhere. It is very difficult when there have been no raises since 1991. The growth is rapid in our profession and we are having difficulty getting the funding to keep up with the physical needs. A department of 120 faculty, with about six secretaries -- these are people that are not only calling your local veterinarians to report about cases, but trying to get out their data. It makes for a very inefficient system.

The uniqueness and excellence that the faculty heard they believe. It is not a school of high powered business people that have made major decisions. These are people that work in laboratories, and teach the students that lead this nation in a variety of professions. When they learned that their budget was cut 7 percent last year -- and it was more than all the other allied health professions on campus -- they wondered why if uniqueness and excellence which they know they have, and they presented were not followed up with the words they took to be fact [as Dr. Wyman said President Gee "would support uniqueness and excellence in education"].

Recruiting of minorities is always a problem. I see it in the paper all of the time and every university is seeking minorities. Our College set up a program which is serving our profession by seeking minorities to come into this profession. It identifies them through their testing scores -- people who can compete. Yet, other schools now have adopted the program and they are now getting the students. We do not have the scholarship money to present to these people, and a chance to put the minorities into professional colleges and positions around this country.

Dean Wright -- thirteen years of service as dean. Selected by the faculty and the administration of this University; renewed after five years by the faculty and, again, the administration of this University; and renewed again by the faculty and this administration of this University. And after three years, two years from retirement, he is asked to tender his resignation in the morning to save him the embarrassment of asking the faculty for a vote.
REPORT ON THE COLLEGE OF VETERINARY MEDICINE (contd)

Dr. DeHoff: (contd)

Dean Wright is the academic head of the veterinary profession in this State. When you select a dean of the College of Veterinary Medicine anywhere in this country and in Canada, you select the head of the academic affairs of the profession. Dean Wright is President of the Council of Deans of the Veterinary Colleges. Dean Wright has raised more money for our College programs in gifts than any other dean in the history of our College. Dean Wright started the Alumni Scholarship Program, that in its first casting produced over $250,000. He is also president-elect of the AVMA.

Asking the Dean to step-down in this manner is not what we believe is appropriate administration. Given the fact that he is two years from retirement, you are going to ask the faculty for a vote, you have a budget that is decreasing that you cannot control completely, how are you going to begin to offer another job to a qualified person? To say, "Come with us, we have a great situation for you to come with, and we are backed up by the Board of Trustees, the administration, the faculty, and the State of Ohio." You do not have an opportunity to do that.

This is just the tip of the iceberg that I have been able to present. It is little things that break that camel's back. In a budget meeting a week ago Monday with the budget people for the faculty of the College of Veterinary Medicine, a member of the Provost's office, who has been on this campus and who was asked to visit the College, asked the question, "How many veterinary schools are there in the State of Ohio?" I can't imagine in your businesses or in my business having someone responsible for my financial success not being aware of what is going on within the colleges for which they hold the restraints and the bloodlines! This means a great deal. This is everything to this State.

The Veterinary School did not call Mrs. Smith at 5:00 this morning to tell her that her great boxer dog had died -- which I had to do. This is a much bigger thing and you have a part in it. We ask the Board of Trustees -- we trust your judgement -- to please investigate what is happening. Make your decisions wisely, but do not cut the foundation pins of this University for the desire to start new programs. We don't doubt they may be needed, but there must be a better time and a better place.

Dr. Wyman and I thank you for your time. Our feelings are sincere and if you have any questions at any time, we would be more than pleased to speak with you. Thank you.

Ms. Casto:

Thank you, gentlemen, for your comments.

--0--

STATUS REPORT ON MANAGING FOR THE FUTURE TASK FORCE

Mr. Skestos:

On March 16, 1993, our Steering Committee had its first meeting as a committee of the whole. The Committee is made up of eleven members: six faculty, two staff, one outside business person, a student representative, and myself. Bill Shkurti, Vice
Mr. Skestos: (contd)

President of Finance, and Nancy Rudd, Vice Provost for Academic Affairs, were asked to attend and to give us a sense of what the genesis of the Task Force was and what it thought it was suppose to be accomplishing. We also wanted to get a sense of where there was agreement, where there was a lack of consensus, and finally, what the implications of the recommendation of the Task Force were to the University.

After hearing from both of these people, the Committee then discussed what our role was and the best means of accomplishing the tasks. We also decided the best way to proceed was to form five subcommittees. Each subcommittee is addressing one of the five recommendations of the Ohio State Task Force which are as follows: 1) the Simplification of the University's Organization and Governance Structure; 2) Improving Its Information Management System; 3) Establishing Documentation of Academic Achievements, such as assessment of student performance and systematic evaluation of academic programs, along with the formation of workloads for faculty members as to teaching, research, and service; 4) Improving our Academic Support Service, which involves developing criteria for centralizing services, reviewing guidelines for contracting work, and developing a personnel evaluation and reward system among other things; 5) working with the State to bring about changes in policy that effect OSU particularly, modifying our subsidy formula so it does not penalize us in the fulfillment of our mission statement, seeking the permission of the State to manage our own capital construction projects, and being allowed to develop and administer our own personnel system.

Our first subcommittee meeting dealing with the University's Organization and Governance Structure, was held on April 8, 1993. Dean Garland was appointed chairman of this committee. In addition to the regular members present, Nancy Rudd, from Academic Affairs, Professor Martha Garland, from the University Senate, and Professor Robert Holmes, from the Faculty Council, were invited to attend and discuss those matters which their constituent groups were presently working on. Professor Holmes described the Faculty Council and its role in the University's governing structure. He discussed the current strides to make the Council more prominent, including holding meetings specifically to discuss topical issues of concern such as faculty workload policies, faculty sanctions, and other such matters.

Professor Garland spoke to us concerning faculty participation in the Council and Senate. There was some general discussion concerning the Senate's image and its powers. In addition, there was a discussion concerning the need to stimulate a greater interest by the faculty in the Council and the Senate, and the importance of communicating to the departments and the public what the Senate is doing. We ended the discussion on how more emphasis should be given to the service aspect of the faculty members' duties. All agreed that more credit and recognition should be given to those who serve.

The following day, April 9, 1993, our subcommittee on the Improvement of the University's Information Systems met. In addition to the regular committee members, Charles Bender, Director of Academic Computing and the Supercomputer Center, Jim Davis, Associate Director of Research Computing, and Associate Provost Don Dell were present and discussed the University's Information System.
Mr. Skestos: (contd)

Jim Davis began with a discussion concerning current and structural projects, including HomeNet, a system to bring faculty, students, and administrators together. It is the hope eventually to get everyone working on the same network and to have computing available to all in their homes. Don Dell described how the current student services evolved and developed independently. Currently Academic Computing is looking at an on-line interactive consultation system being used in Dayton. The Information Task Force which is headed by Vice President Hayes is currently looking at improving Brutus by adding a waiting list feature that would maintain a list of students that were closed out of particular courses and by retaining that list from quarter to quarter, giving those students priority assignment.

Charles Bender gave an overview of Academic Computing and discussed with us moving to a distributive mode of computing which is cheaper for the hardware, but more expensive initially for instruction in training personnel. He indicated that the deans seemed to be in favor of it. He further described technology change in general, and said that at OSU we have conservative technology that is traditionally one generation behind in mainframes. Mr. Bender, when asked about the cost in making changes to bring us current, indicated the academic portion would cost approximately $20 million over what we now spend. He also indicated that the deans rank computing as number two on their list of priorities.

We briefly discussed remote interactive videos and cooperative efforts for sharing the networks to teach courses at different sites. Mr. Jay Yutzey was appointed the chairman of that subcommittee.

Again, on May 5, 1993, the Academic Achievement Committee met. In addition to the regular committee members, David Williams, Vice Provost for Minority Affairs, and Jim Mager, Director of Admissions and Financial Aid, were invited to discuss current operations with their units and how they related to documenting academic achievements. We discussed the climate for minority students on campus and a tracking system for surveying students. We also had an extensive discussion on student assessment and, in particular, the North Central Accreditation requirements, and the effect of the June 1995 deadline.

We also discussed the University's progression from open admissions to selective admissions and the change that has been effected on the profile of our undergraduate student population. It is interesting to note that during the last three years, beginning with the Autumn Semester of 1990, the number of National Merit Scholars at OSU has increased from twenty-six to over 100. In addition, the average SAT composite scores during that same period have gone from 965 to 990. The number of National Achievement Scholars has risen over 300 percent, and the number of University scholars has gone from 272 to 405. Furthermore, our retention for students graduating at the end of a six-year period has gradually been on the rise.

We also discussed the need for an increased effort in recruiting top quality minority students and the much needed additional support for such students. Professor Susan Huntington was named chairman of this committee.
Mr. Skestos: (contd)

On May 14, 1993, the Simplification of the Organization and Governance Structure Committee met for the second time. At this meeting we asked Professor Martha Garland, from the University Senate, to give us further information as to the changes that the Senate was considering. She indicated that greater faculty participation on the Council was being sought and further noted that the Council was currently meeting monthly to discuss institutional issues. Because of greater faculty participation, it is hoped that the Senate will come to be seen as a truly representative body of the faculty. She also told us about three committees which had recently been created with the purpose of: 1) first evaluating the Senate structure; 2) looking at the effectiveness of the Senate committees; and 3) triaging.

We also briefly discussed Regional Campuses and some of their complex issues. There was additional discussion on the link between budget and academic programs and the need to better communicate this to the faculty. It was felt, and this is an important note, that the serious fiscal problems of the University are not always fully realized by the faculty and we need to better communicate to them on this important issue. We briefly touched on the pros and cons of reorganization and it was the feeling that such reorganization should not only be for fiscal reasons, but also academic reasons. Such changes should always be based on quality.

We held our second committee of the whole meeting on June 1, 1993. We asked Bill Shkurti, Vice President for Finance, to come and speak to our committee on the implications of what our present fiscal crisis might have on the various matters which our subcommittees have under consideration, such as the funding of informational systems, the changing in admission policies, and other such related matters. Later on in the meeting, we again reexamined our role and agreed to stress in our subcommittee meetings the importance and need for long-range and intermedial range planning. We also felt we should state goals and objectives with time tables to accomplish things. We agreed to continue to further gather information in order to become more familiar with the various issues at hand, as well as monitor the activities underway.

In addition, we agreed to identify ways that the various subcommittees might facilitate and support those units working on the various Task Force recommendations. We all agreed that our committee would be one of activism and that each one of us would assist in communicating to members of the faculty, student body, supporting staff, and Trustees the progress that is being made and the urgency and necessity of their support. Our committee is dedicated to involvement. That ends my report.

Ms. Casto:

That's wonderful. Does anybody have any questions on this report?

President Gee:

I have really appreciated your own personal leadership. I think it is worthy to note, and you have shared this with me, that this particular committee has taken this task very seriously and they are working very steadily on all of these issues. I hope you convey my own personal thanks to them, because given the issues that we are dealing with right now, I think that the escalation of those issues is going to have
June 4, 1993 meeting, Board of Trustees

STATUS REPORT ON MANAGING FOR THE FUTURE TASK FORCE (contd)

President Gee: (contd)

to come along. I assume with the time frames that you have given that we could still meet some of our objectives even this year. Right?

Mr. Skestos:

Yes. I think we have the finest people that we possibly could gather from this University sitting on the steering committee. Each and everyone of them is 100 percent dedicated to involvement and has the highest interest for the University.

Ms. Casto:

Thank you, Mr. Skestos.

--0--

RESEARCH FOUNDATION REPORT

Mr. Celeste:

A summary of the Grants and Contracts received by The Ohio State University Research Foundation during the month of April may be found at Tab 1 in this report. In the first table, the awards for the period July through April from Federal sponsors continue to show an increase of about 5 percent. However, the total funding from all sponsors is down about 5 percent. There are significant increases in funding from the Department of Defense, Department of Education, and the National Institutes of Health. The second table provides a summary of fiscal year 1993 awards with the detail on how the awards would have been distributed between the Research Foundation and the Engineering Experiment Station prior to their merger.

At Tab 2 you will find expenditure summaries for the month of April. Total expenditures have increased 5.3 percent and it is noteworthy that both Federal and Non-Federal expenditures are following this trend.

Some new projects of special interest that were funded in the month of April are listed at Tab 3. These new projects are in areas that the University has identified as Key Technologies. Professor Jessie Au, an NIH Merit awardee from the College of Pharmacy, has received $284,193 for her part in three new projects funded by the National Institute of Health. Professor Au, as Program Director, will be interacting with Professors Badalament and Wientjes on their projects as they all focus on Mitomycin C. Professor Au's project will focus on studying the determinants of Mitomycin C in human solid tumors with the hope of finding indicators that will identify patients likely to respond to Mitomycin C treatment.

Professor Alan Paau in the Biotechnology Center has been funded by the Midwest Plant Biotechnology Consortium to develop a campus-wide, goal-oriented Biomass/Biofuel Consortium which will emphasize a multidisciplinary team approach to research and problem-solving in bioenergy issues.
June 4, 1993 meeting, Board of Trustees

RESEARCH FOUNDATION REPORT (contd)

Mr. Celeste: (contd)

Yesterday I met with Professor Frank De Lucia, Chairperson of Physics, to discuss research activity in his department. We spent a great deal of time talking about the potential impact of our present financial situation of the department as well as the University in general. A concern is that we do not want to disrupt the Physics Department, which has a terrific national reputation that is built upon the Nobel Laureate, 6 NSF Presidential Young Investigators, and many eminent faculty.

At Tab 4 is the list of all projects funded in April.

At Tab 6 is the press releases issued by University Communications highlighting recent research activity.

REPORT OF RESEARCH CONTRACTS AND GRANTS

Resolution No. 93-144

Synopsis: The reports on research and other sponsored program contracts and grants and the summary for April 1993 are presented for Board acceptance.

WHEREAS monies are solicited and received on behalf of the University from governmental, industrial, and other agencies in support of research, instructional activities, and service; and

WHEREAS such monies are received through The Ohio State University Research Foundation and the Engineering Experiment Station of The Ohio State University:

NOW THEREFORE

BE IT RESOLVED, That the research agreement between The Ohio State University and The Ohio State University Research Foundation for the contracts and grants reported herein, and the acceptance of the reports from the Engineering Experiment Station during the month of April 1993 be approved.

Upon motion of Mr. Celeste, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

HOSPITALS BOARD REPORT

Mr. Skestos:

On May 27 the Hospitals Board received several reports. These reports included the annual evaluation on the programmatic and clinical activities of Dodd Hall. Ms. Ruth Mount, President of the Service Board, submitted the annual Service Board report. Additionally, there was a demonstration of the Central Ohio Medical Information Network (COMIN) which is co-sponsored by the Hospitals. This network will permit clinical and management information to be shared with those physicians, hospitals, and insurance companies who elect to be part of the computer information network. The Medical Director gave a brief overview of physician activities. The Chief of Staff updated us on the progress of the Single Bill Program.
June 4, 1993 meeting, Board of Trustees

HOSPITALS BOARD REPORT (contd)

Mr. Skestos: (contd)

The Hospitals Board reviewed, and pending final agreement by the University Board, approved the 1993-94 operating budget and the 1993-94 capital plan. The budget includes an average one percent (1%) rate increase.

AMENDMENTS TO THE UNIVERSITY HOSPITALS BOARD BYLAWS

Resolution No. 93-145

Synopsis: The amendments to the University Hospitals Board Bylaws are recommended for approval.

WHEREAS pursuant to bylaw 3335-103-01 of the University Hospitals Board Bylaws, the University Hospitals Board Bylaws may be amended by The Ohio State University Board of Trustees; and

WHEREAS the amendments to the University Hospitals Board Bylaws has been endorsed and ratified by the University Hospitals Board on April 22, 1993, as follows:

Amended Bylaws

3335-93-01 University hospitals board.

(A) (1) through (4) Unchanged.

(5) In addition to the hospitals board members, the following, at the board's request, will participate in deliberations, will receive agenda and minutes, and from time to time will be invited to attend board meetings and other activities, and to submit agenda items:

Persons designated by the university's board of trustees as emeritus hospitals board members
Deans of health sciences colleges
Medical director of university hospitals
Chief, hospitals medical staff, or equivalent position

(6) and (7) Unchanged.

(B) Unchanged.

(C) In recognition of unique contributions to university hospitals, former members of the hospitals board may be designated by the university's board of trustees as emeritus hospitals board members. Emeritus hospitals board members will be non-voting members, and will serve for a three-year term of office. At the end of the three-year emeritus term their board service will conclude and there will be no further service or attendance requirements.

3335-93-04 Meetings and notice.

(A) Regular meetings. Regular meetings of the hospitals board may be held at the hospital each month, or on a schedule established by the board, at times which shall be set and publicly announced by the chairperson of the board, or at such other time or place as may be announced by the chairperson.
(B) Special meetings. Special meetings may be called at the direction of the chairperson, or shall be called by the chairperson at the request of three members of the board, provided that notice to all board members shall be given not less than five days prior to the meeting. The notice shall state the time, place, and purpose of the meeting.

Balance unchanged.

3335-93-07 Removal.

(A) Unchanged.

(B) Any board member who has three unexcused absences for three successive meetings, or five unexcused absences in a calendar year, as determined by the chairperson, shall be automatically removed.

3335-95-01 Officers.

The officers of the board shall be members of the board and shall consist of a chairperson, vice chairperson, and such other officers as the board may deem advisable. The chairperson and other officers, chosen from among the citizen members, shall be elected annually by the board. No officer may serve more than two successive terms.

3335-95-02 Chairperson.

The chairperson of the board shall appoint all committee members; shall preside at all meetings of the board; shall be responsible for approving agenda for board meetings; shall make an annual report to the university board of trustees and such other reports as the Ohio state university board of trustees may require; shall serve as an ex-officio member, without vote, on all standing and special committees unless otherwise specified in the bylaws. The chairperson shall have such other and further duties and authority as may be prescribed elsewhere in these bylaws, or from time to time by the hospitals board.

3335-95-03 Vice chairperson.

During the absence of the chairperson or the chairperson's inability to act, the vice chairperson shall perform the duties and exercise the powers of the chairperson. (B/T 5/2/80, B/T 6/4/93)

3335-97-02 Executive committee.

(A) Responsibilities. The executive committee shall:

(1) Transact business of the board between regular meetings of the board.

(2) Coordinate the board's education and self-evaluation activities, and interaction with the Ohio state university board of trustees. The summary of the annual self-evaluation will be shared with the full hospitals board and communicated to the university trustees in accordance with Chapter 3335-93-03 (B).

(3) Coordinate board activities and committee representation.
(4) Ensure review of the hospitals board bylaws every other year, and forward the report/recommendations to the full hospitals board. Modifications will be forwarded to the university trustees for review and approval as appropriate and in accordance with Chapter 3335-103-01.

(B) Composition. The executive committee of the board shall consist of: the chairperson of the board, who will serve as chairperson of the committee; the vice chairperson of the board; the immediate past chairperson of the board; the president of the university; and the chairpersons of all standing committees of the board, and the two trustee members of the board. The vice president for health services, or other officer designated by the president of the university, and the dean of the college of medicine, the medical director, the hospitals executive director, the chief of the medical staff, and the chief of staff elect, shall serve as ex-officio members without vote.

(C) Unchanged.

3335-97-04 Administrative/operations committee.

(A) Responsibilities. The administrative/operations committee shall be responsible for the following specific duties:

(1) Development and maintenance of three year financial plan with continuous monitoring of the plan.

(2) Evaluating safety/security and disaster planning performance.

(3) Evaluating information systems development.

(4) Monitoring development programs.

(5) Monitoring capital and facilities programs.

(6) Monitoring operational goals and performance.

(7) Reviewing internal and external audit functions.

(8) Such other responsibilities as assigned by the chairperson of the board.

(B) and (C) Unchanged.

3335-97-05 Professional affairs/education/research committee

(A) Responsibilities. The professional affairs/education/research committee shall be responsible for the following specific duties:

(1) Monitoring all patient care activity in facilities deemed by the university trustees to be the administrative responsibility of university hospitals including, but not limited to, the hospitals, clinics, ambulatory care facilities, and physicians office facilities.

(2) Monitoring quality assurance performance under all programs identified in (1) above.

(3) Monitoring medical and other educational activity and relationship to hospitals.
AMENDMENTS TO THE UNIVERSITY HOSPITALS BOARD BYLAWS (contd)

Amended Bylaws (contd)

(4) Monitoring research activity and relationship to hospitals.

(5) Monitoring the evaluation of credentials and privileges requests of physicians and other applicants.

(6) Reviewing accreditation and licensure agency requirements and response to such.

(7) Reviewing of medical staff bylaws changes.

(8) Reviewing human resources actions including management and professional development, compliance with eeo guidelines, wage and salary administration and productivity.

(9) Such other responsibilities as assigned by the chairperson of the board.

(B) and (C) Unchanged.

3335-101-05 Appointment to the medical staff and assignment of clinical privileges.

Upon recommendation of the medical staff and in accordance with the medical staff bylaws, the board may appoint faculty members who are graduates of recognized medical and dental schools, meeting the qualifications prescribed in the medical staff bylaws, to membership on the medical staff of the hospitals and shall grant clinical privileges to such persons, subject to ratification of the Ohio state university board of trustees. Appointment to the medical staff carries with it full responsibility for the treatment of individual hospitals patients subject to such limitations as may be imposed by the board or the bylaws, rules, and regulations of the medical staff. Appointments to the medical staff shall be for two years, renewable each year in accordance with the reappointment procedure set forth in the medical staff bylaws. Reappointments to the medical staff will be made every other year by the board, and shall be for two years. (B/T 5/2/80, B/T 6/4/93)

3335-101-07 Hospital clinical departments.

(A) Appointment of the chief of each clinical department is subject to approval by the board on the recommendation of the dean of the applicable professional school and the vice president for health services. All such appointments shall be periodically reviewed by the board. Chiefs of clinical departments vacancies may be filled on an interim basis at any time by action of the dean of the appropriate professional college, after consulting with the board. (In general, the chiefs of clinical departments will be chairpersons of corresponding academic departments in the medical college.)

Balance unchanged.

NOW THEREFORE

BE IT RESOLVED, That the foregoing amendments to the University Hospitals Board Bylaws be adopted as recommended by the University Hospitals Board.

Upon motion of Mr. Skestos, seconded by Mr. Colley, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--
UNIVERSITY DEVELOPMENT REPORT

Mr. Shumate:

Through the April 30 reporting period, gift receipts are 50 percent ahead of the amount of gifts received during the same period one year ago. As we have reported during the past several months, we did receive one gift-in-kind of cartoon art worth $9.0 million, which does affect the total. However, we would still show a 29 percent increase over last year if we factored out the $9.0 million gift.

I would like to point out two changes in the format of this month's report: 1) the "Gift Receipts By Donor Type" report is footnoted to explain significant variations; and 2) we added a "Gift Receipts By Purpose" report to show the breakdown of gifts received by general purpose categories. Of particular interest here, please note that thus far this year we have received about $19.5 million toward the endowment. This is an 84 percent increase over this time last year.

Are there any questions? If not, Madam Chair, I would like to recommend to the Board the establishment of 15 new named endowed funds totaling $2,071,014 in restricted support to the University, including one new endowed Chair in the College of Medicine. I am also requesting the revision of one named endowed fund.

REPORT ON UNIVERSITY DEVELOPMENT

Resolution No. 93-146

Synopsis: The report on the receipt of gifts and the summary for April 1993 are presented for Board acceptance.

WHEREAS monies are solicited and received on behalf of the University from alumni, industry, and various individuals in support of research, instructional activities, and service; and

WHEREAS such gifts are received through The Ohio State University Development Fund and The Ohio State University Foundation; and

WHEREAS this report includes the establishment of fifteen (15) new named endowed funds and amendments to one (1) endowment funds:

NOW THEREFORE

BE IT RESOLVED, That the acceptance of the report from The Ohio State University Development Fund and The Ohio State University Foundation during the month of April 1993 be approved.

Upon motion of Mr. Shumate, seconded by Mr. Wexner, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.
REPORT ON UNIVERSITY DEVELOPMENT (contd)

</table>

\(^a\)Individual giving is up 46 percent compared to the July-April period one year ago because of five major gifts totaling $7.6 million (one current gift of $1.2 million, three irrevocable trusts totaling $5.3 million and an estate settlement of $1.1 million).

Of all gifts from individuals of $10,000 or more during July-April this year, there were 217 gifts for $18,650,096. Last year during the same period, there were 187 gifts but only totaling $10,370,242.

\(^b\)This increase is a result of a $9 million gift-in-kind (cartoon art). Factoring this gift out, corporate giving is still up 28 percent over last year.

\(^c\)Last year during the reporting period (July-April), there were 120 gifts of $10,000 or more from private foundations totaling $4,848,034. This year during the same period, private foundation giving at this level is down to 111 gifts totaling $4,217,099.

(Note: Of the $62,326,080 in current year gift receipts $8,688,256 or 14 percent is the result of the payment of pledges from The Ohio State University Campaign. Also, if you factor out the cartoon art gift-in-kind of $9.0 million, total giving is still up 29 percent over the comparable period of one year ago).

THE OHIO STATE UNIVERSITY FOUNDATION

Approval of Description and Establishment of Named Endowed Fund

The Chalmers P. Wylie Scholarship Fund for Public Service (Scholarships - College of Business) | $ 50,000.00 | $ 50,000.00 |

Change in Description of Named Endowed Fund

The Professor John C. Burnham Endowment Fund
Establishment of Named Endowed Funds

The Doctor John D. and E. Olive Brumbaugh Chair in Brain Research and Teaching

The Doctor John D. and E. Olive Brumbaugh Chair in Brain Research and Teaching was established June 4, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from the estate of John D. Brumbaugh (M.D. ’27), Akron, Ohio.

All gifts are to be invested in the University’s permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support a faculty chair position in support of brain research and teaching, including anatomy, physiology, pathology and therapeutics as related to the human brain as recommended by the Dean of the College of Medicine to the Provost and approved by the Board of Trustees.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the Dean of the College of Medicine or program administrative officer in order to carry out the desire of the donor for the benefit of education and research.

$1,447,144.51

The Ann and Emanuel D. Rudolph Fund

The Ann and Emanuel D. Rudolph Fund was established June 4, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from the estate of Dr. Emanuel D. Rudolph.

All gifts are to be invested in the University’s permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support a graduate research associateship or fellowship for a student enrolled in graduate study in the Department of Textiles and Clothing with a dissertation or thesis focus in the history of costume and/or buttons. Selection of the recipients shall be made by the Chair of the Department of Textiles and Clothing in conjunction with the Textiles and Clothing graduate studies committee.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

$250,000
Establishment of Named Endowed Funds (contd)

The Emanuel D. Rudolph Botanical Fund

The Emanuel D. Rudolph Botanical Fund was established June 4, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from the estate of Dr. Emanuel D. Rudolph, Professor Emeritus of Plant Biology, and from his family, friends and colleagues.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be distributed to The Ohio State University Herbarium and shall be administered by the Director of the Herbarium. The income shall be used for two purposes, namely, an amount equal to approximately $1,000 (indexed annually for inflation) shall support an annual Rudolph Memorial Lecture and associated expenses in the fields of cryptogamic botany, arctic/antarctic botany, or the history of botany. The remaining income shall be used for the preservation and continuation of the Rudolph Memorial Library in the Herbarium and related purposes.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the Dean of the College of Biological Sciences and the appropriate department chairperson or program administrative officer in order to carry out the desire of the donors.

$87,875

The William R. Davidson Doctoral Fellowship in Marketing

The William R. Davidson Doctoral Fellowship in Marketing was established June 4, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from the family, colleagues and friends of William R. Davidson (Ph.D., Business Organization, 1951).

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be distributed to the Chair of the Department of Marketing in the College of Business to be used to fund The William R. Davidson Doctoral Fellowship in Marketing. The fellowship shall be awarded to an outstanding candidate and support the student's work in the application of principles of economics and management to marketing institutions.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

$86,245.34
Establishment of Named Endowed Funds (contd)

The Auxiliary to the Columbus Dental Society Scholarship Fund

The Auxiliary to the Columbus Dental Society Scholarship Fund was established June 4, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from The Auxiliary to the Columbus Dental Society Loan Fund.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide scholarships to students in the College of Dentistry who are ranked in the upper twenty-five percent (25%) of their class, who are Ohio residents, and who exhibit some degree of financial need, with preference given to children of Auxiliary members. Any unused income shall be returned to principal at the end of each year in order to promote the growth of this endowment. Selection of the award recipient(s) shall be made by the College of Dentistry in consultation with the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the Dean of the College of Dentistry in order to carry out the desire of the donor.

$45,000

The David H. Stansbery Bivalves Endowment Fund

The David H. Stansbery Bivalves Endowment Fund was established June 4, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from David H. Stansbery (B.S., Biological Science, 1950; M.S., Hydrobiology, 1953; Ph.D., Zoology, 1960) and friends and faculty members of the College of Biological Sciences.

All gifts are to be invested in the University’s permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used for the enrichment and maintenance of the Bivalve Mollusk Collection such that it can better serve the objectives of research, teaching, and service, including expeditions, purchase of collections, and related expenses of the Division of Bivalves of the Museum of Zoology, a part of the Museum of Biological Diversity, as determined by the head of the Bivalve Division.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer of the museum in order to carry out the desire of the donors.

$23,800
Establishment of Named Endowed Funds (contd)

The Dr. Edward E. Eddowes Memorial Aviation Psychology Fund

The Dr. Edward E. Eddowes Memorial Aviation Psychology Fund was established June 4, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund in memory of Dr. Edward E. Eddowes of Birmingham, Alabama, from his widow, Mrs. E. Anne Eddowes, his family and his friends.

All gifts are to be invested in the University’s permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

This memorial will recognize Dr. Edward E. Eddowes’ lifelong interest in psychology and its application to aviation. The annual income shall be used to provide one or more fellowships to graduate students with preference given to those who are actively involved in the aviation psychology research. The selection shall be made by the Department of Aviation faculty in consultation with the Dean of the College of Engineering, the Graduate School, and the University Committee on Student Financial Aid.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

$23,180

The Robert S. Young, M.D. Endowment Fund
in Family Medicine

The Robert S. Young, M.D. Endowment Fund in Family Medicine was established June 4, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from Dr. and Mrs. Robert S. Young, the Department of Family Medicine, family, colleagues and friends of Professor Emeritus Robert S. Young (M.D. ‘47; B.A., Arts - Medicine ‘44) of Johnstown, Ohio.

All gifts are to be invested in the University’s permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall support projects and programs which foster education in family medicine and, when appropriate, rural medicine as recommended by the Chairperson of the Department of Family Medicine.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the Dean of the College of Medicine, Chairperson of the Department of Family Medicine, or program administrative officer in order to carry out the desire of the donors.

$16,905
Establishment of Named Endowed Funds (contd)

The Bernice C. Hum Animal Science Scholarship Fund

The Bernice C. Hum Animal Science Scholarship Fund was established June 4, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from the estate of Bernice C. Hum.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to provide scholarships for students enrolled in the Department of Animal Science in the College of Agriculture. Selection shall be made by the scholarship committee of the Department of Animal Science in consultation with the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the chairperson of the Department of Animal Science in order to carry out the desire of the donor.

$15,482.91

The Lashley/Lowe Minority Scholarship Fund

The Lashley/Lowe Minority Scholarship Fund was established June 4, 1993, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund from Madge Cooper Guthery (B.S.Ed. '31) of Marion, Ohio. This fund honors Rev. Milton Lashley and Myrtle Lowe, outstanding citizens who dedicated their lives to the Marion community, the church and the preservation of Black heritage.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

Twenty percent (20%) of the annual income shall be added to the fund's principal and eighty percent (80%) shall be used to provide one or more scholarships or scholarship loans to deserving minority students who are attending The Ohio State University at Marion. The selection of the recipients shall be made upon the recommendation of The Ohio State University Marion Campus Scholarship Committee in consultation with the scholarship chairperson of the Marion Campus Minority Advisory Committee, the Dean of the Marion Campus, and the University Committee on Student Financial Aid.

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donor.

$15,381.25
The J. Howard and Josephine S. Fettro 4-H Endowment Fund

The J. Howard and Josephine S. Fettro 4-H Endowment Fund was established June 4, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from J. Howard Fettro (B.S.Agr. ’29; M.S., Rural Economics ’38) and Josephine S. Fettro of Hillsboro, Ohio.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to support the Highland County 4-H Program, with preference for, but not limited to, one or more scholarships for 4-H members, either current or alumni, of Highland County, Ohio. Should the income exceed the scholarship as determined by the Highland County 4-H Advisory Committee, the annual income may be used to support the funding of awards; training of volunteer leaders; sponsoring seminars or programs; purchasing of material or services that will supplement the 4-H program; and marketing of the local 4-H program. All expenditures from this fund shall be approved by the Highland County 4-H Advisory Committee. Beneficiaries and the number of scholarships are to be determined by a committee of, or approved by, the Highland County 4-H Advisory Committee in cooperation with the University Committee on Student Financial Aid. The scholarships may be awarded to any undergraduate or graduate students attending The Ohio State University.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees with preference being given to recommendations from the Director of the Ohio State University Extension in consultation with a committee representing the Highland County 4-H community in order to carry out the desire of the donors.

$15,000

The First Community Village Endowed Scholarship Fund

The First Community Village Endowed Scholarship Fund was established June 4, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from the First Community Village, Columbus, Ohio.

All gifts are to be invested in the University's permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall provide scholarships to students enrolled in the Division of Hospital and Health Services Administration within the College of Medicine, who have an interest in long-term care management and policy. The selection of qualified candidates shall be made on the basis of criteria developed by a selection committee within the Division. The final award(s) shall be made to scholarship recipients by the Chairperson of the Division of Hospital and Health Services Administration and the Dean of the College of Medicine in consultation with the University Committee on Student Financial Aid.
Establishment of Named Endowed Funds (contd)

The First Community Village Endowed Scholarship Fund (contd)

It is the desire of the donor that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the Dean of the College of Medicine or program administrative officer in order to carry out the desire of the donor.

$15,000

The Dr. John C. Kirkpatrick Endowed Scholarship Fund

The Dr. John C. Kirkpatrick Endowed Scholarship Fund was established June 4, 1993, by the Board of Trustees of The Ohio State University, with gifts to The Ohio State University Development Fund in honor of John C. Kirkpatrick (O.D., Optometry, 1972) from his many friends and colleagues. This fund commemorates Dr. Kirkpatrick’s life and career.

All gifts are to be invested in the University’s permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.

The annual income shall be used to award scholarships to Optometry students who have demonstrated (1) a high degree of academic potential, (2) scholastic ability and enthusiasm for learning, and/or (3) financial need. The award recipients shall be selected by the Dean of the College of Optometry program in consultation with the University Committee on Student Financial Aid. Should income from this fund not be awarded in any given year, then the income shall be added to the fund’s principal.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

$15,100

The Ohio State University Rugby Football Club Endowment Fund

The Ohio State University Rugby Football Club Endowment Fund was established June 4, 1993, by the Board of Trustees of The Ohio State University with gifts to The Ohio State University Development Fund from friends and alumni of the Club.

All gifts are to be invested in the University’s permanent endowment fund, under the rules and regulations adopted by the Board of Trustees of The Ohio State University, with the right to invest and reinvest as occasion dictates.
Establishment of Named Endowed Funds (contd)

The Ohio State University Rugby Football Club Endowment Fund (contd)

The annual income shall be used to fund the extraordinary activities of the Rugby Football Club, including trips to national and international competition, as approved by the Director of University Recreation and Intramural Sports.

It is the desire of the donors that this fund should benefit the University in perpetuity. If the need for this fund should cease to exist or so diminish as to provide unused income, then another use shall be designated by the Board of Trustees in consultation with the appropriate college dean, department chairperson, or program administrative officer in order to carry out the desire of the donors.

$15,000

THE OHIO STATE UNIVERSITY FOUNDATION

Approval of Description and Establishment of Fund

The Chalmers P. Wylie Scholarship Fund for Public Service

The Chalmers P. Wylie Scholarship Fund for Public Service was established June 4, 1993, by the Board of Trustees through funds received by the University from The Ohio State University Foundation, which has established an endowed fund with gifts from Congressman Chalmers P. Wylie and friends in the name of his grandchildren, Bryan Wylie, Pamela Poston, and Tamara Poston.

Income provided by the Foundation shall be distributed to the Director of the School of Public Policy and Management in the College of Business to fund scholarships for students in the School of Public Policy and Management. The Director, in consultation with the donor and the University Committee on Student Financial Aid, shall select the recipient(s) of the scholarship(s). Criteria for awards include not only academic achievement but also leadership and commitment to public service.

$50,000

Change in Description of Establishment Fund

The Professor John C. Burnham Endowment Fund

The Professor John C. Burnham Endowment Fund was established September 2, 1992, by the Board of Trustees through funds received by the University from The Ohio State University Foundation, which has established an endowed fund with gifts from a friend and designated for the support of the Department of History. The description was revised June 4, 1993.

Income provided by the Foundation shall be distributed to University Libraries to be used to acquire materials for the permanent collections of primary concern and interest to the Department of History. Expenditures from this fund shall be approved by the Chairperson of the Department of History.
STUDENT AFFAIRS COMMITTEE REPORT

Mr. Francisco:

This morning the Student Affairs Committee met and heard from several sorority and fraternity presidents. I would like at this time to call on David Strauss, Coordinator for Greek Affairs, to address the Board.

Mr. David Strauss:

I want to thank you this morning for asking me to come before the Board. I represent 4,000 students and 68 fraternities and sororities that are part of the Ohio State Greek community. The Ohio State Greek community is one of the largest nationally, and together with Miami of Ohio and the University of Illinois, we are in the Big Three for the size of Greek systems. For the sake of time, I have put together for you a brief overview about the Greek system at Ohio State. We have three governing councils that run the system and they are part of three national councils, which is shown on the first page. Often when people come into my office or they have reports to do, I begin by explaining that there is a national council and then there are local chapters.

The second page of the report talks about what the Greek community has done this year, both system-wide and also as individual chapters in community service. For the Greek Week Blood Drive, over 2,000 units of blood for the American Red Cross was raised. The Greeks are also crucial in the Michigan/OSU Blood Drive that takes place in the fall. We collected over 1 ton of food for the Mid-Ohio Food Bank and had a carnival that over 400 local underprivileged youths attended. This year alone in philanthropy, over $100,000 has been raised and the numerous types of activities are listed. The Greeks volunteer over 5,000 hours a year, everywhere from working at the OSU Hospitals to cleaning up the highways through an Adopt-A-Highway Program.

Of the Greek-wide programs we did this year, and we will be continuing on for next year, one that we are very excited about is the Adopt-A-School Volunteering Program. We were selected as one of 50 pilot schools to partake in the Adopt-A-School Volunteering Program. We will be doing that with the Indianola School which sits on 17th and Indianola, right in the middle of the Greek community. This program is funded by a Kellogg Foundation Grant that the National Interfraternity Council obtained, so we will be part of that.

We have been doing quite a bit with alcohol awareness. We have had speakers and seminars through our Gamma Chapter, which is Greeks Advocating the Mature Management of Alcohol. Also, our Greek honorary, Order of Omega, has a leadership conference every year. Kate Terrill, Panhellenic President, spoke earlier about the Rape Education Program that goes on throughout the Greek community. We have had an AIDS awareness speaker. The Perfect Party was to talk about how to run a party safely, because that is very much an issue for us. Fall Quarter we are planning on having a Campus of Difference Program with the Anti-Defamation League.

The third page of the report lists some of the issues that we are facing. One of the issues that we talked about earlier this morning was the declining rush numbers. Rush is the time of year when we do membership recruitment. Rush is done in the fall for the men and women of IFC and Panhellenic, and the Black Greek Council begins their recruitment in October. Together with economic issues and enrollment issues, we see the number of people getting involved in Greek life go down. We are
STUDENT AFFAIRS COMMITTEE REPORT (contd)

Mr. Strauss: (contd)

looking at countering that by having a Sorority Rush Task Force and also a Rush Symposium for the men to talk about how we can get our numbers and keep them going up.

Legal Liability and Risk Management continues to be an issue for all Greek systems, not only with alcohol risk management, but hazing and date rape issues. We work on a daily basis with these types of issues. One thing Ohio State has taken part in and has produced is a video that went out to over 400 chapters to talk about alcohol education.

The publication before you tells a little bit more about our system. This will go out to all new students this fall to let them know about fraternities and sororities at Ohio State. I also have some extra copies for the Vice Presidents who wish to have a copy. I will just leave them here for you. If there are any questions that you have, I will be glad to help you out. Thank you, Hiawatha.

Mr. Francisco:

Thank you, David. We also met with the Student Government Presidents this morning. I would like to recognize Chris Norman, who is our newly elected Undergraduate Student Government President. One of their concerns was the computing fees for the College of Business and the search for a new Vice President for Student Affairs. Also, he recognized the alcohol problem and they will be starting a new task force to address this problem in the fall.

Karen Duncan, President of the Council for Graduate Students, shared the same view about the computing fees for the College of Business. She also shared the same concerns for the search for Vice President for Student Affairs. I also want to recognize the newly elected Graduate President Frank Chloupek and Vice President Cherie Bayer. That concludes my report.

--0--

ACADEMIC AFFAIRS COMMITTEE REPORT

Mr. Kessler:

This morning the Academic Affairs Committee met. We were to have heard a report on decision making at the University by a group of faculty members, but because of the shortage of time we deferred that for a subsequent committee meeting. We might meet before the next Board meeting and if so, we will let the other Board members know so they can attend. I would like to present the following resolutions for your consideration:

AMENDMENTS TO THE BYLAWS OF THE BOARD OF TRUSTEES AND RULES OF THE UNIVERSITY FACULTY

Resolution No. 93-147

Synopsis: The Academic Affairs Committee recommended the approval of the following amendments to the Bylaws of the Board of Trustees and Rules of the University Faculty.
WHEREAS the University Senate pursuant to rule 3335-1-09 of the Administrative Code is authorized to recommend through the President to the Board of Trustees the adoption of amendments to the Bylaws of the Board of Trustees and Rules of the University Faculty as approved by the University Senate; and

WHEREAS the proposed changes in the Bylaws of the Board of Trustees and Rules of the University Faculty were approved by the University Senate on May 1, 1993:

**Amended Bylaw**

3335-1-05 University organization.

(A) Unchanged.

(B) Basic educational organization of the university. The basic organization of the educational units of the university shall be departments, divisions, academic faculties, schools, academic centers, colleges, regional campuses, the graduate school, the colleges of the arts and sciences, and the agricultural technical institute.

(C) and (D) Unchanged.

(E) Academic centers; defined. The unit of the university for research, instruction, or related service which crosses department, division, academic faculty, school, or college boundaries is the academic center.

Balance unchanged.

**Amended Rules**

3335-3-17 Principal administrative officials.

(A) The term "principal administrative official" shall include the members of the president's executive committee, the deans of the colleges and the dean and directors of regional campuses and their designated staffs, the director of the university libraries, chairpersons of academic departments and faculties, and directors of schools and academic centers. The members of the president's executive committee shall identify to the president such other persons in their areas of responsibility who shall be considered principal administrative officials of the university.

Balance unchanged.

Establishment and Organization of Regional Campuses, Colleges, Schools, Departments, and Academic Centers

3335-3-25 Organization of the university.

(A) and (B) Unchanged.

(C) The basic organization of the educational units of the university shall be departments, divisions, academic faculties, schools, academic centers, colleges, regional campuses, the graduate school, the colleges of the arts and sciences, and the agricultural technical institute.
AMENDMENTS TO THE BYLAWS OF THE BOARD OF TRUSTEES AND RULES OF THE UNIVERSITY FACULTY (contd)

Amended Rules (contd)

3335-3-34 Schools, departments, divisions, academic faculties and sections; defined and located.

(A) through (F) Unchanged.

(G) A "section" is an informal unit within a school, department, division, or academic center which is established to expedite the administration of a given academic subject. The function of a section shall be to assist the parent unit in the administration of the subject and to provide an organizational structure for relationship with professional organizations or other individuals with similar interests. The faculty member in charge shall be known as the section head. The head of the section is appointed by the administrator of the parent unit and has responsibilities delegated by the administrator of the parent unit. The formation of a section must be reported to the council on academic affairs.

Balance unchanged.

3335-3-36 Academic centers.

(A) An academic center is a non-degree granting educational unit of the university engaged in research, instruction, or related service which crosses department, division, academic faculty, school, or college boundaries. An academic center is defined by its mission and scope, not its title, and may be described as a center, institute, laboratory, or similar term. Use of "center" or "institute" in the names of proposed units of the university shall be limited to academic centers, unless approved by the council on academic affairs.

(B) Academic centers shall be established or abolished by the board of trustees upon the recommendation of the university senate and the council on academic affairs. Faculties of existing educational units that would commit or receive resources shall be consulted in the creation or abolition of an academic center. If the academic center has a research or graduate education component, the council on research and graduate studies shall be consulted.

The office of academic affairs shall maintain a register of all academic centers and appropriate records concerning each one.

(C) Reporting lines for academic centers shall be specified by the senior vice president for academic affairs and provost on the recommendation of the council on academic affairs and, where appropriate, the council on research and graduate studies.

An academic center shall be administered by a director who shall be appointed by and report to the dean of the pertinent college or, where there is no single pertinent college, to a dean, governing board of deans, or vice president, as determined by the nature, purposes, and special circumstances of the academic center.

(D) Each academic center shall have an oversight committee nominated by the person or board to whom the director reports and approved by the faculty of the center. The majority of the oversight committee shall consist of regular faculty from the academic units involved in the academic center. The director shall consult regularly with the oversight committee.
AMENDMENTS TO THE BYLAWS OF THE BOARD OF TRUSTEES AND RULES OF THE UNIVERSITY FACULTY (contd)

Amended Rules (contd)

(E) Although academic center may not establish independent course offerings and degree programs, they may participate in cooperative programs involving course offerings and degree programs within existing academic units. With the approval of the council on academic affairs, the faculty of a school or college may delegate to an academic center the authority to offer courses or degree programs established under the auspices of that school or college. Proposals for any such courses or programs must be forwarded to the office of academic affairs with the signature approval of the appropriate school or college which must retain ultimate authority and responsibly for the courses or degree programs.

(F) University faculty and staff may affiliate with an academic center under procedures approved by its oversight committee. Academic centers shall not serve as tenure initiating units.

(G) The director of each academic center shall develop in conjunction with the oversight committee a pattern of administration for the center.

The director of each academic center shall submit an annual report to the oversight committee; to the dean, governing board of deans, or vice president to whom the director reports; and to the office of academic affairs, as part of the annual budget-review process of the university. The director shall consult with the oversight committee during preparation of the annual report.

(H) Separate fiscal units shall be established and maintained only for authorized academic centers.

(I) Every four years the office of academic affairs shall request from the director of an academic center, its oversight committee, and the dean, governing board of deans, or vice president to whom the director reports, recommendations concerning reporting lines, governance, performance and effectiveness, and the continuation of the academic center.  (B/T 9/8/61,6/4/93)

Rescind Rule 3335-3-37 Research institutes, establishment and administration.
Rescind Rule 3335-3-38 Director, Mershon center for education in national securtiy.
Rescind Rule 3335-3-39 Center defined.

3335-5-491 Mershon committee on education in national security.

(A) Unchanged.

(B) The committee shall function principally in an advisory capacity to the director with respect to the development of a program of education and research in national security which will support and be in harmony with the general educational and research aims of the university. The committee shall be charged with the responsibility of ensuring that the program makes a significant and continuing contribution to the university-wide program for education and research in national security.

Balance unchanged.

NOW THEREFORE
AMENDMENTS TO THE BYLAWS OF THE BOARD OF TRUSTEES AND RULES OF THE UNIVERSITY FACULTY (contd)

BE IT RESOLVED, That the foregoing amendments to the Bylaws of the Board of Trustees and Rules of the University Faculty be adopted as recommended by the University Senate.

Upon motion of Mr. Kessler, seconded by Mr. Skestos, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

PERSONNEL ACTIONS

RESOLVED, That the personnel actions as recorded in the Personnel Budget Records of the University since the May 7, 1993 meeting of the Board, including the following Appointment of Chairpersons, Reappointment of Chairpersons and Director, Reappointment of Principal Administrative Officials, Appointment, Leaves of Absence Without Salary, Leave of Absence Without Salary--Change in Dates, Professional Improvement Leaves--Change in Dates, and Emeritus Titles, as detailed in the University Budget be approved and the Medical Staff Appointments/Reappointments (The Ohio State University Hospitals) approved April 22, 1993, by the Hospitals Board be ratified.

Appointment of Chairpersons

May 1, 1993 through September 30, 1997

Management and Human Resources

Stephen L. Mangum

October 1, 1993 through September 30, 1997

History

Michael J. Hogan

Reappointment of Chairpersons and Director

July 1, 1993 through June 30, 1994

Physical Medicine and Rehabilitation

Paul E. Kaplan

July 1, 1993 through June 30, 1997

Division of Hospital and Health Services Administration

Stephen F. Loebs

Physiology

Jackie D. Wood

Psychiatry

Henry A. Nasrallah

School of Allied Medical Professions

Stephen L. Wilson

Reappointment of Principal Administrative Officials

JULIUS S. GREENSTEIN, Dean and Director, The Ohio State University Newark Campus, effective July 1, 1993, through June 30, 1994, pursuant to rule 3335-3-17 of the Administrative Code.

DONALD HARRIS, Dean, College of the Arts, effective July 1, 1993, through June 30, 1996, pursuant to rule 3335-3-17 of the Administrative Code.
Reappointment of Principal Administrative Officials (contd)

ROBERT M. ARKIN, Associate Dean of Undergraduate Studies, Colleges of the Arts and Sciences, effective July 1, 1993, through June 30, 1997, pursuant to rule 3335-3-17 of the Administrative Code.

Appointment

RIC WANETIK, Administrative Consultant to the President for Cultural Affairs, President's Office, effective immediately, with No Salary.

Leaves of Absence Without Salary

JOHN C. RULE, Professor, Department of History, effective Spring Quarter 1993, to complete major projects.

ROSEMARY BOLIG, Associate Professor, Department of Family Relations and Human Development, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994, to accept a visiting professorship at Mt. Vernon College, Washington, DC.

MARK D. FULLERTON, Associate Professor, Department of History of Art, effective Autumn Quarter 1993 and Winter Quarter 1994, to accept a visiting professorship at Bryn Mawr College, Bryn Mawr, PA.

DAVID GINZBURG, Assistant Professor, Department of Mathematics, effective Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994, to work at Tel-Aviv University, Tel-Aviv, Israel.

GAIL W. YUEN, Instructor, Ohio State University Extension, effective May 1, 1993, through April 30, 1994, for personal reasons.

Leave of Absence Without Salary--Change in Dates

JAMES C. TURNER, JR., Assistant Professor, Department of Mathematics, change leave from Autumn Quarter 1992 and Winter Quarter 1993, to Winter Quarter 1993.

Professional Improvement Leaves--Change in Dates

MICHAEL BRAUNSTEIN, Professor, College of Law, change leave from Autumn Semester 1993 and Spring Semester 1994, to Spring Semester 1994.

BERND FISCHER, Associate Professor, Department of Germanic Languages and Literatures, change leave from Autumn Quarter 1993, Winter Quarter and Spring Quarter 1994, to Winter Quarter, Spring Quarter, and Summer Quarter 1994.

Emeritus Titles

FRANCIS S. WRIGHT, Department of Pediatrics, with the title Professor Emeritus, effective June 1, 1993.
PERSONNEL ACTIONS (contd)

Emeritus Titles (contd)

ROBERT J. DURAN, Department of Surgery (Plastic Surgery), with the title Clinical Professor Emeritus, effective June 1, 1993.

Medical Staff Appointments (The Ohio State University Hospitals)

Brown, David A., Attending Staff, Department of Surgery--Division of Thoracic and Cardiovascular Surgery
Dadmehr, Nahid, Courtesy Staff, Department of Neurology
Farooqui, Asim A., Limited Staff, Department of Psychiatry--Division of General Psychiatry
Kosloske, Ann M., Attending Staff, Department of Surgery--Division of Pediatric Surgery
Lambert, David R., Attending Staff, Department of Internal Medicine--Division of Dermatology
Allen, Elizabeth DeFrancis, M.D., Attending Staff, Department of Pediatrics
Beech, Amy Leigh, M.D., Limited Staff, Department of Pediatrics
Bowman, Mary Jo Alice, M.D., Attending Staff, Department of Pediatrics
Gunn, Joseph Donald, M.D., Limited Staff, Department of Pediatrics
Haley, Daniel Thomas, D.P.M., Courtesy Staff, Department of Surgery/Division of Orthopaedic Surgery
O'Dorisio, M. Sue, M.D., Attending Staff, Department of Pediatrics
Ribeiro, Isabela Quilelli Correa Rocha, M.D., Limited Staff, Department of Internal Medicine/Division of General Medicine
Racich, Kathleen Ann, D.O., Limited Staff, Department of Psychiatry/Division of General Psychiatry
Wallenbrock, Angela B., M.D., Attending Staff, Department of Psychiatry/Division of Child Psychiatry
Whitcomb, Michael Edward, M.D., Attending Staff, Department of Internal Medicine/Division of General Medicine

Medical Staff Reappointments (1992-1994) (The Ohio State University Hospitals)

Nag, Subir, Attending Staff, Department of Radiology--Division of Radiation Oncology
Wise, Gary, Courtesy Staff, Department of Neurology
Ruff, Michael E., M.D., Courtesy Staff, Department of Surgery/Division of Orthopaedic Surgery
Szames, Steven E., M.D., Courtesy Staff, Department of Surgery/Division of Orthopaedic Surgery

Upon motion of Mr. Kessler, seconded by Mr. Skestos, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

RESOLUTIONS IN MEMORIAM

Resolution No. 93-149

Synopsis: The Academic Affairs Committee recommended the approval of three Resolutions in Memoriam.

RESOLVED, That the Board adopt the following Resolutions in Memoriam and that the President be requested to convey a copy to the families of the deceased.
RESOLUTIONS IN MEMORIAM (contd)

Paul S. Fancher

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on April 1, 1993, of Paul S. Fancher, M.D., Professor Emeritus in the Department of Internal Medicine.

Paul S. Fancher, M.D., was born on October 15, 1903, in Huron County, Ohio. He attended Ohio Wesleyan University and graduated in 1925 with an A.B. degree. In 1930 he graduated from The Ohio State University College of Medicine with an M.D. degree. His postgraduate training was completed at Fort Sam Houston, Texas, the Army of Medical School in Washington D.C., the Mayo Clinic and at a number of other institutions including Walter Reed Army Hospital.

Over the course of his active career, Dr. Fancher held a number of major administrative and academic roles, most of which were at prestigious military hospitals throughout the U.S. In the early 1930's, he served as Chief of the Contagious Disease Service at Fort Sam Houston Hospital, and he later served in the Internal Medicine service at Walter Reed Army Hospital where he was later placed in charge of the Allergy Service in that hospital. He then served at Tripler Army Hospital in Hawaii, again focusing on internal medicine. He held this post until 1939 when he was transferred to Fort Hayes Hospital in Columbus, Ohio. Subsequently, Dr. Fancher also served at Percy Jones Army Hospital in Michigan and again at Walter Reed Hospital in Washington D.C. Until 1958, Dr. Fancher served as Commanding Officer at Letterman Army Hospital in San Francisco, California, and he retired from the post in 1958 holding the rank of Brigadier General. In 1958 Dr. Fancher returned to Ohio and was appointed Director of the University Health Service and Professor of Preventive Medicine in the College of Medicine.

Dr. Fancher served his country ably during World War II, as well as in the early 1950s when he was stationed in Korea as a medical consultant. Among his many honors were the Legion of Merit with two Oak Leaf Clusters, the Bronze Star, the Medale de Honour (presented in France).

He was a member of the American Medical Association, the American College of Physicians (Fellow), and Association of Military Surgeons, and the Columbus Society of Internal Medicine. He was a Diplomate of the American Board of Internal Medicine.

Dr. Fancher was the author of a number of articles on thyrotoxicosis, hyperthyroidism, coronary disease, sarcoidosis and others.

His many contributions as a military physician, as well as a practicing physician in Ohio have earned him the deep respect of many colleagues and friends throughout the country.

On behalf of the University community, the Board of Trustees expresses its sympathy and understanding to Dr. Fancher's family. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Wolfgang Fleischhauer

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on March 17, 1993, of Wolfgang Fleischhauer, Professor Emeritus in the Department of Germanic Languages and Literatures.

Professor Fleischhauer was born in 1910 in Kassel, Germany, where he received his early education. After graduating from the Friedrich-Wilhelm Gymnasium in Cologne in 1929, he continued his studies at the University of Cologne. In 1932-33 he was a Teaching Assistant in the German Department at The Ohio State University. Having returned to Cologne, he earned his Ph.D. there in 1936. That
RESOLUTIONS IN MEMORIAM (contd)

Wolfgang Fleischhauer (contd)

same year, he crossed the Atlantic once more to join the faculty of the Department of German at The Ohio State University as Instructor. He was promoted to Assistant Professor in 1946, to Associate Professor in 1948, and to Professor in 1956. In the Spring of 1957 he was Visiting Professor at the University of Chicago. He retired in 1976, having served Ohio State for 40 years.

Throughout his long and distinguished career, Professor Fleischhauer focused his attention on Germanic linguistics. Enthusiasm for Philology led him to write a series of articles and reviews; reverence for his teacher, Hans Sperber, inspired him to compose several tributes to the master and to re-edit his History of the German Language. The way in which words changed and expanded in meaning or wandered from language to language and from country to country never ceased to fascinate him. Over the years he became a familiar sight in the German-speaking Amish settlements in northern, Ohio, where he conducted his fieldwork. Even during his retirement he continued working on the history of German immigrants by culling, transcribing, and translating documents for the Ohio Historical Society.

Wolf Fleischhauer will long be remembered as a man of enormous personal charm, as respected for his humane learning as he was beloved for his unaffected modesty. Dedicated to students and colleagues alike, he was a true friend to all who were privileged to study and work with him.

On behalf of the University, the Board of Trustees expresses to the family its deep sympathy and sense of understanding on their loss. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board's heartfelt sympathy.

Ralph H. Grimshaw

The Board of Trustees of The Ohio State University expresses its sorrow upon the death on March 8, 1993, of Ralph H. Grimshaw, Professor Emeritus in the Department of Animal Science.

Ralph Grimshaw was born July 4, 1908, in Lucasville, Scioto County, Ohio. He received his high school diploma from Menford High School on his native county and graduated from The Ohio State University in 1931. He was granted a State Life Teaching Certificate by the Public Schools of Ohio in 1934. Graduate work was pursued in both Ohio and Michigan and he received his M.S. degree from Michigan State University in 1959.

His professional career began as a Vocational Agriculture Teacher and he remained in this profession for twelve years serving at the Mowrystown and at the Thornville Public Schools. In 1943, he accepted the position of fieldman, manager and lamb grader with the Cincinnati Livestock Producers Marketing Association serving both the Hillsboro and Wilmington markets. in 1947, Mr. Grimshaw was appointed County Agriculture Extension Agent for Clinton County where he served until 1952 when he was selected to be the State Sheep Extension Specialist at The Ohio State University. He retired from this service in December 1978.

Professor Grimshaw was a true educator who never ceased to learn himself. He exhibited a genuine interest in virtually everything that he saw or heard. A tireless, innovative, productive worker, he possessed a unique organizing ability. A recognized leader at every level of the American Sheep Industry, he was a master at developing cooperation between educational, research and commercial interests and coordinated these activities in an extremely effective manner.

Though he never sought recognition for his efforts, he was the recipient of countless honors bestowed upon him by his peers in the United States livestock industry. A few of his recognitions
RESOLUTIONS IN MEMORIAM (contd)

Ralph H. Grimshaw (contd)

include being the first recipient of the Silver Ram Award by the American Sheep Producers Council, the Extension Award by the American Society of Animal Science, Extension Award of Merit by the Ohio Chapter of Gamma Sigma Delta, inductee in the Ohio State Fair Hall of Fame, and his portrait was recently hung in the Ohio Agriculture Hall of Fame.

On behalf of the University community, the Board of Trustees expresses its sympathy and understanding to his family and friends. It was directed that this resolution be inscribed upon the minutes of the Board of Trustees and that a copy be tendered to the family as an expression of the Board’s heartfelt sympathy.

Upon motion of Mr. Kessler, seconded by Mr. Skestos, the Board of Trustees adopted the foregoing resolution by unanimous voice vote.

--0--

FISCAL AFFAIRS COMMITTEE MEETING

Mr. Skestos:

The Fiscal Affairs Committee is meeting as a committee of the whole this morning and we have many important issues to address. Without further adieu, I would like to call on Bill Shkurti to discuss with us first the comparative indicators on our financial resources.

REPORT ON COMPARATIVE INDICATORS ON FINANCIAL RESOURCES

Mr. Shkurti:

These comparative indicators are something we do every year at this time, as we get prepared to discuss and debate the budget. We compare where Ohio State ranks with the rest of the public Big Ten, excluding Northwestern, on a couple of financial indicators. Let me walk through those very quickly.

On the second page under the tab that talks about annual resident undergraduate fees for Ohio State and the other Big Ten public institutions, you will see that Ohio State has an average fee of $2,799. This ranks about 14 percent below average for the rest of the public Big Ten. If we look on the next page on how this has changed over time, you will see that our resident undergraduate tuition has remained relatively stable in that period. Our non-resident undergraduate tuition has increased slightly, although still below average, and our non-resident graduate tuition is now the second highest in the public Big Ten.

The next comparison shows where Ohio State’s tuition stands compared to other public assisted universities in the State of Ohio. When you think of us as the most comprehensive institution in the State, I would argue that we are also the flagship institution. It is interesting to notice that our tuition compared to other state institutions is tenth out of 13 and in fact has not grown much over the last five years compared to the others. The other thing that I think is important to mention is the State of Ohio tends to be a relatively high tuition, low state support state compared to other states. That needs to be taken into account in terms of comparing these figures as well.
REPORT ON COMPARATIVE INDICATORS ON FINANCIAL RESOURCES (contd)

Mr. Shkurti: (contd)

The next chart compares our expenditures per student with the other public Big Ten. Again, it shows that we are slightly below the average at $11,127, 7 percent below the weighted average. Our tuition rates are slightly below average and our expenditures per student rates slightly below average as well. You can see from the chart that there is one very big spender in that list of ten -- the University of Michigan. The University of Michigan is at a relatively high level, but I would argue the quality of what is offered there is not as high in proportion as the expense. Before I go on to the next set of charts, Mr. Chairman, I will stop to see if there are any questions from any members of the Board about this particular display of information.

(See Appendix LXIV for charts, page 905.)

--0--

BRIEFING ON ISSUES FOR FY 1994 BUDGET

Mr. Shkurti:

The items that are in the Board books have been publicly distributed to the Board and to the campus over the last two weeks. I will not go over them in detail other than to emphasize the $25 million problem we are discussing is a projection for next fiscal year. For Fiscal Year 1993 our budget will come in on target and on balance, although narrowly, so that this is a projection into the next year and is something we will be dealing with over the next month or two.

At the end of the tab, there is a time table that says what happens next. I want to make sure that I have expressed at least what our time line is so the Board members and the public are comfortable with what we are doing. We have already begun consultations with the deans, faculty, Senate Fiscal Committee, and Staff Advisory Committee in the month of June about what we might do. Hopefully, if everything goes well we will have a new State budget after the old one expires on June 30, and there is some optimism that we will have it before then. That will tell us a lot about both what our tuition and State support will be, so it will allow us to finalize our figures. We hope to come back then to the Board at the July 9 meeting with some overall parameters about how we propose to get our revenue and spending in balance for Fiscal Year 1994.

The deans have requested -- and with your support -- that we give them more time than we traditionally would at this stage of the process because of the necessity to deal with this $25 million gap. So the reduction plans for specific units will be due back to the Provost and to the Office of Finance on August 2. We will then come back with phase 2 of the budget plan to the Board at its September meeting. Phase 2 will involve the specific recommendations as to the level of reallocations for each specific unit. There will be a two-step process that is somewhat different than what we have done before over the last three years. Our budget process has been different every year because our challenges have become different and more challenging every year. We think that we have struck the proper balance between moving forward with consultations in a deliberate way and also getting the problem resolved as soon as possible.
BRIEFING ON ISSUES FOR FY 1994 BUDGET (contd)

Mr. Shkurti: (contd)

The other point is one of the things the President has stressed for quite some time --
and I know the Board has been supportive of -- is for the University to plan on a
longer horizon. One of the things we are doing this year is we are planning on a two-
year cycle, so we will also begin planning for Fiscal Year 1995 even before we have
Fiscal Year 1994 wrapped up. That means we will be trying to ride two horses at the
same time, with the obvious challenges that that can produce. I think it is something
important that we need to do as part of building on our academic planning process
so that we look at a longer horizon.

The only other thing I would add is that there is a resolution here that provides for an
interim budget. As you know the current budget expires on June 30 and we will not
be meeting with the Board again until July 9. It would ease my state of mind and I
suspect 30,000 other people who depend on University paychecks, if the Board
would see fit to pass an interim budget resolution so we have the authority to
function between June 30 and July 8.

INTERIM BUDGET

Resolution No. 93-150

Synopsis: The authorization to make expenditures in 1993-94 is proposed.

WHEREAS the University has identified an operating shortfall for the next fiscal year and the levels of
State financial support for 1993-94 have not yet been established; and

WHEREAS it is necessary to defer decisions concerning salary levels, fee levels, and other University
expenditures until State subsidy support has been determined in an appropriations bill and distributed
by the Board of Regents; and

WHEREAS it is necessary to continue University expenditures, including payment of faculty and staff,
prior to the time that a Current Funds Budget for 1993-94 is developed and adopted;

NOW THEREFORE

BE IT RESOLVED, That the University be authorized to make expenditures consistent with the level
of resources contained in the Mid Year Report of Fiscal Year 1992-93 pending the adoption of the
Current Funds Budget for 1993-94; and

BE IT FURTHER RESOLVED, That at the regularly scheduled meeting of the Board of Trustees,
following the passage of the state budget and projected distribution of subsidy from the Board of
Regents, the President will present the Administration's recommendation for the Current Funds
Budget for 1993-94.

Upon motion of Mr. Skestos, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing
resolution by unanimous roll call vote.

(See Appendix LXV for background information, page 911.)
June 4, 1993 meeting, Board of Trustees

REPORT ON THE IMPLEMENTATION OF THE FY 1993
$7.5 MILLION BUDGET REDUCTION PLAN

Mr. Shkurti:

The next tab deals with the lingering $7.5 million problem from last July. We have talked about this quite a bit at Board meetings and I am sure everyone is as weary of hearing about this as I am. Fortunately, we are close to getting it wrapped up and since we have talked about it I will not go over it in length. A resolution is not required because one has been passed already, but this is kind of a final report on how we hope to keep these savings on a continuing basis. The only real changes are summarized in the memo. We have divided the proposals because some of the things we are doing are somewhat experimental. We want to make sure we are balancing trying new things with financial responsibilities, so we have shown what the likelihood is of various savings.

At the February meeting we indicated that we would need a trigger reduction. A reduction in the annual rate of 1.2 percent is what we are recommending on the administrative budgets of the academic support units and the administrative portions of the college budgets. That means we are protecting the core instructional units or academic departments from this particular round of reallocations as we promised.

The third point is that we are being more indefinite about savings on the PERS deductions from student paychecks because we are still unsure about how the IRS will end up treating this issue. Mr. Chairman, that completes my presentation regarding the $7.5 million.

Mr. Skestos:

Any questions for Mr. Shkurti? Thank you.

(See Appendix LXVI for background information and chart, page 921.)

--0--

HEALTH INSURANCE RATES FOR FACULTY AND STAFF

Ms. Tom:

We wanted to just take this opportunity to review with the Board the new premium increases for our medical insurance for Fiscal Year 1994. The premiums for two of our plans, the OSU Health Plan and Traditional Plan, which require contributions from employees will increase. These increases are to cover projected costs and funding for medical services for the coming year. These two plans offer three levels of coverage: single, two-person, and family. And the premium increase amounts for these three levels respectively are: $5.00 a month for the individual; $10.00 a month for the two-person plan; and $15.50 a month for the family plan. This translates to $60.00 a year for individual coverage, $120.00 a year for the two-person coverage, and $190.00 a year for the family coverage.

We also will be offering a new lower cost plan called University Prime Care. This is what we call an exclusive provider plan and that restricts the participants to the OSU Hospitals’ network services. Employees can elect to enroll in this plan and the premium savings will be about 40 percent below the OSU Health Plan and the
HEALTH INSURANCE RATES FOR FACULTY AND STAFF (contd)

Ms. Tom: (contd)

Traditional Plan. The Buckeye Plan, which is non-contributory, will have no increase and that is available for employees to move into.

We recognize that the cost of health insurance is a major issue not only at OSU but nationally. We are concerned and this remains a priority. We feel that we have made very good progress in terms of cost containment efforts, and we have had very good support from the OSU Hospitals and our medical professionals there. We will continue in our efforts.

Just this year we made two changes that have been significant in terms of savings. We moved to a single administrator for our claims processing, which we project will save us $1.3 million a year. The offering of this new exclusive provider plan we project will save us $1 million dollars a year. So we will continue in these efforts. Very shortly, I will be appointing a committee that will involve University professionals, faculty, and staff to really help us look at developing a long-term comprehensive strategic plan for cost containment at the University.

Mr. Skestos:

Ms. Tom, I notice that we are looking at about a $4 million increase in health insurance costs this coming year. Isn't that what we have budgeted in there? Is this going to continue or will these costs reduction methods bring that figure down, so that we won't be looking at an increment similar to that each year?

Ms. Tom:

I think the increases will probably continue because of inflation, but we would hope that we can control the rate of increases and hopefully see some downward spiral.

Mr. Skestos:

So those two -- the million dollar cut and the $1.3 million cut -- are not necessarily all going to come into place in the next fiscal period. But we hope to have them in place over a period of time that they will then kick in so we will not have the same increase that we have been talking about.

Ms. Tom:

We are hopeful that the impacts will be continual in terms of the reductions that we make in the plan design this year, and then we will be putting in some additional cost containment efforts. Hopefully the levels will continue to go up just because of inflation, but hopefully not as much as we have seen in previous years.

Mr. Skestos:

Any other questions?

Dr. Gee:

The whole health care cost issue is an enormously important one to get our arms around. We note that if we go to the University Prime Care there is a 40 percent savings. Linda and I talked yesterday about the fact that she is going to put
HEALTH INSURANCE RATES FOR FACULTY AND STAFF (contd)

Dr. Gee: (contd)

together another group to really take a look at how we can squeeze these costs, in addition to the squeezing that we are doing now.

The reason I point out the University Prime Care is that I am becoming increasingly convinced that hopefully we can move to a position -- we just heard that we happen to have one of the greatest hospitals in the country. We happen to have one of the finest medical schools in the country. I think that we are now going to have to convince people that they will need to give up the convenience of having the neighborhood doctor and move to being more involved as the University family is with these issues.

The difference in those health care costs are substantial and the opportunity for us to have major cost savings are clearly there. I believe we are going to have to address that issue.

Mr. Skestos:

I might add that I have done that already with my companies and have met with no opposition. They are very happy with the move to OSU.

President Gee:

You really are Scarlett and Gray, aren't you?

Mr. Skestos:

It was financially beneficial.

(See Appendix LXVII for background and chart, page 925.)

ISSUES INVOLVED IN FY 1995-96 CAPITAL REQUEST

Mr. Shkurti:

We are about at that time of year where we also have to request to the State of Ohio what we would like from them in the way of capital expenditures for next year. We will be bringing forth to the Board at the next meeting a specific request. In anticipation of that, I thought it would be valuable to share with you some of the issues that we face in the next capital budget.

We have talked about some of the constraints that we face in the operating budget. The same thing is happening in the capital budget, which is business as usual and is leading to a situation where our needs are a lot greater than what the State's ability is to support us. We either have to raise the bridge or lower the water, or a little bit of both, and that is in part what this memorandum from Dave Marsh, Assistant Vice President for the Office of Campus Planning, lays out. I will not go into detail, but I think the fundamental point that Mr. Marsh points out is that we feel our legitimate needs in the terms of State capital support for the next capital biennium are in the neighborhood of $100 million. The history of what the State has given us in the last Capital Bill is more in the range of $60 million. In some
ISSUES INVOLVED IN FY 1995-96 CAPITAL REQUEST (contd)

Mr. Shkurti: (contd)

cases we have gotten it up to $88 million, but that was rather unusual. So we do have an issue of making some very difficult choices and also trying to get more support from the State.

The other point is that we have an important problem regarding deferred maintenance at this campus and the estimate of the backlog is really mind boggling - - $268.7 million. We do not propose that this can be addressed overnight, because the problem did not occur overnight, but it does need to be addressed. There are some proposals there that we will be considering as we look at the budget.

I have also put in for your own reference a copy of what happened in the last Capital Bill, House Bill 904. The interesting thing about that is it shows you what we requested, what the Board of Regents recommended, and then what the Legislature gave us in House Bill 904. What you will find is that many times we request something and we do in fact receive it, for which we are very grateful. There are other times that we request something and we receive something, but it is less than what we requested and we understand how that works. Sometimes we request things and we do not receive anything at all, and that is part of the process. Sometimes we receive things we do not request and that is also part of the process. It is also part of the challenge of what we are dealing with.

The final item is a new item that I thought was important to share with you. The Board of Regents issued on May 19 their detailed guidance for the next capital plan. It was an 8-page document written in the typical, technical style and if anyone wants to read that in detail, I would be glad to share it with you. I did take the liberty -- which is always a dangerous thing to do -- of excerpting from that document and highlighting what I thought were the most important elements of what the Regents were saying. I think it is important that we focus on that for just a minute.

The first item regarding planning assumptions indicates that the Board of Regents, who will be the first people to review our request, feel that the next capital bill is likely to be smaller than the one that just passed. The one that just passed was the one that gave us $60 million, so they may be saying in their way that they will have one smaller. Now what they say and what the Governor does and what the Legislature does may or may not be the same thing, but I think it is important to keep that in mind.

They are also saying one of their criteria is to show us that the projects that you do need are so urgent that they cannot be deferred for another 2 years, which is point number 2. So in other words, the tradition in the past where when you get planning money in a capital bill you always get the money to complete the project and significantly move forward the next year may not be true in this next biennium -- at least in the eyes of the Board of Regents.

The next item deals with funding criteria and they talk about the twin test of importance and urgency, which is consistent with what they have said before. The fourth item is, and actually this is one we support, one of their priorities in what they call infrastructure issues. This is what we would call deferred maintenance and rehabilitation and renovation of existing facilities. They also indicate that undergraduate instruction space would be a priority, which is something we would
Mr. Shkurti: (contd)

support. We also need to point out to the Board of Regents that a part of our mission is graduate instruction and research, which also contributes to the State of Ohio.

Then, and this is an important point, they want to discourage projects which will result in bigger buildings that have higher operating costs. We need to figure that into our planning as well. And finally there is a time line.

As I indicated, we will be back to you with specific proposals at the next Board meeting, but I wanted to give you a sense of the context or the lay of the land that we will be dealing with. I would also like to give my colleague, Vice President Pichette, a chance to add anything to the issue of deferred maintenance. Janet --

Ms. Pichette:

Thank you, Bill. I think the chart speaks for itself in where we are in deferred maintenance needs. We are not as bad as many universities, but we are far from having a campus that we can be proud of -- that every building is up to code or that every building is accessible or that every building has the appearance that we want for visitors, staff, and students.

We fall about $9 million short every year and are getting farther behind in deferred maintenance. It is important that we look at the renovation needs and when we do renovations that the roofs, windows, and heating ventilation/air-conditioning systems are the first items addressed. Many times in the past we have put $2 million into a building and not taken care of those basic things. Then when it rains and you have damage done to a new interior, people wonder why. We are coordinating better and are doing building audits. We have completed about 40 or 50 percent of the building audits that detail every need of every building on campus. What is a concern at the same time is that we have competing needs, such as the College of Business, which is a very important project. This will be a new building coming at the same time with all these deferred maintenance needs. So it is a challenge, we want to make sure the Board is aware of the challenge, and the difficult decisions that must be made in the near future. Thank you.

Mr. Skestos:

Any questions for Bill or Janet?

(See Appendix LXVIII for background information, page 929.)

--0--

Ms. Pichette:

The next resolution will authorize us to proceed with two projects at University Hospitals: replacing the roof on Rhodes Hall and the first phase of the Radiology Department renovation on the second floor of Rhodes and Doan Halls. Both of these projects are funded by the Hospitals and have been reviewed by the Hospitals Board. We seek your approval to hire a design professional and request construction bids for these projects.
June 4, 1993 meeting, Board of Trustees

Mr. Kessler:

How old is the roof?

Ms. Pichette:

The Rhodes Hall roof?

Mr. Kessler:

Yes.

Mr. Fraley:

I believe it was built in 1977.

Ms. Casto:

That is not very old.

Mr. Kessler:

Shouldn't it last longer than that?

Mr. Skestos:

It depends on what the roof was constructed of -- if it was slate or wood it should last longer. If the roof was constructed of some kind of a composition -- asphalt or fiberglass -- it would not last as long.

Ms. Jill Morelli:

It is a built-up roof which has had successive renovations inside that have caused successive penetrations through the roof. This now leads us to a position where that warranty was voided as soon as we went through the roof the first time. As a consequence -- a 15-year old roof is certainly reaching perhaps the early stages of decomposition -- it is time to replace the roof now.

Mr. Skestos:

Any other questions?

Ms. Pichette:

That was Jill Morelli, University Architect, who gave you that bit of information. Thank you, Jill.

EMPLOYMENT OF ARCHITECTS/ENGINEERS AND REQUEST FOR CONSTRUCTION BIDS

Resolution No. 93-151

RHODES HALL ROOF REPLACEMENT
RADIOLOGY DEPARTMENT RENOVATION - 2ND FLOOR DOAN/RHODES HALLS

Synopsis: Employment of architects/engineers and request for construction bids for the listed projects is proposed.
EMPLOYMENT OF ARCHITECTS/ENGINEERS AND REQUEST FOR CONSTRUCTION BIDS (contd)

RHODES HALL ROOF REPLACEMENT
RADIOLOGY DEPARTMENT RENOVATION - 2ND FLOOR DOAN/RHODES HALLS (contd)

WHEREAS University Hospitals desires to repair and replace the entire Rhodes Hall roof system except for the auditorium area; and

WHEREAS the total estimated project cost is $475,000.00, and the total estimated construction cost is $400,000.00, with funding provided from University Hospitals; and

WHEREAS University Hospitals desires to proceed with phase one of a three-phase program to renovate diagnostic support service areas to expand the Radiology Film File Room to accommodate new moveable filing systems, office, and mailing functions; provide office functions for Ultrasound, CT, and Mammography; and consolidate diagnostic file reading functions; and

WHEREAS the total estimated project cost for this first phase is $750,000.00, and the total estimated construction cost for this phase is $615,000.00, with funding provided from University Hospitals:

NOW THEREFORE

BE IT RESOLVED, That the President and/or Vice President for Business and Administration be authorized to select qualified architectural/engineering firms as necessary for these projects and that the fees for these services be negotiated between the firms selected and The Ohio State University; and

BE IT FURTHER RESOLVED, That the President and/or Vice President for Business and Administration be authorized to request construction bids on this project in accordance with established University procedures, and if satisfactory bids are received, to award contracts, with all actions to be reported to this Board at the appropriate time.

Upon motion of Mr. Skestos, seconded by Mr. Shumate, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

EASEMENT

Resolution No. 93-152

OHIO BELL TELEPHONE COMPANY
UNIVERSITY AIRPORT

Synopsis: An easement for the installation of underground telephone conduit on property located at the University Airport is proposed.

WHEREAS the Ohio Bell Telephone Company has requested the granting of a 15-year easement consisting of a strip of land approximately 15 feet in width and approximately 6,600 feet in length for installation of underground telephone conduit on the north side of Case Road from Sawmill Road to a point south of the FAA Tower and then north into the Tower located at the University Airport; and

WHEREAS the underground telephone conduit will provide service between Port Columbus International Airport and the FAA Tower at Don Scott Field; and
WHEREAS the Ohio Bell Telephone Company will install a 4-inch underground conduit for the University's exclusive use; and

WHEREAS the appropriate University offices have recommended the approval of this easement:

NOW THEREFORE

BE IT RESOLVED, That the Vice President for Business and Administration be authorized to request the Deputy Director of Public Works of the Department of Administrative Services, pursuant to his statutory duties, to act for and on behalf of the University in developing the necessary legal instruments to provide for this easement.

Upon motion of Mr. Skestos, seconded by Mr. Kessler, the Board of Trustees adopted the foregoing resolution by unanimous roll call vote.

--0--

REPORT - UNIVERSITY'S ENDOWMENT FUND

RESOLVED, That the report on the University's Endowment Fund, dated May 21, 1993, as submitted to the Investments Committee of the Board of Trustees, be received and filed with the official records of the Board.

--0--

Thereupon the Board adjourned to meet Friday, July 9, 1993, at The Ohio State University Fawcett Center for Tomorrow, Columbus, Ohio.

Attest:

Madison H. Scott  Deborah E. Casto
Secretary        Chairman
